Angular momentum conservations for solar gas confined by closed field lines or outflowing along open magnetic field lines 01 p0176 A70-10251

Semiempirical potential energy surface generation for triatomic hydrogen from London equation by evaluating Coulomb and exchange integrals taking into account effective orbital overlap 01 p0147 A70-10469

Equations of motion, conservation of mass, momentum and energy for elastic bodies with lattice-type surface defects 01 p0209 A70-11400

Conservation equations for mass, mean momentum and kinetic energy for incompressible turbulent boundary layer, using finite difference procedure 02 p0284 A70-12347

Equations of conservation of mass, energy and momentum applied to rotation effects on convective motion in planetary interiors 05 p0905 A70-15759

Conservation equation for thermal energy in turbulent shear flow, including turbulence kinetic energy equation terms [WSCJ PAPER 69-43] 06 p1179 A70-17983

Similarity model for spherically symmetrical flow following explosion in rarefied atmosphere satisfying hydrodynamic energy conservation equation 07 p1260 A70-19981

Rayleigh number effects on convection in planetary mantles, considering conservation equations of mass, energy and momentum 09 p1752 A70-22312

Hydrodynamic analogy in restricted three body problem of celestial mechanics, discussing mass and momentum conservation and physical properties uniqueness 10 p1938 A70-24180

Solar wind energies spherical surface average and fluctuations from integration of conservation equations 14 p2630 A70-30357

Displacement interacting boundary layer in symmetry plane region of flat hypersonic delta wing by control volume balances for mass, momentum and energy 17 p3010 A70-34975

Heat and mass transfer in flowing fluid, deriving conservation and constitutive equations, with application to boundary layer flow of gases 17 p3069 A70-35033

Non-LTE radiative gas flow conservation equations 24 p4325 A70-45610

CONSERVATION LAWS

Conservation laws for viscous incompressible two dimensional and axisymmetric flow written in integrodifferential form

01 p0063 A70-10935

Integral relations describing laws of conservation and Sobolev theorem used in deriving a priori estimates for nonlinear parabolic equations first boundary value problem

10 p1908 A70-23924

General relativity integral conservation laws of system of bodies in curved space-time obtained from symmetrical energy-momentum tensor

12 p2274 A70-28222

Three dimensional oblique incidence liquid jet impinging on solid surface, evaluating flow force by applying mass and momentum conservation

13 p2389 A70-29540

Liquid metal MHD conservation cycles, discussing evolution and status of power generation at various temperatures

20 p3563 A70-39325

General relativity integral conservation laws of system of bodies in curved space-time obtained from symmetrical energy-momentum tensor

20 p3673 A70-40097

Turbulent flow asymmetrical mechanics equations derivation from conservation laws, discussing Navier-Stokes equation, angular momentum and transport theory

21 p3806 A70-40612

Conservation laws in theory of field with group invariance properties, examining infinitesimal transformations method

22 p4075 A70-43400

MHD equations for one dimensional plane steady flow, considering conservative difference schemes for approximation

23 p4226 A70-44307

CONSOLES

NT REMOTE CONSOLES

Display console characteristics for meeting increasing applications, predicting price reduction trends, color emphasis and CRT competition as primary display component

01 p0221 A70-11286

STRIDA II consoles operation for treating air defense data, discussing data display system, work positions organization and console construction method

05 p0828 A70-16192

Radar consoles with various display components under different illumination levels to determine optimal operator performance, discussing push-button design recommendations

20 p3580 A70-39713

CONSTANTS

NT GRAVITATIONAL CONSTANT

NT GRUNEISEN CONSTANT

NT PERCEPTUAL TIME CONSTANT

NT SOLAR CONSTANT

NT TIME CONSTANT

Reduction constants simultaneous determination in earth figure theory based on astronomical, geodetic and gravimetric data

15 p2731 A70-32147

Universal constant measurement methods in Kolmogoroff third hypothesis for high Reynolds number turbulence in wind over open ocean

23 p4184 A70-44980

CONSTELLATIONS

Effective temperature of star zeta Puppis from combined angular diameter measurement and model atmospheres, comparing hot stars

24 p4404 A70-45414

CONSTITUTION

Criticism of public administration aspect of Edwards Report, noting parliamentary and constitutional difficulties in some proposals

11 p2153 A70-25857

CONSTITUTIONAL DIAGRAMS

U PHASE DIAGRAMS

CONSTITUTIVE EQUATIONS

Asymmetric thermoelasticity derived for constitutive equations based on the thermodynamics of irreversible processes, formulating variational and reciprocity theorems

01 p0209 A70-11384

Constitutive equations and thermally activated dislocation processes in metals, noting temperature and strain rate relationship

02 p0316 A70-11737

Material functions mathematical forms for Green-Rivlin constitutive equations of nonlinear viscoelasticity

03 p0585 A70-12970

Thermodynamic constitutive equations for large dynamic plastic deformation problems

03 p0585 A70-12971

Constitutive equations for orthotropic bilinear elastic materials in plane stress case, discussing unidirectional composites

03 p0587 A70-13127

Statistical equation of motion of blood by averaging motion of individual blood elements over small volume, finding constitutive equations

03 p0434 A70-13572

Nonlinear solid applied mechanics, emphasizing nonlinear constitutive equations and related subjects, cyclic loading effect on solid materials, etc

03 p0610 A70-14230

Gravity influence on constitutive equations of elasticity for crystals treated as continuous body and particle system, taking into account lattice structure

05 p0925 A70-15869

Integral constitutive relation representing incompressible viscoelastic materials and plane stress and strain conditions

05 p0930 A70-16087

Constitutive equations for isotropic elastic and thermoelastic materials with microstructure derived using free energy function, giving uniqueness theorems

05 p0932 A70-16136

Constitutive equations for Reynolds fluxes in large scale transversely isotropic turbulent mixing using gradients of mean quantities

05 p0836 A70-17103

Electromagnetic fields interaction with nonconducting neutral elastic solid, formulating relativistic variational principle for balance laws and constitutive equations

08 p1545 A70-21252

Stress-strain behavior of Al and Ti alloys, beryllium and nonmetallic structural materials based on constitutive equations describing strain rate and temperature effects

08 p1518 A70-21331

Flow rule for viscoplastic symmetric cylindrical shells, using constitutive equations for strain rate sensitive materials based on Huber-Mises yield condition

10 p1954 A70-24020

Gas passing through shock wave, investigating constitutive relations for stress and heat flux using Maxwell moment method

11 p2036 A70-26015

Isothermal quasi-linear theory of viscoelastic isotropic continuum, considering constitutive equations

13 p2516 A70-29534

Elastoplastic material mechanical theory, considering constitutive equations with plastic deformations and decompositions of total velocity-strain/stretching/

14 p2661 A70-31281

Book on continuum mechanics covering tensor kinematics, energy balance, virtual work, constitutive equations, etc

16 p2987 A70-32914

Constitutive equation for fiber reinforced viscoelastic materials, using continuum theory of mixtures

16 p2994 A70-34231

Heat and mass transfer in flowing fluid, deriving conservation and constitutive equations, with application to boundary layer flow of gases

17 p3069 A70-35033

Viscoplastic solids, computing plane shock wave propagation structure from nonlinear constitutive relations

18 p3338 A70-36435

Nonlinear electromagnetic constitutive equations with coupling to thermal gradients for holohedral and hemihedral materials, extending analysis to orthotropic media

19 p3552 A70-37786

Stress relaxation interpretation at wave fronts in one dimensional media by nonlinear viscoelastic models, giving constitutive equations

19 p3542 A70-38057

Boundary value problem solution in nonlinear viscoelasticity by constitutive equations

19 p3544 A70-38330

Mathematical theory of constitutive relations connecting surface tractions and moments with motion of single body in continuum

20 p3672 A70-39495

Nonhomogeneous shell theory, considering load carrying surfaces with constitutive equations independent of shell curvature

20 p3719 A70-39619

Structures of linear field theories concerning constitutive equations and operators dual relationship

21 p3851 A70-42098

Constitutive equation for homogeneous and isotropic elastic solids

21 p3940 A70-42101

Cosserat elasticity constitutive equations, coupling rotation vectors to eliminate stress indeterminacies

21 p3941 A70-42251

Plane electromagnetic wave propagation at normal incidence in isotropic lossless plane-stratified inhomogeneous gyration medium, calculating varying profiles from constitutive equations

22 p4073 A70-42640

Continuous media theory, deriving first order constitutive differential equations for isotropic tensor functions

24 p4378 A70-45270

Isothermal plasticity thermodynamic foundation, deriving constitutive equations for various deformations

24 p4426 A70-45994

Surface constitutive assumptions restrictions for rigid heat conductor, accounting for radiative heat supply

24 p4429 A70-46032

Constitutive equations in fluid dynamics, discussing Newtonian, Oldroyd and Walter, Reiner-Rivlin, Rivlin-Ericksen, Noll, Bingham and oriented fluids

24 p4327 A70-46149

CONSTRAINTS

NT METEOROLOGICAL PARAMETERS

Out-of-plane displacement restraint at thin photoelastic plates bonded to rigid boundaries of inclusions inducing transverse stress components causing plane stress solution deviation

01 p0202 A70-11059

Automated structural design program to treat stress, displacement, gauge and cross sectional constraints, discussing applications to aircraft structures

02 p0386 A70-11944

Analytical approach to gradient method within framework of Bolza problem of variational calculus, using linearized differential and isoperimetric constraints

03 p0520 A70-14341

Variational problems of stationarization under constraints, using imbedding integrodifferential equations

05 p0882 A70-16085

Algorithm for constrained optimization problems providing rapid convergence

05 p0877 A70-16714

Geometry of limiting surface characterizing strength of isotropic body, discussing material breakdown

05 p0947 A70-16964

Suboptimal closed-loop controller design based on quadratic equivalence for linear time varying process with minimum probability of inequality constraints violation

06 p1024 A70-17951

Slack variable to transform optimal control problem with scalar inequality constraint on state variables into unconstrained problem

06 p1024 A70-17952

Stochastic differential games with constrained state estimators, involving linear system, quadratic cost functional and white Gaussian noises corrupting output measurements

06 p1024 A70-17954

Constraint optimization on phase coordinates and controls noting extension to functional spaces

07 p1330 A70-18683

Optimal control problem solution involving functional minimization along differential vector equation trajectories, considering manifold type constraints on phase coordinates

07 p1244 A70-18747

Dynamical constraints on planetary fission events, calculating maximum possible excursions of planetary orbits

07 p1381 A70-19280

Sequential gradient-restoration algorithm for minimization of function subject to constraint

07 p1325 A70-19355

Constrained complex optimization method for synthesizing distributed-lumped-active networks

11 p2024 A70-26204

Topological symbolic analysis of circuits defined by topological constraints, utilizing digital computers

11 p2029 A70-26330

Circular elastic helix phase velocities determined by internal constraints method, comparing results with other theories

11 p2085 A70-26557

Computer analysis of degree of constraint against butt joint transverse shrinkage, using finite element method for stress analysis

12 p2239 A70-26854

Optimization for control processes with first and higher order constraints on phase coordinates

12 p2205 A70-28195

Optimal control for processes with parameters and state variable inequality constraints using gradient projection method and maximum principle

12 p2205 A70-28337

Terminal constraints affecting matrices comprising linear impulsive guidance law for earth approach, discussing Mars mission

13 p2447 A70-28516

- Geomagnetic noise constraints on weak field measurements in upper magnetosphere 13 p2401 A70-30056
- Optimal control problems constraints and necessary conditions, deriving maximum principle 14 p2600 A70-31202
- Penalty functions for state-space constraints elimination in continuous optimal control problems 14 p2562 A70-31353
- Matrix analysis of discretized dynamical system with constraints, considering case of damped oscillators 15 p2774 A70-31697
- Mechanical system with n material points, deriving control algorithms for realizing constrained programmed motion 16 p2953 A70-34297
- Stability theorem for mechanical systems with constraint damping subjected to energy dissipation 17 p3176 A70-34956
- Constraint optimization in state coordinates by variable structure system flexibility, using mathematical model 18 p3281 A70-36353
- Geometrical interpretation of controlled evolution of optimal systems with mixed state constraints, using Pontryagin and variational methods 19 p3542 A70-38056
- Lifting reentry vehicle two dimensional motion optimization with inequality constraints explicitly containing control by perturbation method 21 p3845 A70-41265
- Inequality constrained optimal control problems by function space method, using integral equation representation of second variation 21 p3802 A70-41266
- Chicken lymphopenia and body mass loss resulting in death from chronic restraint, developing physiologically unstressful restraint for space environmental testing 21 p3765 A70-41488
- Optimization for control processes with first and higher order constraints on phase coordinates 22 p4004 A70-43320

CONSTRUCTIONS

- Air bubble breaking in blood and water flow passage of simulated cardiopulmonary bypass system with flow constriction 15 p2692 A70-32312
- Thermal constriction resistance due to nonuniform metal surface conditions, considering macroscopic contact resistance for nonuniform interface pressure distribution 24 p4429 A70-46177

CONSTRUCTORS

- Transpiration cooling of porous constrictor walls of high intensity electric arc in plasma [ASME PAPER 70-HT-35] 22 p4122 A70-42432

CONSTRUCTION MATERIALS

- Glass-reinforced polypropylene for structural applications, investigating time/temperature dependent creep characteristics 01 p0128 A70-10773
- Ti, Zr and Nb characteristics, properties, processing procedures and applications in corrosive environments, nuclear reactors and aerospace structures 02 p0319 A70-12710
- Carbon fiber reinforced plastics /CFRP/ uses in commercial aircraft structural component 03 p0516 A70-13546
- Structural materials mechanical properties tests during neutron bombardment, discussing atomic reactors optimal parameters calculation 04 p0775 A70-15259
- Creep rupture effect on fatigue damage of structural material, constructing nondimensional stress range diagrams 05 p0943 A70-16806
- Low cycle fatigue life of various structural steels and alloys, studying stress cycle number relations 06 p1085 A70-17402
- Mechanical property factors influencing selection of sintered uncorked refractory metals and alloys for structural applications [AIME PAPER F-69-4] 07 p1290 A70-18810
- Design concept, materials application and performance characteristics of high temperature fasteners [AIME PAPER F-69-6] 07 p1290 A70-18811
- Single crystal carbides as high temperature structural materials, noting titanium carbide properties and strength-to-density ratio of B-doped crystals 07 p1312 A70-19883
- Stress-strain behavior of Al and Ti alloys, beryllium and nonmetallic structural materials based on constitutive equations describing strain rate and temperature effects 08 p1518 A70-21331
- Tubing materials for gas turbine engines covering fabrication, selection, etc 08 p1559 A70-21854
- Microhardness method for property changes in structural materials during sequential cyclic loading, 21 p3944 A70-41023

discussing material identification, statistical fatigue theory, fine structure effects, etc 09 p1701 A70-22299

Aircraft turbine engines structural materials and design concepts, describing fiber reinforced materials, oxide dispersion hardened alloys and integral and honeycomb structures 11 p2101 A70-25625

Aircraft interior design styling and material selection, discussing industrial design department function and organization, styling as marketing tool, etc [SAE PAPER 700233] 11 p1980 A70-25902

Cost-property index /B/P/ to compare economic success of composites, metals, glass and ceramics for load bearing applications 11 p2136 A70-26077

Structural materials chemical and metallurgical factors controlling mechanical properties, machinability and finished part producibility [ASTME PAPER MR-69-731] 12 p2240 A70-26992

Materials and structural dynamics - AIAA-ASME Conference, Denver, April 1970 12 p2315 A70-27101

Materials selection for vibration or shock control based on cost, resonance frequency, strength, weight, etc 13 p2513 A70-29218

Lunar resources classified as rocket fuel, construction and life support materials, discussing implications for manned surface exploration missions 14 p2634 A70-30198

Jet thrust reversers mechanical design limits, objectives and materials 14 p2628 A70-30500

Filament reinforced metal matrix composites fabrication and engineering uses 14 p2590 A70-30542

Radiative properties of construction properties and working media, noting importance to radiative heat transfer calculation 15 p2827 A70-32143

Reinforced polymer composites design for aircraft structures [ASME PAPER 70-DE-67] 16 p2939 A70-33518

Ti hot forming, discussing sheet use as aircraft structural material 17 p3098 A70-34444

Accelerometer installation resonant frequency, discussing mounting methods, structure material, geometry and total mass 17 p3089 A70-35174

Book on materials for structural and mechanical functions covering electrical engineering properties, ferrous and nonferrous metals and alloys, fabrication methods, environmental protection, etc 19 p3453 A70-38622

Polymers industrial applications in textiles, building materials, furniture, aviation, automobile industry and packaging 19 p3455 A70-38700

Scorched aluminum powder /SAF/ materials, discussing fabrication, physical and mechanical properties, applications in aircraft structural components, etc 22 p4055 A70-43084

Caprolon B mechanical properties, comparing properties to other polyamide resins for use in machine parts fabrication 24 p4367 A70-45503

CONSUMPTION

NT FUEL CONSUMPTION

NT OXYGEN CONSUMPTION

NT WATER CONSUMPTION

CONTACT POTENTIALS

Carrier concentration profiles and surface resistance of Ohmic contacts to solution epitaxial n-type GaAs wafers measured by Schottky barrier capacitance 03 p0543 A70-14213

Surface field effect, contact potential and photoconductivity measurements on p- and n-type heteroepitaxial single crystal silicon films on sapphire 13 p2470 A70-29372

Failure mode and mechanism in dielectrically isolated IC attributed to metal bridging under planar oxide 15 p2713 A70-32648

Friction coefficient dependence on hardness of softer element of friction pair determined at constant values of shear strength, using external friction concepts 17 p3102 A70-35672

High resistance space charge region formation near crystal cathode in GaAs due to limited contact emissive capacity 18 p3297 A70-36417

Gadolinium surface work function from contact potential difference against platinum 20 p3687 A70-39996

Surface films effect on thermal contact resistance of microscopically sized contacts 21 p3944 A70-41023

Surface films effect on thermal contact conductance of aluminum surfaces contacting in high vacuum environment 21 p3944 A70-41024

CONTACT RESISTANCE

Space charge barriers AC impedance modification at metal/semiconductor contacts due to trapping 01 p0157 A70-10296

Electrical resistivity, contact resistance and weldability of cast Cu and Ag contact materials reinforced unidirectionally by W wire compared to powder composition 04 p0711 A70-14465

Rough metal surfaces thermal constriction resistance for total heat flow through microcontacts 07 p1418 A70-18648

Contact resistance measurements used in contaminant removal and metallic adhesion on iron surfaces 07 p1293 A70-18940

Thermal resistance for inappropriately spaced contacts using electrolytic analog experiments 08 p1599 A70-21590

Thermal contact resistance of anisotropic materials using mathematical geometric transformation [ASME PAPER 69-HT-47] 09 p1790 A70-23552

Low resistance small area contacts on semiconductor metal oxides 12 p2288 A70-28057

Sinusoidal signal harmonics measurement to determine nonlinear resistance junction I-V equation, discussing applications to circuit analysis 12 p2204 A70-28132

Ohmic contacts for gallium arsenide single crystals, describing fabrication technique and IV characteristics 12 p2202 A70-28187

Thermal contact resistance, discussing behavior at cryogenic temperatures and directional or thermal rectifying effect 17 p3197 A70-35541

Gold foil surface thermal contact resistance, investigating temperature and pressure effects and elastic and plastic deformation of surface structure 21 p3953 A70-42166

Thermal relaxation effect on thermal contact of two semiinfinite walls, showing existence of dynamic contact resistance 22 p4125 A70-43243

Intermaterial adhesion relation to association contact resistance-tension characteristics based on electric potential barrier model for Maxwell-Wagner effect 24 p4379 A70-45617

CONTACTS [ELECTRIC]

U ELECTRIC CONTACTS

CONTAINERS

Air-land demountable cargo containers specifications, establishing dimensional, structural and environmental requirements [SAE-AS-832] 07 p1249 A70-19599

Boeing 747 aircraft container system deployment simulation written in GPSS/360 to minimize stockholding of containers at individual stations 08 p1481 A70-20931

Thermocouple vacuum gauge joined to Apollo lunar sample return containers /ALSRC/, describing two step welding procedure with transition cylinder 08 p1507 A70-21483

Equipment container with sandwich type structure for packing delicate parts 10 p1852 A70-24899

Permittivity cell and encapsulation for liquids subjected to high pressures and temperature extremes 14 p2533 A70-30502

Air cargo container system impact on aircraft requirements, discussing intermodal capability achievement 20 p3607 A70-40128

Free fluid sloshing motion in shallow convex containers, considering isoperimetric problem for planar and axisymmetric vibrations 22 p4009 A70-42534

Air freight containers in continuous air/land transportation chain, discussing weight, performance, cost, technical concepts and inter and nonintermodal prototypes 22 p4007 A70-43273

Controlled filling of container with compressed gas through time-variable cross section inlet, using variable mass thermodynamics 23 p4180 A70-44160

CONTAMINANTS

NT RADIOACTIVE CONTAMINANTS

NT TRACE CONTAMINANTS

Chemical and physical adsorption of gaseous oxygen contaminants to maintain purity for respiratory purposes, noting trichloroethylene and carbon tetrachloride 01 p0031 A70-10236

Volatile contaminants emitted from space cabin construction materials tested under simulated space conditions 01 p0031 A70-10237

Time of useful function /TUF/ determination for human exposure to toxic gas combinations due to fire 06 p1000 A70-17294

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes 07 p1220 A70-19514

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes 11 p1991 A70-26113

Carrier distillation DC arc emission spectrography, determining lead, bismuth and tin traces in nickel base alloys after conversion to oxides 14 p2546 A70-30957

Upper atmosphere turbulence spectra of passive contaminants deposited by rockets from radiometrically calibrated photographs of chemical trails 15 p2725 A70-31688

Fe 57 contaminant in Ni, studying Mossbauer effect as function of temperature 15 p2784 A70-32023

Gas turbines, dust and air cleaners interrelationship in preventing failure due to air contaminants [ASME PAPER 70-GT-104] 18 p3305 A70-36890

Method of characteristics for two dimensional steady supersonic gas flows with foreign particles in plane and axisymmetric nozzles 18 p3210 A70-37228

Superpure materials for low background radiation detectors, determining U, Th and Ca radioactive contamination by radiochemical activation analysis 20 p3629 A70-39317

Tungsten-helium arc atmospheric contaminants spectral monitoring parameters under welding conditions, using rotating circular wedge to oscillate emission lines across exit slits 21 p3831 A70-40725

Surface films effect on thermal contact resistance of microscopically sized contacts 21 p3944 A70-41023

CONTAMINATION

NT FUEL CONTAMINATION

NT SPACECRAFT CONTAMINATION

Metal fabrication shop environment contamination effect on bond strength of various adhesive system tested by humidity and salt spraying exposures 02 p0310 A70-12664

Microbiological evaluation of modified vacuum probe surface sampler for handling and fallout contamination compared with swab-rinse technique 05 p0807 A70-16574

Contamination control - Conference, New York, May 1969 05 p0798 A70-16701

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 05 p0808 A70-16703

Vacuum probe as effective device for sampling surface contamination of airborne microorganisms 05 p0808 A70-16704

Automatic particle counters and fluid contamination problems, misconceptions relating to sampling, size measurement, calibration, etc 05 p0851 A70-16706

Contamination sources covering ball bearing contamination, relay contact failure, instrument window internal fogging, electronic circuit corrosion and air conditioning problems 05 p0809 A70-16712

Liquids particulate contamination sizing and counting by membrane filtration, specifying procedures and apparatus used [SAE-ARP-598A] 07 p1195 A70-18804

Contact resistance measurements used in contaminant removal and metallic adhesion on iron surfaces 07 p1293 A70-18940

Vacuum probe sampler to monitor particle contamination on surfaces within clean environments 09 p1623 A70-22340

Space environment simulation chamber free from oil molecules contamination 09 p1655 A70-22830

Particulate contamination in compliance with military standard cleanliness level, using zoom microscope, charts and tables 12 p2174 A70-27010

Water contaminating effects on thin thermal oxide passivated silicon planar devices 13 p2361 A70-28930

Weld quality relationship to aluminum surface contamination by hydrogen-containing compounds 13 p2407 A70-29108

Ti equipment anodizing methods, observing corrosion resistance reduction and embrittlement hydriding due to Fe contamination 17 p3098 A70-34363

Oxidation and atmospheric contamination protective coatings for high temperature materials, using burner ring tests 17 p3127 A70-34519

Contaminated optical surface investigation technique in near UV, visible and near IR range, in-

vestigating property changes of systems in transmission and reflection 18 p3292 A70-36786

Surface contaminated Langmuir probe measurements in glow discharge plasmas, discussing errors 20 p3633 A70-40161

Surface contamination and degradation effect on reflectance of evaporated vacuum UV mirrors and temperature control coatings under simulated space environments 21 p3842 A70-40815

Optical devices contaminated mirror surfaces restoration with atomic oxygen from RF plasma by noncontaminating nondestructive oxidation of polymer film 22 p4029 A70-42622

Al purification by subhalide reaction, discussing contamination sources and thermodynamics 24 p4349 A70-46187

Cleanliness levels for missile guidance package as function of component design complexity 24 p4349 A70-46250

CONTINENTAL DRIFT

Earth continental drift and polar wandering measurements by laser ranging to two synchronous satellites [AIAA PAPER 70-1069] 19 p3529 A70-38882

Ocean floor-spreading tectonic effects, considering Arabian Shield separation from African continent 24 p4332 A70-46408

CONTINENTAL SHELVES

Continental migration role in lunar maria formation, suggesting similarity with geological formation of earth ocean floor 09 p1765 A70-23797

North Carolina continental shelf discolored water origin, movement and dissipation from Apollo 9 photograph interpretation 24 p4329 A70-45361

CONTINENTS

NT AFRICA

NT ASIA

NT AUSTRALIA

NT EUROPE

NT NORTH AMERICA

Earth rotational velocity irregularities and horizontal motions of continental blocks at expense of oceanic hemisphere, noting seasonal distance changes 04 p0681 A70-15477

CONTINUITY

Space-sampled feedback control of amplifying wave on infinite continuum, discussing system stability 06 p1025 A70-17963

Continuous media geometry with given discrete structure reduced to analyzing relations between functions in denumerable set of points, presenting selected points of subregions 10 p1954 A70-24016

CONTINUITY [MATHEMATICS]

Plate structural analysis by finite element method, obtaining geometric continuity by additional displacements and forces at corner nodes 21 p3932 A70-40553

Seminormality and upper semicontinuity of variable sets in optimal control 22 p4061 A70-42461

Ordinary differential equations boundary value problems solution based on continuation and reduction to Cauchy problems 23 p4211 A70-44309

Approximations by spline functions and polynomials, discussing modulus of continuity 24 p4369 A70-45126

CONTINUITY EQUATION

F 1 layer nonlinear ionospheric continuity equation to investigate role of diurnal variations of loss and production processes in electron density midday bitout effect 01 p0079 A70-11221

Method of weighted residuals /MWR/ for nonlinear partial differential equations applied to incompressible two dimensional turbulent boundary layer momentum and continuity equations 02 p0281 A70-12328

Electromagnetic drifts and neutral air winds effects on F 2 region derived from electron continuity equation, using Jacchia model atmosphere 04 p0677 A70-14966

Na abundance in terrestrial upper atmosphere, solving steady state continuity and momentum equations for Na atoms and ions 05 p0840 A70-16475

Corpuscular radiation as F region ionization source, solving time dependent ionospheric continuity equation 06 p1054 A70-17588

Invariant transform of motion and continuity equations for steady three dimensional flows of compressible fluids in absence of massive forces 11 p2041 A70-26598

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations 12 p2212 A70-28196

Continuity equation plasma oscillation, discussing ion current waveform flowing from discharge and implications for periodic astrophysical phenomena 14 p2638 A70-30618

Neutral winds effect on F region vertical ion drifts derived from continuity equation, noting diurnal and seasonal variations 14 p2574 A70-30738

Time dependent simultaneous solution for continuity, heat conduction and motion equations of system involving neutral, electron and ion gases 14 p2665 A70-30744

Equations of motion and continuity for early and later stages of expanding universe, explaining matter concentration process of galaxy formation 16 p2976 A70-37813

Neutral atmosphere continuity equation of ionization and equation of motion in F 2 region for different seasons in various solar activity epochs 20 p3623 A70-40478

Shock wave formation and propagation analyzed by hydrodynamic model of two directional traffic flow based on continuity equations and velocity-density empirical relations 22 p4012 A70-43321

CONTINUOUS RADIATION

CW laser perturbation by coupled optical transition at strong pumping with incoherent and coherent perturbing radiation, considering disappearance of laser effect 01 p0108 A70-10231

IR CW sum-frequency up-conversion of carbon dioxide laser radiation using phase matched proustite as nonlinear crystal 01 p0111 A70-10786

CW visible ring cavity parametric oscillator, discussing pump depletion, conversion efficiency and improved stability resulting from optical isolation 01 p0552 A70-11173

Free-bound and free-free continuous emission of hydrogen near Balmer jump in T Tauri star AS209 03 p0566 A70-13315

Energetic and temporal characteristics of CW and pulse laser radiation measured using instrument with absolute sensor 03 p0500 A70-13480

Low threshold injection lasers in IR and visible spectrum at room temperature employing AlAs-GaAs heterojunctions, noting use for CW mode 03 p0501 A70-13723

Frequency pulling and pulse position modulation of CW GaAs injection lasers by locking signal frequency variation 03 p0502 A70-13815

CW and radar type RF signal effects on electroexplosive devices sensitivity in bridgewire heating mode 03 p0550 A70-14142

Geometrical model for characterizing instrument landing system /ILS/ null reference glide path utilizing CW measuring system 04 p0716 A70-15330

Continuous wave chemical laser operation in carbon dioxide pumped by vibrational energy released from DF and HF molecular formation 04 p0704 A70-15686

Radiative excitation in planetary and Orion nebulae by solving transfer equations for Lyman line and continuum radiation, using normalized on-the-spot /NOS/ approximation 04 p0758 A70-15700

Pumping techniques, design and properties of pulsed and CW lasers based on Nd-glass, ruby, barium fluoride and calcium tungstate crystals 05 p0860 A70-16821

Continuous passive mode locking of carbon dioxide laser cavity using long optical delay line 06 p1080 A70-17446

Chemical laser CW operation achieved by mixing gases, obtaining pumping energy from chemical reactions 06 p1080 A70-17492

Phase path variation of stable continuous wave transmission reflected from E region during daytime, discussing night time results 06 p1055 A70-17593

Supersonic mixing CU chemical lasers, discussing lasing action time duration 06 p1083 A70-17945

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics 07 p1226 A70-18761

CW high power operation of transferred-electron oscillators realized by low thermal resistance, describing fabrication 07 p1241 A70-19300

Argon ion CW lasers, discussing design, inverse population, plasma, radiative transition probabilities, pumping, frequency spectra and active medium 07 p1298 A70-19642

Ionosphere absolute phase height measurement methods independent of virtual height, using fixed frequency CW emission and pulsed sounding 07 p1276 A70-20432

Millimeter wave CW Gunn oscillators construction by packaging free from spurious resonance, using sapphire ring and Au cap

08 p1468 A70-20482

Emission saturation in Ar CW laser at high discharge current densities under different pressures and tube channel parameters

08 p1511 A70-20542

Wideband tunable CW Gunn effect oscillator design, discussing microwave circuit effects on performance

08 p1471 A70-20788

CW laser operation at 10.6 microns in DF-carbon dioxide and HF-carbon dioxide molecular systems achieved by purely chemical means

08 p1513 A70-21539

CW GaAs junction laser bistable operation due to saturable absorbing centers in active medium

08 p1513 A70-21598

CW water vapor laser line frequency measurements by beating with radiations from HCN laser in metal-on-metal point contact diode

09 p1697 A70-22925

He-Ne CW and pulsed lasers operation, design and technology, describing measurement methods for output, beam divergence and radiation spectrum distribution

09 p1698 A70-23303

High power CW carbon dioxide laser design and operation for use as heat source in metal fusing, welding and cutting

10 p1897 A70-23816

Continuum radiation of nitrogen plasma at atmospheric pressure at high temperatures

10 p1923 A70-24472

Continuous wave chemical laser operation at 10.6 micron in carbon dioxide pumped by vibrational energy from hydrogen atoms and bromine molecules reaction

10 p1901 A70-25149

Scanned beam holography reducing system stability time for hologram production with CW gas laser

11 p2050 A70-25639

He-Ne optical laser CW operation under DC excitation, considering output power, discharge current, total pressure, mixture ratio, etc

11 p2062 A70-25827

CW carbon dioxide laser absolute frequency measurements at 28 THz by beating lines with water vapor laser and klystrons in tungsten on nickel point contact diode

11 p2063 A70-26070

Pulsed and CW microwave discharge plasmatrons design calculation, providing electrodeless plasma in metallic chamber and nonequilibrium plasma

11 p1984 A70-26741

Emission spectrum of He-Xe CW laser with non-resonant feedback mode achieved with scattering agent and various mirror schemes

12 p2246 A70-27354

Argon CW laser blue beam self focusing in methylene iodide, iodine and liquids under steady state conditions

12 p2248 A70-27545

Ionospheric probing using continuous radio waves at oblique incidence, discussing HF Doppler, VHF forward scatter and radio aurora techniques

12 p2224 A70-27730

Spectra, luminescence and gas dynamic effects in variable stars, discussing nonthermal theory to explain continuous emission

12 p2306 A70-27857

Merop 1/C 349/ nebula, noting luminescence and continuum spectrum fine structure

12 p2307 A70-27867

CW mode locked lasers picosecond pulse widths and shapes measured, determining harmonics and Fourier expansion

13 p2425 A70-28794

CW traveling wave tubes and klystrons LF output signal fluctuations

14 p2555 A70-30303

Continuous operation He-Ne lasers, discussing excitation, structural and optical design, mode selection and performance specifications

14 p2593 A70-30353

GaAs epitaxial layered wafer natural CW R band oscillations in LSA mode

14 p2550 A70-30688

CW oscillation in carbon monoxide chemical laser

15 p2748 A70-31432

CW injection laser frequency stability, noting injection current influence on lasing frequency

15 p2750 A70-31629

Time controllable continuous photon emission from plasma produced by pulsed laser vacuum spark applied to absorption spectroscopy in vacuum UV

15 p2734 A70-31757

High power CW CO laser operation at room temperature by introducing mercury vapor into discharge

15 p2751 A70-31979

CW nonspiking single mode ruby laser operation by end pumping ruby with CW argon ion laser output

15 p2751 A70-31981

CW Cd vapor laser oscillation achieved with slotted hollow cathode discharge containing He carrier gas at pressures of several Torr

15 p2751 A70-31988

Pulsed laser alignment using pentaprism-directed continuous laser light beam

15 p2752 A70-32047

Meteor radiant, drag and altitude via CW radar observation of meteor trails

15 p2800 A70-32150

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

15 p2802 A70-32483

Transverse magnetic field effect on CW argon laser operation with linearly polarized radiation

15 p2754 A70-32866

Silicon avalanche transit time diodes as CW microwave generators and amplifiers

16 p2876 A70-33404

Diffraction radiation generator with CW operation in backward wave tube mode, discussing output power dependence on wavelength

18 p3231 A70-36410

Asymptotic transmitting capacity of continuous channel with intense independent and additive noise

18 p3228 A70-36598

CW multifilament GaAs laser diodes measurement, showing cross correlation between light and current noises

18 p3270 A70-36742

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics

18 p3229 A70-37105

Continuum source counts in galactic plane

18 p3327 A70-37165

CW HCl chemical laser action via chlorine atoms reaction with hydrogen iodide in fast flowing mixing device

19 p3444 A70-37542

Rubidium-85 maser, discussing continuous oscillation in low magnetic field

19 p3446 A70-37769

Gallium aluminum arsenide-GaAs laser diodes properties and applications for CW operation, discussing p-GaAs layer thickness effects

19 p3447 A70-38454

Jovian continuum radiation observation by RAE-1 during lunar occultations

19 p3512 A70-38608

CW second harmonic He-Ne laser light second order intensity correlation function measurements

20 p3640 A70-39153

Continuous wave laser action in chlorine, Ar and He gas mixtures, observing energy transfer between Ar and chlorine by pumping action

21 p3834 A70-40570

CW gas laser improvement, discussing optimum efficiency and photon beam spatial distribution

21 p3836 A70-41419

Continuous pseudoacoustic and ion waves excitation and damping in plasma sheath around grid, taking into account transit time effect on ion acceleration

21 p3858 A70-41710

Thermal and birefringent effects on output of continuous Nd-YAG laser rod, using 6328 A probe

21 p3837 A70-41906

CW silicon SHF TRAPATT diode oscillator, discussing double sided design and fabrication

21 p3800 A70-42118

High output CW carbon dioxide laser design, using gas pressure variation and fast axial flow

22 p4048 A70-42322

Water cooled carbon monoxide-He-nitrogen-oxygen laser CW output at room temperature

22 p4048 A70-42327

Host materials for increasing optically pumped solid state CW laser fundamental mode output power

22 p4048 A70-42333

LF cavity loss modulations of homogeneous four-level CW Nd-YAG laser, including relaxation-oscillation regime

22 p4050 A70-43005

CW chemical lasers operation from partially inverted transitions of HCl, HF and DF molecules in subsonic flow

22 p4050 A70-43008

Emission spectrum of He-Xe CW laser with non-resonant feedback mode achieved with scattering agent and various mirror schemes

22 p4052 A70-43597

Cepheids nonequilibrium continuous emission at maximum brightness, considering phase shift between radiation intensity and stellar contraction

23 p4240 A70-43907

CW GaAs semiconductor laser fabrication by liquid epitaxy, noting Ag plating role in output power

24 p4352 A70-45468

Transverse flow deuterium fluoride-carbon dioxide chemical laser for CW output without external energy source

24 p4355 A70-46084

CONTINUOUS WAVE RADAR

CW laser ranging systems power and signal to power ratio characteristics, finding possible advantages over pulsed systems

01 p0114 A70-11321

Active AM scatterer/spiral antenna/used as transponder in elementary CW radar system

04 p0652 A70-15346

CW, pulsed and frequency modulated radar scatterometry, discussing flight, system, terrain and data processing parameters

06 p1012 A70-18594

High resolution FM-CW radar sounder for tropospheric refractive index studies, describing equipment design and performance and clear air scatter observations

09 p1716 A70-22368

Meteor astronomical parameters measurement by pulsed and CW radio methods, considering effects of wind, meteor trails, phase angle, etc

09 p1638 A70-23627

AM and FM CW Doppler radar by combined AM-FM waveform, noting automatic track while scan radar application

10 p1840 A70-24445

Radar transmitter waveforms for multifunction operation, emphasizing phase and frequency modulation for CW radars

12 p2188 A70-27939

CONTINUOUS WAVES

U CONTINUOUS RADIATION

CONTINUUM FLOW

Circular cylinder drag in hypersonic transverse flows between continuum and free molecular flow, measuring drag and pressure distribution

04 p0615 A70-15089

Continuum to free molecule hypersonic flow near flat plate sharp leading edge, studying Knudsen, Reynolds and Mach numbers effects

06 p0982 A70-18365

Circular cylinders drag and pressure distribution in hypersonic range between continuum and free molecular flow

06 p0983 A70-18376

Two phase supersonic continuum flow of dispersed equal gas-liquid volume ratio in shock tunnel using continuum theory, considering sound propagation

07 p1256 A70-19311

Drag on cylinder in transverse rarefied gas flow varying from free molecular to almost continuum

09 p1604 A70-22448

Continuous media mechanics by applying fractional steps method to numerical solutions, outlining theoretical basis for computer algorithms

10 p1866 A70-24114

Supersonic rarefied flow over sharp flat plate with merged shock layer and free molecular-continuum transition, using electron beam fluorescence

14 p2529 A70-31028

Stationary gas flows continuous to rarefied transition analysis based on mean free path anisotropy

15 p2721 A70-32139

Adiabatic and chemically inactive hypersonic continuum flow around blunt body, analyzing flow field

17 p3010 A70-35036

Continuum plasma dynamics with electromagnetic forces of same order of magnitude as gas dynamic forces, discussing various flow problems

17 p3141 A70-35040

Kinetic effects of Barnett equations and slip conditions for continuous dense gas flows at small Knudsen numbers

18 p3239 A70-36256

CONTINUUM MECHANICS

Variational stress solutions for static case of bounded bodies in Cosserat continuum theory, assuming anisotropic inhomogeneous material and defining boundary value problem solution

03 p0596 A70-13973

Three dimensional elasticity theory of generalized continua developed from atomic lattice theory model, discussing frequency spectra, specific heat and applications to crystal defects

03 p0525 A70-14232

Numerical methods of solving problems in mechanics of continuous media - Conference, Kiev, Ukrainian SSR, June-July 1966

04 p0669 A70-14956

Free vibrations of layer of micropolar continuum, analyzing displacements, microrotations and frequencies as wave number power series

04 p0777 A70-15498

Continuum, harmonic and finite element perturbation studies of elastica to yield postbuckling path derivatives from nonlinear energy formulation

05 p0927 A70-16011

Thermodynamics of elastic continuum with microstructure, modifying second law to include microtemperatures

05 p0930 A70-16083

Continuum model for plastic-elastic behavior of fiber reinforced composite material, formulating yield condition and constitutive equations

05 p0931 A70-16131

Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments

05 p0939 A70-16502

Book on mechanics of continuous medium, discussing constitutive equations, fluid mechanics, linearized elasticity, vectors and tensors, stress, strain and deformation, etc

06 p1104 A70-17420

Continuum mechanics equations for calculating strain energy in spherical bottoms production as function of radius and angle

06 p1077 A70-17870

Non-Newtonian fluids in continuum mechanics, classical Navier-Stokes theory limitations and theory of incompressible fluids for viscometric flows

06 p1037 A70-17926

Multiphase fluid continuum model and hydrothermodynamic equations under phase transformations, including dimensionless and similarity parameters

07 p1254 A70-19085

Energy losses due to mixing of primary and secondary flows of jet streams in gas propulsion engine chambers determined by continuum mechanics application

07 p1363 A70-19086

Two phase supersonic continuum flow of dispersed equal gas-liquid volume ratio in shock tunnel using continuum theory, considering sound propagation

07 p1256 A70-19311

Field theory of moving dislocations in Cosserat continuum considered incomplete regarding constitutive equations, basing analysis on Mie-developed mathematical analogy to electrodynamics

07 p1334 A70-19564

Nonlinear thermodynamic theories of plates, elastic shells and rods derived from three dimensional theory of classical continuum mechanics

07 p1414 A70-20172

Structural design analysis techniques for one, two and three dimensional continua, discussing various problem solving methods

07 p1417 A70-20361

Analytical mechanics of discrete and continuous systems covering systems with limited degrees of freedom, statistical and continuum mechanics

08 p1543 A70-20526

Two dimensional continuum of objectivity and isotropy principles applied to study of elastic tridimensional vault

09 p1777 A70-22899

Continuous media mechanics by applying fractional steps method to numerical solutions, outlining theoretical basis for computer algorithms

10 p1866 A70-24114

Mechanics of continuous media for noncanonical regions, surveying Soviet literature on stress concentration near shell holes, elasticity theory, fluid aerohydroelasticity, etc

10 p1965 A70-25319

Stable and unstable crack growth in viscoelastic media, solving boundary value problem and continuum mechanics prediction of crack propagation

12 p2315 A70-27092

Isothermal quasi-linear theory of viscoelastic isotropic continuum, considering constitutive equations

13 p2516 A70-29534

Operator form added to equations of state of continuous media in case of small and large deformations

14 p2656 A70-30473

Spherically symmetric state of slightly ionized gas of unbounded expanse about catalytic conductor by nonequilibrium continuum theory, analyzing Debye number limit for electrostatic probes

14 p2665 A70-30946

Finite elements for three dimensional compressible and incompressible solid continua based on minimum potential energy and variational principles

14 p2659 A70-31128

Book on continuum mechanics covering tensor kinematics, energy balance, virtual work, constitutive equations, etc

16 p2987 A70-32914

Continuum theory of spherical electrostatic probes as measuring devices in high density weakly ionized gases

17 p3140 A70-34931

Finite difference scheme for solving continuum mechanics problems in two space dimensions and time

17 p3131 A70-35885

Thermodynamic application to strained solids, considering paradoxes, irreversible processes and continuum mechanics

18 p3340 A70-36555

Thermodynamics of thermoviscous fluids based on Riemannian space time notions and balance laws of general theory of relativistic continuum mechanics

18 p3347 A70-36557

German book on continuum theory of flowing media covering tensor analysis, equations for kinematics, mechanics, thermodynamics and electrodynamics

18 p3243 A70-37226

Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane longitudinal wave propagation modes by analogy with continuum theory

19 p3540 A70-37942

Dynamics of composite materials using extensions of continuum theories based on combination of elastic and geometric properties

19 p3455 A70-37950

Continuous one dimensional nonconservative elastic systems under complex forces, examining stability theory

19 p3546 A70-38341

Lumped parameter model for multidimensional solid mechanics problems with inelasticity, discussing stress wave interaction in cylindrical cavity

19 p3458 A70-38357

Discrete finite element models for nonlinear viscoelastic continua

19 p3458 A70-38358

Elastoplastic continua incremental solution for large displacements and small strains, determining sufficient condition of uniqueness

19 p3549 A70-38666

Elastoplastic work hardening continua incremental boundary value problem with allowance for distributed dislocations, using quadratic programming concepts

19 p3549 A70-38667

Continuum bodies strain subjected to shearing stresses in incremental form based on slip theory of metals plasticity

19 p3549 A70-38668

Mathematical theory of constitutive relations connecting surface tractions and moments with motion of single body in continuum

20 p3672 A70-39495

Variational formalism in mechanics of continuous media in four dimensional event space, considering model with local particle interactions

20 p3724 A70-39855

Diffusion processes effect on stress state, allowing for physicochemical coupling between deformed solid bodies based on continuous media theory

20 p3727 A70-39887

Continuum mechanics application to elastic composite materials, investigating plane deformation of reinforced medium

20 p3730 A70-40038

Structural mechanics of continuous fiber reinforced composites, discussing bending and stretching of cylinders, pressure vessels, plates and beams

20 p3730 A70-40039

Sound velocity in isotropic nonlinear elastic Cosserat continuum with constrained particle rotation, analyzing uniaxial and hydrostatic compression

20 p3734 A70-40434

Microelastic solids theory achieved with application of internal constraints from postulate of principal coincidence

21 p3939 A70-42029

Invariance principle in mechanics of deformable continua connecting three dimensional and relativistic space-time formulation

21 p3940 A70-42097

Circular cylindrical hole in uniaxial tension field of elastic media, solving plane strain problem for stress concentration factors

21 p3941 A70-42107

Crack growth study in viscoelastic solids by linear continuum mechanics, discussing cyclic loads, composite solids mechanical behavior and thermodynamics

22 p4115 A70-42937

Sound velocity in isotropic nonlinearly elastic continuum with microstructure, showing dispersion coincident with Cosserat constant

22 p4120 A70-43713

Large element method for stiffness matrix order reduction in two-dimensional continua problems

23 p4275 A70-44940

Continuum media theory, deriving first order constitutive differential equations for isotropic tensor functions

24 p4378 A70-45270

Viscoelastic laminated composite linear anisothermal theory, presenting homogeneous continuum model to describe dynamic characteristics

24 p4368 A70-45992

CONTINUUMS

Equations of state for continuous media, using variational principles within framework of relativity theory

01 p0146 A70-11593

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface

12 p2272 A70-27357

Digital simulation of continuous systems described by differential equations

16 p2870 A70-33728

High current elastic conductors nonlinear mixture theory with inviscid electron gas in elastic continuum under mutual electromagnetic and diffusive forces

19 p3387 A70-37787

Clock synchronization in general relativity theory, investigating temporal and spatial relations in four dimensional continuum using simultaneous hypersurface

22 p4075 A70-43598

CONTOURS

Radiation view factor from differential area to conical surface determined using Stokes theorem and contour integration

04 p0787 A70-15598

Computerized design of aircraft contours, determining three dimensional surface by second degree equation

[SAE PAPER 700202]

11 p2013 A70-25876

Surface contours generation by Moire patterns

12 p2235 A70-27753

Perceptual displacement of hashmark between unequal squares, discussing contour repulsion and perspective interpretation

14 p2537 A70-30899

Stiffness matrix correction for curved element deficient in rigid body motion

18 p3342 A70-36687

He-Ne laser profile-tracing system for contour measurement, suggesting steps for error reduction

20 p3640 A70-39417

Transport aircraft noise at three major airports by noise exposure forecast /NEF/ contours methodology

21 p3750 A70-40896

CONTRACT MANAGEMENT

Spares management of large aircraft contract in relationship to total integrated logistics support systems management

02 p0401 A70-11672

Party autonomy application to standardized international air transport contracts, discussing international treaties, law court judgments and literature

02 p0402 A70-12267

Reliability guarantee vs cost of capital, analyzing contract compliance delay and discounted penalty expenditures

13 p2525 A70-29570

CONTRACT NEGOTIATION

Cost effectiveness tradeoff analysis for reliability incentive contracts, evaluating customer requirements for military procurement

01 p0220 A70-10115

DOD procurement practices for advanced weapon systems, discussing government errors in contracting policies

07 p1428 A70-19678

Midwestern political economy and federal R and D funds distribution, surveying bidding practices and NASA contracts for five year period

07 p1428 A70-19733

Product oriented cost data bank for satellite system cost prediction and negotiation designed for USAF communications satellite program

11 p2152 A70-25477

Contractor all risk incentive contract /CARIC/, discussing innovative features and negotiation elements

14 p2668 A70-30525

CONTRACTION

Low turbulence wind tunnel axisymmetric contraction designed from reformulated Thwaites solution

03 p0462 A70-12935

Transmural stimulation elicited phasic and tonic contractile responses in circular and longitudinal axes of small intestine under nerve-blocking drugs

09 p1622 A70-23547

Hyperbaric oxygen effect on heart muscle contractions in mammals, considering cells enzymatic activity and substrate utilization

09 p1623 A70-23586

Left ventricle pressure rise rate as function of heart contractility and hemodynamics

09 p1623 A70-23587

Contraction coefficients for compressible discharge through axisymmetric sharp edged orifice, obtaining approximate analytical expression based on one dimensional theory

13 p2389 A70-29549

Transverse contraction during butt welding of plates of steel and Ti and Al alloys, showing dependence on joint thickness

16 p2916 A70-33053

Myocardial contractile function in rats under acute overstrain, evaluating role of preliminary training to altitude hypoxia

19 p3360 A70-37805

CONTRACTORS

NASA Source Evaluation Board process for major contractor selection, discussing procurement practices and management techniques

03 p0610 A70-13962

Government environment challenges to government sponsored big technology management illustrated by space nuclear engine research program

09 p1792 A70-22494

- Federal contract research centers objectives, characteristics, crucial issues and future
 - 09 p1793 A70-22971
- Quality evaluation surveys performance by contractors
 - 14 p2669 A70-31106
- Subcontracting for cost optimal parts screening, discussing negotiations and reliability requirements
 - 15 p2747 A70-32651

CONTRACTS

- DOD laser research and development contracts management
 - 14 p2667 A70-30367
- Government defense contract warranties in terms of consumer interests protection and economics
 - 14 p2667 A70-30522
- Incentive earnings and payments in CIPF /cost plus incentive fee/ contracts, considering legal principles
 - 14 p2668 A70-30523
- Book on guide to aerospace defense contracts covering purchase control, marketing solicitation, project management, reports, logistics etc
 - 22 p4126 A70-42723

CONTRAILS

- Lower E region turbulence interpretation based on high resolution photographs of artificial sodium vapor trails
 - 03 p0476 A70-13913
- Winds above 200 km measured from vapor trail observations compared to winds deduced from satellite orbital changes and theoretical models
 - 07 p1269 A70-19950
- IR reflectance of cirrostratus and cirrus clouds and jet contrail measured by spectrometer on high altitude aircraft
 - 11 p2045 A70-25626
- Aircraft condensation trails formation by interactions of exhaust emission, vorticity of wing induced downwash and ambient atmosphere
 - 22 p3958 A70-42684
- Contrail effects on atmospheric thermal radiation budget in heavy jet traffic regions from airborne IR and solar radiometric observations
 - 23 p4214 A70-44033
- Global upper atmosphere circulation pattern by daytime tracking of high altitude rocket vapor trail, using differential radiometer
 - 23 p4214 A70-44039
- Weather modification by jet aircraft contrails, discussing cloud seeding observations in Alaska
 - 24 p4371 A70-45421

CONTRALATERAL FUNCTIONS

- Contralateral remote masking /CRM/ increase of LF tone burst produced by middle ear muscle contractions
 - 04 p0632 A70-15082

CONTRAST

- NT IMAGE CONTRAST
- NT PHASE CONTRAST
 - Visual contrast sensitivity adaptation to temporal frequencies using high modulation sinusoidal grating
 - 17 p3034 A70-35898

CONTROL

- Hamilton modified principal applied to nonlinear control problems including time delay, servosystem with ideal relay and liquid level control
 - 09 p1614 A70-23693
- Generalized control theory, discussing optimization and table classifying control theory fields
 - 10 p1856 A70-25238
- Aircraft design, development and production illustrating systems engineering functions, discussing control process model
 - 16 p3004 A70-33676
- Human postural control system response to mechanical torque disturbance, using second order differential equation with state dependent parameters for approximate analysis
 - 22 p3979 A70-43494

CONTROL BOARDS

- Flight deck controls and instrument disposition in business aircraft emphasizing size
 - 06 p1061 A70-17318
- Comfort plane switch mounting design for helicopter collective controls, noting mock-up evaluation by test pilots
 - 19 p3372 A70-38922
- Pilot influence on dynamic aircraft design, taking into account physiological state during various operational tasks
 - 23 p4138 A70-44134

CONTROL DEVICES

U CONTROL EQUIPMENT

CONTROL EQUIPMENT

- NT CRYOSTATS
- NT PRESSURE REGULATORS
- NT PRESSURE SWITCHES
- NT SERVOAMPLIFIERS
- NT SPEED REGULATORS
- NT TELEOPERATORS
- NT THERMOSTATS
 - Electrical supply and control of monoplex 6.25 Hz ruby laser for use in optical radar, high speed photography, etc
 - 01 p0114 A70-11270

- Phase detector with two value output and pulsed input for measurement and control circuits, noting construction with semiconductor elements
 - 02 p0266 A70-11900

- Aircraft controls response critical speed as function of transmission lag and transfer function of control link elements
 - 02 p0227 A70-12410

- Turbojet engine controls and control devices design, considering fuel properties and fuel consumption
 - 03 p0552 A70-13806

- Structure theorem for time invariant multivariable linear systems proof and formulation for use in controller design and synthesis
 - 03 p0461 A70-14166

- Tactile control in man machine systems using feed-forward loops to provide rate information, noting unmanned aircraft and machine-tool applications [ASME PAPER 69-WA/BHF-14]
 - 04 p0642 A70-14855

- Air traffic control problems in avoiding midair collisions, satellite utilization in transatlantic flight control and anticollision devices and procedures
 - 04 p0623 A70-15350

- Fluidics application in sounding rocket guidance control circuits used in space boosters
 - 05 p0797 A70-15809

- Fluidics background, operational principles, constituent elements, system assemblies and applications, discussing integrated and multiple function circuits, cost and reliability advantages, etc
 - 05 p0798 A70-16146

- Electroluminescent matrix displays, discussing limitations in control element
 - 05 p0827 A70-16186

- Fluidic devices for systems engineering, discussing design and applications of logic simulator, element tester and three mode controller
 - 06 p1015 A70-18428

- Laser beam deflection techniques for directional control of laser beams, noting applications to optical computer memories and active imaging and display devices
 - 09 p1696 A70-22783

- Control system for high speed photographic diagnostics based on rotating mirror action
 - 09 p1679 A70-22993

- Optoelectronic devices for variable resistors controlled by electrical signal, investigating decoupling, capacitance and DC resistance
 - 09 p1649 A70-23353

- Digital sampled-data loop of phase lock control containing digital zone error detector and digital frequency regulator with reversible counter as memory unit
 - 10 p1833 A70-24085

- Equipment design for burst synchronization control in TDMA experiment system
 - 10 p1836 A70-24339

- Multidimensionality in complex control systems, discussing circuit and oscillation theory, decomposition, variational problems, finite automata and group theory
 - 11 p2023 A70-25602

- Decoupling and pole assignments in linear multivariable control systems using geometric method
 - 11 p2072 A70-26160

- Human performance as controller evaluated in man machine control system, considering pursuit or compensatory tracking tasks
 - 12 p2177 A70-27039

- Semifluidic proportional industrial control systems using diaphragm summing junction including applications to temperature control, remote sensing and drill bit adaptive measurement
 - 12 p2164 A70-27073

- Fluidic gas turbine controls, discussing high temperature operation, hybrid sensors and logic in hostile environment applications
 - 12 p2164 A70-27074

- Bits quantity required to represent coefficient within digital controller with high sampling rate
 - 12 p2203 A70-27410

- Solid state power controllers for aircraft electrical power systems [SAE PAPER 700304]
 - 12 p2195 A70-27450

- Semiconductor power controllers for switching aircraft electrical power supplies [SAE PAPER 700308]
 - 12 p2195 A70-27451

- Upper bound on system errors caused by quantization in multirate digital control system
 - 12 p2204 A70-27841

- Lunar vehicle design, discussing dual power steering, switching and joystick control handle
 - 12 p2208 A70-27944

- Control device for micromanipulator with pacing motor during electrophysiological studies involving microelectrodes implantation into tissue
 - 12 p2179 A70-28317

- Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions
 - 13 p2357 A70-28526

- Stochastic reinforcement learning model synthesizing control and pattern recognition systems with learning attributes
 - 13 p2374 A70-29584

- Computer oriented algebraic method for duplicator control systems applied to loop network, lag, feedback, phase lead and phase lag compensator design
 - 14 p2560 A70-30620

- Memory systems in measurement and control equipment, describing applications to linearizing, compression and data refresh operations
 - 14 p2554 A70-30676

- Satellite feedback attitude control system resulting in high accuracy earth pointing motions in elliptic orbits
 - 14 p2654 A70-31172

- Control system teaching based on preferred response data, discussing operator determination from purpose control function
 - 15 p2716 A70-32449

- Emergency hypotonia regional control with/without blood circulation centralization, describing device consisting of inflatable balloon, extracorporeal shunt, electromagnetic valve, manometer and circuit
 - 15 p2687 A70-32891

- Bypass door control system for SST axisymmetric intake operation in external compression mode, obtaining dynamic performance [AIAA PAPER 70-695]
 - 16 p2966 A70-33558

- Brushless despin mechanical drive and control system design and performance for orientation of high gain communications antenna from spin stabilized satellite
 - 16 p2986 A70-34161

- Digital logic techniques for pulse modulated radar systems, with application to controlling and timing waveforms for display
 - 17 p3042 A70-34570

- Complex control systems in integrated logic circuits and light laboratory materials production, discussing measurement equipment for quality control
 - 17 p3090 A70-35416

- Characteristic injuries from aircraft controls inflicted in fatal accidents, showing pilot position and hand location upon impact
 - 17 p3039 A70-35573

- Soviet papers on discrete control systems covering linearity, nonlinearity and applications
 - 18 p3233 A70-36068

- Gas turbines dynamics and control system requirements, discussing equipment design and reliability [ASME PAPER 70-GT-76]
 - 18 p3305 A70-36887

- Soviet book on man in aircraft control system covering engineering psychology, complex flight problems, human factors and instrument panels
 - 19 p3367 A70-37236

- Thyristor circuit for storing or generating digital control signals, considering reliability at high noise levels
 - 19 p3385 A70-37377

- Static stability requirements relaxation and wing control devices additions for alleviating wing root bending moments in controls configured vehicle /CCV/ design concepts
 - 19 p3355 A70-37395

- Real time analog display inputs for electronic computers and tracking in physiological control circuits, describing various manual controls
 - 19 p3367 A70-37564

- Analytical adaptation algorithms for PID controllers operation
 - 19 p3394 A70-38162

- Electronic components mass production for automatic control equipment, determining parameters probabilistic scatter
 - 19 p3390 A70-38578

- Bobweights effects on pilot induced oscillations, noting role in flying qualities and control system design [AIAA PAPER 70-1002]
 - 20 p3560 A70-39529

- Invariance conditions for control systems with time varying parameters
 - 20 p3602 A70-39827

- Automatic control system components parameter variation effects on invariance conditions
 - 20 p3602 A70-39830

- Multidimensional control systems synthesized in accord with polyinvariance and coordinating couplings principles
 - 20 p3604 A70-39837

- Multichannel computer for statistical investigations of complex nonlinear controlled plants based on recordings of input, output and internal state variables
 - 20 p3594 A70-39921

- PCM command control system for high altitude ballooning operations, discussing component equipment
 - 20 p3587 A70-40085

- Integrated environmental control/life support resistor systems, surveying NASA programs [AIAA PAPER 70-1130]
 - 20 p3690 A70-40215

- Papers on aerospace vehicle flight control systems covering controller design, flow difference sensors, etc
 - 21 p3926 A70-40780

- Liquid metal hydraulic servoactuation packages for flight control in high temperature environments without coolant systems
 - 21 p3750 A70-40785

- Optimal control problem for plant including dynamics and input constraints parameters treated by calculus of variations and Pontryagin maximum principle
21 p3801 A70-40899
- Integrated circuits for control and telemetry functions in oxide cathode ion thruster power conditioning system operating from solar panel
21 p3798 A70-42126
- Transistorized DC to AC converter providing sinusoidal output to power automatic spacecraft control devices via pulse width modulation
22 p3994 A70-42309
- Fluidic control devices and systems, discussing turbulence amplifiers, impact modulators, logic gates, active and passive elements, etc
[ASME PAPER 70-FLCS-15] 22 p3963 A70-42412
- Fluidic applications in missile components production, discussing various types of fluidic control and logic in relation to functional requirements
[ASME PAPER 70-FLCS-11] 22 p3963 A70-42416
- Fluidic controls for propulsion engines, describing optimum fabrication techniques
[ASME PAPER 70-FLCS-7] 22 p3964 A70-42420
- Harmonic linearization method for periodic regimes in nonlinear control systems based on periodic solution sensitivity to higher harmonics and small parameters
22 p4000 A70-42829
- Thyristor-servomotor temperature control unit, describing circuit and applications
22 p3996 A70-42850
- Fuel delivery and speed control systems for aircraft gas turbine engines, discussing control circuit transfers and block diagrams
22 p4091 A70-43116
- Nonlinear control systems described by linear equations, discussing quasi and local controllability as functions of time and stationary state
22 p4063 A70-43427
- Soviet cybernetics research, emphasizing discrete and continuous control devices and systems synthesis
22 p4004 A70-43449
- Pulse-time multistable state elements for automatic and remote control constructed from pulse sequence interactions with multiple frequency relations
22 p4005 A70-43567
- Manned spacecraft onboard data management systems, discussing information transfer, processing, control, display and man machine interface
23 p4167 A70-44647
- Laser sensors as alignment instrument for control and measurement of five degrees of freedom
24 p4351 A70-45383
- Pilot hand-held and leg-mounted controllers for precision tracking from aircraft under buffeting tested in static and dynamic motion simulator
24 p4308 A70-45513
- Signal flow graphs for selectively invariant autonomous multichannel control systems design
24 p4321 A70-45641
- Engine control concepts for augmented turbofan, discussing integrated electrical/hydraulic/mechanical system
[SAE PAPER 700826] 24 p4394 A70-45893
- Automatic control system for Boeing SST engine air intakes, optimizing engine performance and controlling noise propagation
24 p4396 A70-46214
- Cleanliness levels for missile guidance package as function of component design complexity
24 p4349 A70-46250
- CONTROL MOMENT GYROSCOPES**
- Control moment gyros for spinning satellite stabilization and attitude control
18 p3289 A70-36714
- Control moment gyro (CMG) for spacecraft attitude control, determining optimal gimbal angle rate for desired torque
[AIAA PAPER 70-1042] 19 p3433 A70-38857
- Control moment gyro (CMG) spacecraft attitude control systems, discussing selection and design criteria
[AIAA PAPER 70-976] 20 p3668 A70-39553
- Parametrized design data and selection criteria of biowaste resistor system for orbit keeping and control moment gyro desaturation of manned space station
[AIAA PAPER 70-1132] 20 p3567 A70-40213
- Large earth orbiting spacecraft minimum time attitude maneuvers with control moment gyroscopes, discussing torque calculation and gimbal angle rates
20 p3670 A70-40284
- CONTROL PANELS**
- U CONTROL BOARDS**
- CONTROL ROCKETS**
- Spacecraft trajectory control rockets design and operational characteristics, discussing various propellant types, control valve designs, etc
24 p4393 A70-45640
- CONTROL SIMULATION**
- Book on dynamics of complex systems represented by control and human operators and animals behavioral activities models
01 p0034 A70-10501
- Simulation technique to evaluate TV contrast trackers standard scan performance using video tape recording
01 p0058 A70-10812
- Computer driven display terminal as part-task limited area simulator, examining operational requirements and input characteristics
01 p0059 A70-11277
- Air combat model (AIRCOM) to evaluate close-in air-to-air fighter aircraft combat capability, determining relative changes in kill probability per firing pass
03 p0413 A70-13958
- Two loop control system model of human lens accommodative system derived on basis of muscle mechanics, optics and experiments
03 p0439 A70-14275
- Optimal space vehicle reentry control ensuring minimum scattering of landing points based on accelerometer and free pitch-angle gyroscope data
04 p0760 A70-14431
- Computerized thermal model simulating environment control system, crew and vehicle structure in performance prediction for Apollo lunar module
[SAE PAPER 690621] 05 p0922 A70-15848
- Measurement optimal feedback control algorithm for stochastic discrete time systems, considering nonlinear plant, constrained controls, nonquadratic cost and simulations
06 p1025 A70-17962
- Concorde simulator for determining aircraft control responses and integrating pilot function into problem
07 p1249 A70-19743
- ATC real time simulation exercises in Brussels Upper Information Region
07 p1250 A70-20227
- Air combat simulator with attacker and evader pilots control capability, comparing simulated interceptions with flight test maneuvers
[AIAA PAPER 70-340] 09 p1656 A70-23023
- Digital control systems simulation on analog computer with digital logic, using conventional analog amplifiers and integrators
10 p1860 A70-24655
- Hybrid simulation, determining vehicle and performance parameters on longitudinal flying qualities of STOL transport in power approach configuration
[AIAA PAPER 70-387] 10 p1806 A70-24918
- Spacecraft launch computerized simulator, discussing operational characteristics applicable to on-line real time process control
11 p2013 A70-26217
- Human controllers nonlinear time domain mathematical model for analyzing compensatory tracking task data
11 p1992 A70-26396
- Mathematical model for rats nonlinear time-varying glucocorticoid secretion control mechanism, obtaining time dependent characteristics of hypothalamic-hypophyseal complex
12 p2174 A70-26893
- Synchronous satellite attitude acquisition and keeping, proposing roll and pitch control law for simulation
13 p2500 A70-28409
- Optimal space vehicle reentry control ensuring minimum scattering points based on accelerometer and free pitch-angle gyroscope data
13 p2503 A70-28456
- Stochastic approximation methods applied to pattern classification, estimation and control
13 p2442 A70-29586
- Gunn diode simulation with variable cross section, showing subthreshold and mode oscillograms
15 p2707 A70-31510
- Linear distributed dynamic system simulation using infinite product expansions for transcendental terms in transfer functions
16 p2942 A70-33348
- Tactical missiles electromechanical control actuator with reduced size and weight, describing mathematical model for analog simulation
16 p2845 A70-34111
- Digital computer simulation and analysis of control loops for ion thruster control
[AIAA PAPER 69-239] 17 p3149 A70-35654
- Display/control technology for high performance input/output between man and machine, describing man-in-loop simulation
19 p3369 A70-37875
- Computer real time Apollo simulation, checkout and training system duplicating actual mission for flight controllers in Mission Control Center
21 p3805 A70-41198
- Fighter aircraft higher order control system dynamics effects on longitudinal handling qualities evaluated by in-flight simulator for role of pilot induced oscillations tendencies
[AIAA PAPER 69-768] 22 p3961 A70-42711
- Cryogenic fluid heat exchanger flow oscillation automatic feedback control, discussing design and simulation
23 p4280 A70-44370
- CONTROL STABILITY**
- Popov type nonlinear control systems from synthesis viewpoint, using state variable feedback results to insure absolute stability
02 p0271 A70-12194
- Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity
04 p0760 A70-14433
- Mathematical problem of stability of nonlinear automatic control systems solved using linear criteria
05 p0825 A70-16866
- Satellite launch vehicle attitude control stability study including fuel sloshing and body bending effects
06 p1155 A70-17320
- Absolute stability of automatic control systems with multiple rigid and tachometer feedbacks
06 p1024 A70-17812
- Signal stabilization and performance of nonlinear sampled data systems, suggesting oscillations injection at input
06 p1026 A70-17970
- Nonlinear control systems stability with stochastic coefficients, applying Liapunov function
06 p1026 A70-17971
- Nonlinear feedback control systems frequency domain stability criterion obtained using gain-phase plot
06 p1026 A70-17972
- Linear optimal stochastic control systems described by covariance matrix correlating errors and estimates of state variables, analyzing instability under parameter variations
[AIAA PAPER 70-36] 06 p1095 A70-18054
- Partial stabilization of given quantities on steady motions of nonlinear control systems with initial perturbations based on observation theory
07 p1333 A70-18686
- Absolute stability ranges of forced motions and damping in nonlinear systems determined by Sturm theorem
07 p1243 A70-18688
- Periodic motions and dynamic stability of nonlinear distributed sampled data system of closed loop of pulsed element governed by heat conduction equation
07 p1226 A70-18749
- Control system composed of linear and nonlinear components and distributed parameters, deriving stability criterion for simple critical case
07 p1246 A70-19539
- Book on optimal control and guidance theory covering state and transition equations and canonical forms of linear systems, systems stability, servo loops, etc
07 p1246 A70-19668
- Soviet book on control systems for single rotor helicopters covering automatic stabilization system design, autopilots, pilot operation within closed control circuit, etc
08 p1435 A70-20769
- State observers/filters/ construction in multivariable control systems using phase transformation
08 p1478 A70-20778
- Existence theorem for linear stochastic systems optimal control described by differential equation with random coefficients, providing rms stabilization
08 p1480 A70-21637
- Feedback systems stability treated by functional analysis, describing procedures for generating instability criteria
09 p1654 A70-22348
- Soviet papers on complex control systems covering hierarchical structures, accuracy and stability analysis, optimal and self adjusting control, etc
11 p2022 A70-25601
- Asymptotic stability of multivariable autonomous control systems used Liapunov vector function method
11 p2083 A70-25606
- Asymptotic stabilization of multivariable dynamic systems, using subsystem decomposition and Liapunov second method
11 p2023 A70-25607
- Solid body control moments ensuring braking from rotational motion, finite orientation and angular velocity under minimum energy constraint
11 p2023 A70-25609
- Static longitudinal stick free and stick fixed aircraft stability equations for several configurations and power effects
[SAE PAPER 700238] 11 p1981 A70-25907
- Optimal and suboptimal aircraft lateral directional stability augmentation applying optimal control and model-following techniques
12 p2162 A70-27812
- Admissible controls synthesis for closed loop system/satellite/ stability
13 p2500 A70-28410
- Limit cycle oscillations in satellite attitude control system, producing control moment by pulse modulated controller
13 p2502 A70-28430
- Optimum power and operation mode of space vehicle engine with control error allowance as function of mass and velocity
13 p2503 A70-28458

- Aircraft optimal roll stabilization control system design using performance index with weighting matrix 14 p2532 A70-31395
- Computer control of nonlinear systems with varying performance specifications, using Popov stability and nonlinear programming 15 p2715 A70-31973
- Distributed sampled-data control systems with memoryless nonlinear feedback element, deriving frequency domain stability criterion 16 p2884 A70-33308
- Controllability of nonlinear dynamic feedback systems based on Liapunov-like stability approach and optimal control theory 16 p2885 A70-33321
- Guidance and control and propulsion technology, discussing fluidic systems, digital computers and structural materials, solid and liquid propellant engines 17 p3179 A70-35284
- Automatic control system stability, allowing for position and velocity loads and compressibility of fluid in force cylinder of hydraulic actuating mechanism 17 p3024 A70-35367
- Spacecraft wide angle attitude control system stability analysis, using air bearing table simulation 17 p3134 A70-35651
- Steady forced regime stability in pulse frequency modulated servosystems, using Liapunov method 18 p3234 A70-36071
- Stability conditions for control system third-order differential equations with double nonlinearity, using Liapunov function 18 p3280 A70-36157
- Lumped parameter pipeline and hydraulic systems stability, deriving equations of motion for closed and open cycle control systems 18 p3216 A70-36946
- Stability analysis parameter plane technique for tactical missile control system design, correlating variable parameters with characteristic equation roots location 19 p3532 A70-37853
- Optimal control problems with moving ends in presence of phase constraints, deriving difference approximation stability condition 20 p3601 A70-39730
- Controlled variable perturbation effects on system with internal positive feedback 20 p3602 A70-39829
- Variable wing sweep aircraft angular motion mathematical model, analyzing inertial moments influence on control dynamics 20 p3562 A70-40182
- Linear control plant identification by solving integral equation obtained from input and output signals 22 p4005 A70-43565
- Optimal asymptotic stability laws of control systems with unstable plant, using piecewise coordinate functions 24 p4321 A70-45494
- CONTROL SURFACES**
- NT AERIAL RUDDERS
- NTAILERONS
- NT ELEVATORS [CONTROL SURFACES]
- NT ELEVONS
- NT FLAPS [CONTROL SURFACES]
- NT GUIDE VANES
- NT HORIZONTAL TAIL SURFACES
- NT JET FLAPS
- NT JET VANES
- NT RUDDERS
- NT SPOILERS
- NT TABS [CONTROL SURFACES]
- NT TRAILING-EDGE FLAPS
- NT WING FLAPS
- Two dimensional wing model with harmonically oscillating control surface in transonic range, comparing theoretical with experimental results on unsteady pressure distribution 06 p0966 A70-17252
- Simulated degrading environment effect on spacecraft thermal control surfaces subjected to plume heating during apogee firing and solar irradiation [AIAA PAPER 69-1024] 09 p1657 A70-23259
- Compression process in turbulent boundary layer on control surface at hypersonic speeds, noting influence on surface effectiveness and heating [ONERA-TP-814] 11 p1979 A70-25815
- Rao optimization method for thrust nozzles at given length, analyzing control surface flow field conditions 12 p2158 A70-28202
- Frequency and amplitude during longitudinal control surface pumping by pilots in precise flight path handling for aircraft design [AIAA PAPER 70-567] 13 p2346 A70-29032
- Pressure field due to control surface oscillation in subsonic flow, presenting numerical results for rectangular wing 14 p2528 A70-30295
- Optimal control surface location for flexible aircraft determined by matrix minimum principle and calculus of variations 16 p2840 A70-33316

Lifting reentry vehicles control surface aerodynamics, considering boundary layer separation, shock interference, unsteady flow, etc 18 p3333 A70-36958

Rectangular wing with oscillating control surface, measuring induced unsteady pressure field for comparison with computations based on lifting surface theory 21 p3935 A70-41407

Aircraft control surface aerodynamic characteristics, considering low aspect ratio wing elevons with variable sweep leading edge as longitudinal and lateral controls [ICAS PAPER 70-26] 23 p4131 A70-44107

Unsteady aerodynamic loading of wings with control surfaces, discussing Kuessner integral equation of subsonic lifting theory 23 p4274 A70-44761

ONERA calculations in aeroelasticity including lifting surface optimization, control surface vibration, pressure fields, aircraft transfer functions and panel flutter 23 p4274 A70-44762

High subsonic and transonic effects on pressure distributions for swept wing with oscillating control surface 23 p4274 A70-44763

Pressure measurements on harmonically vibrating sweptback wing with two control surfaces in incompressible flow 23 p4274 A70-44768

Inviscid hypersonic flow fields past lower/compression/surface of delta wing calculated by one strip approximation of integral relations method 24 p4289 A70-46245

CONTROL SYSTEMS

U CONTROL

CONTROL VALVES

Slide and sleeve type servovalves used in Boeing aircraft possessing chip shearing capability of 200 pounds axial force 02 p0229 A70-12863

Static and dynamic characteristics of inertia load driving systems using electrohydraulic pressure and flow control servovalves [ASME PAPER 69-WA/FLCS-15] 04 p0626 A70-14842

Digital control valve for high speed aerospace blending, considering propellant and cryogenics applications 06 p0989 A70-18602

Pilot Airborne Recovery Device [PARD/ using hot air ballute, noting capability to ascend or descend by flow control valve controlling butane burner 07 p1192 A70-19019

Direct digital control valves in fluid flow process evaluated for performance by analog computer simulation 09 p1613 A70-23684

Cage trim control valve designs, outlining properties, advantages and limitations 14 p2534 A70-30682

Solid propellant rocket motor combustion control by fluidic vortex valve, considering thrust variation [AIAA PAPER 70-643] 16 p2965 A70-33535

NERVA engine chamber pressure control, investigating replacement of TPCV with fluidic vortex valve [AIAA PAPER 70-658] 16 p2970 A70-33620

Flow control valve without moving parts used in ATS A and D, describing design, operation and theoretical performance 16 p2846 A70-34132

CONTROLLABILITY

Controllability conditions for control system described by equation with vectors x and f being non-dimensional and u and r being dimensional 04 p0660 A70-14491

Nonlinear control systems with linear controls appearance defined for controllability concepts and sufficient conditions to reduce to lower dimensional problem 04 p0660 A70-14524

Approximate boundary controllability of heat equation, considering smoothness conditions on piecewise-smooth boundary 05 p0875 A70-15781

Reusable lifting entry vehicle flight tests, investigating handling qualities and subsonic-transonic aerodynamics of M2-F2/M2-F3/HL-10 and X-24A [SAE PAPER 690662] 05 p0792 A70-15840

Complex control follow-up systems in transient modes, suggesting synthesis for transfer function of control signal coupling 06 p1023 A70-17775

Unstable spiral precursor to jet upset/Mach tucks/in executive jet transports 06 p0987 A70-18248

N-local controllability conditions for system having permissible controls assumed to be certain piecewise constant vector functions 07 p1244 A70-18766

Structural synthesis of functional control systems represented by first order differential equations, determining hypersurface 08 p1479 A70-20871

Amplitude and Rotational 3-Axis Flight Simulators for handling qualities research, outlining physical constraints and methodology for driving visual display and motion systems 10 p1858 A70-24210

Civil VTOL transport aircraft handling and performance qualities using fixed base simulator with electronically generated display [AIAA PAPER 70-345] 10 p1859 A70-24214

Optimization of controlled systems with allowance for failures of parallel connected elements dependent on control inputs and phase coordinates 10 p1854 A70-24279

Controllability and observability of discrete composite systems in tandem with Jordan canonical form representation noting similarity to continuous systems 10 p1856 A70-24873

XB-70 aircraft flight tests in cruise and landing approach to evaluate handling qualities criteria [AIAA PAPER 70-566] 13 p2346 A70-29031

Pilot-aircraft closed-loop characteristics, using pilot transfer functions for handling qualities prediction [AIAA PAPER 70-568] 13 p2346 A70-29033

Flying qualities application to automobiles, discussing work load with respect to controllability and pilot behavior 13 p2347 A70-29142

Controllability test for second order differential systems, noting applicability to linear first order time dependent systems 13 p2443 A70-29972

Supersonic aircraft lateral stability and controllability design, discussing directional and weathercock stabilities 15 p2673 A70-31625

N-locus controllability of two dimensional holomorphic systems with permissible controls 15 p2715 A70-31641

Multidimensional linear stationary systems controllability and observability with given transfer matrix 15 p2716 A70-32345

Supersonic aircraft stability and controllability during turns about longitudinal and vertical axes 16 p2840 A70-33204

One dimensional controlled plants structure identification with mathematical model composed of aperiodic nonlinear and delay components connected in series 16 p2883 A70-33235

Controllability of nonlinear dynamic feedback systems based on Liapunov-like stability approach and optimal control theory 16 p2885 A70-33321

Control theory and calculus of variations - Conference, University of California, Los Angeles, July 1968 17 p3129 A70-34866

External aerodynamics role in handling qualities of amphibious hovercraft, discussing tests of hull shape, air cushion efflux and hollow models 17 p3017 A70-34919

Pilot induced oscillation rating regression analysis, examining time delay, slope after and time to first peak and stick force per g 18 p3213 A70-36444

Noise effect on signal parameter control in linear measurement devices 22 p3984 A70-42394

Nonlinear control systems described by linear equations, discussing quasi and local controllability as functions of time and stationary state 22 p4063 A70-43427

Stability augmentation in aircraft design for handling and operation benefits, discussing control techniques, autopilot modes and load limitations [ICAS PAPER 70-24] 23 p4138 A70-44109

Wheel force and roll moment nonlinearities effect on light STOL aircraft handling qualities during approach [ICAS PAPER 70-55] 23 p4139 A70-44151

Fluidically augmented artificial feel system for fighter and attack aircraft control, discussing improved handling qualities [SAE PAPER 700785] 24 p4294 A70-45859

STOL aircraft low speed handling characteristics described via approach and landing profiles, power requirements, wind effects, etc [AIAA PAPER 70-1332] 24 p4291 A70-45936

CONTROLLED ATMOSPHERES

NT CABIN ATMOSPHERES

NT INERT ATMOSPHERE

NT SPACECRAFT CABIN ATMOSPHERES

Liquid sodium droplets spontaneous ignition and combustion in controlled oxidizing atmosphere, discussing vapor phase diffusion flame, burning rates and evaporation constants 02 p0396 A70-12005

Oxygen consumption and rectal temperature in male mice confined in nitrogen and helium diluted hyperox- 07 p1244 A70-18766

ic atmosphere at specific temperature and humidity ranges 03 p0425 A70-13891

Photosynthesis and respiration rate in vegetables in controlled temperature, humidity, illumination levels, carbon dioxide and oxygen contents 03 p0425 A70-13892

EKG, EEG, pneumograms and X ray pictures showed no pathological effect after prolonged confinement in sealed chamber having artificial atmosphere with variable gas composition 05 p0810 A70-17121

Gaseous environments effects on creep of austenitic stainless steel, observing weakening in air and surface cracking in nonoxidizing atmospheres [ASME PAPER 68-MET-3] 08 p1519 A70-21453

Human peripheral blood circulation during prolonged underwater activity, showing compensation for high humidity, noise levels, low water temperatures, isolation and confinement 10 p1822 A70-25178

Burning velocities for methane-air mixtures with water cooled porous metal flat flame burner, discussing surrounding ambient atmospheres effects 14 p2666 A70-31093

Ben Franklin submarine life support systems tested during Gulf Stream Drift Mission, discussing atmosphere control, water, waste and food management [ASME PAPER 70-DE-60] 16 p2852 A70-33515

Long term helium-oxygen atmosphere effects on rats and mice, investigating biochemical and metabolic changes 16 p2849 A70-33996

CONTROLLED FUSION

Controlled thermonuclear power generation, considering fusion reactors feasibility and reactor energy balance improvement 04 p0717 A70-14528

Free plasma column discharge in HF field in high pressure deuterium atmosphere, discussing high plasma temperature inside column and reliable thermonuclear reaction achievement 08 p1551 A70-21417

Plasma generation and heating by controlled thermonuclear fusion reactions using pulsed lasers 09 p1734 A70-22249

Worldwide developments in controlled fusion, discussing low beta open ended configurations, open and closed high beta systems, full scale reactors, etc 11 p2089 A70-25718

Plasma production by long wavelength lasers applied to controlled thermonuclear reactions [AIAA PAPER 70-779] 17 p3103 A70-34476

Liquid metal heat pipes in magnetic fields of controlled fusion reactors, considering geometry, compound wick structure and vapor flow 21 p3946 A70-41046

Electrical characteristics of high current two stage DC Hall accelerator for use in controlled thermonuclear fusion 24 p4383 A70-45117

CONTROLLED STABILITY

U CONTROL U STABILITY

CONTROLLERS

NT SERVOAMPLIFIERS
NT SERVOECHANISMS
NT SERVOMOTORS

Automatic temperature controller consisting of single element of closed loop feedback system with adjustable transfer characteristics 02 p0296 A70-11874

Physiological limitations of air traffic controllers, considering stress factors connected with workload 04 p0716 A70-15314

Human controller in psychology and control engineering, discussing linear and nonlinear modeling of human behavior 05 p0807 A70-16487

Observation noise model for human controller remnant 10 p1823 A70-23893

Feedback controller specific suboptimal estimation and control parameters determination using stochastic approximation algorithms 11 p2026 A70-26236

Differential equations of controller providing optimum transient response for plant with indeterminate parameters, allowing for nonadditive random noise 13 p2382 A70-29278

Digital controller bits number determination to meet nominal controller coefficients accuracy requirements 16 p2867 A70-33304

Algorithm for implementing learning controller based on subgoal concept applicable to linear stationary system 16 p2868 A70-33312

Performance cost functions of on-off limit cycle controllers for reaction jet controlled system 17 p3056 A70-35552

Air traffic controller stress reduction, discussing work-rest intervals and various management and human factors 19 p3371 A70-38647

Air traffic controller role in future air traffic system, considering automation in operations 19 p3371 A70-38649

Helicopter stabilization systems design, synthesizing controllers by modal control theory [AIAA PAPER 70-1036] 20 p3560 A70-39501

Conventional closed loop controller design treated as particular formulation of optimal control problem through gain and integration derivations 21 p3927 A70-40783

Sampled data compensators hybrid realization for discrete controllers, selecting canonical representation with minimum number of delay elements 22 p4002 A70-42846

Universal proportional high accuracy temperature controller using current regulating circuit consisting of light beam galvanometer, photoconductor, photodiodes and thyristors 23 p4194 A70-43999

Gas turbine controller design by inverse Nyquist method compared to conventional multivariable design methods 24 p4396 A70-46157

CONVAIR MILITARY AIRCRAFT U MILITARY AIRCRAFT

CONVECTION NT FORCED CONVECTION NT FREE CONVECTION

Core convection consequences with regard to earth figure and continental drift, indicating no changes in magnitude of magnetization 01 p0076 A70-10899

Mesoscale rawinsonde network for convective process resolution, describing reduction and analysis techniques for thunderstorm wind, temperature and moisture data 03 p0521 A70-13165

Poloidal magnetic field influence on compressible fluid convection in spherical shells, using variational method to obtain stability criteria 04 p0758 A70-15695

Equations of conservation of mass, energy and momentum applied to rotation effects on convective motion in planetary interiors 05 p0905 A70-15759

Heat radiation effect on set-up and scale of cellular convection in atmosphere 06 p1097 A70-17789

Solar differential rotation relation to Rossby waves in upper convection zone based on energy conversion rate estimates 06 p1144 A70-18010

Solar and stellar convection regions and coronas using photospheric models, taking into account molecule formation 08 p1581 A70-21953

Rayleigh number effects on convection in planetary mantles, considering conservation equations of mass, energy and momentum 09 p1752 A70-22312

Heat radiation effect on set-up and scale of cellular convection in atmosphere 10 p1882 A70-25021

Cumulus convection one dimensional time dependent numerical model, considering horizontal mixing, evaporation, precipitation generation and freezing and thermodynamic processes 11 p2075 A70-25648

Poloidal magnetic field effects on main sequence stars core convection 11 p2117 A70-26654

Rotation law and circulation velocities in solar hydrogen convection zone under anisotropic turbulent velocity 12 p2302 A70-27588

Radar meteorology, discussing convection in lower atmosphere and clear air turbulence observations 13 p2443 A70-28475

Convection effects in mantle on earth gravitational field using hydrodynamic model 13 p2488 A70-28764

Jupiter Red Spot, explaining motion rate in terms of cellular convection in liquid hydrogen-helium layer 15 p2799 A70-31895

LF oscillatory convection characteristics in polytropic atmosphere in strong magnetic field based on sunspot theory 15 p2802 A70-32487

Waves nonlinear propagation in fluids due to convection, reviewing various solution methods 17 p3068 A70-34666

Energy transfer in convective envelope of rotating star and solar differential rotation, using Lucy gravity-darkening law 18 p3313 A70-36214

Equatorial acceleration of sun, considering rotation and turbulent energy transport in convective zone 23 p4252 A70-44830

Cosmic ray electrons solar modulation, considering diffusion-convection theory 24 p4397 A70-45769

CONVECTION CURRENTS

Periodic cellular convection in troposphere with allowance for anisotropic turbulent mixing, showing cyclone association and intervals 01 p0135 A70-10206

Invariant group study of free atmospheric convection equations at combination of Grashof numbers, Prandtl numbers and boundary conditions, noting infinite flux velocity 02 p0328 A70-12387

Cyclonic convective cell fluctuation and nonuniform core rotation effects on reversal of geomagnetic field, investigating fossil magnetism 04 p0676 A70-14600

Convection currents calculation in multicavity klystron allowing for space charge forces influence 05 p0823 A70-16889

Deflecting forces on nonrotating convecting systems due to environmental shear, comparing magnitude to rotation forces 06 p1100 A70-18571

Convective-current instability in finite length plasma column, analyzing spectrum of unstable harmonics 08 p1554 A70-21802

Integral theorems on vorticity transport derived by Carstou method, suggesting need for redefining Truesdell concepts of convection and diffusion 11 p2037 A70-26175

Magnetospheric convection models and effects on charged particle populations 13 p2402 A70-30064

Atmospheric cellular convection, reducing hydrodynamic equations to amplitude equations for vertical velocity 15 p2770 A70-32064

Temperature profiles and wind velocities during convective cloud banks formation from meteorological satellite data 15 p2770 A70-32065

Solar magnetic field origin and behavior, discussing hydromagnetic dynamos, cyclonic convection and generation times 20 p3706 A70-39927

Differential rotation at solar surface caused by anisotropic turbulent viscosity in hydrogen convection zone, solving via Navier-Stokes equation 20 p3711 A70-40404

CONVECTIVE FLOW

Nonthermal convection permissible modes in planetary mantles, using self gravitating homogeneous nonrotating sphere containing core and overlying viscous mantle 01 p0176 A70-10317

High temperature atmospheric models for red dwarf stars and sun to determine convection effect on atmospheric surface layers and emitted flux 01 p0190 A70-11349

Rapidly rotating solar interior damping by large scale convection analysis via maximum buoyancy force in water cylinder transition 02 p0373 A70-12391

Coupled diffusion of heat and vorticity in gaseous vortex caused by radial mass convection and temperature dependence of gas properties 02 p0400 A70-12858

Solar photosphere temperature fluctuations from model consistent with convection hypothesis agreeing with limb darkening data 03 p0570 A70-13591

Stellar model surface convective zone using diffusion equation taking into account transport due to gravitational separation, noting role of turbulent diffusion 03 p0574 A70-13932

Asymptotic solutions of paraboloidal boundary layer system for thermally driven convective flows governed by nonlinear Boussinesq equations 03 p0519 A70-14077

Free convective flows above flat horizontal plate demonstrating laminar boundary layer existence at intermediate Grashof numbers, using semifocusing color schlieren photography 04 p0780 A70-14456

Conducting fluid steady convection due to combined effects of thermal gradient and DC electric field predicted by analytical model 04 p0785 A70-14989

Steady convective motions in horizontal fluid layer bounded by porous walls of various temperatures at supercritical Rayleigh numbers, noting nonlinear convection equations 04 p0673 A70-15237

Solar atmosphere granular convective velocity field determination methods, using realistic assumptions for typical granulation size and seeing parameter 06 p1142 A70-17990

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem 07 p1252 A70-18669

Conducting fluids flow instabilities characterized by incipience at critical electric Hartmann number and 07 p1252 A70-18669

convection rate proportional to electric Reynolds number

07 p1348 A70-19265

Thermally induced convective mixing motion in rotating cylindrical cryogen space storage tank model under heat flux, calculating critical Rayleigh number

07 p1257 A70-19320

Turbulent velocities of convective motions in active and unperturbed photospheric faculae based on spectral observations

07 p1384 A70-19415

Electronic analog model for simulating convective mass transport in system with stationary and dynamic phases

07 p1423 A70-19740

Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations

08 p1482 A70-20952

Vertical plane and axis symmetrical numerical models for cumulus convection of moist atmosphere, discussing initial conditions

08 p1536 A70-21025

Unsteady free convection laminar power-law fluid flow past porous vertical wall, studying similarity solution dependence on wall temperature and suction

08 p1486 A70-21765

Lower atmosphere turbulence under convective conditions, comparing Doppler radar and instrumented aircraft wind speed fluctuation measurements

09 p1716 A70-22367

Radiation effects on polytropic atmosphere convective instability using method of disturbances

09 p1753 A70-22456

Initial value problem of macroscopic disorder-order transformation in random thermal convection phase of fluid heated from below

09 p1791 A70-23679

Supergranules /convective cells/ development shown in quiet sun filtergrams of H alpha chromospheric network taken above Arctic Circle

11 p2109 A70-25741

Temperature profiles in upper symmetric regime of heated rotating water annulus convection obtained by thermocouple probe, noting flow field disturbance and correction

11 p2046 A70-26499

Plasmapause form in equatorial plane in presence of magnetospheric tail subsonic potential convective flow

11 p2047 A70-26796

Laminar natural convection plumes behavior above energy sources calculated by simplest variables, indicating optimum formulation of boundary value problem

12 p2332 A70-27700

Eulerian space-time correlations of velocity and pressure for universal homogeneous turbulence by separating kinematic convection effects of large eddies from velocity assumption

13 p2386 A70-28645

Isolated convective plumes immersed in return flow turbulent downdraft

15 p2769 A70-31440

Free steady convective flow stability relative to three dimensional disturbances between parallel planes reduced to equivalent plane disturbances problem

15 p2718 A70-31461

Laminar to turbulent flow transition observation in laser induced vertical convection, using carbon dioxide-nitrogen laser

15 p2751 A70-31980

Convective flow stability in rotating fluid layer under rigid boundary conditions, calculating critical Taylor number as function of Prandtl number

16 p2893 A70-33686

Angular dependence of instability and Rayleigh number of natural convection flow on inclined flat plates, using electrochemical flow visualization

18 p3345 A70-36190

Optical observation of laminar convective flow caused by combined action of concentration and temperature fields

18 p3346 A70-36276

Freckles origin in unidirectionally solidified castings, noting convective jets role

20 p3646 A70-39102

Fluid motion convective stability between vertical parallel planes with longitudinal temperature gradient, solving boundary value problem for amplitudes of normal perturbations

20 p3608 A70-39377

Laminar convective flow from linear heat source along vertical plate, solving numerically for incompressible fluid by boundary layer approximation

20 p3614 A70-40403

Plane horizontal fluid film convective stability with free boundaries in vertical circular cylinder for periodic modulation of vertical temperature gradient or gravitational field

21 p3941 A70-40608

Ionospheric conductivity effects on plasma convective flow in determining magnetospheric electric fields distribution

21 p3816 A70-41084

Cellular convection in fluid layers with parabolic temperature distribution, calculating stability effects of gravity and surface tension gradients

21 p3952 A70-42078

Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting

23 p4227 A70-44554

Stellar rotation angular momentum loss in premain sequence convective phase, discussing polytropic structure, formation time and velocity changes

23 p4249 A70-44809

Solar chromosphere model convective instability, considering temperature and magnetic field effects

24 p4399 A70-45303

Flame propagation limits and damping mechanism in gases under convection, determining boundary and initial conditions

24 p4428 A70-45492

Shock wave structure calculation in liquids containing gas bubbles, taking into account compression wave steepening by convection

24 p4326 A70-45783

CONVECTIVE HEAT TRANSFER

Heat transfer in tube flow with forced convection, internal radiation exchange, axial wall heat conduction and arbitrary wall heat generation

01 p0214 A70-10294

Horizontal and vertical sound fields local effects on natural convection from heated horizontal circular cylinder, using shadowgraphy

01 p0219 A70-11198

Jovian atmosphere convective energy magnitude determination for various atmospheric thicknesses and temperature gradients

02 p0375 A70-12432

Radiative, conductive and convective combined heat transfer mechanism in nonisothermal atomic hydrogen plasma laminar flow

02 p0400 A70-12660

Transient heat transfer in forced convection flow over curved wall with zero Prandtl number, applying to laminar boundary layer with variable free stream velocity

02 p0400 A70-12857

Pseudoboiling heat transfer from platinum wire to carbon dioxide during free convection

03 p0604 A70-13209

Boundary layer approximation for natural convection in flat vertical symmetrically heated channel with stabilized laminar flow for local and mean Nusselt numbers

03 p0605 A70-13395

Internally air cooled turbine blades and vanes emphasizing coolant aerodynamics, heat transfer and blade life, high temperature in jet engines, etc [RAES PAPER 22]

03 p0551 A70-13545

Convective nongray stellar atmospheres construction for stellar stability studies, accounting for convective flow nonlocality and nongray radiative transfer

04 p0745 A70-14472

Radiation-convection interaction in plasma free jet, using two-thermal-domain model for enthalpy distribution determination

[ASME PAPER 69-WA/HT-50] 04 p0781 A70-14798

Convective heat transfer rates measured on cooled sharp leading edge flat plates at various angles of attack in hypersonic merged flow

[ASME PAPER 69-WA/HT-21] 04 p0614 A70-14813

Instantaneous heat transfer from oscillating wire in free convection in still air as function of time

[ASME PAPER 69-WA/HT-15] 04 p0783 A70-14819

Mechanical vibration effects on natural convective heat transfer in enclosure of rectangular cross section

[ASME PAPER 69-WA/HT-13] 04 p0783 A70-14820

Heat exchangers efficiency taking into account surface, weight and cost

05 p0958 A70-16551

Convective heat and mass transfer augmentation techniques including surface and displaced promoters, vortex flows, etc

06 p1174 A70-17681

Natural convection heat transfer from vertical plate immersed in thermally stratified fluid

06 p1175 A70-17685

Convective and radiative heat fluxes measurement on charring ablative materials surface in rocket nozzle environment

06 p1070 A70-18444

Natural convection flow interactions from individual surfaces in closely spaced array of heated elements, discussing effect on heat transfer, induced flow and temperature field

07 p1418 A70-18644

Ablative materials for thermal protection at low convective heating rates, comparing foam and state-of-art materials performance

07 p1316 A70-18927

Laminar flow forced convection heat transfer in circular pipe entrance region for constant wall temperature and constant wall heat flux

07 p1420 A70-19215

Convective and radiative heat transfer properties of two dimensional circular fin

07 p1421 A70-19316

Perturbation solution for fins taking into consideration interaction of conduction with radiation and convection

07 p1422 A70-19333

Penetrative thermal convection stability for statically unstable layer surmounted by statically stable layer from numerical integration of linearized equations of motion and heat conduction

07 p1269 A70-19947

Natural convection heat transfer from horizontal finned circular cylinder noting effect of distance between fins

07 p1425 A70-20169

Thermal entrance region effect on Nusselt number determination in asymmetrically heated rectangular duct with uniform heat flux

07 p1425 A70-20223

Monograph on convective heat flow in stagnation points of turbulent partly premixed free jet flames at cooled plates

08 p1598 A70-21343

Forced convection heat transfer between two parallel plates analyzed numerically for effect of constant heat transfer coefficient boundary condition

08 p1598 A70-21425

Two dimensional natural convection boundary layer on finite isothermal horizontal plate, examining upward facing cold plate and downward facing hot plate

08 p1598 A70-21580

External convective heat transfer coefficients from quartz-coated cylindrical hot film anemometer probes in mercury

08 p1599 A70-21582

Natural heat convection measurements in vertical annular spaces, noting importance of local density and velocity product

08 p1433 A70-21671

Counterrotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions

08 p1599 A70-21828

Natural heat convection in vertical annular space taking into account variations of volumetric mass, viscosity and thermal conductivity of air with temperature

09 p1786 A70-22047

Vertical heat transfer in silicone oil by single row convection cells, correlating cell number to transport rate and Rayleigh number

09 p1612 A70-22052

Heat transfer coefficient to gas in tube under unsteady heat flow conditions, studying Nusselt number dependence on Reynolds and Prandtl numbers

09 p1787 A70-22173

Slender body approximation for shape determination of nonslender hypersonic body of revolution with minimum convective heat transfer rate

09 p1788 A70-22931

Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects [ASME PAPER 69-HT-44]

09 p1789 A70-23551

Local Nusselt numbers beyond abrupt circular channel expansion tested for Reynolds numbers with air as working fluid

09 p1790 A70-23554

Liquid phase convective heat transfer as rate controlling mechanism for flame propagation, analyzing surface tension driven liquid flow induced by temperature profile

10 p1929 A70-24091

Turbulent gas nonresonant pressure pulsations effects on local convective heat transfer in tube flow

10 p1968 A70-24288

Convective-radiative heating of multilayer plate approximating temperature field by iteration

10 p1969 A70-25143

Heat transport by internal convection through He 2 in two fluid hydrodynamics model noting roles of thermal flux, superfluid component vorticity, normal component turbulence, etc

12 p2329 A70-27022

High temperature, electrically heated convective gas heating system for high velocity atmospheric flight simulation using air-nitrogen working fluids

12 p2205 A70-27100

Growth rate and spatial distribution of solid deposit freezing onto vertical surface in presence of convective heat transfer at moving phase interface

12 p2331 A70-27696

Corona-induced thermal boundary layer breakup effects on convective heat transfer from wire electrode to surrounding gas

12 p2333 A70-28110

Transverse flow convective instability spectrum in vertical channel with porous walls, noting Peclet number effects

12 p2333 A70-28199

Surface emissivity effects on combined conduction, convection and radiation heat transfer in nonisothermal hydrogen plasma, discussing optically thin and thick solutions

13 p2521 A70-29134

Solar thermal convection model, examining effects of rotation about vertical axis

13 p2496 A70-29839

Transient free convection flow due to arbitrary motion of vertical plate, linearizing equations of boundary layer flow and heat transfer

13 p2523 A70-30009

Laminar or turbulent flow in parallel plate channels with combined forced convective and radiative heat transfer, determining gas temperature field and Nusselt numbers

14 p2663 A70-30253

Convective heat transfer from rotating Al spheres in air at rest, investigating structure and boundary layer changes by schlieren method

14 p2665 A70-30398

Overstable convection formation of semiconvective zones in massive stars, noting Schwarzschild and Harm models

14 p2652 A70-31386

Free convection and heat transfer in square region bounded by solid impermeable walls heated from above, using two dimensional model

15 p2824 A70-31492

Convective heat transfer in Cu spherical shell and plate in supersonic rarefied gas flow at zero angle of attack from wind tunnel experiments

15 p2824 A70-31497

Laminar natural convective heat transfer along outer surface of vertical cylinder, giving coefficients nondimensionally by approximate formulas

15 p2826 A70-31821

Thermal boundary layer and heat and mass transfer at porous horizontal heated surface in presence of free convection, considering blowing and suction effects

15 p2827 A70-32133

Mixed forced and natural convection with low speed air flow over horizontal electrically heated cylinders

15 p2740 A70-32373

ATC-S satellite rocket exhaust plume convective heating measurements of VHF whip antennas, discussing nozzle flow and heating rate

[AIAA PAPER 70-843]

16 p3000 A70-33926

Convective heat transfer at solid boundaries in separated and reattached subsonic and supersonic flows, considering booster base heating

17 p3007 A70-34484

Forced convective heat transfer in annular passage with axially varying cross section, noting role of acceleration parameter

17 p3195 A70-34999

Natural convection heat transfer from vertical cylinder outer surface to liquids, discussing apparatus design and measurements

17 p3197 A70-35540

Free convection in compressible viscous heat conducting fluid, determining parameters leading to onset

17 p3198 A70-35697

Unsteady convective heat transfer in pipes in presence of heat flux density and flow rate aperiodic variations

17 p3198 A70-35730

Multiplying factors role in iterative solution of shock wave structures with large radiation-convection ratios

17 p3075 A70-35888

Aircraft electronic equipment cooling techniques, discussing natural and forced convection, phase change and heat pipes

18 p2322 A70-36763

Book on heat transfer covering conduction, convection, thermal radiation and heat exchange equipment

19 p3550 A70-37231

High temperature convective heat transfer in vortex chamber as function of Reynolds number and geometry, measuring pressure variations

19 p3552 A70-38186

Venus atmosphere heat transfer processes from Venera 4, 5 and 6 probes data, evaluating radiative and convective motions model

19 p3520 A70-38256

Book on variational principles in heat transfer covering conduction, convection, dissipation, thermal potential and force boundary layer problem and Lagrangian analysis

20 p3735 A70-39224

Integral transforms applied to convective heat transfer during nonNewtonian fluid flow with power rheology in pipes and channels

20 p3613 A70-40177

Laminar flow of liquid in duct with zero heat resistance of walls, calculating temperature distribution during radiative convective heating

20 p3613 A70-40297

Transient and steady state free convection heat transfer with mercury in vertical rectangular channel, measuring temperature distributions

21 p3941 A70-40773

Convective and radiative heat flux measurement incident on ablative surface in solid rocket nozzles

21 p3824 A70-40858

Forced convection heat transfer from flat plate and cylinder in cross flow to simulated Mars atmosphere

21 p3945 A70-41026

Transport model for flow field and convective heat transport in planar turbulent supersonic base flow

21 p3744 A70-41030

Free and forced convection of supercritical carbon dioxide normal to heated cylinder at constant temperature, measuring heat transfer rates

21 p3945 A70-41034

Freezing and melting of warm water flow at stagnation point over cooled plate for convective condition at solid-liquid interface

21 p3949 A70-41311

Unsteady convective heat transfer and hydrodynamics of laminar and turbulent channel flows

21 p3808 A70-41374

Mass flow rate correlation for nonsteady convective heat transfer in thin walled tubes with turbulent air flow

21 p3953 A70-42087

Heat transfer measurement from Pt wire to carbon dioxide near critical pressure, discussing film boiling and free convection flows

21 p3953 A70-42167

Dynamic nonstationary thermal convection in closed region with heat input from lateral surface for high Rayleigh and Fourier numbers

21 p3954 A70-42214

Nonstationary axisymmetric thermal convection in spherical cavity with boundary heat flux proportional to temperature, using difference scheme and networks method

21 p3954 A70-42215

Natural convection film boiling heat transfer literature, data sources for specific substances, photographic studies, mathematical models, etc

22 p4121 A70-42305

Buoyancy effects on transient free convection heat transfer in revolving tube for zero to 100 g centrifugal acceleration

22 p4122 A70-42437

Convective heat transport role in determining rotating planets climatic temperature zones

22 p4099 A70-42626

Nonaxisymmetric convection of rotating spherical shell in Herring approximation, noting applicability to sun

22 p4104 A70-42994

Gas turbine combustion chamber convective and radiant heat transmission, examining steam film cooling of flame tube

22 p4092 A70-43199

Spherical multilayer shell unsteady temperature fields, assuming mixed convective and radiative transfer at inner surface due to hot gas flow

23 p4276 A70-44165

Heat transfer by laminar forced convection of viscous fluid in noncircular cylindrical channel with internal heat source and varying wall temperature

23 p4276 A70-44236

Jupiter model thermal profiles, examining metallic core and molecular envelope in convective equilibrium

23 p4241 A70-44251

Forced convection heat transfer to liquid nitrogen near critical point, determining coefficients from given wall temperature and heat flux

23 p4279 A70-44358

Aerodynamic drag and local convective heat transfer on smooth plate for various flow velocities, determining effects of turbulator in boundary layer transition region

23 p4283 A70-44733

Rotating spherical shell equations as initial value problem, noting maximum convective heat transport at equator

23 p4249 A70-44805

Heat flux exchange by natural convection along flat vertical isothermal plate in laminar, transition and turbulent flows, using fluxmeters

24 p4429 A70-46207

CONVERGENCE

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem

01 p0664 A70-11032

Iterative computational procedure for generalized quadratic programming problem, formulating convergence theorem

03 p0460 A70-14165

Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments

05 p0939 A70-16502

Algorithm for constrained optimization problems providing rapid convergence

05 p0877 A70-16714

Integral equations for interpolation process remainder estimation, including convergence of functions interpolation and error analysis

05 p0877 A70-16970

Eigenvalue solutions convergence rates using two finite plate multidegrees of freedom bending elements

06 p1169 A70-17941

Iterative solution of nonlinear optimal control delineated for sufficient conditions for convergence

06 p1027 A70-18507

Indirect methods of trajectory optimization, improving convergence through normalization of state data and Lagrange multipliers

07 p1326 A70-19726

Radiation detector geometrical factor approximation for cylindrical bodies, observing convergence for right square and circular cylinders

07 p1286 A70-19971

Boundary value problem for self conjugate elliptical fourth order differential equation with variable coefficients, proving convergence of iterative process

07 p1328 A70-20143

Turbulent wake behind plate due to confluence of two incompressible fluids with different densities

07 p1261 A70-20463

Convergence role in distance perception during aircraft landing, testing subjects with normal binocular vision, emmetropic refraction and visual acuity

08 p1450 A70-20744

Difference schemes approximating quasi-linear heat conduction equation, demonstrating convergence

08 p1596 A70-20857

Differential descent convergence demonstration based on relation between convex and Liapunov functions

08 p1534 A70-21007

Conjugate direction procedures for function minimization compared for convergence, recommending modified conjugate gradient procedure

08 p1535 A70-21875

Nonorthotropic pinched plates deflections solution, demonstrating asymptotic convergence of small parameter method

09 p1769 A70-22151

Interval of values with stability and convergence for correctors for differential equations

09 p1641 A70-22286

Iterative technique for determining zero of differentiable function

09 p1641 A70-22287

Elastoplastic problems incremental solution by iterative method, demonstrating convergence

09 p1771 A70-22394

Multipoint methods for two point boundary value problems with Banach space self mapped, proving convergence theorems for iterative solutions

09 p1712 A70-23420

Soviet monograph on accelerated convergence method in nonlinear mechanics, discussing quasi-periodic differential equations solutions, smoothing techniques, etc

09 p1729 A70-23726

Power series solution convergence of differential equations system, changing independent variable by conformal mapping

10 p1909 A70-24181

Error analysis and monotone convergence of finite difference approximations to linear one dimensional singular boundary value problems

10 p1909 A70-24406

Analytical aerial triangulation iterative solution mathematical convergence parameters tests, considering photogrammetric relations for standard conditions in variable size block

10 p1878 A70-24729

Dynamic programming successive approximations optimization technique involving system state variables reduction with convergence proofs

10 p1845 A70-24871

Rayleigh method convergence for linear development of perturbations in unsteady plane parallel flow of ideal fluid, formulating and proving theorem

10 p1871 A70-25001

Bessel generalized polynomial series convergence and summability on contour of convergence region

11 p2071 A70-25521

Finite element method solutions for plate bending, improving convergence based on error analysis

11 p2144 A70-26676

Nonlinear equations systems iterative solution convergence by extending classical algorithm with optimization process

11 p2074 A70-26850

Markov renewal processes sums convergence to multidimensional Poisson process, discussing convergence conditions

12 p2260 A70-26884

Differential equations perturbed linear systems convergence, extending Bridgland results

12 p2260 A70-27011

Circular arch finite element solutions compared for convergence rates

12 p2327 A70-27838

Elliptic equations solved by projection network methods noting estimate derivation for convergence rates

13 p2440 A70-28962

Finite difference methods for approximating first order nonlinear hyperbolic differential equations, considering convergence

13 p2441 A70-29098

- Maximum convergence function in image recognition using dynamic programming and sequential optimization 14 p2553 A70-30419
- Differential equations eigenvalue and boundary value problem finite difference approximation convergence under consistency and stability conditions 14 p2599 A70-30643
- Convergence corrections for absorption coefficient measurements by far IR Michelson interferometer 14 p2586 A70-30988
- Fourth order differential equations eigenfunctions construction and convergence of expansions in theory of flexure of sector plates 14 p2658 A70-30997
- Sufficient conditions for convergence of infinite determinant 15 p2766 A70-31448
- Series expansions convergence of solutions to boundary value problem for Navier-Stokes equations, introducing small parameter in boundary conditions 16 p2890 A70-33243
- Limit theorems for sums of multidimensional stochastic step processes, giving necessary and sufficient conditions for convergence to Poisson measures 16 p2942 A70-33700
- Learning scheme with probabilistic teacher for unclassified samples, establishing convergence, comparing with linear estimator 17 p3128 A70-34851
- Convergent spherical rarefaction wave asymptotic behavior 17 p3075 A70-35892
- Boundary value problem for Navier-Stokes equations of viscous incompressible fluid flow, discussing convergence of iterative solution 18 p3241 A70-36290
- Finite element procedure convergence for third order boundary value problems solution 18 p3283 A70-36493
- Quadratures asymptotic properties and convergence for continuous functions and function with singularity 19 p3456 A70-37415
- Turbulent wake behind plate due to confluence of two incompressible fluids with different densities 20 p3557 A70-39263
- Filonenko-Borodich and Papkovitch methods convergence proof based on completeness of cosine binomials system in energy space 20 p3721 A70-39736
- Base function selection for energy calculation optimal convergence conditions of frequencies and stresses in turbomachine blades vibrations 20 p3722 A70-39784
- Linear reinforcement learning technique for accelerating convergence of successive approximation algorithms 22 p3994 A70-43491
- Iterative method for boundary value problems in mathematical physics, showing convergence by heat conduction equation solutions 23 p4276 A70-44218
- ### CONVERGENT NOZZLES
- Swirling flow equations in converging nozzles, comparing analytical and experimental data 03 p0405 A70-12929
- Laminarization parameter magnitude determination for turbulent boundary layer in convergent channel flow 08 p1484 A70-21518
- Aerodynamic and acoustic characteristics of subsonic and supersonic jets from convergent nozzles with room temperature air supply 17 p3005 A70-34460
- Conical convergent nozzles discharge coefficient for varying pressure ratios 19 p3352 A70-38243
- ### CONVERGENT-DIVERGENT NOZZLES
- Air flow density measurements with interferometer in supersonic square Laval nozzle, showing flow core motion and wave structure 01 p0064 A70-11000
- Numerical integration of differential equations governing one dimensional flow of reactive gas, discussing flows of converging-diverging nozzle and normal shock waves 04 p0671 A70-14992
- Supersonic nonequilibrium two phase flow in Laval nozzle from numerical solution of quasi-linear hyperbolic equations 04 p0617 A70-15229
- Solar wind as one dimensional flow analogous to Laval nozzle flow, discussing rotation and magnetic field effect on model with heat conduction 04 p0754 A70-15352
- De Laval nozzle behavior in vacuo, discussing flow rate parameters, viscosity and real gas effects, thermal effects, turbulent jet separation and reattachment, etc [AGARDOGRAPH-120] 08 p1434 A70-21932
- Convergent-divergent nozzle operation at low pressure ratios causing separation of internal flow, discussing stability and flow field 12 p2157 A70-28084
- Specific heat ratio and configuration effects on flow in subsonic, transonic and supersonic sections of Laval nozzle 12 p2159 A70-28233
- Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions 13 p2391 A70-29756
- Transonic flow in convergent and convergent-divergent conical nozzles with nonuniform inlet predicted by time dependent flow equations, discussing discharge and thrust coefficients [AIAA PAPER 70-635] 16 p2834 A70-33548
- Inviscid air nonequilibrium shock layer properties correlation based on plenum entropy, predicting composition of downstream converging-diverging nozzle expanding air flow 16 p2838 A70-33909
- Convergent-divergent nozzle flow under influence of friction drag, determining heat transfer rate as function of nozzle geometry 17 p3194 A70-34694
- Optimum nozzle geometry for minimum heat transfer to convergent-divergent nozzle wall from high enthalpy flow 17 p3196 A70-35238
- Real gas transonic flow transition through critical velocity in Laval nozzle, examining reasons for increment of viscosity and heat conduction effects 18 p3239 A70-36217
- Convergent-divergent nonequilibrium nozzle flow numerical solution by time dependent technique, investigating rapid vibrational nonequilibrium supersonic expansion of gas mixture with population inversion 20 p3609 A70-39655
- Liquid-gas separator design with reduced friction loss for MHD generators using two phase convergent-divergent nozzles 20 p3612 A70-40014
- Viscous gas flow through Laval nozzle, calculating velocity coefficient and pressure recovery in contracting and expanding parts 21 p3746 A70-41774
- Inviscid thermally nonconducting gas unsteady and steady motions in Laval nozzle of known geometry, obtaining solutions for subsonic, transonic and supersonic regions 21 p3811 A70-42074
- Wave drag due to swirling flow through convergent-divergent nozzle, deriving approximate solution for specified nozzle shape at various swirl ratios 23 p4179 A70-43971
- ### CONVERSION
- Electromagnetic to magnetostatic wave conversion loss reduction at L band by coiled transducer 16 p2913 A70-34038
- ### CONVERTAPLANES
- ### U/VSTOL AIRCRAFT
- ### CONVERTERS
- AC to DC converter design for transforming average AC values into DC voltage 08 p1438 A70-20601
- Linear signal converter analysis using topological method and coordinate transformation 08 p1480 A70-21231
- Exponential pulse time converter investigated for effect of supply voltage variations on duration of generated pulses 08 p1474 A70-21232
- Sensitivity distribution in working field of electro-optical converter tubes, noting use for photometric research 09 p1673 A70-22159
- Negative radix conversion results applied to logical design of serial converter 09 p1642 A70-22967
- Output and frequency limitations of functional converter using photopotentiometer with shaped resistor 09 p1682 A70-23358
- Fluidic curved-wall electropneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters 09 p1614 A70-23691
- Superposed converter magnetic field intensity normal component distribution as function of polar coordinate 13 p2348 A70-28659
- Transistorized voltage to pulse width converter based on constant current capacitor discharge 13 p2378 A70-29457
- Statistical output characteristics of harmonic cosine and sinusoidal inertialess phase periodic converters in two channel system with frequency multiplication 13 p2370 A70-29741
- Similarity theory in design of isofunctional electric converters, relating input-output criteria 14 p2533 A70-30374
- Thermal loads on semiconductors in solid state converters during short circuit and overload 15 p2709 A70-32205
- DC-to-DC converter design to supply different isolated voltages from single input 23 p4142 A70-43875
- ### CONVEXITY
- Singularities of solutions of partial differential equations, discussing smallest convex set in manifold with differential operator 19 p3457 A70-37680
- Convex programming solution using quadratic approximation method with objective function 23 p4211 A70-44027
- ### CONVOLUTION INTEGRALS
- Liapunov functionals for time delay systems generated by path integrals in state space in terms of convolution equations 06 p1094 A70-17953
- Convolution formulas for Cauchy and standard normal random variable distributions derived from geometry of circular symmetric distribution on plane 07 p1323 A70-18946
- Convolution equation for kinetic theory of EM field excitation in plasma waveguides 23 p4223 A70-43772
- ### CONVOLUTIONS [MATHEMATICS]
- ### U CONVOLUTION INTEGRALS
- ### COOLANTS
- ### NT ENGINE COOLANTS
- Spacecraft reentry trajectory optimization, considering minimum coolant weight requirement in internal cooling system 02 p0381 A70-12416
- Capillary boiling and heat transfer for coolant fluids, using motion photography and visual observations 23 p4277 A70-44320
- ### COOLERS
- Conical passive radiation coolers for quantum IR detectors on equatorial synchronous earth satellites, determining temperature excursions 16 p2915 A70-34314
- ### COOLING
- ### NT AIR COOLING
- ### NT EVAPORATIVE COOLING
- ### NT FILM COOLING
- ### NT LIQUID COOLING
- ### NT PRECOOLING
- ### NT QUENCHING [COOLING]
- ### NT RADIANT COOLING
- ### NT REGENERATIVE COOLING
- ### NT SODIUM COOLING
- ### NT SUPERCOOLING
- ### NT SURFACE COOLING
- ### NT SWEAT COOLING
- ### NT THERMOELECTRIC COOLING
- Thermomechanical processing of high strength low alloy steels to evaluate effects of composition, cooling temperature and cooling rate on mechanical properties and microstructures 01 p0118 A70-10726
- Artificial hypobiosis state maintenance in animals exposed to cooling after administering lytic mixtures for suppressing oxidation 01 p0029 A70-11464
- Martensite transformation with fcc lattice in Ti alloys containing 5.9 percent Fe as function of cooling rate, using X ray analysis 01 p0124 A70-11590
- Microelectronics equipment high density packaging and heat dissipation, discussing full utilization of high speed 02 p0271 A70-12847
- Widmanstatten structure in iron meteorites relationship to cooling rate and meteoritic origin 04 p0751 A70-15039
- Niobium addition effect on alpha-gamma transformation temperature during continuous cooling of low carbon Ni-Cu steel 04 p0706 A70-15134
- Ablative cooling mechanisms and applications, discussing environmental effects on material performance, pyrolyzed and graphitized plastics, phenolic ablators, etc 05 p0856 A70-16617
- Thermal interaction between casting and mold at beginning of cooling using mathematical model for temperature field 08 p1506 A70-21139
- Olivine and metal compositions of pallastite meteorites by electron microprobe measurements, obtaining cooling rates 12 p2296 A70-26895
- Iron and stony iron meteorite cooling rates and thermal models, showing melting, radioactive heat source redistribution and surface heating effects 13 p2497 A70-29861
- End support cooling in hot-wire anemometry of low density high temperature flows [AIAA PAPER 70-589] 13 p2412 A70-29882
- Alloying elements and austenization conditions effects on hardenability of steels, investigating critical cooling rates based on TTT diagrams 15 p2744 A70-31929
- S-IVB liquid rocket engine and propellant feed systems restart shutdown in orbital operations [AIAA PAPER 70-672] 16 p2967 A70-33574

- Cooling rate effect on beta phase transformation temperature in Ti-Nb and Ti-Al alloys
17 p3118 A70-34406
- Ti binary alloys beta phase continuous cooling transformation, investigating additives effects
17 p3118 A70-34408
- Repeated snow cooling effect on heat transfer in white rats during temperature homeostasis recovery after hypothermia
18 p3220 A70-36544
- Aircraft electronic equipment cooling techniques, discussing natural and forced convection, phase change and heat pipes
18 p3232 A70-36763
- Brayton cycles in gas turbines, investigating inter-cooling or reheat and pressure ratio proportioning influence on efficiency and specific work
[ASME PAPER 70-GT-130] 18 p3304 A70-36856
- Cooling rate effect on Al-Mg equilibrium state during heat treatment after annealing
20 p3644 A70-38959
- Portable contingency transfer life support system for crewman of Apollo missions providing oxygen and cooling
20 p3580 A70-39441
- Fusion welding cooling rates, peak temperatures and heating duration relationships to distance from fusion line predicted by theory for comparison with experiment
21 p3832 A70-40791
- Cryogenic cooling of IR radiation sensors for increasing sensitivity, considering background radiation interference from sensor optical system and detector/preamplifier noise
21 p3825 A70-41052
- Scintillator-film neutron radiography converter combinations efficiency gain for small sources by cooling
24 p4376 A70-45751
- COOLING FINNS**
Length calculation method for nonadiabatic imaginary tip extension of heat exchanger fins, predicting heat conduction rate
01 p0215 A70-10842
- Convective and radiative heat transfer properties of two dimensional circular fin
07 p1421 A70-19316
- Perturbation solution for fins taking into consideration interaction of conduction with radiation and convection
07 p1422 A70-19333
- Natural convection heat transfer from horizontal finned circular cylinder noting effect of distance between fins
07 p1425 A70-20169
- Rectangular fins arrangement on horizontal surfaces for optimum free convection heat transfer coefficient, considering fin weight, height and spacing effects
[ASME PAPER 69-HT-44] 09 p1789 A70-23551
- One dimensional numerical solution for steady state thermal behavior of trapezoidal profile annular fins transferring heat by conduction and radiation
[ASME PAPER 69-HT-6] 09 p1790 A70-23557
- Transient response of fin-tube space radiators sudden steady state operation halting and system cooling
09 p1790 A70-23564
- Increased heat transfer for thermal coupling by interleaving fins in space applications
13 p2519 A70-28522
- Counter current heat exchanger with spiral finned tubing and solid core
14 p2617 A70-31019
- Conical heat radiator system for cooling short cylinders
15 p2827 A70-32142
- Pin fin coldplate heat exchanger for cooling Apollo spacecraft electronic equipment, calculating forced convection heat transfer and fluid pressure drop
21 p3797 A70-41025
- Finned tube-sheet spacecraft radiator transient response for perturbations caused by power supply and heat sink temperature changes
22 p4123 A70-42519
- COOLING SYSTEMS**
Fatigue life of rocket nozzle coolant tubes under thermal cycling environmental conditions, considering design formulas for thermal buckling prediction
03 p0579 A70-12963
- Monograph on application of semicooled thermosiphon system to gas turbine blade cooling, covering heat transfer and temperature distribution analysis, etc
03 p0551 A70-12992
- Helium properties and utilization in NASA projects, discussing pressurization of fuel tanks cooling of superconducting magnets
04 p0720 A70-15633
- Exhaust gas ejectors for engine cooling, discussing ejector design, flow rates, fuel consumption, etc
06 p1129 A70-17144
- Transpiration and film cooling systems comparison for high speed flows with foreign gas injection effects
[AIAA PAPER 70-153] 06 p1179 A70-18073
- Heat pipes to cool electronic circuitry, discussing design and operation
09 p1786 A70-22015
- Lifting entry vehicle thermal protection system (TPS) material performance, analyzing metallic radiator and passive transpiration systems and rigid insulator
11 p2150 A70-26368
- Cooling system control system for astronaut thermal equilibrium and work output maximization during extravehicular space missions
13 p2357 A70-28526
- Energy balance in radiation detector cooling, analyzing refrigerator capacity and thermal load
13 p2412 A70-29870
- Current stability and coil tests of force cooled superconducting systems
14 p2617 A70-31017
- Heat transfer coefficient from circular cylinder subjected to uniform surface heat flux and cooled by ring of holes
14 p2667 A70-31427
- Heat pipes design for rocket engines cooling, discussing connections to space radiator and to heat rejection device and heat transfer capability
[AIAA PAPER 69-582] 15 p2791 A70-32517
- Nuclear rocket nozzle cooling passages, discussing heat transfer and friction correlations for single-phase hydrogen turbulent flow
[AIAA PAPER 70-661] 16 p2950 A70-33622
- Passive radiative coolers role in utilizing IR detector systems for low temperature spacecraft applications, describing staged radiator design, optimization and tests
[AIAA PAPER 70-854] 16 p2983 A70-33921
- Cryogenic attachment for cooling and tilting metal samples in electron microscope
18 p3259 A70-36474
- Diathermic heat exchange cooling systems, analyzing volume boiling in terms of separation into convective and radiative components
19 p3550 A70-37239
- Integrated Cryogenic Isotope Cooling Engine system (ICICLE) for spacecraft sensors refrigeration requirements
21 p3947 A70-41053
- Internally cooled turbine blade with longitudinal cooling channels, calculating temperature field by combined analytical and analog method
21 p3868 A70-41772
- Electrofluid dynamic cooling system for spacecraft environmental control, describing design and operating principles
22 p3965 A70-43142
- Stepwise heat removal for increased continuous combustion gas turbine engine cycle efficiency, deriving equations describing cycles
22 p4092 A70-43372
- Hypersonic airbreathers aerodynamic, structural and propulsive system interactions, discussing hydrogen fuel heat sink, airframe and engine cooling and airframe materials
[ICAS PAPER 70-16] 23 p4138 A70-44127
- High speed internal combustion engine mixed flow type liquid cooling system, deriving dynamic thermal characteristics from differential equations solution
24 p4393 A70-45502
- COOPERATION**
Cooperative differential game with cost functional minimized by each player, discussing problems with linear combinations of state variables final values
11 p2073 A70-26228
- Linear multiplayer differential games absolutely cooperative solution, discussing control variables assumption of interior values
20 p3660 A70-40383
- COORDINATE SYSTEMS**
U COORDINATES
COORDINATE TRANSFORMATIONS
Computerized method for processing photographic earth satellite observation results, transforming coordinates by nonconformal approximation of polynomial function
05 p0814 A70-16367
- Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas
08 p1564 A70-20560
- Linear signal converter analysis using topological method and coordinate transformation
08 p1480 A70-21231
- Satellite photograph equatorial coordinates dependence on magnitude of evaluated region, objective distortion and transformation methods
09 p1679 A70-23056
- Geographic coordinates of intersection points determined directly on sphere, noting reduction on ellipsoid and adjustment for surplus intersections
09 p1670 A70-23441
- Initial quaternion for Cartesian time varying transformation matrix based on self alignment method of inertial analytic platform
11 p2072 A70-26150
- Algorithms for transforming coordinates from photographic plate system to equatorial coordinates, noting applicability with unknown optical center position in plate system
11 p2007 A70-26188
- Heat conductivity equations transformation for Cartesian and cylindrical coordinates and various boundary conditions using static electrointegrator
15 p2827 A70-32172
- Selenodetic investigations based on lunar photographs with background stars, converting equatorial coordinates to orbital using Cracovian formulas
15 p2805 A70-32715
- Horizontal Situation Display /HSD/ map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection
[AIAA PAPER 69-987] 22 p4068 A70-42710
- COORDINATES**

Geometrical interpretation of motion of body about fixed point in Hess case based on Kharlamov kinematic equations, using special coordinates system
01 p0144 A70-11428
- Periodic motions and integral stability for systems with quasi-cyclic coordinates applied to current carrying conductor oscillations and linear case of Routh equations
01 p0212 A70-11573
- Satellite topocentric equatorial coordinates determination from photographic observations
02 p0363 A70-11773
- Dead zone initial disturbance of sensitive element dynamic coordinate in two rotor gyrocompass determined using method of averages
03 p0484 A70-13419
- R function method for solving plate bending problem by satisfying differential equations coordinates
04 p0767 A70-14489
- Difference equations and axial stress tensor component for turbomachinery in curvilinear coordinates systems
04 p0776 A70-15268
- Coordinates computation method using spherical harmonic expansion of geomagnetic field, discussing direct computations by perturbation method
05 p0837 A70-15820
- Stress functions in three dimensional nonaxisymmetric elastostatics problems in circular cylindrical coordinates, proving representation completeness for cylindrical bodies
05 p0932 A70-16172
- One dimensional unsteady heat conduction with variable boundary conditions solved by difference-differential method using rectangular and cylindrical coordinates
05 p0957 A70-16295
- Geomagnetic center position determined by coordinate system referred to dipole approximating geomagnetic field
06 p1057 A70-17844
- Hybrid coordinate formulation for flexible space vehicle attitude control system design
[AIAA PAPER 70-20] 06 p1158 A70-18180
- Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system
07 p1267 A70-19453
- Inertial navigation systems errors determined by geometric method, obtaining object coordinates
07 p1332 A70-20145
- Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation
08 p1565 A70-20563
- Phase coordinates conditional probability density statistical characteristics from continuous reception of random information, deriving differential equations
08 p1479 A70-20998
- Spectral densities of phase coordinates of nonlinear automatic systems in steady states at random disturbances determined by statistic linearization
08 p1480 A70-21016
- Moon rotational constants determination allowing for crater Moesting A coordinate errors
08 p1574 A70-21156
- Transient heat conduction and stationary temperature distribution calculation in curvilinear coordinates using finite element method
08 p1590 A70-21362
- Spherical coordinate intermediaries for calculating satellite orbits
09 p1760 A70-22914
- Televor principle for radial radio coordinates production in all frequency bands, discussing ring antenna feeds
09 p1722 A70-23033
- Satellites equatorial topocentric coordinates determination from photographic observations
09 p1763 A70-23328

Planar restricted three body problem in Thiele coordinates, developing recurrence formulas for coefficients in Taylor series expansions of solution 10 p1938 A70-24178

Three dimensional elasticity by Ritz method, using coordinate system orthonormalized in energy metric of operator to avoid precision loss 10 p1957 A70-24511

Photographic plate reduction method at Polish Academy of Sciences based on sufficient reference stars, correcting x and y coordinates 11 p2007 A70-26194

Automatic input data generation for finite element method using algorithm based on complex geometrical configurations topological classification in terms of natural coordinates [JPL-TR-32-1486] 11 p2144 A70-26678

Explorer 4 magnetic coordinates recalculation using spherical harmonic representation and modified B-L package 12 p2222 A70-27191

Coordinate function selection for boundary value problems solution by Galerkin method demonstrated for heat conduction equation of anisotropic parallelepiped with internal source 12 p2271 A70-27291

Optimization for control processes with first and higher order constraints on phase coordinates 12 p2205 A70-28195

Vinti potential with spheroidal coordinates for equations of motion in earth satellite orbit computation 13 p2486 A70-28503

Soviet book on theory and practice of maps application in aviation, covering coordinates for objects positions determination on ground error estimation, etc 13 p2448 A70-28725

Meteor observation station design and operation, describing calibration difficulties and reflecting points coordinates determination 14 p2583 A70-30331

Loran C coordinates bias function determination by regression analysis using observed time differences 14 p2615 A70-31195

Coordinate systems generation for optimal trajectories, considering Lagrange multiplier as motion constant 14 p2651 A70-31368

Numerical solution to Laplace equation in spherical coordinates with axial symmetry, using Dirichlet method to obtain difference equations 15 p2767 A70-31751

Diurnal vibrations damping in inertial navigation system, demonstrating equations asymptotic stability for coordinates autonomous determination 15 p2775 A70-32156

Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation 15 p2805 A70-32718

Plasma velocity and moment equations in magnetic dipole field as function of variations along coordinate directions 16 p2956 A70-32934

Modified discrete ordinate approach in rarefied gas dynamics tested on linearized Couette flow between concentric cylinders, using integral iteration 17 p3067 A70-34548

Constraint optimization in state coordinates by variable structure system flexibility, using mathematical model 18 p3281 A70-36353

General relativistic equations for stationary axially symmetric rotating perfect fluid in comoving coordinate system 18 p3292 A70-36900

Sporadic E layer parameters spatial distribution, describing analytic planetary coordinate system 18 p3249 A70-36927

Cylindrical body with gravitational and magnetic anomalies, selecting point coordinates for body parameters 19 p3407 A70-37298

Coordinates for diagonalizing kinetic energy of particle system relative motion, discussing potential energy surface 19 p3373 A70-37841

Coordinate sequences for regions with complex geometries and various boundary conditions, using linear operators 19 p3460 A70-38940

Computer program transforming spherical harmonic coefficients into arbitrarily tilted coordinate systems, tabulating coefficients of International Geomagnetic Reference Field 1965 in dipole coordinate system 20 p3621 A70-39353

Entropy layer in hypersonic flows, determining body configuration from shock wave shape described by coordinates power function 21 p3743 A70-40610

Optimal control of coordinate space cells inspection order during search for unknown number of objects 22 p3999 A70-42552

Output coordinates probability distribution density of nonlinear automatic control systems at fixed time, using multiple integrals 22 p4003 A70-42888

Horizontal passpoint error in block analytic aerotriangulations with dense perimeter ground control 22 p4031 A70-42964

Systematic approach to construction of finite elements, discussing choice of generalized coordinates useful in problems involving singularities 22 p4116 A70-43208

Optimization for control processes with first and higher order constraints on phase coordinates 22 p4004 A70-43320

Field control method for aerial photograph planar tying-in, applying to cartographic reference point coordinate determination in triangulation 24 p4334 A70-45499

COORDINATION

Motion coordination capacity of persons subjected to 40 days bed rest using dynamographic technique, discussing nature of slackening 03 p0425 A70-13896

Human motion coordination under acceleration followed by weightlessness during jet flights along Keplerian orbits, discussing initial disturbance and subsequent subsiding 03 p0425 A70-13897

Machinery for management of Sea Dart missile development using managerial concepts of planning, organizing, commanding, coordinating and controlling 08 p1601 A70-21036

Monograph on systematically disturbed sensorimotor coordination, studying various parameters effects on eye-hand system recoloration 09 p1618 A70-22529

Heterochronism of coordinated cophasal flexor and extensor movements during acrobatic leap in human subjects 12 p2168 A70-27344

Hand-eye coordination in altered gravitational fields, using mirror viewed target in reaching test 15 p2689 A70-31886

COPILOTS

U AIRCRAFT PILOTS

COPLANARITY

Three vector coplanarity equations for space geodetic triangulation grid, discussing role of satellite photographic observation 09 p1667 A70-22488

COPOLYMERIZATION

Graft copolymerization and chemiluminescence analysis of lipids complexes in animal and plant tissue homogenates exposed to gamma radiation 03 p0419 A70-13305

COPOLYMERS

Tuned resonant test for measuring damping characteristics of lead and asbestos filled epoxy-poly sulfide copolymer 08 p1527 A70-21336

Alternating copolymer of guanlylic and cytidylic residues synthesized in RNA polymerase-catalyzed reaction 09 p1630 A70-23274

Styrene-oxygen copolymer preparation methods, discussing burning rates for rocket solid propellants mixtures with ammonium perchlorate 11 p2100 A70-26146

Gas and environmental temperatures, flow rate and sample geometry effects on limiting oxygen index in acrylonitril-butadiene-styrene copolymer, polystyrene and polyester 13 p2439 A70-29261

COPPER

Epitaxial growth of Cu vapor deposited on W single crystal /110/ surface using low energy diffraction, Auger electron and work function techniques 03 p0538 A70-13100

Copper specimens stress-strain diagrams under cyclic loads of various amplitudes, noting three stage process plastic deformation 06 p1162 A70-17386

Thermal emittance of Cu measured in vacuum in spherical enclosure by calorimetric method to investigate oxidation effect [AIAA PAPER 70-66] 06 p1180 A70-18139

Plastic zone around propagating fatigue crack in Cu single crystals, using transmission electron microscopy and X ray topography 06 p1171 A70-18494

Microstrain characteristics of continuously reinforced W-Cu composites as function of volume fraction of fibers and prestrain, discussing dislocation friction stress 08 p1524 A70-21917

Oscillations of longitudinal magnetostriction in silver and copper single crystals at low temperature 11 p2098 A70-25619

Thermal conductivity of neutron irradiated copper at low temperature noting lattice defects 11 p2148 A70-25757

Stress-strain state effects on Cu and Ni tubular samples plasticity and strength using polarization-optical technique 12 p2323 A70-27341

Filamentary crystal growth associated with hyper-velocity microparticles impact upon Cu foil 13 p2513 A70-29264

Tungsten fiber reinforced copper based composite material, investigating moulding and sintering conditions effect on mechanical properties 19 p3450 A70-37454

Copper based cermets production by electrochemical deposition in lieu of powder metallurgy, discussing merits 19 p3450 A70-37455

Cu and Ag low alloying effect on Al single crystals elastic limits and first deformation stages 20 p3644 A70-38960

Silica marker motion in sintering of loose spherical copper powder aggregates 20 p3647 A70-39109

Tungsten wire reinforced copper matrix composite, determining fibers pull-out contribution to fracture work 20 p3651 A70-40047

Copper and Al polycrystalline single crystal substructure changes, examining high temperature, unsteady and diffusion creep 22 p4056 A70-43342

V and Cu emission spectrographic analyses in chondrite types, noting distribution patterns between groups based on meteorite chemical fractionation mechanisms 24 p4411 A70-45789

Cu and Ni doped n-p and p-n silicon solar cells, examining radiation damage and isochronal annealing properties 24 p4294 A70-45810

COPPER ALLOYS

NT BRASSES

NT BRONZES

NT MANGANIN [TRADEMARK]

Stress corrosion cracking in Cu-Al alloys shown dependent on alloy and Cu ion content, solution pH and stress level, discussing tarnish film formation role 01 p0119 A70-10734

Notch-bend strength of titanium, aluminum and copper base alloys, noting geometrical size effect [ASME PAPER 69-MET-D] 04 p0705 A70-14878

Cyclic creep curves plotted from expansion diagrams for steel, copper and brass under small numbers of cyclic compression tension loads 06 p1162 A70-17388

Aged Al-Cu alloys hardness test data normalized and correlated for interpretation in terms of physical metallurgy 08 p1525 A70-21967

Phase diagram of rapidly crystallized Al-Cu-Mn alloys, observing ternary solid solutions formation during high cooling rate of melt 09 p1709 A70-23786

Aluminum and aluminum-copper alloys dislocation damping at high strain rates using impact shear tests 10 p1903 A70-23983

Al-Si and Cu-Ti eutectic alloys showing good ohmic contacts to SiC 10 p1927 A70-23990

Copper alloy composite reinforced by unidirectional solidification of pseudobinary eutectic Cu-ZrCuSi, discussing mechanical properties and electrical conductivity 11 p2066 A70-25775

Cu-Fe-Ti ternary system via microscopic, X ray and thermal analyses, measuring microhardness, electrical resistivity and magnetometry 13 p2433 A70-28863

Specific heat measurements on disordered and ordered phases of Cu-Au alloys at low temperatures 14 p2626 A70-30497

Steel and copper alloys torsion-tension members under nonproportionate loads, predicting creep behavior [SESA PAPER 1615] 15 p2759 A70-32316

Martensite transformations and cellular phase separation in Ti-Cu alloys, using electron microscopy 17 p3119 A70-34412

Heat resistance of cast, forged and annealed Ti-Cu alloys, discussing forged alloys mechanical properties as function of chemical composition and temperature 19 p3449 A70-37273

Oxide dispersed Cu alloys preparation by surface oxidation of powders, considering structural stability and stress rupture properties 20 p3646 A70-39103

Grain boundary damping characteristics of Cu-Ni alloys solid solutions, discussing height, temperature and activation energy of solute peak 22 p4053 A70-42729

Light rare earth metals improving Mg alloys, Al alloys, Cu alloys and superalloys 22 p4057 A70-43575

Short range order and Fermi surface effects in copper-rich Cu-Al alloys single crystals from X ray scattering measurements 23 p4204 A70-43886

Al-Cu alloy unidirectional solidification, investigating interfacial transition from plane to cellular structure and segregation pattern 24 p4362 A70-46179

Cellular breakdown in binary Al-Cu alloys in unidirectional solidification, observing small pit stability on solid-liquid interface 24 p4362 A70-46180

COPPER CHLORIDES

CuCl single crystal refractive index measurement at room temperature using V-block refractometer 02 p0350 A70-12453

High energy density nonaqueous battery with lithium metal anodes, cupric chloride cathodes and organic aprotic solvent electrolyte [AIAA PAPER 70-530] 13 p2349 A70-29038

Cuprous chloride /CuCl/ as low-loss electro-optic material modulating 10.6 micron laser radiation 22 p4051 A70-43334

Formation and radiative recombination of free excitonic molecules in CuCl single crystals via Q switched ruby laser excitation 24 p4353 A70-45604

COPPER COMPOUNDS

NT COPPER CHLORIDES

NT COPPER OXIDES

NT COPPER SULFIDES

Copper chromite catalyst effects on sublimated ammonium perchlorate dissociation products, noting applications to solid propellants 03 p0544 A70-13923

Hydrous Cu-Ca silicate mineral /kinoite/ from Arizona occurring as single crystals and veinlets 24 p4329 A70-45459

COPPER OXIDES

Oxide layers on metal substrate noting emittance dependence on thickness in aluminum-aluminum oxide and Cu-CuO systems [ASME PAPER 69-WA/HT-4] 04 p0705 A70-14825

COPPER SULFIDES

Minority carrier diffusion lengths on sides of copper sulfide-cadmium sulfide heterojunctions measured by light microprobes 13 p2471 A70-29709

CdS conversion by cation exchange to single crystal CuS, examining phases structural relationship 19 p3486 A70-37766

Copper disulfide-cadmium sulfide thin film solar cell degradation under simulated low orbit conditions, investigating thermal stress 21 p3759 A70-41313

CORDITE

U COLLOIDAL PROPELLANTS

U DOUBLE BASE PROPELLANTS

CORE FLOW

Axissymmetric incompressible fluid flow aerodynamic properties in flat vortex chamber, studying core and boundary layer interactions and velocity fields 03 p0551 A70-13731

Core length of water jet from circular tube, considering wall roughness, tube diameter and water viscosity and surface tension 06 p1031 A70-17135

Viscous core of incompressible swirling flow through nozzle using momentum-integral equations [AIAA PAPER 70-51] 06 p1038 A70-18079

Turbulent friction in gas flow core determined on basis of maximum stability principle 07 p1253 A70-18719

Poloidal magnetic field effects on main sequence stars core convection 11 p2117 A70-26654

Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point 12 p2209 A70-27289

Vortex core diameters calculation methods for axisymmetric angular momentum flows 17 p3074 A70-35750

Turbulent boundary layer in axisymmetric channel having interactions with flow core, calculating flow characteristics and separation point 20 p3613 A70-40339

CORE SAMPLING

Apollo 11 lunar rocks, soil and core samples major, minor and trace elements abundance by radiochemical and instrumental activation analyses 21 p3910 A70-41614

Amino acid racemization as enantiomers in core sediment samples 21 p3781 A70-41896

CORES

NT EARTH CORE

NT HONEYCOMB CORES

NT MAGNETIC CORES

NT REACTOR CORES

Shear modulus of sandwich structure tubular core derived by virtual work principle and matrix approach, comparing results with honeycomb core [DGLR-69-64] 04 p0774 A70-15156

Jupiter conductive molten metallic hydrogen core of moderate temperature suggested from solids melting point temperature dependence on pressure 07 p1390 A70-20238

Pulsar formation mechanism, showing core collapse to neutron star state 15 p2806 A70-32773

Core flexibility effects on deformation of uniformly loaded clamped parallelogrammic sandwich panels using linear theory 17 p3185 A70-34920

Core-filled thin cylindrical shell under radial ring and band pressure loads, using Boussinesq-Neuber stress function and Flugge shell theory 19 p3543 A70-38247

Circular cylindrical shell with annular orthotropic elastic core, analyzing stress wave propagation under pressure pulse 21 p3938 A70-41740

CORIOLIS EFFECT

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field 01 p0173 A70-10133

Free convection to rotating central plate in synchronously rotating surroundings with and without consideration of Coriolis forces [AICHE PREPRINT 9] 01 p0216 A70-10968

Coriolis effects in spherical Einstein universe perturbed by rigid body rotation of shell with finite thickness 01 p0186 A70-11272

Rotating compressor vanes vibration frequencies and modes using shell theory, considering Coriolis forces and rotation rates effects 01 p0211 A70-11427

Elastic stability of Coriolis-coupled oscillations of thin rotating disk under influence of centrifugal forces 02 p0389 A70-12650

Adaptation to Coriolis accelerations associated adaptation schedule to with 1-rpm increments developed for preventing motion sickness in slow rotating environment 07 p1223 A70-19938

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field 08 p1576 A70-21409

Vestibulometric techniques for medical examination and pilot selection using Coriolis accelerations for instability prognosis 09 p1617 A70-22475

Alcoholic beverages effect on positional nystagmus and Coriolis acceleration 11 p1993 A70-26520

Mesoscale waves in jet stream flow within Coriolis force over rotating earth by amplitude functions and phase velocities asymptotic series representation 12 p2265 A70-28334

Coriolis illusions amelioration during space flight, noting cross coupling effects minimization by reflex vestibular stabilization of head 13 p2358 A70-29432

Pitch and Coriolis illusions effects on pilot pitch angle adjustment in simulated takeoff 15 p2689 A70-31885

Blind persons susceptibility to acute motion sickness during stressful Coriolis acceleration 15 p2689 A70-31887

Rotating cold plasma wave propagation modes including Coriolis effect in absence and presence of external magnetic field 21 p3860 A70-41924

Coriolis parameter effects on stream and pressure functions in geostrophic wind equation 22 p4065 A70-43167

Coriolis acceleration effect on inplane vibration resonant frequencies of rotating disks 24 p4425 A70-45780

Cornea UV radiation effects on mucopolysaccharide compounds in tears and on cornea epithelium of albino rabbits 01 p0037 A70-10860

Corneal epithelium chromosome rearrangements in gamma irradiated white adult mice, noting radiation dosage and duration 03 p0426 A70-13903

Corneal stroma transparency analysis based on refractive index and lattice theories 09 p1618 A70-22675

Corneal thermal response model for carbon dioxide laser radiation, computing temperature rise from power distribution and conducting air-cornea interface 11 p2062 A70-25635

Biochemical heterogeneity of corneal mucopolysaccharides [glycosaminoglycans], using extraction without proteolytic enzymes 24 p4304 A70-46344

CORNEA

CORNERS

Three dimensional viscous and inviscid hypersonic flow interaction at rectangular corner, measuring surface and Pitot pressures, heat transfer rates, shear stresses, and Pitot 04 p0620 A70-15533

Hypersonic corner flow in He investigated by heat transfer, surface pressure, pitot surveys, oil and electron beam flow measurements [AIAA PAPER 70-227] 06 p1039 A70-18110

CORONARY CIRCULATION

Flow equations for curvilinear boundary layer based on laminar incompressible boundary layer in stream-wise corner 13 p2386 A70-28541

High Reynolds number flow in moving corner, observing vortex motion at piston and cylinder wall interface by flow visualization techniques 16 p2895 A70-34240

Laminar hypersonic boundary layer interaction with corner expansion wave, presenting numerical solutions to viscous-inviscid equations for small turning angles [AIAA PAPER 70-807] 17 p3065 A70-34457

Incompressible laminar boundary layer along rectangular corner, obtaining similar solutions for velocity distribution 17 p0370 A70-35239

Subsonic and supersonic laminar boundary layers separation near sharp corners, considering curvature and Reynolds number effects 18 p3208 A70-36486

Viscous supersonic flow near sharp convex corner, discussing visual observation and quantitative surveys of velocity and pressure profiles 18 p3208 A70-36659

Radiant heat transfer at vertex of adjoined flat plates separated by vacuum 18 p3243 A70-36711

CORONA DISCHARGES

U ELECTRIC CORONA

CORONAGRAPHS

Ionized iron lines observations under coronal conditions, giving halfwidths and kinetic temperatures for forbidden lines Fe X-Fe XV 14 p2651 A70-31377

Solar catadioptric coronagraph design free from chromatic image defects 15 p2737 A70-32041

Solar limb photographic, isodensity and isothermal data for eclipse of 7 March 1970 from coronagraph observations, noting coronal green line and prominence activity 24 p4402 A70-45389

CORONARY CIRCULATION

Vascular anatomy correlation with human heart conduction tissue structures to study coronary artery disease cases exhibiting major conduction disturbances by ECG 01 p0013 A70-10273

Cardiac output and coronary blood flow during steady state hypoxia, considering room air and different oxygen concentration breathings 01 p0014 A70-10360

Coronary arteries collateral circulation in man using angiographic technique 01 p0016 A70-10439

Prospective epidemiological recognition of clinical coronary heart disease, discussing effects of habitual physical inactivity, excessive dietary fat, socioeconomic stresses, etc 01 p0023 A70-10865

External environmental factors, life habits and personality structure effects on development of coronary artery disease, discussing psychosomatic aspects of myocardial infarction 01 p0023 A70-10866

Perfusion pressure and flow effects on coronary resistance, noting venous blood perfusion 01 p0026 A70-11075

Nervous stress effect on coronary thrombosis, deriving mathematical theory based on biophysical and biochemical approaches 01 p0028 A70-11369

Dogs coronary vasodilator responses to hypoxia and induced tachycardia before and after lidoflazine and adenosine 02 p0230 A70-11702

Heart rate change effect on myocardial oxygen consumption and nutritional circulation with constant coronary blood flow suggesting oxygen extraction independence of capillary surface 02 p0235 A70-11991

Readers interpretation and applications of Starr criteria for ULF ballistocardiograms, showing uniformity for patients with coronary heart disease 02 p0248 A70-12680

Arrhythmia resembling atrial flutter simulated in dogs by coronary sinus and left atrial pacing and in man by coronary sinus pacing 02 p0240 A70-12696

Dogs left ventricle areas supplied by coronary arterial branches visualized utilizing scintillation photography and radioactive Xe 03 p0432 A70-12892

Physicochemical properties of hypothalamic secretions responsible for coronary dilatation in rats, cattle and pigs, using analytical techniques 03 p0417 A70-13215

Sinocarotid pressor reflexes effects on coronary circulation in anesthetized dogs noting changes in blood pressure, peripheral resistance and cavity pressure 03 p0422 A70-13693

Coronary thromboses age estimation based on comparison of blood cells, fibrin, collagenous tissue and neocapillaries quantitative changes

03 p0426 A70-13938

Postmortem coronary angiographies showing role of arterial hypertension in coronary pathology

03 p0426 A70-13939

Cardiac output and coronary blood flow changes in patients at rest and during peak exertion, stating correlation coefficients

03 p0428 A70-14065

Primary and secondary pathological changes in small coronary arteries and role in acute myocardial infarction development, discussing coronary arteries distribution

04 p0635 A70-15457

Platelet function in coronary artery disease and myocardial infarction, considering thrombosis, atherosclerosis, emboli in microcirculation, etc

04 p0635 A70-15458

Clinicopathological studies of coronary artery occlusion and acute myocardial infarction, discussing coronary thrombosis

04 p0635 A70-15459

Coronary atheroma in hyperlipemic dog occurring in arterial tree at most intense physical stress exposure point, discussing interfacial tissue permeation

04 p0635 A70-15460

Acute coronary occlusion effects on adjacent unoccluded artery resistance, discussing responsible mechanisms in ischemic heart

04 p0637 A70-15473

Glucagon infusion effect on human coronary circulation, relating changes in cardiac dynamics to myocardial oxygen consumption and blood flow

05 p0800 A70-16101

Cardiac work limiting factors during exercise under hypoxia, studying cardiac output and coronary blood flow capacities

06 p0991 A70-17282

Biochemical disturbances during early myocardial ischemia, examining coronary sinus lactate and K levels using electrocardiographic correlation

06 p0997 A70-18406

Perfusion pressure effect on myocardial oxygen consumption and coronary flow in stable nonworking rat heart

07 p1202 A70-18865

Physical activity and epidemiology of coronary heart disease

07 p1212 A70-19694

Exercise influence on cardiac output and coronary blood flow during hypoxia, correlating CO and systolic pressure with blood flow changes

07 p1214 A70-19928

Cardiac output and coronary blood flow during steady state recumbent exercise, discussing CO and Rb 84 measurements in human subjects

08 p1453 A70-21936

Conscious dogs temporary local hypoxia effect on coronary blood flow regulation

09 p1623 A70-23585

Left ventricular volumes, pressure and heart rate in patients and dogs after diagnostic coronary arteriography

10 p1820 A70-24939

Aerobic metabolism of heart muscle cells and oxygen utilization of coronary artery blood

10 p1821 A70-25081

Arteriographic determination of severe coronary artery disease in presence of normal resting electrocardiogram

12 p2170 A70-27775

Human circadian coronary circulatory rhythms during space flight weightlessness or bedrest with and without exercise

16 p2854 A70-33991

Left ventricular surface electrocardiogram T-wave amplitude and circumflex coronary artery blood flow during headward acceleration in unanesthetized dogs, observing velocity decrease

21 p3764 A70-41481

Cinecoronary arteriographic investigation of chest pain patients, establishing correlations of clinical symptoms, coronary artery narrowing, arterial lesions, serum cholesterol levels, etc

23 p4145 A70-43948

CORONAS

NT ELECTRIC CORONA

NT SOLAR CORONA

Solar radio types I and III sources spatial distribution of circular polarization and coronal magnetic field configurations in active regions

12 p2294 A70-27710

Corona point discharge current magnitude in transonic wind tunnel, giving current characteristics at different wind speeds

12 p2264 A70-28001

Galactic radio corona existence, measuring northern galactic hemisphere sky brightness and cosmic ray distributions

18 p3322 A70-37129

Stellar coronas X ray fluxes from models of convection zones and corresponding mechanical energy fluxes

21 p3875 A70-40681

Radioheliograph observations of coronal broadening of Crab Nebula at 80 MHz, noting radial scattering and plasma irregularities

21 p3891 A70-41184

NT PRIMARY COSMIC RAYS

NT SOLAR CORPUSCULAR RADIATION

NT SOLAR COSMIC RAYS

NT SOLAR PROTONS

Corpuscular radiation contributions to D layer ionization determined from intensity measurements

01 p0172 A70-11490

Positive ion concentration profiles in lower nighttime midlatitude ionosphere calculated from corpuscular radiation measurements and ion recombination constants

04 p0738 A70-14436

Solar proton latitude profiles relation to outer radiation zone electron measurements by Alouette 2 satellite charged particle detectors during quiet magnetic conditions

04 p0740 A70-15105

Hysteresis effect on cosmic ray modulation and gradient ionization near solar minimum from measurements made near earth with OGO 1 and 3 ion chambers

04 p0740 A70-15106

Fragmentary arc and band-shaped polar aurora configurations associated with corpuscular rays penetration into upper atmosphere

04 p0684 A70-15749

Magnetic disturbances and corpuscular intrusions in auroral zone, discussing daytime and nighttime magnetic activity of electron fluxes

04 p0684 A70-15752

Neutron flux measurements on Cosmos 53, equipment and calculation of secondary neutrons due to bombardment of satellite components

05 p0905 A70-17112

Corpuscular radiation as F region ionization source, solving time dependent ionospheric continuity equation

06 p1054 A70-17588

Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line

06 p1135 A70-17894

Atmospheric ground pressure seasonal changes after corpuscular flux arrival shown for Northern Hemisphere

08 p1487 A70-20554

Initial deceleration of solar wind positive ions upstream of earth bow shock determined from OGO 5 high time resolution plasma measurements

08 p1562 A70-21377

Photoelectrons entry into F region detected at conjugate point during winter night by Thomson scatter observations of plasma lines appearing in signal spectrum

08 p1489 A70-21386

Corpuscular radiation intensity measurements in upper atmosphere at midlatitudes by meteorological probe during geomagnetic storm, noting radio wave absorption

11 p2106 A70-26797

Solar flares of 6 and 8 July 1968 correlation regarding electromagnetic radiation emission, radio flux, corpuscular radiation, etc

12 p2294 A70-27708

Solar activity effects on midlatitude upper atmosphere corpuscular radiation intensity via rocket sounding

12 p2296 A70-28266

Positive ion concentration profiles in lower nighttime midlatitude ionosphere calculated from corpuscular radiation measurements and ion recombination constants

13 p2475 A70-28461

Low energy protons penetration into magnetosphere between forbidden regions, using model of constant electric field with charge exchange as loss mechanism

13 p2477 A70-29183

Wave properties of nuclear optical model for barrier penetration by charged particles, considering square well reflection, absorption and resonance

14 p2619 A70-30491

Fragmentary arc and band-shaped polar aurora configurations associated with corpuscular rays penetration into upper atmosphere

14 p2576 A70-30833

Magnetic disturbances and corpuscular intrusions in auroral zone, discussing daytime and nighttime magnetic activity of electron fluxes

14 p2576 A70-30836

Atmospheric ground pressure seasonal changes after corpuscular flux arrival shown for Northern Hemisphere

15 p2732 A70-32709

Solar protons penetration into magnetosphere and magnetotail

18 p3306 A70-36004

Particle flux diagnostics of nonisothermal low pressure plasma, using corpuscular passive method

19 p3476 A70-37556

Space corpuscular radiation simulation to obtain data for increased spacecraft life

19 p3511 A70-38284

Anomalous angular distribution and inelastic cross section of muon-nucleon interaction for penetrating underground cosmic ray particles

22 p4095 A70-43232

CORRECTION

NT OPTICAL CORRECTION PROCEDURE

Secondary halo in spark source mass spectroscopy, determining corrections

02 p0298 A70-12211

Mangler displacement thickness correction for slender cones

08 p1590 A70-21320

Interval of values with stability and convergence for correctors for differential equations

09 p1641 A70-22286

Width corrections in calculation of stress intensity factor for sheet with central crack in uniform uniaxial tension

13 p2510 A70-28608

CORRELATION

NT CORRELATION DETECTION

NT CROSS CORRELATION

NT DATA CORRELATION

NT SIGNAL ANALYSIS

NT STATISTICAL CORRELATION

Spherical earth wind field correlation matrix, relating scalar fields to isotropic vector field

01 p0135 A70-10204

Four dimensional optimal interpolation for maximum wind velocity components, calculating spatiotemporal correlation functions

01 p0135 A70-10205

Pulse methods for measuring correlation function of incoherent scattered signal, calculating bit estimator errors for large and small SNR

01 p0045 A70-11088

Forward scattering by nonergodic system of identical particles, relating temporal correlation function of scattered radiation and intensity moments

02 p0255 A70-11919

Correlation function estimate of random process represented by sum of steady distributed and independent arbitrary processes

03 p0518 A70-13081

Correlation function for spatial distribution of galaxies determined as function of inverse distance between galaxies

04 p0744 A70-14470

Measurement method for second and third order photon intensity correlation functions, using optical field produced by gas laser operating near oscillation threshold

04 p0700 A70-14686

Correlation function procedure applied to quartz clock rate analysis, noting operating temperature control

04 p0693 A70-15487

Gigacycle correlator involving sampling oscilloscopes for real time display of correlation functions over adjustable time interval, discussing design and performance

05 p0847 A70-16066

Statistical description of geomagnetic field as random vector field, presenting correlation functions from empirical estimates from geomagnetic charts

05 p0842 A70-16748

Dispersion and correlation function for atmospheric transparency due to water vapor, from statistical model of absorption bands and effective mass

06 p1053 A70-17204

Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field

07 p1252 A70-18673

Positive and negative correlations in F 2 layer perturbations by network of paired conjugate ionospheric stations at low latitude

07 p1277 A70-20450

Time-frequency correlation function for fading communication channel between transmitter and receiver sites, using AM transmissions as probing signals

08 p1458 A70-20796

- Correlation functions of spatially inhomogeneous fluctuations in electron gas in strong electric field
08 p1552 A70-21423
- Correlation functions of fluctuations in electrical characteristics of nonequilibrium electron gas during scattering, determining spectral densities and populations by kinetic equation Green function
08 p1554 A70-21806
- Correlation functions for resistance to heat and momentum transfer in viscous sublayer at rough walls defined for varied geometry flows
[ASME PAPER 69-HT-2] 08 p1486 A70-21833
- Correlation function of oscillation modulated in amplitude, phase and frequency by random processes causing spectral density maximum shift away from carrier frequency
09 p1633 A70-22409
- Inertialless nonlinear quadrupole output of oscillations modulated by normal noise, analyzing correlation functions
09 p1637 A70-23159
- Plasma, Coulomb fields and radiation correlations obtained by relativistic kinetic equations, noting bremsstrahlung, synchrotron, cyclotron radiation, radiative and particle diffusion, etc
09 p1736 A70-23182
- Ferromagnetic crystal weakly coupled spin Green and correlation functions calculated for wide temperature range
09 p1740 A70-23193
- Random process noncommutative transformations and correlation functions in linear form of time functions
09 p1655 A70-23695
- Correlation functions of nonlinear auto-oscillatory system under nonstationary conditions determined by statistic linearization
11 p2022 A70-25341
- Time correlation telemetering systems design, describing structural scheme
11 p2004 A70-25929
- Homogeneous turbulence multipoint multimode correlations for fluctuating velocity
11 p2036 A70-26014
- Spatial correlation effect of unsteady sectional loads in axial direction on average or apparent loads over finite region of circular cylinder immersed in moving fluid
11 p2036 A70-26148
- Multipoint time correlations of longitudinal velocity fluctuations in grid-generated turbulence
11 p2039 A70-26532
- Neutral-dominated plasma turbulence, discussing space-time plasma probe correlation functions for electron density fluctuations measurements
11 p2095 A70-26757
- Turbulent flowing plasma, analyzing wavenumber frequency dependent spectral function and space-time correlation function
11 p2096 A70-26768
- Output correlation function of nonlinearity-filter system and phase modulated oscillations influence on system
13 p2366 A70-29411
- Interferometric measurement of spatial correlation function of optical radiation fields propagating through turbulent atmosphere
13 p2454 A70-29825
- Laser beams intensity fluctuations dispersions and correlation functions at various distances
14 p2593 A70-30172
- Correlation characteristics of turbulent motions in atmospheric meteor region, discussing diversity and single point reception methods
14 p2572 A70-30329
- BBGKY hierarchy pair correlation function for magnetoplasma under weak external force, using operator method and time periodic ansatz for distribution functions
14 p2623 A70-30697
- Many body correlation and conditional probability functions of plasma shield clouds surrounding test particles
14 p2623 A70-31034
- Turbulent boundary layer correlations on flat plate, noting inadequate Spalding-Chi predictions
14 p2567 A70-31396
- Correlation function of velocity fields in two dimensional turbulence determined from hydrodynamic equation assuming normally distributed stream function field
15 p2718 A70-31465
- Homogeneous isotropic turbulence velocity field space-time variable correlation functions in fluid flow
15 p2719 A70-31487
- Centrifugal pump performance correlation parameter under cavitation conditions for handling different liquids based on bubble growth theory
15 p2720 A70-32098
- Materials real time strain measurements by optical correlation techniques, noting sensitivity
16 p2913 A70-33980
- Correlation functions of weak quasi-steady plasma turbulence determined by plasmon interactions, using computerized integral equation
17 p3139 A70-34643
- Ionospheric E region winds correlations to lower atmosphere meteorological phenomena
17 p3077 A70-34950
- High intensity noise enveloping space vehicle as distributed excitation, examining correlation effects on structural response
17 p3059 A70-35170
- Wave propagation measurement by correlation techniques, discussing travelling wave representation, delay times, amplitude coefficients, etc
17 p3091 A70-35449
- Time correlation functions approach to calculation of properties of nonequilibrium ensembles in fluid molecular motions
17 p3197 A70-35535
- Solar radio emission slowly varying component, analyzing random aspects, correlation functions and relationship to spot groups
19 p3521 A70-38552
- Correlation spectrometry for earth resources, considering sulfur dioxide, nitrogen oxide and iodine pollution
20 p3626 A70-39055
- CW second harmonic He-Ne laser light second order intensity correlation function measurements
20 p3640 A70-39153
- Kinetic equations derivation for correlation functions and time dependent distribution functions of irreversible processes, using projection operators
20 p3672 A70-39588
- Pair correlations effect in equilibrium and nonequilibrium theory, taking Coulomb collisions into account for ionized plasmas confined to half space by reflecting boundary
20 p3679 A70-39662
- Simulated neutral atmospheric boundary layer measurements in wind tunnel, extending power spectral and correlation determinations
20 p3613 A70-40139
- Multichannel correlation filter devices for processing periodic fluctuating signals in noise background
22 p3987 A70-42557
- Laser light scattering in plasma for charged particle correlation function
23 p4225 A70-44187
- CORRELATION COEFFICIENTS**
Ionization variations and correlation coefficients of F 2 critical frequency variations, using airborne ionospheric sounder over Sogra and Kerguelen Island conjugate areas
01 p0080 A70-11224
- Transverse and longitudinal correlation coefficients of electron density fluctuations in turbulent jet related through equation specifying velocity fluctuations isotropy
04 p0674 A70-15551
- Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift
05 p0841 A70-16729
- Random processes correlation coefficients and functions measured by quasi-compensator with potentiometer and digital/analog readout
12 p2235 A70-27770
- Mutual correlation coefficients for signal level changes during short wave space diversity reception and radio wave propagation over two midlatitude paths
14 p2546 A70-30145
- Erroneous height correlation coefficients in physical optics formulation of rough surface scatter
16 p2859 A70-32938
- Correlation distance of VHF fading from irregularities in equatorial ionosphere, using NASA STADAN in Chile
20 p3590 A70-40487
- Flow structure in plane submerged turbulent jet, determining velocity, friction stress and correlation coefficients distributions
21 p3749 A70-42221
- CORRELATION DETECTION**
High and medium whistler activity in Italy correlated with weather situation in South Africa
05 p0839 A70-16317
- Signal detection in correlated noise with two stage prewhitening and matched filter system
10 p1833 A70-24220
- FM demodulation threshold extension by correlation detection implemented in impulse noise cancellation system
19 p3382 A70-38893
- Synthetic aperture radar receivers, discussing cross-product term suppression in correlation detection for image distortion reduction
20 p3585 A70-39392
- Optico-acoustic autocorrelator for linear FM signals spatial compression, discussing design and performance
22 p3984 A70-42398
- Correlation detection methods providing information for ILS in terminal area congestion, discussing role in aircrew-ATC cooperation
22 p4068 A70-42667
- CORRELATION FUNCTIONS**
U CORRELATION
CORRELATORS
Gigacycle correlator involving sampling oscilloscopes for real time display of correlation functions over adjustable time interval, discussing design and performance
05 p0847 A70-16066
- Multichannel correlator for turbulent signal processing in real time scale using natural delay
07 p1284 A70-19832
- FM feedback demodulator performance model using mixer-correlator, showing cross correlation receiver design
08 p1479 A70-20810
- Microwave L-band correlator using YIG delay lines varied by electronically changing magnetic bias
20 p3597 A70-39468
- Electronic correlation signal analysis for localizing noise sources, detecting signals against background noise
20 p3601 A70-39650
- Statistical information processing equipment, describing correlators and digital coding devices design for graphic form information transformation into binary code
20 p3594 A70-39919
- Digital correlator errors due to quantization by levels, designing analyzer of slow processes
20 p3594 A70-39922
- Optico-acoustic autocorrelator for linear FM signals spatial compression, discussing design and performance
22 p3984 A70-42398
- Estimation errors of multilevel modified digital correlator using auxiliary random noise for unbiased output
24 p4312 A70-46054

NT STRESS CORROSION
Soviet collection of papers on metal science and corrosion problems covering welding, heat treatment, Cr-Mn steel, Ti alloys, etc
03 p0509 A70-13276
- Corrosion problems in Ti and alloys chemical and aerospace applications, describing thermodynamics and electrochemistry in aqueous media
04 p0710 A70-15677
- Contamination sources covering ball bearing contamination, relay contact failure, instrument window internal fogging, electronic circuit corrosion and air conditioning problems
05 p0809 A70-16712
- Metallic materials homogeneous and nonhomogeneous corrosion kinetics based on superposition principle of independent partial electrode reactions
09 p1707 A70-23422
- Metal corrosion product dissolution in reactor cooling deionized water, investigating Cu, W and Cd using chemical analyses
10 p1904 A70-24398
- Corrosive wear due to oxygen and/or moisture in air indicated as major failure mode in lubricated gears
10 p1895 A70-24852
- Corrosion by liquid metals - AIME Conference, Philadelphia, October 1969
16 p2932 A70-34201
- Metal corrosion effects in Rankine cycle lithium-boiling potassium test loop simulating working fluids of spacecraft nuclear turbopump propulsion system
16 p2933 A70-34204
- Corrosion failures diagnosis, describing visual, electron microscope, metallographic and chemical analysis techniques
20 p3650 A70-39968
- Surface degradation by oxidation, temperature fluctuations and hot corrosion of Ni- and Co-base superalloys in gas turbine engines
22 p4057 A70-43574
- 18-8 stainless steels pitting corrosion, examining grain boundaries influence
24 p4362 A70-46184
- CORROSION PREVENTION**
Corrosion induced fatigue damage suppression in jet engine compressor steel components, describing various surface treatment effects
01 p0165 A70-10699
- Concorde aircraft main landing gear reliability, discussing design, corrosion, hydraulic contamination, metallurgy, sealing and tests
02 p0226 A70-12366
- Emulsified jet fuels combustion characteristics evaluation by laboratory technique, presenting data on emulsifiers and corrosion inhibitors effect
[ASME PAPER 69-WA/GT-2] 04 p0785 A70-14893

Laboratory tests on jet fuels indicating lubricity improvement by corrosion inhibitor addition
[SAE PAPER 690667] 05 p0894 A70-15836

Heat resistant silicate enamel coatings to protect steels and alloys against high temperature gas corrosion, studying properties by various methods
05 p0872 A70-16600

Inhibitive elastomeric sealing compounds and coating systems preventing aluminum alloy corrosion in aircraft
13 p2433 A70-28778

Corrosion resistant paint systems for aircraft structural parts under severe environmental conditions simulated in carrier test stand
14 p2598 A70-31292

Chemical and electrochemical corrosion resisting primers for Mg surface coatings in machine parts
14 p2598 A70-31293

Spilled Hg removal from metal surfaces, describing brush technique based on capillary action
15 p2748 A70-32775

CORROSION RESISTANCE

NT OXIDATION RESISTANCE

Hot corrosion reactions in Ni, Co and NiAl-base alloys exposed to salt-sulfur containing simulated gas turbine combustion atmospheres
01 p0118 A70-10728

Low alloy and stainless steels durability in various natural atmospheres, discussing corrosivity dependence on atmosphere pollutants, temperature and humidity
02 p0318 A70-12476

Ti, Zr and Nb characteristics, properties, processing procedures and applications in corrosive environments, nuclear reactors and aerospace structures
02 p0319 A70-12710

Austenitic stainless steels intergranular corrosion model proposed and supported by observations of structural changes and corrosion behavior, suggesting methods to reduce susceptibility
03 p0506 A70-13130

Surface treatment effects on stainless steels corrosion resistance, relating resistance changes to surface composition, integrity, stability and roughness
03 p0507 A70-13136

Corrosion resistance of Ti-based alloys in humid subtropical climate, discussing sea and rain water effects
03 p0510 A70-13281

Phase structure and corrosion resistance of alloys in Ti-V-Cr system, discussing effects in HCl, sulfuric acid, nitric acid, acetic acid and NaCl solution
03 p0510 A70-13282

Graphite foam reinforced by carburized high polymers used for fabricating highly porous heat and corrosion resistant material
[DGLR-69-57] 04 p0712 A70-15178

Silicon effect on stress corrosion resistance of low alloy high strength steels in NaCl solution for different tensile strength ranges
04 p0707 A70-15272

Welding atmosphere purity effects on Li corrosion resistance of refractory metals in space power systems
04 p0709 A70-15627

Maraging steels microstructure and ductility influence on stress corrosion resistance in magnesium chloride salt chamber
04 p0711 A70-15681

Oxidation, hot corrosion resistance and mechanical properties of aluminide coated superalloys, discussing failure analysis instruments and methods
07 p1305 A70-18969

Stress and intercrystalline corrosion causes and sensitivity in supersaturated Al alloys
07 p1307 A70-19391

Maraging steels stress corrosion sensitivity in marine environment tested in humid atmosphere, salt fog, natural seawater and salt solutions
07 p1310 A70-19749

Performance characteristics of low density epoxy-water emulsion corrosion resistant coating for nonferrous alloys
08 p1526 A70-20648

Al-Mg alloys mechanical properties and corrosion resistance during aging, noting Zr and Mo additives effects
08 p1517 A70-21129

Strength, corrosion resistance and fabricating qualities future improvements in metals and alloys, discussing chemical composition approach, dispersion hardening, superplasticity, etc
08 p1518 A70-21267

Carburization resistance of refractory steels, emphasizing chemical composition effect on corrosion rate
08 p1519 A70-21434

High temperature thermomechanical treatment effects on stainless steels and Ti alloys microheterogeneity, noting corrosion resistance improvement
08 p1519 A70-21444

Co-based alloy mechanical properties and physical parameters at high temperatures, discussing oxidation and hot corrosion resistance
09 p1700 A70-22025

Materials static tested for compatibility with pure and moisture contaminated chlorine pentafluoride at 160 F and ambient temperatures
09 p1742 A70-23250

Corrosion resistance of molybdenum coatings on steel and Pb-Bi eutectic alloy obtained by vacuum contact fusion method
12 p2258 A70-28320

Ti-6Al-4V dissolution in HCl-methanol, investigating corrosion rate
13 p2433 A70-28779

Li and Cr additives effects on Al-Zn-Mg stress corrosion resistance, considering cracking, precipitation hardening and intercrystalline corrosion
13 p2433 A70-28844

Diffuse coatings effect on strength characteristics and corrosion resistance of steels, analyzing structure, thickness and purity of surface layers
13 p2433 A70-28888

Al-Mg, Al-Zn-Mg, Al-Cu and Al-Cu-Mg welded alloy corrosion cracking resistance as function of composition and fabrication techniques
14 p2597 A70-30972

Alloys resistance against erosion-corrosion attack via abrasive slurries in corrosive media in pulp and paper industry
15 p2763 A70-32774

Ti-Mo cermet alloys properties and production technology, testing corrosion resistance
16 p2931 A70-33220

Solvents and chemicals resistant thermosetting resin producing high strength glass reinforced laminates based on polyanhydride crosslinked with monoepoxide
16 p2938 A70-33382

Ta oxygen concentration effects on corrosion resistance to NaK in SNAP 8 boilers
16 p2932 A70-34202

Refractory alloys Li corrosion resistance, examining effects of oxygen contamination during welding
16 p2924 A70-34205

Molten contaminated Li effects on microstructure, tensile strength and stress corrosion of stainless steels and refractory metals
16 p2933 A70-34206

Ti equipment anodizing methods, observing corrosion resistance reduction and embrittlement hydriding due to Fe contamination
17 p3098 A70-34363

Ti corrosion resistance tests in active and passive states
17 p3113 A70-34367

Neutron irradiation effects on stress corrosion susceptibility of Al alloy
17 p3124 A70-34822

Corrosion and mechanical properties of Cr-Ni-Mn-N austenitic stainless steels
17 p3125 A70-35144

Two-component metal coatings on Ni alloys for gaseous corrosion resistance increase, comparing microstructure and properties
17 p3125 A70-35393

Ni alloys with protective coatings for gas turbine blades, testing corrosion resistance in diesel fuel combustion products with intermittent salt water sprays
17 p3125 A70-35394

Aluminum alloy corrosion stimulation and inhibition effects of cathodic polarization
20 p3647 A70-39244

Alloys for aircraft structures design, considering materials strength, corrosion resistance, producibility and cost
20 p3648 A70-39414

Stainless maraging steel bolts tensile, shear and fatigue strengths and stress corrosion resistance at room and high temperatures
20 p3650 A70-39964

Zr-Cu alloys corrosion resistance in carbon dioxide at high temperatures, noting composition effect on behavior
23 p4208 A70-44875

Electrochemical corrosion of metals, discussing passivity and passivating techniques, inhibitors and resistant alloys
24 p4361 A70-46142

Alloying elements effects on corrosion resistance of Mg ingot in NaCl aqueous solution
24 p4363 A70-46198

CORROSION TESTS

NT SALT SPRAY TESTS

Loading frequency effects on Duralumin endurance limit in air and in water, noting stress level role
01 p0115 A70-10070

Austenitic stainless steels intergranular corrosion model proposed and supported by observations of structural changes and corrosion behavior, suggesting methods to reduce susceptibility
03 p0506 A70-13130

Intergranular corrosion mechanisms in ferritic stainless steels observed by electronmicroscopic examination on Cr-Fe-base alloys vacuum-melt with C and N
03 p0506 A70-13131

Al-Zn-Mg-Cu alloy corrosion cracking, studying effects of heat treatment, strain percent, blank parameters and grain size
03 p0512 A70-13734

Stainless steel stress corrosion cracking test in magnesium chloride solution, emphasizing crack crystallographic orientation observation
03 p0513 A70-14299

Emulsified jet fuels cold flow, combustion and corrosion characteristics in gas turbine combustor compared with JP-4 fuel
[ASME PAPER 69-WA/GT-3] 04 p0732 A70-14892

Stress corrosion testing method to separate corrosion and stress effects applied to Al and Ti alloys
04 p0708 A70-15374

Threshold oxygen concentration for corrosion determined for Ta specimens subjected to low pressure contamination in NaK
04 p0709 A70-15628

Co and Fe base alloys corrosion in Hg tested in reflux capsules and forced flow loops
04 p0710 A70-15631

Refluxing capsule tests of refractory metal alloys-boiling alkali metals corrosion compatibility, noting role of capsule geometry
06 p1087 A70-17510

Rankine cycle two loop Li boiling Ka facility for nuclear turbopump simulation, studying alkali metal corrosion for operation with and without hot traps
[AIME PAPER F-69-1] 07 p1304 A70-18809

Heat pipe structural alloys compatibility with different working fluids using capsule tests at high temperatures, noting corrosion behavior
[AIME PAPER F-69-2] 07 p1304 A70-18812

Microbiological corrosion effects on aluminum alloy fatigue properties inducing further microbiological corrosion compared to chemical corrosion effects
07 p1310 A70-19735

Maraging steels stress corrosion sensitivity in marine environment tested in humid atmosphere, salt fog, natural seawater and salt solutions
07 p1310 A70-19749

Duraluminum sheets fatigue life and corrosion fatigue strength decrease with corrosion damage area increase
08 p1515 A70-20921

Corrosion shapes from iodine action on metals in methylic medium, discussing morphology dependence on purity, surface state and reaction products diffusion velocity
08 p1518 A70-21241

Zr and stainless steel pitting in acidic and near neutral chloride media, comparing controlled potential and conventional chemical corrosion tests results
09 p1706 A70-22939

Stainless steel corrosion rates in flowing liquid Na from mechanism based on thermodynamic partitioning of oxygen
09 p1706 A70-22942

Ni-Cr superalloys hot corrosion, studying sulfidation-oxidation in various synthetic controlled gas mixtures
09 p1706 A70-22944

Metals, alloys and galvanic couples corrosion rates in synthetic seawater measured by polarization technique
10 p1887 A70-24044

Filament-reinforced metallic composites corrosion control by specificity of environment and galvanic interactions between components
10 p1904 A70-24651

Mechanical notches and saltwater corrosion effects on flexural fatigue behavior of high strength structural alloys, investigating yield strength to density ratio
11 p2066 A70-26097

Martensitic stainless steels corrosion damage in jet engine compressors noting effects of temperature, surface condition, time and chloride presence
12 p2252 A70-26963

Commercial Co base superalloys oxidation and hot corrosion resistance under controlled environments, examining role of various alloying elements
[ASME PAPER D-8-21-5] 12 p2256 A70-27974

Ti-6Al-4V dissolution in HCl-methanol, investigating corrosion rate
13 p2433 A70-28779

Ni-based heat resisting alloy Inconel 700/ investigated for hot corrosive environment effect on stress rupture and fatigue strengths
13 p2434 A70-29157

NDT for structural corrosion evaluation, including ultrasonics, X rays, penetrating liquids and induced currents
16 p2929 A70-32924

Convective diffusion and liquid velocity in Co and Fe based alloys corrosion in Hg at high temperature, using reflux capsules and forced flow loops
16 p2933 A70-34207

Liquid metal corrosion of heat pipe refractory alloys at high temperatures, noting oxygen role
16 p2933 A70-34208

Iron, Ni, Cr and Co corrosion and mass transfer in high temperature Na, examining properties of stainless steels and cobalt base alloys
16 p2933 A70-34209

Ti corrosion resistance tests in active and passive states
17 p3113 A70-34367

Ti alloys crack initiation and propagation during hot salt stress corrosion 17 p3114 A70-34375

High strength ferrous alloys susceptibility to stress corrosion in seawater environment, tension loading single edge notched and fatigue cracked specimens in NaCl solution 17 p3123 A70-34554

Hot corrosive environment effect on stress rupture and fatigue strength of Ni heat resistant alloy used in gas turbine rotating blade 20 p3647 A70-39241

High temperature Ni, Co and Fe alloys for gas turbines, examining sulfidation-oxidation corrosion test methods 20 p3651 A70-39971

Atmospheric environment effect on residual shear stress corrosion cracking of commercial Al-Zn-Mg alloys subjected to heat treatment regimes 22 p4052 A70-42307

Nb-Zr alloy and yttria corrosion by high velocity Li flow, discussing material removal depth 22 p4055 A70-43100

Metallization systems materials for IC, discussing environmental stability, metals electromigration, electrochemical corrosion tests, etc 23 p4173 A70-44533

Instantaneous corrosion rate measurement, comparing coupon, resistance and polarization methods 24 p4365 A70-46390

CORRUGATED PLATES

Corrugated plates, closed cylinders and developable shells nonlinear elastic analysis, deriving boundary conditions 23 p4275 A70-44913

CORRUGATED SHELLS

Stress distribution in spirally corrugated shell under torsional deformation, calculating twisting moment for stiffness 14 p2661 A70-31327

CORRUGATING

Spherical hybrid modes in corrugated antenna conical horns, obtaining radiation pattern and gain with small flare angle 07 p1243 A70-20284

Corrugated waveguide structures for aperture type feeds for spherical and paraboloidal reflector antennas, discussing experiments on 2-hybrid mode horn 11 p2018 A70-26024

Propagation in corrugated waveguides with surface permitting H-wall boundary condition for choice gap and fin dimensions 14 p2550 A70-30519

Attenuation characteristics for dominant hybrid mode in corrugated circular waveguide for antenna feed 16 p2879 A70-34041

Milky way galactic plane corrugation, discussing maximum hydrogen brightness temperature oscillating in sinusoidal pattern 18 p3328 A70-37167

CORTI ORGAN

Sonic boom effects on guinea pigs Corti organ, comparing auditory damage in cochlea with hair cell damage 24 p4305 A70-46374

CORTICOSTEROIDS

NT ALDOSTERONE

NT CORTISONE

Pituitary hormone ACTH stimulatory effect on steroid hormone cortisol secretion by canine adrenal cortex, constructing seventh order state variable model 10 p1819 A70-24868

Mathematical model for rats nonlinear time-varying glucocorticoid secretion control mechanism, obtaining time dependent characteristics of hypothalamic-hypophyseal complex 12 p2174 A70-26893

Circannual rhythm in levels, amplitudes and acrophases of serum corticosterone in mice compared with phase shift after change of lighting regime 14 p2537 A70-30725

Human mental stress evaluation through chemical analysis of 17-hydrocorticosteroid level in parotid fluid 24 p4308 A70-45509

Desoxycorticosterone action on human kidneys and sweat glands as function of temperature tested with various DOCA and NaCl doses 24 p4301 A70-45988

CORTISONE

Nine-alpha-fluorohydrocortisone preventing bedrest induced orthostatism, considering plasma volume decrease effects on cardiovascular performance 13 p2358 A70-29433

Infused cortisol disappearance rates and distribution volumes in hyper-, hypo- and normocalcemic dogs 24 p4296 A70-45334

CORUNDUM

U ALUMINUM OXIDES

COSINE

U TRIGONOMETRIC FUNCTIONS

COSMIC DUST

NT INTERPLANETARY DUST

NT METEOROID DUST CLOUDS

NT ZODIACAL DUST

IR emission from planetary nebulae, W-R, Of and symbiotic stars, discussing dust hypothesis for IR excess 01 p0173 A70-10039

Cosmic dust particle direction, velocity and mass from ionization and momentum measurements by dust sensor during impact on Pioneer 8 satellite 01 p0088 A70-10748

Diffuse far UV radiation analysis in connection with stars and dust grains distribution and grains optical properties 05 p0903 A70-16571

Cepheus light attenuation curve explained by applying polymodal particle size distribution, obtaining interstellar dust density 05 p0918 A70-16915

Unusual IR object IRC plus 10216 interpreted as galactic source surrounded by optically thick dust shells, noting resemblance to black body energy distribution 05 p0920 A70-16976

Dynamic effect of radiation from massive protostar showing formation of transparent zone free of dust about star and gas density decrease until pressure equalization 06 p1148 A70-18400

Milky way and interstellar clouds brightness fluctuations statistical analysis by surface photometry, studying dust distribution, cloud absorption and dimensions, star distribution, etc 06 p1149 A70-18463

Dust growth, density distribution and collisions in interior of cometary head atmosphere, considering gravitational attraction to nucleus 07 p1379 A70-19039

Optical to IR conversion in circumstellar dust envelope with spherical symmetry based on optical radiation scattering and absorption by dust 08 p1573 A70-21047

Far IR radiation at galactic center suggested as thermal emission by dust particles 09 p1744 A70-22502

Photoelectric measurements of dust and CN/C2 molecular emission in atmosphere of Comet Ikeya-Seki 09 p1761 A70-23058

Interstellar dust, discussing effective particle size, composition, formation and effects on astronomical observations 09 p1763 A70-23374

X ray scattering from pulsar NP 0532 by interstellar grains 09 p1748 A70-23791

Upper atmosphere aerosols and cosmic dust properties investigation by laser beam scattering measurements using photoelectron counters for weak signal detection 10 p1898 A70-23818

Jupiter atmospheric composition, gas and dust cloud formation as clues to origin and evolution of solar system 11 p2108 A70-25654

Singular and nonsingular cosmological models validity for general relativity allowing for cosmic dust 12 p2300 A70-27394

Cold variable stars intrinsic polarization model proposing light scattering in circumstellar dust shells 12 p2307 A70-27865

Book on interstellar medium covering gas dynamics, dust, magnetic fields and nonthermal radio emission, cosmic ray diffusion in galaxy, gravitational instability theory, etc 13 p2490 A70-28996

Stellar light pressure and gravitational force ratios for spherical water, quartz and graphite particles in interstellar space, considering refractive dependence on wavelength 13 p2493 A70-29396

Radar meteor shower rate observation compared with direct cosmic dust measurements on satellites 15 p2798 A70-31682

Cosmic microwaves anomalous absorption by interstellar IR-pumped formaldehyde in dust clouds shock heated layer 17 p3154 A70-34535

Dielectric models of interstellar grains from calculations for smooth particles of homogeneous materials 17 p3159 A70-34879

Hypersonic flow containing dust, investigating for cosmic dust collection and analysis, discussing conditions for collected particle size distribution correspondence to original distribution 17 p3012 A70-35921

Interstellar cloud collisions, examining gas and dust particles separation by size 18 p3313 A70-36323

Zero moments surface in problem of two immovable centers, taking into account cosmic dust accumulation before binary apex moving forward with periastron of bright component 18 p3324 A70-37147

Interstellar dust spatial distribution, indicating galactic spiral structure 18 p3329 A70-37183

Carina spiral feature progress report covering O and B star distribution, optical and radio H 2 and H I sources and cosmic dust 18 p3330 A70-37185

Triple polarization astrophotograph observations of comet 1968 c Honda, noting dust component- Wolf number agreement 19 p3515 A70-37658

Porous matrix explosions during sublimation of dusty ice with nonvolatile particles 19 p3471 A70-37659

Radio wave emission from dust in H II region by dielectric grain photoelectric charging, rotation through stellar photons and rotating dipoles 19 p3518 A70-38024

Cosmic soft X rays scattering by interstellar dust grains, observing source angular size dependence on distance, wavelength and grain properties 20 p3695 A70-39233

Cold neutral atomic hydrogen in Taurus dust clouds from 21 cm line dips in radiotelescope observations 21 p3887 A70-41108

Interstellar spherical dust particles from meteoritic silicates and dirty ice, calculating optical properties and scattering functions 21 p3889 A70-41147

Reflection nebulae dust density, noting lower limit dependence on absolute magnitude of illuminating star 21 p3889 A70-41149

Ic class variables long wavelength anomalous radiation, discussing emission from circumstellar dust shell 22 p4094 A70-42934

Narrow band IR photometry of star alpha Orion, testing hypothetical correlation of emission peak with starlight-reflecting silicate dust 22 p4105 A70-43229

Circumstellar dust cloud model of spectral distribution and anomalous excess emissions in IR T Tauri and red giant stars coincident with photometric measurements 23 p4239 A70-43668

High altitude cosmic dust observations with microphone impact detector onboard L-3H-6 sounding rocket 23 p4257 A70-45049

Crab Nebula X ray pulsation identified with pulsar NP 0532 by rocket measurements, noting implications for interstellar dust density 24 p4401 A70-45371

Interstellar dust clouds, discussing graphite, iron and silicate mixture, solid carbon material, starlight extinction and astrophysical processes 24 p4403 A70-45408

COSMIC GASES

NT INTERPLANETARY GAS

NT INTERSTELLAR GAS

Cosmic ray galactic effects, discussing galactic magnetic field, hydromagnetic wave propagation, etc 02 p0361 A70-11749

Stellar clusters equilibrium state in gravitational field, discussing dispersed clusters formation by gravitational instability in gas containing stars of various ages 02 p0376 A70-12446

Light emission from collapsing nonrotating gas in general relativity, noting restrictions on range and frequency shift 04 p0719 A70-14702

Neutral atomic hydrogen in Virgo A cluster and between Galaxy and Virgo A, using emission and absorption measurements 04 p0758 A70-15707

Noncircular ionized gas motions in NGC 253 central region observed in velocity field analysis, indicating outflow from center 10 p1946 A70-24979

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena 15 p2801 A70-32479

Uniform model universes containing gaseous matter and background blackbody radiation, solving Einstein equations without zero pressure assumption 18 p3313 A70-36215

H 2 regions in Sc galaxies NGC 628, 4254 and 5194 18 p3327 A70-37159

Galactic spiral structure from optical radial velocities of H II regions 18 p3329 A70-37179

Disk shaped galaxy stationary spiral shock pattern, examining gas cloud gravitational collapse for star formation 18 p3331 A70-37198

Sbc galaxy NGC 7320 radio emission and neutral H observations, showing improbability of physical association with Stephan Quintet by distance measurement 19 p3524 A70-38699

Stellar interiors and cosmic He abundance observations, discussing B stars, sun galactic and globular clusters, planetary nebulae, interstellar medium, novae, etc 20 p3706 A70-39931

High velocity intergalactic hydrogen origin, examining galactic evolution by gas infall

21 p3887 A70-41112

Matter and heat balance of cosmic grains surrounded by plasma and neutral gas under radiation

22 p4097 A70-42473

Atomic and molecular spin in cosmic medium

22 p4107 A70-43460

Solar motion apex for neutral hydrogen concentrations at different velocities, suggesting relationship to galaxy

23 p4239 A70-43815

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena

23 p4240 A70-43904

Neutral hydrogen 21 cm line profiles in galactic plane, tabulating terminal positive velocity and brightness temperatures

24 p4414 A70-46381

COSMIC NOISE

Sudden cosmic noise absorption /SCNA/ in polar cap during 7 July 1966 solar proton flare, estimating SCNA latitudinal distribution and protons magnetic cut-off boundary

01 p0172 A70-11527

Spatial and temporal relations between auroral emission at green line 5577 and cosmic noise absorption studied to determine energy spectra and particles distribution

05 p0907 A70-16281

Lunar surface reflectivity determined by measuring reflected cosmic noise, determining dielectric constant and surface material properties

06 p1151 A70-18488

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

07 p1367 A70-19456

Simultaneous riometer and ionosonde measurements at high latitude suggesting absorption events due to cosmic noise scattering by auroral sporadic E

07 p1271 A70-20165

Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles

11 p2043 A70-25536

Cosmic background radiation interactions with matter, discussing molecular excitation and black body radiation interpretation

12 p2291 A70-27054

Galactic noise and solar type 3 bursts using Alouette 2 satellite HF receiver voltage recordings

12 p2226 A70-28065

Galactic noise spectrum and solar radio bursts in hecto-decametric wave region observed by Alouette 2 satellite

13 p2491 A70-29093

Auroral cosmic noise absorption, discussing east-west motion, conjugate magnitudes and breakdown

16 p2899 A70-34191

Ionospheric cosmic noise absorption diurnal and seasonal variations at Alma-Ata during IQSY, noting chromospheric flares effects

18 p3306 A70-36089

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

18 p3309 A70-36930

Ionospheric absorption of cosmic noise recorded by riometer and corner reflector antenna directed at pole star, noting seasonal variation

19 p3412 A70-37997

Cosmic noise absorption diurnal variations at auroral zone conjugate areas during geomagnetically disturbed periods

19 p3414 A70-38379

Ionospheric magnetic activity effects on cosmic radio noise absorption diurnal and seasonal variations in auroral zone, noting K index and lowest reflection frequency roles

21 p3819 A70-41286

COSMIC PLASMA

Interplanetary plasma flow simulation around earth magnetosphere and planets not considering initial conditions influence

01 p0172 A70-11488

Hydrogen molecule formation relation to galaxy formation, discussing cosmic plasma neutralization role

03 p0577 A70-14152

Low altitude electric and magnetic measurements of plasma waves in space from OV3-3, Pioneer 8 andOGO 5 satellite observations

06 p1118 A70-17376

Magnetic field and plasma variations in lunar wake using Maxwell equations

06 p1153 A70-18636

VHF propagation variations relationship to changes in interplanetary plasma associated with interplanetary space sectorial structure rotation

07 p1226 A70-18757

Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role

07 p1266 A70-19435

Spatial and temporal cosmic plasma variations over various energy and wavelength ranges using cosmophysical and aeronomical facility

07 p1372 A70-20339

Proton concentrations, magnetic field strength and temperatures distribution in interplanetary plasma flows as function of latitudinal distance from center of active region

07 p1391 A70-20420

Stellar gas ejection processes in corona-interplanetary plasma system, proposing hydrodynamic model with frequent collision region having finite radius

08 p1573 A70-21060

Solar corona and interplanetary plasma structure and dynamics, calculating solar wind velocity as function of distance from sun

08 p1576 A70-21397

Cosmic rays diffusion through interstellar plasma noting microstabilities role

10 p1931 A70-23972

Plasma experiments in space including electric fields measurement, collisionless plasma studies and artificial Ba cloud generation

12 p2214 A70-26868

Radiation emission and transfer in unsteady outer space plasmas, discussing turbulence mechanisms involving electron and ion motion, relativistic and non-relativistic electron beams, etc

12 p2305 A70-27854

Book on space physics covering charged particles in magnetic, electric and dipole fields, cosmic rays, magnetically trapped radiation and interplanetary plasma

14 p2633 A70-30099

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

14 p2630 A70-30220

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena

15 p2801 A70-32479

Laboratory experiments applicability to interplanetary plasma physics, describing simulations of solar wind interactions, magnetosphere, collisionless shock waves, etc

17 p3164 A70-35123

Charged particle replacement by external plasma particles in ionized inhomogeneities moving in ionosphere, considering magnetic field role

18 p3249 A70-36909

VHF propagation variations relationship to changes in interplanetary plasma associated with interplanetary space sectorial structure rotation

18 p3229 A70-37101

Interplanetary plasma torque due to temperature and pressure anisotropy, considering solar wind angular velocity and sun angular momentum

20 p3712 A70-40423

X ray emission of hot dense intergalactic plasma, discussing evolution equation for temperature and degree of gas ionization vs red shift

21 p3877 A70-40702

Matter and heat balance of cosmic grains surrounded by plasma and neutral gas under radiation

22 p4097 A70-42473

Electric propulsion plasma thrust beam and ambient space plasma electrostatic equilibration, considering various charged particle parameters involved in bi-plasma system interactions

22 p4091 A70-42974

Interplanetary magnetic field and plasma structure observed with Mariners magnetometer, noting 27-day deviations from Parker spiral model

23 p4239 A70-43827

Intergalactic gas condensation rates in galactic nuclei, considering recurrent magnetoplasma cores and quasar-like phenomena

23 p4240 A70-43904

Interplanetary plasma electron density inhomogeneities formation explained by instability due to electron stream curvilinearity obtained from spacecraft data

23 p4240 A70-44070

Charged particle acceleration in outer space plasma, deriving ion-acoustic instability equations

24 p4399 A70-46295

COSMIC RADIATION

U COSMIC RAYS

COSMIC RADIO WAVES

U EXTRATERRESTRIAL RADIO WAVES

COSMIC RAY ALBEDO

Balloon-borne experiments with directional scintillators to measure low energy gamma radiation spectrum in midlatitude atmosphere for photons origin and gamma albedos investigation

03 p0561 A70-13996

Proton injection into radiation belt, comparing solar neutron decay /SND/ and cosmic ray albedo neutron decay /CRAND/ as proton sources

09 p1746 A70-23489

Proton distribution in radiation belt inner zone from radial diffusion addition to cosmic ray produced albedo-neutron decay and atmospheric collision loss

17 p3150 A70-34644

Earth atmosphere cosmic ray neutron albedo from balloon measurement of flux vertical distribution

20 p3698 A70-39298

Cosmic ray albedo neutron flux latitude and altitude dependence, using OGO-6 polar orbiting satellite

20 p3698 A70-39326

COSMIC RAY SHOWERS

Geomagnetic field influence on extensive air shower radio emission, discussing frequency dependency and signal polarization

01 p0069 A70-10281

High energy nuclear interactions defined by computerized determination of sea level lateral distribution of muons from primary cosmic ray air showers

01 p0171 A70-10667

Electromagnetic showers fluctuations produced by electrons and photons in heavy materials, determining moments of particle numbers and bremsstrahlung differential cross sections

01 p0171 A70-11026

Extensive air shower axis position determined using energy methods and radial distribution geometry of particle density

01 p0171 A70-11252

Angular distribution of muon pool extensive air showers flatter than normal showers, discussing initiation by passive particles produced by cosmic ray-atmospheric nuclei

02 p0357 A70-12079

High energy extensive air shower detection by Cerenkov receivers or liquid scintillators, considering 200 and 3000 MHz radio emission mechanisms

02 p0357 A70-12115

Extensive air shower models, noting role of nuclear active component energy decay rate

03 p0556 A70-13038

Spatial distribution function calculation for muons in extensive air shower model and secondary particles mean transverse momentum estimation

03 p0556 A70-13039

Cosmic ray particles high energy interactions during extensive air showers, noting inelastic superhigh energy collisions

03 p0556 A70-13040

Electron numbers in extensive air shower spectra from scintillation counters measurements at high mountain altitude, analyzing electron-photon component spatial distribution

03 p0556 A70-13041

Scintillation counters hodoscopic system for studying spatial distribution of muon and muon-number fluctuations in extensive air showers

03 p0482 A70-13042

Density spectrum exponent of penetrating muon component of extensive air showers determined for hodoscopic assembly of Geiger-Muller counters with lead absorber

03 p0556 A70-13043

Excess electron and combined electron-positron angular distributions compared in electron photon cascade showers, considering Coulomb scattering

03 p0556 A70-13048

Spatial distribution of cascade shower particles in atmosphere described by integrodifferential equations system, considering medium ionization

03 p0557 A70-13049

Electron and photon spatial distributions in cascade air shower, applying moment method to space/angle problem solution

03 p0557 A70-13050

Cerenkov radiation of electron-positron pair as moving radiating dipole in EAS, discussing emission effects of primary energy, production height and inclination angle

03 p0561 A70-14186

Muonic and hadronic component arrival time distribution in EAS measured under rock compared to Monte Carlo computation

03 p0562 A70-14187

Quarks discovery in cores of energetic extensive air showers, discussing results evaluation and interpretation

04 p0722 A70-15299

Isothermal atmospheric temperature effects on extensive air shower characteristics and muon numbers computed at various temperature and observation levels

05 p0898 A70-15945

Extensive air shower characteristics for inelasticity coefficient, nucleon-pion interaction cross sections and secondary particles, noting parameter interchangeability

05 p0898 A70-15946

Angular distribution and production probability of secondary shower particles produced by high energy cosmic ray muons using scintillation counter facility

05 p0899 A70-15957

Extensive air showers with nuclear particle interactions using ionization calorimeters, neutron monitor, scintillation and Cerenkov radiation counters

05 p0846 A70-15958

Muon-electron ratio measurements in extensive air showers, showing anomaly due to chemical composition change of primary cosmic radiation

05 p0901 A70-16274

Density spectra of cosmic ray showers measured by scintillators and GM counters

05 p0902 A70-16458

Cerenkov light in extensive air shower observed at mountain altitude showing mixed primary cosmic rays in chemical composition

06 p1134 A70-17184

Individual extensive air showers axes localized by measurement of charged particle densities, assuming age parameter

07 p1365 A70-18777

Quark search in cores of air showers with four million GeV mean energy, deducing rough production rate

07 p1368 A70-19925

Electromagnetic component of extensive air showers to three dimensional Monte Carlo simulations of hadronic component using electromagnetic cascade theory

07 p1368 A70-19967

Coherent and incoherent radio emission from extensive air showers simultaneously detected by radio telescope in VHF-UHF range

08 p1563 A70-20475

Mathematical model of extensive air showers, calculating lateral distribution of photoelectronic component at all altitudes

08 p1560 A70-20598

Critical review of paper on evidence of quarks in air shower cores from cloud chamber tracks, explaining data by statistical fluctuations in particle fluxes

08 p1562 A70-21272

Extensive air shower simulation for determining inelasticity effect on electrons, hadrons and muons variation at sea level

08 p1563 A70-21674

Cosmic ray air showers simulation, discussing high energy nuclear interaction and linear relation of primary particle energy to number

09 p1744 A70-22048

Cosmic ray air shower detection from radio pulses

09 p1745 A70-23276

Cascade showers in horizontal flux of cosmic rays measured by ionization calorimeter

09 p1747 A70-23730

Highest energy primary cosmic ray particles, considering air shower characteristics and energy spectrum shape

12 p2292 A70-27381

Cosmic ray extensive air showers spectrum at high altitude, describing measuring equipment, techniques and results

12 p2295 A70-28048

Cosmic ray experiment for detecting quarks in low density showers, using hodoscope of wire proportional counters

16 p2972 A70-33048

Magnetic monopole flux limits in primary cosmic radiation derived from muon-poor shower data and inverse Compton scattering

16 p2972 A70-33050

Electron recording by shower counters, noting radiation length importance

16 p2908 A70-33211

Radio receiving system for pulses detection from cosmic ray extensive air showers, discussing sensitivity and noise temperature

16 p2911 A70-33788

Three dimensional nucleon-pion cascade equations solution for cosmic ray extensive air showers by pion-links method

17 p3150 A70-34597

Cosmic ray air showers UHF emission detection at 500 MHz

17 p3151 A70-34850

Electrons lateral distribution in large air showers determining inelasticity of high energy nuclear interactions

18 p3305 A70-35947

Periodic high energy gamma rays from pulsars, using night sky Cerenkov light receiver for proton showers

19 p3500 A70-38084

Periodic cosmic gamma radiation from pulsars, using reflector detection of shower generated Cerenkov light

19 p3501 A70-38090

Cosmic gamma ray sources detection in 100-1000 GeV range by atmospheric Cerenkov radiation from energetic particle showers

19 p3501 A70-38091

Electron energy spectra range from HEOS A1 satellite mounted Cerenkov counter with shower telescope

19 p3503 A70-38103

Primary cosmic rays energy spectrum, investigating extensive air shower /EAS/ size spectrum in 2,000-1,000,000 eV range

19 p3510 A70-38154

Muon deficient showers intensity distribution as function of sidereal time, obtaining anisotropy upper limit by statistical analysis and Monte Carlo method

19 p3511 A70-38483

Air shower radio pulse amplitude dependence on primary energy and core distance

19 p3381 A70-38607

Equilibrium energy spectra of cascade electrons and photons in light and heavy materials as function of total shower energy

20 p3675 A70-39304

Three dimensional Monte Carlo simulation of extensive air shower processes, comparing with hadrons and electrons energy spectra

20 p3699 A70-39442

Cosmic ray jet studies, evaluating nuclear emulsion technique

22 p4096 A70-43399

Far field power of coherent Cerenkov radio emission from cosmic ray showers in turbulent atmosphere, using radio telescopes

23 p4247 A70-44791

Primary mass effects on extensive air shower characteristics, using Monte Carlo simulation

23 p4238 A70-44930

Cerenkov light longitudinal distribution from extensive air showers, using near UV receivers

24 p4398 A70-46225

COSMIC RAYS

NT COSMIC RAY SHOWERS

NT PRIMARY COSMIC RAYS

NT SECONDARY COSMIC RAYS

NT SOLAR COSMIC RAYS

Cosmic ray latitude survey in North America in summer using neutron and muon monitors operating near sea level and on mountains

01 p0167 A70-10226

Cosmic ray latitude survey in Canada using airport sites, noting ground snow effect on neutron monitor counting rate

01 p0167 A70-10227

Cosmic ray latitude survey in western U.S. and Hawaii in summer 1966 using neutron and muon monitors

01 p0167 A70-10228

Cosmic ray survey measurements during IQSY reduced to common atmospheric depth, determining attenuation coefficients of neutron and muon monitors

01 p0167 A70-10230

Cosmic rays nucleon component measurements interpretation in terms of geomagnetic field model

01 p0169 A70-10354

Cosmic ray electron intensity diurnal variations measured with combined Cerenkov telescope and Pb-scintillator sandwich detector on balloon flight

01 p0170 A70-10408

Cosmic ray neutron monitors data comparison for various stations using one factor model, considering atmospheric effects and cut-off rigidities

01 p0087 A70-10460

Seasonal, solar diurnal and semidiurnal variations of cosmic ray soft component observed at sea over seven year period

01 p0170 A70-10467

Tradeoff criteria between man machine and automated space systems applied to lunar and cosmic ray explorations

01 p0034 A70-10644

Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence

01 p0172 A70-11525

Algorithm for determining readings dispersion during cosmic rays variability, statistical nature and instrument errors

01 p0172 A70-11526

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes

01 p0172 A70-11545

Diffused X ray background in isotropic world models in terms of Compton radiation from cosmic ray electrons in intergalactic space

02 p0356 A70-11743

Meteorites fossil tracks due to cosmic radiation heavy nuclei

02 p0361 A70-11748

Cosmic ray galactic effects, discussing galactic magnetic field, hydromagnetic wave propagation, etc

02 p0361 A70-11749

Cosmic ray primaries and secondaries direct heating of thermal electrons for computation of H I regions electron densities and temperatures

02 p0363 A70-11782

Thermal properties of neutral interstellar gas heated by low energy cosmic rays, noting role of electrons in heating processes

02 p0364 A70-11783

Heavy nuclei survival in cosmic rays Colgate supernova acceleration model, assuming plasma wave instability in shock wave

02 p0357 A70-11788

Balloon measurements of cosmic ray alpha particle flux in upper atmosphere over Japan to obtain solar modulation effects data

02 p0357 A70-12122

Cosmic ray protons, He nuclei and electrons solar modulation by betatron deceleration mechanism during interplanetary space passage

02 p0357 A70-12123

Data collection for ionospheric disturbances, geomagnetic field, radio wave intensity, cosmic rays and solar activity

02 p0290 A70-12125

Cosmic ray origin in high energy H and He isotropic abundances and energy spectra observed by IMP 4 satellite during solar quiet times

02 p0358 A70-12250

HEOS-1 satellite development for ESRO to investigate interplanetary magnetic fields, cosmic radiation, solar wind outside magnetosphere and earth shock wave

02 p0382 A70-12646

Inelastic muon-nucleon scattering implications on cosmic rays, studying equation validity for absorption cross section

02 p0359 A70-12702

Cosmic X ray observations by rockets and balloons noting polarization and line emissions of various sources

02 p0359 A70-12789

Cosmic X ray sources optically observed from ground, discussing identification, distribution, etc

02 p0359 A70-12790

Cosmic X ray background interpreted as Compton collisions between cosmic black body photons and relativistic electrons in radio sources

02 p0360 A70-12792

Cosmic x ray astronomy in near future for source detection concerning spectral bands, polarization, position, instrumentation, etc

02 p0304 A70-12794

Cosmic ray nuclear interactions under paraffin and lead, using counter controlled multiplate cloud chamber

03 p0553 A70-12877

Galaxy model formulated in cylindrical coordinate system using Fokker-Planck equation for cosmic radiation particles propagation, discussing trajectories of high energy particles

03 p0553 A70-12880

Cosmic ray physics - Conference, Tashkent, Uzbek SSR, October 1968

03 p0553 A70-13028

Cosmic ray particles inelastic nuclear interactions mean free path in iron measured in Wilson chamber and ionization calorimeter

03 p0554 A70-13030

Cosmic ray neutrons energy spectrum and angular distribution at sea level based on measurement results

03 p0556 A70-13046

Diffraction correction of terrestrial, atmospheric and cosmic background radiation at aperture and disk determined by artificial moon method

03 p0442 A70-13084

Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations

03 p0568 A70-13355

Light-flattering amplitude and intrinsic resolution of large-area flat scintillation detectors used for cosmic rays-nuclear interaction experiments at high energies

03 p0484 A70-13466

Visible solar hemisphere circumstances for 28 January 1967 and ground level cosmic rays enhancement not preceded by intense H alpha flares

03 p0558 A70-13590

Large amplitude wave trains in cosmic ray neutron intensity compared with diurnal variations, determining interplanetary space directional distribution from monitor data

03 p0559 A70-13912

Cosmic ray increases during Forbush decrease onset stage in terms of transient spatial anisotropy

03 p0559 A70-13914

Sidereal cosmic ray diurnal variations from underground muon telescopes in Northern and Southern Hemispheres, proposing model producing variations at earth vicinity

03 p0560 A70-13978

Forbush decrease recorded on 26-27 January 1968 showing large anisotropies in cosmic ray flux after SC magnetic storm

03 p0560 A70-13979

Small amplitude perturbations in interstellar medium, discussing order of magnitude estimates of properties of cosmic rays, thermal gas, dust and magnetic field

03 p0575 A70-14016

Biological experiment on Zond 5 automatic station in earth-moon-earth trajectory determining cosmic radiation absorption and effects on plant seeds, turtles, larvae, etc

03 p0428 A70-14066

Production rates determination for Na 24 and Mg 28 isotopes in Ar exposed to cosmic rays

03 p0561 A70-14092

Electron and positron flux steady state in interstellar space relationship to differential energy spectrum exponent in cosmic rays, discussing galactic halo and age

03 p0561 A70-14151

Lunar neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum

04 p0738 A70-14442

Low energy cosmic rays effect on electron density in interstellar medium

04 p0738 A70-14509

Cosmic ray origin theories, noting pulsars nature and properties may provide solution

04 p0738 A70-14517

Galactic cosmic rays scattering by solar wind magnetic field fluctuations, considering energy and momentum transfer

04 p0739 A70-14596

Galactic cosmic ray origins, discussing supernovae and galactic nucleus cosmic ray production

04 p0740 A70-15071

Interstellar gas instability, discussing thermal, magnetic and cosmic ray effects

04 p0753 A70-15072

Hysteresis effect on cosmic ray modulation and gradient ionization near solar minimum from measurements made near earth with OGO 1 and 3 ion chambers

04 p0740 A70-15106

Cosmic ray flux modulation in earth atmosphere produced by solar wind and geomagnetic variations, considering effects on atmospheric carbon 14 variations

04 p0680 A70-15114

Fast neutron spectrum produced by galactic cosmic ray protons in atmosphere, presenting Monte Carlo transport calculation results

04 p0742 A70-15130

Ionization losses effect on energy spectra of cosmic ray heavy nuclei with Fermi acceleration, using transfer equation

04 p0742 A70-15201

Gamma rays due to cosmic ray electrons bremsstrahlung in interstellar medium, predicting diffuse galactic X ray flux

04 p0742 A70-15713

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

04 p0742 A70-15718

Cosmic ray energy spectrum variations possible effect on ray intensity amplitude intensity increases preceding Forbush decreases

04 p0743 A70-15719

Lower ionospheric cosmic ray layer state during Forbush decreases from radio absorption observations interpreted on basis of electron production rate analysis

04 p0743 A70-15720

Forbush effect on intensity of neutron component of cosmic rays during quiet sun period

05 p0897 A70-15795

Primordial cosmic ray sources evidence suggesting galaxies and quasars in initial stages of formation

05 p0897 A70-15921

Technique for coding data on cosmic ray variations based on packing digital information in computer storage, proposing selective statistical control for tape recording phase

05 p0898 A70-15929

Block diagram for eliminating counting errors and spurious coincidences in telescope used at cosmic ray stations

05 p0845 A70-15931

Cosmic ray intensity variations recording device adaptable to computer forming centralized data processing system

05 p0845 A70-15932

Transistorized low impedance cascades as amplifiers for proportional counters in studying cosmic ray intensity variations

05 p0845 A70-15934

Diurnal cosmic ray intensity variations first and second harmonics amplitudes during sudden phase variations diagrammed from neutron monitor data during IGY

05 p0898 A70-15936

Azimuthal telescope with proportional counters for underground recording of hard/soft cosmic ray components

05 p0846 A70-15937

Neutron monitor calibration method to eliminate natural cosmic ray background, decreasing errors due to ray intensity variation

05 p0846 A70-15938

Cosmic rays meson component recorded by proportional counters designed for use in large telescopes

05 p0846 A70-15939

Cosmic ray intensity decreases in relation to geomagnetic and F 2 region disturbances characterized by Forbush decreases from vertical sounding data

05 p0898 A70-15940

Cosmic rays neutron component solar-diurnal variations as function of solar activity using magnetically quiet data

05 p0898 A70-15941

Time dependent variation of first and second harmonics amplitudes of diurnal cosmic ray variations during SC magnetic storms

05 p0898 A70-15942

Azimuthal telescope for recording cosmic rays intensity, noting statistical error for vertical and oblique incident component

05 p0846 A70-15967

Solar magnetic discontinuity fluxes analyzed by studying 27-day cosmic ray and geomagnetic activity variations using linear filtration method

05 p0900 A70-15969

Energy spectra of cosmic diffuse X ray component and distribution over northern sky, determining Crab Nebula and Cygnus spectral characteristics

05 p0901 A70-16305

Cosmic ray intensity preceding Forbush effects as function of chromospheric flares solar longitude and solar wind velocity

05 p0903 A70-16730

Relativistic solar proton propagation fluctuation effects in interplanetary magnetic field during cosmic ray intensity increase

05 p0903 A70-16731

Cosmic ray angular distribution spectrum and interplanetary magnetic field properties determined from semi-diurnal cosmic ray variations data

05 p0903 A70-16732

Cosmic protons and high energy heavy nuclei interaction with radiation in expanding universe, including estimates of light radiation influence on cosmic ray spectra

05 p0904 A70-16903

Cosmic gamma radiation sources above 50 Mev investigated by high altitude balloons in Northern Hemisphere with spark chamber system

05 p0904 A70-16930

Relativistic plasma waves in uniform ambient magnetic field analyzed for growth rate to investigate plasma instabilities of streaming cosmic rays

05 p0904 A70-16931

X rays from Sco XR-1 compared with galactic cosmic rays and solar Lyman alpha radiation to determine ionospheric ionization causing radio wave attenuation

06 p1134 A70-17443

Cosmic ray electron spectrum above 200 Gev based on pure nuclear emulsion stack using horizontal sandwich assembly

06 p1135 A70-17473

Cosmic ray triggering of solar system formation by ionizing in solar disk

06 p1135 A70-17539

Cosmic ray time series periodicity using variance analysis allowing for intensity variations and meteorological factors

06 p1135 A70-17543

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models

06 p1135 A70-17885

Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry

07 p1366 A70-19429

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording

07 p1366 A70-19430

Cosmic ray intensity increase preceding Forbush effect using statistical correlation method

07 p1367 A70-19444

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

07 p1367 A70-19456

Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite

07 p1367 A70-19490

Monograph on balloon and satellite borne spark chambers for cosmic gamma radiation energy and direction determination, discussing relativistic electrons multiple scattering

07 p1368 A70-19617

Book on nuclear and astrophysical aspects of cosmic rays covering kinematics in collisions and decays, cascade theory, high energy interactions, origin, etc

07 p1368 A70-19666

Book on cosmic electrodynamics covering cosmic plasmas, sun and solar activity, interplanetary medium and geomagnetic cavity, magnetosphere, geomagnetic disturbance, radiation belt, etc

07 p1387 A70-19667

Cosmic X ray source spectra possibly due to plasma bremsstrahlung

07 p1368 A70-19700

Intensity variations of cosmic ray neutrons and mesons analyzed to isolate lunar day period

07 p1368 A70-20033

Compton-Getting effect for cosmic ray particles and photons and Lorentz-invariance of distribution func-

tions, discussing thermal background radiation, proton spectra, etc

07 p1369 A70-20071

Galactic cosmic rays intensity long term modulation, studying roles of solar corona, solar wind and interplanetary electromagnetic field

07 p1369 A70-20075

Inverse Compton collisions of relativistic electrons with universal black body photons for diffuse component of cosmic X rays

07 p1369 A70-20166

Highly variable component protons and alpha particles identified in low energy cosmic rays by IMP 4

07 p1369 A70-20199

Cosmic ray physics - Conference, Tashkent, Uzbek SSR, October 1968

07 p1370 A70-20326

Cosmic rays origin, discussing galactic theory of supernovae and formation mechanisms for energy spectra and composition of sources

07 p1371 A70-20327

Cosmic rays formation time and evolution in expanding universe, discussing high energy electrons, energy losses and spectra and metagalaxy cascade processes

07 p1371 A70-20328

Hot universe model for determining magnitude constraints on Dirac monopole annihilation cross section and mass in cosmic rays

07 p1371 A70-20330

Plasma physics relating turbulence to cosmic rays covering oscillations, turbulent acceleration, sub-cosmic rays, langmuir turbulence spectra and acceleration, etc

07 p1371 A70-20332

Cosmic ray microvariations relation to solar wind structure, particle scattering models, spatial distribution, time variations, etc

07 p1372 A70-20336

Solar wind structural characteristics determination from cosmic ray variations in interplanetary medium, considering interplanetary magnetic field structure and spatial orientation

07 p1372 A70-20337

Solar system cosmic ray time-space variations analysis based on simulation of meteorite nuclear processes

07 p1372 A70-20338

Forbush decreases of cosmic rays calculated assuming semitransparent magnetic piston action with free particle exchange

07 p1372 A70-20340

Magnetic storms effect on cosmic ray neutron component diurnal variation, determining amplitudes and phases of harmonics by harmonic analysis

07 p1372 A70-20341

Diurnal variations of cosmic ray neutrons following solar proton flares, proposing anisotropic diffusion model for phase and amplitude

07 p1372 A70-20342

Solar wind interaction with galactic cosmic radiation resulting in wind radial motion braking, discussing possible solar wind focusing

07 p1373 A70-20343

27-day variations in ionization layer created by galactic cosmic rays, discussing association with 27-day cosmic ray and geomagnetic field variations

07 p1373 A70-20345

Cosmic rays effect on atmospheric temperature and wind, discussing planetary distribution of neutron component of radiation intensity

07 p1373 A70-20346

Short lived cosmic ray produced nuclides as lower atmospheric motion tracers, studying Na 24 characteristics and activity in rain water

07 p1373 A70-20355

Cosmic rays sudden intensity increases during proton flares of 28 January 1967 and 7 July and 2 September 1966, plotting proton density vs pressure

07 p1374 A70-20445

Sea level testing of magnetic spectrograph and calorimeter apparatus for studying cosmic ray spectra at different atmospheric depths

08 p1560 A70-20474

Cosmic ray intensity increase due to meteor showers magnetic field trapping effect

08 p1560 A70-20568

Neutron formation multiplicity during capture of cosmic ray muons by Zn and Sb nuclei, noting agreement with one-third law

08 p1560 A70-20718

Solar modulation of low energy galactic cosmic ray protons, proposing diffusion-convection model with time dependent diffusion coefficient

08 p1561 A70-20906

Cosmic rays induced Cerenkov light pulses effect on stellar intensity interferometer from measuring correlated pulses

08 p1497 A70-21492

Cosmic ray origin models, considering universal and local metagalactic models and halo and disk galactic models

09 p1744 A70-22057

- Synchrotron emission of relativistic particle in magnetic field with radiative reaction force comparable to Lorentz force, emphasizing pulsar cosmic ray electron acceleration 09 p1731 A70-22273
- Cosmic ray intensity variation correlated with amplitude changes in 27 day variation during solar cycle 18 09 p1745 A70-22740
- Cosmic radio waves discrete sources spectra measured in decametric wavelength range, discussing wave generation and absorption 09 p1762 A70-23189
- Solar wind magnitude and variability effects on geomagnetic activity and cosmic ray intensity modulation from satellite observations 09 p1745 A70-23272
- Low energy positrons and gamma rays from large fluxes of galactic cosmic rays 09 p1746 A70-23477
- Cosmic ray diurnal anisotropy, demonstrating two-solar-cycle variations for nucleonic component 09 p1746 A70-23478
- K-mesons role in high energy cosmic ray muons angular distribution and nuclear interaction 09 p1748 A70-23731
- Heavy particles separation at sea level from overall flux of cosmic radiation, discussing method and device recording subrelativistic particles 09 p1684 A70-23732
- Cosmic rays diffusion through interstellar plasma noting microstabilities role 10 p1931 A70-23972
- Cosmic rays, particles and fields physics in relation to radio and X ray astronomy 10 p1931 A70-24410
- Cosmic ray muons continuous recordings, describing design and performance of plastic scintillators with photomultipliers 10 p1889 A70-24489
- Cosmic radiation low energy positrons flux estimation compared with calculation from solar modulation models 10 p1932 A70-24537
- Cosmic ray electrons during propagation in interstellar space analyzed for energy spectrum modulation 10 p1816 A70-24633
- Sidereal time variations in cosmic ray intensity observed by inclined muon telescopes 10 p1933 A70-24858
- Cosmic layer in lower ionosphere investigated by 164 kHz frequency absorption at night, discussing solar activity effects 10 p1934 A70-25198
- Ionospheric waves positive phases and disturbances related to solar activity variations and cosmic ray modulations 10 p1885 A70-25270
- Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation 11 p2103 A70-25527
- Isotropic cosmic background radiation detection in presence of earth and galactic radiation, discussing influence on steady state cosmology 11 p2106 A70-26673
- Cosmic ray variations concepts with reference to 11, 22 and 80-90 year solar cycles Wolf number variations 11 p2118 A70-26720
- Cosmic ray intensity fluctuations at geomagnetic equator using power spectrum analysis on mu meson records, discussing solar photosphere and interplanetary magnetic field 12 p2291 A70-27176
- First harmonic of diurnal variation in pressure corrected cosmic ray neutron monitor rate, discussing amplitude variation with height and observed time dependence 12 p2291 A70-27177
- Cosmic X ray sources, considering locations, fluxes and angular sizes from Aerobee rocket observations 12 p2292 A70-27384
- Cosmic X ray sources searched for by Aerobee rockets, noting locations and distribution correlation with galactic novae 12 p2292 A70-27385
- Cosmic gamma rays observation by balloon flight and satellite with scintillation detector, tabulating counting rates in pulse height channels relative to Crab Nebula 12 p2292 A70-27387
- Cosmic neutrinos detection, using inverse beta decay and elastic scattering by electrons to overcome solar neutrino problem 12 p2293 A70-27390
- Cosmic electron detection and measurement techniques, considering presence in solar system, interstellar space and metagalaxy and galactic continuum radio emission 12 p2293 A70-27572
- Cosmic rays origin, discussing choice between galactic halo and radio disk models for trapping region 12 p2295 A70-27883
- Diffuse cosmic X and gamma ray background radiation isotropic component 12 p2295 A70-27887
- Ar 37 and Ar 39 isotopes in recently fallen iron-ataxite and stony meteorites, discussing relevance to cosmic ray variations in space 12 p2309 A70-27950
- Cosmic rays components fluxes, interactions, lifetimes and anisotropy in statistical discrete source model, tabulating and graphing results 12 p2295 A70-27996
- High energy and contemporaneous cosmic ray tracks in bubble chamber picture noting evidence of quarks 12 p2276 A70-27997
- Muon intensity meter for cosmic ray muon flux underground using scintillation telescope consisting of two coincidence counters 12 p2295 A70-28176
- Forbush effects influence on cosmic layer state in lower ionosphere using long radio waves 12 p2295 A70-28220
- Long wave cosmic radio background emission in circumlunar space by Luna 11 and 12 satellites, observing increase in earth magnetosphere tail 12 p2295 A70-28262
- Neutron flux due to cosmic radiation interaction with lunar surface layer, determining angular distribution and energy spectrum 13 p2475 A70-28467
- Gravity radiation detector insensitivity to cosmic rays 13 p2405 A70-28835
- Cosmic rays emission by dipole magnetosphere, applying model to neutron star particle belts 13 p2476 A70-28893
- Cosmic ray muon energy spectra at large zenith angles measured by optical spark chamber magnetic spectrometer 13 p2476 A70-28933
- Cosmic ray muons energy spectra and zenith angle distributions by analyzing tracks recorded in high field heavy liquid bubble chamber 13 p2476 A70-28934
- Cosmic ray vertical muon flux measurements at sea level using spectrometer 13 p2477 A70-29124
- Cosmic rays and cosmic X rays, considering galactic and extragalactic sources, diffuse background, detection devices, etc 13 p2477 A70-29160
- Cosmic radiation yearly semidiurnal anisotropy characteristics based on worldwide neutron monitor stations data analysis 13 p2477 A70-29177
- Cosmic radiation periodic variations measurements noting second harmonic importance of daily variations 13 p2478 A70-29230
- Cosmic rays intensity frequency spectrum near earth, indicating relativistic electron energy spectra similarity in interstellar space and galactic particles existence 13 p2478 A70-29388
- Lower stratosphere ozone formation, suggesting origin in cosmic rays absorption 13 p2400 A70-29472
- High energy cosmic ray muons, investigating arrival from both low and high galactic latitudes 13 p2478 A70-29482
- Cosmic microwave radiation origin based on discrete source models 13 p2479 A70-29787
- Altitude dependence of low latitude cosmic ray diurnal variations from cosmic ray neutron data 13 p2479 A70-29792
- Interstellar electron gas distribution and temperature, suggesting cosmic ray heating as main ionization source 13 p2495 A70-29796
- Low energy neutrino cosmic background, discussing energy density, black body radiation, beta decay, scattering process and origin 13 p2479 A70-30001
- Book on space physics covering charged particles in magnetic, electric and dipole fields, cosmic rays, magnetically trapped radiation and interplanetary plasma 14 p2633 A70-30099
- Cosmic ray energy spectrum in absence of solar activity from eleven year ray variations, noting coincidence with galactic rays 14 p2630 A70-30204
- Diffusion loss model for cosmic ray electron propagation in galaxy, considering direct and radio observations 14 p2631 A70-30538
- Interstellar cosmic ray spectra from nonthermal radio background, obtaining electrons and protons modulation by diffusion-convection energy loss theory 14 p2631 A70-30673
- Galactic cosmic ray actions on interstellar medium for origin of Li, Be and boron in stellar atmospheres and solar system 14 p2640 A70-30786
- Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots 14 p2632 A70-30802
- Cosmic ray energy spectrum variations possible effect on amplitude of intensity increases preceding Forbush decreases 14 p2632 A70-30803
- Lower ionospheric cosmic layer state during Forbush decreases from radio absorption observations interpreted on basis of electron production rate analysis 14 p2632 A70-30804
- Cosmic ray transport in solar wind generalized with anisotropic diffusion approximation 14 p2632 A70-30887
- Intergalactic medium lukewarm models, considering physical state, cosmic photon spectrum and isothermal and adiabatic expansion 14 p2651 A70-31291
- Galactic cosmic rays high altitude measurements by balloon-borne Sparmu type multidirectional detectors, revealing azimuthal anisotropy 14 p2632 A70-31309
- Cosmic rays geomagnetic bending and effective angles of approach for various ground stations 14 p2633 A70-31313
- Cosmic ray shortest term regular intensity variations, measuring particle dispersion as time function 14 p2633 A70-31314
- Cosmic X ray and gamma ray spectral energy distribution slope change explained by measurement process involving photon spectrum 15 p2792 A70-31431
- Report to COSPAR on space research in Bulgaria, considering ionospheric physics, cosmic rays, satellite observations, meteorology and space communications 15 p2829 A70-31704
- Report to COSPAR on space research covering satellite tracking telemetry, Apt, meteorology, cosmic rays, solar activity and international cooperative programs, etc 15 p2829 A70-31709
- Quark search in cosmic radiation near sea level, using scintillation counter telescope 15 p2793 A70-31737
- Galactic cosmic rays origin in terms of statistical mechanical model of supernova explosions 15 p2799 A70-31793
- Galactic abundances and cosmic ray spectra by IMP-4 satellite, obtaining He ratio 15 p2793 A70-31794
- Quiettime cosmic ray ionization altitude dependence over polar regions from measurements by integrating ionization chamber on OGO-2 15 p2793 A70-31902
- Cosmic ray knee interpretation using polar orbiting ionization chambers data from OGO-2/4 15 p2793 A70-31903
- Polypropylene window proportional counter on board sounding rocket for cosmic soft X ray measurement 15 p2741 A70-32530
- Cosmic ray radial gradients and anisotropies, describing behavior in interplanetary medium 15 p2795 A70-32623
- Cosmic ray intensity increase due to meteor showers magnetic field trapping effect 15 p2795 A70-32723
- Charged particles and He nuclei spatial distribution from recordings in cosmic ray equator region by Cerenkov counter mounted on Proton 2 satellite 15 p2795 A70-32735
- Soviet monograph on modulation of cosmic rays in interplanetary space, covering anisotropic diffusion approximation, diffusion equation, Forbush effects energy spectrum, etc 16 p2971 A70-32911
- German-American HELIOS solar probe for solar wind, interplanetary magnetic field and cosmic rays 16 p2987 A70-34343
- Solar X-ray spectrum and intensity and diffuse cosmic flux measurements, using polar orbiting satellite-borne instruments 17 p3149 A70-34534
- Omnidirectional cosmic gamma ray flux in 1-6 MeV range observed by ERS-18 satellite 17 p3149 A70-34539
- Galactic gamma rays from OSO-3 observations attributed to decay of neutral pions produced by cosmic rays interaction with interstellar gas nucleons 17 p3150 A70-34567
- German monograph on artificially accelerated proton measurements for ionization calorimeter calibration and cosmic radiation energy spectrum analysis during balloon flight 17 p3081 A70-34572
- Energy loss of high energy cosmic rays traversing isotropic radiation field of arbitrary energy spectrum in pair producing collisions with ambient photons 17 p3150 A70-34598
- Galactic cosmic rays eleven year modulation, determining modulating region L depth from dynamical

phase lag between changes in cosmic ray intensity and solar activity

17 p3150 A70-34833

UV background radiation observed above atmosphere for intergalactic gas, Galaxy and subcosmic ray components

17 p3163 A70-34903

Pulsars as cosmic ray sources, emphasizing time properties of acceleration mechanisms

17 p3151 A70-34913

Anthracene, polystyrene and stilbene for scintillation counters measuring cosmic ray protons, analyzing dosimetric properties

17 p3151 A70-35352

Local system interstellar medium thermal electron distribution, synchrotron radiation emissivity, cosmic ray electron flux and spectrum

17 p3152 A70-35583

UV absorption lines in H I regions heated by cosmic rays, discussing possible detection by rocket or satellite spectroscopic observations

17 p3152 A70-35748

Radionuclides production rates in stratosphere from spallation reactions of cosmic rays with Ar

17 p3152 A70-35759

Secular variations calculation in cosmic ray cutoff rigidities by trajectory tracing process with geomagnetic field models

18 p3306 A70-36023

Cosmic ray variations during PCA absorption, relating Forbush decreases to lower ionosphere ionization intensity increase

18 p3306 A70-36096

Statistical analysis of cosmic radiation neutron component monitor error, taking into account generation multiplicity

18 p3307 A70-36097

Recording instrumental noise resolution of standard algorithm for cosmic ray stations

18 p3307 A70-36100

Periodic cosmic ray variations near Southern magnetic pole related to chromospheric flares

18 p3307 A70-36102

High altitude neutron supermonitor investigation of cosmic ray microvariations

18 p3307 A70-36104

Azimuthal muon telescope installation at cosmic ray station, noting photorecorder circuitry

18 p3256 A70-36108

Cosmic ray and radiation belt data from vertical probes, determining instantaneous cross section of atmosphere

18 p3307 A70-36169

Submillimeter wavelength night sky radiation background, observing effects on various cosmic ray phenomena

18 p3308 A70-36330

Superheavy nuclei origin in primary cosmic rays, proposing neutron stars/pulsars as sources

18 p3308 A70-36403

Ionization losses effect on spectrum of cosmic rays accelerated in solar chromosphere, interstellar space, supernovae, radiogalaxies, etc

18 p3308 A70-36425

Diffuse cosmic X ray background galactic component, using model to predict angular spread

18 p3308 A70-36484

Charge spectrum of heavy relativistic cosmic ray nuclei, using tracks from balloon-borne photographic emulsions

18 p3308 A70-36781

Cosmic ray muon intensity deep underground vs depth measured with liquid scintillation detector hodoscope

18 p3308 A70-36897

Cosmic X rays interstellar absorption, giving atomic He total photoionization cross section

18 p3308 A70-36899

Solar wind effects on galactic cosmic rays isotropic diffusion and density distribution in interplanetary space in presence of azimuthal asymmetry

18 p3309 A70-36903

Barometric and atmospheric temperature corrections of cosmic ray neutron component intensity fluctuations obtained statistically from monitor recording

18 p3309 A70-36904

Cosmic ray intensity increase preceding Forbush effect using statistical correlation method

18 p3309 A70-36918

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms

18 p3309 A70-36930

Interstellar gas thermal instability under cosmic ray heating, investigating perturbations causing transition to dense cool phase in pressure equilibrium with intercloud phase

18 p3309 A70-37003

Residual solar modulation of relativistic cosmic ray nuclei in galaxy over eleven years, observing magnitude at solar activity minima

18 p3309 A70-37009

Physical processes in galactic and extragalactic sources of nonthermal radio emission, assuming pulsars as principal magnetic field and cosmic rays sources

18 p3321 A70-37126

Relativistic electron spectra of cosmic rays accelerated by plasma turbulence, examining singularity in solution

18 p3322 A70-37127

Galactic radio corona existence, measuring northern galactic hemisphere sky brightness and cosmic ray distributions

18 p3322 A70-37129

Cosmic ray electron and low energy proton fluxes by satellite-borne detector during solar flare of 25 February 1969

19 p3496 A70-37507

Cosmic rays - Conference, Budapest, August-September 1969, Volume 1, Origin and galactic phenomena, covering supernovae, ray spectra, pulsar gamma rays, etc

19 p3497 A70-38076

Metagalactic and galactic sources of cosmic rays, including composition, electron spectra and radio emission

19 p3500 A70-38077

High energy cosmic gamma radiation detection from point source in Sagittarius, using balloon mounted spark chamber with Cerenkov telescope

19 p3500 A70-38078

High energy electron and photon cascades in Metagalaxy, considering electromagnetic radiation density and cosmic ray origin estimation

19 p3500 A70-38081

Critique of metagalactic origin of high energy cosmic rays, reviewing neutrino hypothesis

19 p3500 A70-38082

Acceleration of high energy cosmic rays by pulsar LF electromagnetic radiation

19 p3501 A70-38085

Cosmic ray high energy electron component intensity and spectra, using nuclear emulsion detector with counter triggered spark array

19 p3502 A70-38095

Cosmic ray electron and positron differential energy spectra during solar quiet times from OGO-5 satellite observations in interplanetary space

19 p3502 A70-38096

Interplanetary cosmic ray positrons energy spectral component with origin different from interstellar mesons decay

19 p3502 A70-38098

Galactic low energy cosmic ray positrons and gamma rays, considering production mechanism in interstellar space

19 p3503 A70-38099

Cosmic ray positrons and negatrons differential energy spectra and solar modulation, using balloon-borne magnetic spectrometer

19 p3503 A70-38100

Cosmic ray positrons and negatrons differential intensities near north geomagnetic pole from balloon flight measurements, noting solar modulation effects

19 p3503 A70-38102

Long term variations of cosmic ray electron spectrum above 500 MeV from balloon and satellite observations, noting reduction during Forbush decreases

19 p3503 A70-38105

Interstellar cosmic ray electron spectrum flattening below 3 GeV from OGO-5 observations

19 p3504 A70-38106

Cosmic ray electron spectrum above 100 GeV by emulsion-lead sandwich assembly, estimating residence time, hydrogen atoms number density in galactic disk, etc

19 p3504 A70-38108

High energy galactic gamma ray and X ray flux explained by cosmic ray electron scattering

19 p3504 A70-38112

Diffuse cosmic X rays produced by Compton scattering of far IR radiation on cosmic ray electrons

19 p3505 A70-38113

High energy galactic gamma rays photons, suggesting two-component cosmic ray source model

19 p3505 A70-38115

Traversed matter thickness and charge composition for high energy galactic cosmic rays with various propagation modes

19 p3506 A70-38123

Galactic cosmic ray energy spectra of light and medium nuclei from IMP-4 satellite measurements, investigating L/M ratio

19 p3506 A70-38124

Cosmic rays deuterons abundance calculation from H and He nuclei collisions with interstellar matter

19 p3506 A70-38125

Cosmic ray nuclei charge composition of elements Ne to Ni, using emulsion stacks exposure in balloon flights

19 p3506 A70-38126

Low energy galactic cosmic radiation energy spectra and charge composition in 2-14 Z range by OGO-5, suggesting two component model for origin

19 p3507 A70-38127

Cosmic rays shock from small mass supernovae explosions

19 p3507 A70-38128

Charge spectrum of high and low energy heavy cosmic ray nuclei, using balloon-borne nuclear emulsions

19 p3507 A70-38130

Cosmic ray nuclei chemical composition and energy spectra in 3-30 Z range by balloon flight and Pioneer 8 space probe, noting propagation models

19 p3507 A70-38131

Heavy cosmic ray abundance attributed to thermal nucleosynthesis during silicon burning at high temperature and density

19 p3507 A70-38132

Cosmic ray heavy nuclei charge composition from satellite-borne emulsion stacks exposure

19 p3507 A70-38134

Super heavy cosmic ray nuclei charge composition and track identification, using Lexan polycarbonate, cellulose triacetate (CTA) and nuclear emulsion

19 p3508 A70-38137

Cosmic ray track sources in meteoritic minerals, considering heavy primaries, secondary spallation and fission products

19 p3508 A70-38142

Galactic cosmic rays temporal and spatial variations in solar system, discussing nuclear active particles and spallation products depth distribution in meteorites

19 p3509 A70-38143

Relativistic cosmic rays nuclei abundances from Gemini 11 flight

19 p3509 A70-38144

Cosmic ray nuclei transformation and propagation in interstellar space, considering diffusion equation, cross sections, solar modulation, etc

19 p3509 A70-38145

Distribution functions of cosmic ray path length, obtaining exponential type for high and low energy data

19 p3509 A70-38146

Cosmic ray elements abundance at sources relative to carbon, comparing near-earth composition and solar photosphere

19 p3509 A70-38147

Cosmic ray lifetime, investigating radioactive Be 10 nuclei decay effects on intensity ratios Be/B and Be/Li, suggesting nuclei confinement to galactic disk

19 p3509 A70-38148

Sideral daily variation in cosmic ray muon intensity at 60 mwe depth, indicating extragalactic origin

19 p3509 A70-38149

Sideral cosmic ray diurnal variations using underground mu-meson telescopes in Northern and Southern Hemispheres

19 p3510 A70-38150

High energy cosmic rays sideral and solar anisotropy, using airborne Cerenkov telescope

19 p3510 A70-38151

Galactic cosmic ray anisotropy, discussing amplitude and phase values of daily sideral variation

19 p3510 A70-38152

Energy spectrum distortion of ultrahigh energy cosmic rays due to interactions with photons and neutrinos in universe

19 p3510 A70-38155

Galactic disk model for confinement of cosmic ray electrons, assuming isotropic background radiation

19 p3510 A70-38156

Cosmic rays propagation and production in Milky Way galaxy, using equilibrium model

19 p3510 A70-38157

Energetic cosmic ray particles transfer through interstellar space based on galactic disk model

19 p3511 A70-38158

Pulsars postulated as supernova remnants sources of local cosmic rays

19 p3511 A70-38159

Cosmic rays relationship to cosmological parameters and galactic radiation source evolution

19 p3511 A70-38160

Cosmic X ray background measurements, describing ESRO R/73 experiment

19 p3512 A70-38491

Galactic cosmic rays lifetime based on nuclei and matter interactions, discussing ionization losses effect

20 p3695 A70-38965

Cosmic ray electron and proton interaction, discussing hydromagnetic waves, synchrotron radiation, magnetic field effects and wave propagation

20 p3695 A70-39012

Diffuse cosmic X and gamma ray spectrum analysis, considering implications for Compton scattering models in intergalactic space

20 p3695 A70-39049

Cosmic electron spectrum formation by acceleration, considering metagalactic background X radiation

20 p3695 A70-39174

Cosmic soft X rays scattering by interstellar dust grains, observing source angular size dependence on distance, wavelength and grain properties

20 p3695 A70-39223

Interplanetary magnetic field large scale structure from cosmic ray intensity secular variations during solar activity cycle

20 p3696 A70-39276

Cosmic ray anisotropy 27 day and seasonal variations, considering neutron component data and sunspot magnetic field strength 20 p3696 A70-39277

Stratospheric cosmic ray intensity increases unassociated with chromospheric flares 20 p3696 A70-39278

Cosmic ray 27 day variations during solar activity minimum, noting unipolar magnetic regions role 20 p3696 A70-39280

Cosmic ray intensity decreases and Forbush effects energy spectra during various solar activity periods 20 p3696 A70-39281

Cosmic ray anisotropy sidereal-diurnal effects isolation by solving simultaneous amplitude and phase modulation problem 20 p3696 A70-39282

High energy cosmic ray-photon interactions, discussing ion production, nuclear fission, proton energy loss, red shift, etc 20 p3696 A70-39283

Cosmic ray neutron semidiurnal variations day and night components with respect to geomagnetic and solar activity 20 p3697 A70-39288

Cosmic ray neutron component differential and integral barometric coefficients, showing dependence on geomagnetic cutoff rigidity and atmospheric depth 20 p3697 A70-39290

Atmospheric dynamic effect on cosmic ray intensity, showing extremum and seasonal variation at midlatitudes 20 p3697 A70-39291

Cosmic ray beta neutron component barometric coefficients planetary distribution during IQSY, establishing latitude dependence for mountain and sea level equations 20 p3697 A70-39292

Electron formation by cosmic rays in atmosphere, taking into account impinging particles energy variations 20 p3697 A70-39293

Cosmic ray intensity variation during maximum meteor showers periods detected on earth, noting relationship to solar activity 20 p3697 A70-39294

Depth distribution of radioactive nuclei generated by cosmic rays in asteroidal sized bodies, calculating primary and secondary surface layer particle fluxes 20 p3698 A70-39295

Cosmic rays cutoff rigidity variations during magnetic storms, investigating flux increase due to current flow along parallel lines on magnetic shell surface 20 p3698 A70-39300

Algorithms for processing of cosmic ray data monitored by space station with multichannels for neutron and meson components recordings 20 p3698 A70-39309

Five-channel azimuthal underground cosmic ray telescope using proportional counters suitable for continuous recording 20 p3629 A70-39312

Multichannel cosmic ray recorder providing input to computer memory 20 p3629 A70-39313

Automatic cosmic ray station for recording nucleon and meson components 20 p3629 A70-39314

Diurnal anisotropy variations of cosmic ray intensity, taking into account neutron monitors data 20 p3699 A70-39346

Barometric coefficient altitude dependence of cosmic ray neutron monitor for vertical flux 20 p3699 A70-39347

Lower atmosphere cosmic ray ionization calculation, using high energy transport code 20 p3699 A70-39348

Fermi momentum upper limit for universe neutrinos in cosmic ray propagation, determining maximum proton energy 20 p3700 A70-39592

Cosmic ray superhigh energy electrons and neutrinos propagation in degenerate neutrino gas universe, considering gas density in cosmological models 20 p3700 A70-39593

Low altitude cosmic rays dosimetric measurement by Cosmos 228 apparatus 20 p3700 A70-39728

Forbush effects influence on cosmic layer state in lower ionosphere using long radio waves 20 p3700 A70-40095

Criticism of evidence for cosmic ray quark passage through low density bubble chamber 20 p3701 A70-40499

COS-B satellite cosmic X ray experiment with high sensitivity and long pointing time for extragalactic sources discovery 21 p3871 A70-40655

Galactic and extragalactic discrete cosmic ray sources by rocket observation with narrow slit collimators 21 p3871 A70-40656

Cosmic hard X ray sources spectra and time variations by balloons and OSO-3 satellite observations of Crab Nebula 21 p3872 A70-40657

Cosmic X ray spectra of Cyg XR-2 in 0.15-20 keV range by spinning rocket-borne detector, noting interstellar absorption 21 p3872 A70-40664

Cosmic gamma radiation from pulsars, examining atmospheric Cerenkov light generated by energetic particle showers 21 p3874 A70-40676

Magnetic field lower limit in Crab Nebula from cosmic gamma ray studies using optical reflector to detect atmospheric Cerenkov radiation 21 p3875 A70-40684

Diffuse cosmic X rays, discussing energy spectrum and contribution of galactic integration 21 p3875 A70-40686

Diffuse background cosmic X rays in energy range 20-120 kev from balloon observations 21 p3876 A70-40689

Low energy diffuse cosmic X radiation flux comparison with power law spectrum, observing asymmetry with respect to galactic latitude 21 p3876 A70-40692

Cosmic X ray background measurements at 25-200 keV onboard ESRO Skylark rocket, plotting results against galactic latitude 21 p3876 A70-40695

Omnidirectional cosmic gamma ray flux near one MeV observed by ERS-18 satellite, plotting spectral energy distribution 21 p3876 A70-40697

Extragalactic cosmic X ray background source models for intensity and energy spectrum, noting Compton scattering of black body photons by relativistic electrons 21 p3877 A70-40699

Innerbremsstrahlung of intergalactic protons colliding with electrons as source of cosmic background X rays, interpreting intensity and energy spectrum 21 p3877 A70-40700

Background gamma ray observations attributed to decay of pi-mesons produced by extragalactic cosmic ray protons collisions, noting radiation sources age 21 p3877 A70-40703

Diffuse X rays from nonthermal intergalactic bremsstrahlung, discussing cosmic ray injection models 21 p3878 A70-40705

Solar wind X ray emission, investigating diffused cosmic ray origin and flow pattern models 21 p3878 A70-40708

Low energy cosmic ray positrons arising from Co decay in Ni 56-Co 56-Fe 56 reaction chain in supernova Si burning shells 21 p3879 A70-40927

Ionospheric D region electron production by cosmic X rays, noting Lyman radiation effects 21 p3882 A70-41099

Multiplicity recorder for cosmic rays neutron component studies, reducing star redistribution errors by coincidence effect compensation 21 p3882 A70-41277

Balloon-borne monkeys possible brain damage due to cosmic rays, discussing thindown tracks and acute vasculitis 21 p3764 A70-41476

Apollo 11 lunar rocks and fines cosmic ray produced radioisotopes, considering surface exposure to high energy component flux 21 p3906 A70-41562

Tritium and Ar radioactivities attributable to galactic and solar cosmic ray interactions in Apollo 11 lunar rocks and soil 21 p3906 A70-41564

Cosmic ray exposure age of lunar surface material by radioactive isotopes Ar 37 and 39 measurement, investigating temperature dependence 21 p3909 A70-41607

Nuclear particle tracks in Apollo 11 samples due to galactic cosmic rays and solar flares relationship to dynamic surface processes 21 p3914 A70-41648

Apollo 11 bulk and core tube fines and rock cosmic ray tracks, discussing material history and corpuscular radiation flux and energy spectra near moon 21 p3916 A70-41667

Fe-group cosmic ray exposure tracks in Apollo 11 lunar rock interior, erosion rate and solar flare paleontology 21 p3917 A70-41673

Galactic evolution and secular variations of cosmic rays, magnetic fields and turbulence, assuming stellar birth rate dependence on gas density and temperature 21 p3919 A70-41700

Cosmic ray signal anisotropy around 0900 h sidereal time and 30-60 degree declination, investigating muon events in liquid scintillator 21 p3882 A70-41994

Cosmic ray energy loss in interplanetary medium, discussing solar wind effects on low energy particles 21 p3883 A70-42111

Cosmic X ray extinction and halo by interstellar grains, applying to light elements identification 21 p3883 A70-42200

High energy neutrinos generated by cosmic ray interactions with earth atmosphere, discussing detection, plotted energy spectrum and underground muons 22 p4093 A70-42310

Galactic soft X ray and subcosmic ray heating and ionizing of interstellar H I regions 22 p4094 A70-42985

Combined space and nuclear radiation effects in manned space flight 22 p3978 A70-43184

Anomalous angular distribution and inelastic cross section of muon-nucleon interaction for penetrating underground cosmic ray particles 22 p4095 A70-43232

Cosmic rays galactic propagation and confinement, discussing matter and star distributions, magnetic fields, positron flux and energy spectrum, etc 22 p4096 A70-43396

Cosmic ray research role in high energy physics, discussing elementary particle interactions 22 p4096 A70-43398

Scale invariance models correlation with cosmic ray data, comparing neutrino- and antineutrino- nucleon scattering 23 p4210 A70-43800

Outer space galactic cosmic rays energy spectrum and modulation region boundary determination, using meteorite observations 23 p4236 A70-44050

Interplanetary magnetic field inhomogeneities structure from galactic cosmic rays intensity fluctuations observation 23 p4237 A70-44053

Cosmic ray 11-year variation pattern change in 19th and 20th solar activity cycles determined by latitude expeditions spectrum analysis 23 p4237 A70-44071

Pioneer 8 and 9 cosmic ray detector system, discussing mechanical, electrical and data conditioning properties 23 p4195 A70-44300

Cosmic X ray sources astronomical observations and implications, considering Crab Nebula, galaxies, constellations, diffuse background radiation, etc 23 p4243 A70-44415

High Energy Astronomy Observatory for space X rays, gamma and cosmic rays research via unmanned spacecraft 23 p4261 A70-44680

Nike-Apache rocket aurora probes using proton detector to measure galactic cosmic ray intensity and relativistic electrons 23 p4192 A70-44879

Cosmic ray events angular distribution from scaling hypothesis 23 p4238 A70-44894

Light flashes observed by Apollo astronauts, proposing Cerenkov radiation or direct excitation of eye retina by cosmic rays 24 p4307 A70-45403

Relativistic cosmic ray LH nuclei abundance via Cerenkov scintillator telescope on polar orbiting OV1-10 satellite 24 p4397 A70-45522

Spallation limits on low energy cosmic and nuclear gamma rays interstellar fluxes, evaluating fast particle effects on interstellar medium 24 p4397 A70-45758

Cosmic ray electrons solar modulation, considering diffusion-convection theory 24 p4397 A70-45769

Excess galactic X rays, discussing synchrotron emission of high energy cosmic ray electrons 24 p4398 A70-46161

High energy electron proton and heavy nuclei absorption in pulsar vicinity, discussing implications for cosmic rays 24 p4398 A70-46170

Cosmic ray energy spectrum in absence of solar activity from eleven year ray variations, noting coincidence with galactic rays 24 p4398 A70-46279

European Space Research and Technology Center space science department, examining cosmic ray, ionospheric and surface physics divisions 24 p4323 A70-46356

COSMOGONY COSMOLOGY

Re 187 to Os 187 nuclear decay rate variability, discussing earth age, temperature and ionization effects 01 p0178 A70-10349

Einstein equations for Bianchi type IX universe model suitable for numerical solution and application to cosmology with pure fluid stress tensor 01 p0142 A70-10522

Coriolis effects in spherical Einstein universe perturbed by rigid body rotation of shell with finite thickness 01 p0186 A70-11272

Einstein-Friedman cosmology of vanishing constants assumed in deducing relations between antipodal radio sources red shifts and universe parameters

01 p0187 A70-12174

Finite rotating universe model construction not possessing Goedel cosmos pathological properties, discussing relation to Mach principle

01 p0191 A70-11358

Lemaître universe and galaxy formation effect on stability of quasi-static epoch, deriving limits for red shift, cosmic ray and electromagnetic fluxes

02 p0363 A70-11779

Universe oscillating closed model dynamics emphasizing conditions of collapse by contraction in terms of relativity theory

02 p0370 A70-12114

Particle-antiparticle creation in galactic nuclei, expelling particles while retaining antiparticles

02 p0371 A70-12195

Symmetric cosmologies within gamma ray measurement context showing antimatter limits in Milky Way and metagalaxy

02 p0371 A70-12196

Radio source ghost images in Lemaître cosmological models, deriving luminosity functions and radio source ages

02 p0371 A70-12198

Soviet papers on universe evolution covering interstellar structure, stellar evolution, multiple galaxies, galactic nuclei, etc

03 p0562 A70-12976

Magnetic cosmological nonuniformity hypothesis leading to galaxies and clusters isolation

03 p0564 A70-13224

Lagrangian gravitational field density related to contraction to expansion transition in terms of cosmological model, discussing quadratic corrections and singularity

03 p0524 A70-13412

Astronomical and space research methods probing fundamental questions concerning universe unsolvable by classical astronomy, discussing solar wind and stellar formation and evolution

03 p0571 A70-13790

Protogalaxy formation and molecular processes in primeval hydrogen gas, discussing cold gas cloud cooling mechanism and contraction

03 p0577 A70-14153

Brans-Dicke cosmological gravitational instability using Lagrangian gage for galaxy formation, discussing density contrast growth in time

03 p0577 A70-14154

Cosmochemistry, discussing interdisciplinary nature, goals, nuclear roots, information sources, key concepts involving elements age and origin, nuclear species abundances, chemical fractionation, etc

03 p0578 A70-14346

Protogalaxy mass limits determined for galactic formation by thermal instability due to radiative cooling and followed by nonlinear gravitational contraction

04 p0744 A70-14469

Double galaxy systems hypothesis with tidal interaction, presenting data from galaxy internal motion studies

04 p0747 A70-14519

Angular diameter data from Cambridge radio telescope for sources with different flux densities for cosmological models red shift tests

04 p0757 A70-15691

Elliptical cosmology, discussing evolutionary geometry, Synge distribution, galactic age and distance from earth, Friedman equations and independence of constants

05 p0905 A70-15794

Primordial cosmic ray sources evidence suggesting galaxies and quasars in initial stages of formation

05 p0897 A70-15921

Local theory alternative to cosmological quasar origin theories, considering red shifts properties

05 p0913 A70-16473

Coordinate system for synthesizing previous work on multifluid cosmologies, investigating noninteracting mixtures of multicomponent fluids

05 p0919 A70-16933

Einstein field equations based on variational principle applied to stability of general self gravitating relativistic gaseous mass obeying specific equation of state

06 p1138 A70-17304

Observation operators and cosmology, constructing equations for cosmological aggregates governed by Einstein field equations

06 p1105 A70-17529

Cosmic ray triggering of solar system formation by ionizing in solar disk

06 p1135 A70-17539

Cosmological theories taking into consideration gravitational collapse, discussing pulsars, quasars and X ray stars evolution

06 p1140 A70-17584

Cosmic evolution of radio sources, discussing observations and data interpretation

07 p1374 A70-18746

Galaxies statistical distribution studied to determine superclusters existence, correlating results with random distribution expectations

07 p1375 A70-18868

Galactic clusters analyzed for identifying possible relationship between cluster configuration, type of component galaxies and radio emission

07 p1376 A70-18907

Distance between objects in Friedman cosmological model determined on basis of red shift, determining relationship between observed and emitted wavelengths

07 p1377 A70-18945

Monograph on relativistic and steady state cosmology covering optical and radio astronomy, matter and galaxies origin, etc

07 p1379 A70-19101

General relativity taking into account astronomical and laboratory tests, cosmology and theoretical studies /1967 to 1969/

07 p1334 A70-19102

Observational extragalactic dependences obtained within framework of Friedman universe model with matter and neutrino background

07 p1383 A70-19407

Circular and radial trajectories in Schwarzschild field applied to isolated metagalaxy with charged central body and nonzero cosmological constant

07 p1385 A70-19426

Radiation catastrophe in universe in terms of cosmological models

07 p1368 A70-19628

Book on cosmic electrodynamics covering cosmic plasmas, sun and solar activity, interplanetary medium and geomagnetic cavity, magnetosphere, geomagnetic disturbance, radiation belt, etc

07 p1387 A70-19667

Signal reception possibly due to gravitational radiation of cosmic origin, estimating energy

07 p1387 A70-19699

Hamiltonian methods applied to homogeneous cosmological models, obtaining Einstein equations, passing to quantum theory by imposing canonical commutation relations

07 p1336 A70-19921

Singularity for absolute zero of time suggested for beginning of universe by Einstein relativity theory

07 p1336 A70-19922

Cosmological gravitation theory for uniformly expanding universe model providing fundamental reference frame and acceleration field

08 p1563 A70-20497

Age dating of earth and universe emphasizing methods based on radioactivity, discussing stellar evolution, galactic age and assessment of cosmic time

08 p1568 A70-20633

Soviet monograph on preplanetary cloud evolution and earth and planet formation covering convection, turbulence, gravitational instability and distribution function of bodies by size

08 p1568 A70-20725

Space-time singularities of gravitational collapse and cosmology indicated by timelike or null geodesic incompleteness

08 p1575 A70-21353

Mathematical model for finite-density nonhomogeneous Newtonian cosmologies, approximating solutions using coupled Vlasov-Poisson equations

08 p1581 A70-21740

Hubble expansion constant and expansion deceleration value roles in cosmological model testing

08 p1581 A70-21752

Cosmic ray origin models, considering universal and local metagalactic models and halo and disk galactic models

09 p1744 A70-22057

Observational verification of cosmological models by examination of red shift discretization in quasars

09 p1750 A70-22098

Neutrinos kinetic theory for anisotropic cosmological models

09 p1753 A70-22453

Gravitating bodies quasi-stationary rotating systems, giving equations of state and evolution

09 p1753 A70-22457

Cosmological solutions of Jordan-Dicke relativistic scalar-tensor theory, giving qualitative analysis of homogeneous isotropic problem at zero pressure

09 p1754 A70-22459

Orthodox cosmology validity, considering density-radius relation for stellar and galactic systems and Charlier hierarchical models

09 p1762 A70-23068

Static gravitation field of spherical mass immersed in cosmological gas, using combined model of Einstein and de Sitter static universes and Schwarzschild solutions

09 p1763 A70-23312

Instability of Godel rotating universe, discussing stability to perturbations in rotation plane and unstable density perturbations along rotation axis

10 p1937 A70-23973

Gravitational instability theory for large density perturbations growth during expansion of matter without pressure

10 p1945 A70-24961

Homogeneous open anisotropic relativistic world model with negative space curvature, observing shear decrease with time and magnitude reciprocal variation with function R/t

11 p2109 A70-25866

Energy concept in cosmology based on relativistic considerations, indicating universal time by synchronous clocks system

11 p2109 A70-25870

Milne special relativistic cosmology consistency with Birkhoff flat space gravitation theory, calculating red shift correction in galactic light

11 p2114 A70-26549

Hyperbolic velocity space physical significance based on cosmological model of light propagation associated with uniformly expanding universe

11 p2114 A70-26551

Evolutionary cosmological models for radio sources at large red shifts, considering source counts, luminosity functions, etc

11 p2117 A70-26655

Isotropic cosmic background radiation detection in presence of earth and galactic radiation, discussing influence on steady state cosmology

11 p2106 A70-26673

High energy break in isotropic gamma ray spectrum predicted from critical test of cosmological pion-decay hypothesis

11 p2106 A70-26844

Iconoclastic cosmology and remote sensing of universe, discussing cosmic scale photometry and extra-galactic red shift spectroscopy

12 p2296 A70-26924

Observational cosmology, discussing aspects of radio source and quasar counts, intergalactic medium and cosmic black body radiation

12 p2298 A70-27061

Singular and nonsingular cosmological models validity for general relativity allowing for cosmic dust

12 p2300 A70-27394

Cosmology theory, models, relativistic and Newtonian cosmology relations, Hubble diagram for cluster galaxies and radio source and quasar distribution

12 p2302 A70-27582

Cosmic rays origin, discussing choice between galactic halo and radio disk models for trapping region

12 p2295 A70-27883

Primordial radiation spectrum, discussing possible distortions due to energy injection before and after recombination

12 p2308 A70-27886

Condensed products of vaporized primordial terrestrial material accounting for moon formation, using single stage precipitation earth origin hypothesis

13 p2488 A70-28719

Soviet monograph on minor planets origin and physical nature, considering orbits, investigative techniques, etc

13 p2488 A70-28800

Cosmological constant role in closed universes with matter and radiation

13 p2490 A70-28936

Closed universe classical and quantum dynamics by ADM Hamiltonian treatment of Einstein equations for homogeneous cosmological models

13 p2495 A70-29812

Microscopic particle mass spectra in six dimensional scalar, spinor and vector fields, noting cosmological implications and eight dimensional theory

14 p2616 A70-30342

Nuclear reactions and elementary particle reactions in Friedman universe with positive lepton abundance and degenerate electrons, discussing prestellar helium synthesis

14 p2620 A70-30877

Adiabatic relation between initial plasma density perturbations and radiation temperature fluctuations during galaxies formation, discussing relic radiation fluctuations

14 p2632 A70-31286

Hot universe model for demonstrating distortions in Rayleigh-Jeans region of microwave relic radiation spectrum by primeval plasma heating before recombination epoch

14 p2632 A70-31287

Intergalactic medium lukewarm models, considering physical state, cosmic photon spectrum and isothermal and adiabatic expansion

14 p2651 A70-31291

Galactic spiral structure effects on residual stellar velocities local distributions

14 p2652 A70-31380

Dynamic spectrum of density fluctuations and galaxy clustering in Einstein universe, considering self gravitation of medium

14 p2652 A70-31389

Cosmogonic phenomena instability, discussing red shift, expanding universe, galactic nuclei and quasars

15 p2800 A70-32144

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions

15 p2801 A70-32478

Entropy increase, discussing universe heat death, earth energy balance, etc

15 p2809 A70-32907

Equations of motion and continuity for early and later stages of expanding universe, explaining matter concentration process of galaxy formation

16 p2976 A70-33783

Galactic composition differences, considering stellar and galactic nucleosynthesis

16 p2976 A70-33791

Cosmic time varying gravitational constant effects on stellar age determination

16 p2978 A70-33966

Model classification for relativistic universes containing noninteracting matter and radiation by cosmological constant and density parameters

16 p2979 A70-34190

Maxwell equations and equations of massive-vector-meson fields in spatially homogeneous Bianchi cosmologies, obtaining formula for homogeneous EM field

17 p3156 A70-34827

Anisotropic multifluid cosmological models with orthogonal velocity fields

17 p3157 A70-34839

Galactic evolution, reviewing Hubble theory of distances and red shift, Friedman model of expanding universe, big bang model, etc

17 p3168 A70-35328

Globular cluster stars, discussing cosmological importance, stellar development models, main sequence stars, red giant models, He content, age computation, etc

17 p3171 A70-35447

Gaseous disk in equatorial plane of solar nebula, determining dimensions from accretional theory for planets formation

17 p3172 A70-35584

Uniform model universes containing gaseous matter and background blackbody radiation, solving Einstein equations without zero pressure assumption

18 p3313 A70-36215

Cyclic models of evolving universe corresponding to positive, negative or zero cosmological constant

18 p3314 A70-36421

Vacuum-like state of physical medium as initial state of Friedmann cosmology, noting fluctuation instability for conversion into ordinary matter

18 p3315 A70-36643

Log S /flux-log Z /redshift/ diagram for radio galaxies, encouraging steady state cosmology

18 p3320 A70-37074

Cosmological models with matter and radiation for evolution of universe

18 p3322 A70-37132

Galaxies pairs motions, considering disintegrating, rotational and oscillatory types for comparison with observational data

18 p3322 A70-37133

Spiral galaxies structure, considering maintenance problem and effect of possible gas inflow from intergalactic space

18 p3326 A70-37152

Antimatter distribution in universe, investigating mass lower limit

19 p3518 A70-38025

Cosmic rays relationship to cosmological parameters and galactic radiation source evolution

19 p3511 A70-38160

Galactic nuclei activity effect on galactic evolution and cosmology, discussing stellar and gaseous components

20 p3707 A70-39938

Quasar red shift apparent magnitude data analysis, estimating deceleration parameter of universe

20 p3709 A70-40076

Time travel and cosmological model based on Einstein relativity theory, considering hypothetical motor design, energy supply, tachyons and four dimensional orbits implications

20 p3710 A70-40132

Radio source counts from Ohio State University observations, noting faint sources decrease relative to uniform Euclidean universe

20 p3713 A70-40427

Universe homogeneous isotropic model with thermal radiation at outset, considering nucleons and antinucleons interactions

21 p3884 A70-40910

Universe density estimation by galaxy formation theory, discussing spiral galaxies intergalactic gas thermal radiation and soft X rays

21 p3887 A70-41113

Friedmann universe evolution after big bang via Hagedorn hadronic equation of state, noting primordial He abundance criterion

21 p3888 A70-41122

Cosmic evolution of radio sources, discussing observations and data interpretation

21 p3890 A70-41171

Radio source count formula in zero pressure model universe for background radiation differential density evolution function

21 p3923 A70-42104

Extragalactic radio source count interpretation of cosmological model and evolution, discussing luminosity, electron scattering and red shifts effects

21 p3923 A70-42105

Mass spectrometer and high voltage converter powering electrostatic plasma and solar wind analyzer for cosmic space studies on Sputnik 3 and Heos A satellites

22 p4025 A70-42312

Lunar origin by capture, discussing moon orbit evolution, thermal history and surface features, earth evolution and tidal interactions

22 p4098 A70-42550

Einstein gravitational equations solution for expanding universe, discussing possible sudden collapse into zero volume with infinite density

22 p4105 A70-43215

De Sitter nonempty static cosmological model, examining possibility by comparing integral luminosity function for cosmic radio sources to radio galaxies statistics

22 p4106 A70-43258

Universe cold matter structure and distribution from far IR data

22 p4096 A70-43395

Newtonian hydrodynamic analogies for homogeneous anisotropic models in general relativity

22 p4075 A70-43472

Gravitational equations with oscillatory physical singularity, noting Bianchi type IX homogeneous metric

22 p4063 A70-43477

Metric evolution in oscillatory mode of approach to singularity in homogeneous cosmological models in asymptotic region, showing Kasner epoch dependence on perturbation

22 p4075 A70-43478

Friedman-Lemaître model role in big bang cosmology

23 p4238 A70-43812

Optical point characteristics of static spherically symmetric space-times of de Sitter universe, Einstein universe and exterior Schwarzschild field

23 p4239 A70-43821

Stellar associations formation theory including effects of radiation, Rayleigh-Taylor instability and interstellar gas cold regions

23 p4239 A70-43903

Einstein field equations for spatially homogeneous spaces, considering rotating matter model in regularized Euler-Lagrange form

23 p4219 A70-44406

Neutrino processes in lepton era as primeval fireball relic, discussing coupling constant for muon-electron neutrinos interactions

23 p4253 A70-44849

Extragalactic astronomy research covering quasars, Seyfert and related galaxies, cosmology, Magellanic Clouds, supernovae, etc

23 p4256 A70-45040

Primeval cosmic magnetic fields origin, discussing galactic fields and limits on present intergalactic field

24 p4403 A70-45396

Big bang temperature problem, discussing galactic masses determination possibility by gravity-strong interactions interplay in early stages

24 p4403 A70-45402

Nonlinear Lagrangians in relativistic cosmology of open oscillating world model

24 p4404 A70-45409

COSMONAUTS

Soviet book on survival in space covering astronauts training, behavior, impressions, performance, etc, with historical considerations

01 p0033 A70-10493

COSMOS SATELLITES

NT COSMOS 110 SATELLITE

NT COSMOS 149 SATELLITE

COSMOS SATELLITES

NT COSMOS 4 SATELLITE

NT COSMOS 44 SATELLITE

NT COSMOS 110 SATELLITE

NT COSMOS 149 SATELLITE

Solar X ray flare regions size, structure and localization from Cosmos 166 and 230 heliograph observations

01 p0168 A70-10252

Fast charged particles measurements by Cerenkov counter in Cosmos 137 satellite, noting hard electron flux and cosmic ray radiation spectrum

01 p0172 A70-11509

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213

04 p0685 A70-14443

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose

05 p0851 A70-16733

Neutron flux measurements on Cosmos 53, equipment and calculation of secondary neutrons due to bombardment of satellite components

05 p0905 A70-17112

Satellite recording of electron-positron annihilation gamma emission on Cosmos 135 artificial earth satellite relating to meteors antimatter nature

07 p1371 A70-20334

Geoactive low energy particles and fresh photoelectrons interactions with upper atmosphere observed by satellite Cosmos 261

08 p1492 A70-21796

Intercosmos 2 equipment for measurement of positive ion concentration, electron temperature and energy distribution, electron concentration between satellite and ground reception points, etc

12 p2207 A70-27500

Superconducting magnetic system in magnetic analyzer of positrons and electrons in primary cosmic radiation tested on board Cosmos 213

13 p2403 A70-28468

Soviet lunar and interplanetary space missions during 1969 including Venera, Cosmos, Luna and Meteor satellite activities

13 p2505 A70-28901

Nonrecoverable Cosmos satellites lifetimes comparison with last stage rockets

14 p2638 A70-30690

Intercosmos 1 satellite for observing solar UV and X-ray emission in solar flares prediction

15 p2738 A70-32145

Night sky brightness in UV and visible region by photoelectric photometers on Cosmos 51 and 213 satellites

17 p3163 A70-34901

Earth radiation measurement at 10-12 microns by Cosmos 243 satellite-borne radiometer, comparing temperatures for boundary air layers in cloudless conditions

18 p3247 A70-36630

Proton magnetometer measurements from satellite Cosmos 49, observing residual and broad magnetic anomalies

18 p3248 A70-36770

High energy primary gamma quanta intensity limits from Proton-2 and Cosmos-208 measurements

19 p3502 A70-38092

Automatic control of Cosmos spacecraft docking maneuvers in two successive encounter phases

23 p4264 A70-45016

COSMOS 5 SATELLITE

Molecular ion concentrations, using flat probe collector trap on Cosmos 5 satellite at 200-300 km

07 p1276 A70-20421

COSMOS 44 SATELLITE

Cosmos 44 quasi-draconic period analytical and graphical determination, comparing moments of meridian intersection with INTEROBS observations

02 p0363 A70-11767

COSMOS 110 SATELLITE

Cosmos 110 satellite experiments concerning radiation effects on lysogenic bacteria and plants

23 p4149 A70-45030

COSMOS 137 SATELLITE

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data

11 p2106 A70-26786

COSMOS 149 SATELLITE

Cosmos 149 meteorological satellite telephotometer, radiometer and other electronic equipment for measuring atmosphere and underlying surfaces physical parameters

01 p0095 A70-11611

Cosmos 149 meteorological satellite telephotometers for measuring reflected solar radiation from earth

01 p0095 A70-11612

COSPAR [COMMITTEE]

U COMMITTEE ON SPACE RESEARCH

COSERAT SURFACES

Cosserat spectrum elastic theory, considering static problems

20 p3726 A70-39876

Sound velocity in isotropic nonlinear elastic Cosserat continuum with constrained particle rotation, analyzing uniaxial and hydrostatic compression

20 p3734 A70-40434

Elastic stability theory Cosserat surface subjected to conservative nongyroscopic surface and edge loading

21 p3939 A70-42027

Cosserat elasticity constitutive equations, coupling rotation vectors to eliminate stress indeterminacies

21 p3941 A70-42251

Stress fields of screw and edge dislocations in linearly elastic isotropic Cosserat continuum using stress functions

23 p4266 A70-44022

COST ANALYSIS

Integrated logistic support for cost effectiveness of ground communication system

01 p0220 A70-10114

Cost effectiveness tradeoff analysis for reliability incentive contracts, evaluating customer requirements for military procurement

01 p0220 A70-10115

Differences in aircraft operating costs, performance characteristics and demand for aircraft by domestic trunk airlines /1932-1965/
[AIAA PAPER 69-1059] 01 p0005 A70-10637

Availability model for system with exponential reliability function and constant repair time, determining start-up costs, cost-optimal mean up and down time, etc
01 p0221 A70-11382

Cost effectiveness analysis applicable to DOD military system selection and acquisition, using model to study airborne electronics subsystem
02 p0401 A70-11673

Cost model based on initial and support costs for studying availability variations effect on system total cost and maintainability and reliability interrelationship
02 p0401 A70-11674

Air cargo transport development and organization trends, considering cost and aircraft types
02 p0401 A70-11736

Cost effective phased buildup of computerized ATC systems
02 p0401 A70-11961

Associative processor with content addressability and simultaneous arithmetic capability to circumvent speed restriction, comparing performance and cost with conventional digital computer
02 p0265 A70-12186

Solar electric propulsion /SEP/ for automated planetary missions, discussing system characteristics, capabilities and costs
[AIAA PAPER 69-1103] 02 p0382 A70-12531

Incremental profit and total airline profit model programs for air cargo systems
[SAE PAPER 690413] 03 p0411 A70-12899

Event probability and cost effects on performance in continuous motor task
03 p0436 A70-13771

R and D effect on aircraft engine business, considering aircraft operating cost, funds allocation, etc
04 p0787 A70-14390

Parametric performance and cost comparison of separate and integral vehicle concepts for manned space activity using payload criterion
04 p0763 A70-15420

Integrated logistic support economics considered in selecting support system for generating quantitative data for cost optimization
[SAE PAPER 690632] 05 p0959 A70-15846

Cost/schedule planning and control system /C/SPCS/ providing early exposure of inadequacies in work execution and initial planning
05 p0959 A70-16461

Aircraft transport tariffs used to determine economic approach to design
07 p1426 A70-18841

Research diets cost analysis including labor, ingredients, preparation and storage
07 p1217 A70-18949

Launch vehicle minimum cost design emphasizing flight vehicle evolution stages via effect on costs
[AIAA PAPER 70-240] 07 p1396 A70-20378

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc
[AIAA PAPER 70-239] 07 p1396 A70-20379

Reusable air breathing launch vehicle for earth orbit shuttle, comparing performance, costs and operation with rocket powered systems
[AIAA PAPER 70-270] 07 p1396 A70-20381

Ground and onboard electronics systems for space shuttle vehicles, discussing role in equipment reliability and maintainability, life cycle costs, management control, etc
[AIAA PAPER 70-261] 07 p1396 A70-20391

Space transportation system objectives including design, operations and economics
[AIAA PAPER 70-263] 07 p1398 A70-20393

Unmanned and manned interorbital shuttle systems for satellite placement and repair and planetary spacecraft insertion, emphasizing cost analysis
[AIAA PAPER 70-267] 07 p1398 A70-20396

Optimal distance between satellite communication system ground stations for surface network cost equivalent, analyzing economic efficiency for various cases
08 p1456 A70-20569

Tandem link multichannel LOS FDM-FM communication system cost optimization by computer-aided design
08 p1459 A70-20798

Alternative equipment maintenance procedures costs by combined discrete event and continuous system simulation, discussing additional model applications
08 p1466 A70-20927

GPSS simulation for airport capacity, analyzing aircraft ground traffic flow characteristics and developing expansion schemes minimizing investment
08 p1481 A70-20929

Economic and social benefits from weather forecasting developments, noting expenditures on satellites and high speed computers
08 p1539 A70-21826

One dimensional Poisson production process under costly surveillance, considering maximum attainable income rate approximation
09 p1653 A70-22347

Earth Resources Satellite Information Systems, discussing NASA Space Application Program relation to national goals, federal spending, cost effectiveness analysis, information sales, etc
[AIAA PAPER 70-333] 09 p1793 A70-22860

Earth resources sensor integration into satellite or aircraft, discussing cost effectiveness
[AIAA PAPER 70-316] 09 p1677 A70-22871

Certification process for supersonic transports taking into account safety and economic considerations
09 p1610 A70-22949

Preamplifier-discriminator-gate generator in printed circuit for use with photomultipliers, noting pulse sensitivity and cost
09 p1679 A70-22997

Fighter flight control design criteria for providing maximum combat effectiveness, safety and survivability without excessive cost or risk
[AIAA PAPER 70-515] 09 p1611 A70-23021

Demand assignment /DAMA/ and preassignment /PAMA/ Multiple Access Systems mix for cost minimization, developing algorithm for satellite high usage groups and overflow facilities
10 p1838 A70-24357

Cost analysis for satellite data system determined for bit rates range and break-even distances
10 p1838 A70-24361

Cost and deadline planning for system development, suggesting theoretical methods tests regarding applicability
10 p1971 A70-24597

Test program effectiveness for Saturn Instrument Unit /IU/, summarizing objectives, costs and results
[AIAA PAPER 70-379] 10 p1891 A70-24924

Cost-property index /B/P/ to compare economic success of composites, metals, glass and ceramics for load bearing applications
11 p2136 A70-26077

Algorithm for infinite dimensional optimal control problems associated with maximum deviation cost functionals distributed systems
11 p2073 A70-26234

Low cost launch and reentry vehicles, surveying technology and economics of spacecraft
11 p2126 A70-26286

Channel assignment, considering low cost solution and co-channel interference
11 p2010 A70-26310

Aircraft turbojet and turbofan engines cost correlation to performance statistically analyzed in terms of various parameters
[SAE PAPER 700270] 12 p2335 A70-27437

Optimal singular controls made nonsingular for decreasing epsilon values by adding integral quadratic functional of control to cost functional
13 p2382 A70-29066

Performance cost functions for reaction-jet controlled spacecraft during on-off-on limit cycle
13 p2382 A70-29072

Reliability guarantee vs cost of capital, analyzing contract compliance delay and discounted penalty expenditures
13 p2525 A70-29570

Air navigation and control systems cost-benefit analysis including ground services, safety and R and D
14 p2667 A70-30103

Guidance system cost and reliability by Monte Carlo analysis of failure statistics
14 p2614 A70-30462

Aircraft manufacturing market research including cost compatibility with resources and capabilities
14 p2668 A70-30937

Civil aircraft design optimization, considering operating and seat mile costs, speed, wing and fuselage, engine location, etc
14 p2531 A70-30941

Designer and operator influence on total aircraft operating costs
14 p2669 A70-30942

Design costs for large subsonic transport engines in terms of size, engine ratings and community noise
14 p2629 A70-30944

Airliner fuselage shape design and effect on manufacturing and flight operation economics
14 p2532 A70-31369

Dynamical systems optimal control approximation without solving differential equations, considering linear systems with quadratic cost functional
14 p2562 A70-31411

Automatic optimal discrete time control for linear distributed parameter systems with quadratic cost function
14 p2562 A70-31412

Filament winding reinforcement and resin noting production equipment and costs
15 p2744 A70-31932

Computer program /SORCBE/ for systems unavailability tradeoff vs added cost for various versions
15 p2706 A70-32658

Maintenance vs redundancy for manned space station economy, considering costing structure and time increase for maintenance
15 p2713 A70-32666

Twin jet light transport Corvette airframe, discussing flight characteristics and economical aspects
15 p2676 A70-32793

Aerospace program oriented language /APOL/ requirements for flight programs, discussing cost, design and applicability
16 p2868 A70-33431

Axial flow multistage turbines performance, examining profile manufacturing tolerances effects on cost
16 p2970 A70-33677

Low cost headup displays /HUD/ for pilot error reduction during takeoff, approach and landing, discussing displayed functions vs cost tradeoffs
16 p2911 A70-33818

Polish Lot airline long haul air transportation cost analysis
17 p3199 A70-34689

Long haul air transportation profitability based on Polish Lot airline ton passenger-km computation comparison
17 p3199 A70-34691

Experiment space module combined with space station and serviced by shuttle for low total cost and maximum flexibility in funding and scheduling
[AAS PAPER 70-034] 17 p3175 A70-34777

Configurational and operational characteristics for space shuttle design, considering economic tradeoffs between expendable and reusable systems
[AIAA PAPER 70-045] 17 p3175 A70-34783

Performance cost functions of on-off limit cycle controllers for reaction jet controlled system
17 p3056 A70-35552

Unmanned and manned interorbital shuttle systems for satellites placement and repair and planetary spacecraft insertion, emphasizing cost analysis
[AIAA PAPER 70-267] 17 p3172 A70-35650

Small earth stations to link isolated areas with Intelsat network, discussing costs
18 p3229 A70-36957

System with N independently failing subsystems minimum cost solution mathematical model based on opportunistic preventive replacement policy
19 p3437 A70-38400

Optimum reliability level in terms of economic benefits and external constraints
19 p3554 A70-38595

Economics of reliability relating risks of failure and cost of failure prevention
19 p3555 A70-38841

Boeing 747, L-1011 and DC-10 introduction costs, profits and terminal facilities
19 p3357 A70-38951

Space shuttle design, considering costs, boosters, payloads and orbits
20 p3716 A70-39795

Technological and economic problems of reusable aeroballistic and ballistic launch vehicles
20 p3562 A70-40150

Weight/cost systems engineering, discussing techniques for using historical data banks and standardized reporting procedures
[SAWE PAPER 866] 20 p3741 A70-40368

Measuring and test equipment economic approach to quality levels and accuracy ratios, deriving cost tradeoffs in optimum inspection fidelity
20 p3634 A70-40453

Optimal and conventional good control systems relationships, considering open and closed loop characteristics, cost functions, etc
21 p3926 A70-40781

Aerospace vehicles testing cost and technical analysis, discussing component failure, motivation effects, test design optimization, flight simulation, etc
[AIAA PAPER 70-239] 21 p3931 A70-41876

Control space properties of pareto-optimal and cooperative solutions for static continuous and differential games involving vector cost criteria
22 p4061 A70-42460

U.S. and European space program costs and resources with particular reference to telecommunication satellites
22 p4126 A70-43247

Long range air transport routes, predicting equipment and expenditures modifications
22 p4128 A70-43533

Space transportation systems cost comparison, taking into account national program goals and near/far orbit traffic fraction
23 p4285 A70-44511

Economic and design aspects of universal Orbit-to-Orbit Shuttle component of Space Transportation System
[SAE PAPER 700763] 24 p4416 A70-45868

Aircraft maintenance cost statistical analysis recursive regression model for aircraft failure and manhour cost data
24 p4292 A70-46125

Technological and economical characteristics of serviced and unserviced automatic hydrometeorological stations and second class nonautomatic station 24 p4340 A70-46406

COST EFFECTIVENESS

Cost effectiveness in Ti forming, discussing materials, tooling and fabrication cost ratios 10 p1970 A70-23852

Ground and flight tests in aeronautical system development process as transfer of basic technology into cost effective operational systems [AIAA PAPER 70-381] 10 p1857 A70-24172

Demand assignment economics relative to ground stations in satellite telecommunication systems 10 p1838 A70-24360

Silver cathodes and plasma-sprayed anodes for cost effective hydrogen/oxygen fuel cells with solid zirconium dioxide electrolyte, considering carbon precipitation avoidance 10 p1830 A70-24459

Integrated microwave systems development taking into account cost effectiveness and anticipating kilowatt and megawatt systems 10 p1851 A70-24880

Nonavionic Aircraft Integrated Data System configurations evaluation by computer model, showing cost effectiveness data in terms of aircraft maintenance and availability [AIAA PAPER 70-396] 10 p1808 A70-24909

Reusable ballistic orbital-global transportation systems using rocket sled-assist-takeoff compared to SST systems in terms of effectiveness and cost 11 p1222 A70-26048

Lunar and planetary exploration costs and technology, discussing role of nuclear propelled passenger vehicles 11 p2082 A70-26061

Electrochemical machining of metals with complex shapes, discussing performance capabilities and cost efficiency [ASTME PAPER MR-69-711] 12 p2239 A70-26989

Wide goods fabrication of boron composites, discussing mechanical properties and cost effectiveness [ASTME PAPER EM-69-142] 12 p2240 A70-27078

Avionics technology cost effectiveness effect on airlines and industry, considering systems engineering and specifications [SAE PAPER 700299] 12 p2335 A70-27447

Manned Mars flyby/orbiter mission, discussing cost, scientific returns, technology advances, popular support, etc 12 p2304 A70-27749

Cost effective data transmission method for high performance under intersymbol interference and noise 12 p2187 A70-27935

Cost optimal carrier rocket system for European satellite TV, communication, navigation and earth survey networks 13 p2502 A70-28448

Cost optimal booster stage for European satellite launchers, comparing liquid and solid propellant rockets 13 p2502 A70-28450

Bora-Sond rocket for cost effective upper atmospheric sounding, discussing Li-Al-O systems performance 13 p2504 A70-28684

System reliability and effectiveness - Conference, Beverly Hills, February 1969 13 p2524 A70-29564

Cost effective spares provisioning models for airline operations, minimizing availability-cost ratio for line replaceable unit and total fleet 13 p2525 A70-29571

Relative cost benefits estimation of manual and automatic test systems for avionics in maintenance organization, proposing integrated maintenance and ATC data system 13 p2525 A70-29679

Avionics on military combat-reconnaissance aircraft, discussing automatic systems testing and cost effectiveness model 13 p2380 A70-29698

Multimode system analysis, using automated technique to calculate effectiveness and cost down to component level 13 p2525 A70-29837

Incentive earnings and payments in CPIF/cost plus incentive fee/ contracts, considering legal principles 14 p2668 A70-30523

International cooperation in military aviation emphasizing cost effectiveness in R and D, production and export prospects 14 p2669 A70-30939

Apollo project overview and quality-cost effectiveness assurance requirements for future space programs 14 p2654 A70-31103

Quality control variables optimization for maximum net revenue, using computerized simulation 14 p2592 A70-31105

System effectiveness apportionment for constraints existing on accountable factors using Lagrange multiple method 14 p2669 A70-31111

Global weather forecasting network costs and benefits evaluated using mathematical criteria 14 p2670 A70-31142

Global weather prediction network economic benefits to key industries, discussing adverse weather effects on production schedules, fuel supplies, construction, harvesting, etc 14 p2610 A70-31143

Cost effective reliability prediction techniques, discussing precision gyros procurement by NASA 15 p2736 A70-31964

Space research cost effectiveness in weather forecasting, TV broadcasting, space biology and medicine, geodesy, aerial and maritime navigation, earth resources, etc 15 p2811 A70-32283

Numerically controlled /N/C/ machines reliability program based on organized failure reporting and analysis system for cost effectiveness and downtime reduction 15 p2747 A70-32635

Subcontracting for cost optimal parts screening, discussing negotiations and reliability requirements 15 p2747 A70-32651

Cost effectiveness of higher order language /HOL/ for airborne computers 16 p3003 A70-33428

Ball bearings selection criteria, analyzing cost-value tradeoffs [ASME PAPER 70-DE-48] 16 p2918 A70-33511

Space shuttle avionics cost effective design approach, discussing guidance, commonality, reliability, communications and autonomy 16 p2982 A70-33802

Aircraft utilization rate vs invested money as factor determining financial justification of corporate aircraft operations, discussing maintenance engineering 16 p2921 A70-33822

Explosively actuated /pyromechanical/, devices for spacecraft, discussing guidelines for design, testing, application and cost efficiency 16 p2963 A70-34125

Candidate products for manufacturing on space station, emphasizing liquid solid transformations, bubbles and droplets, polymerization, and cost effectiveness [AAS PAPER 70-036] 17 p3041 A70-34791

Materials selection for cost effectiveness in 1980s airframe applications [AIAA PAPER 70-870] 17 p3199 A70-34819

Cost effective reliability apportionment in spacecraft subsystems, allocating failure-risk goals by mathematical model 17 p3101 A70-35160

Space vehicle optimal design based on reliability analysis, taking into account cost of materials strength tests [JPL-TR-32-1496] 17 p3188 A70-35224

Start-stop dynamics as cost effective method for computerized testing of digital modules and subassemblies, providing static and dynamic capability 17 p3062 A70-35504

Identification-adaptive control algorithm for quadratic cost control of discrete linear systems 17 p3057 A70-35558

Subsonic aircraft size effect in conventional design, discussing increased weight increments and economic gain rate [AIAA PAPER 70-940] 17 p3021 A70-35849

Air transport operations and economics in 1970 decade, taking into account cost-revenue ratio and cost effectiveness of various aircraft 17 p3204 A70-35852

Air cargo transport growth, considering deterrents of high freight rates, ground movement time and customs clearance 17 p3204 A70-35853

Cost effective spacecraft testing in terms of statistical reliability, program effectiveness and equipment costs 19 p3554 A70-38293

Cost effectiveness methodology for space program, industry, military sector, etc 19 p3554 A70-38402

Automatic test equipment, considering capability, control and display facilities and system cost 19 p3401 A70-38542

Satellite earth resources, discussing cost benefit analysis and economics in agriculture, forestry and mapping 20 p3739 A70-39065

Cost and time optimization for complex aircraft development projects via network planning 20 p3740 A70-39644

Optimum calibration intervals determination for obtaining instrument maintenance quality level at low cost 20 p3634 A70-40452

Cost optimal space shuttle systems, discussing booster configurations, weight and performance factors, technology utilization, etc 21 p3929 A70-40984

Military program cost effectiveness and control, considering resources and products 21 p3955 A70-41173

Airborne digital computers in aircraft systems, discussing optimization, design and economic effectiveness 21 p3796 A70-41920

Nuclear electric space propulsion, emphasizing systems uncertainties and cost aspects 22 p4070 A70-43187

Space shuttle mission and economics, discussing cost effectiveness, capabilities, satellite transportation payloads and traffic forecasts 22 p4127 A70-43505

U.S. SST flight deck instrumentation and cockpit displays during flight, discussing economic analysis of operations [ICAS PAPER 70-59] 23 p4139 A70-44155

Manned space flight regenerative life support systems requirements, considering weight, volume, power, cost effectiveness and integration problems 23 p4156 A70-45023

Cost/design performance management system, noting cost reduction and avoidance needs during design definition [SAE PAPER 700772] 24 p4430 A70-45866

Automatic weather station cost effectiveness criteria based on concepts of loss and error functions 24 p4323 A70-46405

COST ESTIMATES

Cost-effective look at vacuum testing of spacecraft components, noting sensitivity prediction and thermal cycle test 01 p0055 A70-10113

Cost tradeoff analysis of electronic equipment for systems reliability design, considering component derating, redundancy and selection 01 p0049 A70-10119

STOL aircraft configurations optimization including cost effectiveness, considering propulsive lift systems [AIAA PAPER 69-1131] 01 p0162 A70-10609

TV broadcast satellite system operating with home receivers or special receivers, evaluating technological and cost factors [AIAA PAPER 68-1061] 01 p0044 A70-10831

Solid rocket engine components technologies, studying effects of cost consciousness [SAE PAPER 690702] 05 p0922 A70-15828

Manned Mars mission planning, discussing technologies and costs for planetary landing 09 p1757 A70-22676

Long range army budget forecasting model based on research projects cost distributions and parameters, describing computer program 09 p1794 A70-23415

Resource allocation model with cost-effectiveness relationship for Army long range R and D 09 p1795 A70-23417

Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number 11 p1995 A70-25345

Titan 3 launch vehicles capabilities communication satellites deployment modes, presenting cost and availability data for preliminary mission planning [AIAA PAPER 70-482] 11 p2121 A70-25451

Product oriented cost data bank for satellite system cost prediction and negotiation designed for USAF communications satellite program [AIAA PAPER 70-445] 11 p2152 A70-25477

ATC ground hardware technology implementation, considering national air space system, airports, cost estimates and capacity increase 11 p2078 A70-25722

Edwards Inquiry Report into British Civil Air Transport based on cost effective economic study, involving airlines and regulatory system 11 p2153 A70-25855

Weights, sizes and costs of nuclear and nonnuclear spacecraft power systems with reference to mission duration 11 p2082 A70-26260

Computing optimum flight profiles by Balakrishnan epsilon method, including equations of motion constraint in cost function to be minimized [AIAA PAPER 69-75] 12 p2162 A70-28088

Quality control goals for manufactured products translated into manufacturing process inspection and investment costs terms 13 p2421 A70-29675

Project cost estimate growth pressures on decision making by U.S. Air Force System Program Office director 14 p2667 A70-30521

Price estimate elements interrelationship using three dimensional matrix for computerized cost data extraction 14 p2668 A70-30524

- Deterministic model for cost effectiveness of avionics support programs based on subsystems support ability, test philosophy and test equipment design and manufacture
[AIAA PAPER 69-305] 14 p2563 A70-30857
- Microwave filters developments, performance, production and costs 14 p2559 A70-31374
- Aircraft engine production cost estimating techniques, discussing physical, thermodynamic and metallurgical characteristics
[SAE PAPER 700271] 18 p3350 A70-36818
- Project risk or cost estimation for antipollution, moon mining, tooling, burn-in test and warranties by theory of Takacs processes and correlated queues 19 p3354 A70-38598
- Aircraft manufacturing cost estimation in conceptual design phase, using structural synthesis program for cost buildup simulation
[SAE PAPER 865] 20 p3741 A70-40371
- Satellite communications system optimal parameters and efficiency dependence on working capacity, discussing economic aspects of HF sets increased number 20 p3589 A70-40457
- Worldwide common satellite network for sea and air navigation, discussing cost estimate and economics 23 p4216 A70-44608
- ### COST REDUCTION
- Beacon equipment as means of crashed or force-landed aircraft locator to increase survival possibilities and reduce search cost 01 p0035 A70-10719
- Cost reductions achieved by space payload life extension through manned maintenance and increased transportation economies via refueling and improved space propulsion 01 p0196 A70-10844
- Display console characteristics for meeting increasing applications, predicting price reduction trends, color emphasis and CRT competition as primary display component 01 p0221 A70-11286
- Integrated materiel management for systems or product costs reduction applied to high cost spares management 02 p0401 A70-11671
- AMPROD /Automated Mission Profile Design/ generating schedules for long duration missions with real cost and time savings 03 p0581 A70-14023
- European Ultra-Violet Astronomical Satellite /U-VAS/ to replace Large Astronomical satellite /LAS/ to reduce cost while maintaining scientific objectives 03 p0582 A70-14343
- Design and economic concepts of Lockheed L-1011 wide body trijets, discussing airport and airway congestion alleviation, passenger appeal, etc
[RAES PAPER 15] 04 p0623 A70-15044
- Wind tunnel testing technique innovations, reducing time and cost for low drag aircraft configurations by simultaneous force and pressure model transonic testing
[SAE PAPER 690677] 05 p0825 A70-15868
- Insulating materials and apparatus evaluation in terms of thermal capability to effect competitive cost saving 05 p0869 A70-16033
- Suboptimal control to minimize quadratic cost functional for nonlinear systems, using Taylor series representation for feedback gain matrix 06 p1025 A70-17961
- Quality control manager role in aerospace company overall cost reduction 06 p1185 A70-17987
- Apollo reliability and quality requirements, reviewing changes due to cost reductions in space program 06 p1065 A70-17988
- Integrated space program with merger of manned and automated activities for coming decade permitting costs comparable to aircraft-based scientific programs 07 p1375 A70-18872
- Launch facilities institutionalization for space shuttles launch cost minimization
[AIAA PAPER 70-244] 07 p1251 A70-20374
- Low operating cost space shuttle system for cargo and personnel transportation to earth orbiting stations involving reusable winged vehicles
[AIAA PAPER 70-242] 07 p1396 A70-20376
- Automatic test equipment programming for cost reduction by eliminating duplicated effort between manufacturers of test equipment and unit to be tested 08 p1464 A70-20658
- Computerized generation of cost optimal decision logic for malfunction analysis 08 p1470 A70-20659
- Nickel zinc secondary battery low cost and high performance in military applications, discussing maintenance and rapid recharge requirements 08 p1440 A70-20710
- Low cost programming system for gas tungsten arc welding process for Ti taper and stepped joint designs 08 p1507 A70-21484

- Engineering use of filament reinforced metal matrix composites dependent on fabrication cost reduction, consistent properties and form flexibility 08 p1509 A70-21851
- Equivalent linear programming in integer variables to solve production scheduling for N identical machines, minimizing changeover and inventory costs 10 p1895 A70-24662
- Gas tungsten arc welding application broadened by introducing controlled droplet transfer process 10 p1896 A70-25308
- Low cost lightweight flight control systems for business aircraft providing equivalent performance to larger equipment
[SAE PAPER 700213] 11 p2079 A70-25886
- Light general aviation aircraft production cost reduction, considering adhesive bonding, production certification, etc
[SAE PAPER 700242] 11 p1981 A70-25911
- Expendable propellant tanks /Tip Tank Concept/ on lifting body reusable booster operations to reduce cost for low earth orbital transport mission 11 p2122 A70-26052
- Nonzero sum differential games with cost criteria minimized by inputs control to single dynamic system, emphasizing application to economic competition 11 p2072 A70-26227
- Cooperative differential game with cost functional minimized by each player, discussing problems with linear combinations of state variables final values 11 p2073 A70-26228
- Launch vehicle first stage cost reduction, considering weight factors, mass production, recoverability, etc 11 p2126 A70-26285
- Boron epoxy composite structural parts for aerospace vehicles, discussing production times and cost reduction
[ASTME PAPER EM-69-143] 12 p2240 A70-27076
- Rotating combustion engine design offering low life cycle costs for military applications
[SAE PAPER 700273] 12 p2290 A70-27438
- Reliable and optimum cost power sources design for long life electronic digital communication equipment 12 p2166 A70-27927
- Redundancy optimization based on partial failure modes effect on system reliability to reduce cost 12 p2243 A70-28010
- Beneficial and detrimental effects of value engineering change proposals on system reliability, relating cost improvement and performance factors 13 p2524 A70-29568
- Low cost VHF and UHF navigation aids IFR procedures for low density airports
[SAE PAPER 700230] 13 p2385 A70-29607
- Low cost orbital space transportation system with shuttle service, discussing booster and configuration selections, weight, costs, etc
[AIAA PAPER 70-256] 13 p2506 A70-29615
- Man machine interface between operator and automatic testing equipment based on ergonomic design cost 13 p2360 A70-29687
- Size and cost of Al mirror IR photometric telescopes optimized for scientific information acquisition 14 p2586 A70-30896
- International airline collaboration in engineering and maintenance for savings in initial and operational costs of aircraft fleets 14 p2669 A70-30940
- Minimum cost systems engineering in aviation equipment maintenance and reliability 14 p2669 A70-30943
- Cost reduction and products reliability and quality maintenance by combining accurate cost reporting system with proper quality level control 14 p2669 A70-31108
- Commercial aircraft design evolution and trends concerning performance and operating cost reduction 14 p2532 A70-31370
- Improved standard electrical equipment components development by test by use method, reducing cost and time 15 p2828 A70-31572
- Carbon reinforcing fibers, discussing mechanical properties, production, cost reduction, etc 15 p2765 A70-32246
- Reusable ferry spacecraft program, discussing space shuttles, cost reduction and nuclear propulsion for deep space missions 15 p2791 A70-32300
- Parts standardization in military electronics industry for cost reduction and reliability, discussing design transform from software to hardware 15 p2831 A70-32632
- Aerospace compiler design for software cost reduction without affecting reliability, describing input language 16 p2868 A70-33432
- Fluidic technology for avionics systems, considering potential cost reduction and reliability improvement 16 p2843 A70-33445

- Reliability-cost model to determine optimum failure rate for minimization of systems total life cycle cost
[ASME PAPER 70-DE-43] 16 p3004 A70-33507
- Cost reduction in designing space shuttle system using reusable winged vehicles, suggesting airlines operations method
[AAS PAPER 70-043] 17 p3175 A70-34785
- Space shuttle weight, reliability and reuse cost factors, discussing Phase A ILRV project reducing cost per pound of payload to orbit
[AAS PAPER 70-046] 17 p3175 A70-34786
- Low cost earth-moon transportation system based on shuttle station mode concept
[AAS PAPER 70-058] 17 p3176 A70-34806
- Space station with shuttle and tug service, discussing reduced costs, reusability and commonality 18 p3333 A70-36318
- Worldwide communication satellite network cost optimization and application, discussing Intelsat role 18 p3228 A70-36510
- Multichip hybrid microcircuits design and construction, emphasizing reliability and cost reduction 18 p2322 A70-36759
- Military aircraft engines performance increase and cost reduction
[SAE PAPER 700272] 18 p3302 A70-36817
- Multiaircraft flight test program time compression by management techniques, discussing program length and costs 19 p3355 A70-38530
- Helicopter cost reduction by transmission overhaul frequency reduction, discussing savings with on-condition maintenance 19 p3441 A70-38824
- Microcircuit packaging /primarily hermetic/ and assembly techniques, considering cost reduction 20 p3597 A70-39443
- Nonlinear programming for minimizing inertial guidance systems costs via optimal subsystem selection 20 p3740 A70-39645
- Launch facilities institutionalization for space shuttles launch cost minimization
[AIAA PAPER 70-244] 20 p3606 A70-39697
- Liquid hydrogen balloon inflation system for use at remote locations, discussing characteristics and economy 20 p3607 A70-40086
- Air cargo terminal operations analysis, discussing manpower cost reduction 20 p3607 A70-40127
- Identification adaptive quadratic cost linear system control by mean and covariance correction algorithm 21 p3801 A70-40741
- Military and commercial aircraft maintenance costs reduction, discussing labor/material ratio, spare parts use, diagnostic systems, etc 21 p3749 A70-40750
- Cost optimal space shuttle systems, discussing booster configurations, weight and performance factors, technology utilization, etc 21 p3929 A70-40984
- Silicon solar cell specifications and cost reduction without output or reliability loss 21 p3756 A70-41008
- High strength glass for aircraft structures, discussing applications to passenger cabin windows 21 p3843 A70-41891
- Mathematical model avoiding repetitive tests costs for Nerva nuclear rocket engine 22 p4070 A70-43179
- Space shuttle for low cost transportation, discussing reusable vehicles, payload, design, orbital inclination, mission capabilities and international participation 23 p4261 A70-44676
- Low cost fabrication for solid rocket nozzles using carbon or graphite reinforcements in throat inserts
[SAE PAPER 700796] 24 p4349 A70-45897
- General aviation expansion and competitive position dependence on safety and utility improvements and simultaneous cost reductions
[AIAA PAPER 70-1220] 24 p4291 A70-45953
- ### COSTS
- NT AIRPLANE PRODUCTION COSTS
- NT FREIGHT COSTS
- NT LOW COST
- Seat capacity effect on operational costs of short/medium range high capacity A 300 B aircraft 02 p0402 A70-12368
- Optimality condition for singular control problems derived using differential dynamic programming to obtain expression for change in cost produced by control variation 09 p1653 A70-22345
- Riccati-like linear functional differential equation with quadratic cost, analyzing feedback control solution existence and uniqueness 14 p2600 A70-31204
- ### COTTON FIBERS
- Creep and recovery of polyvinyl chloride reinforced by oriented cotton fibers, considering roles of fiber density and stress magnitude 03 p0516 A70-13499

COUETTE FLOW

Heat and mass transfer in Couette flow of partially ionized symmetric diatomic gas for chemical equilibrium and chemically frozen flow cases 01 p0060 A70-10290

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects [ASME PAPER 69-LUB-25] 01 p0100 A70-10383

Dipolar fluid effect on back flow between parallel plates, considering generalized Couette flow 01 p0062 A70-10545

Thermal conditions and graph-analytic solution of laminar boundary layer combustion of disk rotating in free atmosphere and plate in Couette flow 01 p0218 A70-11017

Petrov proof of plane Couette and Poiseuille flow stability with respect to infinitesimal disturbances, rejecting validity of proof 01 p0064 A70-11071

Unsteady incompressible laminar flow under time dependent body force solved for rectangular and circular conduit and plane and cylindrical Couette flows 01 p0066 A70-11130

Statistical model of turbulent chemically reacting shear flows, analyzing wave number fluctuations effect and Couette flow 03 p0464 A70-12928

Critical thermal regimes in Couette flow, investigating temperature and velocity profiles of nonisothermal steady state Newtonian flow between two parallel plates 03 p0466 A70-13388

Torque upper bounds in Couette flow between concentric rotating cylinders, considering dissipation integral and boundary and continuity conditions validity 03 p0468 A70-13787

Torque and flow patterns in supercritical Taylor instability regime of circular Couette flow 03 p0470 A70-14235

Nonlinear rarefied Couette flow with heat transfer in polyatomic gases, using kinetic theory of gases [ASME PAPER 69-WA/HT-39] 04 p0781 A70-14803

Couette problem for Krook kinetic equation solution, considering shear stress variation at high plate velocities 04 p0672 A70-15228

Classical Couette flow for emitting and conducting gas media, discussing velocity distribution and temperature effects at LTE and non-LTE 04 p0787 A70-15675

Heat transfer in MHD Couette flow influenced by wall electrical conductances with suction 05 p0886 A70-15823

Unsteady nonlinear molecular flow problems concerning plane Couette flow, heat transfer between parallel plates and density discontinuity propagation solved by Monte Carlo method 06 p1113 A70-18321

Plane Couette flow and heat transfer between parallel plates problems treated by generalizing BGK model and applying variational principle to linearized Boltzmann equation 06 p1048 A70-18323

Plane Couette flow and heat transfer problem numerical solution, using Krook kinetic equation and Maxwell boundary condition 06 p1048 A70-18326

Time dependent stability of viscous rotational Couette flow induced by impulsively started rotating inner cylinder, using dye injection and motion pictures 07 p1255 A70-19209

Nonlinear stability of plane Couette flow, computing stream function, vorticity distribution and Reynolds stresses 07 p1255 A70-19211

Instability of plane Couette flow of three superposed layers of fluids of different viscosity between two horizontal planes 07 p1260 A70-19978

Magnetic field and conducting walls effect on laminar steady MHD Couette flow of electrically conducting incompressible viscous rarefied gas in slip regime 08 p1553 A70-21764

MHD flow between two parallel plates, noting pressure gradient and skin friction coefficient 08 p1554 A70-21774

Plane Couette flow stability numerical analysis, predicting eigenvalue behavior for arbitrary Reynolds and wave numbers 09 p1658 A70-22124

Thermal conditions and graph-analytic solution of laminar boundary layer combustion of disk rotating in free atmosphere and plate in a Couette flow 09 p1787 A70-22266

Poiseuille and Couette fluid flow with internal rotation in flat channel 09 p1660 A70-22436

Plane Couette oscillating flow stability to small disturbances under composed unsteady velocity at high Reynolds number 10 p1868 A70-24197

Flow formation in Couette motion of viscous fluids containing suspended rigid spherical particles using theory of fluids with microstructure 11 p2037 A70-26169

Compressible turbulent plane Couette flow solution with variable heat transfer based on von Karman model extended to arbitrary wall temperature 12 p2211 A70-27839

Mean field approximations to Couette flow stability between fixed and coaxial rotating inner cylinder, using Roberts preferred mode method 13 p2392 A70-30007

Nonsteady coupled MHD Couette flow, presenting solution by Fourier series expansion method 14 p2621 A70-30549

Viscometric Poiseuille or Couette flow kinematics, considering nonuniform shear rate 14 p2567 A70-31282

Viscoelastic fluid in Couette flow between coaxial cylinders and flow between fixed plane and rotating cone 14 p2567 A70-31358

Nonstationary MHD Couette flow of viscous incompressible fluid between two parallel walls caused by instantaneous fluctuations of applied transverse magnetic field 15 p2777 A70-31479

Absolute stability and turbulent transport upper bounds in Couette flow, using variational analysis 17 p3066 A70-34543

Rarefied binary gas mixture transient Couette flow, considering nonlinear case of plate with equal temperature accelerated impulsively 17 p3067 A70-34546

Modified discrete ordinate approach in rarefied gas dynamics tested on linearized Couette flow between concentric cylinders, using integral iteration 17 p3067 A70-34548

Couette flow stability between coaxial rotating cylinders, calculating eigenvector in first approximation small perturbation equations 17 p3073 A70-35695

Stiffness values of externally pressurized incompressible fluid-film thrust bearings under turbulent Couette flow, discussing Reynolds number effects [ASME PAPER 69-LUB-25] 19 p3435 A70-37611

Two dimensional MHD couette flow in slip regime, considering constant suction on stationary plate to determine transverse magnetic effects 20 p3677 A70-39047

Slightly rarefied and electrically conducting gas, calculating effects of applied magnetic field on steady laminar low speed plane Couette flow 20 p3685 A70-40504

Poiseuille-Couette spiral flow stability between concentric rotating cylinders 22 p4010 A70-42691

Temperature gradient effect on Couette flow heat transfer and stability 23 p4181 A70-44250

Rarefied gas plane Couette flow, calculating upper and lower bounds on shear stress 24 p4325 A70-45600

COULOMB COLLISIONS

Periodic potential and residual Coulomb interaction effect on inelastic light scattering from electronic excitations in semiconductors, using diagrammatic perturbation theory 01 p0156 A70-10280

Neutrinos line patterns in Muscovite mica, refuting Russel assumption by analysis of multiple Coulomb scattering of charged particles and track comparison 03 p0556 A70-13047

Excess electron and combined electron-positron angular distributions compared in electron photon cascade showers, considering Coulomb scattering 03 p0556 A70-13048

Theoretical and experimental cascade curves comparison for heavy materials used for particle absorption in tracking experiments, discussing Coulomb scattering 03 p0527 A70-13051

Charge-charge scattering model to calculate electron collection by Langmuir probe absorbing surface with and without magnetic field 06 p1124 A70-18308

Thermodynamic properties of nonideal multicomponent gas mixtures including Fermi-Dirac statistics effect, discussing internal partition function for free and confined atoms 06 p1184 A70-18637

Effective potential of electron screening of Coulomb nuclei field leading to thermonuclear reaction rate increase using self consistent field method 07 p1346 A70-20206

Diener kinetic theory for charged particles in EM field with Coulomb interactions taking into account transverse plasma waves 08 p1550 A70-20616

Fokker-Planck Coulomb collisions effect on plasma wave echoes 09 p1736 A70-23181

Coulomb collisions effect on electrostatic lower hybrid resonance waves propagation in ionosphere, noting noise bands cut-off shift 10 p1874 A70-24429

Coulomb interaction effect on diffusion of plasma produced by contact ionization in magnetic field, obtaining density profiles by iterative procedure 12 p2280 A70-27789

Coulomb force effect on electron beam spatial charge for optimal three resonator transit type klystron, regarding buncher length 15 p2707 A70-31507

Weakly turbulent plasma dielectric constant nonlinear tensor for frequent Coulomb collisions, using hydrodynamic equations 15 p2781 A70-32824

Coulomb interaction Fermi gas mixture collision integral, obtaining formula from Boltzmann equations and Taylor series expansion 17 p3070 A70-35043

HF oscillations excitation in decaying plasma-electron beam system, noting Coulomb collisions and nonlinear effects role 18 p3294 A70-36145

Collisional contribution to finite wavelength high frequency dielectric constant of Coulomb plasma 18 p3295 A70-36439

Atmospheric Coulomb interaction influence on longitude dependence of electron intensity in anomaly region 19 p3491 A70-37305

Coulombian drag on body from hybrid calculus of collisionless plasma flow around cylinder [ONERA-TP-819] 19 p3481 A70-38382

Pair correlations effect in equilibrium and nonequilibrium theory, taking Coulomb collisions into account for ionized plasmas confined to half space by reflecting boundary 20 p3679 A70-39662

Minor ion diffusion coefficients in F2 region, noting Coulomb collisions role in ion density sensitivity to ionospheric fluxes 22 p4019 A70-43109

WC radiation damage by resonant absorption following Coulomb excitation observed from gamma ray spectra 23 p4231 A70-44888

LF drift-dissipative instabilities of HF skin layer in nonuniform plasma 24 p4383 A70-45119

COULOMB POTENTIAL

Coulomb, Gaussian and harmonic oscillator potentials for particle pairs in three body system, using S wave expansion 01 p0147 A70-10519

Well depth determination for weak intermolecular potentials based on dimerization enthalpy measurement of rare gas atoms by mass spectrometry 03 p0527 A70-13299

Plasma, Coulomb fields and radiation correlations obtained by relativistic kinetic equations, noting bremsstrahlung, synchrotron, cyclotron radiation, radiative and particle diffusion, etc 09 p1736 A70-23182

Metal-semiconductor transition in magnetite described on band model with electrons breaking symmetry by ordering in self induced Coulomb potential 12 p2283 A70-27239

Radial Schrodinger equation bound state eigenvalues and properties by iterative method, calculating Coulomb potentials 14 p2600 A70-31360

Asymptotic relation between Thomas-Fermi-Dirac and Thomas-Fermi atom models for pressure with and without exchange, considering Coulomb contribution to energy 16 p2953 A70-33004

COUNTERFLOW

Laminar counterflow diffusion flame chemical structure and blow-off mechanism established in forward stagnation region of porous cylinder at atmospheric pressure 02 p0398 A70-12032

State and velocity distribution measurements for air in counterflow vortex tube to determine axial variation of flow quantities 05 p0831 A70-15884

Stable flow distribution of sonic jet exhausting counter to low density supersonic airstream 07 p1189 A70-19982

Incompressible laminar boundary layer stability of incompressible fluid for nonparallel oncoming flow, deriving perturbed motion equation 08 p1483 A70-21179

Asymptotic eigensolutions for equations governing flow between oppositely rotating infinite plane disks in inviscid limit 10 p1870 A70-24607

Thermal design of counter current cryogenic heat exchangers employing spiral finned tubing 14 p2617 A70-31018

Counter current heat exchanger with spiral finned tubing and solid core 14 p2617 A70-31019

Phase shift ultrasonic flowmeter measuring transit time between oppositely propagating waves in blood vessels 15 p2691 A70-31921

Automatic particle counters and fluid contamination problems, misconceptions relating to sampling, size measurement, calibration, etc 05 p0851 A70-16706

Pulse rate counter for randomly repetitive random processes, noting applications to lightning flash noise bursts in receivers 10 p1848 A70-23996

Aircraft ice crystal counter for real-time measurement in cirriform clouds, using contact electrification detection 12 p2264 A70-28091

Actuating signal at sampling instants determined in phase plane by Mullin-Jury method for sampled data feedback containing quantizer and zero order hold circuit 16 p2886 A70-33336

Pulse counting and encoding system on rocket-borne spectrophotometer for starlight collected by primary telescope mirror 22 p4038 A70-43174

Ionized gas density monitor as meteoroid detector, describing operation in ionization chamber, proportional counter and glow tube modes 23 p4197 A70-44513

COUNTING CIRCUITS

NT SCALERS

Switching-type dekatrons use in automatic control, electronic measuring and computing systems, discussing advantages 04 p0660 A70-15436

Pulse counting frequency divider with discrete phasing device for use with quartz clock and electron beam chronoscope 04 p0694 A70-15492

Vibration decay rate measurement by pulse cycles counting 04 p0695 A70-15571

Ion counter circuit using second equivalent condenser for compensating background radiation current, assessing error 07 p1281 A70-19526

Seven segment in-line digital readout circuit for binary-quinary decade counter, using resistance transistor logic 21 p3793 A70-40763

High resolution electronic time intervalometer using digital counting and analog time expansion circuits 23 p4196 A70-44383

COUPLED MODES

Magnetoelectric mode coupling in satellite transmissions through ionosphere near transverse region, showing diurnal variations and error of electron content 02 p0259 A70-12563

High density nonlinear and linear growth rates of flute modes instabilities in cold plasma coexisting with low density of energetic electrons 04 p0728 A70-14998

Radiation from and panel response to supersonic turbulent boundary layer, emphasizing panel mode coupling to acoustic field 04 p0615 A70-15081

Magnetoelectric mode coupling in satellite transmissions through ionosphere near transverse region, using electron concentration profiles for night and daytime estimates 04 p0650 A70-15131

Quasi-linear mode coupling in confined hot-ion Penning discharge plasma, discussing externally imposed excitation and internally generated oscillations 05 p0888 A70-16166

Noniterative integral solutions of scattering equations extended to coupled channels using matrix notation 06 p1108 A70-17487

Mutual coupling between waveguides radiating through conducting ground planes with orthogonally polarized propagating modes described by first order analysis 06 p1020 A70-17562

Laser mode interaction characteristics determination using resonator field equation taking into account competition and coupled modes 06 p1081 A70-17765

Boundary value problems in nonlocal elasticity, considering two one dimensional media coupling with microstructure by Green function analog 07 p1399 A70-18665

Complex elastic system coupled flexural vibrations resonant frequencies determined with allowance for friction 07 p1363 A70-19111

Coupled mode method, analyzing interaction between slow space charge wave of electron beam and electroacoustic wave of lossless warm plasma 07 p1349 A70-19687

Mode coupling and intensity pulsations observed between two 6328 A He-Ne lasers through nonlinear gain characteristics of inverted population 09 p1699 A70-23363

Wave amplification in semiconductors relationship to coupling between space charge wave and circuit wave based on coupled-mode theory 10 p1927 A70-24619

Undamped natural modes intercoupling resulting from arbitrary linear damping addition to linear dynamic system 10 p1962 A70-25061

Thermal conductivity on coupled heat conducting rods calculated by implicit difference scheme on finite graphs 10 p1969 A70-25189

Coupled panel-cavity vibrations analysis, emphasizing sonic boom excitation of large window-room combinations 11 p2133 A70-25728

Nonlinear parametric excitation of stable resonant drift waves by mode-mode coupling in potassium plasma of Q device 11 p2090 A70-26020

Modulation coupling between electron and ion resonances in magnetoactive plasmas, discussing probeless feedback stabilization scheme 11 p2091 A70-26403

He-Ne lasers mode locking by self beat feedback between cavity modes, achieving nonlinearity control by circuit adjustment 12 p2245 A70-27273

Coupled lasers kinetic operating characteristics, discussing emission power damping 12 p2246 A70-27315

Feedback stabilization and mode coupling of ionization waves in positive column discharges, noting dynamic stabilization of unstable bounded plasma systems 12 p2280 A70-27787

Coupled relaxation dependence on translational and vibrational temperature and number of modes in polyatomic gases, noting molecular dissociation 12 p2276 A70-27797

Coupled microwave oscillators interaction, discussing klystron operation regenerative and non-monotonic frequency pulling modes 12 p2196 A70-27847

Coupling between parallel plate waveguides excited in TE modes using integral and differential equations, noting dielectric plug loading effect 12 p2198 A70-27954

Coupled microstrip transmission lines characteristics from parameters evaluation, considering various geometries, inductive and coupling coefficients, dielectric constant and impedance 12 p2190 A70-28167

Cone roll dynamics-ablation patterns coupling in hypersonic wind tunnels [AIAA PAPER 70-562] 13 p2340 A70-29025

Reentry vehicles dynamic stability analysis involving pitch, yaw and roll motions modes coupled by asymmetries [AIAA PAPER 70-561] 13 p2341 A70-29027

Hydromagnetic coupling between neutral and ionized atmosphere perturbations, noting role of gravity waves 13 p2397 A70-29191

Topside sounder profiles interpretation, discussing ionosphere-protonosphere dynamic coupling 13 p2398 A70-29199

Circularly polarized emission from types 1 and 4 bursts and noise storms, considering mode coupling in warm plasma, gyroradiation and Cerenkov radiation 13 p2479 A70-29851

Differential equations for coupled bending and torsional vibrations of slender beam in centrifugal force field 14 p2661 A70-31226

Incident microwave signal in Tonks-Dattner resonance coupled to discrete LF modes in plasma column 15 p2778 A70-31756

WKB method applied to ionospheric equations with strong wave coupling 15 p2725 A70-31857

Coupled simple harmonic oscillators with almost degenerate energy levels, comparing partitioning perturbation techniques with Rayleigh-Schrodinger approach 16 p2955 A70-34002

Mechanical vibrations models and analysis techniques, emphasizing problem of weak couplings in discrete systems 16 p2996 A70-34290

Coupling processes in daytime D and E regions at LF and VLF, using thin film optics method for reflection and transmission coefficient matrices 19 p3413 A70-38002

Intermode coupling processes in nighttime D and E regions, using thin film optical method for propagation phenomena at LF and VLF 19 p3413 A70-38003

Pretwisted slender beam coupled torsional and longitudinal vibrations under centrifugal force field, obtaining resonant frequency by Rayleigh Quotient method 20 p3719 A70-39601

Ideal fluid-cylindrical tank elastic bottom coupled forced oscillations, determining hydrodynamic pressure for tank reverse translational motion 20 p3615 A70-40444

Thin radiating shock layer about axisymmetric blunt bodies, investigating energy-momentum transport coupling 21 p3950 A70-41746

Coupled rotational vibration system dynamic behavior near critical speed, using graphs of autonomous two degree of freedom system on reduced phase plane 22 p4112 A70-42271

Antifriction number characterizing friction coupling, distinguishing between elastic and plastic modes 22 p4047 A70-43348

Finite element method for bending-extensional coupling in angle-ply laminates deformation behavior 22 p4061 A70-43685

Scattering matrix for external coupling effects in dielectric covered phased array 23 p4160 A70-43766

Neutrino processes in lepton era as primeval fireball relic, discussing coupling constant for muon-electron neutrinos interactions 23 p4253 A70-44849

Elevated horizontal and vertical electric dipole VLF fields, discussing ionospheric TE and TM mode coupling, nighttime variations and amplitude fluctuation 24 p4314 A70-46131

COUPLERS

NT ANTENNA COUPLERS

NT COUPLING CIRCUITS

Asymmetrical and symmetrical directional couplers coupling characteristics during linear and exponential variations of coupling coefficient 04 p0659 A70-15310

Variable coupler for liquid helium X band EPR cavity during immersion in coolant 07 p1286 A70-19976

Coupled nonlinear systems with two degrees of freedom using transformation techniques 04 p0714 A70-15084

Material coupling in two layered orthotropic cylindrical shell subjected to normal external pressure 04 p0778 A70-15547

Coupling between LF oscillations and third harmonic frequency resonances of bounded plasma capacitor system, discussing density profile variation 05 p0890 A70-16654

Integrated electron density determination for plasma sheath on reentry vehicle based on power coupling change measurement 08 p1552 A70-21596

Frequency change for coupled vibrations of slender rotating beam due to hub radius change determined in centrifugal force field by perturbation method 08 p1594 A70-21772

Mutual coupling in arrays of log periodic dipole antennas in terms of impedance and admittance matrices 09 p1645 A70-22690

Soviet book on vibrations of complex oscillatory systems with mechanical, pneumatic and electromagnetic couplings 10 p1959 A70-24650

Shift in nuclear magnetic resonance, investigating transferred hyperfine coupling near Neel temperature for magnetic and nonmagnetic systems 10 p1928 A70-24827

Circular confocal laser with coupling aperture in mirror for maximum power output in specified mode, calculating field distributions and diffraction losses at reflectors 10 p1900 A70-24941

Coupled nonlinear systems analysis based on reducing coupled differential equations to equivalent uncoupled equations amenable to existing techniques 11 p2072 A70-25956

C-5 aircraft electrointerference coupling minimization, applying classification plan for wire categorization and routing 12 p2201 A70-28131

Liquid metals pump with cylindrical hydraulic coupling for actuating axial wheel, investigating cavitation and pumping effects on performance 14 p2535 A70-31012

Electron-acoustic, ion-acoustic and electromagnetic plane waves coupling at shock front in two fluid ionized viscous plasma 16 p2958 A70-33282

Multistate impact parameter treatment of heavy particle collisions modified to include higher state couplings for electronic wave functions 16 p2956 A70-34309

Shear coupling effect in cylindrical bending of anisotropic composite laminates 17 p3182 A70-34558

Magnetic coupling in solid dielectric cylinder under axial magnetic and perpendicular electric fields, noting memory and magnetostrictive effects 19 p3471 A70-37785

Thin shell theory elastic coupling conditions, discussing stress-strain and edge effect states 20 p3726 A70-39875

Ring lasers loss lock-in, attributing frequency synchronization between oppositely directed traveling waves to mutual coupling 21 p3838 A70-42007

Nonlinear coupling in systems with two degrees of freedom, deriving transformation laws for uncoupling 21 p3940 A70-42054

Saturn 5 Apollo booster stages oscillations induced by coupling between vehicle structure and engine thrust corrected within existing systems [AIAA PAPER 70-1236] 24 p4417 A70-45954

COUPLING CIRCUITS

Trigger scaling circuits with pulsed and blanking feedback analysis for minimizing number of couplings 01 p0047 A70-10984

Dispersion equation and coupling impedance of two dimensionally periodic slow wave structure of cellular cylinder type with parallel perpendicular diaphragms 03 p0456 A70-13438

Asymmetrical and symmetrical directional couplers coupling characteristics during linear and exponential variations of coupling coefficient 04 p0659 A70-15310

Three way power divider/summer fabricated symmetrically in stripline by resistive network transformation 05 p0821 A70-16386

Complex control follow-up systems in transient modes, suggesting synthesis for transfer function of control signal coupling 06 p1023 A70-17775

Parasitic effects due to coupling of wideband regenerative amplifier with nonideal ferrite circulators to antenna feeder duct 08 p1468 A70-20575

Multipole coupling circuits for wideband radio amplifiers 08 p1474 A70-21225

Optoelectronic devices for variable resistors controlled by electrical signal, investigating decoupling, capacitance and DC resistance 09 p1649 A70-23353

Directional broadband couplers with lumped elements obtained by insertion of LC networks between sum and difference ports of equal hybrids 10 p1848 A70-24221

Coupled systems stability and oscillatory behavior analysis using Liapunov theory 10 p1855 A70-24763

Switched self balancing comparison radiometer with coupling between channels, showing measurement errors due to coupling correctable by phase switching 11 p2018 A70-26269

Photodetector-electronic circuit matching channels for optical communication system, using minimum risk design criterion 12 p2237 A70-28153

Submillimeter wave devices with prebunched megavolt electron beams in coupling structures, describing electromagnetic beam couplers 14 p2555 A70-30432

Computer aided design for microwave branch line couplers dimensions practical for integrated circuit microstrip fabrication 15 p2711 A70-32602

Transmitter-antenna matching, using Pi-filter for resonance transformation 19 p3389 A70-38071

Wideband TEM quarter wave microwave coupler with continuously variable coupling range, employing even and odd mode characteristic impedance levels change 24 p4318 A70-45215

COUPLING COEFFICIENTS

Coupling coefficients for integral charged component of cosmic rays determined from measuring azimuthal geomagnetic effect on rays observed in crossed telescopes 01 p0172 A70-11545

Unidirectional composite materials properties, discussing stiffer filaments effect on Young modulus and shear coupling constant relating shear strain to longitudinal strain 03 p0587 A70-13128

Ray-optical analysis of electromagnetic scattering in plane and circular waveguides, giving formulas for modal reflection and coupling coefficients 03 p0452 A70-14034

Asymmetrical and symmetrical directional couplers coupling characteristics during linear and exponential variations of coupling coefficient 04 p0659 A70-15310

Electron-neutrino weak interaction and beat decay coupling constants found nearly equal, describing astrophysical tests based on white dwarf stars luminosity intervals 09 p1733 A70-23451

Short cables wire to wire coupling between black boxes, deriving interference transfer function 12 p2204 A70-28130

Interdigital Rayleigh wave transducers piezoelectric coupling coefficient from bulk constants, permitting equivalent circuit parameters prediction 17 p3055 A70-35875

Single crystal yttrium ferrite garnet intrinsic electromagnetic radiation as function of coupling coefficient between specimen and waveguide 19 p3485 A70-37630

Coupling components in homotopic classification of elliptic systems of second-order equations with independent variable 23 p4212 A70-44349

COUPLINGS

Quick-disconnect couplings selection guide for aerospace fluid systems, emphasizing functional and weight considerations [SAE-AIR-1047A] 01 p0197 A70-11461

Elastic couplings applied as sliding contact-free continuous junction between permanently rotating and fixed parts in rotating coil magnetometer 02 p0298 A70-12214

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit 07 p1386 A70-19484

Vibration stability of two identical particles constrained to plane and restrained by three linear springs with initial stress 08 p1591 A70-21466

Passive coupling of spatial six-element mechanical mixer with rotary pairs as function of element axial position and dimensions 11 p1983 A70-25933

Mechanical systems vibrations comprising tension couplings compensating misalignment between non-coaxial shafts 11 p2060 A70-26348

Plane motion of two mass points coupled by flexible inelastic thread assuming system mass center moving along circular orbit 15 p2805 A70-32729

Hard wire hermetically sealed two degrees of freedom rotating coupling design for continuous soldered wire connections between spacecraft and oriented solar array 16 p2924 A70-34172

Natural vibrations of free autonomous system of carried and carrier solid bodies connected by elastic couplings 18 p3342 A70-36594

Structural vibration tests, analyzing errors due to couplings and dampers addition 20 p3734 A70-40439

Equations of motion of mass points connected by inertialess elastic couplings 21 p3933 A70-40615

Antifriction number characterizing friction coupling, distinguishing between elastic and plastic modes 22 p4047 A70-43348

COVARIANCE

Signal waveform algorithmic construction with optimal autocovariance properties, using isosum integer partitions, applied to clustered multipath distribution measurement 02 p0263 A70-12773

Complex Gaussian processes with complex density functions, computing covariances and marginal distributions 10 p1915 A70-24057

First vorticity theorem of Helmholtz derived in general relativistic and covariant differential form, proving invariant kinematical identity 10 p1916 A70-24498

Microwave signals covariance and spectra calculation for amplitude and phase fluctuations propagated over line-of-sight path through turbulent atmosphere 12 p2189 A70-27963

Cratered planetary surface distribution and covariance functions of elevations using statistical model 13 p2488 A70-28763

Covariance propagation via differential equations for time-varying eigenvalues and eigenvectors 13 p2450 A70-29979

Adaptive Kalman filtering with unknown process and measurement noise covariance matrices 16 p2880 A70-32983

X-22 VTOL aircraft initial parameter, state and covariance matrix estimates by Kalman filter and smoothing algorithms 16 p2885 A70-33329

Vector and tensor calculus features, examining contravariance and covariance with bra and ket algebra and absolute differential 18 p3281 A70-36354

Relativistic thermodynamics, developing relativity theories in nonvacuo regimes and discussing covariant scalars and formalisms 18 p3291 A70-36553

Observation classification /image identification/ for two normal sets with common covariance matrix, investigating error probability asymptotic behavior 19 p3375 A70-37283

Covariance matrix of mean square response in structural systems under white noise 19 p3536 A70-37702

Covariance matrices estimates for trajectory parameter tracking of thrust-maneuvering spacecraft [AIAA PAPER 70-1017] 20 p3666 A70-39516

Discrete Kalman-Bucy linear filtering with inaccurate noise covariances, considering optimal and sub-optimal systems, error analysis, probability theory, etc [AIAA PAPER 70-955] 20 p3601 A70-39573

Identification adaptive quadratic cost linear system control by mean and covariance correction algorithm 21 p3801 A70-40741

Suboptimum filter for trajectory estimation from parameters, using modified covariance with least squares formulation in Kalman setting 23 p4177 A70-44601

Stochastic boundary value problem involving differential equation with random forcing function, proving monotone property of solution covariance variation 24 p4426 A70-46039

COVERINGS

Cover plates unsteady motion during explosive welding of metals, discussing edge damage 13 p2416 A70-28484

COWELL METHOD

U NUMERICAL INTEGRATION

COWLINGS

Pressure distribution about finite axisymmetric nacelle determined using Douglas Neumann program for cowl surfaces and inlet external surface 07 p1190 A70-20412

Turboramjet powered hypersonic aircraft axisymmetric inlet systems using forward translating cowl and centerbody for various air flow characteristics [AIAA PAPER 70-687] 16 p2835 A70-33586

CRAB NEBULA

Pulsed high energy X rays from Crab Nebula pulsar NP 0532 measured by balloon-borne X ray telescope 01 p0169 A70-10345

Rotational properties of neutron star models for Crab Nebula energy source, using expressions for angular momentum and rotational kinetic energy 03 p0571 A70-13817

X ray flux pulsations for pulsars near Crab Nebula observed in 2.5-30.0 kev range, determining pulsation profile 03 p0578 A70-14358

Crab Nebula pulsar light intensity fluctuations on very short time scale, noting negative observations 04 p0747 A70-14545

Right ascension and flux density of source in Crab Nebula measured at meter wavelengths, evaluating spectrum and relative position to binary star center 05 p0917 A70-16908

Coherent synchrotron emission in Crab Nebula associated with electron gyromotion, discussing models for high energy particle acceleration 07 p1375 A70-18848

Supernova pulsars parameters prediction based on Crab and Vela observations, discussing dispersion, period, flux density, etc 07 p1389 A70-20218

Relativistic particles formation associated with supernovae outbursts estimated to determine relativistic electrons mechanism in Crab Nebula 08 p1564 A70-20552

Supernovae and remnants, data concerning radio brightness distribution of Tycho supernova remnant and Cassiopeia and Crab Nebula origin 09 p1748 A70-21989

Supernovae remnants X ray emission associated with explosion process generating relativistic particles, indicating Crab Nebula as X ray object 09 p1749 A70-21998

Crab Nebula activity from telescopic plates, illustrating polarization structure on composite plate 09 p1750 A70-21999

Crab Nebula continuing energetic activity study indicating origin in nebula center and association with supernova remnant 09 p1750 A70-22000

Pulsar NP 0532 synchrotron emission reinterpretation related to relativistic particles injection into Crab Nebula

09 p1756 A70-22516

Wispis near Crab Nebula since September 1969 pulsar spin-up, suggesting dynamical changes in neutron star

10 p1947 A70-24994

X ray scattering by interstellar grains in direction of Crab pulsar and Sco XR-1

10 p1933 A70-25044

Dwarf and neutron stars as pulsar energy sources, considering Crab Nebula X ray emission and gravitational collapse

12 p2310 A70-27990

Crab pulsar /neutron star NP 0532/ possible spherical asymmetry indicated by pulse arrival time anomalies

13 p2486 A70-28618

Polarization of strong radio pulses from pulsar NP 0532 in Crab Nebula

13 p2492 A70-29269

Pulsed gamma ray emission from Crab Nebula pulsar NP 0532 investigated by balloon-borne spark chamber detector

13 p2492 A70-29271

Angular size of high energy X ray source in Crab Nebula from balloon-borne X ray modulation collimator

14 p2631 A70-30789

Runaway stars and pulsars near Crab Nebula, discussing binary system explosion and remnant motion

14 p2642 A70-30894

Relativistic particles formation associated with supernovae outbursts estimated to determine relativistic electrons mechanism in Crab Nebula

15 p2805 A70-32707

Angular scattering of interstellar medium resulting in multipath dispersion of pulsar pulses, discussing NP0532 in Crab Nebula

16 p2972 A70-32988

Critique of paper on Crab Nebula pulsar pulsed gamma ray emission, considering photon flux and statistical data analysis

17 p3149 A70-34565

Critique of paper on pulsed gamma rays detection from Crab Nebula pulsar by balloon flights, attributing pulsations to random fluctuations

17 p3149 A70-34566

X ray spectrum analysis for Crab, Cas A and SN 1572 supernova remnants

17 p3156 A70-34830

Crab Nebula pulsar NP 0532, describing quasi-sinusoidal oscillation in arrival times of radio pulses

17 p3157 A70-34842

Crab Nebula - Conference, Flagstaff, Arizona, June 1969

17 p3163 A70-35112

Optical study of Crab Nebula linear expansion and filamentary proper motions, considering line emission

17 p3164 A70-35113

Radio observations of Crab Nebula and radio source, correlating optical and radio features

17 p3164 A70-35114

X ray observations of Crab Nebula

17 p3164 A70-35115

Radio observation of Crab Nebula radio pulsar NP 0532, discussing main and subpulse stability at optical and radio frequencies

17 p3164 A70-35116

Crab Nebula pulsar NP 0532 optical and X ray synchrotron radiation, explaining ratio of pulsar energy flux to nebula

17 p3152 A70-35747

Crab Nebula X ray flux pulsations, analyzing spectra

17 p3152 A70-35756

Small angular diameter radio source in central Crab nebula association with pulsar NP 0532 based on spectra and pulse duration

18 p3322 A70-37128

Crab Nebula electromagnetic spectrum models, considering uniform magnetic field over whole volume and strong fields in small regions

19 p3505 A70-38114

Critique of Ruderman theory of Crab pulsar LF wobble as long wavelength oscillation of superfluid vortex lattice

19 p3522 A70-38604

Crab Nebula filamentary system, examining excitation conditions in terms of ionization and heating by HF radiation

20 p3702 A70-39011

Cosmic hard X ray sources spectra and time variations by balloons and OSO-3 satellite observations of Crab Nebula

21 p3872 A70-40657

X ray emission from Crab Nebula pulsar by rocket-borne proportional counters, comparing with optical observations

21 p3874 A70-40674

Pulsed hard X and gamma rays from NP0532 pulsar in Crab Nebula, comparing with extrapolated optical data

21 p3874 A70-40675

Crab Nebula pulsar NP 0532 electromagnetic spectrum observations, examining radio, optical, IR and X ray emission

21 p3874 A70-40677

Crab Nebula electromagnetic spectrum deviation from power law in microwave region, investigating origin from Compton scattering of high energy electrons

21 p3875 A70-40683

Magnetic field lower limit in Crab Nebula from cosmic gamma ray studies using optical reflector to detect atmospheric Cerenkov radiation

21 p3875 A70-40684

Radioheliograph observations of coronal broadening of Crab Nebula at 80 MHz, noting radial scattering and plasma irregularities

21 p3891 A70-41184

Crab pulsar observations with refractor and on-line data acquisition, indicating optical pulse arrival times at variance with previously assumed 77 day periodic wobble

22 p4097 A70-42464

Crab Nebula pulsar NP 0532 optical timing, measuring frequency, arrival times and pulse interval

22 p4102 A70-42936

Crab Nebula pulsar optical polarization compared with surrounding nebula and radio polarization

22 p4105 A70-43227

Crab Nebula X ray pulsation identified with pulsar NP 0532 by rocket measurements, noting implications for interstellar dust density

24 p4401 A70-45371

CRACK FORMATION

U CRACK INITIATION

CRACK INITIATION

Ultrasonic detection system for crack initiation and propagation in notched low cycle axial fatigue testing using surface and longitudinal waves

01 p0096 A70-10004

Stress corrosion cracking in Cu-Al alloys shown dependent on alloy and Cu ion content, solution pH and stress level, discussing tarnish film formation role

01 p0119 A70-10734

Correlation between sustained-load and fatigue crack growth in high strength steels for aggressive environment effects

02 p0318 A70-12544

Polymethylmethacrylate block breakdown under focused pulsed laser radiation in free emission regime, noting light absorption during crack development

02 p0314 A70-12813

Al alloy rectangular beam stress corrosion crack initiation and propagation measurement using ultrasonic techniques, showing relationship between crack velocity and initial stress

03 p0481 A70-12958

Natural mode shapes of longitudinal oscillations and resonant frequencies of thin rods of constant curvature and rings with slit, noting use for crack determination

03 p0588 A70-13283

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera

04 p0730 A70-14458

Hydrogen embrittlement as delayed rupture origin in high strength steels

04 p0711 A70-15682

Vacancies influence on macrodefect nucleus formation in single metal crystals under uniaxial strain explaining Griffith crack initiation

05 p0861 A70-15784

Plane circular crack in homogeneous and isotropic elastic body under uniform uniaxial tension using linearized couple-stress theory

05 p0931 A70-16089

Planar dislocation array in displacement dependent stress field, investigating tip stress intensification regarding crack nucleation

05 p0932 A70-16170

Steady temperature field and stressed state of elastic plane containing heat resistant arc shaped cracks produced by uniform thermal flux

05 p0935 A70-16231

Scale factor effect on crack development in blanks and structure elements undergoing linear and complex stressed states under cyclic thermal loads

05 p0867 A70-17045

Time to crack formation determined in cylindrical and flat Al and steel specimens having various surface properties under cyclic loads

06 p1084 A70-17392

Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles

06 p1162 A70-17393

Ultrasonic surface waves detection of transverse fatigue crack initiation in rails under load, applying results to fatigue life determination

06 p1168 A70-17924

Equilibrium cracks in elastic bodies on basis of atomic interaction law, using Griffith problem to estimate bearing capacity

07 p1400 A70-18666

Microfissuring of Ni base alloy weldments as function of grain size produced by solution temperature

07 p1306 A70-18996

Crack formation in resin matrix and effect on fiberglass reinforced composites behavior under loading

07 p1318 A70-19754

Fatigue crack growth in polycrystalline Mo at room temperature under cyclic loads observed along grain boundaries

07 p1314 A70-20013

Quenched and tempered steels ductile fracture with respect to plasticity, structure and crack development conditions using microfractography

08 p1515 A70-20922

Iron base and nickel base alloys susceptibilities to internal hydrogen and hydrogen environment embrittlements, studying crack initiation inside and at metal surface

08 p1520 A70-21515

Nondestructive testing and inspection by acoustic emission from stressed materials, discussing microstructure effect and crack initiation detection

08 p1508 A70-21747

Fracture processes in homogeneous anisotropic fiber composite materials, describing microcrack initiation, growth and unstable propagation at critical stress level

08 p1532 A70-21912

Inertia effect in failure mechanics for steadily developing equilibrium cracks in dynamic system with time dependent periodically variable load

09 p1771 A70-22466

Thermal and high strain fatigue covering cyclic tests, crack initiation and propagation, stress-strain behavior, structural design, frequency and temperature effects, etc

09 p1773 A70-22576

Multiaxial thermal fatigue cracking in carbon steels predicted by elastoplastic stress-strain analysis using finite element method

09 p1773 A70-22578

Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation

09 p1774 A70-22583

Fatigue life and limit distribution obtained from analysis of crack formation start and final failure in notched and smooth specimens

09 p1776 A70-22619

Transcrystalline stress corrosion crack initiation in austenitic stainless steel tested in boiling magnesium chloride solution

09 p1706 A70-22940

Acoustic emission monitoring methods to detect crack formation and growth in ceramics

10 p1894 A70-24174

Crack development in solid body, considering condition at crack tip not derivable from equation of motion and strain equation

10 p1960 A70-25007

Aluminum alloys hot cracking during welding, ascribing failure to combination of strain and susceptible microstructure

10 p1897 A70-25313

Porosity and intergranular crack formation in tungsten fusion welds using electron fractography

11 p2059 A70-25666

Fatigue crack initiation and propagation in steel using surface plastic replication method, determining propagation rate by stress intensity

12 p2321 A70-27207

Cleavage cracks initiation and propagation in basal plane of Be single crystals, determining propagation energy as function of temperature, purity and alloying

12 p2256 A70-27614

Microdefects as centers of disk shaped destructive cracks in polymer dielectrics under laser irradiation

13 p2437 A70-28621

Kinetic theory of cracks network formation on LiF crystal surface exposed to plasma jet using high speed camera

13 p2510 A70-28655

Brittle rupture cracks theory, discussing unstable /Griffith/ crack, stress intensity coefficient, propagation criterion, etc

13 p2517 A70-29715

Al-Zn-Mg alloy welds delayed rupture under constant uniaxial load in distilled water or aqueous salt solution

14 p2591 A70-30970

Crack initiation and breakdown under thermal stresses of boron nitride containing aluminosilicate

15 p2764 A70-31532

Metallic materials damage accumulation and structural failures due to fatigue, considering surface changes, crack initiation and dislocation pattern

15 p2757 A70-31928

Glass bead blast induced residual stress and surface cold work effects on Ni base superalloy fatigue crack initiation and propagation 15 p2761 A70-32381

Weld cracks in welded joints of Ni-Cr base alloys due to residual stresses during aging, recommending annealing for prevention 16 p2930 A70-33051

Ceramic material ranking, using thermal stress crack initiation method 16 p2934 A70-33274

Crack initiation and propagation in rolling contact fatigue, emphasizing electrochemical effects in ball bearing failure [ASME PAPER 70-DE-46] 16 p2931 A70-33509

Electrochemical mechanism in Ti alloys stress corrosion cracking, formulating mass transport kinetics model 17 p3113 A70-34368

Stress corrosion cracking of alpha-Ti alloys at room temperature, suggesting cathodic polarization promotion of film buildup 17 p3113 A70-34369

Stress corrosion cracking in Ti and alloys, discussing metallurgical and environmental factors emphasizing exposure to hot salt, methanol, seawater, etc 17 p3114 A70-34372

Ti alloys crack formation during oxidation under stress, considering annealing and recrystallizing effects 17 p3114 A70-34374

Ti alloys crack initiation and propagation during hot salt stress corrosion 17 p3114 A70-34375

Single phase alpha Ti alloy welds breaking strength, discussing delayed failure and cold cracking with various oxygen and hydrogen contents 17 p3117 A70-34399

Crack initiation in wrought polycrystalline Be sheet, investigating three point loaded bend fractures of powder and ingot samples by optical and electron microscopy 17 p3122 A70-34551

Void formation and creep during fast neutron irradiation of austenitic stainless steel based on thermodynamic approach, calculating nucleation and growth rates 17 p3123 A70-34626

Membrane and bending stresses at crack tip in cylindrical shell weakened by elliptic hole with major axis perpendicular to shell axis 17 p3186 A70-34981

Elastic field near moving antiplane crack tip to determine energy release rate 17 p3191 A70-35462

Oxygen role in crack initiation and growth in Ni alloys postwelding heat treatment 18 p3277 A70-36525

Thermal fatigue cracking of gas turbine blades in fuel combustion product flow, investigating surface composition, microhardness and structure under simulated loads 19 p3490 A70-37338

Three dimensional stress fracture criterion for initial microcracking derived by generalizing Griffith law theory 19 p3540 A70-37955

Metal cracking and fracture mechanics under creep conditions at elevated temperatures, discussing notch rupture testing 21 p3937 A70-41437

Crack propagation in antiplane shear by opening semipenny shaped cracks straddling front at 45 deg 21 p3940 A70-42035

Polycrystalline aluminas under thermal shock, investigating strength decrease and subcritical crack formation 22 p4059 A70-43413

German monograph on thermally induced elastic stress effects on crack formation and propagation in plates 24 p4422 A70-45524

CRACK PROPAGATION

Holographic interferometry as stress analysis technique for crack propagation studies, discussing advantages over classic interferometric and conventional photoelastic methods 01 p0198 A70-10002

Ultrasonic detection system for crack initiation and propagation in notched low cycle axial fatigue testing using surface and longitudinal waves 01 p0096 A70-10004

Inconel 718 and Al 2219 alloys surface flawed specimens fracture toughness and flaw growth comparison for high pressure hydrogen vessel 01 p0114 A70-10029

Fatigue crack propagation in metals exhibiting initial crystallographic shear mode followed by noncrystallographic tensile mode 01 p0198 A70-10101

Spherical pressure vessel fracture initiation and propagation from long flaws considered from theoretical and experimental approaches 01 p0199 A70-10264

Stress criterion for unstable crack propagation from Al alloy sheet tests, examining fracture data for vessels of various geometries and materials [ASME PAPER 69-SESA-2] 01 p0117 A70-10451

Weak interfaces effects in laminates under triaxial tensions at crack tip, analyzing delamination during crack propagation and fracture resistance 01 p0127 A70-10482

Fatigue crack growth rate for high strength steels from crack length during cyclic loading and striation spacings after fracture 01 p0119 A70-10732

Crack propagation mode in laminated steel-Ni composites, analyzing softer layer effect using impact tests and C replica fractographs 01 p0120 A70-10743

Quasi-brittle fracture of plastic materials based on Griffith theory and crack propagation, analyzing real surface energy and work of plastic strain 01 p0212 A70-11562

Metal fatigue in Al alloys subjected to stress cycles, determining macrocracks propagation stages 01 p0212 A70-11607

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks 01 p0212 A70-11608

Crack propagation in pure alpha-Ti at room temperature using optical and electron microscopy, considering propagation rate relation to strain amplitude 01 p0125 A70-11643

Fracture surface topography variation with specimen thickness, studying fatigue crack propagation in Al 02 p0317 A70-12317

Al alloy rectangular beam stress corrosion crack initiation and propagation measurement using ultrasonic techniques, showing relationship between crack velocity and initial stress 03 p0481 A70-12958

Discontinuity surfaces /cracks/ propagation in continuous medium having energy and stresses as functions of strain tensor gradient, using variational principle 03 p0589 A70-13330

Limiting equilibrium under axial tension of brittle body with parallel axisymmetric external cracks, studying critical load, crack propagation, etc 03 p0594 A70-13737

Elastoplastic zone and instability of precracked thin sheets under uniaxial loading applied to rectangular center-notched steel foils 03 p0598 A70-14239

Fracture mechanical theory for crack propagation in brittle ceramics subjected to thermal shock, deriving crack stability criteria 04 p0767 A70-14505

Dimensional analysis for describing steel surface microcracks growth under uniaxial fatigue loading, using stress-intensity factor and crack extension concepts of fracture mechanics [ASME PAPER 69-MET-G] 04 p0770 A70-14879

Crack propagation rate in aluminum alloy plates under cyclic tensile and transverse shear loadings, noting sliding mode increasing effect 04 p0705 A70-14881

Swenson shear fatigue crack model expanded to include mean stress effect on cyclic shear crack growth [ASME PAPER 69-WA/APM-8] 04 p0772 A70-14918

Fatigue crack incremental propagation under cyclic shear loading, developing discrete dislocation model for crack and plastic zones [ASME PAPER 69-WA/APM-7] 04 p0772 A70-14919

Stress factor-displacement relation in cruciform line crack deformation in elastic medium under arbitrary internal pressure 05 p0926 A70-15976

Antiplane strain deformation problems concerning crack extension along circular interface separating materials with different shear moduli 05 p0931 A70-16091

Al alloys crack growth effects due to gaseous environment and fatigue frequencies, suggesting role of gas adsorption 05 p0938 A70-16478

Strain energy release rate in terms of propagating crack surface displacements applied to infinite solid loaded in tension 05 p0938 A70-16480

Differential equation for crack propagation applied to threshold conditions for brittle fracture caused by impulsive load 05 p0939 A70-16486

Radially nonsymmetric stress wave propagation from tip of moving crack in infinite plates, deriving minimal group velocity 05 p0941 A70-16516

Dynamical models of relative motions during earthquakes, solving numerically integral equations with nonintegral kernels in crack propagation and elastic wave diffraction 05 p0941 A70-16527

Fatigue crack propagation and fracture toughness in pressurized thin walled cylindrical tubes, basing analysis on shallow shell bending theory 05 p0942 A70-16802

Optimal thermomechanical treatment for austenitic steel stability to resist propagation and unloading of dislocations in cyclic loading process 05 p0867 A70-17041

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under deformation due to triaxial compression, illustrating initial stress effect 05 p0956 A70-17108

Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles 06 p1162 A70-17393

Steels crack propagation direction dependence on load magnitude in low cycle fatigue, noting groove width effects on resistance to static loading 06 p1163 A70-17401

Cracks development in hydrogenated silicon iron, investigating plastic strain relation and brittle rupture propagation 06 p1165 A70-17580

Plastic zone around propagating fatigue crack in Cu single crystals, using transmission electron microscopy and X ray topography 06 p1171 A70-18494

Stress corrosion testing of vanadium alloys using precracked specimens in cantilever beam apparatus, discussing strain hardening exponent role and propagation rates 07 p1306 A70-19299

Three dimensional electrostriction theory for stress and displacement on penny-shaped crack in elastic dielectric with conducting oblate spheroidal inclusion 07 p1409 A70-19569

Corrosion cracking mechanism for notched metal surface in aqueous environment under tensile stress, discussing electron distribution and H ion concentration 07 p1310 A70-19737

Quasi-steady propagation of Prandtl crack in viscoelastic body, noting stress distribution identity for viscoelastic and elastic cases 07 p1414 A70-20181

Rate sensitive materials dynamic fracture test concepts, considering crack speed, division, arrest, toughness, etc 08 p1590 A70-21318

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack 08 p1590 A70-21414

Stress corrosion-fatigue crack propagation in high strength structural steels, relating growth rates to crack tip stress intensity factor [ASME PAPER 69-MET-5] 08 p1519 A70-21452

Dugdale crack model extended to include effects of linearly varying tensile loading, noting plastic zone length sensitivity 08 p1593 A70-21512

Fracture processes in homogeneous anisotropic fiber composite materials, describing microcrack initiation, growth and unstable propagation at critical stress level 08 p1532 A70-21912

Brittle failure mechanics application to steels sensitivity to rupture at low temperatures, discussing crack propagation resistance and heat treatment effect on impact toughness 09 p1768 A70-22076

Limiting equilibrium of unbounded cracked elastic plate with circular hole, studying crack propagation under compression 09 p1769 A70-22121

Al alloys fatigue cracks propagation rate using electron microfractography 09 p1701 A70-22223

Turbine components design for low cycle fatigue, estimating thermal cycle number for high temperature crack initiation and propagation 09 p1774 A70-22583

Stress and displacement distribution formulas for two and three dimensional crack extension problems in linear viscoelastic body 09 p1775 A70-22611

High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle 09 p1776 A70-22644

Fatigue crack probability distributions under oscillatory stationary random loading, basing analysis on crack propagation model 09 p1776 A70-22683

Dynamic photoelastic analysis of fracturing plastic plates, studying elastic and stress fields around propagating cracks 09 p1783 A70-23448

Crack widening in infinite plane field with wedge in absence of slip, based on elasticity theory, plotting contact forces and stresses on crack boundary 09 p1785 A70-23624

Ni-Cr austenitic steel bending, surface temperature variations, crack development and propagation under double fatigue tests 10 p1902 A70-23819

Acoustic emission monitoring methods to detect crack formation and growth in ceramics

10 p1894 A70-24174

Stress intensity and strain energy of pressurized line crack in cross form in thin elastic plate solved by Wiener-Hopf technique

10 p1956 A70-24192

Subcritical cracking rate behavior estimation in metallic service structures by linear elastic fracture mechanics

10 p1960 A70-24977

Energy methods applied to fatigue crack propagation rate under tensile mean stress

10 p1963 A70-25090

Fatigue crack propagation rate in sheet alloys with holes as stress concentrators related to duration of various development phases

10 p1965 A70-25290

Hypercritical crack growth resistance and notch toughness of aluminum alloys derived from fracture tests

11 p2064 A70-25331

Aircraft structures fatigue durability estimations, studying crack propagation rates under cyclic loadings by fail-safe method

11 p2132 A70-25624

Aircraft structures fatigue, discussing prediction of response to fatigue environment, load distribution, fatigue life, crack propagation rates and residual strength

11 p2132 A70-25677

Crack propagation in tensioned plates subjected to sonically induced vibrations

11 p2133 A70-25731

Two dimensional photoelastic investigation of crack propagation in fiber-reinforced composites consisting of glass and polyester resin layers

11 p2136 A70-26078

Elastic-plastic shear cracks propagation in two phase composite materials using dislocation model, determining critical fracture strength

11 p2136 A70-26081

Stress ratio effects on Al alloy during crack propagation and fatigue, introducing notch stress and strain approximations

11 p2066 A70-26089

Air and salt water tensile and shear mode cracking of titanium alloy sheets examined with electron fractographs

11 p2067 A70-26099

Fatigue crack propagation in high strength steels during fatigue cycling in dry and wet environment containing NaCl

11 p2067 A70-26100

Finite element methods applications to linear fracture mechanics and crack propagation theory, computing stress intensity

11 p2144 A70-26685

Airframe structures fatigue crack propagation with and without strain hardening during variable amplitude loading

12 p2315 A70-27014

Stable and unstable crack growth in viscoelastic media, solving boundary value problem and continuum mechanics prediction of crack propagation

12 p2315 A70-27092

Fatigue crack initiation and propagation in steel using surface plastic replication method, determining propagation rate by stress intensity

12 p2321 A70-27207

Kinetic theory for fatigue crack propagation using cyclic stress-strain relation in connection with strain hardening characteristics

12 p2322 A70-27208

Fracture toughness and cyclic crack propagation of surface cracked high strength aircraft structure steels

12 p2254 A70-27467

Cleavage cracks initiation and propagation in basal plane of Be single crystals, determining propagation energy as function of temperature, purity and alloying

12 p2256 A70-27614

Anisotropy effect on stress distribution at crack apex in elastic plate

12 p2329 A70-28322

Dynamic analysis involving crack extension force for two dimensional multiple radial crack division

13 p2510 A70-28602

Fatigue crack propagation dependence on environment and load frequency in Al alloys, correlating data by stress-intensity factor

13 p2431 A70-28603

Fatigue crack growth dependence on load profile, temperature, test frequency and environment and stress in high strength Al and Ti alloys and steels

13 p2431 A70-28604

Crack extension by alternating shear indicated from slip line flow field comparison at sharp crack tip and blunted crack

13 p2432 A70-28606

Moisture effect on fatigue crack propagation and fracture path through microstructure of 300-grade maraging steel

13 p2432 A70-28607

Viscoelastic plate crack growth analysis within continuum mechanics framework as analog to Griffith problem

13 p2510 A70-28671

Phenomenological theory of crack propagation during fatigue experiments, noting role of work hardening

13 p2510 A70-28672

Secondary crack growth direction from preexisting crack under longitudinal shear loading

13 p2510 A70-28674

Thin walled duralumin cylinders catastrophic fracture analysis by linear elastic fracture mechanics noting fatigue crack propagation

13 p2434 A70-29173

PH variation effect on sea water on stress corrosion cracking behavior of Ti alloys

13 p2435 A70-29174

Brittle rupture cracks theory, discussing unstable /Griffith/ crack, stress intensity coefficient, propagation criterion, etc

13 p2517 A70-29715

Hardened steel embrittlement in low pressure hydrogen caused by crack growth as function of temperature

13 p2436 A70-29804

Fracture mechanics and stress analyses comparison for fatigue cracked steel cantilever beam stress corrosion specimens

15 p2755 A70-31473

Fast brittle crack slowing by mechanical twins in transformer steel and by slip bands in LiF and NaCl crystals

15 p2755 A70-31526

Viscoelastic-plastic solid delayed fracture associated with wedge formation of crazed material at crack tip

15 p2816 A70-32010

Curvilinear cracks development in flat brittle body under asymmetrical loads using small parameter method

15 p2817 A70-32165

High temperature metal fatigue crack growth monitoring by ultrasonic detection

15 p2744 A70-32321

Biaxial stress effect on fatigue crack propagation in Al alloy plate under reversed bending

15 p2821 A70-32324

Metal fatigue cracks, reviewing propagation theories and structure life prediction equations

15 p2822 A70-32358

Heat treatment effect on maraging steel fracture toughness and subcritical crack growth loaded at slow strain rate in laboratory air

15 p2760 A70-32377

Environmental fatigue crack propagation in Al alloys at low cyclic stress intensity levels

15 p2762 A70-32390

Ceramics microcrack propagation control through small slab with simultaneous microscopic observation of path and force changes, considering grain boundaries effects

15 p2741 A70-32434

Fractography of spall cavities and crack growth in ball rolling contact fatigue, using scanning electron microscope

15 p2745 A70-32444

Alternating stress required for edge crack propagation in metal plates under tensile loading cycles

15 p2762 A70-32464

Crack initiation and propagation in rolling contact fatigue, emphasizing electrochemical effects in ball bearing failure

[ASME PAPER 70-DE-46]

16 p2931 A70-33509

Fatigue life estimation from fracture mechanics data, discussing flaw geometry and propagation, mechanical properties, damage accumulation, etc

[AIAA PAPER 70-601]

16 p2989 A70-33601

Kinetic theory of fatigue crack propagation, discussing stochastic nucleation process and power exponent relation

16 p2992 A70-33968

Metallographic observations on slow crack growth in Be monocrystals suggesting explanation for transition regions

16 p2933 A70-34275

Polycarbonate plate fatigue crack propagation, discussing length due to repetitions, striation number relationship to cycles, and stress intensity

16 p2941 A70-34335

Ti alloys crack initiation and propagation during hot salt stress corrosion

17 p3114 A70-34375

Inelastic analysis of unidirectional composite subjected to transverse normal loading, discussing linear response up to elastic limit and subsequent crack propagation and failure

17 p3182 A70-34557

Polymeric materials fatigue tests, investigating correlation between crack propagation and stress intensity factor

17 p3127 A70-34624

Randomized load sequence simulating narrow band Gaussian process for predicting fatigue strength, assuming crack propagation mechanism

17 p3183 A70-34660

Crack propagation, fatigue damage and interaction effects in aircraft structures and materials under flight simulation loading

17 p3185 A70-34924

Elastic field near moving antiplane crack tip to determine energy release rate

17 p3191 A70-35462

Fatigue crack propagation in solids in terms of nucleation theory, explaining temperature dependence of fatigue strength and size effect

17 p3191 A70-35464

Curvilinear crack propagation in elastic plane under balanced loads, using singular integral equations

18 p3341 A70-36584

Finite element method with first order displacement functions to compute crack tip stress intensity factor in various shapes under different loading conditions

19 p3548 A70-38623

Fatigue crack closure in flat sheet specimens under zero-to-peak tension cyclic loading, analyzing stress distribution from fractographic striation patterns

19 p3549 A70-38625

Pop-in fractures analyzed by semiquantitative model, establishing relationship between pop-in length, stress intensity factor and crack-front plastic deformation

19 p3549 A70-38626

Crack tip stress intensity factor in sheet structures, applying complex stress potentials and perturbation techniques in numerical calculations

19 p3549 A70-38627

Fatigue crack propagation under programmed loads, correlating crack growth rates and tip opening displacements

19 p3549 A70-38628

Plastic bodies rupture and crack growth under creep, considering tension of bar with symmetrical angular notches

20 p3727 A70-39882

Longitudinal shear crack propagation in random internal stress field, examining quasi-brittle rupture theory and cyclic loading

20 p3733 A70-40396

Brittle elastic material with wedge shaped void, calculating shear stresses during crack propagation generated by horizontally polarized shear wave

21 p3932 A70-40547

Fatigue crack growth tests on Al alloy sheets under variable amplitude loading

21 p3831 A70-40749

Notched polycrystalline Al-Mg alloy dislocation structure near propagating fatigue crack at various stress levels

21 p3839 A70-40925

Anisotropic material two dimensional crack propagation under deforming stress at infinity, examining fracture criterion, dislocation distributions and crack nucleation

21 p3936 A70-41413

Nondestructive ultrasonic measurements of crack depth in high strength steel plate weldments, studying low cycle fatigue

21 p3834 A70-41943

Crack propagation at supersonic velocities in K Cl crystals, noting plasma induction within specimen by laser pulse

21 p3940 A70-42033

Crack propagation in antiplane shear by opening semipenny shaped cracks straddling front at 45 deg

21 p3940 A70-42035

Acoustic emissions method for monitoring structural stability of solid materials assemblies via crack formation and movement detection

22 p4027 A70-42582

Crack growth study in viscoelastic solids by linear continuum mechanics, discussing cyclic loads, composite solids mechanical behavior and thermodynamics

22 p4115 A70-42937

Stress distribution around moving cracks in finite width strip, obtaining solutions for boundary conditions by Schwarz-Christoffel transformation and complex functions theory

22 p4116 A70-43025

Book on fatigue crack propagation in pure Al covering tension and compression tests, single and polycrystalline materials, elastic stress, notched and smooth specimens, etc

22 p4057 A70-43740

Crack propagation resistance-cyclic fracture strength relation for Mn-Cr-V steels, considering thermomechanical working effects

23 p4204 A70-43935

Fracture toughness testing of metallic materials including fatigue cracking, thickness limitations and crack detection

23 p4206 A70-44190

Crack length and bend specimen thickness effects in plane strain fracture toughness tests of high strength steels

23 p4268 A70-44192

Crack and thickness effects on fracture toughness tests of high strength steel in precracked sheet and bend specimens

23 p4206 A70-44193

Fatigue crack growth detection by acoustic emission techniques

23 p4194 A70-44214

Moire technique application to fracture toughness tests on Zr alloys, measuring crack opening displacements and plastic flow beneath notch

23 p4208 A70-44914

German monograph on notched structural steels fatigue properties and crack propagation under tensile-compressive alternating loads

24 p4356 A70-45086

High strength martensitic stainless steel stress corrosion resistance and fatigue crack growth rate, considering austenite content, strain aging and tempering temperatures

24 p4359 A70-45245

German monograph on thermally induced elastic stress effects on crack formation and propagation in plates

24 p4422 A70-45524

German monograph on fatigue crack propagation in thin notched plate, considering microscopic element fracture probability

24 p4422 A70-45574

Fracture mechanics of craze growth of stressed polymethyl methacrylate in methanol

24 p4368 A70-45778

Composite materials tensile strength dependence on reinforced fibers with dispersed tensile strength, using model to predict crack propagation from fiber rupture

24 p4427 A70-46270

CRACKING [FRACTURING]

Ultrasonic detection of service induced cracks near tenon base region of second stage Al compressor disks

01 p0096 A70-10003

Thermal stresses in infinite layer of transversely isotropic material due to crack with prescribed normal displacement, deriving temperature distribution

01 p0200 A70-10552

Heat transfer effects on corrosion behavior of stainless steel in boiling water, noting stress corrosion cracking increase with chloride ion contamination

03 p0507 A70-13137

Al-Zn-Mg-Cu alloy corrosion cracking, studying effects of heat treatment, strain percent, blank parameters and grain size

03 p0512 A70-13734

Stainless steel stress corrosion cracking test in magnesium chloride solution, emphasizing crack crystallographic orientation observation

03 p0513 A70-14299

Bending analysis of cracked plate with arbitrary stress distribution across thickness

[ASME PAPER 69-WA/PVP-2] Fracture criteria in cracked plates under combined extension and cylindrical bending using Sih-Hartrant theory

04 p0770 A70-14882

Postweld heating cycle for circular patch test to predict strain age cracking susceptibility in welded Rene 41

04 p0700 A70-15654

Stress distributions in infinite elastic solids for shear loadings prescribed over coplanar circular regions, solving integral equations iteratively for coplanar penny-shaped cracks

05 p0928 A70-16057

Failure prediction for arbitrary shape flawed pressurized vessels using structural geometry, crack length, ultimate and yield stresses and fracture toughness

05 p0942 A70-16803

Alloying elements preventing hot cracking in weld metal by converting iron sulfides into higher melting point sulfides

07 p1293 A70-18979

Crack behavior of Al alloy as cryogenic tankage material, establishing relationship of temperature effects and basic crack size to failure stress

07 p1279 A70-18997

Torsion of elastic half space containing circular crack with symmetry axis coinciding with annular stamp rigidly coupled to half space

07 p1414 A70-20183

Ti alloys failure-safe design developing procedures for incorporation of stress-corrosion cracking characterizations into ratio analysis diagram system

08 p1519 A70-21456

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses

[ASME PAPER 68-WA/MET-19] Fracture mechanics model for stress corrosion cracking of Al alloys, discussing bond strength lessening by adsorption of damaging species

09 p1706 A70-22941

Polyamides /nylons/ stress cracking by metal halides and halide-like salts, investigating effects of nylon temperature, moisture content, concentration, etc

10 p1907 A70-24224

Polyamide and secondary amide mode compounds stress cracking by metal halides using IR and nuclear magnetic resonance techniques

10 p1907 A70-24299

Nylon 6 polyamide tensile stress cracking by metal thiocyanates in aqueous and nonaqueous solutions, comparing results with cracking by metal halides

10 p1907 A70-24300

Electronic stress wave analysis technique /SWAT/ for delayed weld cracking data acquisition

10 p1897 A70-25312

Low cycle fatigue tests on stainless steel, discussing crack behavior dependence on temperature and plastic strain range

11 p2139 A70-26405

Crack model analysis taking into account nonlinear force-deformation ahead of crack tip

11 p2143 A70-26667

Transient analysis of stress waves around cracks under antiplane strain with time dependent loadings based on integral transforms

11 p2145 A70-26698

Ductile fractures analysis using critical strain near crack tip as criterion

13 p2432 A70-28673

Structural Al-Zn-Mg alloys strain hardening effect on mechanical and corrosion properties, noting relationship between stress corrosion cracking and shear cracks

13 p2434 A70-29155

Al-Mg, Al-Zn-Mg, Al-Cu and Al-Cu-Mg welded alloys corrosion cracking resistance as function of composition and fabrication techniques

14 p2597 A70-30972

Electrochemical processes associated with stress corrosion cracking of Ti-Al-Mo-V alloy in aqueous environments

15 p2755 A70-31474

Stress corrosion cracking of Ti and Ti-Al-V alloy in liquid dinitrogen tetroxide

15 p2755 A70-31475

Stress corrosion cracking of high strength structural, tool and marring steels due to hydride, diffusion controlled and mixed embrittlement

16 p2934 A70-34301

Ti-Al-Mo-V alloy stress corrosion cracking, investigating correlation between dislocation substructure and ambient temperature corrosion susceptibility

17 p3113 A70-34371

Stress corrosion cracking in Ti-Al-V alloy exposed to Freon environments

17 p3114 A70-34373

Stress corrosion cracking of Ti alloys in nitrogen tetroxide and methyl alcohol environments in Apollo spacecraft pressure vessels

17 p3199 A70-34453

Cone crack closure in brittle solids, discussing optical and X ray studies on glass and silicon during unloading

17 p3183 A70-34621

Residual stress concentration at fatigue crack tip, using oscillating crystal X ray microbeam diffraction photographic method

17 p3183 A70-34652

Microscopic residual stress in crystals at fatigue crack tip in notched specimen in terms of flow stress and dislocation density

17 p3183 A70-34653

Papers on cracking during postweld heat treatment of Ni alloys covering Rene 41 mechanical properties and resistance to strain age cracking

18 p3277 A70-36522

Rene 41 resistance to strain-age cracking during postweld heat treatment

18 p3277 A70-36523

Rene 41 ductility reduction by environmental oxygen promoting intergranular cracking at high temperatures

18 p3277 A70-36524

Graphite-epoxy resin cross-ply composites fabrication, analyzing residual thermal stresses role in cracking

[ASME PAPER 70-GT-84] Pop-in fractures analyzed by semiquantitative model, establishing relationship between pop-in length, stress intensity factor and crack-front plastic deformation

19 p3549 A70-38626

Stress intensity factors for complicated crack configurations in finite plates, using finite element method with cracked elements

21 p3940 A70-42034

Two stage aging effects on stress corrosion cracking of Al-Zn-Mg alloys, discussing precipitated particles size, surface roughness change and temperature effects

22 p4052 A70-42306

Atmospheric environment effect on residual shear stress corrosion cracking of commercial Al-Zn-Mg alloys subjected to heat treatment regimes

22 p4052 A70-42307

Centrally cracked sheet, calculating riveted and uniformly spaced stringers effect on stress intensity factor

23 p4270 A70-44549

Fibrous composite interface effects and fracture work, discussing tip stresses of crack normal to fiber, energy dissipation by pullout and debonding in brittle fiber composites, etc

24 p4419 A70-45171

Crack detection in cyclic strained steel and Al alloys, using ultrasonic Rayleigh and longitudinal waves

24 p4424 A70-45718

NDT for aircraft service life extension, discussing fatigue tests and crack detection

24 p4346 A70-45719

Cold reduction, refrigeration and annealing effects on stress corrosion cracking of austenitic stainless steels

24 p4365 A70-46389

CRACKS

NT MICROCRACKS

NT SURFACE CRACKS

Complex stress functions and stress intensity factors at tips of star-shaped contour hole in infinite tensile sheet, including crack forking with arbitrary angle

03 p0585 A70-12974

Axisymmetric elasticity theory problem of stressed state of space weakened by concentric circular cracks solved using p-analytic functions to generate boundary value problems

03 p0586 A70-13077

Integral equations for antisymmetric shallow shell stress-strain state with crack, obtaining asymptotic solution in form of power series

03 p0591 A70-13420

Stress-strain state of arbitrarily cracked cylindrical shell under symmetric and asymmetric loading

03 p0594 A70-13736

Steady thermoelastic state of inhomogeneous plane with circular discontinuity on perimeter, studying stress concentration at thermally insulated crack

03 p0595 A70-13738

Strain distribution measurement in plastically deformed region around crack tip in metals using moire grid and optical interference

03 p0513 A70-14019

Internal pressure deformed cruciform crack energy and stress intensity factor determined by linear equations

04 p0777 A70-15499

Spread criterion and stress distribution near penny shaped crack in elastic solid under axisymmetric body forces distribution

05 p0930 A70-16079

Elastoplastic thick layer with disk-shaped crack analyzed for stress and strain, determining width of plastic zone

05 p0939 A70-16482

Crack stability under tension and thermal stresses caused by uniform disturbed heat flow, using Barenblatt fracture criterion

05 p0939 A70-16483

Stress distribution around crack tip of initially curved sheets

05 p0939 A70-16484

Three dimensional brittle body limiting axisymmetric stability under tensile stresses and weakened by ring shaped cracks, determining critical tensile loads

05 p0945 A70-16855

Wedge with symmetric crack at vertex in plane elastostatics, solving biharmonic equation by Wiener-Hopf technique

06 p1164 A70-17441

Thermal fatigue cracks in gas turbine blade models under simultaneous thermal cycling and static tensile loads simulating pulsed regimes

06 p1166 A70-17652

Rectangular plates with symmetrical cracks, studying bending under various crack distributions

07 p1399 A70-18662

Crack self healing in aluminum foil-polyvinyl acetate sandwich structures

07 p1315 A70-18713

Critical stresses for plate with circular hole and cracks assuming symmetrical load

07 p1402 A70-19054

Infinite strip with longitudinal crack and under loading, analyzing stress-strain state

08 p1585 A70-20938

Steady temperature field and stresses produced by thermal sources in infinite elastic plane containing insulated rectilinear crack, determining thermoelastic state of half plane

08 p1587 A70-21172

Mixed boundary value problems involving time dependent boundary regions for penny-shaped crack in viscoelastic materials with one relaxation function

13 p2508 A70-28489

Stressed state of infinite plate with circular hole induced by displacement discontinuity in form of cracks

13 p2514 A70-29292

Atomic planes around crack, noting configuration dependence on law of interplane interaction

13 p2515 A70-29418

Critical equilibrium of plate under omnidirectional tension with radial rectilinear cracks

13 p2515 A70-29429

Nondestructive noncontacting microwave depth measurement of thin slits and cracks in metal surfaces

14 p2584 A70-30507

- Al-Mg alloy nonpropagating fatigue cracks at roots of sharp notches, discussing cyclic strain hardening
14 p2598 A70-31299
- Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes
15 p2756 A70-31561
- Stress intensity analysis method for plates with random cracks array under plane stress
17 p3187 A70-34997
- Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux
17 p3196 A70-35437
- Elastic crack structure, discussing formalism for force law between faces of brittle and semibrittle fractures
17 p3191 A70-35461
- Plastic deformation zones at crack tip considered as distributed heat sources, using stress and strain distribution solutions
17 p3191 A70-35463
- Cracks and tensile failure of interface bonds in elastic composite hollow cylinder, deriving wave front propagation equations
18 p3283 A70-36388
- Book on crack problems in classical theory of elasticity, emphasizing mathematical aspects
19 p3534 A70-37234
- Edge dislocation and uniform and radial fissures in elastic isotropic nonhomogeneous bodies under two dimensional deformation
19 p3540 A70-37956
- Cracked brittle body limiting equilibrium, determining critical loads for two half spaces with various circular rib couplings
20 p3733 A70-40432
- Boundary value problem solution for elliptical crack subjected to impulsive load by method of characteristics and discontinuity relations, calculating stress distribution
21 p3938 A70-41960
- Plastic zones between symmetric and collinear edge cracks in thin plexiglass strips, using He-Ne laser interferometry
21 p3939 A70-41967
- Cracks stress intensity factors in plane problems by combined conformal mapping and boundary collocation technique
21 p3940 A70-42036
- Elastic plate uniform extension with rectangular crack by three dimensional bending theory, using variational principle
22 p4115 A70-42941
- Cracked Teflon heat shields ablative behavior for laminar and turbulent boundary layers in supersonic flow, describing heat transfer to substructure
23 p4282 A70-44585
- Commercial fluorescent penetrants for natural and artificial cracks, considering indication characteristics
24 p4348 A70-45742
- Cyclic loaded high purity Al samples, noting substructure around fatigue cracks
24 p4362 A70-46185
- Thin Al foil subjected to cyclic bending stresses, investigating substructures and strain regions around fatigue crack
24 p4362 A70-46186
- CRAFT**
U VEHICLES
CRANES
Crane helicopters characteristics, history and projected applications to petrochemical, shipping, construction and power transmission industries
[SAE PAPER 700284] 12 p2160 A70-27427
- CRANIUM**
Craniocebral hypothermia effects on phase structure of cardiac thrust in dogs
07 p1204 A70-19140
- CRASH INJURIES**
Mathematical elastodynamic model for parametric dynamic study of forced response solution of motion equations during head trauma
02 p0238 A70-12548
- Aircraft passenger tie-down failure, comparing injury patterns in various accidents to aid reconstruction
17 p3039 A70-35572
- Characteristic injuries from aircraft controls inflicted in fatal accidents, showing pilot position and hand location upon impact
17 p3039 A70-35573
- USAF aviation accidents diagnostic patterns of injury and death, noting increase in fire and/or associated complications
17 p3039 A70-35574
- Aircraft accident injuries possible misinterpretation
17 p3039 A70-35575
- CRASH LANDING**
NT DITCHING [LANDING]
Beacon equipment as means of crashed or force-landed aircraft locator to increase survival possibilities and reduce search cost
01 p0035 A70-10719
- Electronic packaging and cabling on Capsule System Advanced Development Lander for Mars rough landing
06 p1016 A70-17335
- Air crash rescue operations by helicopter ambulances of U.S. Army Medical Department, discussing postcrash fire suppression and injured personnel removal, emergency treatment and evacuation
06 p1002 A70-17714
- Emergency evacuation on land of passengers and crew of airliners, discussing training, equipment, standardization, communication and protective fabrics
15 p2675 A70-32220
- Aircraft in-flight and post crash fire protection developments, considering controlled flammability fuel systems and fire fighting methods
[ASME PAPER 70-GT-109] 18 p3215 A70-36847
- Apollo command module land impact capability, discussing impact dynamics, possible landing area, spacecraft structure, crew couch and strut attenuation system, etc
[AIAA PAPER 70-1165] 21 p3930 A70-41847
- Spinal injury prediction during emergency ejection and crash impact protection research
23 p4153 A70-44489
- Near fatal crash in T-33 aircraft, discussing protective clothing, seat harnesses, bodily position and mental attitude
23 p4153 A70-44497
- CRASHES**
NT CRASH LANDING
NT DITCHING [LANDING]
High energy chemical systems for postcrash emergency evacuation of commercial passenger aircraft, discussing exit opening via explosive methods
15 p2675 A70-32221
- CRATERING**
NT PROJECTILE CRATERING
Angle of incidence effect on oblique impact crater formed by high speed solid spherical particles colliding with massive lead targets
03 p0592 A70-13449
- Lunar cratering and erosion from Orbiter 5 photographs, observing crater densities, highland and maria regions, etc
10 p1942 A70-24643
- Nonlunar origin of tektites indicated from molten glass dispersion generated by terrestrial crater-forming meteorite impact
12 p2302 A70-27584
- Lunar cratering rates from Apollo flights data on solidification ages for Mare Tranquillitatis
16 p2979 A70-34037
- Lunar crater size and shape characteristics from Surveyor missions, discussing rimless shallow and cup shaped craters
20 p3707 A70-39954
- Apollo 12 lunar module impact laboratory simulation, investigating possible downrange ballistic effects and cratering process
20 p3709 A70-39976
- CRATERS**
NT LUNAR CRATERS
NT METEORITE CRATERS
NT TYCHO CRATER
Slopes distribution over finite span on planetary surface excavated by primary impact craters, including typical lunar mare crater densities
01 p0178 A70-10443
- Mars craters and crater-like objects catalog from Mariner 4 photographs, statistically analyzing diameter-frequency relations
01 p0179 A70-10523
- Mars primitive atmosphere analyzed from statistics of craters quantity as function of diameter, using Mariner 6 and 7 probe photographs
09 p1763 A70-23318
- Cratered planetary surface distribution and covariance functions of elevations using statistical model
13 p2488 A70-28763
- CRAZING**
U SURFACE CRACKS
CREEP ANALYSIS
Creep propagation determination in pure Al for microscopic and macroscopic continuum points used for determining stiffness and strain time history
01 p0121 A70-11156
- Backreflection X ray microbeam camera with arrangement for positioning preselected area to study grain boundary during creep by Laue method
03 p0492 A70-13759
- Transient creep analysis of simply supported circular cylindrical shells subjected to internal pressure based on strain and time hardening theories
03 p0595 A70-13813
- Plane two body contact creep problem in presence of adhesive forces reduced to solving coupled integral equations with complex valued kernels
04 p0766 A70-14421
- Creep behavior of mascons to infer lunar temperatures at depth compared with electrical conductivity data and heat conduction equation
05 p0906 A70-15892
- Time dependent creep and elastic strain interaction in plates and pressure vessels of cylindrical and spherical geometry
05 p0942 A70-16804
- Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range
05 p0875 A70-17068
- Vibration frequency influence on vibrational creep of Al-Mg-Si alloy, describing mechanism in terms of strain hardening, additional slip and dislocation movements
06 p1168 A70-17931
- Revolving shallow shells steady creep equations solved by approximation adaptable to computer
07 p1402 A70-19051
- Inelastic behavior of solids strained at high temperature emphasizing hot creep phenomena in aviation materials
07 p1406 A70-19346
- Isothermal steady state creep extension and flexure of laminated beams with alternating layers, indicating nonlinear stress distribution
07 p1412 A70-19964
- Thick walled orthotropic cylinder subjected to internal pressure analyzed for stress distribution and creep rates, using constitutive equations and Norton law
07 p1416 A70-20234
- Dynamic strain aging effect on Mo-Ti-C alloy creep, relating carbides precipitation during plastic deformation to mobile dislocations density
08 p1524 A70-21954
- Limit and shakedown loads in creep range investigated on sheet rolled aluminum at room temperature for structural design applications
09 p1775 A70-22591
- Creep behavior transition analysis, considering activation energies and creep rate dependence on temperature, stress and grain size
09 p1704 A70-22720
- Creep deformation in single crystals of gamma prime precipitation hardened nickel base alloys at intermediate temperatures
09 p1705 A70-22809
- Layered conical shell creep under axisymmetric load and time dependent temperature field by iterating boundary integral equation
09 p1779 A70-23099
- Unsteady creep of thin walled open section bars under free torsion using successive approximations
09 p1779 A70-23101
- High temperature creep of prestrained molybdenum single crystals as function of physical treatment and crystal orientation
10 p1902 A70-23860
- Structural behavior during creep by step by step process suitable for computers after linearizing non-linear equations
[ONERA-TP-805] 10 p1958 A70-24545
- Circular membrane creep under one-sided hydrostatic pressure, using governing equations for finite deformation
10 p1959 A70-24828
- Transient creep analysis of pressurized circular cylindrical shells based on strain and time hardening theories
10 p1963 A70-25089
- Solid and foam polyurethane creep stress, using multiplier for foam stress for comparison
11 p2141 A70-26601
- Finite element computer code /AXICRP/ for creep analysis of plane stress, plane strain and axisymmetric bodies of revolution
11 p2015 A70-26682
- Vibrocreep effect on Al-Mg-Si alloy vibration frequency and mean and maximum stress at constant temperature
13 p2512 A70-28980
- Creep rate intensity approximate solution as invariant function of stress intensity, determining equivalent stresses under creep
15 p2814 A70-31542
- Shallow shells of revolution under axisymmetrical loads, analyzing plasticity and creep by integral equations algorithm
15 p2817 A70-32164
- Phenomenological theory of transient high temperature creep, considering internal back stress
15 p2763 A70-32809
- Steady state high temperature creep theory, including internal back stress and temperature dependencies
15 p2763 A70-32810
- German monograph on two dimensional stress-strain state for material subjected to creep, using differential equations derived from equilibrium conditions
17 p3189 A70-35376
- Plane cross section hypothesis applied to fully developed creep in thin walled tube subjected to internal pressure and bending moments, calculating stress concentration
18 p3340 A70-36571
- Low aspect ratio wings under conditions of creep, calculating stress by method of strains
19 p3534 A70-37244

- German monograph on creep in statically indeterminate reinforced concrete beams with graduated cross sections
19 p3548 A70-38473
- Solid bodies statistical creep analysis, assuming macroscopically homogeneous isotropic polycrystallinity
20 p3725 A70-39866
- Inconel short term creep properties measured for various temperature and stress levels, presenting results in polynomial and graph form
22 p4055 A70-43098
- Equations of state in quadratic viscoelasticity for orthotropic media, deriving tensors of creep and relaxation centers
22 p4119 A70-43711
- Solidified polyglycol maleinate resin optical and mechanical properties under tensile stress creep, using hereditary photoelasticity
22 p4121 A70-43723
- Mg high temperature creep mechanism in high and low stress regions, using isothermal tensile creep tests
23 p4204 A70-43885
- Plastic creep displacement and deformation bounds computation for simple redundant structures, using energy theorems
24 p4422 A70-45288
- CREEP BUCKLING**
Rectangular plates deformation under uniaxial compression, studying postcritical buckling behavior in presence of creep
01 p0201 A70-10937
- Buckling of three layer cylindrical shells under steady creep conditions, deriving axisymmetric deformation
05 p0935 A70-16234
- Circular cylindrical shells creep buckling under nonuniform external loads, considering thermal effects and initial imperfections
07 p1405 A70-19253
- Isothermal steady state creep extension and flexure of laminated beams with alternating layers, indicating nonlinear stress distribution
07 p1412 A70-19964
- Rectangular thin plates in small deformation transient creep bending, using finite element method in iterative procedure
08 p1590 A70-21356
- Microstructure of wrought arc-cast polycrystalline W sheet after high temperature creep deformation at various stress levels
08 p1525 A70-21962
- Stress concentration in elastoplastic and creep deformations determined by approximate solution
11 p2134 A70-25845
- CREEP DIAGRAMS**
Temperature-time-variable stress-strain state of polymer structures, solving creep equation by linear model with rheological properties
01 p0211 A70-11426
- Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
03 p0588 A70-13246
- Vibrational creep curves of Al alloy under uniaxial stress level and amplitude, noting influence of small vibrations
06 p1168 A70-17930
- Long time strength and creep rectilinear diagrams constructed for heat resistant alloys to obtain extrapolation values
10 p1903 A70-24239
- Plastic structural components service life estimation based on creep diagrams and short time tests
16 p2941 A70-34323
- Short term creep and stress-relaxation curves analytic extrapolation for metals and alloys with lifetimes exceeding test duration
19 p3548 A70-38464
- CREEP PROPERTIES**
NT SHEAR CREEP
NT STEADY STATE CREEP
NT TENSILE CREEP
Creep deformation modes of Ni-base austenitic superrefractory alloy as function of test temperature
01 p0118 A70-10704
- Intrinsic/extrinsic stacking fault pairs observed during creep of single crystals of gamma prime precipitation hardened Ni-base alloy, developing viscous slip model
01 p0119 A70-10731
- Dislocation climb theories of creep and superplasticity derived, postulating strain hardening and recovery processes with independently determined rates
02 p0317 A70-12315
- Polycrystalline Ni steady state creep characteristics measurement emphasizing temperature dependence of creep rate
03 p0504 A70-13022
- Creep and recovery of polyvinyl chloride reinforced by oriented cotton fibers, considering roles of fiber density and stress magnitude
03 p0516 A70-13499
- Dynamic equilibrium prediction for creep and fatigue of various metals under various loading conditions, using time-temperature and cyclic stress-strain parameters
04 p0704 A70-14759
- Structural metals hysteresis properties under cyclic plastic loading at room temperature, considering cycle dependent creep and stress relaxation
04 p0705 A70-14763
- Creep in single crystal and polycrystalline Nb between 1300-1900 C under stresses, showing stress independent activation energy
05 p0862 A70-16202
- Creep rupture effect on fatigue damage of structural material, constructing nondimensional stress range diagrams
05 p0943 A70-16806
- Unsteady cyclic creep effect on stressed state and margin safety of elements, noting discrepancy of experimental and theoretical characteristics
05 p0866 A70-17030
- Strain hardening equation for anisotropic medium under creep
05 p0952 A70-17035
- Uniform cross section rings creep characteristics testing method, proposing relations for calculating stresses and strains
05 p0952 A70-17037
- Analog to Burger model applied to rotating disk creep problem solution and stress-strain state of plane sample with hyperbolic groove
05 p0952 A70-17038
- Cyclic creep curves plotted from expansion diagrams for steel, copper and brass under small numbers of cyclic compression tension loads
06 p1162 A70-17388
- Creep-low cycle fatigue interactions in Udimet alloy at elevated temperatures, investigating cumulative damage
06 p1086 A70-17455
- Anisotropic fiberglass reinforced plastics creep properties under biaxial compression, showing compressive to tensile strain elimination or change
07 p1316 A70-19546
- Fiberglass reinforced plastics creep behavior under axial compression, studying time dependence of elasticity modulus and Poisson coefficient
08 p1526 A70-21174
- Interstitial sinks effect on structure and creep behavior of dispersion-strengthened Cb base alloy
08 p1521 A70-21703
- Temperature dependence of microplastic yield and flow stress and transient creep responses of gamma prime phase
08 p1522 A70-21709
- Potential function of creep strain rates for incompressible nonstrengthening materials exhibiting different creep characteristics in tension and compression
09 p1769 A70-22122
- Energy storage in creep deformed graphite from stress reduction tests, discussing negative creep, test procedures and results
09 p1709 A70-22386
- Alloy equivalent susceptibility to damage at intermediary service periods and different stress levels under creep conditions at 750 C
09 p1701 A70-22470
- Heat resistant alloys creep ductility, considering grain boundary cavitation, sliding and migration
09 p1701 A70-22554
- Rotating cylinder stress-strain under steady and unsteady creep, using Lagrange variational principle for differential equations
09 p1779 A70-23100
- Soviet book on creep of structural elements at high temperature noting metals, concrete and polymer materials, buckling, variety of structural elements and creep resistance
09 p1781 A70-23266
- Stress concentration at circular hole in plate, considering material creep and aging effects
09 p1782 A70-23290
- Mo single crystals creep behavior temperature and stress dependences using X ray analysis
09 p1708 A70-23543
- Fiberglass reinforced textolite creep strains as function of stress, temperature and time, noting correlation with theory to 200 C
09 p1710 A70-23725
- Austenitic steels and alloys high temperature softening under conditions of stress relaxation and creep, noting hardening action of plastic deformation
09 p1709 A70-23785
- Creep forming application in producing aircraft parts from metal sheets, plates and extrusions, discussing blank forming and drawing
10 p1893 A70-23854
- Viscoelastic half plane creep under discontinuous boundary conditions, obtaining exact closed-form solution based on Fourier transforms and distribution theory
10 p1965 A70-25325
- Creep deflections and collapse times for supported thin shallow spherical shells under uniform pressure predicted using variational theorem
11 p2135 A70-25963
- Glass fiber reinforced thin rectilinear orthotropic plastic plates bending using finite difference method with allowance for creep
12 p2324 A70-27531
- Metallic materials under cyclic stress conditions, investigating creep rate dependence on cycling frequency and impurities during static-to-dynamic transition
13 p2513 A70-28993
- Rotating disk service life and structural failure under creep, using Tresca yield and maximum stress criterion
13 p2514 A70-29290
- Creep properties of torsion-tension metal members subjected to nonproportionate loading at high temperatures
14 p2656 A70-30637
- Two dimensional stress-strain fields under elastic and elastic-plastic strains and steady state creep, calculating stress distribution around hole in cylindrical shell
15 p2813 A70-31533
- Steel and copper alloys torsion-tension members under nonproportionate loads, predicting creep behavior
15 p2759 A70-32316
- Cumulative creep strain and damage based on stress amplitude coefficients, considering continuous single step system of loads
15 p2821 A70-32339
- Thin plates with central circular holes, investigating creep behavior for biaxial edge tractions
15 p2822 A70-32359
- Al-Mg alloys creep characteristics dependence on Ag, Si and Zn additions during aging heat treatments, establishing activation energy and stress exponents
16 p2930 A70-33086
- Polycrystalline NaCl-KCl solid solution alloy, considering high temperature creep under constant compression stress
16 p2961 A70-33275
- Creep and tensile fatigue behavior of notched and unnotched graphite/epoxy composites
16 p2938 A70-33503
- Activation energy for creep at intermediate temperatures, allowing for elastic modulus change
16 p2991 A70-33790
- Ti-Al-Cr-Fe tensile, fatigue and creep properties at various temperatures, considering industrial applications
17 p3121 A70-34428
- Void formation and creep during fast neutron irradiation of austenitic stainless steel based on thermodynamic approach, calculating nucleation and growth rates
17 p3123 A70-34626
- Flexural creep deflections of glass fiber reinforced polycarbonate and Nylon thermoplastics
17 p3127 A70-34657
- Working fluid /Ar/ purity and stability effects on fatigue life and creep of Nb and Mo alloys using gas analysis, microstructure and microhardness data
17 p3126 A70-35715
- Cyclic strain effects on creep for steel at elevated temperatures, discussing overload frequency effects on plastic strain buildup
17 p3127 A70-35719
- Structural members of isotropic and anisotropic polymers, investigating creep behavior under simple stressed state
17 p3192 A70-35740
- Microstructural changes of Ni-Cr lamellar eutectic alloy during creep deformation at 625 and 760 C
18 p3272 A70-36034
- Creep bending of rectangular plates with stress-strain and strain displacement nonlinearities
18 p3343 A70-36703
- High vacuum effects on creep properties of single crystal low carbon nickel base superalloy
19 p3451 A70-37705
- Plane waves superposed on solid during steady state isothermal creep deformation subjected to unidirectional constant initial tensile stress
19 p3537 A70-37791
- Reciprocity theorem for stresses and strains in medium under creep and temperature field
19 p3548 A70-38582
- Alumina effects on Nb creep activation energy at elevated temperatures, noting independence from chemical composition and creep stresses
19 p3453 A70-38710
- Dispersion strengthened Ni-Cr alloys creep properties, investigating temperature, applied stress and thorium dioxide particles effects
20 p3644 A70-38984
- Ni-Cr heat resistant alloys structural transformation kinetics under aging, creep and operational conditions, discussing solid solution decomposition, hardening phases coagulation and dissolution, etc
20 p3645 A70-39037

- Creep and breakdown of thin walled cylindrical shells with circular holes subjected to internal loads at high temperature, discussing time to failure
20 p3721 A70-39777
- Medium thickness shells under thermal creep using Saint Venant semiinverse method
20 p3722 A70-39787
- Plastic bodies rupture and crack growth under creep, considering tension of bar with symmetrical angular notches
20 p3727 A70-39882
- Rotating elastic shafts rectangular shape stability under creep conditions, considering single mass rotor
20 p3727 A70-39883
- Strain component determination for grain boundary sliding influence in creep of alpha iron
20 p3735 A70-40446
- Orthotropic fiberglass-reinforced plastic cylindrical shell with allowance for material creep, calculating stress-strain state during bending under external pressure
21 p3842 A70-40649
- Creep and stability of microstructural Al elements under varying temperatures, noting grain boundary migration
21 p3839 A70-41429
- Duralumin constant speed tensile strength tests at 200 C, discussing creep thresholds statistical distribution in elongations interval
21 p3840 A70-41432
- Copper and Al polycrystalline single crystal substructure changes, examining high temperature, unsteady and diffusion creep
22 p4056 A70-43342
- Fiberglass reinforced plastic strength and deformation properties under creep and stress relaxation, investigating temperature effects and load duration
23 p4209 A70-43980
- Unidirectionally solidified carbide reinforced Co-Cr eutectic alloy, examining tensile strength and creep behavior
24 p4358 A70-45236
- Short-term creep and erosion resistance testing of Ti alloy in high speed air flows under aerodynamic vibrations
24 p4360 A70-45826

CREEP RESISTANCE

U CREEP STRENGTH CREEP RUPTURE STRENGTH

- Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength
01 p0126 A70-11646
- Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads
02 p0383 A70-11655
- Reinforced plastics creep rupture strength under compression along elastic symmetry axes
02 p0322 A70-12805
- Grain size, forging parameter and microstructure effect on stress-rupture properties of wrought Ni-base alloy
03 p0511 A70-13567
- Creep rupture data processing by computer, performing data collection and processing separately
03 p0487 A70-13569
- Creep rupture and fatigue strength in solid body mechanics, considering triaxial stress state and simplified creep rupture theory variant
03 p0599 A70-14249
- Cold working with subsequent heat treatment increased creep rupture and creep behavior of V alloys
04 p0708 A70-15372
- Stress rupture strength and relaxation and time to failure of AMG-6M sheet under creep using energy dissipation method
05 p0952 A70-17034
- Stress rupture tests with Nb-based alloys in 1273-1673 K temperature range
05 p0952 A70-17039
- Thermocyclic creep and rupture strength of Nb, Ta and Mo refractory alloys under temperature and load variations, showing failure dependence on cycle parameters
05 p0867 A70-17043
- Heat resistant steel and nickel alloys stress rupture strength at operating temperatures, discussing endurance diagrams under cyclic bending loads
05 p0868 A70-17047
- Stress rupture strength of turbine blades fir tree type root joints under prolonged loads at high temperatures, studying disk teeth shearing
05 p0953 A70-17055
- Refractory metal structural elements stress rupture strength in vacuum and inert gas tested up to 2000 K
05 p0829 A70-17071
- Tensile and stress rupture tests facility for microsamples stability at temperatures up to 3300 K, investigating deformation and failure
05 p0830 A70-17073
- Materials stress rupture strength and elastic constants at liquid hydrogen temperature, describing method and facility
05 p0955 A70-17076

- Creep rupture and residual tensile strength tests to evaluate long time properties and structural stability of Inconel 718 alloy, performing phase analysis
07 p1310 A70-19731
- High temperature creep rupture tests of arc cast and powder metallurgy wrought unalloyed W sheets
07 p1313 A70-19884
- Dynamic creep rupture of stainless steel tested at high stress levels and temperatures
08 p1518 A70-21333
- Cr-Mo steel strength and structural stability during tubular stress-rupture testing with high pressure hydrogen, discussing welding effect on strengths
08 p1519 A70-21455
- Gamma-gamma prime mismatch effects on stress rupture of Ni and Fe-Ni based alloys with Al and Ti hardeners
08 p1521 A70-21701
- Axial constant load creep and strength rupture measurements of B-coated and silicon carbide-coated B filament reinforced Al alloys
08 p1521 A70-21702
- Tensile, fatigue, creep and stress-rupture behavior of unidirectional, unidirectional off-axis and cross-ply composites of B filaments in Al alloy matrix
08 p1531 A70-21896
- Creep and rupture of graphite-epoxy composites under unidirectional state of stress and controlled temperature environment, extrapolating long term loading behavior
08 p1531 A70-21897
- Creep failure fatigue life prediction methods involving hold period effects on high temperature fatigue properties
09 p1775 A70-22594
- Diffusion processes rate changes in metals and alloys resulting from radioactive emission, noting role in stress rupture strength mechanisms
11 p2068 A70-26595
- Rectangular beam creep rupture time under bending moment and axial tensile force, using power series to solve integral equations
11 p2142 A70-26635
- Ni-based heat resisting alloy /Inconel 700/ investigated for hot corrosive environment effect on stress rupture and fatigue strengths
13 p2434 A70-29157
- Stress rupture shear strength of fiberglass reinforced plastics under monotonic, prolonged and cyclic loading
15 p2766 A70-32853
- Al, Ga and In effects on creep and rupture stress of Ti at 500 C
17 p3120 A70-34425
- Power and exponential time dependences of long term creep strength for wide stress range, assuming linear heat resistance
19 p3449 A70-37340
- Stress rupture strength dependence on specimen geometry /scale effect/ from analyzing metals failure under prolonged loads
19 p3547 A70-38428
- Oxide dispersed Cu alloys preparation by surface oxidation of powders, considering structural stability and stress rupture properties
20 p3646 A70-39103
- Hot corrosive environment effect on stress rupture and fatigue strength of Ni heat resistant alloy used in gas turbine rotating blade
20 p3647 A70-39241
- High temperature Ni base superalloy stress-rupture life dependence on casting variables and section size
20 p3648 A70-39413
- Metal cracking and fracture mechanics under creep conditions at elevated temperatures, discussing notch rupture testing
21 p3937 A70-41437
- Carbon steel thin walled cylinders creep fracture subjected to combined tension and internal pressure by large strain theory
21 p3840 A70-41438
- Annealing temperature effect on creep rupture strength of Ta-W-Hf alloy
22 p4054 A70-42741
- Refractory metal alloys tensile and creep rupture properties for reactor fuel jackets
24 p4364 A70-46347

CREEP STRENGTH

- Heat and creep resistant Ni- and Fe-base alloys application in gas turbines, superheaters, steam pipes, chemical and petrochemical plants and heat treatment equipment
02 p0319 A70-12711
- Metals and alloys creep under tension and compression at elevated temperatures, considering plastic deformation equation applicability
04 p0707 A70-15265
- Creep and strength criteria reliability for turbomachine disks, determining stresses, destructive rotations and strength margin
05 p0953 A70-17056
- Creep deformation resistance decrease in pure Al tubular specimens at high temperatures under multiple stress reversals
06 p1087 A70-17456

- Book on optimization by variational methods covering use of differential equations, Pontryagin minimum principle, optimal and feedback control, dynamic programming, etc
06 p1093 A70-17650
- Weldability of super alpha high creep strength Ti alloy investigated by synthetic heat affected zone method using thermal cycling tests
06 p1090 A70-18501
- Prestraining effect on cavity formation at grain boundaries causing creep strength decrease
07 p1307 A70-19392
- Creep strain effect on cyclic fatigue life of duralumin at room temperature
08 p1516 A70-20988
- Interstitial sinks effect on structure and creep behavior of dispersion-strengthened Cb base alloy
08 p1521 A70-21703
- Silicon containing alpha matrix Ti alloy with high creep strength and stability at elevated temperatures, studying processing and heat treatment effects on properties
08 p1509 A70-21853
- Heat resistant cast alloys creep strength reporting criteria, comparing U.S. and European practices [ASM PAPER P9-15.2]
09 p1702 A70-22558
- Soviet book on creep of structural elements at high temperature noting metals, concrete and polymer materials, buckling, variety of structural elements and creep resistance
09 p1781 A70-23266
- Nickel base alloy as die material for creep forming titanium
11 p2060 A70-26424
- Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times
12 p2328 A70-28278
- Alloy high temperature creep and long term strength, determining exponential relations between stress, strain rate and durability
15 p2755 A70-31529
- Ti-Al-Sn-Zr system high temperature creep strength and ductility retention
17 p3120 A70-34424
- Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling
17 p3120 A70-34426
- Creep resistant Ti alloys with high temperature strength and stability, comparing tensile data for room temperature and 900 F
17 p3122 A70-34440
- Rolled fine grained aluminum-alumina particles composites, determining creep strength dependence on temperature and tensile stress axis orientation
18 p3274 A70-36051
- Heat treatment and alloying element influence on phase and structure transformations in Ti alloys, investigating mechanical properties and creep resistance
20 p3645 A70-39039
- Ti alloy tension creep tests at room temperature, determining strength for correlation with stress relaxation
22 p4055 A70-43097
- Tubular Al creep resistance increase by temperature jumps during steady phase of creep
22 p4056 A70-43344
- Heat treatment effects on dispersion strengthening of Ni alloys, showing enhanced long term creep strength at 1100 C
24 p4360 A70-45828

CREEP TESTS

- Tantalum base alloy T-111 creep tests in vacuum at elevated temperature suggesting diffusion controlled microcreep mechanism
01 p0120 A70-10738
- Apparatus for continuous creep measurement at high temperature for fine wire and thin tubular samples with small cross sectional areas
01 p0088 A70-10746
- Constant stress creep and recovery behavior experiments of polycarbonate under combined tension and torsion stresses in weakly nonlinear range
01 p0130 A70-11083
- Mo coated with Ni-base Nimonic and Co-base heat resistant alloys, for working degree effect on creep rupture strength
01 p0126 A70-11646
- Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature
02 p0315 A70-11660
- Integral equation solution in viscoelasticity theory based on creep tests with polymer containing elastic inclusion, improving convergence of approximations method
02 p0390 A70-12801
- Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values
03 p0508 A70-13247
- Machine for refractory crystals creep testing in thermal vacuum or inert protective medium
03 p0493 A70-13959

Life fraction hypothesis equation in creep testing derived on basis of chemical reaction rate theory [ASME PAPER 69-MET-A] 04 p0705 A70-14875

Time-to-rupture dependence on temperature and stress related to chemical reaction rate equation in creep testing [ASME PAPER 69-MET-B] 04 p0770 A70-14877

Creep and wear due to microslip under dry rolling contact conditions 05 p0854 A70-15890

LF creep characteristics in Block-wall Permalloy films, using high resolution Bitter pattern technique [IEEE PAPER 5.7] 05 p0893 A70-16996

Effective stress evaluation under cyclic trapezoidal loading and creep noting use in stationary test data conversion 05 p0951 A70-17031

Refractory Ni alloys defects accumulation under creep and cyclic temperature variations assessed by relative lifetime additive method 05 p0866 A70-17032

Stress rupture strength and relaxation and time to failure of AMG-6M sheet under creep using energy dissipation method 05 p0952 A70-17034

Creep effects on structural failure under low cycle fatigue at high temperatures, noting role of plastic deformation 06 p1164 A70-17409

Test stand for endurance and creep testing of plastics, glazed ceramics and other brittle materials 06 p1028 A70-17665

Creep and stress relaxation tests to investigate time dependent fracture strength of unidirectional glass fiber reinforced epoxy composites 07 p1321 A70-19962

Hydrogen penetrability in heat resistant steels subjected to high temperature creep, observing activation energy decrease with increased stress 08 p1515 A70-20923

Cyclic creep and relaxation of heat resistant alloys at high temperatures, showing inapplicability of static load conditions 08 p1516 A70-20982

Gaseous environments effects on creep of austenitic stainless steel, observing weakening in air and surface cracking in nonoxidizing atmospheres [ASME PAPER 68-MET-3] 08 p1519 A70-21453

Internal stresses and substructures dependence on thermomechanical histories of stainless steel during creep, noting subgrain orientation 09 p1705 A70-22805

Creep and stability of perforated and unperforated turbine disks under operating conditions 09 p1779 A70-23097

Mo single crystals dislocation substructure strain dependence after creep using etch pitting techniques 09 p1708 A70-23544

High temperature compressive creep tests at constant stress, describing strain measurement techniques and servocontrolled compressive equipment 12 p2206 A70-27214

Polycrystalline W-Re alloy creep tests in tension, investigating dislocation substructure formation as function of stress, temperature and strain 12 p2255 A70-27606

Beam-bending and circular plate testing rigs for creep with constant and variable loading, discussing tests repeatability and accuracy 12 p2207 A70-27618

Equipment specifications and design for creep testing at variable load and temperature under uniaxial tension, emphasizing test environment control 13 p2509 A70-28537

Short term creep of Ni in vacuum, stationary air and high speed air flow at various temperatures and loads 14 p1594 A70-30167

Polycrystalline Al microstrain distribution nonuniformity under creep and static tension 14 p2595 A70-30173

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests 14 p2591 A70-30934

Ti alloy stability after long term creep exposure at various temperatures 17 p3120 A70-34421

Ultrahigh vacuum creep rate measurements with continuously increasing loads on Ta-base alloy, relating creep life with temperature and stress rate 17 p3122 A70-34552

Creep testing machine with constant load for HF thermal cycling under vacuum 17 p3063 A70-35587

Creep and failure tests for Ti alloys at 500 C, discussing work dissipation during creep process 17 p3126 A70-35714

Polythermal phase equilibrium and heat resistance of Ti-rich Ti-Zr-Al alloys, noting creep and tensile tests 18 p3275 A70-36124

Strain hardening directionality during creep tests of tubular samples under combined tensile stresses and bending moments 18 p3341 A70-36588

Low temperature creep deformation recorder with liquid He coolant, discussing Al and Pb single crystal tests 19 p3395 A70-37352

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature 19 p3452 A70-38434

Durability of refractory tubes of small thickness under creep with account of scale factor and unsteady conditions, tabulating experimental and theoretical values 19 p3453 A70-38465

Brittle failure under creep during slow cyclic loading, discussing damage accumulation assumptions 20 p3725 A70-39868

Contact shaped fiberglass-reinforced plastic tensile creep tests, showing strain property linearity dependence on direction 21 p3841 A70-40642

Ti alloy tension creep tests at room temperature, determining strength for correlation with stress relaxation 22 p4055 A70-43097

Wrought Nimonic alloy, measuring stress redistribution due to creep under variable load and temperature 23 p4274 A70-44911

Servohydraulic testing machine for measuring cyclic stress-strain behavior of materials subjected to fatigue and creep at elevated temperature 23 p4178 A70-44912

Prestraining effect on cellular precipitation in Ni-Cr lamellar eutectic during creep testing 24 p4359 A70-45247

Stress dependent creep rate in nickel based superalloy single crystals 24 p4359 A70-45289

Near critical heat transfer in cryogenic fluids, discussing thermodynamic and transport properties 23 p4279 A70-44357

CRITICAL FREQUENCIES

Ionization variations and correlation coefficients of F 2 critical frequency variations, using airborne ionospheric sounder over Sogra and Kerguelen Island conjugate areas 01 p0080 A70-11224

F 2 layer state prediction as function of solar activity by series expansion for describing space-time variations of monthly F 2 medians critical frequencies 01 p0083 A70-11547

Ionospheric critical frequency recorder development for continuous recording of frequency variations with time 02 p0303 A70-12736

Lunar tides in midday critical frequency of F 2 layer, determining phase reversal location 04 p0651 A70-15309

Magnetic declination effect on F 2 layer behavior determined from critical frequencies at two magnetically conjugate points 04 p0683 A70-15742

F 2 region critical frequency conjugacy latitudinal variations observation at conjugate stations compared with results from nonconjugate stations 05 p0839 A70-16286

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation 07 p1266 A70-19450

Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies 07 p1267 A70-19455

Global distribution of F 2 layer critical frequencies by expanding empirical function of diurnal variations into natural orthogonal components 07 p1277 A70-20451

Electrical parameters approximate calculations for waveguides with complex cross sections by Schwarz alternating method, determining critical frequencies of fundamental modes 09 p1632 A70-22406

Midlatitude sporadic E layer critical frequencies dependence on solar activity using vertical ionospheric sounding data, observing ionization correlation 10 p1882 A70-25197

F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies 11 p2042 A70-25533

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts 11 p2043 A70-25549

Flutter instability critical velocity and frequency for thin cantilevered plate with follower jet determined by Galerkin and computer simulation 12 p2316 A70-27106

F 2 region critical frequency from Alouette 2 satellite data compared with ground based measurement 12 p2226 A70-28066

F 2 critical frequencies from Alouette 2 satellite ionogram data compared with ground-based sounding results 13 p2396 A70-29094

F 1 layer occurrence and geometrical parameters relative to critical frequencies of F1/F2 layers 14 p2571 A70-30228

Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations 14 p2571 A70-30236

Magnetic declination effect on F 2 layer behavior determined from critical frequencies at two magnetically conjugate points 14 p2575 A70-30826

Magnetic field effect on critical flutter speed and frequency of elastic plate in ionized gas flow, deriving dispersion equation

15 p2818 A70-32173

Ionospheric small scale ionization discontinuities vertical drift effect on diurnal variations of F 2 layer critical frequency

18 p3246 A70-36086

Midlatitude F 2 perturbations from vertical sounding stations data during solar activity minimum, discussing F 2 region critical frequency variation

18 p3249 A70-36924

Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies

18 p3250 A70-36929

F 2 region critical frequency diurnal variation forecasting, using series expansion of natural orthogonal components

19 p3409 A70-37327

Transversely magnetic and electric wave critical frequency spectra in Pi and H section waveguides, using summary representation method

19 p3378 A70-37735

F 2 region critical frequency cross correlation coefficients for magnetically conjugate stations, considering magnetic disturbances effects

21 p3816 A70-41069

F 2 layer midday ionization equatorial anomaly during summer and winter solstices, using calculated mean critical frequencies

21 p3819 A70-41283

F 2 layer critical frequencies rms deviations approximate dependences on latitude and solar activity for computer calculation of long-range ionospheric forecasts

21 p3819 A70-41299

F 2 layer critical frequency and maximum electron concentration statistical characteristics for predicting SW propagation conditions

23 p4188 A70-44056

Ionospheric layers critical frequencies recording, using automatic interplanetary station type probe

23 p4194 A70-44088

F 1 layer occurrence and geometrical parameters relative to critical frequencies of F 1/F 2 layers

24 p4331 A70-46303

Geomagnetism-sporadic E layer relationship, discussing critical frequencies and H component variations

24 p4332 A70-46311

CRITICAL LOADING

Externally pressurized air journal bearings load capacity, film stiffness, attitude-eccentricity locus and mass flow, studying supply pressure and shaft rotation effects

[ASME PAPER 69-LUB-29] 01 p0100 A70-10380

Synchronous dynamic response of gaseous double squeeze film thrust plate with very high frequencies, showing increased load capacity and stiffness

[ASME PAPER 69-LUB-8] 01 p0102 A70-10395

Externally pressurized journal bearing load tests, comparing load capacity data with analytical values

01 p0103 A70-10559

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations

01 p0205 A70-11141

Carrying capacity of shells of revolution obtained with threads spun around metallic shell, including stresses during spinning process

01 p0210 A70-11414

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc

02 p0352 A70-11659

Al alloys strips weakened by holes, analyzing limiting tensile load-carrying capacity

02 p0384 A70-11741

Structural support strut design for cryogenic propellant tanks to optimize load carrying capability and heat transfer characteristics

02 p0306 A70-11942

Newtonian liquid lubricated spiral groove bearing load capacity and power loss dependence on viscosity variations with temperature

[ASLE PREPRINT 69-LC-21] 02 p0309 A70-12533

Tangential force applied to column end by jet reaction from nozzle clamped to column end, obtaining critical load and oscillation frequency

02 p0389 A70-12644

Cylindrical shells buckling under biaxial compression and transverse loads, examining critical loads dependence on shell parameters, end conditions and elastic properties

03 p0590 A70-13380

Stability analysis of orthotropically symmetric strip under uniformly distributed compressive forces applied to shorter ends, deriving critical load formula

03 p0590 A70-13402

Limiting equilibrium under axial tension of brittle body with parallel axisymmetric external cracks, studying critical load, crack propagation, etc

03 p0594 A70-13737

Differential equations solution in terms of elementary functions applied to evaluate critical buckling loads for struts of variable cross sections

03 p0602 A70-14328

Supercritical strains and buckling in rib-reinforced cylindrical shells under axial compression using strain-energy method

04 p0766 A70-14478

Turbine blade designs considered for increasing load capacity covering tandem, jet-blade and base plain blade configurations and test results

[ASME PAPER 69-WA/GT-1] 04 p0734 A70-14894

Critical load and instability of smooth and mesh surface mechanical systems subjected to impinging fluid jet, noting static buckling and flutter effects

[ASME PAPER 69-WA/APM-10]

Orthotropic axially compressed conical shell stability, evaluating lower critical load and postbuckling state

04 p0772 A70-14917

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

04 p0773 A70-15009

Disk stress concentrations calculation beyond elastic limits taking into account effect on bearing capacity

04 p0775 A70-15261

Carrying capacity and deformation susceptibility of anisotropic fiberglass reinforced conical and cylindrical plastic shells under axial compression

05 p0933 A70-16209

Stability, critical load and strength algorithm for fiberglass reinforced cylindrical plastic shells under external load allowing for shear stresses

05 p0933 A70-16211

Stability and critical loads of transversely isotropic reinforced plastic annular plates with weak shear resistance under axisymmetrical buckling

05 p0933 A70-16213

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure

05 p0934 A70-16227

Stability and critical load algorithm for flexible shallow spherical and conical shells of revolution derived from variational equation

05 p0935 A70-16236

Small amplitude spherical elastic-plastic waves initial behavior studied for critical and supercritical loading

05 p0945 A70-16819

Precooling effect on load carrying capacity of heat resistant plastics subjected to unilateral heating

05 p0874 A70-17065

Fiberglass reinforced plastics load carrying capacity under unsteady unilateral heating described by thermal similarity criteria

05 p0955 A70-17070

Carrying capacity of machine parts under small numbers of cyclic plastic deformation, reviewing breakdown criteria relation to kinetics of stress-strain states

06 p1161 A70-17383

Elastoplastic rod systems under repeated variable loads, calculating carrying capacity from plastic failure considerations

06 p1163 A70-17395

Prismatic pendularly supported beam load-forced vertical vibrations, critical load amplitude and force pulsation in case of stability loss

06 p1165 A70-17586

Thin walled cylindrical shell stability with hollow filler under distributed external loads, determining critical loads

07 p1399 A70-18663

Equilibrium cracks in elastic bodies on basis of atomic interaction law, using Griffith problem to estimate bearing capacity

07 p1400 A70-18666

Critical stresses for plate with circular hole and cracks assuming symmetrical load

07 p1402 A70-19054

Critical slope load calculation for circular elastic embedded and supported arcs under radial and variable force

07 p1404 A70-19136

Inextensional nonlinear theory of arches applied to analysis of hinged-hinged circular arches subjected to downward point load, calculating critical load value

07 p1408 A70-19561

Thin walled strip stability, calculating critical force and rotation angles assuming small subcritical strains

07 p1415 A70-20188

Initial perturbation effect of smooth cylindrical shells stability under critical axial compression noting deflection factor

07 p1415 A70-20190

Ductile flexure location in bent beams and systems with variable cross sections to determine critical load using plasticity theory

08 p1587 A70-21072

Wall material diathermy effects on critical thermal load under radiant transfer, comparing results for quartz glass and stainless steel tubes

08 p1597 A70-21186

Optimizing shape of elastic bar compressed by polar force obtained by determining functional extremum representing volume of bar at constant critical force

09 p1769 A70-22252

Partially loaded clamped plastic shallow spherical caps collapse loads and stress and velocity distributions

09 p1781 A70-23230

Elastic cylindrical shells stability under uniform pressure, calculating critical transverse load by finite-difference computer program

09 p1781 A70-23287

Carrying capacity of shallow shells of revolution, determining buckling stress and limiting equilibrium of shells with varying thickness under transverse load

09 p1781 A70-23288

Contour immobility effect on load carrying capacity of rigid plastic thin shells of revolution, establishing minimum reinforcement value for edge

09 p1783 A70-23388

Cylindrical shell critical load boundaries under uniform external stress and small torsion

09 p1783 A70-23389

Lower critical load for shallow rigidly convex shell expression refined by considering effect of rigid clamping of shell edge on buckling boundary deformation

09 p1784 A70-23594

Solution uniqueness in limit load theory for unbounded regions, obtaining infinity as unique value for critical load from elastoplastic analysis

10 p1954 A70-24013

MHD generators optimum load selection by method of stepwise approach, noting agreement with pressure and density distributions to yield maximum power

10 p1923 A70-24156

Kinematic analysis of limit loads of equilateral triangular plates under various boundary conditions

10 p1958 A70-24517

Limiting load for annular plates made of material having different yield points in tension and compression

11 p2129 A70-25560

Rectangular sandwich plates stability under combined loads, deriving equations for determining critical loads

11 p2129 A70-25563

Stability loss in cylindrical shell under axial compression, noting critical load reduction by local axisymmetric depression

11 p2130 A70-25566

Compressive stress critical moment induced instability and weakening incorporated in thin walled beam design

11 p2131 A70-25590

Optimal efficiency of axial turbomachines limit loading of blade root and hydrodynamical criteria

11 p1975 A70-25791

Critical load, force characteristics and pressure variation on blades of axial compressor under rotating stall

11 p2133 A70-25795

Load carrying capacity of isotropic rigid-plastic shells of revolution with different yield points under tension and compression applied to spherically coupled cylinders

11 p2134 A70-25932

Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application

11 p2138 A70-26158

Buckling load calculations for axially compressed circular cylindrical shells under relaxed boundary conditions

11 p2140 A70-26484

Ring buckling under constant and centrally directed pressure, considering small displacement and inextensional deformation

11 p2141 A70-26492

Cylindrical shells design under axially compressed loads by elastic stability analysis, predicting critical loads

12 p2320 A70-27142

Sandwich beams elastoplastic stability, determining critical load

12 p2323 A70-27342

Glass-plastic thin cylindrical shells carrying capacity dependence under axial and external loads on combinations of longitudinal and transverse reinforcing layers

12 p2259 A70-27527

Transversely isotropic shells stability with respect to subcritical deformation under axial compression using three dimensional linearized equations, determining critical loads

12 p2324 A70-27529

Externally pressurized bearing with electrically-conducting gas lubricant under axial magnetic field, considering load capacity

12 p2244 A70-28018

Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times

12 p2328 A70-28278

Critical loads for brittle bodies weakened by sharp holes under combined diffuse thermal fluxes and crack crossing

12 p0000 A70-28321

Residual gas effects on critical load and brittleness of pure and molybdenum-coated niobium bars after annealing in vacuum

12 p2258 A70-28324

Ductile fractures analysis using critical strain near crack tip as criterion

13 p2432 A70-28673

Cantilevered column stability under constant follower load in presence of external damping

13 p2510 A70-28733

Buckling, postbuckling and limit analysis of symmetric elastic structure subjected to increasing loads

13 p2511 A70-28737

Critical loads and stability of isotropic cylindrical shells under uniformly distributed longitudinal compression loads based on network method

13 p2514 A70-29287

Reinforced shells of revolution carrying capacity upper limit subjected to internal adiabatic ideal gas flow

15 p2814 A70-31534

Strength and critical load determination for spherical shells with reinforced hole under internal pressure based on stress-strain state analysis during deformations

15 p2814 A70-31543

Elastic shells of revolution stability and critical loads, discussing moment stress state and edge effect

15 p2816 A70-32158

Cylindrical shells upper critical loads calculation based on linearization of nonlinear shell theory equations

15 p2818 A70-32181

Computer program for limit analysis of rotationally symmetric shells, generating yield point load upper and lower bounds and velocity profile

15 p2822 A70-32351

Cylindrical shells under axial compression, using elastic stability analysis for critical loads prediction

15 p2822 A70-32512

Maximum stress distribution in laminar composites, considering loads on boundary of reinforcing layers

15 p2766 A70-32854

Load carrying capacity of self acting hydrodynamic journal bearings, considering turbulence and whirling motion in closed form solution

17 p3101 A70-35148

Column end fixity using Euler load and maximum flexibility coefficient for span point lateral load

17 p3188 A70-35226

Critical load of shallow shell of revolution as function of geometric and material parameters

17 p3192 A70-35717

Critical stresses and stability of thin Maxwell plates under random temperature fields

18 p3337 A70-36368

Critical loads for notched square Al alloy rods under tension

18 p3343 A70-36718

Optimal distribution of plastic inhomogeneity of torsioned prismatic square bars under maximum loading

18 p3343 A70-36719

Vibrations induced by frictional moving force in viscoelastic beam with free ends on elastic base, showing critical load dependence on damping

18 p3343 A70-36720

Limit load of cylindrical shell with rigidly clamped edges under varying pressure and axial force, using Tresca yield condition

18 p3343 A70-36722

Carrying capacity of nonshallow rectangular shells, showing corner dependent collapse

19 p3535 A70-37345

Nonuniqueness of collapse load for isotropic frictional material with or without cohesion

19 p3433 A70-37385

Optimum one dimensional journal bearing for maximum load with minimum film thickness, using Pontryagin principle [ASME PAPER 69-LUB-9]

19 p3435 A70-37614

Carrying capacity of heat resistant steel turbomachine elements, discussing plastic deformation and cyclic load effects, breakdown load determination, stress analysis, etc

19 p3547 A70-38432

Finite element method with first order displacement functions to compute crack tip stress intensity factor in various shapes under different loading conditions

19 p3548 A70-38623

Load rating methods for cage-type and full complement needle bearings dynamic capacity [ASLE PREPRINT 70AM 3D-2]

19 p3438 A70-38802

Aerostatic journal bearings with double plane admission feeder holes, determining maximum load and stiffness by numerical method

19 p3443 A70-38898

Load bearing capacity of radial gas bearing with annular injection line, discussing gas feeding methods

20 p3637 A70-39816

Unsteadiness effect on load bearing capacity of cylindrical sectoral gas bearing

20 p3637 A70-39819

Unidirectional fiber reinforced composites strength, obtaining limit load bounds from plasticity analysis

20 p3731 A70-40051

Cracked brittle body limiting equilibrium, determining critical loads for two half spaces with various circular rib couplings

20 p3733 A70-40432

Concentrated lateral loads effect on elastic stability and moment carrying capacity of circular cylindrical shells in bending

21 p3932 A70-40544

Thin walled fiberglass-reinforced plastic cylinders in torsion, calculating load carrying capacity as function of temperature

21 p3841 A70-40648

Structural stability analysis by matrix decomposition and iteration, extending to structures with nearly equal critical loads

21 p3934 A70-40888

Perforated steel strip axial tension load limit, considering various hole diameters and numbers

21 p3936 A70-41415

Finite element analysis of critical stress distribution in canopy of deployed twin keel parawing, predicting failure stress levels

[AIAA PAPER 70-1196] 21 p3753 A70-41820

Purity dependent critical resolved shear stress of magnesium oxide single crystals, using compression testing

21 p3862 A70-41910

Analytical iteration method extended to critical load of clamped beam with symmetrically variable cross section

21 p3939 A70-41965

Elastoplastic flexure and critical loading of isotropic rectangular plates of constant and variable thickness, using Lagrange principle with numerical integration

22 p4115 A70-42810

Thin walled column buckling relation to plate element buckling, studying deformation, stress state, failure mechanism and ultimate load

22 p4116 A70-43214

Circular cylindrical shell with varying thickness under circumferential load and radial pressure, calculating critical load

22 p4117 A70-43354

Carrying capacities of simply supported and clamped circular plates under combined lateral pressure and edge compression loads

22 p4118 A70-43548

Stability of elastic stretched ring on thin spherical shell under critical loads

23 p4268 A70-44318

Second approximation for limit loads due to imperfection sensitivity of axisymmetric elastic shell structures with unique harmonic buckling modes

23 p4273 A70-44720

CRITICAL MACH NUMBER

U CRITICAL VELOCITY

U MACH NUMBER

CRITICAL MASS

Nuclear light bulb engine critical fuel mass and design changes effects

[AIAA PAPER 68-571] 01 p0140 A70-10835

Open cycle gas core nuclear rocket reactor, evaluating critical mass for U isotopes

18 p3290 A70-36564

CRITICAL PATH METHOD

Book on project management with critical path method and PERT, covering manual and computerized calculation of scheduling, networks, time-cost tradeoffs, etc

22 p4128 A70-43625

CRITICAL POINT

Mathematical model of spherically symmetric quiescent droplet undergoing quasi-steady vaporization near thermodynamic critical point

01 p0213 A70-10291

Critical detonation diameter as function of concentration and dimensions of inhomogeneities in explosive, assuming chemical reaction generated behind detonation front

01 p0217 A70-11005

Two phase liquid-vapor system specific heat increase at temperatures approaching critical point, using nonanalytic vapor pressure equation with data for nitrogen and oxygen

04 p0780 A70-14584

LF sound velocity measurement in carbon dioxide near critical point, noting existence of logarithmic divergence

04 p0718 A70-14685

Spiral gears bearing disks contact fatigue endurance process, deriving critical points cyclic stability from stress distribution considerations

07 p1291 A70-18819

Critical regions equilibrium thermodynamic properties of fluids and magnets using scaled equation of state

07 p1421 A70-19298

Laminar boundary layer critical height determination using Rouse stability parameter

07 p1257 A70-19336

Elastic stability theory applied to equilibrium and stability of discrete continuous structural systems, detailing discrete critical points

07 p1408 A70-19560

Refractory metals electrical resistivity as function of density near critical point, using exploding wire

07 p1335 A70-19899

Liapunov stability conditions for critical point of ordinary differential equation, determining optimal criterion

09 p1727 A70-22664

Shock and thermodynamic phenomena of real gases near critical points, discussing specific volume and specific enthalpy increases

10 p1867 A70-24136

Plasma cumulation, with and without shell under concentric pressure impulse using perfect gas theory, estimating critical parameters

10 p1926 A70-25322

Coaxial plasmatron pulsation on intensity of heat exchange between high temperature nitrogen jet and axisymmetric body near critical point region of spherical bluntness

11 p1984 A70-26739

Elastic stability of structural systems with generalized coordinates and independent loading parameters associated with critical point

13 p2511 A70-28739

Sound velocity relation with specific heat at constant volume at liquid-gas equilibrium critical point

15 p2826 A70-32022

Steam-water jet discharge heat transfer features, examining critical region parameters from nozzle into submerged space with large counterpressure

18 p3345 A70-36117

Fe-Co alloys critical points during rapid heating, determining alpha-gamma phase transformations onset from dilatometric curves

18 p3275 A70-36203

Critical height phenomenon for vertical jet exhausting into horizontal parallel plates channel simulating aircraft surfaces

18 p3243 A70-36709

Carbon dioxide entropy and enthalpy computation covering critical region and wide temperature range [ASME PAPER 70-GT-5]

18 p3348 A70-36861

Heavy elements critical energy calculation, taking into account low energy electrons effects on losses in electromagnetic cascade

20 p3674 A70-39303

Base pressure behind supersonic vehicle, examining Crocco-Lees mixing theory critical point in laminar near wake

21 p3747 A70-42109

Heat transfer from turbulent axisymmetric jet to normal flat wall at critical point with small Reynolds numbers

23 p4181 A70-44321

Forced convection heat transfer to liquid nitrogen near critical point, determining coefficients from given wall temperature and heat flux

23 p4279 A70-44358

Single component fluid behavior in liquid-vapor critical point vicinity, using LF acoustic resonant cavity technique for isochoric measurements

23 p4222 A70-44432

Critical heat flux during forced pipe flow of boiling ethanol-water and acetone-water binary mixtures

23 p4283 A70-44730

Stability of self-similar flows of second kind near critical point

24 p4327 A70-46004

CRITICAL PRESSURE

Plastic deformation of wedge shaped model asperities influencing gas leakage between contacting surfaces, discussing critical contact pressure

01 p0060 A70-10267

Fuel droplets burning at pressures sufficient to reach critical temperature under zero gravity conditions in free fall apparatus

02 p0351 A70-12002

Dimensionless strength parameter in determining bursting pressure of ductile metal diaphragms in square section shock tubes

08 p1481 A70-21034

Toroidal metallic shells stability under static loads, determining snap-through pressures in pressure chamber with nitrogen working gas

08 p1588 A70-21195

Upstream influence distance estimation associated with critical pressure rise in two dimensional shock-boundary layer interactions based on Lighthill subsonic inner boundary layer concept

10 p1862 A70-23840

Eccentricity and clamping effects on stability and critical pressure of ring-reinforced cylindrical shells under internal pressure

10 p1956 A70-24248

Nonequilibrium plasma MHD generator critical pressures determination, applying electron energy balance equation and relation between plasma conductivity and Hall parameters

10 p1809 A70-25142

- Supersonic panel flutter of circular cylindrical shells at critical dynamic pressure 17 p3188 A70-35227
- Heat transfer measurement from Pt wire to carbon dioxide near critical pressure, discussing film boiling and free convection flows 21 p3953 A70-42167
- Limiting pressure for isotropic plastic plates and spherical shells with stress dependent yield, using flow theory 22 p4120 A70-43717
- Cryogenic fluids nitrogen, argon and carbon monoxide nucleate boiling from atmospheric to near critical pressure 23 p4279 A70-44359
- Cs high temperature vapor and critical pressure and temperature determination for predicting thermodynamic and transport properties, liquid phase nature and state relations 23 p4281 A70-44449

- CRITICAL VELOCITY**
 Mathematical model for studying three dimensional whirling shaft stability as function of angular to critical velocity ratio, using Liapunov method for equations of motion 01 p0143 A70-10889
- Aircraft controls response critical speed as function of transmission lag and transfer function of control link elements 02 p0227 A70-12410
- Piston theory application to plates and shells stability in supersonic gas flows, considering critical velocities determination for asymmetric flows and oscillations 04 p0617 A70-15196
- Gas dynamic functions using critical velocity and Laval number 06 p1033 A70-17237
- Flutter instability critical velocity and frequency for thin cantilevered plate with follower jet determined by Galerkin and computer simulation 12 p2316 A70-27106
- Monograph on critical speeds of nonzero mass shaft supported at both ends by bearings with nonlinear elastic displacements 13 p2416 A70-28373
- Fixed end nonprismatic bar stability in fluid flow, studying form influence on critical flow velocity 13 p2512 A70-28982
- Critical Mach numbers for transverse resistive shock waves as function of fluid/magnetic pressure ratio compared with cold plasma theory 14 p2623 A70-31036
- Gas-particle efflux from nozzle at critical velocities, noting particle size and concentration effects on inlet pressure 15 p2721 A70-32136
- Magnetic field effect on critical flutter speed and frequency of elastic plate in ionized gas flow, deriving dispersion equation 15 p2818 A70-32173
- Pilots brake-takeoff decision at critical engine failure speed, discussing operational aspects of accelerate-stop criteria 15 p2675 A70-32219
- Real gas transonic flow transition through critical velocity in Laval nozzle, examining reasons for increment of viscosity and heat conduction effects 18 p3239 A70-36217
- Mechanical systems spontaneous oscillation due to different critical velocities with and without arbitrarily small damping 18 p3338 A70-36430
- Critical rotation rates of gas turbine rotors disk-drum designs, describing initial parameters of model in matrix form 20 p3721 A70-39782
- Alfven critical velocity concept in MPD arcs analysis, obtaining exhaust velocity relationship from one dimensional flow model [AIAA PAPER 70-1096] 20 p3683 A70-40240
- Coupled rotational vibration system dynamic behavior near critical speed, using graphs of autonomous two degree of freedom system on reduced phase plane 22 p4112 A70-42271
- Laminar circular cylindrical shells supersonic flutter characteristics determination by dynamic equilibrium boundary value problem eigenvalues analysis, obtaining critical flutter speeds 24 p4424 A70-45588
- CROCCO-LEE THEORY**
 Base pressure behind supersonic vehicle, examining Crocco-Lees mixing theory critical point in laminar near wake 21 p3747 A70-42109
- CROP GROWTH**
 Aerial IR film optical density related to preharvest crop yield indicators in micro experiments with remote sensors 12 p2217 A70-26918
- Worldwide crop calendar development from repetitive satellite observation to perform agricultural change detection 12 p2218 A70-26922
- Remote photometric and spectrometric measurements for plant structure and productivity of grass and shrub vegetation in desert environments 12 p2218 A70-26923
- Radar imagery for crop discrimination, discussing sensor and data requirements and statistical analysis methods 14 p2578 A70-31237
- CROPS**
 Wheat fields recognition, mapping and acreage measurement by multispectral scanning with real time analog data processing, considering seasonal and observation altitude effects 12 p2219 A70-26930
- Spectral discrimination technique for crops remote sensing, comparing statistical irradiance model with airborne multispectral scanner data 12 p2219 A70-26931
- CROSS CORRELATION**
 Sound radiation from airfoil in turbulent jet flow, discussing direct correlation of fluctuating lift 01 p0004 A70-11192
- Binary systems noise resistance with various cross correlation functions and indefinite moment of arrival 03 p0448 A70-13512
- Visual object images describable in terms of cross correlation functions without loss of information 04 p0662 A70-15437
- Remote sensing of winds and atmospheric turbulence by cross correlation of passive optical signals, discussing results for power spectrum of fluctuations and winds 06 p1072 A70-18553
- Nonstationary correlation function for cross correlation of sample records from random processes, discussing minimum mean square error and weighting method 07 p1238 A70-19250
- Electromyograms cross correlation analysis to study time relationships between motor unit discharges of human musculus biceps and triceps brachii during physical work 07 p1213 A70-19791
- Improper integrals appearing in cross correlation of responses of two single degree of freedom systems to bandwidth limited white noise, deriving Laplace inversion formulas 07 p1236 A70-20067
- Digital cross correlator design for impulse response determination in linear systems, noting real time operation without software and storage problems 07 p1236 A70-20068
- Ionospheric irregularities showing dispersive motions from systematic skewness in cross correlation functions for satellite scintillations at spaced receivers 10 p1881 A70-24810
- Asymmetric cross correlation functions in D and lower E region drift measurements interpreted in terms of moving screens 10 p1881 A70-24811
- Remote monitoring of atmospheric wind and turbulence by cross correlation passive techniques, measuring heat and humidity fluxes 12 p2230 A70-26948
- Optical cross correlator with consecutive recording of mutual correlation function, using transparencies on different side of lens 13 p2412 A70-29865
- Correlation apparatus for ionospheric drift measurement by spaced receivers using closed loop of magnetic tape 14 p2550 A70-30741
- Automatic alphabetic characters classification model based on cross correlation and discrete Walsh-Fourier transforms, using computerized simulation 16 p2851 A70-33460
- CW multifilament GaAs laser diodes measurement, showing cross correlation between light and current noises 18 p3270 A70-36742
- Synthetic aperture radar receivers, discussing cross-product term suppression in correlation detection for image distortion reduction 20 p3585 A70-39392
- F 2 region critical frequency cross correlation coefficients for magnetically conjugate stations, considering magnetic disturbances effects 21 p3816 A70-41069
- Turbulent density fluctuations statistical properties analysis by cross correlation technique with schlieren instruments 21 p3807 A70-41242
- Cross correlation measurement errors for fluid pipe flow with pseudorandom sequence generated temperature fluctuations, considering transport time, impulse response and laminar flow 24 p4333 A70-45111
- CROSS COUPLING**
 Inertia cross coupling during aircraft design stage allowing later flight testing, discussing analysis complexity and sensitivity to aerodynamic data change 01 p0007 A70-11315
- Gyroscopes orientation cross coupling effect on dynamic drift of three axis gyrostabilizer solved by method of successive approximation 07 p1278 A70-18736
- Cross coupled rotational motions of free solid body carrying nutation-damping pendulums 07 p1335 A70-19808
- Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect 09 p1766 A70-23239
- Antenna arrays elements mutual coupling effects on pattern and impedance characteristics 10 p1849 A70-24536
- Roll induced cross coupling evaluation in two dimensional homing systems based on defining roll transfer matrix 11 p2122 A70-25681
- Coriolis illusions amelioration during space flight, noting cross coupling effects minimization by reflex vestibular stabilization of head 13 p2358 A70-29432
- Aircraft lateral and longitudinal motion stability in steady rolling, deriving inertia cross coupled stability criterion 13 p2347 A70-29445
- Cross coupling relations in Boltzmann equations solution for inhomogeneous plasmas, using spherical harmonics expansion and Laguerre-Sonine polynomials 13 p2464 A70-29539
- Multidimensional automatic control systems polyvariance, describing compensating cross couplings realization 20 p3603 A70-39834

Semicircular canals dynamic cross coupled responses to rotational movement, discussing mechanical model applicability

22 p3981 A70-43703

CROSS FLOW

Two dimensional time dependent solution for impulsive motion of circular cylinder involving viscous cross flow at moderate angles of attack

18 p3207 A70-36454

Liquid jets aerodynamic atomization at orifice exit in reentry vehicle under gaseous crossflow, investigating critical Weber number variation with Knudsen number

20 p3610 A70-39701

Forced convection heat transfer from flat plate and cylinder in cross flow to simulated Mars atmosphere

21 p3945 A70-41026

CROSS RELAXATION

Al-27 NMR saturation effects on ruby electron cross relaxation and inversion

23 p4230 A70-43932

CROSS SECTIONS

Multiple pulsations mechanism during detonation spherical wavefront propagation in channels with various cross sections, noting volume effect

01 p0060 A70-10135

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

02 p0384 A70-11665

Mechanical vibration effects on natural convective heat transfer in enclosure of rectangular cross section [ASME PAPER 69-WA/HT-13]

04 p0783 A70-14820

Torsional vibrations of four cell tube, deriving cross sectional constants and natural frequencies

05 p0936 A70-16321

Uniform cross section rings creep characteristics testing method, proposing relations for calculating stresses and strains

05 p0952 A70-17037

Scattered Lyman alpha radiation intensities measured for mixtures of partially dissociated hydrogen in Ar, measuring quenching cross sections

06 p1053 A70-17327

Equivalent circuit for fluidic transmission line used for studying behavior of lines with circular and rectangular cross sections

06 p0988 A70-17439

Size and shape error distribution law for cross sections of cylindrical components, discussing probability characteristics

07 p1290 A70-18740

Charge exchange cross section of hydrogen position ion-negative ion collisions

09 p1733 A70-23269

Cross sections of fragments emitted in spallation reactions of carbon and nitrogen nuclei emulsion with alpha particles

09 p1733 A70-23549

Shock wave interactions effect on propagation in ducts with gradual or sudden change in cross section, using schlieren spark photography

09 p1664 A70-23735

Finite deflections theory applied to elastic-plastic arches, introducing coefficients depending on shape and degree of yielding of cross section

10 p1955 A70-24080

Solar corpuscular fluxes angular characteristics, derived from observational data analysis, showing circular or elliptical transverse cross sections

11 p2104 A70-25545

Modified method of cross sections applied to solution of scalar Helmholtz equation in infinite symmetrical waveguides

12 p2272 A70-27296

Unsteady compressible pipe flows with large cross sectional variations studied by two dimensional difference method

13 p2386 A70-28806

German monograph on gas turbine combustion chambers part-load behavior improvement by load controlled change of flame tube air cross section

17 p3148 A70-35373

Cross section deformation effect on helicopter rotor blade torsional vibration, using differential equations of vibrating beam

18 p3334 A70-35959

Cosmic ray and radiation belt data from vertical probes, determining instantaneous cross section of atmosphere

18 p3307 A70-36169

Arbitrary cross sections center of flexure formula, transforming surface integral to line integral dependent on boundary conditions

18 p3343 A70-36716

Axisymmetrical stress-strain state of body of revolution with complex cross sectional geometry under surface loads, deriving computer algorithm for numerical analysis

19 p3547 A70-38439

Solar corpuscular fluxes angular characteristics derived from observational data analysis, showing circular or elliptical transverse cross sections

21 p3882 A70-41295

Torsion in rods with rectangular and trapezoidal cross sections, using functional-analytic iterative method

23 p4268 A70-44241

Microwave frequency light modulators waveguides, examining optimal cross sections to increase modulator efficiency

23 p4196 A70-44409

CROSSED FIELD AMPLIFIERS

Duration measurements for sampling function in dynamic crossed field photomultiplier

05 p0849 A70-16655

Crossed field amplifiers properties and applications, comparing performance to TWT

09 p1642 A70-22008

Microwave tubes for high power transmission from space to ground and in deep space communications, discussing klystrons, TWT and crossed field amplifiers [AIAA PAPER 70-435]

11 p2016 A70-25456

CROSSED FIELDS

Electron-hole pair quasi-linear fluctuations at recombination boundary in semiconductor crystal under crossed electric and magnetic fields

01 p0156 A70-10191

Electron transverse and perpendicular drift velocities calculated at moderate and strong magnetic fields for hydrogen, using Maxwellian energy distribution and equivalent pressure concept

02 p0348 A70-12654

Anomalous behavior of arc motion in high pressure cross-field plasma devices in terms of electromagnetic effects

03 p0529 A70-12938

Crossed field plasma accelerator designed as element of hypersonic wind tunnel driver

06 p1119 A70-17471

MHD free convection of electrically conducting fluid in strong cross field using perturbation technique, considering liquid metals and ionized gases

07 p1348 A70-19208

Plasma ion-cyclotron oscillations resonance excitation in crossed electric and magnetic fields, describing instability development

07 p1354 A70-20319

Tensor conductivity, magnetic field and electric field effect on heat transfer in MHD channel flow, solving for temperature and Nusselt number

08 p1554 A70-21773

Landau damping and stability of low density crossed field electron beams using analogy with inviscid shear flows

10 p1918 A70-23964

Multivelocity electron beam critical fluctuation amplitudes in crossed electric and magnetic field

10 p1925 A70-25107

Drift waves relation to anomalous cross field diffusion in fully ionized magnetoplasmas, introducing model predicting amplitude, correlation time, fluctuation spectrum and diffusion process

12 p2280 A70-27788

Carbon dioxide laser electrical discharge stabilization against transverse gas flow by cross magnetic field

12 p2250 A70-28099

Microwave conductance tensor in crystals with non-parabolic carrier energy dissipation under crossed constant electric and magnetic fields

12 p2288 A70-28326

Crossed field nitrogen laser operation in second positive band to obtain high UV pulse output

13 p2429 A70-29669

Parametric oscillation instabilities in plasma under magnetic field perpendicular to circularly polarized or hybrid electric field

14 p2624 A70-31042

Ion-molecule reactions investigation by resonance principle, discussing ion paths in crossed fields

17 p3081 A70-34574

Nonequilibrium plasma from pulsed discharge in crossed electric and magnetic fields

17 p3142 A70-35727

MHD and thermal boundary layer, considering difference scheme for conducting medium flow past body in crossed electric and magnetic fields

18 p3293 A70-36116

Magnetic coupling in solid dielectric cylinder under axial magnetic and perpendicular electric fields, noting memory and magnetostrictive effects

19 p3471 A70-37785

Electron runaway suppression in fully ionized Lorentz plasma by crossed magnetic and electric fields

24 p4382 A70-45105

CROSSLINKING

Diffusion phenomenon in cross linkage theory of biological aging formulated as model in differential equation form, obtaining solution and applications

01 p0028 A70-11374

Polyamides chemical welding using HF heating to obtain optimum temperature distribution and to activate polymer reaction with crosslinking agents

06 p1091 A70-17136

Dicationic crosslinking agents isolation and characterization and formation of polymers with ionic crosslinks

06 p1004 A70-17512

Propellants chemistry based on chemically cross-linked binder

07 p1360 A70-19909

Polymer structure and cross-link density effects on thermal analysis of phenol-formaldehyde polymers pyrolysis products

11 p2069 A70-25804

Epoxide ring reactivity and crosslinking related to adjacent electrophilic and electronegative groups, considering epoxy resin technology

16 p2936 A70-33357

CROSSTALK

NT IONOSPHERIC CROSS MODULATION

Group delay characteristics curvature in radio relay systems, analyzing crosstalk in picture-sound and beamed multiplex signal transmission by nonlinear distortion method

05 p0815 A70-16774

Crosstalk in multiple-beam waveguides due to scattering and distortion caused by surface irregularities of focusers, discussing power profile of Gaussian beam

08 p1462 A70-21507

Crosstalk effects on data transmission in multiplex TV systems for aerospace communications analyzed by signal and noise models

13 p2363 A70-28384

Frequency selection in telemetry taking into account systems for minimum interference and crosstalk

13 p2366 A70-29216

Crosstalk error in binary phase modulated communications systems due to RFI and thermal noise

23 p4158 A70-43752

CROWDING

Short wave ionospheric scatter propagation, observing interference and crowding in 16-23 MHz and relationship to F2 layer maximum usable frequency

18 p3227 A70-36093

CRUCIFORM WINGS

Minimum drag thin symmetrical cruciform wing fitted with central ridge, reducing problem to linear algebraic finite system of equations

10 p1803 A70-24784

Cruciform-finned missiles dynamic stability investigation by nonlinear differential equations of motion, considering roll lock-in, resonance instability and catastrophic yaw [AIAA PAPER 70-969]

20 p3715 A70-39560

CRUDE OIL

Hydrocarbons and fatty acids distribution in living organisms, fossils, sediments and crude oils, discussing slow thermal maturation role and geological applications

02 p0252 A70-12520

CRUISE MISSILES

Otomat surface to surface missile with turbojet engine for extended range subsonic cruise and two solid propellant rocket engines for launch

22 p4110 A70-43211

CRUISING FLIGHT

Minor circle maneuver solution to equations of motion of vehicle in spherical planet atmosphere for gliding and cruising, discussing cylindrical planet case

01 p0184 A70-10949

Optimal fuel consumption for climbing, cruising and landing flight conditions for medium range subsonic, high supersonic and hypersonic aircraft

02 p0227 A70-12404

Deviation angle optimization for cruising hypersonic jet aircraft, noting effect of rotation losses on design

03 p0406 A70-13019

Net thrust determination for high bypass ratio engines in cruise, suggesting performance evaluation in actual flight tests

[SAE PAPER 690652]

05 p0895 A70-15841

Flowfields in lifting-line approximation for finite bladed, lightly loaded propellers in axial cruise and heavily loaded propellers in static operation

07 p1190 A70-20411

XB-70 aircraft flight tests in cruise and landing approach to evaluate handling qualities criteria [AIAA PAPER 70-566]

13 p2346 A70-29031

Northern Hemisphere temperature atlas for SST cruise altitudes, estimating probabilities of enroute temperatures and risk increase

14 p2609 A70-30609

Mariner attitude control system limit cycle operation during cruise, noting variation from ideal case to single side operation [AIAA PAPER 69-844]

15 p2812 A70-32507

Helicopter aerodynamic problems, discussing rotor performance improvement for increased cruising speed

16 p2841 A70-33758

Atmospheric turbulence vertical component spectral density observation by aircraft in steady flight, considering transfer function computation methods

19 p3351 A70-37464

- Thermal protection system based on radiation cooling for high altitude cruising hypersonic flight, achieving zero net mass transfer 21 p3950 A70-41745
- Subsonic high lift cruise wing optimal design using kernel function method of planar lifting surface theory 22 p3959 A70-42709
- Supersonic flight altitude stability, studying effects of velocity, lift-drag ratio, thrust law, wind direction, engine unstarts, etc [AIAA PAPER 69-813] 22 p3961 A70-42712
- Space shuttle transition trajectory optimization for cruising flight entry, considering longitudinal control, pitchup instability and angle of attack 23 p4244 A70-44623
- Meteorological wind and temperature distributions on selected routes at Concorde cruising level, noting computer use for flight planning 24 p4374 A70-46204
- CRUSADER AIRCRAFT**
U F-8 AIRCRAFT
CRUSTS
Pulsars crust plastic deformation leading to rotation damping, higher magnetic moments and rarer starquakes 14 p2638 A70-30672
- CRYODEPOSITS**
Test model thermal balance in space simulator, measuring effects of solar simulator irradiance reflected from carbon dioxide cryopanel deposits [AIAA PAPER 69-1012] 11 p2149 A70-26153
- Capture coefficients and reflected flux measurements for gaseous nitrogen molecular beams impinging on solid nitrogen cryodeposit surface 20 p3675 A70-39390
- Monochromatic radiant flux angular distribution reflected from water and carbon dioxide cryodeposits, discussing incidence, deposit thickness and wavelengths [ASME PAPER 70-HT-34] 22 p4122 A70-42433
- Carbon dioxide and water cryodeposits refractive indices and densities, using thin film interference technique [ASME PAPER 70-HT-33] 22 p4122 A70-42434
- CRYOGENIC EQUIPMENT**
Rocket-borne cryogenic sampler for stratospheric composition measurement by mass spectrometer analysis for computing radiation balance in stratosphere [AAS PAPER 69-569] 04 p0687 A70-14661
- Variable coupler for liquid helium X band EPR cavity during immersion in coolant 07 p1286 A70-19976
- Cryogenic thermometry operating principles, instrument design, measurement techniques, useful temperature ranges and accuracy 09 p1674 A70-22289
- Cryogenic refrigeration below 20 K, analyzing cycles using similarities of work and heat exchange mechanisms 09 p1726 A70-22290
- U.S. cryogenic refrigerators specifications in tabular form 09 p1655 A70-22291
- Rocketborne cryogenic sampler using shock diffuser inlet for air collection at supersonic speeds during rocket ascent 10 p1949 A70-23937
- Cryogenic Ge bolometers sensitivity variation and noise, noting radiation absorption by sensor and by coating 12 p2237 A70-28151
- Thermal anchoring of wire or rod components to heat sinks in cryogenic equipment in vacuum 14 p2584 A70-30501
- Al weldable alloys for cryogenic applications, considering plasticity, brittleness and tensile and yield strengths at low temperatures 14 p2597 A70-30968
- Thermal design of counter current cryogenic heat exchangers employing spiral finned tubing 14 p2617 A70-31018
- Cryogenic single tubes transient cool-down by liquid hydrogen, deriving film boiling heat transfer correlation [AIAA PAPER 70-660] 16 p2998 A70-33621
- Cryogenic attachment for cooling and tilting metal samples in electron microscope 18 p3259 A70-36474
- Liquid nitrogen boil off calorimeter for surface energy measurements, describing construction, calibration and instrument errors 18 p3261 A70-37089
- Cryogenic temperature sensor with linear characteristics from 150 to minus 452 F, describing calibration and testing 19 p3425 A70-37883
- InAs pulsed injection laser at cryogenic temperature for measuring time constant of IR radiation detectors 20 p3630 A70-39449
- Working fluids liquid property variations effects on cryogenic heat pipe performance 21 p3946 A70-41043

- Integrated Cryogenic Isotope Cooling Engine system (ICICLE) for spacecraft sensors refrigeration requirements 21 p3947 A70-41053
- Free vibrating reed apparatus for polymer low temperature internal friction and Young modulus measurements, discussing polystyrene properties 21 p3827 A70-41464
- Low temperature Ge diode thermometer with computer circuit transforming voltage to temperature readout 21 p3828 A70-41473
- Aerobee rocket-borne cryogenic air samplers heat exchanger design by mathematical model and computer solution 23 p4280 A70-44365
- Cryogenic pipelines cooldown to operating temperature, calculating cryogen flow rate limits due to thermal stresses in steel and Al flanges 23 p4280 A70-44368
- Cryogenic fluid heat exchanger flow oscillation automatic feedback control, discussing design and simulation 23 p4280 A70-44370
- Three-stage Gifford-MacMahon cycle regenerative refrigerator in 6.5 K region, using lead shot matrices for coldest regenerators 23 p4280 A70-44371
- CRYOGENIC FLUID STORAGE**
Liquid nitrogen evaporation in PSB foam polystyrene vessels compared with glass vessels for cryogenic application 02 p0305 A70-11875
- Thermally induced convective mixing motion in rotating cylindrical cryogen space tank model under heat flux, calculating critical Rayleigh number 07 p1257 A70-19320
- Liquid helium cryostat for onboard satellite storing designed with allowance for overloads and vibrations during powered flight 08 p1440 A70-21220
- Expandable rigidizable solar shields operational, structural and thermal performance tests conducted with spherical models for cryogenically fueled space vehicles 12 p2312 A70-27131
- Vapor-liquid equilibria predictions for multicomponent cryogenic mixtures, applying to correlation selection in critical and low temperature regions 14 p2616 A70-31015
- Metallic diaphragms design, fabrication and testing for cryogenic fluid and positive expulsion systems [AIAA PAPER 70-683] 16 p2918 A70-33582
- Thermal testing of inflatable solar shields for cryogenic space vehicles, discussing shield misalignment effects on propellant tank temperatures [AIAA PAPER 70-856] 16 p2982 A70-33901
- Al alloys and stainless steels tensile properties and application in lightweight cryogenic propellant tank structures, discussing Ti alloys and reinforced composite materials tests 20 p3651 A70-40123
- Hydrogen slush characteristics, discussing advantages of liquid-solid mixture over liquid hydrogen, production methods, aging effects, transfer and pumping losses, storage, instrumentation, etc 23 p4232 A70-45075
- CRYOGENIC FLUIDS**
NT FLOX
NT LIQUID HYDROGEN
NT LIQUID OXYGEN
NT SOLIDIFIED GASES
- Helium low temperature applications to fuel tank pressurization, superconducting magnet cooling and cryopumping of solar space simulators 11 p2083 A70-25620
- Critical Levitation Loci for floating spheres on cryogenic fluids 17 p3136 A70-34743
- Near critical heat transfer in cryogenic fluids, discussing thermodynamic and transport properties 23 p4279 A70-44357
- Cryogenic fluids nitrogen, argon and carbon monoxide nucleate boiling from atmospheric to near critical pressure 23 p4279 A70-44359
- Cylindrical heaters in corresponding-states fluids, estimating film boiling heat transfer coefficients by correlation procedure using least squares expression 23 p4279 A70-44361
- Cryogenic fluid multipoint level sensing detector circuit using carbon resistors 24 p4339 A70-46200
- CRYOGENIC GYROSCOPES**
Unconventional gyros, discussing nuclear magnetic resonance, induction, cryogenic, electrostatic and laser technology 03 p0481 A70-12960
- Electromagnetic single-coil suspension for cryogenic gyroscope with superconducting sphere rotor, calculating suspension force characteristics 12 p2234 A70-27565

CRYOGENIC MAGNETS

- Cryogenically cooled superconducting electromagnets design, construction and properties for research in plasma and solid state physics, considering coil systems 01 p0143 A70-10970
- Three channel traveling wave maser with cryogenic superconducting magnet for C-band monopulse radar system, describing construction and electrical characteristics 10 p1900 A70-24894
- CRYOGENIC ROCKET PROPELLANTS**
Impingement pressure analysis associated with two phase cryogenic propellant venting to space environment [AIAA PAPER 69-571] 01 p0196 A70-10845
- Wall temperatures and heat transfer coefficients for solid-vapor mixtures of para hydrogen and nitrogen flowing in heated tube 03 p0604 A70-13018
- Turbine flowmeter in-place calibration for measuring cryogenic propellant flow rates in rocket engine testing 06 p1071 A70-18448
- Spacecraft propulsion development guidelines concerning rocket engines with storable propellants, rotating solid propulsion systems, cryogenic propellants, etc 15 p2790 A70-32256
- Liquid or solid Leidenfrost film boiling on saturated cryogenic liquid surface, discussing hydrodynamic model similar to propellant spillage accidents 17 p3194 A70-34744
- Turbofan engine aerodynamic interactions, cryogenic space storable propellants, space station attitude control biowaste resistojet and long burning time solid propellants 20 p3688 A70-39667
- European rocket engine technology, discussing liquid rockets, reliability, restart capability, performance, cryogenic engine, components, facilities and U.S. cooperation 22 p4092 A70-43509
- Pressure sensor testing and calibrating at cryogenic temperatures, describing special test rig structural, insulation, fittings and materials requirements 23 p4178 A70-44846
- CRYOGENIC STORAGE**
Filament tensile strengths and pressure strain characteristics of high modulus boron filament wound/resin composite pressure vessels for cryogenic applications 08 p1509 A70-21909
- Thick superinsulation system design for long term cryogenic storage using superfloc, radiation shield and spacer material 11 p2150 A70-26367
- Supercritical pressure system heat transfer characteristics for cryogenic space oxygen storage and supply 14 p2667 A70-31342
- Cryogenic multilayer insulation (MLI), comparing radiation magnitudes, gas conduction and contact solid conduction to calorimeter and tank data [AIAA PAPER 70-850] 16 p2939 A70-33917
- CRYOGENICS**
Ge bolometer cooled by liquid helium 3 to near absolute zero to achieve high sensitivity for far IR detection 01 p0091 A70-10910
- Ti-Al-Sn alloy tensile deformation mechanisms at cryogenic temperature under uniaxial and biaxial stress noting twinning, prismatic slip and dislocation characteristics 03 p0507 A70-13141
- Cryogenic temperature sensor calibration with automated data readout for spacecraft accuracy requirements, describing potentiometric system 03 p0486 A70-13561
- Thermal conductivity, electrical resistivity, Lorentz ratio and thermopower of aerospace alloys at cryogenic temperatures, considering Inconel, Hastelloy, Ti and Al alloys 03 p0512 A70-13807
- Specific heat, electrical resistivity and thermal conductivity changes in materials properties at cryogenic temperatures, noting parasitic phenomena, mechanical and dielectric properties 03 p0525 A70-14269
- Radiative heat flux between two parallel copper disks at cryogenic temperature, showing dependence on emitter temperature and spacing [ASME PAPER 69-WA/HT-7] 04 p0784 A70-14823
- Cassegrainian liquid He cooled IR telescope for rocket-borne IR astronomy, discussing optical, cryogenic and electronic designs 04 p0689 A70-15017
- Heat transmission by current carriers to cryogenic region, ascribing heat flux to Joule effect in conductor 05 p0881 A70-16025
- Energy losses in conductors carrying intense currents to cryogenic regions linked with heat transfer due to high temperature gradients 05 p0881 A70-16026

Recrystallization annealing third stage of cold worked polycrystalline niobium by measuring electrical resistance at liquid nitrogen temperature
05 p0863 A70-16204

Cryogenics applications to solid state physics and materials research tabulated for experimental methods and objectives
05 p0892 A70-16398

Test apparatus for investigating crystal defects influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature
05 p0829 A70-16399

Cryogenic temperature effect on short life torsional fatigue properties of Ni-Cr-Mo steel, discussing cyclic strain range effects
05 p0864 A70-16807

Thermal conductivity temperature dependence measured in greases bulk and thin layers at liquid helium temperature
05 p0874 A70-16842

Electronic equipment packaging for operation at cryogenic temperature
06 p1017 A70-17336

Metal lined glass filament-wound pressure vessel performance at cryogenic temperatures, discussing fibers, resins and liners
06 p1091 A70-17615

Digital control valve for high speed aerospace blending, considering propellant and cryogenics applications
06 p0989 A70-18602

Plastic deformation effects on superconductivity of wire specimens of high purity Pb, In and Tl cold worked at liquid He and annealed
06 p1127 A70-18614

Multicomponent Ti alloys mechanical properties for use in cryogenics describing alloying advantages with tantalum
10 p1906 A70-25295

Thermal conductivity of thin metallic films and wires at cryogenic temperatures, discussing electron transport properties
11 p2083 A70-25752

Solid-gas phase equilibria of binary systems related to cryogenics
12 p2329 A70-27023

High temperature gaseous molecular beams impingement on Cu surfaces at cryogenic temperatures measured for condensation rates
12 p2271 A70-27265

Superconducting magnetometers and cryogenic refrigeration techniques, discussing liquid helium refill systems, Joule-Thompson expansion, etc
13 p2414 A70-30027

Cryobiological data for life mechanisms on planets in solar system emphasizing Mars
14 p2536 A70-30344

Cryogenics and nuclear physics, discussing particle beam handling magnets, superconducting accelerators, detectors, moderators, low temperature irradiation facilities, etc
14 p2616 A70-31014

Junction and MOSFET transistors thermal noise characteristics at cryogenic temperatures
15 p2710 A70-32585

High strength Ti alloy for cryogenic applications, comparing plane strain fracture toughness
17 p3122 A70-34438

Cryogenic temperature measurement including metallic and semiconductor resistance thermometers, thermocouples and bibliography
17 p3082 A70-34740

Thermal contact resistance, discussing behavior at cryogenic temperatures and directional or thermal rectifying effect
17 p3197 A70-35541

Nuclear irradiation effect on embrittlement of Ti and Ti alloys at cryogenic temperature, determining radiation damage threshold as function of tensile properties changes
18 p3278 A70-36567

Cryogenically cooled photoconductive IR radiation detectors, determining wideband optical heterodyne performance
20 p3627 A70-39085

Strain measuring apparatus for multiple samples simultaneous compression tests at near absolute zero temperatures
20 p3632 A70-39628

Strain gages for structural stress analysis in cryogenic environments, discussing correction factors for temperature dependent characteristics
21 p3932 A70-40545

Optimum cryogenic heat pipe design, considering gravitational effects for spacecraft applications
21 p3946 A70-41044

Cryogenic cooling of IR radiation sensors for increasing sensitivity, considering background radiation interference from sensor optical system and detector/preamplifier noise
21 p3825 A70-41052

Pressurized liquid nitrogen and hydrogen dielectrics for cryogenic cables, measuring dissipation factor and voltage breakdown by concentric cylindrical test cell
21 p3851 A70-42125

Diluent molecules effect on polymers relaxation behavior at cryogenic temperatures from internal friction measurements, noting loss peaks shift
21 p3844 A70-42138

Polyurethane adhesives differential thermal analysis, rebound resilience and tensile properties at cryogenic temperatures
21 p3844 A70-42141

Polymers as cryogenic adhesives, evaluating role of chain structure below glass transition temperature
21 p3783 A70-42142

Ti and Al alloy weldments plane strain fracture toughness and mechanical properties for cryogenic applications, using gas metal arc and gas tungsten arc welding
22 p4043 A70-42423

[ASME PAPER 70-MET-4] Resilience and tensile properties of polyurethane adhesive at cryogenic temperatures measured by differential thermal analysis
23 p4209 A70-44275

Cryogenic engineering - Conference, University of California, Los Angeles, June 1969
23 p4277 A70-44351

Closed cell polyurethane foam for cryogenic insulation, determining thermal conductivity and net heat flow by analytical model and test
23 p4280 A70-44367

Thermal radiation emissivity predictions for metal surfaces at cryogenic temperatures, comparing anomalous skin effect and Drude single electron theories
23 p4218 A70-44388

Cryogenic thermocouples of various metal pairs for low temperature measurements, discussing performance tests and calibrations
24 p4378 A70-45385

CRYOPUMPING
Helium low temperature applications to fuel tank pressurization, superconducting magnet cooling and cryopumping of solar space simulators
11 p2083 A70-25620

Hydrogen oxygen rocket engine two phase liquid hydrogen pump capability and hydrodynamic design, analyzing constant-quality flow, acoustic effects, compressible flow and cavitation
15 p2791 A70-32511

[AIAA PAPER 69-549] Cryopumping systems of ultrahigh vacuum space environmental chambers
17 p3060 A70-35247

Aerospace coldness and vacuum simulation, discussing uses of cryogenic, titanium sublimation, ion and molecular pumps
19 p3396 A70-37462

CRYOSORPTION
U SORPTION
CRYOSTATS
Liquid helium cryostat for onboard satellite storing designed with allowance for overloads and vibrations during powered flight
08 p1440 A70-21220

Multiple maser-magnet units packaging in single cryostat for maximum tunability
08 p1513 A70-21599

Cryostat design and performance for use with optical telescopes in high altitude balloons
09 p1674 A70-22294

High transmission Mylar window He cryostat for Mossbauer measurements
21 p3828 A70-41470

Saturated nitrogen vapors condensing coefficients measurement by cryostat, comparing results with theoretical prediction
23 p4218 A70-44364

UV excited powdery fluorescent products, describing cryostat for photo and thermoluminescence at various temperatures
24 p4339 A70-46097

CRYSTAL DEFECTS
NT CRYSTAL DISLOCATIONS
NT EDGE DISLOCATIONS
NT FRENKEL DEFECTS
NT POINT DEFECTS
NT SCREW DISLOCATIONS
NT VACANCIES [CRYSTAL DEFECTS]
Epitaxial PbSe films formation mechanism-defect structure relation using moire rotation method, discussing elastic strains, dislocations, boundary formation, etc
01 p0155 A70-10182

Transmission electron microscope study of deformation mode during rapid tensile testing of Ni-base superalloy, discussing twinning and stacking fault modes
01 p0118 A70-10705

Intrinsic/extrinsic stacking fault pairs observed during creep of single crystals of gamma prime precipitation hardened Ni-base alloy, developing viscous slip model
01 p0119 A70-10731

Nonstoichiometric GeTe defects nature from band structure analysis based on two carrier model
02 p0350 A70-11698

Structural orientation and defects in graphitized coke crystallites, establishing relation between thermal expansion coefficient and macrostructure
03 p0514 A70-12868

Austenitic fcc Cr-Mn-N stainless steels ductile-to-brittle transition behavior noting role of deformation faulting
03 p0506 A70-13133

Three dimensional elasticity theory of generalized continua developed from atomic lattice theory model, discussing frequency spectra, specific heat and applications to crystal defects
03 p0525 A70-14232

Radiation effects on swept-synthetic quartz resonators and materials, discussing frequency shift measurements and defect studies
04 p0731 A70-14735

Test apparatus for investigating crystal defects influence on simultaneous measurement of metals thermal and electric conductivity under plastic deformation at cryogenic temperature
05 p0829 A70-16399

X-ray line broadening analysis for lattice damage in kamacite phase of Fe meteorites, evaluating particle size and elastic strain
05 p0915 A70-16828

Meyer-Neldel rule interpretation of distribution width parameter dependence on activation energy annealing of defects in irradiated Si
06 p1106 A70-17925

Stress and intercrystalline corrosion causes and sensitivity in supersaturated Al alloys
07 p1307 A70-19391

Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis
07 p1309 A70-19636

Iron ions EPR lines widening in corundum crystals due to lattice defects, estimating mosaic blocks disorientation parameter and point defects density
08 p1556 A70-21122

Gamma-gamma prime mismatch effects on stress rupture of Ni and Fe-Ni based alloys with Al and Ti hardeners
08 p1521 A70-21701

Lattice defects in Al-Zn alloy due to fatigue investigated for mechanism and effect on aging kinetics by resistivity measurement
09 p1707 A70-23326

Stacking faults developed in double hexagonal closed-packed phase of Ni-Ti alloy in cold worked and annealed conditions, using X ray line broadening
10 p1906 A70-25228

Ion-implanted GaAs junction diodes anneal behavior and defect nature
11 p2098 A70-26391

Radiation defects in Ge single crystals surface layers caused by low energy bombardment with He ions
12 p2287 A70-27486

Radiation defects distribution in GaAs during proton irradiation, noting distribution dependence on proton energy and integral flux
12 p2287 A70-27488

Tungsten crystalline structure defects caused by alpha particles bombardment using helium ion projector at 78 K
12 p2255 A70-27544

Lattice defect influence on EPR spectral and luminescent characteristics of annealed Fe doped gallium arsenide crystals
12 p2288 A70-28330

Cold worked metal, estimating lattice imperfections mol fractions based on reversible cell thermodynamics
15 p2676 A70-31564

Al-Zn eutectoid alloys defect structures and interactions in superplastic deformation process
15 p2756 A70-31567

Twinning lamella formation in Nb single crystals, examining slip and shear roles in surface tilt formation
15 p2761 A70-32382

Defect F centers formation in MgO, discussing optical absorption bands, oscillator strengths, luminescence band, impurity centers, etc
16 p2940 A70-33938

Thermal self focusing filaments observation in form of tracks in KDP and ADP crystals damaged by radiation from free emission mode laser
18 p3266 A70-36612

Radiation flaws in semiconductors, examining effects of gamma quanta, fast electrons and neutrons and heavy charged particles
19 p3483 A70-37295

Fcc metals surface self diffusion temperature dependence, using model based on complex defects contribution to diffusion flux at high temperatures
19 p3483 A70-37545

Superlattice stacking faults in plastically deformed nickel aluminate /gamma prime phase/ due to interaction of antiphase boundary /APB/ type dislocation pairs
19 p3451 A70-37704

Solidification and composition model of macroscopic freckles in nickel base superalloys single crystals
20 p3646 A70-39101

High energy electron irradiation generated defect centers in GaAs p-n electroluminescent diodes, using capacitance and thermally stimulated current measurements

21 p3863 A70-41914

Trap filling dependence on intensity, temperature and wavelength of photoexcitation in CdS crystals subjected to electron radiation damage and annealing

21 p3864 A70-42013

Crack propagation at supersonic velocities in K Cl crystals, noting plasma induction within specimen by laser pulse

21 p3940 A70-42033

Alloys stacking faults thermodynamics based on Gibbs treatment of interfacial free energy

22 p4124 A70-42726

Stacking faults in gamma prime precipitation hardened high temperature Ni base alloys, relating fault energy to strength

22 p4053 A70-42728

Polymer crystal lattice defects and vacancies diffraction patterns observation and interpretation, using optical transformations

24 p4353 A70-45566

Si crystal microdefects influence on semiconductor device performance and reliability

24 p4391 A70-46015

Pure Ni recrystallization, noting stacking faults and parallel sided and thin annealed twins formation during boundary migration

24 p4363 A70-46192

Niobium nitride precipitation associated with stacking faults in Cr-Ni-Nb austenitic stainless steels, using electron microscopy

24 p4365 A70-46369

CRYSTAL DISLOCATIONS

NT EDGE DISLOCATIONS

NT SCREW DISLOCATIONS

Stress-strain effect on dislocation densities of cylindrical Mg single crystals deformed by torsion basal slip compared to tension test

01 p0122 A70-11236

Semicoherent interface dislocations in directionally solidified Ni-Al-Cr eutectic, discussing lattice mismatch

01 p0123 A70-11247

Alloying additions effect on plastic deformation anisotropy in GaAs single crystals, determining dislocation activation energies from creep tests

01 p0160 A70-11606

Constitutive equations and thermally activated dislocation processes in metals, noting temperature and strain rate relationship

02 p0316 A70-11737

Statistical measurements of deformation structures and refractive indices in experimentally shock loaded quartz specimens with different crystallographic orientations

02 p0292 A70-12509

Lattice misfit influence on metastable omega phase morphology and stability in Ti transition metal alloys

03 p0508 A70-13146

Nonuniformity of dislocation structure and stress distribution in deformation of Cr samples longitudinal sections subjected to upsetting

03 p0511 A70-13488

Elastic interaction energy involved in Ti solution hardening by oxygen determined using anisotropic elasticity, presenting atomistic calculations and chemical bonds breaking role

05 p0862 A70-15906

Plasticity theory of single crystals based on dislocations behavior, considering only plane and elastic strains

05 p0928 A70-16061

Beryllium single crystals deformation under high pressures at room temperature similar to deformation under atmospheric pressure at elevated temperatures

05 p0863 A70-16203

Internal friction method for studying dislocation, stacking points and strengthening processes in steels and heat resisting austenitic steel behavior at high temperatures

05 p0864 A70-16870

Optimal thermomechanical treatment for austenitic steel stability to resist propagation and unloading of dislocations in cyclic loading process

05 p0867 A70-17041

Niobium single crystals annealed in ultrahigh vacuum, studying stress-strain behavior, secondary slip geometry and slip line morphology

06 p1090 A70-18493

Dislocations and interstitial atoms interactions in Ta, investigating internal friction and deformation resistance and rate dependence on temperature

07 p1309 A70-19637

Interstitial atoms effect on dislocation relaxation and aging of Mo and Nb single crystals

07 p1309 A70-19638

Tracks shape associated with dislocation motion during etching of Mo single crystals

07 p1309 A70-19639

Dislocation velocity-stress exponent for Nb single crystals calculated from strain rate sensitivity measurements of effective flow stress

07 p1314 A70-20011

Shock wave compression of single olivine crystals and specimens from chondritic meteorites, observing planar deformation microstructures

07 p1391 A70-20353

Deformation amplitude effects on dislocation structure and strengthening mechanism of fcc aluminum under cyclic loading

08 p1516 A70-20985

Critique of paper on diffusion in Si isotopes and excess vacancies generation by motions of diffusion induced dislocations

08 p1553 A70-21696

Metal fatigue by proliferation, diffusion and vanishing of lattice dislocations under varying loadings described by nonlinear inhomogeneous parabolic differential equations

09 p1770 A70-22253

Mo single crystals dislocation substructure strain dependence after creep using etch pitting techniques

09 p1708 A70-23544

Nb-W single crystal low temperature thermally activated deformation, observing slope change in temperature dependence curves of flow stress and strain rate sensitivity

09 p1708 A70-23572

Chromium structural dislocation and cell formation during deformation as function of temperature, impurities and strain rate

10 p1902 A70-23861

Aluminum and aluminum-copper alloys dislocation damping at high strain rates using impact shear tests

10 p1903 A70-23983

Dopant effect on dislocation mobility in elastically loaded silicon crystal using internal friction and modulus defect measurements

11 p2099 A70-26394

Electron bombardment produced clustered displacements, paired vacancies and interstitial atoms in Si, discussing possible mechanism for developing defects

11 p2142 A70-26638

Polycrystalline W-Re alloy creep tests in tension, investigating dislocation substructure formation as function of stress, temperature and strain

12 p2255 A70-27606

Dislocation structure during fretting corrosion in steel plates, analyzing via electron microscopy

12 p2258 A70-28318

High temperature dislocation model based on dislocation dynamics, rate theory and varying back stress ratio

13 p2436 A70-29563

Cr-Ni cold worked austenitic steel dislocation structure in tensile tests at different strains

14 p2596 A70-30874

Single crystal W and W alloys dislocation structures as function of strain, temperature and dilute alloys addition, using electron microscopy

15 p2756 A70-31563

Surface layer dislocations concentration role in metal fatigue, using variable diffusion coefficient

15 p2822 A70-32352

Dislocation distribution in Ta foil following yield point fatigue testing, using thin film electron microscopy

15 p2761 A70-32385

Flow stress and dislocation density dependence on temperature in polycrystalline molybdenum

16 p2930 A70-33085

Dislocation diffusion effects on strength of whiskers and fine grained polycrystals

16 p2934 A70-34327

Ti-Al-Mo-V alloy stress corrosion cracking, investigating correlation between dislocation substructure and ambient temperature corrosion susceptibility

17 p3113 A70-34371

Elastic interactions between anisotropic crystal dislocations and twin and grain boundaries in Ti

17 p3115 A70-34386

Crystallography of deformation twinning in Ti, presenting modes involving shear strains less than unity and simple shuffle mechanisms

17 p3116 A70-34388

Titanium and Ti-Al single crystals microscopic plastic deformation features, slip modes and dislocation substructures

17 p3116 A70-34389

Microscopic residual stress in crystals at fatigue crack tip in notched specimen in terms of flow stress and dislocation density

17 p3183 A70-34653

Parallel edge dislocations in elastically isotropic crystals, discussing climb and glide forces

17 p3126 A70-35454

Barium fluorides single crystals compression, investigating stress-strain behavior and dislocation mobility

19 p3483 A70-37339

Crystal dislocations and microstructure effects on magnetic properties of polycrystalline MnZn ferrites with high permeability, noting eddy currents role

19 p3484 A70-37566

Hexagonal crystal dislocations treatment based on anisotropic elasticity theory, obtaining formulas for displacement and stress fields

19 p3454 A70-38954

Microstresses in plasticity theory, considering continuous elastic body model of crystal with dislocations

20 p3724 A70-39859

Notched polycrystalline Al-Mg alloy dislocation structure near propagating fatigue crack at various stress levels

21 p3839 A70-40925

Orientation and applied stress effects on pure Nb-6W bcc single crystals yield stress, discussing thermal activation strengthening and crystal dislocations

22 p4052 A70-42318

Various Frank loops in quenched and annealed Pt, examining dislocations with field ion microscopy and computer simulated approximations

23 p4230 A70-44758

Steady state creep behavior during multiple deformation process, developing grain boundary sliding relation to grain size

23 p4207 A70-44759

Alpha phase Ti strengthening, investigating interaction between dislocations and interstitial solute atoms

24 p4360 A70-45516

Pure Al thermal cycling tests, investigating effect of minimizing thermal stress during quenching on behavior of dislocations

24 p4360 A70-45518

Crystal elastic dislocations general solution, deriving stress function for stress and displacement fields in bipolar coordinates

24 p4426 A70-46018

Cellular breakdown in binary Al-Cu alloys in unidirectional solidification, observing small pit stability on solid-liquid interface

24 p4362 A70-46180

CRYSTAL FILTERS

UHF satellite receiver for binary FSK data collection system using matched integrate and dump filter detectors

08 p1459 A70-20804

IR light dispersion filters of compressed mixed powdered crystals, discussing optimal preparation procedures, passbands temperature dependence and stability

10 p1915 A70-24256

Holographic interferometry of rapid phase objects by two wavelengths from ruby laser and KDP crystal filter, noting application to dense plasmas

19 p3422 A70-37650

CRYSTAL GROWTH

NT CZOCHRALSKI METHOD

NT EPITAXY

Niobium ditelluride single crystals production with purity dependent on initial materials, discussing X ray structural and chemical analysis and electrical properties

03 p0542 A70-13753

Carrier concentration profiles and surface resistance of Ohmic contacts to solution epitaxial n-type GaAs wafers measured by Schottky barrier capacitance

03 p0543 A70-14213

AsSbSI crystal production technology concerning substitution-type solid solution structure and photoconducting ferroelectric properties

04 p0729 A70-14409

Sliding tube assembly for diverting carrier gas from flow pattern of Verneuil apparatus for flame fusion crystal growth

05 p0829 A70-16849

Tensile properties variations of Co whiskers grown by reducing cobaltous bromide in hydrogen-argon mixture

07 p1306 A70-19071

Electrolyte purity effect on initiation times and growth rate of Zn dendrites in alkaline zincate solution, discussing dendrite initiation retardation

07 p1356 A70-19387

GaAs preparation techniques, crystal structure, electrical and physical properties, single crystal growth, impurities properties and distribution, thermal and optical properties, etc

07 p1356 A70-19397

Ammonium perchlorate decomposition, deflagration, sublimation, crystal growth and surface properties, using scanning electron microscope

07 p1358 A70-19576

Vanadium single crystals substructure on different planes to growth direction using X ray diffraction

07 p1308 A70-19608

Vapor-liquid-solid nucleation mechanism of alpha-aluminum oxide filamentary single crystal growth, suggesting combination with suboxide condensation and disproportionation mechanism

07 p1313 A70-19890

Synthesis procedure for single crystal transition metal diborides, using high pressure capability in controlling stoichiometry
07 p1313 A70-19895

Refractory metal monocarbide single crystal growth by plastic strain induced primary and secondary recrystallization
07 p1313 A70-19902

Graphite crystals surface ribbed growth in Ni-C solutions due to B content observed by scanning electron microscope
08 p1520 A70-21552

Crystal growth of 2H silicon carbide showing temperature profile along susceptor as affecting factor
09 p1739 A70-22498

Growth kinetics of gamma prime precipitate in Ni-Ti alloy noting Ti content variation as function of aging
09 p1706 A70-22812

Yttrium iron garnet sintering and grain growth rates dependence on yttrium/iron ratio
[ACS PAPER 16-BE-68F] 09 p1740 A70-22982

Nucleation and heteroepitaxial GaAs film growth on sapphire using electrical measurements, reflection diffraction and electron microscopy
11 p2098 A70-26393

Filamentary crystal growth associated with hyper-velocity microparticles impact upon Cu foil
13 p2513 A70-29264

Synthetic autoclave grown quartz crystals with W and Ga impurities, discussing spectral properties and weak absorption bands after irradiation
14 p2625 A70-30154

Iodine concentration effects on epitaxial GaAs p-n junctions growth characteristics
14 p2625 A70-30171

Iodine concentrations, temperature gradients and transport ampules etching effects on mass transport rate and crystal growth of MnS-MnSe-iodine system
16 p2960 A70-33088

Surface growth morphology and crystallographic orientation of beta-SiC films formed by chemical conversion and heating
17 p3142 A70-34678

Single and polycrystalline indium arsenide preparation methods and quality control
17 p3143 A70-35119

Grain boundary allotriomorphs growth mechanisms in Al-Cu alloy at high temperatures, indicating interfacial and direct volume diffusion
18 p3271 A70-36027

Growth mechanism and crystal structure of Ge films deposited from molecular beam onto GaAs, Si and Ge substrates
18 p3297 A70-36415

Deformed single crystals of high purity Al of different orientation with respect to growth during recrystallization
19 p3450 A70-37373

Ice crystals growth rate in natural clouds over minus 2-minus 32 C range based on characteristic axial ratio
19 p3462 A70-38261

Boron impurities introduction into InP crystals grown by liquid encapsulation, detecting IR absorption bands due to localized lattice vibration
23 p4231 A70-44891

Single crystal piezoelectric materials growth characteristics and wave propagation properties for surface acoustic wave applications
24 p4367 A70-45399

Aluminum oxide growth rate in molybdenum cermet after high temperature annealing
24 p4359 A70-45478

Czochralski thermal probe for current carrier concentration in strip shaped area of n-type GaAs single crystals active growth
24 p4389 A70-45481

Crystal growth in polycrystalline Au, Ag and Au-Ag thin films annealing, observing by electron microscopy and electron diffraction
24 p4391 A70-45672

CRYSTAL LATTICES
NT BODY CENTERED CUBIC LATTICES
NT CLOSE PACKED LATTICES
NT CUBIC LATTICES
NT FACE CENTERED CUBIC LATTICES

Martensite structure, discussing intensity anomalies in X ray diffraction pattern of intermetallic Ni-Nb
01 p0121 A70-10900

Long range order formation kinetics in lithium ferrite octahedral sublattice after stepwise annealing and quenching in water, using X ray analysis
03 p0537 A70-12867

Atom ordering and effects on alloy properties - Conference, Kiev, Ukrainian SSR, 1969
03 p0505 A70-13101

Steel crystal lattice fine structure and mechanical properties during annealing using X rays as function of temperature
03 p0511 A70-13422

Generalized Watson sums evaluation without series expansions or extensive computer summations, calculating magnetization of anisotropic Heisenberg ferromagnet for cubic, bcc and fcc lattices
04 p0730 A70-14689

Gravity influence on constitutive equations of elasticity for crystals treated as continuous body and particle system, taking into account lattice structure
05 p0925 A70-15869

Divergences in tension textures and values of anisotropy coefficients ascribed to imperfections in cubic texture of aluminum sheet deformed by straining
05 p0927 A70-15995

Stress-strain relations for elastic anisotropic crystal lattice systems derived in terms of orientation vectors and scalar moduli
05 p0932 A70-16135

Orthorhombic form of crystalline formylmethionine transfer RNA, obtaining Patterson function from three dimensional X ray diffraction data
05 p0803 A70-16947

Inert gases scattering from Ni 111/ plane as function of beam temperature and angle of incidence compared to Au and Ag
06 p1110 A70-18263

High energy Ar atomic beams scattering from single crystal face of W measured for distribution pattern
06 p1112 A70-18270

Electron irradiation for reducing thermal coefficient of resistance of Si strain gages, noting crystal orientation dependence of gage factor
06 p1070 A70-18442

Be atoms effect on lattice structure of three component sodium oxide-beryllia-silicate glasses using IR absorption spectra
07 p1315 A70-18704

Metastable tau-phase in Fe-Ni-B melt solidifying into boride, noting lattice constant and solubility
07 p1307 A70-19393

Molybdenum single crystals orientation effect on thermal resistance to argon plasma flow
07 p1309 A70-19614

Metal fatigue by proliferation, diffusion and vanishing of lattice dislocations under varying loadings described by nonlinear inhomogeneous parabolic differential equations
09 p1770 A70-22253

Liquid crystals biaxial smectic C phases tilt and optic axial angles determined from convergent light observations
09 p1738 A70-22271

Metallic solutions formation dependence on alloying elements electron structure assumed by atoms in solvent lattice
09 p1702 A70-22560

Plastic properties of materials to elastic limit of pure metal and ionic solid crystals
12 p2283 A70-27055

Au, Ag and Al films evaporation in ultrahigh vacuum on LiF and MgO surfaces, showing insignificant role of lattice misfit for epitaxy
12 p2285 A70-27260

Chemical compositions and structure of carbides in Fe-W-C and Co-W-C systems, clarifying eta phases
12 p2255 A70-27601

Heat energy transport mechanism in metallic plasma deposited coating, investigating role of elastic crystal lattice vibrations, electrons, molecules, etc
13 p2419 A70-28858

Plastic deformation of Mo-Re single crystals produced by electron beam zone refining, investigating lattice frictional stress, activation volume temperature variation, etc
13 p2436 A70-29562

Ferromagnetic cubic sulfide of Fe easy axis by electron diffraction pattern, aligning sulfide particles along magnetic field
13 p2472 A70-29712

Interstitial Cl molecule formation in NaCl lattice, computing strain field and energetics by energy minimization technique based on point ion lattice model
14 p2544 A70-30352

Localized one electron states in perfect crystals of widely separated atoms, using thermal single determinant/Hartree-Fock/ approximation
14 p2626 A70-30488

Lattice resolution of layer planes in polyacrylonitrile based carbon fibers ground and dispersed by ultrasonic irradiation
14 p2598 A70-30793

Lattice planes and interplanar spacings of small vapor deposited gold crystals, using transmission electron microscopy
16 p2961 A70-33644

Calcium tungstate crystals, investigating electron paramagnetic resonance centers produced by neutrons and gamma rays to obtain information on lattice vacancies, defects, etc
16 p2961 A70-33963

Thermoelectric composite materials, deriving crystal lattice type model of equations for predicting dynamic or themomechanical behavior
19 p3540 A70-37958

Pure metals structure effect on friction and lubrication under steady slip in ultrahigh vacuum at low temperatures
19 p3438 A70-38729

Integrated Bragg X ray scattering intensities for monatomic crystalline lattices, considering thermal diffuse component contribution
20 p3686 A70-39193

Ta single crystal inherent lattice and interstitial solution hardening, discussing impurity doping effect on flow stress thermal component
21 p3839 A70-40902

Monatomic crystal vibrational spectrum, noting quasi-local vibrations near high impurity concentrations
24 p4388 A70-45202

Peroovskite crystals phase transitions based on group theory, considering lattice vibration modes as instability source
24 p4389 A70-45206

Vanadium subnitride crystal structure with ordered array of nitrogen atoms in V sublattice
24 p4360 A70-45519

Polymer crystal lattice defects and vacancies diffraction patterns observation and interpretation, using optical transformations
24 p4353 A70-45566

CRYSTAL OPTICS
Photoconductivity growth and decay curves green edge emission and integral flux in optical flare of cadmium sulfide crystals due to hole trapping process
03 p0540 A70-13503

Optical third harmonic generation in ADP crystals using mode locked and nonmode locked lasers
06 p1082 A70-17943

Group theory investigation of three photon light scattering tensor for all vibration modes of specific crystal classes
07 p1299 A70-19861

Q switched ruby laser light effect on absorption spectra of NaCl crystals
10 p1902 A70-25221

Temperature instability of electro-optical laser modulators using ADP, KDP and DKDP crystals taking into account phase shift between coherent light beams
11 p2063 A70-25848

Twin crystal X ray telescope principle, design and application, discussing radiation sources nature and measurement methods
11 p2057 A70-26824

KDP crystal single cut for laser beam frequency conversion and tuning
12 p2245 A70-27302

IR image conversion into visible using nonlinear KDP crystal
12 p2248 A70-27543

Intensity and photocounts statistical distribution of harmonic generated in nonlinear crystal by laser and thermal radiation
12 p2248 A70-27547

Optical charge exchange and thermal stimulation effects in Fe doped GaAs crystals, determining iron content role by EPR method
13 p2469 A70-28880

Bragg reflecting crystals for spectroscopy and polarimetry in X ray astronomy
13 p2489 A70-28904

Steady state laser emission of resonator with two crystals with different optical orientation
13 p2428 A70-29371

Amplitude and phase modulation of laser beams by tetragonal crystal cuts
13 p2429 A70-29533

CW argon lasers simultaneous mode selection and phase locking by electro-optic KDP crystals
15 p2753 A70-32610

On-line optical data processing using CRT with electro-optic target crystal
16 p2903 A70-33132

Optical rectification/polarization/ and measurement of Q switched laser energy and time parameters, using crystals and parallel plate capacitor
17 p3105 A70-35098

Real time holographic reconstruction by electro-optic light modulation through crystal
18 p3258 A70-36312

Optically bistable crystal applications, discussing photochromaticity, catochromatic tubes, oscilloscopes, computer storage devices and laser systems
19 p3446 A70-37860

Light beam direction variation by crystal deflectors, examining changing internal reflection angle by applied electric field or mechanical stress
23 p4196 A70-44411

Laser light effects on electron beams, considering absence or presence of crystalline optically transparent solid
24 p4353 A70-45564

CRYSTAL OSCILLATORS
NT PIEZOELECTRIC CRYSTALS

Precision frequency analog converter using crystal oscillator and transistor switch reducing errors
09 p1653 A70-23698

Second and third harmonic simultaneous generation in ammonium oxalate crystals achieved by three frequency interactions
10 p1901 A70-25159

High frequency tunnel diode quartz crystal oscillator circuits with inductive element compensating circuit capacitor

13 p2376 A70-28874

Uncoated quartz twin crystal microbalance for monitoring water vapor content of respiratory gases

19 p3368 A70-37844

Electro-optical crystal resonator loss anisotropy, determining natural frequencies and polarizations

20 p3642 A70-39755

Phase and group velocity variations of LF transmission compared against crystal oscillator

23 p4163 A70-44228

CRYSTAL RECTIFIERS

Whisker diode coupling to polarized IR laser beam by orientation based on antenna theory

17 p3048 A70-35902

CRYSTAL STRUCTURE

NT WIDMANSTATTEN STRUCTURE

Structure and mechanical properties of martensite and bainite in Fe-Ni-Co-C steels, discussing isothermal aging to obtain tough twinned martensite steels

01 p0119 A70-10733

Laser transitions to valence band or acceptor in low loss uniformly pumped crystal structure p-type GaAs at 77 K

01 p0113 A70-11168

Diamond-like glassy semiconductor compound of cadmium germanium arsenide, determining optical lattice vibrations from IR reflection spectra

01 p0160 A70-11599

Long range order formation in Ni-Cr alloys analyzed by direct neutron diffraction, considering disorder-order transition temperature and chemical composition

01 p0124 A70-11600

Linear aliphatic polyesters unit cell dimensions and crystalline densities

03 p0517 A70-13808

Optical rotatory power measurement for compensated cholesteric liquid crystal helical structure to observe thermally induced inversion and electric field perturbations

03 p0542 A70-14003

Ge films crystallinity deposited on Ge substrates in vacuum as function of deposition rate, substrate temperature and thermal treatment and background O pressure

03 p0543 A70-14204

Ni addition effects on Mg-Nd and Mg-Nd-Mn alloys structure and heat resistance

04 p0706 A70-15189

Supersaturated Al alloy with Zr addition at high temperatures, showing tetragonal equilibrium phase and intermediate phase with cubic structure

04 p0708 A70-15369

Structures formed during aging of martensite in maraging steels by X ray and chemical analyses using electrolytic isolation of phases

05 p0865 A70-16871

Cliftonite occurrence, internal structure, orientation within kamacite and implications on origin of diamonds in meteorites

05 p0921 A70-17095

Cholesteryl chloride-cholesteryl myristate /CM/ mixture liquid crystal molecular and helical axes orientation from dielectric constant change measurements in magnetic fields

06 p1126 A70-17326

Ni-Fe alloys texture formation, studying strong deoxidizers role in secondary recrystallization

06 p1088 A70-17614

Structure, phase composition and heat resistance of diffusion layers obtained by surface alloying of Nb alloy with Cr, Ti and Si

06 p1089 A70-17744

Carbon fiber structural model agreeing with experimental results

06 p1092 A70-18025

Be atoms effect on lattice structure of three component sodium oxide-beryllia-silicate glasses using IR absorption spectra

07 p1315 A70-18704

GaAs preparation techniques, crystal structure, electrical and physical properties, single crystal growth, impurities properties and distribution, thermal and optical properties, etc

07 p1356 A70-19397

Electron paramagnetic resonance for quality control of crystal structures in quantum electronics applications

07 p1356 A70-19479

Vanadium single crystals substructure on different planes to growth direction using X ray diffraction

07 p1308 A70-19608

Oriented single crystals properties obtained from Mo powder subjected to compacting, annealing in hydrogen and electron beam zone melting

07 p1308 A70-19610

Size effect on structure and mechanical properties of thin wire made of Mo single crystals deformed in recrystallized state

07 p1308 A70-19611

Structure and mechanical properties of Mo single crystals grown from gas phase using metallographic and X ray analysis

07 p1308 A70-19612

Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis

07 p1309 A70-19636

Phonon spectrum of mixed semiconductor crystals based on AlIII-BV and AlI-BVI compounds, studying frequency spectrum as function of crystal composition

07 p1300 A70-19867

Two parameter model for lattice vibrations applicable to diamond structured crystals, calculating phonon dispersion curves from dielectric screening theory

07 p1357 A70-19920

Crystalline structure effect on molecular beam reflection from rough polycrystalline Au surfaces

07 p1343 A70-20123

Quenched and tempered steels ductile fracture with respect to plasticity, structure and crack development conditions using microfractography

08 p1515 A70-20922

Ti additions influence on steel work hardening, specific weight, magnetic properties and structure

08 p1515 A70-20924

Al-Cr-Zr alloy ingots macrostructural inhomogeneities, studying roles of casting rate and additives in intermetallics primary crystallization

08 p1517 A70-21128

Ni-Mo surface alloys investigated by low energy electron diffraction, using tabulated symmetry and extinction properties of space groups and phase diagrams

08 p1557 A70-21603

Hydrides precipitation in Ti-Al-Mo-V alloys using transmission electron microscopy, discussing crystal structure, activation energy, hydride-matrix phase interface, etc

08 p1525 A70-21964

Crystallite orientation distribution function refinement procedure, considering application to isotactic polystyrene

09 p1631 A70-23446

Cellular structure and grain size effects on mechanical properties of strained and recrystallized chromium

10 p1902 A70-23862

Epitaxy of Ag deposited on Ni, observing irreversible crystallographic order transition from metastable nominal orientation by LEED

10 p1927 A70-24076

Synthetic molybdenum disulfide crystal properties compared to natural crystals, discussing friction coefficient, adherence to metal surfaces, etc

10 p1907 A70-24787

Crystal-chemical and geophysical implications concerning earth mantle phase transitions from beta magnesium silicate crystal structure

11 p1994 A70-25333

Extended chain polymer crystals temporary superheating before final melting, discussing hexagonal selenium crystals data

11 p2069 A70-25803

Composition and monoclinic parameters of chromium sulfide mineral breznaitite in metal matrix and silicate inclusions of Tucson meteorite using electron microprobe

11 p2110 A70-26004

Photographs of ferroelectric tungsten oxide crystal domains obtained with photoemission microscope, noting memory effect after electron beam sweeping

11 p2099 A70-26463

Book on tensor calculus in materials science covering thermodynamic equilibrium, gaseous and solid phase heat engines, solids crystalline structure, etc

12 p2282 A70-26866

Soviet monograph on intermetallic compounds with Laves phases, covering crystallographic and thermodynamic characteristics of Mg-Zn, Mg-Cu and Mg-Ni systems

12 p2252 A70-26885

Polyethylene extended chain crystals melting process via electron microscopy and differential thermal analysis

12 p2258 A70-26896

Magnesium arsenide phosphide crystal and magnetic structure using X ray and neutron diffraction

12 p2283 A70-27240

Isostructural crystals of Dy compounds investigated for magnetic behavior using high resolution photoelectric optical spectroscopy

12 p2261 A70-27243

Superconducting thin films of beta-tungsten structure Nb-Al-Ge compound, discussing high purity sputtering preparation techniques and properties in magnetic fields

12 p2285 A70-27259

Tantalum RF sputtered superconducting films structure and properties at various substrate temperatures, observing bcc, fcc and amorphous phases by electron microscopy

12 p2288 A70-27876

Elastic, piezoelectric and dielectric properties of barium titanate single crystals of laminar domain structure

12 p2288 A70-28329

Iron meteorites electrolytic corrosion using potentiostatic technique, noting roles of Ni content and crystal structure

13 p2432 A70-28697

Raman spectrum of lithium formate monohydrate single crystal in polarized He-Ne laser light, discussing crystal structure

13 p2425 A70-28714

Epitaxial Ge deposits on Si control by Kikuchi pseudolines, considering surface polish, crystallinity and substrate orientation

13 p2470 A70-28957

Atomic planes around crack, noting configuration dependence on law of interplane interaction

13 p2515 A70-29418

Fine grained structure effect on steels and Ni alloys short term heat resistance at high temperatures

14 p1594 A70-30168

Bi-Sb alloys, discussing structural data, crystal preparation, band structure, pressure, nonohmic conductivity, thermoelectric, thermomagnetic and magnetothermal effects

14 p2625 A70-30332

Li positive ions in KCl crystals, investigating internal strains effect on paraelectric resonance spectra

14 p2626 A70-30340

Eutectic NiAl-Cr structure and high temperature tensile strength as function of solidification rate

15 p2755 A70-31560

Dielectric constants of zinc tungstate with wolframate structure

15 p2783 A70-31766

Polygonized and cellular Be structures formation, examining temperature, strain, annealing and material purity effects

15 p2758 A70-32122

Thermal-mechanically treated stainless steels structure and properties, discussing stress relief aging effects

15 p2761 A70-32380

Room temperature mechanical properties and structure of age hardened Ti-Cu alloys

15 p2761 A70-32384

Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds

15 p2803 A70-32499

Inorganic laser materials containing ionic crystalline structures, including fluorides, oxides, rubies, garnets and oxygen containing complex compounds

16 p2927 A70-33223

Book on refractory metal properties covering nuclear reactor use, atomic, electronic and crystal structures, thermal and electrical characteristics irradiation effects, nuclear properties, etc

16 p2931 A70-33268

Oxidized alpha Ti crystals strain analysis based on X ray divergent beam, discussing hardening effects

17 p3115 A70-34387

Martensitic transformation in Ti and Ti alloys, discussing shear systems influence

17 p3118 A70-34404

Superconducting Nb-Ti-Zr alloy, investigating structure and decomposition at high temperatures by X ray and electron microscopy

18 p3276 A70-36310

Fine grained Be structure and mechanical properties under tensile deformation at temperatures from 20 to 1000 C

18 p3276 A70-36311

Growth mechanism and crystal structure of Ge films deposited from molecular beam onto GaAs, Si and Ge substrates

18 p3297 A70-36415

Heat conduction three dimensional problem in radiation heated thin crystalline plates with temperature dependent thermophysical characteristics

18 p3348 A70-36644

Heavy ions traces in crystals of lunar rocks, discussing applications as detectors

18 p3321 A70-37084

Deformed single crystals of high purity Al of different orientation with respect to growth during recrystallization

19 p3450 A70-37373

Numerical model of piezoelectric surface wave propagation on free and metalized cubic and hexagonal crystals

19 p3486 A70-37754

Fe rich Fe-Al alloys single crystals, determining three dimensional order and atomic displacements coefficients by X ray diffuse scattering

19 p3452 A70-37839

SiC whiskers X ray diffraction studies of crystal structure, suggesting single crystal permanent deformation at ambient temperatures

19 p3455 A70-37941

Solid-solid phase transitions in molecular crystals of organic tetrahedral substances, using differential scanning calorimetry

19 p3373 A70-38193

High modulus graphite fiber tensile strength and structure, using X ray diffraction 20 p3653 A70-39205

Nucleation processes associated with thermal decomposition sites formation in ammonium perchlorate single crystals, using optical and electron microscopy 20 p3582 A70-39494

Crystal orientation dependence of thermal resistance and gage factor in electron irradiated n-type silicon strain gages 21 p3824 A70-40862

Lunar crystalline rock static and dynamic deformation, examining regolith and silicates textures and structures 21 p3897 A70-41515

Apollo 11 lunar crystalline rock samples petrology, discussing shock and other metamorphic effects on mineral structure 21 p3897 A70-41516

Compositions of lunar fines, crystalline rock and glass spherules, showing high normative anorthite 21 p3899 A70-41531

Apollo 11 lunar crystalline rock and breccias petrography and luminescent properties, spectral analysis, color, emission bands and shock effects 21 p3918 A70-41678

Amino acid racemization as enantiomers in core sediment samples 21 p3781 A70-41896

Optical activity of nonenantiomorphous biaxial crystals with mirror planes, investigating polarization plane rotation 21 p3850 A70-41934

Isomorphous mixed ammonium perchlorate and potassium perchlorate crystals structural homogeneity by X ray diffraction and differential thermal and thermogravimetric analyses 21 p3784 A70-42262

Magnetic and structural characteristics of ternary intermetallic systems with lanthanides, considering Ln substitution by other rare earth elements 22 p4085 A70-42481

Orthorhombic martensite tempering behavior in Ti alloys, observing distinct stages for binary and ternary alloys 22 p4054 A70-42742

High strength high Ni maraging steels crystal structure, alloying elements effects on mechanical properties, applications, etc 22 p4055 A70-43121

Copper and Al polycrystalline single crystal substructure changes, examining high temperature, unsteady and diffusion creep 22 p4056 A70-43342

Superconductivity and crystalline structure of laminar solid solutions of niobium-selenide-niobium-telluride single crystals 22 p4088 A70-43464

Martian brightness increase at 1 deg phase angle, explaining by transparent cubic crystals presence in clouds 23 p4240 A70-43920

Chemical etching for revealing structure of carbon-graphite materials subjected to different graphitization stages 23 p4209 A70-44045

Al-Be eutectic alloys structure, using laue X ray method and electron microscopy in studying fibrous morphology due to unidirectional solidification 24 p4356 A70-45143

Cubic titanium oxycarbide structural characteristics, noting lattice constant dependence on component proportions and mutual solubility during formation 24 p4359 A70-45477

Vanadium subnitride crystal structure with ordered array of nitrogen atoms in V sublattice 24 p4360 A70-45519

Al-Cu alloy unidirectional solidification, investigating interfacial transition from plane to cellular structure and segregation pattern 24 p4362 A70-46179

X ray powder and chemical data on monoclinic secondary mineral guildite from mine fire at Jerome site 24 p4330 A70-46274

Vacancies in vanadium carbide /V3C2/ crystals with predicted lattice defects at low temperature, considering entropy 24 p4365 A70-46353

CRYSTAL SURFACES

Si cleaved crystal nature on basis of Auger spectra, discussing impurity stabilization 01 p0159 A70-11175

Solder mechanical contact strength to CdS insulating crystal platelets tested in liquid N, noting Ag epoxy 02 p0319 A70-12738

High temperature heat treatment effects on Mo, W, Ta and Re crystal surface order and faceting observed by electron diffraction, noting contamination role 03 p0538 A70-13097

Low energy electron diffraction structures due to Re crystal surface interaction with CO and molecular oxygen at high temperatures 03 p0440 A70-13098

Pumping energy distribution over cross section of active ruby laser elements in relation to smoothly polished, roughly polished and dull lateral cylindrical surfaces 04 p0700 A70-14607

Molecular He and Ar nozzle-type beams scattering from room temperature LiF crystal surfaces, measuring particles flux and speed distributions 06 p1111 A70-18267

Graphite crystals surface ribbed growth in Ni-C solutions due to B content observed by scanning electron microscope 08 p1520 A70-21552

Low energy electron diffraction pattern from surface steps and facets resulting from recrystallization of Re single crystal 08 p1557 A70-21602

Helium ion bombardment activated tungsten crystal surface migration using field emission microscopy 11 p2097 A70-25378

Chemisorption on Mo single crystal surfaces observed by LEED techniques, discussing bcc planes and adsorbed gases 12 p2181 A70-27256

Ruby crystal surface destruction by laser radiation, studying surface structural and optical properties effect and threshold power dependence on light pulses duration 12 p2248 A70-27541

Contaminated Ni crystal /100/ surface photoelectric yield as function of temperature, considering effects of Ar ion bombardment and annealing 12 p2288 A70-27680

Growing ice crystals surface electric potentials during various stages of water vapor condensation 15 p2769 A70-31444

Interactions of electrons, phonons and magnons with crystalline surfaces - Conference, University of Lille, France, September 1969 15 p2785 A70-32763

Band structure of Brillouin zone and electronic states on pure and contaminated crystal surface 15 p2786 A70-32767

Surface damage of GaAs crystals by mechanical handling and polishing with hard abrasive lapping materials 20 p3686 A70-39119

Clean iron /011/ surfaces, determining sulfur, oxygen and hydrogen sulfide films effects on adhesion behavior 21 p3831 A70-40748

Hydrogen adsorption and coadsorption with oxygen on W single crystal surface measured by mass spectroscopy and low energy electron diffraction method 21 p3862 A70-41887

Holographic recording on n-type Si single crystal surface by photoanodic engraving 22 p4026 A70-42332

GaAs crystal surface Raman scattering from phosphorus impurities localized modes, using Ar ion laser line 24 p4391 A70-46255

CRYSTALLINITY

Linear aliphatic polyesters unit cell dimensions and crystalline densities 03 p0517 A70-13808

Amorphous and partly crystalline polymers low temperature thermal conductivity and heat capacity 21 p3844 A70-42136

CRYSTALLITES

Structural orientation and defects in graphitized coke crystallites, establishing relation between thermal expansion coefficient and macrostructure 03 p0514 A70-12868

X ray diffraction method to determine degree of orientation of crystallites in extruded graphites 03 p0517 A70-13964

Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis 07 p1309 A70-19636

Alkoxy-derived strontium zirconate and titanate preparation and characterization, considering purity control, crystallite size and ceramics synthesis 09 p1740 A70-22981

Crystallite orientation distribution function refinement procedure, considering application to isotactic polystyrene 09 p1631 A70-23446

CRYSTALLIZATION

NT RECRYSTALLIZATION

Iron behavior in GaAs during crystallization, studying Fe distribution ratio, impurity migration and diffusion coefficient 01 p0156 A70-10219

Polysiloxanes morphology crystallized isothermally from melt using electron microscopy, noting fracture ease increment with molecular weight decrease 03 p0517 A70-14203

Bivalent cations effect on crystallization and viscosity of glazed glass 05 p0871 A70-16592

Metal oxides additions effect on Ti glass crystallization, studying small and large ion radii 05 p0871 A70-16593

Crystallization and dielectric properties of glass containing barium, lead, titanium and boron oxides, noting frequency and temperature dependence 05 p0871 A70-16595

Artificial crystallization theory for supercooled dry-ice seeded stratus clouds, taking into account condensation growth and turbulent diffusion of crystals 08 p1538 A70-21108

Vertical and horizontal expansion rate of crystallization of dry-ice seeded internal stratus clouds 08 p1538 A70-21109

Artificial crystallization zones width measurement error during time intervals after cloud seeding by aircraft and solar reflection methods 08 p1538 A70-21110

Al-Cr-Zr alloy ingots macrostructural inhomogeneities, studying roles of casting rate and additives in intermetallics primary crystallization 08 p1517 A70-21128

Irreversible phase transition analysis of atmospheric condensation-crystallization processes 08 p1538 A70-21427

Gaseous species in equilibrium with Apollo 11 holocrystalline rocks during crystallization 09 p1758 A70-22744

High intensity ultrasonics for changing solids properties, discussing effects on metal powder sintering, yield strength, fatigue life, crystallization rate, etc 09 p1728 A70-23348

Phase diagram of rapidly crystallized Al-Cu-Mn alloys, observing ternary solid solutions formation during high cooling rate of melt 09 p1709 A70-23786

Rhyolitic obsidian glass devitrification rate in water and alkali solutions, noting increase in Na or K rich solutions 11 p2070 A70-26003

Amorphous film formation and crystallization, discussing thermal stability 18 p3297 A70-36320

Spaceborne lightweight mirror blanks made from ceramics fabricated from glass crystallization 18 p3263 A70-36559

Lunar crystalline rock melting at atmospheric pressure under partial oxygen pressure, suggesting crystallization temperature 21 p3895 A70-41508

Petrology, crystallization and magma origin of lunar clinopyroxene, ilmenite-rich dolerite and microgabbro from Apollo 11 samples 21 p3900 A70-41536

Lunar sea, mascon and interior composition, discussing crystallization of Apollo 11 Tranquillity samples and synthetic analogs at high pressure 21 p3901 A70-41542

High crystallization temperatures for igneous rocks from Tranquillity Base indicated from late formation of sulfide liquid forming complex troilite intergrowths and iron 21 p3902 A70-41553

Thermochemical method for directional crystallization of wear-resistant alloy coatings on machine parts 23 p4205 A70-44043

CRYSTALLOGRAPHY

Crystals nonlinear permittivity related to temperature-time Green function for electromagnetic radiation, determining crystal polarizability by light-exciton method 07 p1335 A70-19868

Plastic properties of tungsten carbide single crystals at room temperature, determining slip system crystallographic orientations 08 p1520 A70-21557

Intense light effect on refractive index of potassium niobate crystals 09 p1698 A70-23317

Solid lubricant crystallographic orientation selection for friction cermet material silver-molybdenum disulfide 12 p2254 A70-27286

Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect 12 p2255 A70-27609

Synthetic pyroxenoid stability and crystallography, noting pyroxmangite structure similar to yellow lunar mineral from Mare Tranquillitatis 12 p2226 A70-28022

Fast brittle crack slowing by mechanical twins in transformer steel and by slip bands in LiF and NaCl crystals 15 p2755 A70-31526

Spinel lithium ferrite magnetic and crystallographic properties, considering effects of Li and oxygen losses, sintering temperature and cooling rate 16 p2961 A70-33272

Vibrational spectra and structure of oxaly chloride in crystalline and fluid states, discussing molecular and space group symmetry 16 p2857 A70-34006

Ti-Al alloy crystallographic structure, observing hexagonality for alpha phase 17 p3114 A70-34377

Crystallography of deformation twinning in Ti, presenting modes involving shear strains less than unity and simple shuffle mechanisms

17 p3116 A70-34388

Twinned hexagonal martensites crystallography in Ti alloys, discussing alpha-beta and beta-fcc transformations

17 p3118 A70-34405

Lunar rocks almandine-rich garnet chemical composition and crystallography, noting cell edge and refractive index

21 p3883 A70-40711

Crystallography of euhedral single crystals from lunar troilite indicating hexagonal forms consistent with high temperature NiAs type structure

21 p3898 A70-41522

Apollo 11 lunar rock plagioclases crystallography, obtaining single crystal X ray diffraction patterns by Burger precession method

21 p3903 A70-41555

Potassium acid phthalate crystal X ray spectrometric properties measurements, discussing parallel position rocking curves and reflection coefficients

23 p4230 A70-44420

Crystallography of martensite transformation on /225/ type planes of austenite in Fe-Mn-Cr-C alloy

24 p4358 A70-45237

CRYSTALS

NT BICRYSTALS

NT CRYSTAL OSCILLATORS

NT CRYSTALLITES

NT DENDRITIC CRYSTALS

NT IONIC CRYSTALS

NT LIQUID CRYSTALS

NT METAL CRYSTALS

NT MIXED CRYSTALS

NT PIEZOELECTRIC CRYSTALS

NT POLYCRYSTALS

NT QUARTZ CRYSTALS

NT SINGLE CRYSTALS

NT WHISKERS (SINGLE CRYSTALS)

Microwave conductance tensor in crystals with non-parabolic carrier energy dissipation under crossed constant electric and magnetic fields

12 p2288 A70-28326

Small angle light scattering indicatrices in ruby crystals approximated by Gauss type function

13 p2431 A70-29869

Ronchi test interferometer for optical quality checking of laser crystals

20 p3627 A70-39094

Steady state creep behavior during multiple deformation process, developing grain boundary sliding relation to grain size

23 p4207 A70-44759

CSM

U COMMAND SERVICE MODULES

CUBIC EQUATIONS

Periodic solutions for two dimensional cubic differential equation, covering one dimensional traveling wave and two dimensional types

03 p0519 A70-13581

Regular C cubed space curve bending in Euclidean 3-space into piecewise helix, considering torsion and curvature

12 p2260 A70-26973

CUBIC LATTICES

NT BODY CENTERED CUBIC LATTICES

NT FACE CENTERED CUBIC LATTICES

Quantitative separation of metastable and cubic chromium carbides in alloyed Cr steels utilizing hydrogen peroxide

03 p0504 A70-12981

Cubic texture components preferred orientation shares into rolling texture during cold rolling of aluminum sheets determined quantitatively

09 p1690 A70-22255

Nickel chromite structural changes, thermal conductivity and dilatation during tetragonal-cubic transition, noting phonon-lattice effect

13 p2437 A70-28855

Elastic constants pressure dependence of cubic crystals in NaCl and spinel structures using homogeneous static deformation method

13 p2396 A70-29172

Directional dependence of elastic shear stiffness on cubic axes for Si, Cu and Mo, making polar plots of shear stiffness coefficients

21 p3850 A70-41909

Cubic monocrystalline semiconductor upper critical magnetic field, using correlation function method

23 p4231 A70-44926

Cubic titanium oxycarbide structural characteristics, noting lattice constant dependence on component proportions and mutual solubility during formation

24 p4359 A70-45477

CUES

Distance discrimination experiment in reduced cue setting simulating outer space, confirming Weber power function exponent

04 p0645 A70-15647

Acceleration cues removal effects on vehicular velocity perception, using movie technique to control visual cues

05 p0806 A70-16143

Attention and cue-producing responses in response-mediated stimulus generalization

09 p1617 A70-22342

Color closed circuit TV visual cues in flight simulation during flare and touchdown, including ATA requirements and acuity limits

[AIAA PAPER 70-347] 10 p1857 A70-24201

Airborne simulator program for evaluation of motion and visual cue effects on pilot performance in roll, using compensatory tracking tasks

[AIAA PAPER 70-351] 10 p1857 A70-24202

Dual cockpit wide angle visual cue simulator design, discussing sky-earth-sun projector with four axis gimbal drive

[AIAA PAPER 70-360] 10 p1857 A70-24204

Flight simulation data on motion cues effects in controlling compensatory tracking tasks

[AIAA PAPER 70-352] 10 p1859 A70-24211

Psychophysical metric for space perception visual cues measurement, describing applications to distance discrimination

10 p1827 A70-24768

Motion cue requirements in one and two axis closed loop compensatory control tracking tasks, discussing error rates

14 p2540 A70-30247

Low visibility aircraft landing problem concerning pilot instrument and visual cue and federal regulations governing operational approval

[AIAA PAPER 70-936] 17 p3134 A70-35845

CUFFS

Syncope prevention in orthostatic heat test by inflating cuffs around legs and lower abdomen

24 p4306 A70-45331

CULTIVATION

Growth rate effect on glucose utilization rate using sporogenic strain of *Bacillus subtilis* during N and L-tryptophan limitation

01 p0021 A70-10790

Joint *Chlorella*-yeast cultivation on metabolites, investigating biomass accumulation and pigment synthesis

07 p1197 A70-18655

CULTURE TECHNIQUES

Hypoxic stimulation effect on erythropoiesis in vivo bone marrow

01 p0017 A70-10464

Chemostat culture method for studying control mechanisms during utilization of glucose/lactose and glucose/L-aspartic acid by populations of *Escherichia coli*

01 p0021 A70-10787

Assimilation and metabolism of C atoms of pyruvate and acetate by strict autotrophs *Thiobacillus* cell, using radioactive substrates

01 p0021 A70-10788

Gnotobiotic techniques for human hematopoietic cell culture establishment and maintenance, considering culture transfer

01 p0027 A70-11311

Chlorobium thiosulfatophilum sulfur bacteria growth on media with/without ammonium chloride exposed to illumination, noting various amino acids effects

02 p0241 A70-12797

Mathematical planning of experiments applied to biological mineralization of human wastes, using continuous microorganism cultivation

03 p0435 A70-13715

Temperature-synchronized semicontinuous culture and monitoring system for autotrophically growing *Euglenas*

04 p0633 A70-15453

Microorganisms survivability in agar subjected to simulated Martian freeze-thaw cycles, discussing soil samples collection and composition

09 p1618 A70-22767

Penicillium mutant chemical stress tolerance in boric acid and potassium chloride selective media, studying carbohydrate and inosine-5-phosphate effects on growth rate

10 p1811 A70-24325

Mathematical planning of experiments applied to biological mineralization of human wastes, using continuous microorganism cultivation

11 p1990 A70-25515

Hydrocarbon assimilating bacteria cultures selection, considering highest specific growth rate and maximum productivity

11 p1991 A70-25939

Plant cultivation in closed biological cycles by hydroponic method using *keramsit* /alumoferrisilicate/ substrate

13 p2358 A70-29328

Linear density gradients in isopycnic centrifugation technique for selecting synchronous daughter cells from asynchronous *Chlorella* cultures

14 p2546 A70-30985

Optimum algae cultivator construction for life support system, using *Chlorella* culture model

17 p3026 A70-35320

Wheat culture continuous subirrigation for life support system applications in spacecraft, discussing harvest yields

17 p3026 A70-35321

Unicellular hot spring acidophilic alga *Cyanidium cadarium* cultured in pure carbon dioxide, examining packed cell volume, oxygen production and growth rate

20 p3572 A70-39492

Life support systems based on *Chlorella*-bacterial culture, investigating water exchange and reclamation

20 p3574 A70-40184

CUMULONIMBUS CLOUDS

Thunderstorm development processes investigated by aircraft measurements of electrical structure in cumulonimbus clouds, noting lightning probability dependence on turbulence within cloud

22 p4064 A70-42775

CUMULUS CLOUDS

Near IR reflection spectra of artificial cumulus clouds with progressive droplet sizes

01 p0076 A70-10911

Seeding effects on isolated cumulus clouds, using numerical model of microphysics and dynamics factors, measuring rainfall amounts and duration

06 p1098 A70-18243

One dimensional cumulus convection model modified by incorporating rain evaporation rate and temperature changes from downdrafts

06 p1099 A70-18568

Dry regions in cumulus cloud near environment interpreted as evidence of compensating motion in environment

06 p1101 A70-18577

Vertical plane and axis symmetrical numerical models for cumulus convection of moist atmosphere, discussing initial conditions

08 p1536 A70-21025

Cumulus convection one dimensional time dependent numerical model, considering horizontal mixing, evaporation, precipitation generation and freezing and thermodynamic processes

11 p2075 A70-25648

Radar measured precipitation increase from seeded cloud demonstrated by measurements, numerical cumulus model and physical reasoning

12 p2189 A70-28094

Radar data characteristics for extensive natural cumuli cloud evolution, noting use for precipitation forecasting

18 p3287 A70-37000

Isolated cumulus clouds formation numerical simulation, determining movement rates relationship to external wind speed

19 p3463 A70-38756

CURIE TEMPERATURE

Normal and bottle-green microtektite glass measured for magnetic susceptibility, magnetization and Curie constants

05 p0916 A70-16839

Narrow Curie point switching transfer in Mn-Bi films by controlling magnetization direction within preselected areas

11 p2098 A70-26069

Dilatometric investigation of Fe alloys phase transformations, determining magnetic field effects and Curie temperatures

18 p3276 A70-36206

Autocorrelation functions of anomalous gravitational and magnetic fields for ocean lines, relating Mohorovičić boundary and Curie isotherm

19 p3408 A70-37318

Apollo 11 lunar rock and dust samples thermomagnetic properties, Curie points, magnetization and demagnetization characteristics

21 p3915 A70-41661

CURING

Organic adhesives preparation and application to metal surface for bonding, examining time, pressure and temperature effects on curing

08 p1503 A70-20881

Flame-resistant trichloromethyl-containing polyester-styrene system, describing curing characteristics at room and higher temperatures

10 p1907 A70-24066

Polyimide resins and composites state of cure determination by thermomechanical analysis (TMA/

11 p2069 A70-25807

Thermal stresses and curing in electronic modules transfer molding, discussing various design test models

13 p2420 A70-29252

Low dielectric constant quartz-polyimide for radomes, considering curving methods

16 p2936 A70-33368

Fluid urethane laminating resin for bonding nylon and glass fabrics, giving physical properties as function of room temperature curing time

16 p2938 A70-33381

Poly(perfluoroalkylene oxides) preparation and curing, considering molecular weight and thermal stability

21 p3783 A70-42145

CURL (VECTORS)

NT VORTICITY

CURRENT AMPLIFIERS

NT PHOTOMULTIPLIER TUBES

Magnetron diode current fluctuations in interelectrode space, considering cathode emission current amplification by various modes
10 p1853 A70-25164

Intracellular myocardium potentials under vagus inhibition by electrometric DC amplifiers with positive and negative feedback
19 p3370 A70-38213

M phase thyristor amplifier operation, investigating state and transition equations by state variable methods
22 p3996 A70-42918

Two-cascade amplifying circuits with current and voltage feedback for semiconductor precision devices
24 p4321 A70-46394

CURRENT DENSITY

Photoconductivity and photomagnetic effect measurements in Ge for determining nonequilibrium current carrier concentration produced by Q switched neodymium laser
01 p0107 A70-10099

Double injection in semiconductors at high current densities, discussing procedure yielding space charge and field distribution and voltage drop
01 p0154 A70-10123

Longitudinal and transverse temperature distribution measurement of electrons in electrostatic field and ion current density in ionized Cs plasma beam, determining energy spectra
01 p0149 A70-10170

Critical current density enhancement in Ta-rich Zr alloys in magnetic fields at low temperature after aging
01 p0122 A70-11238

Nonequilibrium potassium seeded Ar plasma electrical conductivity at atmospheric pressure, noting current density role
02 p0347 A70-12232

Current density and electron concentration fluctuations in semiconductors under electric field, obtaining theory of light scattering at hot electrons
03 p0539 A70-13405

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods
03 p0451 A70-13755

Current stream function, Hall current density, force densities and pressure distribution for typical MPD thruster
03 p0552 A70-14372

MHD flow velocity and current density distributions in annular duct with radial magnetic field
04 p0725 A70-14531

Anode work functions from cesiated metal surfaces as parameters for thermionic converter systems analysis
04 p0627 A70-14946

Ionization gage with screened collector, showing limit current in high vacuum equal to X ray radiation component
05 p0847 A70-15997

Energy losses in conductors carrying intense currents to cryogenic regions linked with heat transfer due to high temperature gradients
05 p0881 A70-16026

Electron energy equation for nonequilibrium plasmas, assuming large electron diffusion velocity and current density and enhanceable electron temperature
06 p1123 A70-18299

Induced current density of fully ionized stationary plasma in externally applied HF electric field, discussing frequency range of fluctuations
07 p1352 A70-19988

Thermoelectric stress degradation of injection lasers at high excitation levels, giving critical current densities for short pulse, CW and quasi-CW conditions
08 p1512 A70-20861

Nonlinear wave scattering at plasma particles and weak plasma inhomogeneity effects on plasma current instability
08 p1554 A70-21819

Short high current pulses generation by avalanche transistors in circuits suitable for investigating low impedance laser diode
09 p1642 A70-22035

Fast magnetoacoustic wave propagation in cylindrical plasma column with constant current density, using geometric optics
10 p1923 A70-24229

CO electrochemical oxidation at porous solid electrolyte fuel cell anodes under high temperature, noting current density role
10 p1830 A70-24462

Plane electromagnetic wave diffraction at conducting stripline, calculating surface current density and far field scattering using edge wave and factorization methods
10 p1842 A70-25002

Longitudinal and transverse temperature distribution measurement of electrons in electrostatic field and ion current density in ionized Cs plasma beam, determining energy spectra
10 p1925 A70-25016

Hydromagnetic flute and surface wave instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization
10 p1926 A70-25117

Current density distribution during electroerosive machining, discussing current diagram construction and tool profile
11 p2060 A70-25935

Nomographic Richardson-Dushman equation solutions for thermionic electron emission devices, giving current density for various work functions and electrode temperatures
12 p2271 A70-26894

Current-sensitive single gun color CRT with phosphor screen for display systems
12 p2195 A70-27373

Argon laser upper levels population measured as function of current strength at constant atom density in capillary
12 p2247 A70-27506

Fuel cells power density improvement under pulsed loading at high current density and constant voltage
12 p2165 A70-27758

Electron density determination, establishing gas pressure relation to discharge current
13 p2460 A70-28710

Current density distributions in Ar-K plasma streams through channel with segmented electrode array, measuring electron temperatures
13 p2461 A70-28732

Sunspot electric current density accounting for magnetic field abrupt reversal
13 p2496 A70-29848

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force
14 p2570 A70-30217

Sunspots surface layers azimuthal electric current density, assuming specific magnetic force distribution
18 p3322 A70-37135

High current elastic conductors nonlinear mixture theory with inviscid electron gas in elastic continuum under mutual electromagnetic and diffusive forces
19 p3387 A70-37787

Geomagnetic activity effect on potential gradient and air-earth conduction current density
19 p3413 A70-38000

Argon ion laser inversion saturation at large current densities due to upper working levels depletion
19 p3449 A70-38744

Frequency dependence of impedance of p-n diode with short base in presence of large forward current densities
20 p3598 A70-40021

Steady plane conducting gas flow across magnetic field in channel, calculating flow rate effect on current density distribution
20 p3684 A70-40386

Electromagnetic wave propagation in colloidal plasmas analyzed by kinetic approach, obtaining expressions for current density, DC and microwave conductivities, etc
20 p3685 A70-40502

Hydromagnetic flute and surface waves instabilities of current-carrying plasma filament in strong longitudinal field, showing radial density stabilization
20 p3685 A70-40510

Stainless steel gas tungsten arc welding, considering anode spot size variation and current density
22 p4042 A70-42377

Air-earth current density time variation in stratosphere by high altitude balloon, comparing with potential gradient diurnal variation over ocean
22 p4017 A70-42798

Current densities and fields in quasi-neutral electron beam plasma, solving boundary value problem numerically
22 p4081 A70-42825

Current-phase relationship in short superconducting weak links, using one dimensional model
24 p4389 A70-45224

Strong magnetic fields effect on field emission currents in Bi, Zn, Ta and W
24 p4379 A70-45621

Ferromagnetic cylindrical specimens eddy current density distribution under influence of field strength dependent permeability corresponding to Rayleigh law
24 p4344 A70-45695

Magnetosphere boundary altitude dependence on longitude, considering role of electric current density along geomagnetic lines of force
24 p4331 A70-46292

CURRENT DISTRIBUTION

Current distribution in finite length helical antenna in HF field, using cylindrical model of infinitely good conductivity
01 p0050 A70-10713

Shaped-reflector Cassegrainian antenna characteristics calculation, using current distribution method to derive subreflector radiation pattern
02 p0270 A70-12617

Field patterns of thin resonant and nonresonant antennas in warm plasma, using digital computer to evaluate propagation constant for current distribution
02 p0263 A70-12655

Manganin piezoresistive shock gauge constant current supply using inductor and termination technique eliminating shunting
02 p0303 A70-12737

Onset conditions for galvanothermal current instability of Ge semiconductors as function of electric field oscillations, carrier concentration and carrier-lattice temperature
03 p0541 A70-13724

Optical inhomogeneity of GaAs associated with current carrier distribution analyzed quantitatively using magnetooptical Faraday effect and transmittance method
03 p0541 A70-13726

Direction finding characteristics of nonlinear antenna, including current determination and optimal angle for sidelobe level
06 p1023 A70-18561

Dipole antennas current distribution in dissipative homogeneous medium
07 p1240 A70-19219

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators
07 p1348 A70-19322

Optimal linear antenna synthesis, determining current distribution resulting in specified radiation pattern for superdirective antennas
08 p1472 A70-20972

Current distribution determination necessary for given directional characteristic of antennas in nonlinear synthesis problem
09 p1644 A70-22403

Inert gas glow discharge current change under laser radiation, investigating dependence on discharge region, gas and electrode material and configuration
09 p1696 A70-22484

Quasi-near zone electric field intensity and current distribution of monopole antenna on finite conductive earth
09 p1645 A70-22691

Two dimensional numerical analysis of current saturation mechanism for junction field effect transistors with small and large length-to-width ratio values
09 p1740 A70-23110

Error functional minimization in class of current distribution relay functions noting applications to linear antennas and FM signals synthesis
09 p1637 A70-23154

Current diffusion from magnetic piston into postshock gas upstream observed in electromagnetic shock tube
09 p1736 A70-23185

Anode energy transfer model for measurement of circumferential current and heat flux distributions of MPD arc thruster
09 p1736 A70-23203

Antenna pattern synthesis with circular distributed current source, analyzing directivity characteristics through Fourier series nth order mode concept
10 p1849 A70-24616

Current density distribution during electroerosive machining, discussing current diagram construction and tool profile
11 p2060 A70-25935

Electromagnetic field singularities near sharp edge relating to geometry scatter used for treating singularities in current distribution integral equations
12 p2183 A70-26977

He-Ne laser noise caused by discharge current fluctuation and moving striation in long capillary tubes
12 p2245 A70-27272

Vertical tubular dipole antenna input admittance and current distribution above infinite dissipative half space
12 p2197 A70-27953

Circular loop antenna with traveling wave current distribution, considering phase change effects on radiation pattern and gain
12 p2198 A70-27965

Dipole antenna current distribution in ionized homogeneous anisotropic medium, using dielectric permittivity tensor
13 p2371 A70-29923

Current stability and coil tests of force cooled superconducting systems
14 p2617 A70-31017

Gas kinetic pressure profile and mass density of propagating current sheet in argon pinch discharge, using piezoelectric transducer
14 p2624 A70-31041

Plasma cylinder surface drive current buildup, using theta pinch two dimensional model
14 p2624 A70-31049

Aperture antennas planar finite array, calculating excitation pattern for prescribed surface current distribution
14 p2557 A70-31160

Loop antenna current distribution source from radiation pattern synthesis, using Fourier series
15 p2698 A70-31837

Hydromagnetic viscous flow of incompressible conducting fluid due to electric current radial divergence from point source
15 p2780 A70-32426

Radiation pattern of radial infinitesimal current elements near or on finite length conducting cylinders, using image and geometrical theory of diffraction techniques

16 p2860 A70-32956

Mutual and self admittances for array with two monopoles, solving integral equations for current distributions

16 p2860 A70-32957

Backfire antennas allowing for mutual impedance between dipole elements, determining radiated field from surface current distribution

16 p2861 A70-32958

Current distribution on isolated thin cylindrical center-fed dipole antenna, calculating axial electric fields and radiating properties

16 p2861 A70-32964

Nonuniform parallel element dipole array field patterns and synthesis by three term theory, taking into account current distribution effects

16 p2872 A70-32972

Hall generator measurement of impulse currents, noting error sources and compensation

16 p2900 A70-33072

Simple antenna sources, deriving far zone radiation field from arbitrary current distribution

17 p3043 A70-35052

Linear antennas theory using integral equations for current distributions

17 p3044 A70-35058

Thin long dipole antenna, determining input admittances, current and charge distributions and field patterns by Wiener Hopf technique

17 p3051 A70-35060

Circular loop antenna for transmission and reception, determining current distribution, admittance and radiation field by integral equation

17 p3051 A70-35061

Funnel shaped vector radiation pattern realized by synthesizing axisymmetric distribution of elliptically polarized currents on body of revolution

19 p3392 A70-37277

Scattering structures of two parallel elliptical cylinders, tapes or combinations, deriving surface current density distribution under plane TM wave excitation

19 p3375 A70-37279

Current distribution method for inverse problem of antenna theory, producing radiation pattern

19 p3385 A70-37437

Current and resistance in Hg filled space between two circular electrodes under strong magnetic field, using boundary layer techniques

19 p3477 A70-37578

Cylindrical EM waves diffraction by two parallel ideally conducting elliptical cylinders, discussing field and surface current distributions

19 p3378 A70-37734

Nonuniform emitter current distribution effect on power transistor thermal stability, discussing temperature distribution effects

19 p3387 A70-37821

Center fed cylindrical half wavelength dipole antenna, computing radiation pattern by trigonometric expansion approximation for current distribution

19 p3388 A70-37869

Pulsar radiation mechanisms, discussing magnetic field topology and current distribution estimation

19 p3518 A70-38022

Ionospheric electric current distribution response to horizontal wind induced emf, using lunar tidal wind models

19 p3415 A70-38386

Current fluctuations in polar semiconductors in strong electric field, taking into account semiconductor band structure

20 p3686 A70-39589

Current distribution and interband recombination emission in bipolar semiconductor crystal under pinch effect produced by external magnetic field

20 p3677 A70-39590

Conducting wall MHD generator channel current distribution, examining computer program for anode and cathode currents

20 p3566 A70-40013

Continuous electrode MHD generator ionization instabilities, measuring current distribution and transverse electric field

20 p3567 A70-40018

Antennas with controlled current distribution in medium wavelength range for optimal radiation pattern over desired area, discussing maximum gain tuning for daytime and nighttime operation

22 p3995 A70-42521

Current distribution of accelerating electrodes of coaxial injector, using differential magnetic probe

22 p3965 A70-42805

Eroding-dielectric plasma accelerators energy characteristics, discussing current distribution

22 p4083 A70-43387

Current distribution and near field of cylindrical antennas loaded with built-in lumped elements

22 p3998 A70-43422

Auroral electrojet return current spatial extent from model ionospheric current distribution and geomagnetic variations

23 p4192 A70-44922

Dielectric filled tubular monopole antenna driven by coaxial line with TEM mode, calculating current distribution from integral equation

23 p4175 A70-44953

Electromagnetic scattering by two dimensional periodic arrays of conducting thin plates, calculating induced current and near field radiation distribution

23 p4165 A70-44961

Dipole antenna in compressible lossy plasma, calculating sheath and absorptive surface effects on current distribution from boundary value problem formulation

23 p4228 A70-44963

Radar cross section and current distribution of dipole deformed into low pitch angle helix

23 p4166 A70-44974

Current twisting in double injection ohmic contact long p-n diodes with S-shaped current-voltage curve, showing unstable density at negative resistance segment

23 p4176 A70-45061

Current oscillations in external circuits of semiconductor with low surface recombination in parallel electromagnetic field

23 p4231 A70-45062

Transverse and longitudinal current correlations in fluids from modeled kinetic equations, noting inelastic neutron scattering from liquids

24 p4378 A70-45261

CURRENT REGULATORS

Current oscillations produced in finite-length electron hole semiconductors by strong electric and magnetic fields, discussing HF stabilization

22 p4084 A70-43469

Universal proportional high accuracy temperature controller using current regulating circuit consisting of light beam galvanometer, photoconductor, photodiodes and thyristors

23 p4194 A70-43999

CURRENT SHEETS

Current sheet pattern and gas flow stabilization in pulsed plasma accelerators

07 p1348 A70-19322

Energy transfer from pulse network to mass associated with propagating current sheet in linear pinch discharge, discussing pulsed plasma accelerator efficiency

07 p1348 A70-19323

Pulsars radio, optical and X ray emission spectrum analysis, suggesting oscillating current sheets as radiation source

08 p1561 A70-20914

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing

09 p1736 A70-23202

Current sheet speed in coaxial plasma accelerator computed as function of time, comparing results with velocity measurements

12 p2281 A70-27833

Aurora band theory based on three dimensional current system during magnetic substorms, discussing field aligned sheet current instability

14 p2573 A70-30671

Pulse structure, polarization, time varying features and tight beam emission by pulsar model using finite thickness interfaces

17 p3153 A70-34532

Current sheet structure of hydromagnetic boundary layer formed by mixing two conducting fluid streams containing oppositely directed magnetic fields

17 p3140 A70-34930

Electric propulsion research involving MPD thrusters, current sheets and neutral-ion motion coupling

20 p3683 A70-40249

Current sheet motion and pulsar radio, optical and X ray emission, investigating finite thickness oscillating interface radiation with independent particle

24 p4397 A70-45760

CURRENT STABILIZERS

U CURRENT REGULATORS

CURTAINS

Heat and gas curtain efficiency in turbulent boundary layer on flat plate, including heat transfer data

17 p3198 A70-35731

Jet curtain flow recirculation model based on air-bubble flow visualization technique, determining minimum power for air cushion vehicle

22 p3957 A70-42278

CURTISS-WRIGHT MILITARY AIRCRAFT

U MILITARY AIRCRAFT

CURVATURE

Dispersive Doppler shift and Faraday rotation second order theory for curved earth-ionosphere geometry, calculating phase path differences

02 p0260 A70-12574

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends

03 p0589 A70-13337

Curvature effects on two dimensional turbulent wall jet flow over plane surface and circular convex and concave surfaces in still air

05 p0832 A70-16118

Stress distribution around crack tip of initially curved sheets

05 p0939 A70-16484

Fibers random curvature effect on thermoelastic properties of unidirectionally reinforced fibrous materials

05 p0946 A70-16953

Steady laminar flow with frictionless central core surrounded by boundary layer in circular curved pipe, discussing friction factor and flowmeter discharge coefficient

05 p0836 A70-17107

Anticlastic bending effect on rectangular beam curvature, presenting deflection equations

07 p1414 A70-20175

Transverse curvature effects on turbulent boundary layer thickness and velocity profiles on circular cylinders in water and air

07 p1261 A70-20301

Electrode curvature effect in radial reflex klystron on processes in electron bunching region

09 p1651 A70-23640

Pressure waves of varying amplitude effect on flow through turbomachine blade passages, discussing interaction with curved diffusers geometry

09 p1608 A70-23743

Streamline curvature technique for two dimensional flow equations, deriving optimal damping factor for quasi-orthogonal method to test stability, convergence and accuracy

09 p1609 A70-23749

Homogeneous open anisotropic relativistic world model with negative space curvature, observing shear decrease with time and magnitude reciprocal variation with function R/t

11 p2109 A70-25866

Zero-moment theory boundary value problem of shells of revolution with negative curvature under tangential static and geometrical conditions imposed on ends

14 p2657 A70-30715

Curved porous wall channels for noise suppression in power plants, ventilation systems, etc

18 p3216 A70-36302

Ricci curvature tensor perturbations of space-time on Alfvén wave fronts

19 p3472 A70-38935

Pool film boiling heat transfer data from small spheres, noting curvature effects and similarities of flat plate, cylinder and sphere theoretical analyses

21 p3949 A70-41310

Steady incompressible turbulent boundary layer form on permeable curvilinear surface with uniform suction, assuming small pressure gradients

22 p4011 A70-42803

Wave front arbitrary curvature, examining integration of weak discontinuities growth equation in quasi-linear hyperbolic system

22 p4062 A70-42953

Earth curvature effects on position of terrain points on planar aerial photographs for various survey altitudes

24 p4333 A70-45197

CURVE FITTING

Gram-Charlier method generalization for curve fitting analytic forms to velocity covariances measured in turbulent wake of circular cylinder

03 p0480 A70-12950

Spline data techniques for error elimination in trajectory optimization to offer improvement over linear interpolation scheme

07 p1325 A70-19340

Space mechanics problem of passing from perigee to radial distance in given time determined by fitting conic to radii, using iteration method

09 p1760 A70-22927

Stress concentration analysis using Chebyshev polynomial curve fitting

09 p1784 A70-23450

Curve arc approximation by circular arc using Chebyshev modulus-minimax principle

13 p2442 A70-29743

Jet flow past arc curve approximation using successive conformal mapping on circle and wedge

13 p2391 A70-29746

Curve approximation quality by method of informative evaluation for determining minimum required number of measured points on ST interval of electrocardiogram

13 p2360 A70-29775

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability

20 p3659 A70-40261

Fitting equations to mixture data by linear least squares method with restraints on compositions, using Scheffe polynomials

22 p4064 A70-43728

Model fitting procedure applied to lunar occultation data and models analysis for point sources, close binaries and resolvable stars

24 p4399 A70-45130

Interpolation and smooth curve fitting based on local procedures and piecewise function

24 p4369 A70-45162

CURVED BEAMS

Stiffness matrix derivation for curved beam emphasizing uncoupled normal to plane loads

03 p0584 A70-12949

Natural frequencies upper and lower bounds of elastic clamped vibrating curved beams /arcs/ determined on basis of differential operator theory

05 p0937 A70-16405

Horizontally curved I beams flanges elastic buckling, determining prebuckling flange stresses in longitudinal and radial directions

07 p1413 A70-20001

Multispan horizontally curved beams natural frequencies determination illustrated by developing frequency equation

09 p1770 A70-22388

Elastic circular sandwich beams optimal design for minimum compliance and given weight, considering rings and semicircular arches

24 p4420 A70-45276

CURVED PANELS

Elastic properties of thin curved cylindrical panels with constant mechanical properties subjected to thermal expansion and single face pressure

01 p0201 A70-10943

Equilibrium of thin curved cylindrical panels subjected to thermal expansion and pressure numerically analyzed by Ritz method

01 p0201 A70-10945

Curved cylindrical panel flutter in presence of uniform compressive load, taking into account relationship between actual and ideal shape

01 p0202 A70-10946

Thin elastic cylindrical panel motion induced by plane acoustic shock wave analyzed by integrating nonlinear motion equations using finite difference scheme

03 p0524 A70-13377

Critical radii of curvature in elastoplastic bending of rib-reinforced aircraft components from wafer panels determined using strain energy method

08 p1506 A70-21183

Thin circular cylindrical panels of arbitrary curvature calculated for end support and loading at contour

12 p2323 A70-27335

Hypersonic viscous interaction on curved surfaces, extending Cheng inclined flat plate analysis [AIAA PAPER 70-782]

17 p3007 A70-34474

Frequency analysis of cylindrically curved panel with clamped and elastic boundaries, using mathematical and panel models

17 p3181 A70-34524

Buckling loads and postbuckling behavior of curved panels under axial compression, noting dependence on boundary conditions

17 p3188 A70-35225

Frequency equations derived for cylindrical panels with surface loading, comparing free vibration natural frequencies of panels with attached mass at centers

24 p4422 A70-45297

CURVED SURFACES

U CONTOURS

U SHAPES

U SURFACES

CURVES (GEOMETRY)

NT CATENARIES

Elastic curve deformation of rod in equilibrium under end loads, using equations analogous to Kharlamov kinematic equations and Chaplygin solution

01 p0094 A70-11440

Turbojet performance magnitude data represented by components nondimensional characteristic curves

03 p0551 A70-13021

Theoretical and experimental cascade curves comparison for heavy materials used for particle absorption in tracking experiments, discussing Coulomb scattering

03 p0527 A70-13051

Slope and shape of blood-gas dissociation curve as factor influencing pulmonary gas exchange in presence of ventilation-perfusion inequality

06 p0994 A70-17522

Singularity carrier auxiliary curves for design calculation of airfoil cascades, discussing existence theorems and case of thin profiles

11 p1974 A70-25783

Singularity carrier auxiliary curves for design calculation of airfoil cascades, discussing profiles with small and large arcs

11 p1974 A70-25784

Circular elastic helix phase velocities determined by internal constraints method, comparing results with other theories

11 p2085 A70-26557

Nonlinear dynamic theory describing elastic Cosserat curves plane motion, developing linear displacement equations and dynamic stability concept

11 p2142 A70-26632

Regular C cubed space curve bending in Euclidean 3-space into piecewise helix, considering torsion and curvature

12 p2260 A70-26973

Lambert problem solution for moderate timespan arcs by approximation, offering concise formula without iteration

14 p2639 A70-30705

Parametric representation of brachistochrones of mass point in centrosymmetrical gravitational field

18 p3283 A70-36387

Geometric relations for contact moments of solar eclipse, using crescent cord photographic measurements

18 p3315 A70-36610

Observed meteor brightness curve shortening with respect to theoretical curves

19 p3514 A70-37645

Mathematically defined curve incremental generation by computer, discussing parametric and non-parametric representations and digital differential analyzer technique

22 p3993 A70-43072

CUSHIONS

Airplane dependability on basis of improvements in jet engine, avionics, pilot seat cushions and flight control systems

09 p1611 A70-23453

CUSPS

NT CUSPS [MATHEMATICS]

Trailing edge flow of slender aerodynamic shapes terminating in cusp or wedge, analyzing boundary layer reactions

04 p0613 A70-14457

CUSPS [MATHEMATICS]

NT DOUBLE CUSPS

Optimal three dimensional impulsive orbit transfer at cuspidal point of primer locus in terms of three parameters to facilitate computation and tabulation [AIAA PAPER 70-1037]

19 p3527 A70-38852

CUT-OFF

Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity

01 p0167 A70-10229

Low speed air-propane flame stability, examining holder diameter effects on vibration cutoff wavelength

20 p3738 A70-40281

Synchrotron source spectra natural frequency cut-off in absence of self absorption and electron energy cut-offs, discussing pulsar NP 0532

24 p4410 A70-45774

CUT-OUTS

U OPENINGS

CUTANEOUS PERCEPTION

U TOUCH

CUTTERS

NT RAZOR BLADES

CUTTING

NT METAL CUTTING

NT MILLING [MACHINING]

NT SPARK MACHINING

Ultrasonic machining of glass and cemented carbide, measuring ambient pressure effect on workpiece removal rate

21 p3833 A70-41253

Spatial stability of transferred arc anode spots during cutting with plasma jets, noting currents associated with microspots

22 p4043 A70-42380

CW RADAR

U CONTINUOUS WAVE RADAR

CYANIDES

NT CYANOGEN

NT HYDROGEN CYANIDES

NT IRON CYANIDES

Isomerization of isocyanide into azulene by irradiation and formation from biphenyl isothiocyanate, observing ring expansion and electrophilic carbenoid properties

05 p0811 A70-16055

Radiative lifetimes determination from beta-chi violet transition probabilities of CN

10 p1947 A70-24991

Cyanide gas lasers design for submillimetric region of electromagnetic spectra

11 p2062 A70-25735

Formation mechanism of molecular CN violet bands in solar photosphere

13 p2493 A70-29393

Benzoyl cyanide deoxygenation, describing reaction kinetics and products

17 p3041 A70-34750

Photoreaction produced N- cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane

17 p3042 A70-34820

Numerical molecular rotational transition probabilities and cross sections in HCN-HCN and ICN-ICN collisions, using perturbation theory and multipole potentials

21 p3853 A70-41391

CYANO COMPOUNDS

NT ISOCYANATES

Dicyanostilbene formation from phenylethynyl azide and isocyanate

05 p0811 A70-16054

Cyanoacrylate and anarobic polymer single component adhesives performance

22 p4046 A70-43120

CYANOCOBALAMIN

Hematologic changes in rats under hypergravity, effects of vitamin B12, folic acid and return to 1 g

06 p0991 A70-17283

CYANOGEN

NH bands in stellar spectra by visual inspection of spectrograms, noting abundance of N in normal and strong CN stars

02 p0379 A70-12708

UV absorption cross sections of CO, HCl and ICN, analyzing reactions causing various spectral features

08 p1455 A70-21340

Radiative lifetimes determination from beta-chi violet transition probabilities of CN

10 p1947 A70-24991

Cyanogen-nitrous oxide flame temperature determination for different concentrations of mixture in flat stainless steel diffusion flame burner

11 p2101 A70-26386

CYANOPHYTA

U BLUE GREEN ALGAE

CYBERNETICS

Information transfer for quantitative relationships to error- and cause-controlled regulations

07 p1216 A70-18859

Neural information processing taking into account differences between living brain and artificial processor

09 p1617 A70-22496

Group Method of Data Handling based on heuristic self organization for solving complex system problems, with applications to random processes prediction

10 p1845 A70-24869

Flexible vehicle control, using cybernetic model for system design and response [AIAA PAPER 69-115]

12 p2314 A70-27811

Feedback in electrical networks, discussing transient processes within cybernetics framework

15 p2716 A70-32362

Soviet papers on biocybernetics covering man and computer, biological and engineering systems, heart self regulation, etc

18 p3223 A70-36076

Brain-like computer with learning rather than programmable capability, discussing pattern recognition and task performance

18 p3230 A70-36775

Soviet cybernetics research, emphasizing discrete and continuous control devices and systems synthesis

22 p4004 A70-43449

Biocybernetics of human central nervous system, discussing electronic computers analogy to human brain

23 p4145 A70-44222

Heuristic self organizing systems role in technical cybernetics

24 p4321 A70-45645

CYCLES

NT ACTIVITY CYCLES [BIOLOGY]

NT BRAYTON CYCLE

NT RANKINE CYCLE

NT SOLAR CYCLES

NT STIRLING CYCLE

NT STRESS CYCLES

NT SUNSPOT CYCLE

NT THERMODYNAMIC CYCLES

NT WORK-REST CYCLE

Cyclic changes in concentration produced in fluid flowing through fixed bed of solid adsorbent, governing separation by beds wave propagation properties

04 p0780 A70-14712

Optimal directed circuit and cycle elimination in weighted diagrams by edge reversal orientation

11 p2072 A70-26219

Damped vibrations logarithmic decrement determination during automatic recording of number of cycles, emphasizing error analysis

15 p2733 A70-31531

Computerized calculation of gas turbine cycles thermal efficiency, using hydrocarbon fuel, considering fuel composition and heat of combustion changes

22 p4125 A70-43439

Cyclic q-ary codes invariant under linear group substitutions using polynomial method

24 p4313 A70-46062

CYCLIC ACCELERATORS

NT BETATRONS

NT SYNCHROCYCLOTRONS

NT SYNCHROTRONS

CYCLIC HYDROCARBONS

NT ANTHRACENE

NT CYCLOBUTANE

NT CYCLOPROPANE

Cycloheptane and mixture of exo- and endo-cycloheptene heats of combustion and formation, isomerization and hydrogenation

01 p0213 A70-10134

- Cycloaliphatic epoxy resins for glass and carbon fiber reinforced plastics and laminates
07 p1318 A70-17973
- Cyclization of alkoxy radicals, investigating 4-pentenoxy radical and entropy factors effect
08 p1455 A70-20975
- Cyclohexene oxide mass spectral fragmentation by means of deuterium labeled analogs
09 p1630 A70-23397
- Isomeric 1-phenylheptenes mass spectra, investigating electron impact induced rearrangements of double bond
09 p1631 A70-23401
- Dicyclohexyl (DCH)/endothermic dehydrogenation to diphenyl (DP)/over platinum-alumina catalyst without added hydrogen considered for hypersonic aircraft engine cooling
14 p2546 A70-31175
- Cycloaliphatic epoxy resins tensile and impact strength improvement by modification with elastomeric materials, considering heat distortion temperature
16 p2936 A70-33359
- IR and Raman spectra of gaseous and liquid germylcyclopentane, determining torsional barriers and skeletal ring atom symmetry
16 p2858 A70-34008
- Photoreaction produced N-cyclohexyldiphenylketenimine from cyclohexyl isocyanide and diphenyldiazomethane
17 p3042 A70-34820
- NMR spin-spin coupling constants between vinyl protons in cyclopentadiene, 1,3-cyclohexadiene and 1,3-cyclooctadiene from spectrum analysis
21 p3780 A70-41704
- Heats of combustion and free isomerization energies of exo- and endo-isomers of 2- and 1-methylbicyclo heptane
22 p3982 A70-42680
- Specific heat and thermodynamic functions of endo- and exo-isomers of 2-methylbicyclo heptane in 12-310 K temperature range
22 p3982 A70-42681
- CYCLIC LOADS**
- Nondestructive testing and fatigue life analysis of cyclically loaded mechanism, determining dynamic responses to velocity shocks by computer techniques
01 p0053 A70-10010
- Loading frequency effects on Duralumin endurance limit in air and in water, noting stress level role
01 p0115 A70-10070
- Cyclic loading test apparatus for studying ferromagnetic metals structural changes due to fatigue
01 p0116 A70-10076
- Fatigue crack growth rate for high strength steels from crack length during cyclic loading and striation spacings after fracture
01 p0119 A70-10732
- Fretting corrosion effect on structural steel fatigue strength under asymmetric load cycles
01 p0207 A70-11155
- Bauschinger effects in repeated tensile and compressive strains in inelastic media under variable temperatures as function of load vector, using plastic yield
01 p0211 A70-11422
- Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles
02 p0383 A70-11656
- Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit
02 p0383 A70-11657
- Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature
02 p0315 A70-11660
- Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads
02 p0315 A70-11662
- Mechanical losses in fiberglass reinforced textolite converted into thermal energy during cyclic tension and compression
02 p0323 A70-12807
- Fiberglass reinforced textolite fatigue characteristics under impact tensile loads, noting different characteristics under cyclic sinusoidal loads
02 p0323 A70-12815
- Periodic biharmonic stress cycling determination of load influence of fatigue failure used for random load serviceability tests
02 p0391 A70-12855
- Out-of-phase or nonsynchronous biaxial straining effects on low cycle fatigue observed on Al specimen by cycling tension-compression and cyclic torsion
03 p0481 A70-12955
- Equipment for cyclic biaxial stress states testing by simultaneous direct pressurization and axial loading of thin walled cylindrical specimens
03 p0462 A70-12966
- Metals fatigue strength prediction by hysteresis loop method, presenting results for irreversible energy dissipation rules during cyclic loading
03 p0587 A70-13240
- Stress-strain state of infinite isotropic perforated plate under cyclic symmetry, assuming finite strains and nonlinear material
03 p0592 A70-13445
- Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen
03 p0464 A70-14309
- Structural metals hysteresis properties under cyclic plastic loading at room temperature, considering cycle dependent creep and stress relaxation
[ASME PAPER 69-WA/MET-4] 04 p0705 A70-14763
- Stress-strain spatial distribution in notched plate fatigue specimen of mild steel determined by finite element method, noting cyclic strain softening effect
[ASME PAPER 69-MET-C] 04 p0770 A70-14876
- Axial compression effect on low cycle fatigue of thin walled metal tubes in torsion
[ASME PAPER 69-MET-H] 04 p0705 A70-14880
- Transverse vibration of viscoelastic polymethyl methacrylate column with initial curvature under periodic axial load, determining amplitude-frequency curves
[ASME PAPER 69-WA/APM-13] 04 p0772 A70-14915
- Swenson shear fatigue crack model expanded to include mean stress effect on cyclic shear crack growth
[ASME PAPER 69-WA/APM-8] 04 p0772 A70-14918
- Fatigue crack incremental propagation under cyclic shear loading, developing discrete dislocation model for crack and plastic zones
[ASME PAPER 69-WA/APM-7] 04 p0772 A70-14919
- Surface work hardening and stress concentrations effects on fatigue strength of alloy under asymmetric tension and compression load cycles at high temperatures
04 p0707 A70-15270
- Summation of cycle ratios for various loading programs to control cumulative damage concept based on French curve, using fatigue tests
05 p0939 A70-16485
- Unsteady cyclic creep effect on stressed state and margin safety of elements, noting discrepancy of experimental and theoretical characteristics
05 p0866 A70-17030
- Effective stress evaluation under cyclic trapezoidal loading and creep noting use in stationary test data conversion
05 p0951 A70-17031
- Optimal thermomechanical treatment for austenitic steel stability to resist propagation and unloading of dislocations in cyclic loading process
05 p0867 A70-17041
- Thermocyclic creep and rupture strength of Nb, Ta and Mo refractory alloys under temperature and load variations, showing failure dependence on cycle parameters
05 p0867 A70-17043
- Gas dynamic stand for testing turbine disks strength under mechanical and cyclic thermal loads, analyzing breakdown data for various disk geometry
05 p0953 A70-17052
- Collection of papers on strength at small number of load cycles, problems of mechanical fatigue
06 p1160 A70-17382
- Carrying capacity of machine parts under small numbers of cyclic plastic deformation, reviewing breakdown criteria relation to kinetics of stress-strain states
06 p1161 A70-17383
- Plastic bodies stress-strain state under variable loads generalized to cases of cyclic loads and plasticity
06 p1162 A70-17384
- Plastic flow theory applied to cyclic deformation of metals under complex cyclic loads
06 p1162 A70-17385
- Copper specimens stress-strain diagrams under cyclic loads of various amplitudes, noting three stage process plastic deformation
06 p1162 A70-17386
- Cylindrical Al, high strength pig iron and heat resistant steels elastoplastic deformation diagrams for cyclic compression tension loads
06 p1084 A70-17387
- Cyclic creep curves plotted from expansion diagrams for steel, copper and brass under small numbers of cyclic compression tension loads
06 p1162 A70-17388
- Complex load strength criterion containing stress and strain invariants applied to simple static loads and cyclic symmetric deformation
06 p1162 A70-17389
- Fatigue breakdown criteria for elastoplastic materials under cyclic loads, deriving equations as functions of stress-strain states kinetic behavior
06 p1162 A70-17390
- Time to crack formation determined in cylindrical and flat Al and steel specimens having various surface properties under cyclic loads
06 p1084 A70-17392
- Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles
06 p1162 A70-17393
- Structural elements elastoplastic deformation regularities under repeated loadings, using adaptability theory
06 p1163 A70-17394
- Elastoplastic rod systems under repeated variable loads, calculating carrying capacity from plastic failure considerations
06 p1163 A70-17395
- Steel tube deformation under constant internal pressure and cyclic heating, plotting tangential and axial strain curves as function of cyclic loading
06 p1163 A70-17399
- Damage accumulation and failure of low carbon and low alloy steels subjected to repeated static loading, varying cyclic load frequency
06 p1085 A70-17400
- Steels crack propagation direction dependence on load magnitude in low cycle fatigue, noting groove width effects on resistance to static loading
06 p1163 A70-17401
- Low cycle fatigue life of various structural steels and alloys, studying stress cycle number relations
06 p1085 A70-17402
- Structures elastic-plastic behavior under changing cyclic heating, calculating long time strength from linear damage accumulation assumptions
06 p1164 A70-17405
- Ti alloy tensile strength under cyclic loads at room and high temperatures, noting plastic deformation and damage accumulation effects
06 p1085 A70-17406
- Machines selection for determining low cycle fatigue life, emphasizing automatic control system for regulating load and strain regimes
06 p1164 A70-17407
- Fatigue life of unidirectionally glass fiber reinforced composites subjected to low cycle loading, using linear elastic body model for cyclic deformation process
06 p1091 A70-17408
- Creep effects on structural failure under low cycle fatigue at high temperatures, noting role of plastic deformation
06 p1164 A70-17409
- Creep-low cycle fatigue interactions in Udimet alloy at elevated temperatures, investigating cumulative damage
06 p1086 A70-17455
- Glass fiber reinforced thermoplastics fatigue behavior during and after cyclic loading
06 p1091 A70-17600
- Gas turbine compensating bellows structural strength, discussing low cycle fatigue test under static loads
06 p1167 A70-17664
- Cyclic plastic deformation changes with load increase under uniform stress with normal loading and nonuniform stress with impact loading, considering fatigue limit
06 p1168 A70-17923
- Miniature resistance strain gage performance in low cycle fatigue, discussing zero drift and gage sensitivity changes
07 p1281 A70-19241
- Stability criterion applied to asymmetric rigid cyclic strains and plastic cyclic strains, considering failure of metals
07 p1315 A70-20182
- Energy dissipation in heat resistant Ni steels under cyclic tension and compression at room temperature
08 p1516 A70-20981
- Cyclic creep and relaxation of heat resistant alloys at high temperatures, showing inapplicability of static load conditions
08 p1516 A70-20982
- Deformation amplitude effects on dislocation structure and strengthening mechanism of fcc aluminum under cyclic loading
08 p1516 A70-20985
- Electronic recording of cyclic strain diagrams of metals in wide loading frequency range using dynamic hysteresis method
08 p1585 A70-20987
- Creep strain effect on cyclic fatigue life of duralumin at room temperature
08 p1516 A70-20988
- Stress and strain spatial distribution in notched steel plate under cyclic loading determined by finite element method
08 p1590 A70-21315
- Nonmetallic inclusions effect on steels cyclic strength dependence on inclusion composition and metallic matrix properties derived from fatigue tests
08 p1590 A70-21413
- Microhardness method for property changes in structural materials during sequential cyclic loading, discussing material identification, statistical fatigue theory, fine structure effects, etc
09 p1701 A70-22299
- Inertia effect in failure mechanics for steadily developing equilibrium cracks in dynamic system with time dependent periodically variable load
09 p1771 A70-22466

Plastic growth of pressurized shell under cyclic thermal stresses superimposed on steady pressure load, investigating shake down using bending approximation
09 p1774 A70-22586

Damage model for materials failure prediction under cyclic loading developed for strain controlled cycle with hold time
09 p1774 A70-22588

Strain rate and hold time effects on steels low cycle fatigue behavior, graphing various correlations among stress amplitude, time to fracture, etc
09 p1774 A70-22589

Turbines rotary shafts and stationary components thermal fatigue analysis, considering cycle numbers and stress concentrations under start-up, continuous operation and shut-down
09 p1775 A70-22593

Machine parts lifetime dispersion determined by fatigue limits distribution during cyclic loading
09 p1776 A70-22623

High temperature fatigue crack growth in metal, suggesting condensation of vacancies at crack front after each loading cycle
09 p1776 A70-22644

Multilayer orthotropic conical shell cyclic deformation equation obtained in hypergeometric functions
09 p1777 A70-23079

Elastoplastic stressed state of thin walled shells of revolution under repeated loads, assuming isotropic incompressible material
09 p1779 A70-23092

Ti-Al-Zr-W-Si alloy fracture surface concentric markings number related to loading cycles after crack formation
10 p1904 A70-24837

Beams stability under flexural stress with periodic intensity variations, deriving differential equation of motion
10 p1960 A70-24973

Aircraft structures fatigue durability estimations, studying crack propagation rates under cyclic loadings by fail-safe method
11 p2132 A70-25624

Fatigue crack propagation in high strength steels during fatigue cycling in dry and wet environment containing NaCl
11 p2067 A70-26100

Polymer materials fatigue strength and deformability testing in vacuum, air and gas atmospheres at low and high temperatures, subjecting to cyclic loading
13 p2385 A70-29428

Measuring apparatus for cyclic plastic strains at high temperatures, discussing data processing techniques
15 p2733 A70-31538

Plastic deformation and aging effects on fatigue characteristics of steels until rupture under cyclic loads
15 p2755 A70-31540

Temperature measurement of rotating shafts under cyclic loading, using thermistor as thermal radiation sensor
15 p2734 A70-31581

Residual stress measurement in anodic film on duraluminum as function of film thickness and cyclic loadings in air and corrosive media
15 p2757 A70-31635

Environmental fatigue crack propagation in Al alloys at low cyclic stress intensity levels
15 p2762 A70-32390

Anisotropic glass fiber reinforced plastics strength and deformability under cyclic axial loads
15 p2766 A70-32897

Delayed rupture and relaxation in Ti alloys during cyclic deformation, comparing fatigue tests results for continuous and discontinuous cyclic loadings
16 p2931 A70-33209

Fiberglass reinforced anisotropic plastics heating during cyclic axial loading
16 p2934 A70-33215

Hysteresis loop behavior under tension-compression cycle fatigue related to Meyer strain hardness values of cyclically strained metals
16 p2934 A70-34334

Polycarbonate plate fatigue crack propagation, discussing length due to repetitions, striation number relationship to cycles, and stress intensity
16 p2941 A70-34335

Structural fatigue testing by computer control of random force cycles
17 p3062 A70-35505

Cyclic strain effects on creep for steel at elevated temperatures, discussing overload frequency effects on plastic strain buildup
17 p3127 A70-35719

Stainless steel load-strain characteristics and cumulative damage in cyclic fatigue life
18 p3273 A70-36048

Programmed fatigue testing machine for specimens under cyclic axial loads, transforming angular into linear displacements
18 p3237 A70-36473

Cyclic plastic breakdown of thin cylindrical shell under ring shaped load in temperature field, using linear programming method
18 p3341 A70-36585

Failure of materials under multicycle fatigue, deriving general theory of defects
18 p3341 A70-36586

Stress concentrations and load cycle asymmetry effect on materials stress and breakdown behavior under various load cycles
19 p3547 A70-38429

Machine parts fatigue behavior and service life, studying endurance margin under load cycles spectra below initial endurance limit
19 p3547 A70-38430

Ti alloys creep and fatigue breakdown under cyclic tensile loads at room temperature
19 p3452 A70-38434

Molybdenum cylinders strength and plasticity under various compression and cyclic tensile loads
19 p3453 A70-38436

Metal fatigue strength prediction by hysteresis loop method, presenting results for irreversible energy dissipation rules during cyclic loading
19 p3548 A70-38458

Fatigue crack closure in flat sheet specimens under zero-to-peak tension cyclic loading, analyzing stress distribution from fractographic striation patterns
19 p3549 A70-38625

Fatigue crack propagation under programmed loads, correlating crack growth rates and tip opening displacements
19 p3549 A70-38628

Strain multiplier for fatigue sensor in moderate amplitude cyclic strain applications
20 p3628 A70-39159

High temperature endurance strength of temper finished bolt connections under cyclic loads, using programmed fatigue testing machines
20 p3718 A70-39223

Fatigue phenomena based on solid body model, establishing breaking stress dependence on time or load cycles number
20 p3724 A70-39854

Brittle failure under creep during slow cyclic loading, discussing damage accumulation assumptions
20 p3725 A70-39868

Low cycle metal fatigue under stress concentration, examining complex loading, cyclic strain, stress-strain state and plastic deformation
20 p3727 A70-39885

Longitudinal shear crack propagation in random internal stress field, examining quasi-brittle rupture theory and cyclic loading
20 p3733 A70-40396

Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads
21 p3932 A70-40554

Fatigue crack growth tests on Al alloy sheets under variable amplitude loading
21 p3831 A70-40749

Turbocompressor disk materials selection by low cycle fatigue tests, discussing stop and start repetition and cracks in stress concentration zones
21 p3867 A70-41261

Slip band formation dislocation-diffusion mechanism for single crystal and polycrystalline metals, considering stress intensity and load cycles effects
21 p3936 A70-41416

Cyclic thermal loading in viscoelastic spherical and cylindrical pressure vessels, investigating thermal frequency effect
21 p3937 A70-41430

Parachutes lightweight coated fabrics air permeability under axial tensile loading and load cycling at room temperatures
21 p3843 A70-41835

[AIAA PAPER 70-1178] Crack growth study in viscoelastic solids by linear continuum mechanics, discussing cyclic loads, composite solids mechanical behavior and thermodynamics
22 p4115 A70-42937

Crack propagation resistance-cyclic fracture strength relation for Mn-Cr-V steels, considering thermomechanical working effects
23 p4204 A70-43935

Load cycle sequences for full scale aircraft structures and components fatigue testing
23 p4266 A70-44101

[ICAS PAPER 70-32] Crack detection in cyclic strained steel and Al alloys, using ultrasonic Rayleigh and longitudinal waves
24 p4424 A70-45718

Miner rule for cumulative fatigue damage, obtaining upper and lower bounds on load cycle number to failure
24 p4426 A70-46024

Cyclic loaded high purity Al samples, noting substructure around fatigue cracks
24 p4362 A70-46185

Thin Al foil subjected to cyclic bending stresses, investigating substructures and strain regions around fatigue crack
24 p4362 A70-46186

CYCLING
U CYCLES
CYCLOBUTANE
Low pressure ionic reactions in gaseous cyclobutane
06 p1004 A70-17328

CYCLOHEXANE
Liquid diethylcyclohexane /DECH/ sprays detonation propagation in gaseous oxygen, studying drop size effect on steady state development
02 p0351 A70-12003

Threshold energy value of organic laser emission from coronene in methyl-cyclohexane-isopentane at 100 K
03 p0498 A70-12878

Mass spectra of 1,2-cyclohexanediol and deuterium labeled analogs data recorded and mechanistic rationalizations of degradation processes given
07 p1225 A70-20200

CYCLONES
NT HURRICANES
Periodic cellular convection in troposphere with allowance for anisotropic turbulent mixing, showing cyclone association and intervals
01 p0135 A70-10206

Cyclone waves development during stationary long wave basic state two dimensional quasi-geostrophic two layer model
03 p0521 A70-14288

Spiral cloud vortex model in occluded extratropical cyclone constructed using atmospheric dynamics equations and satellite photographs
05 p0879 A70-16642

Earth orography shape effect on cyclogenetic properties of atmosphere noting mountain height, slope, air mass thermal properties, etc
10 p1913 A70-25196

Cyclone cloud vortex evolution from satellite photographs, examining reasons for onset and disintegration
13 p2444 A70-28588

Cloud cover photographs in deep occluded cyclone by Soyuz 4 spacecraft
14 p2602 A70-30139

CAT relationship to cyclogenesis and anticyclonogenesis, considering synoptic situation and Jacobian values for forecasts
14 p2609 A70-30604

Radiation fields structural characteristics of fronts, intertropical convergence zones and cyclone formations from radiation charts based on meteorological satellite observations
15 p2770 A70-32068

Right-moving thunderstorm characteristics from mesonet rain rawinsonde updraft observations, considering hydrostatic pressure and cyclonic rotation
19 p3462 A70-38260

Curvilinear motion centrifugal force compared with barometric gradient force in symmetrical cyclone, establishing clockwise direction motion possibility
20 p3663 A70-39275

Mode-generated average variables of atmospheric horizontal heat flux by transient cyclonic eddies used in mean motion circulation model
20 p3664 A70-40063

Tropical cyclone development model for axisymmetric vortex and quasi-balanced conditions, considering vertical heat distribution, rate of intensification and energy budget
23 p4213 A70-43896

CYCLOPROPANE
Cyclopropane-argon mixtures translational and vibrational energies exchange efficiencies analysis based on intermolecular potential
16 p2956 A70-34083

Molecular size dependent steric effects in translation-vibration energy transfer by velocity dispersions in cyclopropane-inert mixtures
21 p3780 A70-41706

CYCLOTRIMETHYLENE TRINITRAMINE
U RDX
CYCLOTRON FREQUENCY
Plasma stability in uniform magnetic and HF electric fields, observing magnetoacoustic wave generation at electron cyclotron frequency greater than HF field frequency
03 p0532 A70-13523

Numerical analysis of cyclotron amplification of geomagnetic micropulsations in magnetosphere based on dispersion relation for three component cold plasma beam system
05 p0838 A70-16284

Cyclotron frequency harmonics emission of PIG discharges linked to nonthermal electron plasma instability
07 p1354 A70-20316

PPi bursts interpreted as proton beams cyclotron instability in geomagnetic field
07 p1277 A70-20439

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization
10 p1926 A70-25118

Microwave radiation from electron beam generated turbulent magnetoplasma measured, indicating

enhancement near electron cyclotron harmonic frequencies 11 p2095 A70-26760

Beam-plasma system mode coupling near electron cyclotron frequency, obtaining interference patterns 13 p2459 A70-28570

Parametric excitation of potential oscillations in plasma near cyclotron frequency subjected to UHF electric and constant magnetic fields 13 p2463 A70-29281

Alouette 1 plasma resonance observations, analyzing electron density measurements in sheath region and cyclotron harmonic resonant frequencies 13 p2466 A70-29903

Local resonance at upper hybrid frequency from satellite observation, noting effects of electron plasma/cyclotron frequency ratio 13 p2370 A70-29911

Stochastic particle acceleration by VLF in weakly turbulent plasma in magnetic field, considering nonlinear cyclotron damping 13 p2468 A70-29935

Topside plasma frequency resonance below electron cyclotron frequency, discussing ray paths and delay times 20 p3620 A70-39336

Excitation of plasma ion-cyclotron oscillations by ion beam passing through neutral gas along magnetic field, noting radial stabilization 20 p3685 A70-40511

Cyclotron wave rectifier with Cuccia coupler for converting microwave power into DC or LF AC 21 p3756 A70-40730

Plasma and spiraling electron beam interactions, observing oscillations above integral multiples of electron cyclotron frequency 21 p3857 A70-41388

Cyclotron instability of high energy protons in magnetosphere with refraction of growing Alfvén waves 23 p4237 A70-44073

CYCLOTRON RADIATION

Normal and anomalous Doppler shifted cyclotron power radiated by energetic electrons spiralling along geomagnetic line considered as VLF source from magnetosphere 01 p0080 A70-11227

M-type transmission line with cyclotron waves to achieve phase inverter and delay line operation, showing phase sensitivity to magnetic field changes near cyclotron resonance 03 p0447 A70-13292

Cyclotron waves absorption study in bounded rarefied plasma having Larmor electron frequency exceeding plasma frequency 10 p1925 A70-25101

Proton cyclotron echoes in topside ionograms using Alouette 2 satellite data 12 p2226 A70-28064

Proton cyclotron echoes in topside ionograms from Alouette 2 satellite 13 p2396 A70-29092

Landau and Doppler-shifted cyclotron damping effects on helicon-like and plasma excitations of many-valley semiconductors 13 p2472 A70-30016

Warm homogeneous magnetoplasma longitudinal cyclotron harmonic wave propagation perpendicular to static magnetic field, noting instabilities 17 p3140 A70-34927

Nonlinear frequency shift for electronic and ionic cyclotron modes in magnetospheric whistler and hydrodynamic propagation, using Vlasov equation 23 p4187 A70-43880

CYCLOTRON RESONANCE

Cyclotron resonance maser (CRM)/monotron with inclined electron flux and magnetic field, considering design for performance optimization 03 p0499 A70-13455

Output characteristics of cyclotron maser with resonator field due to plane waves interference along static magnetic field, deriving tensor equations 05 p0858 A70-16260

Ionospheric resonances observed by swept frequency Alouette topside sounders, discussing plasma non-linearity 06 p1115 A70-17362

VLF and ULF whistler modes propagating along geomagnetic field-line paths in magnetosphere, studying cyclotron resonance amplification 06 p1118 A70-17379

Harmonic ion cyclotron resonances associated with proton whistlers observed from OGO-4 satellite VLF recordings 07 p1268 A70-19630

Pulsed grid modulation for ion cyclotron resonance spectrometer 07 p1286 A70-19974

Plasma ion cyclotron resonance acceleration in nonuniform magnetic field by RF field 07 p1353 A70-20229

Plasma ion-cyclotron oscillations resonance excitation in crossed electric and magnetic fields, describing instability development 07 p1354 A70-20319

Dialkyl ketone ion in double McLafferty rearrangement, applying ion cyclotron resonance to structural study 08 p1454 A70-20525

Electromagnetic instability measurements in electron cyclotron resonance plasma produced in magnetic mirror field 10 p1921 A70-23963

Nonlinear interaction between plasma and HF field near cyclotron frequency, studying plasma oscillations generation in strong magnetic field 10 p1925 A70-25102

Linear theory of cyclotron resonance maser with TEM standing wave field, considering coherent emission for nonrelativistic electrons oscillating in magnetic field 11 p2061 A70-25392

Ion cyclotron resonance spectroscopy technique for determining electrons photodetachment energy from negative ions in gas phase 11 p1995 A70-26001

Methyl fluoride calculated for ion-molecule reaction rate constants from ion cyclotron resonance spectra 12 p2180 A70-26862

Time decay of higher order cyclotron harmonic resonances with decreasing perpendicular wave number 13 p2467 A70-29908

Emission resonances at harmonics of electron cyclotron frequency in laboratory plasmas, considering stellar optical radiation 13 p2467 A70-29915

Bow shock associated hydromagnetic waves generation in upstream interplanetary medium, constructing model in terms of ion cyclotron resonance 14 p2631 A70-30359

Thermal product distributions and energy dependencies of ion-molecule reactions in allene and propyne, using ion cyclotron resonance 16 p2856 A70-33651

Ion-molecule reactions investigation by resonance principle, discussing ion paths in crossed fields 17 p3081 A70-34574

Fine structure of geomagnetic Pc 1 micropulsations by cyclotron instability due to anisotropic energetic proton velocity 19 p3410 A70-37334

Adiabatic bounce periods of particle gyrophase coherence in earth field for cyclotron echo and triggered emission analyses 20 p3621 A70-39343

Ion cyclotron resonance spectroscopy for detecting trapped gaseous ions in analyzer cell, observing ion-molecule reactions 23 p4196 A70-44390

Plasma heated by cyclotron resonance using waveguide method, considering properties, confinement conditions and instabilities 24 p4385 A70-45453

LF electrostatic ion cyclotron wave energy resonant power absorption in plasma in axially nonuniform magnetic field 24 p4386 A70-45608

LF instability in plasma produced by electron cyclotron resonance in nonuniform magnetic and electromagnetic fields 24 p4386 A70-45613

CYCLOTRONS

NT OMEGATRON
NT SYNCHROCYCLOTRONS

CYGNUS CONSTELLATION

Celestial X rays from Cygnus XR-1 detected during high altitude balloon flight, noting compatibility with black body radiation or hot thin plasma 02 p0356 A70-11786

Photometric measurements in Cygnus, analyzing formulas used for conversion to standard UBV system for Javan reflector/Sweden/ 02 p0297 A70-12065

SS Cygni outburst origin in G type star indicated from radial velocity variations of hydrogen absorption lines during rising light 05 p0915 A70-16695

Cygnus and Perseus symbiotic stars as binaries, studying radial velocities, relative emission line intensities and energy distribution 08 p1569 A70-20830

Brightness curves for eclipsing binary V448 Cygni indicating gas stream flows in system 08 p1577 A70-21441

Cygnus X region surveyed with NRAO radio telescope, estimating visual absorption by comparing radio and H alpha emission 10 p1937 A70-23943

Cygnus loop nebula H alpha line halfwidths and radial velocities 15 p2802 A70-32482

Luminosity criteria in O stars via narrow band photoelectric photometry suggesting VI Cygni proximity 15 p2807 A70-32804

CH Cygni irregular light variations and spectrum peculiarities, considering upper atmosphere perturbation by variable hot satellite 15 p2809 A70-32904

Balloon-borne X ray telescope star sensor with one arc minute accuracy, discussing design and Cyg X-1 location measurement 17 p3090 A70-35312

Soft X ray extended source in Cygnus Loop, indicating supernova remnant 18 p3310 A70-37022

P Cygni line profiles emission and absorption components rectification procedure, considering errors 18 p3321 A70-37123

Local spiral arm H 2 regions distribution in Cygnus direction, discussing symmetry due to magnetic field 18 p3329 A70-37180

Cygnus constellation energetic gamma ray emission by nuclear emulsion and spark chamber telescope on high altitude balloon 19 p3501 A70-38086

Extraterrestrial gamma radiation from Cygnus region of galactic disk, using OGO-5 observations 19 p3501 A70-38087

Spectrum analysis of P Cygni star AG Carinae and derivation of mean radial velocities for different epochs 19 p3523 A70-38694

Cosmic X ray spectra of Cyg XR-2 in 0.15-20 keV range by spinning rocket-borne detector, noting interstellar absorption 21 p3872 A70-40664

Cyg-X-1 X ray source angular size and position measurements by balloon-borne collimator 21 p3873 A70-40665

Cygnus X-2 point X ray source, establishing as spectroscopic binary with peculiarities 21 p3875 A70-40682

Light curve for eclipsing stars with scattering envelopes applied to V444 Cygni binary system 22 p4103 A70-42989

CYLINDERS

Eddy penetration model for heat transfer from trailing face of cylinder in transverse flow 09 p1791 A70-23566

Ideal fluid flow containing small spherical particles past cylinder and flat plate normal to stream using small perturbations method 11 p1976 A70-26012

Wakes of cylinder in collision-free plasma wind tunnel simulating ionospheric satellite conditions, noting decaying oscillation 11 p1976 A70-26018

Thermal stresses in temperature dependent multilayered cylindrically anisotropic hollow cylinders 12 p2321 A70-27203

Singularities of boundary layer conditions on parabolic cylinder in homogeneous incompressible viscous flow with leading edge, using Weyl integral equation 12 p2210 A70-27559

Rigid cylinder acceleration within elastic shell-core structure under pressure pulse distribution over shell semicircumference 13 p2518 A70-29984

Flat plate and cylinder with periodic Joulian heating from time dependent heat source, analyzing transient temperature distribution 14 p2664 A70-30269

Aerodynamic wake structure of cylinders and spheres in hypersonic rarefied gas flow as function of Mach and Knudsen numbers 16 p2836 A70-33756

Laminar near wake of cylinder at free stream Mach 6, using modified Lees-Reeves method 16 p2836 A70-33762

German monograph on shock wave diffraction at spheres and cylinders 17 p3071 A70-35377

Thin cylinder longitudinal two phase dispersed flow, examining heat transfer coefficient 18 p3345 A70-36112

Stationary heat conduction model of two cylinders abutting at ends with internal nonuniform temperature distribution 18 p3345 A70-36128

Electric field equations of plane EM wave diffraction at lattice of conducting cylinders, using Hankel function 19 p3375 A70-37289

Cylindrical EM waves diffraction by two parallel ideally conducting elliptical cylinders, discussing field and surface current distributions 19 p3378 A70-37734

Interference wave functions for diffraction on cylinder and sphere, including noninterfering waves of geometric optics 19 p3380 A70-38398

Heat transfer from cylinder in axial air flow with induced turbulence of incident boundary layer, noting temperature effects 20 p3736 A70-39264

Viscous fluid cylinders electromagnetodynamic stability, discussing viscous forces effects 21 p3858 A70-41699

Comparative analytic and experimental film boiling heat transfer for horizontal cylinders in helium II [ASME PAPER 70-HT-3] 22 p4122 A70-42441

Mach effect on cylinders, tracking triple point of shock interaction using 25-spark camera [SMPT PREPRINT 103] 22 p4032 A70-43032
Forced longitudinal oscillations of cylinder with given surface displacements, using Lamé equations 22 p4118 A70-43571
Tempering stress in circular plates and cylinders in casting of solid propellants 24 p4427 A70-46147

CYLINDRICAL AFTERBODIES

U AFTERBODIES

U CYLINDRICAL BODIES

CYLINDRICAL ANTENNAS

Plasma density and electroacoustic resonance effects on coupled cylindrical antennas self and mutual impedances measured in Hg-arc discharge 01 p0050 A70-10461
Driving point admittance of infinite cylindrical antenna excited by uniform gap and immersed in lossy compressible isotropic plasma, discussing propagation constants 01 p0051 A70-11102

Equatorial patterns measurement of plasma covered axially slotted cylindrical antenna, describing discharge tube, facility and Langmuir probe survey of tube electron density 02 p0269 A70-12590
Electromagnetic radiation patterns from aperture in conducting cylinder coated with moving isotropic plasma sheath, noting sheath velocity and plasma frequency influence 06 p1020 A70-17564

Collisions effects on cylindrical antenna impedance near plasma frequency of isotropic nonMaxwellian plasma, allowing for collision frequency dependence on electron energy 06 p1020 A70-17567
Element pattern derived for circular arrays of axial slits on large perfectly conducting cylinders, comparing properties with planar arrays 06 p1021 A70-17571

Cylindrical antennas immersed in arbitrary homogeneous isotropic media, solving integral equation for current 06 p1074 A70-18607
Thin cylindrical DC pulse driven antenna radiation fields time variation as function of angle 12 p2198 A70-27964

Numerical integration or quadrature technique for evaluating Fourier integrals in theory of infinite cylindrical antenna 13 p2440 A70-29088

Cylindrical electric dipole antenna in magnetoactive ionospheric plasma, noting ion sheath effect on input impedance and active length 13 p2399 A70-29402

Cylindrical antenna admittance during immersion in ionospheric plasma, noting influence of ion sheath and plasma anisotropy 13 p2371 A70-29922

Cylindrical and helical antennas impedance in cold magnetoplasma, using three dimensional integral involving Fourier transform and Green function 16 p2859 A70-32943

Radiation pattern of radial infinitesimal current elements near or on finite length conducting cylinders, using image and geometrical theory of diffraction techniques 16 p2860 A70-32956

Current distribution on isolated thin cylindrical center-fed dipole antenna, calculating axial electric fields and radiating properties 16 p2861 A70-32964

Wedge diffraction analyses of TE sub 10 mode slot radiation characteristics on circular and elliptical cylinder, considering boundary value solutions existence 16 p2861 A70-32965

Excited circular cylindrical dielectric rod antenna radiation patterns derivation by Schelkunoff equivalence principle 16 p2872 A70-33121

Cylindrical antennas and arrays for transmission or reception, determining radiation patterns 17 p3051 A70-35059

Directional solar thermal field /sunlight/ effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit 20 p3720 A70-39676

Short cylindrical microwave antenna radiation directivity enhancement by optimum double impedance loading 20 p3599 A70-40318

Ionospheric plasma sheath effect around floating cylindrical high power dipole antenna, obtaining electron, ion and potential profiles 20 p3589 A70-40466

Cylindrical slot antennas radiation patterns in plane perpendicular to axis, discussing field emission and angular position of each slot for phase multiplier 22 p3997 A70-43131

Current distribution and near field of cylindrical antennas loaded with built-in lumped elements 22 p3998 A70-43422

Dielectric filled tubular monopole antenna driven by coaxial line with TEM mode, calculating current distribution from integral equation 23 p4175 A70-44953

CYLINDRICAL BODIES

NT ROTATING CYLINDERS

Lamb wave techniques using guided ultrasonic waves for solid cylindrical objects nondestructive testing 01 p0098 A70-10019

Viscous fluid flow due to long flat plate moving rectilinearly inside cylinder, assuming zero pressure gradient 01 p0062 A70-10801

Taylor model of elastoplastic wave interaction during cylindrical projectile impact 01 p0206 A70-11150

Homogeneous Love-Reissner equations analytical solutions for noncircular pyrolytic graphite cylinders, using asymptotic expansion for transverse materials isotropy 01 p0206 A70-11151

Laminar counterflow diffusion flame chemical structure and blow-off mechanism established in forward stagnation region of porous cylinder at atmospheric pressure 02 p0398 A70-12032

Mesothermal flow of collisionless plasma around conducting cylinder, calculating densities, velocities, temperatures and electrical potential [ONERA-TP-769] 02 p0346 A70-12102

Lamb waves behavior applied to defect evaluation in nondestructive tests of solid elongated cylindrical objects 02 p0276 A70-12552

Motion stability and time dependent deflections of thin flexible cylinder with zero bending rigidity in viscous stream 02 p0595 A70-13783

Wave drag in stratified flow lee waves without upstream influence calculated for cylindrical and three dimensional obstacles 03 p0479 A70-14229

Equipment for cyclic biaxial testing, producing five biaxial stress states by simultaneous direct pressurization and axial loading of thin walled cylindrical specimen 03 p0464 A70-14309

Thermoelastic stresses in solid cylinder under cyclic temperature variation, calculating amplitude for Biot numbers 04 p0766 A70-14477

Mean flow velocity distribution calculated from momentum deficit superposed behind single cylinders in finite array of arbitrarily spaced parallel cylinders [ASME PAPER 69-WA/FE-11] 04 p0614 A70-14781

Stiffener inclination effect on pressurized cylinder instability under pure bending [ASME PAPER 69-APM-X] 04 p0769 A70-14868

Configuration factors independence on Lambert law in radiation from spheres and infinitely long cylinders [ASME PAPER 69-HT-J] 04 p0784 A70-14870

Electromagnetic scattering from perfect conductors by numerical analysis, presenting far field pattern calculation for plane wave scattering from square cylinder 04 p0652 A70-15363

Ballistic range measurements of vibrational nonequilibrium effects on leading edge shock wave shape for cone-cylinders fired through chlorine atmosphere at supersonic speeds 04 p0621 A70-15601

Free stream turbulence effect on drag coefficient of bluff sharp edged cylinders with small square section 05 p0789 A70-15923

Torsion tests on cylindrical plastic metals, considering shear stresses calculation as function of torsion angle and changes determination as function of increasing cold work 05 p0927 A70-15996

Stress functions in three dimensional nonaxisymmetric elastostatics problems in circular cylindrical coordinates, proving representation completeness for cylindrical bodies 05 p0932 A70-16172

Unsteady heat conduction numerical approximation for infinite cylinder with variable heating and boundary conditions of third kind 05 p0936 A70-16294

Heat source temperature distribution on surface of infinite cylinder with zero temperature, presenting solution to boundary value problem 05 p0957 A70-16296

Saint Venant torsion and flexure of composite prismatic and cylindrical bars with circular and concentric interfaces 05 p0936 A70-16318

Cylindrical Al, high strength pig iron and heat resistant steels elastoplastic deformation diagrams for cyclic compression tension loads 06 p1084 A70-17387

Time to crack formation determined in cylindrical and flat Al and steel specimens having various surface properties under cyclic loads 06 p1084 A70-17392

Crack formation and propagation kinetics in flat and cylindrical Cr-Mo-V steels under tension compression loading cycles 06 p1162 A70-17393

Elastic-plastic torsion of convex cylindrical bars 06 p1165 A70-17534

Lift forces and pressure on vibrating cylinders in plane perpendicular to air flow measured in wind tunnel 06 p0968 A70-17545

Heat and mass transfer across laminar boundary layer around stagnation line of cylinder in crossflow affected by free stream turbulence intensity 06 p1176 A70-17693

Drag on infinite cylinder in hypersonic nearly free molecular flow for various angles of attack, using kinetic approach 06 p0983 A70-18380

Cylinder wakes in rarefied gas flow at Mach 20, obtaining density profile data from electron gun, impact pressure and cooled film probe measurements 06 p0984 A70-18387

Size and shape error distribution law for cross sections of cylindrical components, discussing probability characteristics 07 p1290 A70-18740

Laminar boundary layer development on cylindrical body set in motion from state of rest, determining time for boundary layer separation occurrence 07 p1253 A70-18771

Unsteady heat conduction in plate, solid or hollow infinite cylinder and sphere with internal heat source and radiative heat transfer on surface 07 p1423 A70-19818

Temperature stress distribution in cylinder or sphere with variable surface temperature and heated by external sources 07 p1411 A70-19819

Radiation detector geometrical factor approximation for cylindrical bodies, observing convergence for right square and circular cylinders 07 p1286 A70-19971

Gravitating particles systems equilibrium states, solving kinetic equations for sphere and cylinder in isotropic and anisotropic cases 07 p1389 A70-20207

Limiting equilibrium of rigid-plastic cylinder subjected to compression by concave stamps 08 p1583 A70-20533

Heat transfer from inner wall of annular ducted cylindrical body cooled by liquid nitrogen, discussing effects of Teflon, asbestos and vaseline coating and thickness effects 08 p1596 A70-20577

Electron density calculation for collisionless plasma flow around conducting cylindrical body, accounting for surface absorption and mean electron velocity [ONERA-TP-792] 08 p1550 A70-20595

Hypersonic flow past blunt cylinder at Mach number of infinity, investigating real gas effect using Lighthill ideal dissociating gas model 08 p1431 A70-20646

Aerodynamic characteristics of cylinder with wings in free molecular hypersonic flow of monoatomic gas at various angles of attack and slip 08 p1432 A70-21083

Rigid rotating cylindrical shaft vibrations along diameter in viscous fluid using inner and outer expansions method [ASME PAPER 69-APM-S] 08 p1589 A70-21307

External convective heat transfer coefficients from quartz-coated cylindrical hot film anemometer probes in mercury 08 p1599 A70-21582

Interaction between bodies and spherical detonation wave, measuring force pulse transfer to immobile cylinder and flow patterns past flying blunt body 09 p1659 A70-22186

Drag on cylinder in transverse rarefied gas flow varying from free molecular to almost continuum 09 p1604 A70-22448

Stokes flow around sphere moving along axis of cylinder with near-unity diameters relationship 09 p1661 A70-22839

Plane electromagnetic wave backscattering from dielectric-coated metallic cylinder calculated as functions of incidence angle and coating external radius 09 p1636 A70-23075

Elastic harmonic waves propagation in cylinder with longitudinal cavities and in space with cylindrical cavities solved using series method 09 p1783 A70-23387

Conduction to isothermal insulated cylinder from semifinite region 09 p1790 A70-23563

Nonlinear plane deformation of elastic medium with cylindrical cavity under uniform axial tension using successive approximations 09 p1784 A70-23591

Temperature field and combined radiative-convective heat flux in weakly absorbing cylindrical layer bounded by nonblack surfaces 10 p1966 A70-23866

Temperature field and heat conduction equation for two layer polymer cylinder multiply heated from within, considering material decomposition

10 p1966 A70-23870

Air flow turbulence intensity and plug effect influence on local heat exchange on cylinder surface

10 p1797 A70-24028

Stress-strain determination in nonuniformly heated thin walled cylindrical beams with nonlinear stringers and skin

10 p1957 A70-24281

Plane electromagnetic waves scattering from radially inhomogeneous cylindrical structure, deriving expressions for far field and cross section for both polarizations

10 p1841 A70-24856

Two dimensional electromagnetic wave diffraction on arbitrary shaped homogeneous dielectric cylinder, solving integral equations on digital computer

10 p1842 A70-25105

Cylindrical afterbody drag reduction in transonic flow by combined gas ejection and boat-tailing

11 p1976 A70-25991

Radiation heat transfer around interior of long cylinder as function of surface emissivity

11 p2149 A70-26152

Wall pressure fluctuations beneath turbulent boundary layers on flat plate and cylinder

11 p2038 A70-26529

Satellite aerodynamic characteristics, considering orbital position and attitude of cylindrical body and separate plate

11 p2128 A70-26795

Stress-strain state of epoxy resin cylinder situated in centrifugal force field using three dimensional photoelastic method

12 p2323 A70-27340

Plane harmonic wave steady state diffraction at cylinder in elastic half space, applying method of images

13 p2366 A70-29320

Cylinders and airfoils drag tests and simulation in two dimensional sheared flow, considering shapes optimization

[AIAA PAPER 70-576]

13 p2342 A70-29893

Axissymmetric postyielded tongue and groove cylindrical joint stress analysis using finite element method

14 p2659 A70-31131

Stress-strain relationships model for nonlinear restrained cylinders, using compression tests and finite element method

14 p2660 A70-31135

Force acting on cylinder in ideal incompressible fluid plane flow with steady vorticity

15 p2719 A70-31498

Pyroceramics transient strength measurements on cylindrical and prismatic samples under static bending

15 p2764 A70-31545

Monograph on momentum, heat and mass transfer rates to vertical continuous cylinder moving through quiet fluid in forced and free convection

15 p2825 A70-31694

Dimensional measurements of nuclear fuel cylindrical specimens by scanning neutron radiographic negative with microdensitometer, taking into account specimen geometry and neutron cross section

15 p2735 A70-31769

Laminar natural convective heat transfer along outer surface of vertical cylinder, giving coefficients nondimensionally by approximate formulas

15 p2826 A70-31821

Mixed forced and natural convection with low speed air flow over horizontal electrically heated cylinders

15 p2740 A70-32373

Acoustic and EM scattering by hyperbolic cylinder, considering plane wave incidence and line sources

15 p2700 A70-32406

Wave diffraction by parabolic cylinder, solving boundary value problems for two dimensional wave equations via separation of variables

15 p2700 A70-32408

Wave diffraction by half plane limit of parabolic cylinder and wedge, using Fresnel integral and Heaviside step function

15 p2700 A70-32409

Heterogeneous conducting fluid stability between fixed rigid cylinders with radiant gravitational force and magnetic field

16 p2894 A70-33784

Blunt based right circular cylindrical body at subsonic speed, investigating turbulent near wake in wind tunnel

17 p3006 A70-34463

Axissymmetric blunt base cylindrical body with turbulent initial boundary layer, investigating flow structure in annular nozzle wind tunnel

[AIAA PAPER 70-796]

17 p3006 A70-34464

Plane compressible sonic flow around symmetrical cylinder subjected to parallel incident flow, using function-theoretic method

18 p3241 A70-36378

Unsteady temperature fields in heat conduction problems associated with high temperature effects on abutted cylinders

18 p3348 A70-36572

Cylindrical body with gravitational and magnetic anomalies, selecting point coordinates for body parameters

19 p3407 A70-37298

Ring and cylindrical structures comparative stress relaxation at room temperature

19 p3535 A70-37341

Thermal stability test assembly for refractory materials cylindrical specimens, using argon plasma jet

19 p3395 A70-37351

One dimensional integral equations for two dimensional problems of EM wave diffraction by cylindrical bodies

19 p3376 A70-37435

Two axially positioned cylindrical waveguides with slots cut periodically along generatrices /double squirrel cage/, analyzing behavior under excitation by rotating charged filament

19 p3386 A70-37733

Two dimensional electromagnetic fields in presence of cylindrical objects of arbitrary physical properties and cross sections, using scattering matrix approximation

19 p3471 A70-37778

Lumped parameter model for multidimensional solid mechanics problems with inelasticity, discussing stress wave interaction in cylindrical cavity

19 p3458 A70-38357

Coulombian drag on body from hybrid calculus of collisionless plasma flow around cylinder

[ONERA-TP-819]

19 p3481 A70-38382

Cylindrical radiator radiation resistance and mass in waveguide with reflecting boundaries, calculating sound field for effect of medium reaction

19 p3472 A70-38656

Axissymmetric deformation of cylinder based on solution of elasticity theory plane problem for rectangular strip

20 p3724 A70-39858

Motion equation of electron in cylindrical diode subjected to varied voltages

21 p3796 A70-40640

Stagnation point heat transfer of spherical cylinder in argon and air, developing electrically insulated calorimeter gage theory

21 p3941 A70-40774

Forced convection heat transfer from flat plate and cylinder in cross flow to simulated Mars atmosphere

21 p3945 A70-41026

Loads induced by terminal shock boundary layer interaction on cone-cylinder bodies, discussing angle of attack effect

21 p3746 A70-41863

Arbitrarily shaped cylindrical conducting structures with transient incident electromagnetic wave, calculating scattering from integral equation by digital computer

23 p4165 A70-44957

Electromagnetic scattering by homogeneous gyrotropic cylinder, discussing matrix equations formulation and solution by reciprocity theorem

23 p4165 A70-44959

Frequency equations derived for cylindrical panels with surface loading, comparing free vibration natural frequencies of panels with attached mass at centers

24 p4422 A70-45297

Two identical conducting thin cylinders illuminated by plane wave at arbitrary incidence angle, determining backscattering cross sections and induced current

24 p4314 A70-46133

Peak pool boiling heat flux on horizontal cylinders, describing interactions of gravity and heater size effects

24 p4429 A70-46176

CYLINDRICAL CHAMBERS

Sound propagation along cylindrical duct of wind tunnel, discussing fluid flow effect on modal cut-off frequencies

04 p0719 A70-15078

Wall effect on differential spectra distortions in cylindrical ionization chamber and proportional counter type detectors

05 p0900 A70-15971

Time harmonic waves propagation in elastic half-space with submerged cylindrical cavity, assuming linear plane strain conditions

13 p2518 A70-30010

Velocity profiles in steady and unsteady rotating flows for impulsive slow down and acceleration in cylindrical chamber

19 p3403 A70-37527

CYLINDRICAL SHELLS

Steels tested to evaluate proposed incremental strain theories predicting loads on thin walled cylinders subjected to nonproportionate loading, discussing stress-strain diagram

01 p0202 A70-11057

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations

01 p0205 A70-11141

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions

01 p0212 A70-11572

Asymptotic dynamic theory for elastic cylindrical shells incorporating thickness effects, considering longitudinal wave propagation in infinite length shell

02 p0385 A70-11877

Circumferential wave propagation around cylinder, demonstrating dependence on incident frequency and surface roughness, noting target surface microscale roughness measurement technique

02 p0339 A70-12184

Orthotropic cylindrical shell with initial deflection under long term effect of external hydrostatic pressure, solving bending problem

02 p0390 A70-12809

Internal hydrostatic or lateral pressure effect on deformations of infinitely long thin cylindrical isotropic shell subjected to equal concentrated radial loads

03 p0584 A70-12922

Incremental strain theories for nonproportionate loading of thin walled cylinders, discussing Tresca flow, von Mises theory and Prandtl-Reuss relations

03 p0480 A70-12953

Cauchy integrals extension to axisymmetric elasticity problems, obtaining numerical results for stressed circularly symmetrical state of hollow cylinder under uniform load

03 p0586 A70-13080

Axial stress pulse induced elastic waves propagation in thin anisotropic circular cylindrical shell of helical wrap construction allowing for shear coupling

03 p0587 A70-13118

Thin elastic cylindrical panel motion induced by plane acoustic shock wave analyzed by integrating nonlinear motion equations using finite difference scheme

03 p0524 A70-13377

Cylindrical shells buckling under biaxial compression and transverse loads, examining critical loads dependence on shell parameters, end conditions and elastic properties

03 p0590 A70-13380

Cylindrical two layer shells stability under compression and radial pressure, calculating compression and transverse shear strains in carrying layer and filler

03 p0592 A70-13443

Natural oscillation frequencies of partially liquid-filled cylindrical shells determined by resonance method

03 p0592 A70-13444

Axial compressive forces influence on steel and Al cylindrical shell stability under external pressure

03 p0593 A70-13472

Flexible cylindrical shell elastoplastic state determined by theory of small elastoplastic deformations, utilizing material incompressibility in plastic state

03 p0593 A70-13500

Circular cylindrical shell stressed state with rectangular opening under compressed torsion, noting opening effect on loads nonuniform distribution

03 p0593 A70-13501

Unsteady heat conduction in hollow cylinder, using transfer functions to solve direct and inverse two dimensional problems

03 p0606 A70-13520

Nonlinear flexural vibration properties of thin circular cylindrical shells with simply supported ends assuming deflection mode

03 p0594 A70-13549

High speed photography for instability onset and subsequent buckling process in photoelastic circular cylindrical shells under axial compression

03 p0594 A70-13659

Stress-strain state of arbitrarily cracked cylindrical shell under symmetric and asymmetric loading

03 p0594 A70-13736

Residual stresses in cylindrical shells eliminated by local heat treatment, determining temperature field in elastic strain regions

03 p0497 A70-13739

Transient creep analysis of simply supported circular cylindrical shells subjected to internal pressure based on strain and time hardening theories

03 p0595 A70-13813

Radial vibration of cylindrical shell of transversely isotropic material determined using finite Hankel transform

03 p0595 A70-13904

Far nonlinear postbuckling behavior of noncircular cylindrical shell under axial compression

03 p0598 A70-14241

Natural oscillations and flutter of three layer cylindrical shell in supersonic gas flow analyzed by semimomentless theory, discussing boundary value problems, damping effects, etc

03 p0600 A70-14301

Donnell shallow circular cylindrical shell equation, obtaining approximate solution for stresses in infinitely long circular cylindrical shell with circular hole subjected to edge loading

03 p0601 A70-14320

Finite strain in bending rectangular block into right circular cylindrical shell for transversely isotropic medium along radius vector, using Saint Venant stress-strain relations

03 p0602 A70-14329

Perturbed motion of solid body with cylindrical cavity partially filled with viscous fluid, using Rabinovich equations

04 p0766 A70-14476

Supercritical strains and buckling in rib-reinforced cylindrical shells under axial compression using strain-energy method

04 p0766 A70-14478

Damping factor of fiberglass-reinforced cylindrical shells, concerning dependence on wave number and energy losses due to medium resistance and acoustic radiation

04 p0712 A70-14488

Gravity and size effects on film boiling from horizontal cylinders, recommending formulas for wavelength and minimum heat flux predictions

[ASME PAPER 69-WA/HT-12] 04 p0784 A70-14821

Elastic postbuckling behavior of axially stiffened and barreled cylindrical shells

[ASME PAPER 69-APM-U] 04 p0769 A70-14866

Thin orthotropic composite cylindrical shells buckling under axial and radial loads, satisfying end boundary conditions for clamped and simply supported shells

[ASME PAPER 69-WA/APM-21] 04 p0771 A70-14910

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

04 p0773 A70-15009

Thermal buckling of elliptic cylindrical shells assuming tangential temperature, constant axial pressure and conservation of elastic properties

04 p0775 A70-15203

Principal instability region of hinged cylindrical shell under dynamic loading

04 p0776 A70-15271

Orthotropic sandwich cylinders buckling under axial compression, presenting linear theory approximate design equations

04 p0776 A70-15381

Spectral response of cylindrical shell due to random acoustic pressure input computed using modal approach

04 p0778 A70-15528

Material coupling in two layered orthotropic cylindrical shell subjected to normal external pressure

04 p0778 A70-15547

Circular cylindrical shells with axisymmetric imperfections tested under axial compressive load, studying imperfection amplitude and wavelength effects on minimum buckling load

04 p0778 A70-15588

Thin cylindrical circular shell and three layered plate, analyzing vibration and stability due to loads and temperature

05 p0926 A70-15916

Pseudocylindrical concave polyhedral shells proposed from postbuckling configurations analysis, considering rigidity and structural applications

05 p0928 A70-16039

Buckling equations for neutral equilibrium of arbitrary elastic shells specialized to uniformly loaded circular cylindrical shell with accuracy

05 p0929 A70-16064

Stability, critical load and strength algorithm for fiberglass reinforced cylindrical plastic shells under external load allowing for shear stresses

05 p0933 A70-16211

Statistical stability of cylindrical fiberglass reinforced plastic shells under axial compression, showing breakdown loads vs radius/thickness ratio

05 p0933 A70-16215

Stability of clamped, hinged and elastically supported circular cylindrical shells under critical combined torsional and transverse pressure

05 p0934 A70-16227

Buckling of three layer cylindrical shells under steady creep conditions, deriving axisymmetric deformation

05 p0935 A70-16234

Compressive forces eccentricity influence on circular cylindrical shell stability noting relation to bending moments

05 p0936 A70-16239

Isotropic elastic cylindrical shell stability under combined compressive and axisymmetric local loads, using equilibrium equations for shallow shells

05 p0936 A70-16240

Unsteady vibrations of cylindrical thin walled elastic closed shell under random loads, using correlation method

05 p0937 A70-16371

Rayleigh and Lamb waves propagating on solid and hollow elastic cylinders immersed in water, noting correspondence to symmetric and antisymmetric vibrations in shell

05 p0938 A70-16410

Stress concentration in long thick cylindrical tube under diametrically opposite normal loads using elasticity theory

05 p0939 A70-16505

Circular cylindrical shells stiffened by rings and stringers and subjected to periodic axial force, analyzing parametric instability

05 p0940 A70-16513

Fatigue crack propagation and fracture toughness in pressurized thin walled cylindrical tubes, basing analysis on shallow shell bending theory

05 p0942 A70-16802

Thermal stresses in shell with spherical and circular cylindrical sections, using thin shell approximations and shallow shell theory

05 p0945 A70-16818

Small elastoplastic deformation effects on stress-strain state of rib-reinforced cylindrical shells

05 p0946 A70-16955

Hydrodynamic coefficients of algebraic equations for boundary value problems in disturbed motion of body with rib-reinforced liquid filled cavity

05 p0836 A70-16956

Stress concentration of circular cylindrical shell weakened by elliptic hole under torsion

05 p0947 A70-16965

Cylindrical shell walls vibrations under impact loads, calculating damping factor in differential equation of motion of wall element

05 p0947 A70-17008

Membrane reinforced thin walled cylindrical shells stability as asymmetric contact problem in shell and plate theory

05 p0947 A70-17011

Three dimensional stress-strain analysis of rotating finite hollow cylinder, emphasizing wall thickness effect on stress and strain distribution

06 p1160 A70-17130

Conducting cylindrical shell in constant magnetic field analyzed for magnetoelastic disturbances using Laplace transform

06 p1056 A70-17607

Thin shell buckling stressing maximum applied loads analysis for circular cylindrical shells with imperfect walls under axial compression

06 p1165 A70-17647

Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method

06 p1167 A70-17865

Stress and buckling measurement of shallow cylindrical steel shells linked to thin plate using resistant strain gauges and high precision indicators

06 p1167 A70-17866

Thin walled cylindrical shells design for axisymmetric impulsive loads, calculating strains due to explosive forming in water

06 p1167 A70-17867

Nonlinear postbuckling equilibrium of thin cylindrical shell and axisymmetric buckling pressure of imperfect spherical shell calculated by Rayleigh-Ritz method

[AIAA PAPER 70-102] 06 p1169 A70-18036

Thin walled cylindrical shell stability under stochastic lateral and axial compression loads using Liapunov method

[AIAA PAPER 70-104] 06 p1169 A70-18037

Semiinfinite simply supported cylindrical shell transient response due to axisymmetrically engulfing step pressure wave, investigating moving load critical velocity

[AIAA PAPER 70-18] 06 p1170 A70-18063

Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression

[AIAA PAPER 70-103] 06 p1170 A70-18167

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient

06 p1172 A70-18566

Structural analysis of thin walled cylinder material using normal ultrasonic wave to achieve high resolution determination of components

06 p1172 A70-18630

Elastic behavior of joint formed by normally intersecting circular cylindrical shells under external bending moment, noting applicability to pipelines and pressure vessels

[ASME PAPER 68-WA/PVP-1] 07 p1400 A70-18710

Cylindrical shell of revolution stress-strain state calculated during shaping in stamp with unclamping dies

07 p1292 A70-18836

Cantilever cylindrical shell stability under shearing stresses created by transverse force applied to free end

07 p1403 A70-19116

Notched cylindrical shells of nonuniform thickness using two dimensional photoelastic models mounted on elastic foundations

07 p1249 A70-19239

Circular cylindrical shells creep buckling under nonuniform external loads, considering thermal effects and initial imperfections

07 p1405 A70-19253

Axially uniform stress and strain in cylindrical shells, discussing Saint Venant torsion and displacement relations

07 p1405 A70-19255

Shell elastic constants for multilayered sandwich cylinders using Donnell approximation

07 p1406 A70-19326

Buckling stress calculation and measurement in cylindrical fiberglass reinforced composite shells under axial pressure

07 p1409 A70-19756

Circular cylindrical shells buckling under lateral and hydrostatic pressure using Donnell and Flugge equations, assuming membrane stress state for prebuckling deformation

07 p1414 A70-20168

Axisymmetric elastoplastic deformation theory for elastic cylindrical shell using Saint Venant yield condition, obtaining expressions for strain components, longitudinal deformation, etc

07 p1415 A70-20185

Initial perturbation effect of smooth cylindrical shells stability under critical axial compression noting deflection factor

07 p1415 A70-20190

Natural axisymmetric vibrations of cylindrical shell with hollow filler, analyzing motion by shallow shell and elasticity theory dynamic equations

07 p1415 A70-20191

Equilibrium of torque-free cylindrical shell vertically positioned and partly filled with liquid, obtaining solution for biaxial stress

07 p1415 A70-20192

Rib-reinforced cylindrical shells stability under longitudinal compressive loading, studying stress-strain state using network method

08 p1583 A70-20528

Strain energy method applied to stability analysis of short longitudinally reinforced cylindrical shells under axial compression

08 p1584 A70-20536

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solutions convergence

08 p1585 A70-20963

Shear stress in thick cylindrical closed shells subjected to plastic torsion determined from displacement distribution over thickness and generatrix

08 p1588 A70-21182

Thin shells of revolution natural oscillation frequencies approximation based on shell subdivision into series of cylindrical shells

08 p1588 A70-21194

Rectangular planform shallow cylindrical shell parametric vibrations using method applied to large bending vibrations of plates

08 p1588 A70-21212

Linear and nonlinear equilibrium equations for bending deformation of thin elastic cylindrical using Kirchhoff-Love hypotheses

08 p1588 A70-21242

Elastic/perfectly plastic hollow cylinder unloading under monotonic twist during torsion, considering sandhill-membrane analog validity

08 p1589 A70-21249

Circular cylindrical shell supported along generator under arbitrary forces using finite Fourier transform, simplifying results by Euler sum formula

08 p1589 A70-21312

Cylindrical and flat shells equilibrium equations representation using stress, deflection or tangential displacement functions

08 p1591 A70-21442

Stiffeners inclination effects on instability of pressurized cylinder under bending by Ritz method, considering finite deflection and initial imperfections in strain-displacement relations

08 p1591 A70-21464

Transient radial temperature distributions in cylindrical shells via Carslaw and Jaeger procedure involving binomial theorem and asymptotic expansions of Bessel function

08 p1599 A70-21588

Asymptotic analysis for axisymmetric buckling of axially compressed short cylindrical shells with free edges, using Batterman method

08 p1593 A70-21620

Dynamic response of infinite cylindrical shell subjected to arbitrary time and space dependent forcing function in acoustic medium

08 p1593 A70-21621

Cylindrical shells buckling under axial surface tensions using Donnell stability equations

08 p1593 A70-21624

Flugge characteristic equation approximate roots for closed cylindrical shell compared with Donnell equation solution

08 p1593 A70-21625

Cylindrical shell vibration modal characteristics finite element solutions accuracy compared with exact solutions

08 p1596 A70-21979

Elastic body equilibrium forms bifurcation solution for uniform strain applied to cylindrical rod and shell under compressive strain

09 p1773 A70-22539

Temperature distribution in infinite and finite circular hollow cylinders, considering surface heat flux and linear heat transfer

09 p1788 A70-22595

Spherical and cylindrical cavities dynamic plastic expansion analysis by finite element method allowing for inertia forces

09 p1777 A70-22724

Temperature fields in cylindrical shell under axisymmetric heating, ensuring optimal stressed state

09 p1778 A70-23081

Algorithm for stress-strain state calculation of nonuniformly heated cylinder weakened by star-shaped cavity

09 p1779 A70-23094

Buckling and postbuckling equilibrium behavior of fiber reinforced cylindrical shell under uniform axial compression

09 p1780 A70-23207

Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method

[AIAA PAPER 69-92] 09 p1780 A70-23208

Free vibration of rib stiffened freely supported circular cylindrical shells, verifying rib eccentricity importance to natural frequencies by numerical solutions

09 p1780 A70-23211

Plastic buckling of eccentrically stiffened circular cylindrical shells with multiple isotropic layers under combined axial and lateral pressure, deriving stability criterion

09 p1780 A70-23213

Stress analysis for cylindrical shells with reinforced circular holes by collocation method

09 p1781 A70-23280

Elastic cylindrical shells stability under uniform pressure, calculating critical transverse load by finite-difference computer program

09 p1781 A70-23287

Reinforced cylindrical shells stress-strain state under concentrated longitudinal loads, considering ribs of variable rigidity

09 p1782 A70-23289

Cylindrical shell critical load boundaries under uniform external stress and small torsion

09 p1783 A70-23389

Elastic ribs reinforced thin cylindrical shells stress-strain state under arbitrary load distribution allowing for rib spacing discreteness

09 p1784 A70-23590

Three dimensional deformation of finite circular cylindrical shell under plane shock wave solved in linear form

09 p1785 A70-23618

Axisymmetric free vibrations of orthotropic cylindrical shell loaded on ends by constant axial force, investigating nonlinear elasticity

09 p1785 A70-23625

Stress distribution in rib reinforced cylindrical shells under concentrated forces calculated using finite difference scheme

09 p1791 A70-23718

Reinforcing ribs eccentricity effect on closed circular cylindrical shell stability using strain energy method

09 p1786 A70-23720

Axial tensile stress effects on stability of cylindrical shell under nonuniform external pressure

09 p1786 A70-23721

Cylindrical shell stability under combined torsion and internal pressure, noting yield point effect on critical load, obtaining buckling-internal pressure relationship

09 p1786 A70-23722

Flow rule for viscoplastic symmetric cylindrical shells, using constitutive equations for strain rate sensitive materials based on Huber-Mises yield condition

10 p1954 A70-24020

Stress-strain state analysis of prestained thin circular cylindrical shell using Vlasov general shell theory

10 p1955 A70-24021

Eccentricity and clamping effects on stability and critical pressure of ring-reinforced cylindrical shells under internal pressure

10 p1956 A70-24248

Minimum weight design for symmetrically stiffened cylindrical shells under compression based on linear orthotropic stability theory

10 p1958 A70-24560

Forced vibrations of cylindrically curved multispan shell structures, using transfer matrix methods

10 p1962 A70-25062

Transient creep analysis of pressurized circular cylindrical shells based on strain and time hardening theories

10 p1963 A70-25089

Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography

10 p1964 A70-25120

Thin cylindrical shell stresses and displacements enclosed in elastic casing under pressure band using classical theory of Flugge and Love functions

11 p1218 A70-25336

Axisymmetric elasticity theory problem solution for hollow finite cylinder with symmetrical end loading, employing stress function

11 p1218 A70-25388

Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state

11 p1219 A70-25396

Eccentrically stiffened thin circular cylindrical shell stability under torsion emphasizing exact finite formulas derivation

11 p1219 A70-25561

Random displacement fields in thin circular cylindrical shells with initial imperfections under axial compression using statistical analysis

11 p1219 A70-25562

Stability loss in cylindrical shell under axial compression, noting critical load reduction by local axisymmetric depression

11 p1230 A70-25566

Clamping edges effect on critical parameters of cylindrical orthotropic shell under axial compression using undetermined Lagrange multipliers

11 p1230 A70-25567

Load carrying capacity of isotropic rigid-plastic shells of revolution with different yield points under tension and compression applied to spherically coupled cylinders

11 p1234 A70-25932

Panel flutter theory applied to aeroelastic stability of flat unloaded plates and cylindrical shells

11 p1234 A70-25951

Cylindrical shell segments supersonic flutter boundaries engineering estimates related to Saturn 5 booster, obtaining thickness requirement as function of panel geometry

11 p1234 A70-25959

Characteristic equation roots for circular cylindrical shells deformation under edge load

11 p1235 A70-25960

Stiffened cylindrical shells under internal pressure numerically analyzed based on C-5A fuselage material parameters

11 p1235 A70-25961

Truncated conical shell buckling under axial compression using method for torsion buckling, correlating to equivalent cylindrical shells

11 p1235 A70-25980

Transient bending and shear stresses at clamped support of orthotropic circular cylindrical shells

11 p1235 A70-25985

Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations

11 p1235 A70-25986

Inplane and rotary inertia effects on free vibration frequencies of circular cylindrical shells eccentrically stiffened by orthogonal set of stringers and/or rings

11 p1235 A70-25993

Free vibration characteristics of circular cylindrical shells of finite length, utilizing Flugge equations

11 p1235 A70-25997

Membrane theory for thin single layer orthotropic cylindrical shells experiencing harmonic axisymmetric motion

11 p1236 A70-26084

Finite element method using shallow shell stiffness matrix extended to cylindrical shell solution

11 p1238 A70-26159

Thin cylindrical shells of perfectly plastic rigid material, analyzing dynamic plastic deformation under internal impulsive pressure

11 p1239 A70-26413

Vibrations of combination of cylindrical shells and circular plates, giving bending moment distribution

11 p1239 A70-26415

Buckling load calculations for axially compressed circular cylindrical shells under relaxed boundary conditions

11 p1240 A70-26484

Cylindrical shells plastic flow buckling under radially inward impulsive loading, showing mode number dependence on shell length

11 p1240 A70-26486

Vibration equations for closed and open sandwich cylindrical shell with thickness-shear deformation in core and face layers compared with membrane theory

11 p1245 A70-26697

Axisymmetric and unsymmetric free vibrational modes of right-circular conical or cylindrical sandwich shells with free edges, discussing Rayleigh-Ritz solution

11 p1245 A70-26700

Natural frequencies of thin cantilever cylindrical shells, using Flugge equations of motion and Rayleigh-Ritz method

11 p1246 A70-26704

Cylindrical shell response to random acoustic excitation, considering single point transfer functions and equivalent force power spectral densities

12 p2317 A70-27125

Automated optimum structural design by variable step direct search algorithm, noting application to stiffened cylindrical shells

12 p2319 A70-27138

Stiffened fiber composite cylindrical shells minimum weight design, discussing configuration and material parameters

12 p2319 A70-27139

Axisymmetric imperfection distributions effect on buckling of circular cylindrical shells under axial compression, constructing test models from photoelastic liquid epoxy

12 p2319 A70-27140

Stiffened cylindrical shells buckling under axial compression, obtaining imperfections and prebuckling growth mappings

12 p2319 A70-27141

Cylindrical shells design under axially compressed loads by elastic stability analysis, predicting critical loads

12 p2320 A70-27142

Thermal buckling theory for multilayered stiffened cylindrical shells under various combined loads

12 p2321 A70-27149

Axially stiffened and barreled cylindrical shells elastic postbuckling behavior, considering effects of stringer and load eccentricities

12 p2321 A70-27175

Thin cylindrical shells elastic buckling under uniform axial compression, considering Kirchhoff-Love hypotheses in critical stress determinations

12 p2324 A70-27396

Glass-plastic thin cylindrical shells carrying capacity dependence under axial and external loads on combinations of longitudinal and transverse reinforcing layers

12 p2259 A70-27527

Metallic cylindrical shells design reinforced with elastic glass fiber rings, considering elastoplastic deformation

12 p2324 A70-27530

Hollow homogeneous polymer cylinder thermoelastic stressed state, analyzing radial temperature and Poisson Coefficient variations

12 p2325 A70-27532

Pressurized orthotropic cylindrical membrane shells free and forced vibration, considering dynamic response dependence on internal pressure

12 p2326 A70-27815

Fiberglass plastic cylindrical shells stability against creep under prolonged hydrostatic pressure, obtaining critical loading times

12 p2328 A70-28278

Strain induced in laminated orthotropic fiberglass plastic cylindrical shell by normal concentrated load, using equations free from rectilinear normals hypothesis

12 p2328 A70-28279

Cylindrical shells stability under axial compression by two dimensional Kirchhoff-Love applied theories, calculating critical stresses

12 p2328 A70-28282

Stress concentration in fiberglass reinforced plastic composite cantilever cylindrical shell in round hole region subjected to concentrated load on free supported end

12 p2328 A70-28286

Residual stresses in cylindrical shell made of two component solid solution under thermal diffusion

12 p2329 A70-28323

Ablation and temperature effects in hollow viscoelastic cylinder

13 p2508 A70-28487

Slender cylindrical shell loaded by internal pressure analyzed using numerical procedure developed for digital computer

13 p2512 A70-28981

Thin walled duralumin cylinders catastrophic fracture analysis by linear elastic fracture mechanics noting fatigue crack propagation

13 p2434 A70-29173

Laminated glass fiber reinforced cylindrical shell stability resting on hinged supports under axial compression

13 p2514 A70-29285

Initial thermal stresses effect on natural oscillation frequencies of thin cylindrical elastic shells, obtaining linearized equations of motion and boundary conditions

13 p2514 A70-29286

Critical loads and stability of isotropic cylindrical shells under uniformly distributed longitudinal compression loads based on network method

13 p2514 A70-29287

Stability loss of nonreinforced and reinforced cylindrical shells under external pressure

13 p2514 A70-29294

Radial displacements in cylindrical circular shell by impinging spherical waves propagating in acoustic medium, deriving equations by Fourier and Laplace transforms

13 p2515 A70-29318

Thermal stresses dependence on temperature field during axisymmetric heating of rigid cylindrical shells

13 p2421 A70-29426

- Elastic material filled cylindrical, segmented to radial and conical shells thermal stability, allowing for stiffener eccentricity 13 p2516 A70-29523
- Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells 13 p2517 A70-29758
- Linear compressive orthotropic stability theory for shallow-stiffened cylinders 13 p2518 A70-30022
- Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth top impedance and ullage pressure by Donnell theory 14 p2657 A70-30764
- Stress distribution in aeolotropic cylindrical shell due to shearing force varying linearly and quadratically with depth on inner boundary 14 p2658 A70-30994
- Cylindrical shell nonaxisymmetric vibration frequencies and boundary values relation, using Lagrangian 14 p2661 A70-31273
- Two dimensional stress-strain fields under elastic and elastic-plastic strains and steady state creep, calculating stress distribution around hole in cylindrical shell 15 p2813 A70-31533
- Stress-strain state of catenoid, cylindrical and spherical shells of revolution, emphasizing catenoid shell bending problem 15 p2815 A70-31648
- Thin cylindrical shells flutter analysis in supersonic flow, using linearized potential theory 15 p2815 A70-31916
- Cylindrical shells with longitudinal rib reinforcements, deriving yield surface from strain mapping and collapse under pressure 15 p2816 A70-32006
- Internal pressure deformation of thin cylindrical shells of materials with nonlinear stress-strain relations, considering Al alloy shell and axial strain 15 p2816 A70-32009
- Cylindrical shells upper critical loads calculation based on linearization of nonlinear shell theory equations 15 p2818 A70-32181
- Cylindrical conical shell junction axisymmetric bending, using numerical method and exact solution 15 p2822 A70-32360
- Cylindrical shells under axial compression, using elastic stability analysis for critical loads prediction 15 p2822 A70-32512
- Small displacements in noncircular cylindrical shells under various loads 16 p2987 A70-32992
- Normally intersecting closed cylindrical shells subjected to internal hydrostatic pressure, using Donnell shell theory 16 p2990 A70-33678
- Probabilistic model for radiative transfer of photons in inhomogeneous infinite cylindrical shell medium, noting radiation intensity relation to scattering and transmission functions 16 p2952 A70-33785
- Combined internal pressure and axial loading influence on aeroelastic stability of thin walled cylindrical shell in supersonic flow field 16 p2991 A70-33851
- Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion 16 p2992 A70-34019
- Vibrations of shells, plates and membranes carrying dynamic systems at discrete points on surface, obtaining eigenfunction and eigenvalue equations 16 p2993 A70-34090
- Stability analysis of anisotropic cylindrical shells under combined loadings using inverse operators 16 p2994 A70-34246
- Free vibration of thin circular cylindrical shells, comparing experimental results to Egle-Sewall analysis 17 p3181 A70-34520
- Anisotropic and laminated cylindrical shells geometric design for reduction of elastic stress gradients to predetermined limit 17 p3182 A70-34559
- Polycarbonate thin walled cylindrical shells mechanical and material stability under torsion 17 p3127 A70-34656
- Circular cylindrical shells with clamped ends, investigating supersonic panel flutter by two mode approach and Galerkin method 17 p3184 A70-34695
- Displacement bounding principle for finitely deforming rigid plastic structures exhibiting geometric stability, with application to cylindrical shell 17 p3184 A70-34906
- Composite orthotropic cylindrical shells linear thermoelastic equations solution for fixed end boundary conditions, noting heterogeneity effects on stress distribution 17 p3184 A70-34909
- Analog simulation of elastic wave propagation in thick walled hollow circular cylinders to determine safe impact speed 17 p3185 A70-34964
- Solutions for normal and tangential displacements and concentrated forces on shallow cylindrical shells 17 p3186 A70-34969
- Membrane and bending stresses at crack tip in cylindrical shell weakened by elliptic hole with major axis perpendicular to shell axis 17 p3186 A70-34981
- Axially loaded cylindrical shells prebuckling deformation behavior measurement by holographic interferometry 17 p3086 A70-35012
- Supersonic panel flutter of circular cylindrical shells at critical dynamic pressure 17 p3188 A70-35227
- Unsymmetric vibrations of cylindrical shells, analyzing stress states by asymptotic method 18 p3335 A70-36059
- Circular cylindrical shell with round holes along generatrix subjected to internal pressure, determining stress concentration with aid of computer 18 p3335 A70-36131
- Cylindrical shell of variable thickness, deriving axisymmetric thermal stresses in terms of hypergeometric functions 18 p3336 A70-36137
- Cracks and tensile failure of interface bonds in elastic composite hollow cylinder, deriving wave front propagation equations 18 p3283 A70-36388
- Solid or hollow anisotropic elastic cylinders rotating with variable angular velocity, determining dynamic response by Hankel and Laplace transforms 18 p3338 A70-36433
- Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads 18 p3338 A70-36436
- Stability of circular cylindrical shell reinforced by elastic rings at edges under longitudinal compression 18 p3341 A70-36581
- Cyclic plastic breakdown of thin cylindrical shell under ring shaped load in temperature field, using linear programming method 18 p3341 A70-36585
- Thin circular cylindrical shell stability subjected to axisymmetric thermal pulse, describing buckling process by mathematical model 18 p3342 A70-36641
- Limit load of cylindrical shell with rigidly clamped edges under varying pressure and axial force, using Tresca yield condition 18 p3343 A70-36722
- Thin walled cylindrical shell stability under axial compression edge load beyond limit of proportionality 19 p3534 A70-37243
- Shallow circular cylindrical shell with rigid collar on lateral surface, calculating stress under axial tension and internal pressure loading 19 p3534 A70-37245
- Stress and displacement within internally pressurized composite cylinders having continuous fiber reinforcement in circumferential direction, using finite element method 19 p3538 A70-37797
- Core-filled thin cylindrical shell under radial ring and band pressure loads, using Boussinesq-Neuber stress function and Flugge shell theory 19 p3543 A70-38247
- Blast loaded cylindrical shell collapse hinge dynamic instability prediction by mathematical model 19 p3545 A70-38334
- Long orthotropic pressurized circular cylindrical shell under radial line loads along equally spaced generators, analyzing stresses and deflections by linearization 19 p3545 A70-38338
- Thin plates and thin walled cylinders aeroelastic stability in fluid flow, analyzing panel flutter 19 p3546 A70-38342
- Prebuckling deformations effect on buckling of clamped thin walled circular cylindrical shells under axial loading and internal pressure 19 p3546 A70-38346
- Shallow shell solutions complete with respect to finite simply connected surface region applied to circular cylindrical shells 19 p3547 A70-38396
- Sound propagation in cylindrical waveguide with impedance walls in presence of flow 19 p3472 A70-38655
- Straight thin walled elliptical cylindrical shells stability in pure bending, solving boundary value problem 19 p3550 A70-38683
- Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solution convergence 20 p3719 A70-39385
- Cylindrical shells subjected by sectors to constant radial pressure, investigating stress state and deformation 20 p3719 A70-39620
- Three dimensional photoelastic analysis of stresses and strains in hollow circular cylinders with conical ends bonded to shell and shrunk 20 p3720 A70-39686
- Axisymmetric contact problem of hollow semi-infinite elastic cylinder subjected to stresses on lower end face, solving by Fourier integral transform 20 p3720 A70-39734
- Creep and breakdown of thin walled cylindrical shells with circular holes subjected to internal loads at high temperature, discussing time to failure 20 p3721 A70-39777
- Cylindrical shells dynamic stability under uniform radial pressure 20 p3722 A70-39786
- Thin walled circular cylindrical steel shells dynamic stability partly filled with liquid and subjected to longitudinal excitation 20 p3723 A70-39852
- Long thin circular cylindrical shell resonance velocities in steady response to fluid motion 20 p3727 A70-39884
- Structurally closed orthotropic circular cylindrical reinforced shell stability, developing approximate method to obtain various boundary conditions 20 p3727 A70-39886
- Circular cylindrical shells theory based on Novozhilov equation, deriving auxiliary formulas for strain and displacement characteristics in terms of stress function 20 p3727 A70-39888
- Asymmetric closed and cylindrical shells variable surface machining for desired wall thickness profile by chemical milling with digital computer numerical control 20 p3637 A70-39942
- Cylindrical or tapered composite shell structures optimal design with closed circular or elliptical cross section under combined bending and torsional loads 20 p3730 A70-40043
- Homogeneous boundary value problems in stability theory of circular cylindrical shells axisymmetric equilibrium state 20 p3732 A70-40100
- Finite deflection discrete element analysis of sandwich plates and cylindrical shells with unbalanced laminated faces 20 p3732 A70-40268
- Thin cylindrical shells optimum design with symmetrically paired spiral type stiffeners under uniform axial compressible load and lateral pressure 20 p3732 A70-40287
- Circular rib reinforced cylindrical shells, analyzing error due to Kirchhoff-Love hypothesis 20 p3734 A70-40435
- Stress distribution at hole in orthotropic cylindrical sandwich shell under internal pressure 20 p3734 A70-40440
- Perturbation method for stress-strain state of circular cylindrical shell with large curvilinear hole 20 p3734 A70-40442
- Rapid expansion of thin walled aluminum alloy cylinders under pulsed magnetic field pressure using high speed streak camera oscillography 20 p3735 A70-40513
- Circular cylindrical shell stability under axial compressive load, analyzing buckling process by high speed photographic recording of photoelastic isocline pattern changes 20 p3735 A70-40528
- Concentrated lateral loads effect on elastic stability and moment carrying capacity of circular cylindrical shells in bending 21 p3932 A70-40544
- Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads 21 p3932 A70-40554
- Closed circular cylindrical shell nonlinear problem solvability extended to anisotropic sandwich shell, using mean deflection theory 21 p3933 A70-40601
- Thin walled fiberglass-reinforced plastic cylinders in torsion, calculating load carrying capacity as function of temperature 21 p3841 A70-40648
- Orthotropic fiberglass-reinforced plastic cylindrical shell with allowance for material creep, calculating stress-strain state during bending under external pressure 21 p3842 A70-40649
- Steady one dimensional temperature field of cylindrical shell spacecraft, allowing for heat conduction and convective and radiative heat transfer within shell 21 p3942 A70-40841
- Vibration of combined cylindrical shells via Lagrangian minimization regarding unknown boundary values 21 p3934 A70-40897
- Buckling analysis of stiffened noncircular cross section cylindrical shells constructed by circular arcs and straight line segments 21 p3934 A70-40922

Carbon steel thin walled cylinders creep fracture subjected to combined tension and internal pressure by large strain theory

21 p3840 A70-41438

Circular cylindrical shell with annular orthotropic elastic core, analyzing stress wave propagation under pressure pulse

21 p3938 A70-41740

Temperature distribution in rotating thin cylindrical shell with line conduction discontinuity under solar heating, evaluating tubular elements thermal bending on spinning spacecraft

21 p3951 A70-41875

Thin cylindrical shell under nonaxially symmetric concentrated stationary radial loading, calculating random responses and stability

21 p3940 A70-42051

Circular cylindrical shell supersonic panel flutter nonlinear analysis, using averaging and numerical integration methods

22 p4112 A70-42275

Nonlinear flexural vibration of thin circular cylindrical shells with clamped ends, using method of averaging for stability

22 p4112 A70-42517

Thin circular cylindrical panels in supersonic gas current parallel to generatrices, calculating heterogeneity effect on flutter

22 p4113 A70-42603

Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium

22 p4114 A70-42647

Axisymmetric vibrations of cylindrical shell with concentric circular plates at each end, obtaining Lagrangian of combined system

22 p4115 A70-42843

Transient elastic vibrations of air and liquid filled cylindrical shells under radial impact, using shadow-optical cinematography [SMPT PREPRINT 107]

22 p4031 A70-43030

Circular cylindrical orthotropic fiberglass-reinforced shell buckling under longitudinal impact, assuming initial surface imperfections

22 p4117 A70-43347

Circular cylindrical shell with varying thickness under circumferential load and radial pressure, calculating critical load

22 p4117 A70-43354

Circular cylindrical shell under longitudinal line load, deriving closed form solution in Fourier series

22 p4118 A70-43547

Natural oscillations of cylindrical shell with elastic filler, using simple load distribution model

22 p4119 A70-43572

Thickness of equally stressed cylindrical shells, using thin elastic shell theory and Kirchhoff-Love hypotheses

22 p4120 A70-43715

Prestressed loadings on two layer fiberglass-reinforced plastic cylindrical shell under internal pressure

23 p4265 A70-43937

Thin circular cylindrical shells with clamped-clamped and fixed-fixed edges, calculating natural frequencies of nonsymmetrical free vibrations

23 p4266 A70-43997

Cylindrical shell stability under off-center compression loads applied to end faces, determining collapse conditions

23 p4268 A70-44169

Axially compressed circular cylindrical shells subject to relaxed boundary conditions, calculating buckling loads as function of length to radius ratio [ASME PAPER 70-APM-O]

23 p4269 A70-44397

Corrugated plates, closed cylinders and developable shells nonlinear elastic analysis, deriving boundary conditions

23 p4275 A70-44913

German monograph on stress concentration around doubly symmetrical cut-out in cylindrical shells subjected to symmetrical load, using elliptical cut-out theory

24 p4418 A70-45092

Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc

24 p4418 A70-45147

Cylindrical shells with unreinforced openings, determining limit pressures and deformation patterns

24 p4419 A70-45158

Thin cylindrical shell flutter in linearized supersonic potential theory, considering Mach number, aspect ratio and pressure effects on critical wave number

24 p4420 A70-45263

Shell of revolution /pressure vessel/ with meridional slope discontinuity, calculating pressurization effect on stresses by computer program

24 p4420 A70-45277

Cylindrical shells dynamic thermoelastic response to sudden rotating thermal inputs, using Galerkin method

24 p4421 A70-45285

Laminar circular cylindrical shells supersonic flutter characteristics determination by dynamic equilibrium boundary value problem eigenvalues analysis, obtaining critical flutter speeds

24 p4424 A70-45588

Ring-stiffened thin circular cylindrical shells, calculating free vibration natural frequencies and mode shapes by finite element method

24 p4427 A70-46067

CYLINDRICAL TANKS

Simulated low gravity propellant sloshing in spherical, ellipsoidal and cylindrical tanks, discussing Bond number simulation and tank geometry effects [AIAA PAPER 69-1004]

09 p1657 A70-23255

Liquid motion dynamic effects in open cylindrical and conical tanks with translational motion

09 p1662 A70-23293

Liquids relative rotary motion in vertical rotating cylinders under large amplitude axial vibrations and angular velocities

12 p2209 A70-27213

Fluid motion in cylindrical tank with arbitrary sector annular cross section subjected to harmonic longitudinal excitation

12 p2211 A70-27818

Nonlinear effects of oscillatory disturbances produced by viscous excitations in rotating fluid inside of cylindrical tank

13 p2386 A70-28819

Ideal fluid-cylindrical tank elastic bottom coupled forced oscillations, determining hydrodynamic pressure for tank reverse translational motion

20 p3615 A70-40444

CYLINDRICAL WAVES

Radial electron flux interaction with cylindrical electromagnetic wave propagating between conducting planes, noting disturbance development according to power law

01 p0049 A70-10166

HF cylindrical waves propagation by line source in stratified medium, investigating refraction and diffraction at plane boundary using mathematical and ray methods

07 p1335 A70-19683

Electric field diffraction by infinitely long dielectric cylinder due to normally incident cylindrical wave, computing asymptotic value by geometric theory

07 p1235 A70-19684

Anodic precursors of convergent cylindrical shock wave of z-pinch discharges in He and Ar

07 p1261 A70-20357

Kirchhoff theory of elastic wave diffraction in cylindrical case derived on modified Huygens principle, showing edge contribution

08 p1543 A70-20582

Radial electron flux interaction with cylindrical electromagnetic wave propagating between conducting planes, noting disturbance development according to power law

10 p1853 A70-25014

Diffraction of plane cylindrical and spherical waves in wedge-shaped regions with reflecting edge, using asymptotic expansions

10 p1911 A70-25186

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media

11 p2034 A70-25399

Cylindrical shock wave two dimensional propagation in conducting plasma in magnetic field, assuming isentropic flow along streamline

11 p2091 A70-26174

Plane cylindrical and spherical explosion waves propagation in detonating gas mixtures with counter-pressure, calculating perturbed flow parameters by numerical method of integral relations

13 p2388 A70-29308

High Mach number viscous flow past cylinder with cylindrical shock wave

13 p2391 A70-29970

Cylindrical EM waves diffraction by two parallel ideally conducting elliptical cylinders, discussing field and surface current distributions

19 p3378 A70-37734

Unsteady problems of finite amplitude plane and cylindrical wave propagation in dissipative spatially symmetrical media

20 p2673 A70-40093

Cylindrical converging shock waves generation, propagation and structure at high pressures

22 p4012 A70-43431

CYLINDROIDS

U CYLINDRICAL BODIES

CYSTEAMINE

Radiation protective action of cystamin, cysteamine and aminoethyl in mice, noting equal decreases in redox potential

03 p0419 A70-13310

Positive effect of shielding and cystamin administration on tonic and evacuator functions of rats gastrointestinal tract after gamma irradiation

05 p0804 A70-17122

Experimental procedure for investigating radioprotective effectiveness of chemical compounds against

X ray irradiation, discussing Cysteamine protection for golden hamsters and fetuses

06 p0993 A70-17429

CYSTEINE

Chlorella seaweed hybrid strains containing larger amounts of amino acids than original parent species

04 p0630 A70-14573

CYTONEGENESIS

Survival rates of continuously cultivated Chlorella plants in air-carbon dioxide atmosphere after single exposure to gamma radiation, using microcolony counting technique

05 p0803 A70-17113

Cells chemical origin, discussing terrestrial fractionation, amino acids, macromolecules, metabolism, etc

20 p3569 A70-38992

CYTOLOGY

Neurons and perineuronal glial cells quantitative relations in visual cortex from anesthetized dogs

01 p0025 A70-11030

Phagocytic activity and carbohydrate metabolism in peripheral blood neutrophils of men exposed to atmosphere with increased O content, noting neutrophil energy exchange disorder role

03 p0426 A70-13901

Anticerebral cytotoxic serum effect on white rats conditioned reflex activity

07 p1199 A70-18727

CYTOPLASM

Marrow granulocyte reserve restoration in dogs exposed to chronic gamma radiation, discussing leukocyte reaction to pyrogenic agent

13 p2351 A70-29326

CZECHOSLOVAKIA

Czechoslovakian Aeronautical Research and Test Institute history, organization, activities, equipment and achievements

03 p0464 A70-13925

Glassy drops identity and moldavites sculpturing origin in Pannonian sediments in southern Moravia

05 p0916 A70-16838

Report to COSPAR on Czechoslovakian space research /1969/ covering satellite telemetry and tracking, proton flares, aeronomy, etc

15 p2829 A70-31710

CZOCCHRALSKI METHOD

Second phase formation in Czochralski grown Cr-doped GaAs crystals by metallography, radioactive indicators and X ray analysis

01 p0156 A70-10189

Czochralski thermal probe for current carrier concentration in strip shaped area of n-type GaAs single crystals active growth

24 p4389 A70-45481

D

D LAYER

U D REGION

D LINES

Frequency locking of flashlamp pumped Rhodamine 6G dye lasers to D lines of Na vapor by Faraday rotation, noting doublet splitting

01 p0110 A70-10568

Night airglow emission intensities during IQSY concerning Na, OH and H alpha lines compared with intensities during IGY

02 p0292 A70-12433

Spatial properties of solar wind during maximum and minimum activity inferred from sodium D-line emissions for cometary nuclei

06 p1136 A70-18012

Dye laser tuned to sodium D line used for measuring ionospheric atomic sodium

08 p1492 A70-21757

Atomic emission in water vapor afterglow, revealing presence of Balmer series of H atom with sodium D line

14 p2579 A70-31255

Solar prominences monochromatic images in He I D3 and He II 4686 lines allowing for contamination in 4686 images

15 p2803 A70-32614

Na D lines emission cross sections measurement from ionic and neutral gases collisions at simulated meteor conditions

18 p3318 A70-37014

Nightglow Na D line excitation rate in winter and summer

21 p3814 A70-40934

Nightglow Na-D lines excitation, attributing emission to Chapman mechanism

22 p4023 A70-43294

Sodium D lines airglow nocturnal and seasonal variations in upper atmosphere

22 p4023 A70-43295

D REGION

Negative ion reactions relevant to D region measured in ESSA flowing afterglow system as function of temperature

01 p0070 A70-10406

- Stratospheric temperature changes connection with winter D region absorption changes
01 p0073 A70-10583
- Corpuscular radiation contributions to D layer ionization determined from intensity measurements
01 p0172 A70-11490
- Rocket sounding data on ionospheric currents at mid and low latitudes noting absence in D and above E region
01 p0082 A70-11529
- D layer radio absorption during solar eclipse of 22 September 1968 attributed to two solar X-ray sources
03 p0559 A70-13602
- Water vapor ion cluster concentrations in D region, noting discrepancies above mesopause for model atmospheres predictions
03 p0478 A70-13992
- D region electron density distribution during night and presunrise period, using full wave integration method for propagation parameters for waves reflected from electron density model
06 p1054 A70-17587
- Electron density distributions relation to D region diurnal and seasonal variations in radiowave absorption in terms of transport processes near mesopause
06 p1054 A70-17589
- D region positive ion composition measurements by rocket-borne quadrupole mass spectrometer, discussing downleg and upleg data
06 p1137 A70-18537
- Rocket measurement techniques for electron density profiles in D region, giving results from auroral zone disturbed and midlatitude quiet D region
07 p1263 A70-19152
- D and lower E region absorption of short waves, studying absorption distribution with height
07 p1263 A70-19153
- Diurnal vertical shifts of constant electron concentration levels in D region, considering effects of chromosphere, nuclear explosions, solar eclipses, etc
08 p1490 A70-21430
- Hydronium ion formation mechanism for D region, obtaining experimental support from mass spectrometer observation of ion production in oxygen glow discharge
09 p1671 A70-23500
- Nighttime D region ionization irregularities deduced from vertically incident VLF radio wave
09 p1671 A70-23663
- Asymmetric cross correlation functions in D and lower E region drift measurements interpreted in terms of moving screens
10 p1881 A70-24811
- D region electron ion recombination analyzed by two-ion model
10 p1881 A70-24812
- Sunspot cycle and ionospheric D and E layers daily radio wave absorption correlation, observing seasonal variation effect
10 p1885 A70-25267
- Critical review of Meisel paper on solar X ray source identification using D layer ionization behavior during eclipse
11 p2109 A70-25750
- D region synoptic ionization changes investigated by radio waves partial reflection from lower ionosphere, relating wave amplitudes to height
12 p2224 A70-27732
- Ionospheric D region radio wave probing by cross modulation technique, obtaining electron densities and collision frequencies
12 p2224 A70-27733
- Seasonal measurements of ionospheric absorption during sunrise in D region at medium sunspot numbers, noting disagreement with rocket observation
13 p2392 A70-28574
- Mesosphere payload to measure neutral gas density, positive and negative ions concentration and mobility in D region
13 p2393 A70-28682
- Electron density profiles interpretation for quiet daytime D region, noting role of electron-positive ion recombination coefficient
13 p2397 A70-29192
- Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
14 p2547 A70-30235
- Lunar tide in ionospheric D region absorption near magnetic equator, noting annual variation relationship to sunspots
14 p2574 A70-30747
- D region rocket sounding at geomagnetic equator, measuring electron density, collision frequency, current, temperature, etc
15 p2724 A70-31668
- D region electron concentration and collision frequency in slowly varying plasma, using rocket-borne probe for ground emitted wave detection
15 p2778 A70-31673
- Electron density measurements by partial reflection and rocket techniques during 20 May 1966 solar eclipse, showing agreement below 82 km height
15 p2726 A70-31869
- D region electron density rocket measurements implying recombination coefficient
16 p2896 A70-32939
- D region electron density variations during solar eclipse of 7 March 1970, using wave interaction technique
16 p2898 A70-33832
- Sky wave amplitudes analysis recorded at D region height by loop and short whip antennas during 7 March 1970 solar eclipse
16 p2898 A70-33833
- D region electron energy loss factor during solar eclipse of 7 March 1970, using wave interaction technique
16 p2898 A70-33834
- Transceiving system for recording D region radio signal absorption and reflection, describing component circuitry and operation
16 p2880 A70-34225
- Ionization in ionospheric E and upper D regions, considering solar short wave radiation, small components, atmospheric dynamics and vertical mass transport
19 p3407 A70-37301
- D region positive ion density during solar proton event by Arcas rocket-borne cylindrical electrostatic probe
19 p3411 A70-37512
- Atmospheric turbulence scale and dissipation from 80 to 120 km, using photographic observations of Leonid meteor trails
19 p3515 A70-37663
- Multiple reflection processes in D and E regions at LF and VLF, using Pitteway full wave method
19 p3413 A70-38001
- Coupling processes in daytime D and E regions at LF and VLF, using thin film optics method for reflection and transmission coefficient matrices
19 p3413 A70-38002
- Intermode coupling processes in nighttime D and E regions, using thin film optical method for propagation phenomena at LF and VLF
19 p3413 A70-38003
- Chemical reactions of ions and neutral particles in D region, discussing photochemistry of atomic oxygen and ozone and reaction rate constants
19 p3418 A70-38905
- D region electron density profiles during solar eclipse from X ray rocket and satellite observations
19 p3419 A70-38913
- D region electron densities during 20 May 1966 solar eclipse, using partial reflection and rockets
19 p3419 A70-38914
- D region free electron temperatures at northern auroral zone by dual polarized antenna, observing incident noise radio fluxes
20 p3622 A70-39452
- X ray star effects on ionospheric LF radio wave field strength, examining absorption and ionization in D region
21 p3873 A70-40668
- Ionospheric transition and ozone correction from D region sunrise auroral rocket flight
21 p3814 A70-40935
- D region water vapor chemistry effects on measurements of radio propagation, ionospheric temperature and seasonal changes
21 p3814 A70-40936
- Ionospheric D region irregularities with partially reflected radio wave pulses, using phase path and drift measurements
21 p3814 A70-40941
- D region electron density profiles from high power wave interaction measurements during solar flare, indicating non-X-ray production rate
21 p3879 A70-40942
- Ionospheric D region electron production by cosmic X rays, noting Lyman radiation effects
21 p3882 A70-41099
- D region electron density profiles, using magnetoionic differential-phase partial-reflection technique
21 p3818 A70-41100
- Atmospheric positive ion composition measurements in D region by rocket-borne mass spectrometers, considering water cluster ions formation
22 p4017 A70-42796
- Recombination model of diurnal variation of electron density in midlatitude D region, assuming NO ionization by solar Lyman-alpha radiation
22 p4020 A70-43158
- D region ion chemistry, discussing three body reactions, water cluster ion production, reaction rates and binary collisions
22 p4023 A70-43304
- D region ionization budget, evaluating short wavelength X rays role
23 p4236 A70-43860
- D region LF and VLF sky waves opposite phase perturbation behavior
23 p4162 A70-44006
- Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
24 p4316 A70-46310
- D-1 SATELLITE
Doppler observations of D1 A satellite, discussing dispersion of data, mean point displacement and resonance harmonics
02 p0362 A70-11756
- Data reduction from D1A satellite VHF and UHF Doppler measurements to attempt geodetic link between Nice and Beirut
07 p1262 A70-18941
- DACRON (TRADEMARK)
Mission sequential environment effects on Dacron parachute material mechanical properties [AIAA PAPER 69-1018]
14 p2563 A70-30770
- DAEMO (DATA ANALYSIS)
U DATA PROCESSING
U DATA REDUCTION
U DATA TRANSMISSION
- DAKOTA AIRCRAFT
U C-47 AIRCRAFT
- DAMAGE
NT IMPACT DAMAGE
NT METEORITIC DAMAGE
NT PROTON DAMAGE
NT RADIATION DAMAGE
NT RAIN IMPACT DAMAGE
Space station damage containment and control, emphasizing safety problems and guidelines
04 p0762 A70-14933
- Structure safety in cumulative damage, considering loading as time dependent stochastic process
05 p0937 A70-16369
- Summation of cycle ratios for various loading programs to control cumulative damage concept based on French curve, using fatigue tests
05 p0939 A70-16485
- Alloy equivalent susceptibility to damage at intermediary service periods and different stress levels under creep conditions at 750 C
09 p1701 A70-22470
- Components life determination from calculating cumulative damage using empirical stress amplitude distributions
11 p2133 A70-25844
- Continually changing residual stress patterns effect defined for predicting cumulative damage in structural fatigue
11 p2137 A70-26090
- Fatigue damage accumulation deterministic models for predicting longevity
14 p2656 A70-30300
- Metallic materials damage accumulation and structural failures due to fatigue, considering surface changes, crack initiation and dislocation pattern
15 p2757 A70-31928
- Aircraft ground damage during maintenance and servicing
15 p2675 A70-32210
- Liability for damages due to supersonic flight sonic booms, discussing pertinent provisions in Dutch and international law
19 p3553 A70-37561
- Double linear damage rule applicability to dual type alloys from two-stress level rotating bending and axial fatigue tests [ICAS PAPER 70-39]
23 p4267 A70-44137
- DAMPERS
Fail-operational fail-safe redundant yaw damper system, comparing reliability requirements with reliability prediction, development and production testing and field usage data [AIAA PAPER 70-392]
10 p1896 A70-24913
- Rectilinear vibration attenuation problem on shop setup, describing adjustable passive and active electromagnetic dampers
14 p2656 A70-30299
- Torsion wire libration damper for satellite gravity-gradient stabilization at near synchronous altitudes
16 p2985 A70-34134
- Two axis eddy current and single axis gravity gradient dampers for satellite stabilization
16 p2985 A70-34135
- Nonlinear structural analysis of Mariner spacecraft solar panel, using damper test characteristics
17 p3022 A70-34769
- Hydraulic and pneumatic dampers operation, analyzing force components
24 p4427 A70-46380

Periodic motion of satellite with magnetic damper along circular orbit, assuming small value of damping coefficient

01 p0197 A70-11481

Rapidly rotating solar interior damping by large scale convection analysis via maximum buoyancy force in water cylinder transition

02 p0373 A70-12391

Elastic stability of Coriolis-coupled oscillations of thin rotating disk under influence of centrifugal forces

02 p0389 A70-12650

Thermal damping in gas-filled composite materials during impact loading due to heat transport, discussing role in impact energy dissipation

[ASME PAPER 69-APM-V]

04 p0712 A70-14867

Gravitational radiation damping effect on motion of two bodies, evaluating field components in approximation by Einstein-Infeld-Hoffman method

05 p0882 A70-16308

Empirical astrophysical damping constants derived for neutral Fe lines using solar spectra, applying constraints to abundances and surface gravity determination

05 p0919 A70-16939

DODGE satellite launched into near-synchronous orbit to demonstrate gravity-gradient stabilization at high altitude and to experiment with damping techniques

[AIAA PAPER 70-69]

06 p1159 A70-18218

Elastic stability theory applied to equilibrium and stability of discrete continuous structural systems, detailing discrete critical points

07 p1408 A70-19560

Kinetic equation for nonlinear interaction of waves, including unstable or damped, using Bogolubov method

09 p1659 A70-22214

Solar IR Fraunhofer line damping constants empirical values and variation with optical depth, noting discrepancy with theoretical constants

09 p1757 A70-22726

Aluminum and aluminum-copper alloys dislocation damping at high strain rates using impact shear tests

10 p1903 A70-23983

Temperature effects on energy dissipation during vibration in ferromagnetic and nonferromagnetic metals, comparing damping capabilities for homologous temperatures

10 p1903 A70-24245

Static tensile stresses effect on magnetized ferromagnetic materials damping properties explained by anisotropic microplastic strains dissipating energy during bending vibration

10 p1904 A70-24246

Systems instabilities classification criterion determination, showing absolute instability conversion into convective by introducing damping

10 p1969 A70-25104

Nutation damping in gyrostabilized for multispin satellites in terms of energy momentum and damping torque arguments

11 p2119 A70-25357

Orbit eccentricity effect on gravity gradient system with single damping boom, investigating optimum steady state and transient response conditions

11 p2123 A70-26129

Gas-filled composites under impact loading, studying thermal damping due to heat transfer between compressed gas and solid structure

11 p2140 A70-26480

Optimum damping and stiffness in nonlinear single degree of freedom systems, discussing protection from ground and velocity shock during landing impact

11 p2145 A70-26695

Elastic moduli and damping coefficients for glass- and boron-epoxy beams determined from resonant frequencies and bandwidths during lateral forced vibrations

12 p2253 A70-27120

Linear periodic coefficient differential equations stability analysis by infinite determinate method, considering applications to damped mechanical systems motion and dual spin satellite

12 p2261 A70-27813

Low aspect ratio wings calculated for roll-damping derivatives, investigating load distribution

12 p2157 A70-27983

Nonlinear rolling motion of four-finned missile, investigating function of angle of attack and cubic damping

13 p2503 A70-28531

Asymmetric missile nonlinear angular motion, describing quasi-linear relations for frequencies, damping rates and swerving motion amplitude

[AIAA PAPER 70-534]

13 p2506 A70-29002

Pitch damping derivatives computation for missile configurations undergoing small amplitude oscillations at subsonic speeds, using static aerodynamic data

[AIAA PAPER 70-537]

13 p2339 A70-29004

Slender wings leading edge vortex flow effect on roll damping at subsonic speeds

[AIAA PAPER 70-540]

13 p2339 A70-29007

Damping by hemispheric torquing to control spin axis in gyroscope rotor while remaining unchanged with respect to case fixed reference

15 p2741 A70-32505

Free rotor air bearing gyros active damping evaluated through experimental studies

[AIAA PAPER 67-590]

15 p2741 A70-32506

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests

[AIAA PAPER 69-531]

15 p2787 A70-32510

Monograph on elastic stability covering eigenvalues of matrix series, stress-strain state calculation, critical ratio derivation, etc

15 p2823 A70-32550

Phase locked loop damping characteristics optimization based on input rms error rate minimization and transient error integral square value limitation

15 p2704 A70-32604

F-1 rocket engine acoustic line, reevaluating damping data for combustion stability improvement

16 p2968 A70-33588

Stability theorem for mechanical systems with constraint damping subjected to energy dissipation

17 p3176 A70-34956

Mathieu equation with nonlinear terms for damping and restoring forces, investigating first order instability region

18 p3337 A70-36224

Mechanical destabilizing model of nonlinear damping in nonconservative systems with follower forces, using Liapunov method

19 p3542 A70-38065

Transient system decay characteristics, discussing equilibrium point damping time for asymptotically stable systems of ordinary differential equations

19 p3542 A70-38066

Dual spin spacecraft, considering nonlinear damping effect on attitude stability

19 p3533 A70-38859

Interactive hybrid simulation of TRIAD satellite motions, describing attitude control system with magnetic hysteresis damping

[AIAA PAPER 70-994]

20 p3714 A70-39536

Composite material dynamic properties, discussing modulus and damping during constant strain rate, viscoelasticity, fracture strength and high loading tests

20 p3731 A70-40048

Continuous pseudoacoustic and ion waves excitation and damping in plasma sheath around grid, taking into account transit time effect on ion acceleration

21 p3858 A70-41710

Oscillating vane and rotating disk pressure gage theory, considering gas damping and density variations

23 p4198 A70-44948

Flame propagation limits and damping mechanism in gases under convection, determining boundary and initial conditions

24 p4428 A70-45492

Pulsation and turbulence damping in pulsed jet from energy spectra of longitudinal velocity fluctuations

24 p4327 A70-46267

DAMPING TESTS

Machine element materials damping properties, determining energy dissipation during steady resonant vibrations

01 p0211 A70-11423

Tuned resonant test for measuring damping characteristics of lead and asbestos filled epoxy-polysulfide copolymer

08 p1527 A70-21336

DAMPNESS

U MOISTURE CONTENT

DANGER

U HAZARDS

DARK ADAPTATION

Readaptation times of eyes adapted to darkness using night vision training device in relation to helicopter flight safety conditions

03 p0436 A70-13823

Bleached eye pressure blinding at bleaching light termination during wavelength settings, discussing effect on interocular hue shifts

03 p0427 A70-13951

Rod-cone interaction in cat S potentials, analyzing effect of wavelength and intensity upon dark adapted responses

05 p0801 A70-16380

Dark adaptation correlated with in vivo visual pigments regeneration as function of bleaching during monomolecular time course

08 p1447 A70-21722

Human eye sensitization and dark adaptation, noting annular surrounding light addition effect on rod threshold

08 p1447 A70-21723

Visual acuity and light detection after preadaptation to red and orange lights, discussing photopic and scotopic vision

11 p1986 A70-25828

Two dimensional eye position control in dark over prolonged periods, noting role of conjunctiva cues, drifts and saccades

12 p2171 A70-28037

Oxygen effect on night vision tested in men at 5,000 ft above sea level, obtaining threshold curves of dark adaptation

13 p2359 A70-29443

Disadapting photostimulation effect on light sensitivity restoration of human visual analyzer, obtaining dark adaptation curves

15 p2679 A70-31603

Scotopic responses conditions, using stimulus alternation method to elicit electroretinogram

17 p3034 A70-35897

Darkness adaptation of flight personnel in polar regions, discussing effects of physical and nervous strain, sickness and alcoholic intoxication

20 p3576 A70-40290

Bilateral cortical cerebellar hemispheric ablations effect on feline light-dark discrimination learning

21 p3762 A70-41142

Time dependent visual perception probability under prolonged testing at eccentricities, using observer exposed to flashed stimulus with dark-adapted retina

23 p4147 A70-44782

DARKENING

Darkening and brightening of disturbed spot on sun surface determined by abnormal stress in seen layers due to magnetic and velocity fields

08 p1570 A70-20903

Coefficients for linear and nonlinear limb darkening in early type stars

11 p2113 A70-26469

Visual reflectance of wet soils, attributing darkening to internal reflection of radiation in water layer enveloping soil particles

14 p2577 A70-31236

Polar and equatorial limb darkening related to solar rotation and thermal flow, using photospheric models

15 p2807 A70-32812

DARKNESS

Ashen light origin, considering atmospheric refraction of sunlight illuminating dark side of planet

24 p4399 A70-45113

DARKROOMS

Covert solid state imaging system applicability to totally dark laboratory environment

09 p1686 A70-23752

DART TURBOPROP ENGINES

U TURBOPROP ENGINES

DASSAULT AIRCRAFT

Mirage F1 fighter aircraft, describing aerodynamic characteristics, fuselage construction, wing edges, etc

10 p1807 A70-24975

DATA ACQUISITION

Lidar technique using pulsed lasers as energy sources for operational type meteorological data collection including cloud height, visibility, thermal stratification, etc

01 p0042 A70-10081

Data acquisition methods and position in data processing with respect to time and quantity requirements

01 p0047 A70-10260

Noctilucent cloud observation stations and international cooperation in exchanging climatological data concerning annual variations, height distribution and latitude dependence

01 p0072 A70-10579

Sq data acquisition and analysis, noting automatic standard observatories using nuclear magnetometers and ionospheric current information from instrumented rockets

01 p0075 A70-10597

Solar electric spacecraft field interaction with space plasma affecting collection and interpretation of scientific data, emphasizing required system configurations and constraints

[AIAA PAPER 69-1106]

01 p0162 A70-10601

Semiautomatic data collection system for IR reflectivity measurements, recording digitized output on punched cards for computer analysis

01 p0088 A70-10747

On-line electronic integration of aortic flow during systole to provide beat by beat readout of stroke volume

01 p0038 A70-11044

Numeric keyboard CRT display for weather data acquisition from ships at sea, utilizing ATS-3 satellite as transmission medium

01 p0048 A70-11279

Fourth Cambridge catalogue radio sources observed for right ascensions using east-west arm of Molonglo radio telescope, presenting data analysis procedures

01 p0191 A70-11362

- In-flight data acquisition systems to overcome manual methods limitations, discussing applications and system configuration 02 p0224 A70-11839
- Automatic inspection data collection and processing by human operator using display devices and computerized mathematical reduction for real time evaluation 02 p0266 A70-12469
- Two phase flow visualization by various photographic and optical methods, describing equipment and lighting used and types of data obtainable 02 p0305 A70-12834
- Plastic flow under biaxial stress, discussing data acquisition system and computer program for comparing test and theory 03 p0480 A70-12954
- Creep rupture data processing by computer, performing data collection and processing separately 03 p0487 A70-13569
- Ground stations and low orbiting satellite system for automatic collection of meteorological data over Italy 03 p0581 A70-13832
- Thermionic converter with oriented W electrodes, describing test method and computerized data acquisition for performance mapping 04 p0627 A70-14945
- Experiment design and data acquisition for V/STOL aircraft flying qualities simulations, emphasizing pilot rating and comment data and control usage information [SAE PAPER 690695] 05 p0825 A70-15860
- Integrated flight test data acquisition and processing system with real time graphic display, discussing ground station function [SAE PAPER 690678] 05 p0793 A70-15867
- Human performance evaluation and data acquisition as requirements for heuristic analytical models in systems engineering 05 p0805 A70-16008
- Weather data communication, discussing transmission of radar, polar satellite and ATS satellite data to processing center and forecasts dissemination to public media 05 p0814 A70-16327
- High energy solar flare data from neutron monitor stations supplemented by low energy data from interplanetary space probes Pioneer 6 and 7 05 p0902 A70-16443
- Onboard digital data acquisition instrumentation system for scientific satellites, combining existing functional blocks to obtain different configurations and performances 05 p0818 A70-16587
- Remote sensing advantages and limitations of various wavelength bands, resolutions and time spans, discussing instrumentation and environmental limitations 05 p0850 A70-16684
- Meteoroid hazard data comparison from terrestrial and satellite measurements supporting Whipple theory of low density meteoroid 05 p0917 A70-16900
- Earth resources and meteorological data collection from in situ sensors via satellite, discussing system considerations 06 p1006 A70-17343
- Photoelectric photometry of comets to obtain principal data and to classify comets by employing same filters and stellar photometric standards 06 p1140 A70-17731
- Optimal information selection for determining spacecraft trajectory, considering atmosphere, light speed and series expansion coefficients of planetary gravitational potentials 06 p1142 A70-17891
- Climatological cloud type statistics for simulating earth sensing mission data output as function of sensor field of view and spatial resolution [AIAA PAPER 70-196] 06 p1065 A70-18098
- Test facilities and procedures for obtaining aerodynamic data required for studying vehicle-in-tube transportation systems [AIAA PAPER 70-225] 06 p1030 A70-18221
- Acquisition system design and experimental results for time division multiple access satellite communication system 06 p1011 A70-18410
- Computer operated digital system for controlling acoustic test environment and dynamic test data acquisition 06 p1030 A70-18432
- Magnetic, electrostatic and RF fields noise reduced for strain gage data acquisition 06 p1069 A70-18435
- Mariners 6 and 7 range and Doppler tracking data for studying Martian mass and earth-moon mass ratio 06 p1151 A70-18486
- Simultaneous high speed shock tunnel data acquisition system using single tape recorder, analog or digital readout and computerized reduction 06 p1031 A70-18604
- Meteorological data from radiosonde and radar wind observations during Indian Ocean expedition of research vessel Meteor 07 p1329 A70-19350
- Ionospheric data of local and integral electron concentration obtained by measuring phase shift of satellite emitted coherent radio waves 07 p1276 A70-20422
- Geomagnetic storms data compilation /1957-1964/, showing solar activity effect on solar corpuscular stream velocity 07 p1373 A70-20436
- Deep space network /DSN/ functions and characteristics, discussing spacecraft control, data acquisition, orbit determination, data processing, etc 08 p1481 A70-20614
- Celestial emission bodies forbidden line analysis for physical conditions determination using formulas and graphs 08 p1569 A70-20831
- Computer system for real time data acquisition and servicing of asynchronous inertial guidance system test stations 08 p1467 A70-21591
- Global atmospheric research program data requirements analysis based on two level numerical model 08 p1539 A70-21650
- Self similarity concept relevance to atmospheric turbulence demonstrated from ground and airborne observational data 09 p1717 A70-22373
- Communications satellite technology for earth resources data collection 09 p1634 A70-22857
- TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena analyzed for problems of general data gathering satellite system [AIAA PAPER 70-283] 09 p1766 A70-22874
- Omega Position Location Equipment /OPL/ system, testing operational feasibility of centralized global meteorological data collection system 09 p1722 A70-23030
- Reference ellipsoids mutual positions determination from observational data by satellites using triangulation points of two triangulations 09 p1763 A70-23327
- Weapon systems combat effectiveness measurements, stressing need for proper data acquisition from early R and D through obsolescence 09 p1794 A70-23414
- Intertropical convergence zone /ITCZ/ movements, analyzing data obtained by ship and ESSA satellite cloud photography 10 p1912 A70-23939
- Satellite system applicability to earth resources data collection from in situ sensors, discussing synoptic, local time, emergency and demand data collection 10 p1840 A70-24371
- Remote sensing and privacy rights, noting political and social trends toward privacy protection 10 p1971 A70-24744
- Aerial photography analysis of drainage basin discharge properties, discussing surface runoff, subsurface flow and underground water movement 10 p1879 A70-24750
- Forest inventory data collection by 70 mm photography, creating correction surface over model area of large scale pair 10 p1880 A70-24754
- Observational data for distributions of physical and optical companions to spiral galactic systems and number of satellites as function of central galaxy size 10 p1948 A70-25247
- Sound speed and horizontal wind velocity components determined in upper atmosphere from measured data of Rocket Grenade Experiment 11 p2121 A70-25678
- Commercial aviation gasoline inspection data tabulated and compared for 1969 and 1964 [SAE PAPER 700228] 11 p2099 A70-25897
- Italian polyvalent data acquisition system for ground space tests, discussing electronic instrumentation system 11 p2032 A70-26293
- Analog-digital real time data automatic acquisition and radar tracking system for air defense and air traffic control 11 p2014 A70-26313
- Residential urban environment data extraction from high and low resolution images 12 p2216 A70-26907
- Gemini 12 photographs examined for urban and transportation data content 12 p2228 A70-26909
- Lumped linear model parameters determined from dynamic test data on mode shapes and frequencies for approximating distributed elastic structure 12 p2317 A70-27122
- Multipath tolerant ranging and data acquisition for air-ground-air links in ATC based on mathematical scattering theory 12 p2268 A70-27642
- Radiological studies of young adult spines for selecting aircrew personnel and collecting data to compile reference dossiers in case of accidents 12 p2171 A70-28039
- Soviet book on discrete system for measuring multivariable probability distributions, covering automatic acquisition and reduction of statistical data 13 p2381 A70-28700
- Deep Space Network /DSN/ data accuracy limitations relation with ability to determine orbit of probe, examining improvements after Mariner 2 and trends 13 p2448 A70-28702
- Meteorological data acquisition by navigational aids, satellites and surface based indirect sensors for computer forecasting 13 p2405 A70-28773
- Signal transduction with differential pulse width modulation applied to data acquisition processes 13 p2405 A70-28812
- Air-damped capacitance accelerometers and velocimeters in data acquisition systems using signal processing 13 p2405 A70-28813
- Azur satellite ground control, describing system organization to measure scientific and data information for entire satellite lifetime 13 p2384 A70-28976
- Integrated computerized data acquisition and reduction system for aircraft flight and wind tunnel tests 13 p2373 A70-29156
- Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data 13 p2399 A70-29240
- Pulsar CP 1919 X ray emission upper limits from balloon flight data, comparing to NP 0532 over entire electromagnetic spectrum 13 p2478 A70-29270
- Aircraft clear line of sight probability data for various altitudes and view angles 14 p2608 A70-30595
- Visual observation, free space traversal, accelerometry and telemetry for measuring and recording human behavior, discussing free space-time traversal data logging system 14 p2542 A70-30794
- Census analysis and population data acquisition using aerial photography 14 p2576 A70-30978
- Data flow in computerized automatic data acquisition systems, considering systems traceability of calibration to national standards 14 p2554 A70-31110
- GHOST free floating balloon system for global atmospheric circulation data acquisition in World Weather Watch 14 p2610 A70-31153
- Alpha-beta and Kalman tracking filters with randomly interrupted data, evaluating transient responses as function of radar measurement accuracy and valid data acquisition probability 14 p2557 A70-31186
- Satellite laser communication system using dual scan acquisition technique 14 p2552 A70-31197
- Remote sensors applied to classification of aerial data concerning housing quality at different scales, using variables observation 14 p2577 A70-31234
- Radar imagery for crop discrimination, discussing sensor and data requirements and statistical analysis methods 14 p2578 A70-31237
- Analog/digital system for full scale airframe fatigue amplitude and phase signature measurements on CH-46D tandem rotor helicopter 15 p2739 A70-32323
- Optimal questionnaires characteristics and design algorithms 15 p2705 A70-32450
- Lidar probing of stratosphere and mesosphere using automatic data acquisition system 16 p2862 A70-33016
- Optimal use of remotely sensed data from NASA Earth Resources Program by matching user models with capabilities of aircraft/satellite remote sensing system 16 p3004 A70-33708
- Airborne flight test data acquisition and ground based automatic bulk data processing system for helicopter test and development programs 17 p3014 A70-34713
- Airborne data acquisition on high density computer tape for aircraft handling and flight dynamics research 17 p3049 A70-35499
- Computer driven on-line CRT graphics displays for data acquisition and reduction 17 p3063 A70-35513
- Airborne data acquisition and flight recorder systems, comparing civil and military aircraft requirements 17 p3094 A70-35515

Ground simulations data of jet lift V/STOL compared with visual flight results, noting hover, lateral quick start and stop maneuver

18 p3236 A70-35954

Data acquisition system applications philosophy, discussing data integrity, expansion facility, flight safety, etc

18 p3258 A70-36339

Flight data recorders and system integration, discussing data replay system backing flight recording

18 p3258 A70-36340

Underwater recovery requirements for flight data recorders, suggesting compressed air instead of explosive charges for ejection force

18 p3258 A70-36343

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display

18 p3225 A70-36750

Plane and annular cascade facilities data application to aerodynamic design of axial flow compressors

[ASME PAPER 70-GT-106] 18 p3303 A70-36845

Magnetic tape recorder for panoramic vertical ionospheric sounding data acquisition in digital form

18 p3261 A70-37041

Galaxies and globular clusters, obtaining data by measurements with intermediate bandpass photometry

18 p3321 A70-37121

Radio sources near 2 flux units at 408 MHz, presenting data on positions, optical identifications, angular size and flux densities

18 p3321 A70-37125

Exhaled alveolar air data acquisition using mass spectrometer and multichannel analyzer

19 p3367 A70-37356

Data acquisition and processing system for electronic countermeasure aircraft tests

19 p3383 A70-37900

Rocket engine tests dynamic data oscillographic presentation and digital processing

19 p3490 A70-37916

Automatic gain ranging amplifier for high speed digital computer controlled data acquisition system used to process input data levels

19 p3383 A70-37919

Computer merits in test laboratory data acquisition systems

19 p3383 A70-37921

Soviet papers on physiological data collection and analysis methods

19 p3369 A70-38206

Space corpuscular radiation simulation to obtain data for increased spacecraft life

19 p3511 A70-38284

Signal measurement and processing in thermal vacuum and space simulation tests of Azur and Dial satellites

19 p3400 A70-38298

Flight data acquisition methods standardization, discussing digital recording modes and formats and hardware rationalization

19 p3429 A70-38515

Digital data acquisition system for CF-5A flight test program, discussing recording system design

19 p3384 A70-38532

Portable catapult and arresting gear analog instrumentation data acquisition system testing aboard aircraft carriers and at land-based facilities

19 p3384 A70-38533

Data collection system for prototype flight tests of Fokker F-28 based on DC-8 aircraft digital system

19 p3384 A70-38546

Data acquisition by earth resources technology satellite /ERTS/ for user needs in forestry and agriculture

20 p3616 A70-39062

Space acquired hydrological cycle data relating to water occurrence and movement in atmosphere and earth surface mantle

20 p3616 A70-39063

Morning and evening current reversals in equatorial electrojet, discussing seasonal variation data for refining models

20 p3621 A70-39352

Automatic measurement of drainage networks for lengths and areas by copper plate etching or flying spot scanner on transparencies or radar images

20 p3633 A70-39794

Earth resources observation satellite program and organization for acquiring, processing, utilizing and disseminating remote sensor data

20 p3741 A70-39944

Solar electric propulsion application to out-of-ecliptic mission for interplanetary fields and particles data, comparing performance with chemical systems

[AIAA PAPER 70-1118] 20 p3691 A70-40225

OSO far UV solar spectroheliograms atlas, describing instrumentation, data acquisition, etc

20 p3713 A70-40540

Thermoelectric outer planet spacecraft /TOPS/ data subsystems for 12 year missions compared with Mariner subsystem

21 p3795 A70-41796

TIROS Operation Satellite /TOS/ system for daily observation of meteorological phenomena, analyzing problems of general data gathering satellite system

[AIAA PAPER 70-283] 21 p3931 A70-41868

Airborne data acquisition equipment for accident flight path and engine performance recording

21 p3796 A70-41922

Real time global temperature and geopotential height profiles acquisition from satellite spectrometer measurements by least squares regression method

21 p3820 A70-42121

ERTS line scanning system for cartographic data of water, snow, vegetation and cultural areas

22 p4037 A70-43090

Computer-based seismic data acquisition system using digital vibroseis process for eliminating low signal to noise ratio characteristics

22 p4038 A70-43092

Astronaut physiological monitoring aboard Soyuz spacecraft

22 p3980 A70-43691

Data acquisition and processing in structural modal characteristics analysis during ground resonance tests

[ICAS PAPER 70-36] 23 p4267 A70-44133

EUV reflectance data for optical constants obtained in digital form directly on punched cards by data acquisition system

23 p4197 A70-44470

Information handling for safety design concerning standards, criteria and requirements

23 p4153 A70-44493

Commercial transport aircraft fatigue loading data from NASA VGH /airspeed-acceleration-altitude/ program, discussing instrumentation, sample sizes, etc

23 p4270 A70-44548

Space station program information management system involving data acquisition and extended manned flight operation with minimum ground support

[IBM-70-U60-0015] 23 p4164 A70-44637

Jupiter Orbiting Vehicle for Exploration system for gathering Jupiter atmosphere, magnetic, radiation, gravitation, temperature, topography and interplanetary data

23 p4264 A70-45010

Solar limb photographic, isodensity and isophotal data for eclipse of 7 March 1970 from coronagraph observations, noting coronal green line and prominence activity

24 p4402 A70-45389

Planetary masses determined from radar measurement data and radio tracking of space probes

24 p4407 A70-45535

Geopotential zonal spherical harmonics coefficients revised values determined from reduced Baker-Nunn observations for satellites

24 p4407 A70-45537

Tesseral harmonics of geopotential and station coordinates from combined Baker-Nunn, laser and range data from satellites

24 p4407 A70-45538

Satellite data acquisition and dissemination functions of National Space Science Data Center /NSSDC/

24 p4322 A70-45615

Earth Resources Technology Satellites /ERTS/ providing high resolution image data regarding agriculture, geology, hydrology, geography, etc

[SAE PAPER 700761] 24 p4416 A70-45869

Satellite technology applications to ATC, including communications, navigation, surveillance over water and data acquisition

[AIAA PAPER 70-1301] 24 p4373 A70-45922

DATA CONVERTERS

NT ANALOG TO DIGITAL CONVERTERS

NT DIGITAL TO ANALOG CONVERTERS

Multistop time-to-pulse-height conversion unit to extend capability of pulse height analyzer for multichannel time analysis with narrow channel widths

02 p0271 A70-12749

Graphical data conversion into code for storage in computer memory

15 p2705 A70-31576

Measurement transducers transforming measured quantity into forms suitable for comparison with standards in metrological sciences

17 p3090 A70-35432

Fluctuating data transmission, using measurement channel with digital logarithmic conversion

20 p3635 A70-40534

Dynamic errors of digital converter for digit-to-digit compensation estimated by probability and information characteristics methods

24 p4340 A70-46404

DATA CORRELATION

NT SIGNAL ANALYSIS

Cosmic ray neutron monitors data comparison for various stations using one factor model, considering atmospheric effects and cut-off rigidities

01 p0087 A70-10460

Spacecraft motion parameters and physical characteristics of space determined from statistical analysis of measurement data

01 p0094 A70-11484

Auroral breakup effects on sporadic E via comparison between sequential ionograms and riometer absorption data indicating transient effect in D/E regions

02 p0288 A70-11744

Instruments and procedures for photogrammetry automation, discussing automatic pattern recognition, data correlation and computer role

02 p0302 A70-12652

Temporal autocorrelation functions of ozone content and concentration from data of Soviet and U.S. stations, obtaining statistical stability

03 p0474 A70-13295

Solar X-ray bursts observations correlation with sudden phase anomalies measured at long VHF propagation paths in lower ionosphere

03 p0558 A70-13601

Solar microwave and soft X ray radiation emission correlation to determine flare peak temperature and solid angle

04 p0741 A70-15126

Ionospheric propagation experiments to measure radio echo height changes, observing correlation between LF signal reflection and MF transmitter power

04 p0650 A70-15132

Space simulation test results compared with analytical methods for thermal data prediction of Azur satellite

04 p0762 A70-15182

Error sources affecting data comparison accuracy between gyro measurements and reference solutions and due to gyro axes misalignment and gimbal angular movement

04 p0692 A70-15327

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings

04 p0683 A70-15741

Hypersonic near wake, discussing correlations from optical studies, laminar near wake, blunt body and turbulent wake measurements

05 p0790 A70-16120

Error correction for correlation coefficient between satellite data of earth radiation intensity and satellite vision field shift

05 p0841 A70-16729

Correlation between O isotope ratios and composition of tektites investigated for origin of tektites

05 p0917 A70-16840

Satellite radiation dose rates in inner Van Allen belt, correlating calculated and measured rates with proton environment model

06 p1134 A70-17264

Radiation data from manned orbital Mercury missions, correlating measurements from various additional sensors with main nuclear emulsion sensors

06 p1134 A70-17267

Balloon satellite orbital time and eccentricity correlated, investigating earth shadow and solar radiation effects

06 p1142 A70-17892

Correlations between 100 percent inspection by automatic equipment and quality control acceptance sampling in vacuum tube industry

06 p1077 A70-17986

Dynamic simulation parameters for sphere drag coefficient data correlation in near free molecular flow

06 p0983 A70-18374

Centripetal acceleration tolerance level correlated with circulatory system functional tests and physical exercises, discussing strength and speed endurance

07 p1201 A70-18787

Lunar surface samples characteristics correlation with terrestrial igneous rocks /basalts/ and eucrite meteorites based on alpha scattering analysis

07 p1380 A70-19203

Time block pooling of atmospheric noise data, basing randomness conclusion on observations correlation

07 p1236 A70-20161

Aircraft roll rate response and aileron step input matching in terms of modal parameters with flight test records by analog computer program

08 p1465 A70-20781

Aged Al-Cu alloys hardness test data normalized and correlated for interpretation in terms of physical metallurgy

08 p1525 A70-21967

Earth resources satellite TV cameras operating on different spectral bands, discussing data preprocessing for correlation with topographic maps

09 p1674 A70-22259

Geogravitational field correlations to geomagnetic fields emphasizing displacements in longitude
09 p1667 A70-22381

Earth Resources program automatic data correlation system noting lower cost, faster processing, un-degraded imagery and compensation for vehicle perturbations and terrain relief
[AIAA PAPER 70-323] 09 p1667 A70-22864

Astronomical high resolution radio interferometers design with autonomous reception, analyzing sensitivity of data processing correlation devices
09 p1647 A70-23132

Balancing method for correcting mathematical model discrepancy with gas turbine based on test data
10 p1930 A70-24289

SID observed as VLF phase anomalies correlated with solar microwave radio bursts
10 p1933 A70-24816

Aerial and ground UHF noise measurement in Phoenix area, correlating air and ground data
[AIAA PAPER 70-437] 11 p2001 A70-25480

Optical and radio homologies of solar flares, studying correlation from astronomical telescope pictures
11 p2105 A70-25747

Small scale and full scale wind tunnel and flight test data correlated for Lear jet aircraft
[SAE PAPER 700237] 11 p1981 A70-25906

Solar wind correlation with geomagnetic activity, comparing Vela 3 and 4 observations with Mariner 2 measurements
11 p2105 A70-26075

Tactical air defense multiple site tracking data correlation equation to select gate sizes
11 p2009 A70-26263

Cosmos 137 proton spectra data obtained in inner radiation belt agreeing with Relay 1 data
11 p2106 A70-26786

Nonimaging remote sensor data display in spatial registration with ground scene to determine sensor bore-sight position accuracy
12 p2229 A70-26940

Maximum oxygen uptake correlation to age of subjects performing physical and sedentary work
13 p2350 A70-29112

Real time signal processor for correlation and spectrum analysis, displaying results on cathode ray oscilloscope
13 p2370 A70-29817

Balloon flight measurements clarifying Arcasonde sensor bias over radiosonde atmospheric temperature data
14 p2585 A70-30570

Positive correlation between normal ionizations at magnetically conjugate regions in ionospheric F 2 layer from aircraft vertical soundings
14 p2575 A70-30825

Magnetic activity intensity comparison in Northern and Southern hemispheres, noting correlation with solstices and equinoxes
14 p2580 A70-31260

Pioneer 8 wave and particle observations correlation showing broadband wave levels reduction during extended geomagnetic tail crossings
15 p2727 A70-31904

F region electron density profiles interpretation by electron balance equation facilitating comparison of aeronomic and ionospheric data
15 p2731 A70-32091

Plane strain stress intensity factor-Charpy V notch impact test correlations in transition temperature range under slow bend and dynamic loading
15 p2759 A70-32244

Intensity correlations in optical parametric noise and second harmonic generation measured by two photon delayed coincidence counting
15 p2753 A70-32603

Electronic equipment reliability performance measurements during tests correlated to performance observed under field use
15 p2712 A70-32645

Cryogenic single tubes transient cool-down by liquid hydrogen, deriving film boiling heat transfer correlation
[AIAA PAPER 70-660] 16 p2998 A70-33621

Polymeric materials fatigue tests, investigating correlation between crack propagation and stress intensity factor
17 p3127 A70-34624

Laminar flow heat transfer in annuli, discussing correlation of local Nusselt numbers
17 p3197 A70-35545

Observation classification /image identification/ for two normal sets with common covariance matrix, investigating error probability asymptotic behavior
19 p3375 A70-37283

Low energy solar protons temporal and spatial variations in magnetosphere by data comparison from polar orbiting satellite and Explorers 33 and 34
19 p3494 A70-37486

Solar flare of 25 February 1969 ground observations comparison to satellite data, measuring magnetic fields, radio emission, sunspots, ionospheric effects, etc
19 p3513 A70-37497

Solar radio emission and optical features correlation, considering integral RF flux, spot groups, main spots and flocculi areas
19 p3521 A70-38553

Digital correlation system for stationary and nonstationary random processes, estimating mathematical expectations and cross- and autocorrelation function
20 p3594 A70-39920

Solar X-ray bursts correlation with H alpha flares and microwave bursts observed by Explorer 34 experiment
21 p3880 A70-40970

Site activation in saturated nucleate boiling tests involving various fluids boiled on transparent oxide coated glass surface, correlating site density data with surface temperature
21 p3948 A70-41202

Scintillation index correlation with mean wind velocity of jet streams
22 p4020 A70-43262

Temporal sequence correlation between surges and associated flares during solar cycle
22 p4095 A70-43265

Damage data comparison for vibratory cavitation and liquid impact on aluminum alloy, stainless steels and pure nickel
23 p4203 A70-43870

Heat transfer measurements compared in free flight and in hypersonic wind tunnel at similar Reynolds number and temperature ratios
[ICAS PAPER 70-06] 23 p4275 A70-44115

Superconducting magnet system design, operation and module tests, noting large and small coil systems performance data relationship
23 p4218 A70-44354

Cylindrical heaters in corresponding-states fluids, estimating film boiling heat transfer coefficients by correlation procedure using least squares expression
23 p4279 A70-44361

Dynamical and geometrical geodesy on European datum, comparing data from Doppler, laser and photographic satellite measurements
24 p4312 A70-45544

DATA HANDLING SYSTEMS
U DATA SYSTEMS
DATA LINKS

Multipath spectral and statistical characteristics in VHF satellite-aircraft link, discussing geometric considerations and reflection from Gaussian surfaces
02 p0259 A70-12565

Design methods for self steerable antenna arrays in unidirectional and two directional radio links
03 p0456 A70-13196

PCM signal transmission testing over radio links with two level phase modulation
03 p0452 A70-14282

Low noise amplification equipment for telecommunications, considering France-Portugal link parametric amplifiers
05 p0819 A70-15983

Optimal design of tropospheric scatter radio link between two localities, investigating power, antenna, diversity, frequency deviation and equipment
05 p0814 A70-16361

High gain paraboloidal reflector antenna with horn feed for satellite and terrestrial microwave links
06 p1022 A70-18022

International data exchange guide for solar-terrestrial physics, including listing of stations active during International Years of Active Sun
07 p1377 A70-18937

Noise mean duration in surface communications links due to communications satellites interference, discussing irradiation emission and termination
08 p1456 A70-20570

Laser and quasi-laser systems modulation for wide spectrum communications, discussing global potentials and application as low cost satellite links
08 p1459 A70-20802

White noise and nonlinear effects in telemetry RF links, analyzing received process to phase coherent receiver
08 p1460 A70-20823

Signal properties of VHF satellite-to-aircraft communications link, discussing results of ATS tests
08 p1463 A70-21779

TV network distribution in Canada by communications satellite and terrestrial microwave links, discussing signal to noise ratios and picture quality
[AIAA PAPER 70-430] 11 p1998 A70-25417

Satellite video-telephone systems promoting economic growth in developing nations through linkage with developed nations advanced centers
[AIAA PAPER 70-474] 11 p2000 A70-25455

Satellite system for air traffic control providing data links for aircraft position determination for U.S. in 1990s using 24-hour inclined elliptical orbits
12 p2270 A70-27926

Earth resources satellite real time wideband relay communication link to ground station
[AIAA PAPER 70-326] 13 p2368 A70-29614

Injection laser communication link for high data rate transmission, discussing design and construction of transmitter and receiver
16 p2862 A70-33139

Deep space optical communications link, fabricating operational prototype of flight hardware for spaceborne terminal
16 p2863 A70-33190

Time ordered system for air traffic control providing data link, collision avoidance and navigation data through single channel
16 p2948 A70-33476

GaAs injection lasers for optical communication, synthesizing high bit rate data link between synchronous relay satellites
16 p2865 A70-33710

Communication satellite UHF link with FSK or PSK modulation, considering coded digital transmissions
16 p2867 A70-34331

Optical communications in space, considering multiple access low earth orbit-to-synchronous and synchronous-to-synchronous links
19 p3379 A70-37878

Millimeter wave propagation measurements by ATS-5 satellite, observing attenuation dependence on meteorological parameters for communication data link performance prediction
20 p3589 A70-40311

Space-to-ground link wideband digital laser communications system design and performance tests
21 p3787 A70-41331

Carbon dioxide laser systems for various space communication links between ground, satellites and Mars probe
21 p3787 A70-41338

ATC data link communications system speeding information flow between controller and pilot
21 p3789 A70-41348

Millimeter wave high gain Cassegrain antenna for wide bandwidth data link between communications satellites, obtaining accurate parabolic contours
21 p3799 A70-41359

High level parametric upconverter for radio link using evanescent mode waveguide
22 p3997 A70-42925

Earth resources technology satellite data link tradeoff between channel capacity and transmitter power
22 p4038 A70-43091

Queueing requirements in automatic radar target detection system operating with narrow bandwidth data link
22 p3990 A70-43489

Optimal two-way communication system with feedback and decision constraint, developing algorithm for random code reliability lower bounds
23 p4159 A70-43754

Global rescue alarm net /GRAN/ using satellites for relaying distress signals, eliminating current line of sight restrictions
23 p4143 A70-44455

Digital PCM telemetry link coding techniques, discussing encoding-decoding complexity, and concatenated block scheme for channel
24 p4315 A70-46258

DATA PROCESSING
NT DATA CORRELATION
NT DATA REDUCTION
NT DATA RETRIEVAL
NT DATA SMOOTHING
NT DATA STORAGE
NT OPTICAL DATA PROCESSING
NT SIGNAL ANALYSIS
NT SIGNAL PROCESSING
NT VOICE DATA PROCESSING

Data acquisition methods and position in data processing with respect to time and quantity requirements
01 p0047 A70-10260

Aerospace digital computer design development, proposing data processing system with improved flexibility by making subassemblies more independent with multiplexed interface
01 p0047 A70-10305

Data analysis of inertial systems for commercial aircraft overseas operations, classifying systems error propagation as linear time drift or Foucault period oscillation
01 p0137 A70-10314

Communications subsystem configuration for orbital manned space station, describing data rates and processing, multiplexing and associated modulation methods
[AIAA PAPER 69-1079] 01 p0043 A70-10627

Fourier transform applied to power spectral distribution determination for two dimensional Fraunhofer holographic data of thin spherical lenses
01 p0090 A70-10907

European Space Operations Center activities in observing HEOS 1 satellite, discussing launch, data processing and S-11 experiment involving ionized Ba cloud creation
01 p0197 A70-11118

Line length effects on sequential blanking in visual perception demonstrated by computer-based CRT display and interpreted with information processing model
01 p0039 A70-11164

Operational planning system for Strategic Air Command for data accessing, generating, displaying and editing using computer complex

01 p0048 A70-11282

Doppler observations of D1 A satellite, discussing dispersion of data, mean point displacement and resonance harmonics

02 p0362 A70-11756

Radar primary plot extraction, suggesting signals summing technique in delay line

02 p0256 A70-11975

Unified Flight Analysis System processing post-flight data from Saturn 5 launches, discussing system components, support programs and performance

02 p0264 A70-12127

Omega position location equipment /OPLE/ experiment data analysis, obtaining quantitative measure of statistical performance of system

02 p0336 A70-12180

Associative processor with content addressability and simultaneous arithmetic capability to circumvent speed restriction, comparing performance and cost with conventional digital computer

02 p0265 A70-12186

Automatic inspection data collecting and processing by human operator using display devices and computerized mathematical reduction for real time evaluation

02 p0266 A70-12469

Remote data processing and wideband data transmission between France and U.S. via telecommunication satellites, discussing error detection and correction

02 p0263 A70-12612

Synthetic aperture airborne side-looking radar using coherent optical data processor, discussing system configuration and operation

02 p0263 A70-12632

Turbojet performance magnitude data represented by components nondimensional characteristic curves

03 p0551 A70-13021

Meteorological data processing computer center of German Weather Service, discussing equipment, data system, forecasting techniques and prediction control

03 p0454 A70-13171

Creep rupture data processing by computer, performing data collection and processing separately

03 p0487 A70-13569

Surveyor TV camera conversion from qualitative viewing device into quantitative measuring instrument by calibration coupled with data processing program

03 p0490 A70-13662

Remote sensing system for earth resources surveys temporal information employing human interpreter and machine for spatial and spectral data processings

03 p0491 A70-13668

Ground stations and low orbiting satellite system for automatic collection of meteorological data over Italy

03 p0581 A70-13832

Cockpit information transfer between pilot and flight control information displays improved by on-board data processing system

03 p0436 A70-14021

Memory volume necessary to store intermediate data estimated for group processing from dependent Poisson information sources

04 p0661 A70-14552

Computer method to combine autofluorescope data to produce three dimensional display of absorbed radioactive material from multiview images

04 p0686 A70-14563

Earth resources satellites capabilities and requirements emphasizing orbit parameters, remote sensing, data handling and telemetry systems

04 p0760 A70-14642

Spaceborne computer system for manned space station to perform functions in addition to guidance and navigation including processing

04 p0654 A70-14651

Integrated flight test data acquisition and processing system with real time graphic display, discussing ground station function

05 p0793 A70-15867

Multichannel ionization calorimeter data readout into electronic computer using short circuit coil magnetic storage

05 p0816 A70-15947

Z term from astronomical latitude data compared with catalog error corrections, showing nearness to absolute star system

05 p0907 A70-16030

Optical, digital and hybrid image processing techniques with objectives of image enhancement and replacement

05 p0847 A70-16121

Radar and sonar data processing for display in command and control systems using digital technique, discussing processor configuration

05 p0828 A70-16189

Ocean surface roughness time variation effect on incident laser beam, analyzing motion picture data by computer program

05 p0860 A70-16687

Riometric data processing method for radio wave absorption measurement, considering nighttime cosmic radio emission intensity

05 p0842 A70-16742

Worldwide Apollo data transmission network emphasizing computer operations for message collection and distribution, command and telemetry processing, etc

06 p1005 A70-17310

Color CRT system to display engineering data based on real time analysis, discussing performance requirements

06 p1061 A70-17349

Atmospheric tides influence on meteors characteristics from processing observation data

06 p1140 A70-17736

Grouping method estimation of statistical data during hydrometeorological information processing to calculate essential data for distribution curve judgement

06 p1096 A70-17786

Optimal timing of measurements to minimize dispersion of navigational observation parameters by least squares method applied to Keplerian orbit elements

06 p1103 A70-17878

Differential game with opponent receiving information on phase coordinates of adversary with delay caused by reception and processing procedures

07 p1244 A70-18718

Methodologies inadequacies for studying information processing rate in visual perception

07 p1203 A70-18943

Oblique ionospheric sounder automatic data analysis by computer programs, analog to digital conversion, magnetic tape data recording, signal detection, pattern recognition, etc

07 p1234 A70-19185

Optimal photometric data processing for planetary characteristics and surface details, considering errors due to image blurring in telescope

07 p1384 A70-19419

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

07 p1268 A70-19460

Indirect methods of trajectory optimization, improving convergence through normalization of state data and Lagrange multipliers

07 p1326 A70-19726

Divided attention utility for monitoring information processing during encoding, retention and recall of words

07 p1224 A70-20047

Phased-array radars and parallel processing computers system in high target density environment, input-output, array steering and data storage and handling

07 p1236 A70-20150

Martian surface radar observation results, discussing data processing method, backscattering behavior evaluation, relief and composition model, etc

08 p1456 A70-20643

Soviet collection of papers on apparatus for meteorological measurements covering error analysis, reliability engineering, use of computers, etc

08 p1494 A70-20771

Matching operations for difference and differential equations describing discrete control systems dynamics having cyclic interruption of data quantization frequency

08 p1480 A70-20999

Turbulent transfer mechanism in atmospheric surface layer, analyzing micrometeorological data for flux-gradient relationships, relating turbulent scale to eddy diffusivities

09 p1712 A70-22051

Telemetry data processing of Eole scientific weather forecasting program, discussing mathematical model simulating atmospheric circulation in Southern Hemisphere

09 p1674 A70-22200

Earth resources satellite TV cameras operating on different spectral bands, discussing data preprocessing for correlation with topographic maps

09 p1674 A70-22259

Human factors data standardization in NASA Apollo Applications Program for computer data processing

09 p1623 A70-22295

Neural information processing taking into account differences between living brain and artificial processor

09 p1617 A70-22496

Quality information equipment engineering including specifying, development, design, procurement, construction, installation, checkout, etc

09 p1792 A70-22569

Fluidic logic components for automatic data processing, describing circuits designed to solve specific problems

09 p1612 A70-22771

Earth resources satellite imagery processing techniques, discussing sensor and transmission link distortions, image quality and optical or digital approach

[AIAA PAPER 70-297]

09 p1677 A70-22852

Earth Resources Data Processing Center magnitude and facility planning compared with NASA centers

[AIAA PAPER 70-324] 09 p1793 A70-22863

Large scale aerospace data acquisition, processing, handling and dissemination systems analysis and design

[AIAA PAPER 70-322] 09 p1641 A70-22865

Data management functions of National Space Science Data Center /NSSDC/, discussing data processing and information system for secondary usage

[AIAA PAPER 70-320] 09 p1641 A70-22866

Multispectral point scan camera system as remote sensor for Earth Resources Satellite, noting real time automatic data processing and interpretation

[AIAA PAPER 70-319] 09 p1677 A70-22867

Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data channel efficiency, etc

[AIAA PAPER 70-309] 09 p1668 A70-22878

Coastal areas remote sensing instrumentation and techniques, discussing data handling and analysis and ground verification of color and multispectral imagery

[AIAA PAPER 70-299] 09 p1669 A70-22885

Multidiscipline applications for Earth Resources Satellite data, including data simulation and interpretation techniques

09 p1669 A70-22886

Information extraction efforts using imaging sensors on earth resources satellites compared to data processing for environmental satellite imaging sensors

[AIAA PAPER 70-284] 09 p1669 A70-22894

Hybrid computer for decision-directed estimators of two-class decision boundary, noting applications to medical diagnosis, communications and pattern recognition

09 p1641 A70-22965

Astronomical high resolution radio interferometers design with autonomous reception, analyzing sensitivity of data processing correlation devices

09 p1647 A70-23132

Human operator transinformation sensitivity to display gain and forcing function bandwidth in rate control tracking task

10 p1823 A70-23896

Geophysical measurement curves mechanical transformation by digitizing curve on punched tape followed by processing in computer

10 p1845 A70-24494

Pattern prerecognition processing for multiobject pictures, describing illumination, contour and curvature computation

10 p1845 A70-24659

Information processing stages by reaction time measurements permitting discovery, property assessment and separate testing of stage durations additivity and stochastic independence

10 p1826 A70-24723

Remote sensor input radiation at aperture, signals within and sensed data processing by computer techniques, noting automatic image interpretation

10 p1841 A70-24733

Airborne remote sensing automatic data processing for forest identification through pattern discrimination, utilizing power spectrum analysis

10 p1878 A70-24734

Group Method of Data Handling based on heuristic self organization for solving complex system problems, with applications to random processes prediction

10 p1845 A70-24869

Optimal data filtering techniques and hardware for centrifuge testing of missile inertial platforms

[AIAA PAPER 70-405] 10 p1861 A70-24901

Nonavionics Aircraft Integrated Data System configurations evaluation by computer model, showing cost effectiveness data in terms of aircraft maintenance and availability

[AIAA PAPER 70-396] 10 p1808 A70-24909

Eye-ball technique smoothing procedure discarding wild data points using minimum computer time for automatic treatment of digitally sampled test data

[AIAA PAPER 70-386] 10 p1861 A70-24919

Helicopter flight test and evaluation tools including data processing facilities to improve test validity

[AIAA PAPER 70-373] 10 p1806 A70-24929

Ionospheric fine structure from ionograms, discussing probe and half automatic digital evaluation method

10 p1884 A70-25257

Nimbus high resolution IR radiometer /HRIR/ data processed by color display enhancement system, demonstrating meteorological, oceanographic and geomorphological applications

11 p2049 A70-25636

SAFEGUARD ballistic missile defense radars, discussing terminal defense concept, data processing system and microwave components

11 p2005 A70-26162

Automatic input data generation for finite element method using algorithm based on complex geometrical configurations topological classification in terms of natural coordinates

[JPL-TR-32-1486] 11 p2144 A70-26678

Preprocessing data transformations for multispectral recognition mapping, reducing difficulties due to variations in environmental, observational and sensor conditions

12 p2220 A70-26935
Earth resources satellite ground data handling system providing initial processing, reproduction, indexing, storage, retrieval and dissemination functions

12 p2191 A70-26943
Automatic air transportation passenger handling and postflight financial and statistical data processing

12 p2335 A70-27016
Bayesian probabilistic information processing in psychological decision making in air traffic control, discussing bookbag and poker-chip applications

12 p2178 A70-27047
Discrete sequential algorithms for bit synchronization implemented with digital computer for optimum data detection

12 p2184 A70-27249
ATC data processing requirements for higher automation level in terms of computer instruction rate and storage

12 p2267 A70-27638
Radar beacon target processing system providing ATC information, noting target detecting and locating ability in noisy environment

12 p2268 A70-27640
ATC data processing requirements based on projected traffic growth

12 p2268 A70-27910
Automatic image interpretation and classification - Conference, Pisa-Tirrenia, Italy, August-September 1968

12 p2193 A70-28101
Regular and irregular line-drawing data processing, discussing quantization and encoding methods

12 p2193 A70-28104
Image processing, considering sampled data methods applied to two dimensional data

12 p2193 A70-28107
Methodology for machine processing for identification of individual crop types, discussing discriminant photoanalysis

12 p2227 A70-28108
Spaceborne information processing for manned missions, describing layered system with fault tolerance and onboard checkout

13 p2372 A70-28415
Onboard satellite information processing systems for bandwidth compression using digital filters and error correcting coding

13 p2381 A70-28431
Leonid meteor shower radar observation data, analyzing flux rates and particle size distribution

13 p2487 A70-28694
Soviet book on discrete system for measuring multivariable probability distributions, covering automatic acquisition and reduction of statistical data

13 p2381 A70-28700
Spacecraft based data processing stages to perform navigation during outer planet missions

13 p2448 A70-28704
Hybrid computing techniques for solving parabolic and hyperbolic partial differential equations, discussing serial method accuracy and use of parallel logic for integrator control

13 p2373 A70-29461
Solar probe Helios data processing and transmission system, describing block diagram, PCM/PSK/PM telemetry and transmitter

13 p2367 A70-29558
EEG data automatic classification using discriminant analysis

13 p2360 A70-29627
Time shared computer system providing real time service to multiple laboratory instrumentation, discussing high speed channel, computer control and data abstracting techniques

13 p2375 A70-29830
Analog computer methods applied to aerospace dynamic test data analysis and high speed screening [AIAA PAPER 70-595]

13 p2375 A70-29880
Berkeley array processor /special purpose digital computer/ for correlation, convolution, recursive filtering, matrix multiplication, etc

13 p2376 A70-29941
Price estimate elements interrelationship using three dimensional matrix for computerized cost data extraction

14 p2668 A70-30524
Wind gust data analysis for spacecraft design using power spectrum approach

14 p2607 A70-30580
Electronic systems automatic design problems including man machine communication and data organization

14 p2554 A70-30663
Weibull distribution as statistical method for interpreting fatigue test data

14 p2656 A70-30700
Real time Apollo lunar module thermal mission data analysis using computer programs

14 p2653 A70-30774

People as conservative processors of fallible information, treating stationary data generating process as nonstationary

14 p2537 A70-30898
Approximating hazard rate function parameters estimation from failure data, using computer program

14 p2592 A70-31113
Electronic systems for high speed photography, noting application to data processing and storage

14 p2589 A70-31402
Measuring apparatus for cyclic plastic strains at high temperatures, discussing data processing techniques

15 p2733 A70-31538
Wind field reduction from satellite cloud structure data

15 p2770 A70-32066
Reduction constants simultaneous determination in earth figure theory based on astronomical, geodetic and gravimetric data

15 p2731 A70-32147
Pattern recognition procedure for electronic systems data classification

15 p2706 A70-32566
Interrelated computer programs and comprehensive parts data bank /REACT/ for reliability assurance analysis

15 p2706 A70-32654
System failure rate estimation as function of age using incomplete field reliability data

15 p2748 A70-32660
Regularization techniques for optimal control problems in polynomial algorithms of data handling by groups

16 p2867 A70-33236
Parallel associative unstructured element computer design for real time radar track data processing

16 p2869 A70-33466
Display-control relationships in visual display information processing, considering spatial incompatibility effects on reaction time

16 p2852 A70-33661
Computers - AFIPS Conference, Atlantic City, May 1970

16 p2870 A70-33730
Onboard automatic checkout systems for manned space vehicles, investigating data management development costs for thorough tradeoff studies

16 p2889 A70-33803
Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites

16 p2871 A70-34313
Computerized air transportation service including passenger name record, fare quotation, ticketing, etc

17 p3199 A70-34688
Airborne flight test data acquisition and ground based automatic bulk data processing system for helicopter test and development programs

17 p3014 A70-34713
Real time data processing and display for spacecraft thermal vacuum testing, using hybrid computer

17 p3059 A70-35176
Successful application development and implementation of data processing system, noting sequence, magnitude, manpower and time required

17 p3200 A70-35507
Multichannel time marker network synthesis device for physiological data assembly, transformation and processing, generating pulses

18 p3223 A70-36083
Associative processor concept for air traffic control, discussing tracking and correlation problem

18 p3288 A70-36392
Data processing system for automatic air traffic control, describing hardware and software

18 p3288 A70-36395
Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

18 p3250 A70-36934
Management information systems based on Apollo program experience, considering improvements in data accuracy, display, feedback, etc

19 p3553 A70-37862
Airborne integrated data system /AIDS/ for accepting, processing, recording and displaying aircraft systems data, describing installation and design criteria

19 p3382 A70-37895
Logic, arithmetic, control and instruction capacities of dedicated onboard telemetry preprocessor

19 p3383 A70-37904
Rocket engine tests dynamic data oscillographic presentation and digital processing

19 p3490 A70-37916
Automatic gain ranging amplifier for high speed digital computer controlled data acquisition system used to process input data levels

19 p3383 A70-37919
Automatic ATC with feedback, describing information processing and flight plan algorithm

19 p3464 A70-38161

Soviet papers on physiological data collection and analysis methods

19 p3369 A70-38206
Flight test and airborne data recovery and processing, discussing data format, recorder characteristics, ground equipment and time requirement

19 p3429 A70-38517
Jaguar flight test data processing system, discussing airborne digital computer

19 p3384 A70-38536
Digital computer magnetic tape recording system for flight tests of Jaguar aircraft, discussing data treatment

19 p3384 A70-38537
Ground station to retrieve and process data recorded on airborne digital magnetic tape instrumentation system for Hawker Siddeley Harrier flight development

19 p3384 A70-38550
ATC simulation at EUROCONTROL Experimental Center, discussing dynamic simulator, data processor and display

19 p3468 A70-38638
Digital extraction of primary and secondary radar data for air traffic control

19 p3469 A70-38644
Signal automatic air traffic control system /SATCO/ for flight plan processing, using multi-processing real time computer, electronic displays and software facilities

19 p3469 A70-38646
Hydrometeorological information processing using ALGOL-60 translator language

19 p3463 A70-38759
RAMMIT /reliability and maintainability management improvement techniques/ for processing maintenance data relevant to Army aircraft operations and support

19 p3441 A70-38826
Pulse coding system for average evoked EEG potential data acquisition and analysis, describing pulse generation circuitry and computer implemented logic

20 p3578 A70-38985
Earth resources ground data processing in image formats from sensors in aerospace platforms, discussing collection control, image storage, retrieval, etc

20 p3591 A70-39058
Data processing for Earth Resources Satellite users, investigating partitioning and mosaicking

20 p3591 A70-39059
Algorithms for processing of cosmic ray data monitored by space station with multichannels for neutron and meson components recordings

20 p3698 A70-39309
Real time kalman filtering of Apollo LM/AGS rendezvous radar data [AIAA PAPER 70-957]

20 p3600 A70-39572
Random values analog sensors classification based on physical, algorithmic and data reproduction techniques

20 p3593 A70-39917
Earth resources observation satellite program and organization for acquiring, processing, utilizing and disseminating remote sensor data

20 p3741 A70-39944
Automatic calculations for fuel volume mass properties in tanks at various angles of attack, considering total weight, gravity center moment and inertia product [SAWE PAPER 850]

20 p3563 A70-40376
Papers on information science and technology covering computerized retrieval, automatic indexing, selective dissemination, etc

21 p3955 A70-40894
Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data, channel efficiency, etc [AIAA PAPER 70-309]

21 p3829 A70-41851
Model for human brain visual information processing networks, considering visual search, selection, storage, correlation, recognition and recall functions

22 p3977 A70-42287
Data handling and processing methods for non-destructive test data translation and interpretation, using scanning test model

22 p3993 A70-42588
Kalman filters for data mixing in optimally aided inertial navigation systems

22 p4067 A70-42661
Spectral signature recognition for automatic interpretation of earth resources multispectral data

22 p4037 A70-43088
Radar information digital processing, deriving criterion for automatic lock-on of target trajectories

22 p3991 A70-43552
Information processing methods in microwave measurement using digital computers, emphasizing active and passive transducers

23 p4193 A70-43795

Data acquisition and processing in structural modal characteristics analysis during ground resonance tests [ICAS PAPER 70-36] 23 p4267 A70-44133

Data management functions of National Space Science Data Center (NSSDC), discussing data processing and information system for secondary usage [AIAA PAPER 70-320] 23 p4285 A70-44514

Scientific/technical information collection, retrieval and dissemination, discussing organization, employment of technical/scientific expert personnel and use of modern data processing equipment 23 p4286 A70-44670

Automatic Data Processing and Display System for ATC over Belgium, Holland and Germany, relieving traffic controller routine tasks 23 p4216 A70-44860

Pattern recognition system design, discussing criteria and algorithm for grouping multivariate data without supervision 24 p4316 A70-45103

Digital frequency filter for data processing 24 p4318 A70-45435

Information theory in physics and engineering, considering data processing, error correction codes, space communication, optical data transmission, noise effects and holography 24 p4379 A70-45616

Onboard digital information processing, discussing applications to tactical missile guidance and manned vehicles [AIAA PAPER 70-1230] 24 p4317 A70-45976

Sapuc-Salut system for evaluating test data measured onboard Viggen aircraft 24 p4339 A70-46229

Upper Air Space Control Center Automatic Data Processing and Display System for air traffic control 24 p4323 A70-46238

U DISPLAY DEVICES

DATA RECORDERS

Automatic universal-code digital data recorder for photogrammetric measurements 03 p0483 A70-13110

On-line system transmitting experimental data from optical spectrometer to central computing facility for magnetic tape recording 05 p0818 A70-16846

Versatile recorder for experimental studies with differing requirements 07 p1283 A70-19670

Flight test and airborne data recovery and processing, discussing data format, recorder characteristics, ground equipment and time requirement 19 p3429 A70-38517

DATA RECORDING

UV sensitive spiropyran films coloration mechanism and color structure stabilization, discussing film and laser applications to optical data recording and storage 01 p0086 A70-10357

Digital computer for data recording in stress-strain curves and data points for mechanical tests 01 p0058 A70-11062

Flight data recorders, examining present systems and planned improvements 02 p0302 A70-12621

Slitless system using interference filter, fixed Fabry-Perot etalon and automatically controlled etalon for recording spectral information for efficient light detection 04 p0685 A70-14523

Scientific equipment on Cosmos 237 satellite for recording extraterrestrial radiation data, discussing specifications, operation and mission purpose 05 p0851 A70-16733

Solar radio bursts time-variable structure at 12 M wavelength recorded on Ediswan pen oscillograph 06 p1144 A70-18005

Holographic recording of information contained in evanescent wave fields in high resolution photographic emulsions 07 p1281 A70-19367

Harmonic ion cyclotron resonances associated with proton whistlers observed from OGO-4 satellite VLF recordings 07 p1268 A70-19630

Holograms in thick absorption recording media in terms of diffraction efficiency, angular orientation and wavelength sensitivities 07 p1287 A70-20093

Display objectives and relationships to recording techniques examined for memory/display system, considering requirement for elastic erasing technique 08 p1467 A70-21761

Duplex schlieren optical system with one channel for data recording and second channel for visual monitoring 09 p1687 A70-23766

Recording nonlinearities effect on image reconstruction from hologram of diffuse object 11 p2050 A70-25641

Atmospheric hydrogen content continuous recording method based on absorption line analysis of mercury vapor from mercuric oxide reduction 11 p2052 A70-26389

Automatic engine maintenance recording system on air transport aircraft noting data reduction [SAE PAPER 700317] 12 p2335 A70-27456

Mesoscale stratospheric turbulence recording using even activated memory recorder 14 p2573 A70-30578

Visual observation, free space traversal, accelerometry and telemetry for measuring and recording human behavior, discussing free space-time traversal data logging system 14 p2542 A70-30794

Automatic recording respirometer for industrial wastes, discussing design and advantages 14 p2543 A70-31164

Damped vibrations logarithmic decrement determination during automatic recording of number of cycles, emphasizing error analysis 15 p2733 A70-31531

Level quantization in time compression systems using storage devices with small dynamic range of recorded signals 15 p2733 A70-31578

Automatic profile measurement and recording, describing equipment and techniques 15 p2742 A70-32777

Semiautomatic ionospheric absorption recorder, describing components circuitry and operation 16 p2915 A70-34223

Holographic velocity data recording (velocimetry), discussing axial resolution enhancement by spherical wave illumination 19 p3423 A70-37859

Digital flight data recording, considering aircraft integrated data systems (AIDS) 19 p3426 A70-37892

Economic payback of AIDS (Aircraft Integrated Data System)/ recording for operational performance monitoring and engine analysis 19 p3382 A70-37894

Flight data acquisition methods standardization, discussing digital recording modes and formats and hardware rationalization 19 p3429 A70-38515

Boeing 747 transport airplane flight test data system, discussing recording media, major PCM and FM tape systems, etc 19 p3431 A70-38531

Concorde prototype 002 flight test data recording instrumentation, emphasizing digital system for quasi-static parameters 19 p3432 A70-38545

Magnetic tape instrumentation system installed aboard Hawker Siddeley Harrier for flight development, discussing digital format recording system 19 p3384 A70-38549

Five-channel azimuthal underground cosmic ray telescope using proportional counters suitable for continuous recording 20 p3629 A70-39312

Tensile test device for continuous recording of sample load and strain 20 p3728 A70-40000

Ionospheric layers critical frequencies recording, using automatic interplanetary station type probe 23 p4194 A70-44088

Image orthicon detection and recording system adapted for spectroscopic measurements in shock tube emission studies 23 p4197 A70-44469

ITOS-1 second generation meteorological satellite launched with Delta N booster, providing direct APT global readout and AVCS TV data recording for playback 23 p4259 A70-44615

Automated ultrasonic testing and facsimile data recording systems, discussing aerospace, marine and automotive applications 24 p4343 A70-45692

DATA REDUCTION

NT DATA SMOOTHING

Data analysis of inertial systems for commercial aircraft overseas operations, classifying systems error propagation as linear time drift or Foucault period oscillation 01 p0137 A70-10314

Stony meteorite trace elements groups neutron activation analysis with computer reduction of Ge/Li spectra 02 p0249 A70-11680

Unified Flight Analysis System processing post-flight data from Saturn 5 launches, discussing system components, support programs and performance 02 p0264 A70-12127

Multidimensional data efficient decomposition for communication interface between man machine system, considering decision making and pattern recognition on digital computers with orthogonal transformations 02 p0265 A70-12149

Omega position location equipment (OPLE)/ experimental data analysis, obtaining quantitative measure of statistical performance of system 02 p0336 A70-12180

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis

03 p0482 A70-12967

Time sharing computer systems for data reduction from semiconductor strain gauges applied to FORTRAN IV programs

03 p0453 A70-12969

Mesoscale rawinsonde network for convective process resolution, describing reduction and analysis techniques for thunderstorm wind, temperature and moisture data

03 p0521 A70-13165

Earth satellite tracking data reduction for determining geodetic ground nets, examining errors in triangulation procedures

03 p0445 A70-13184

Gravimetric and satellite tracking data reduction for determining coefficients in mathematical expansion representing earth gravitational field

03 p0473 A70-13189

Photometric reduction of Lunar Orbiter video magnetic tapes for generation of topographic information of proposed Apollo landing sites

03 p0490 A70-13661

Equatorial magnetosphere particle and field data from 18 April 1965 geomagnetic storm reanalyzed in context of drift mirror instability theory

03 p0560 A70-13976

Analog techniques for pulse integration based on sonograph audio spectrum analyzer for pulsar observation by radio telescopes near Hobart, Tasmania

04 p0655 A70-14520

Radar data parameter determination method, discussing false alarm calculation

05 p0811 A70-15988

Diagram compression by spatiotemporal coding of antenna array fitted with phase shifters

05 p0811 A70-15989

Adaptive multiparameter experiment for iterative minimization of investigated data points, based on human response pattern to psychophysical inputs

05 p0805 A70-16006

STRIDA II consoles operation for treating air defense data, discussing data display system, work positions organization and console construction method

05 p0828 A70-16192

High resolution Venus spectra, obtaining band spectra growth curve of C13016018 isotope of carbon dioxide, comparing data reduction methods

05 p0910 A70-16392

Brightness distribution over source, discussing regularization algorithms for radio astronomical data reduction from crossed telescope

05 p0917 A70-16902

Response characteristics of height-based and time-based wind reduction techniques for meteorological rocketsondes

05 p0879 A70-17101

Optimum compression ratio defined for Markov sources for compression algorithm efficiency and data compression schemes

06 p1013 A70-18624

Data reduction from DIA satellite VHF and UHF Doppler measurements to attempt geodetic link between Nice and Beirut

07 p1262 A70-18941

Oblique ionospheric sounder automatic data analysis by computer programs, analog to digital conversion, magnetic tape data recording, signal detection, pattern recognition, etc

07 p1234 A70-19185

Servo systems for analog automatic reduction of time dependent photomechanical model materials fringe data in stress analysis

07 p1286 A70-20040

Turbulent transfer mechanism in atmospheric surface layer, analyzing micrometeorological data for flux-gradient relationships, relating turbulent scale to eddy diffusivities

09 p1712 A70-22051

Automatic spectral data reduction and analysis system consisting of densitometer, analog-digital converter and IBM 1800 process computer with magnetic disk memory

09 p1629 A70-22765

Earth resources remotely sensed data analysis with emphasis on machine analysis over manual photointerpretation, discussing pattern recognition techniques, information systems, etc

09 p1678 A70-22891

Time averaging and length of record effects on horizontal wind speed variance, determining maximum wind gusts as function of height and averaging time

10 p1909 A70-23928

Perceptual selection and integration of sensory data conveyed to brain, explaining various optical illusions

10 p1827 A70-24766

Satellite photographic plate reduction - COSPAR Conference, Prague, April 1968

11 p2006 A70-26179

Stars identification on photographic plates and position computation in FORTRAN, using CONTROL DATA 6600 and IBM 1130 computers

11 p2113 A70-26183

Reduction of satellite photographic data using transformation functions

11 p2007 A70-26186

Satellite observations reduction, determining continuous transformation over whole field of photograph by local transformations

11 p2007 A70-26187

U.S. Coast and Geodetic Survey satellite triangulation data reduction methods, discussing data acquisition system, plate preparation, etc

11 p2046 A70-26190

Passive satellite coordinates correlations to instants of observation in U.S.S.R. ground stations, reducing quasi-synchronous observations by interpolation

11 p2007 A70-26192

Plate reduction method for Schmidt satellite camera, considering satellite position, distortion parameters, etc

11 p2007 A70-26193

Photographic plate reduction method at Polish Academy of Sciences based on sufficient reference stars, correcting x and y coordinates

11 p2007 A70-26194

Film reduction and time keeping used at Smithsonian Astrophysical Observatory for Baker-Nunn films

11 p2007 A70-26196

Photographic reduction techniques at Meudon Observatory, discussing computation of standard and measured coordinates

11 p2007 A70-26197

Photographic satellite plates reduction by astrometric method at geodetic institute at Potsdam, discussing star coordinates, astronomic refraction, etc

11 p2008 A70-26200

Data compression for telemetry transmission with sample choice based on time-varying stream slope thresholds illustrated for Ranger photograph

11 p2010 A70-26305

Delta reprocessing operating system /DEPOS/ for high speed telemetry format-independent decommutation and data compression

11 p2010 A70-26307

High temperature fatigue tests of materials under uniaxial controlled strain, describing equipment, failure interpretation and data reduction

11 p2033 A70-26613

Radiophase and induced pulse transient /input/ remote sensor systems for geological mapping, describing data acquisition and reduction techniques

12 p2221 A70-26961

Nonlinear estimation with quantized measurements, applying algorithms to PCM, predictive quantization and data compression

12 p2192 A70-27420

Relative control data incorporation into sequential or simultaneous analytical triangulation systems, considering extraterrestrial photographs reduction

12 p2308 A70-27875

Skylark sounding rocket telemetry data reduction system providing attitude analysis

13 p2363 A70-28680

Soviet book on discrete system for measuring multivariable probability distributions, covering automatic acquisition and reduction of statistical data

13 p2381 A70-28700

Spaceborne logarithmic variable prescaling counters for automatic compression of particle measurement data, discussing statistical error

13 p2406 A70-28931

Integrated computerized data acquisition and reduction system for aircraft flight and wind tunnel tests

13 p2373 A70-29156

Random data analysis application to aircraft inlet diagnostics

[AIAA PAPER 70-597]

13 p2375 A70-29878

Analog computer methods applied to aerospace dynamic test data analysis and high speed screening

[AIAA PAPER 70-595]

13 p2375 A70-29880

Viper Dart Robin System high altitude data reduction program accuracy, discussing winds and density errors

14 p2606 A70-30566

Wind gust data analysis for spacecraft design using power spectrum approach

14 p2607 A70-30580

Weibull distribution as statistical method for interpreting fatigue test data

14 p2656 A70-30700

Ionospheric electron distribution by true height analysis of oblique incidence HF radio wave sounding data, applying to forward and ground backscatter

14 p2550 A70-30745

Real time Apollo PCM telemetry data compression and transmission using zero order predictor

14 p2550 A70-30768

Saturn rings observations during earth passage through ring plane by Abastuman observatory telescope, describing photometric processing and data reduction

15 p2797 A70-31619

Automatic numerical analysis of velocity information from Doppler effect ultrasonic blood flow meter

15 p2691 A70-31920

Data compression techniques, considering two dimensional image coding problem

15 p2705 A70-32558

On-line reduction of nystagmic data during vestibular bithermal caloric testing by analog technique

15 p2685 A70-32570

Hazard plotting methods for analyzing service life data with different failure modes

16 p2921 A70-34024

Ionospheric irregularities properties from San Marco 2 and BE-B satellites recordings, deriving height variation of irregularity size and occurrence

17 p3076 A70-34942

Static weight tare compensation for V/STOL wind tunnel models, using accelerometer outputs

17 p3062 A70-35500

Nonlinear least squares method reducing Burnett data to compressibility factors and virial coefficients

17 p3136 A70-35594

Dynamic system modeling pulse test data reduction by digital computer and functional approximation for Fourier transform calculations

18 p3230 A70-36458

Airlines data reduction using electronic engine maintenance recorders

18 p3259 A70-36853

Sample images division into teaching and checking sequences in pattern recognition problems, determining coefficients based on statistical properties of set

19 p3382 A70-37449

Signal spectral parameters for reducing VLF atmospheric data from analyzer observations

19 p3412 A70-37998

Data processing systems functions and composition for random data reduction during aircraft flight tests based on analog and digital techniques

19 p3430 A70-38524

Quasar red shift apparent magnitude data analysis, estimating deceleration parameter of universe

20 p3709 A70-40076

Airborne atmospheric turbulent flux measurement system with fast response wind velocity, temperature, humidity and aircraft motion sensors, discussing performance and data reduction

20 p3665 A70-40109

Nonlinear dynamic systems phase coordinate variations statistical characteristics, describing data reduction method

20 p3674 A70-40183

Two dimensional data array contour tracing algorithm for reduction of image coding bits number

21 p3786 A70-41327

Aircraft accident filing system data analysis using Fortran programs

22 p3962 A70-42880

Quantitative reduction of statistical nodes for nonlinear automatic control system with random noise, using minimal approximating polynomials

22 p4003 A70-42887

Spectral signature recognition for automatic interpretation of earth resources multispectral data

22 p4037 A70-43088

Fitting equations to mixture data by linear least squares method with restraints on compositions, using Scheffe polynomials

22 p4064 A70-43728

Multipurpose earth resource satellites design, emphasizing land use factors and data reduction problems

23 p4286 A70-45005

Model fitting procedure applied to lunar occultation data and models analysis for point sources, close binaries and resolvable stars

24 p4399 A70-45130

Plate overlap algorithm for photographic star catalog reduction

24 p4404 A70-45413

DATA RETRIEVAL

Automatic search for data in hydrology and meteorology, describing information search language development

14 p2602 A70-30141

Ground station to retrieve and process data recorded on airborne digital magnetic tape instrumentation system for Hawker Siddeley Harrier flight development

19 p3384 A70-38550

DATA SAMPLING

Supervisor sampling frequency maximizing given value or payoff function, discussing applications to controlling vehicle, information system or institutions

02 p3037 A70-12141

Sampled signal and associated sequence with identical Fourier transforms, noting applications to digital spectral analysis onboard spacecraft

03 p0449 A70-13538

Aircraft computer design performing basic arithmetic operations by sampling method noting speed increase

06 p1014 A70-17859

Signal stabilization and performance of nonlinear sampled data systems, suggesting oscillations injection at input

06 p1026 A70-17970

Model sampling or Monte Carlo applied to normal shock, giving temperature and density profiles for Mach 10 shock

06 p1050 A70-18337

Periodic motions and dynamic stability of nonlinear distributed sampled data system of closed loop of pulsed element governed by heat conduction equation

07 p1226 A70-18749

Soviet book on matrix methods in relay and sampled data control theory described by linear differential and finite difference equations

07 p1244 A70-19069

High speed sampling used with digital computer providing response shock spectrum data

08 p1481 A70-20610

Transfer functions representing continuous dynamic systems, identifying parameters by obtaining coefficients of discrete system transfer function relating input and output sampled sequences

08 p1478 A70-20777

Time allocation with sampling interpolation /ATIC/ for TDMA satellite telephone communications, considering auxiliary circuits, transmission quality, bit rates, demand assignment, etc

10 p1840 A70-24370

Data sampling system compensation based on bending frequency filtering through information obtained by varying sample rate, using saturn 5 launch vehicle simulation

12 p2192 A70-27411

Image processing, considering sampled data methods applied to two dimensional data

12 p2193 A70-28107

Frequency sampling adjustable equalizer design and operation, describing coaxial cable system tests

14 p2547 A70-30282

Nonlinear sampled data system transportation lag effect on limit cycle nature

14 p2560 A70-30623

Mathematical pattern recognition, using potential functions superposition methods for reconstructing probability density from samples

14 p2554 A70-30926

Sampled analog waveforms transmission, deriving optimum pre- and postfilters

15 p2703 A70-32557

Digital sampled data demodulation, discussing methods of obtaining quadrature channels from single signal

15 p2703 A70-32579

Transfer properties of scanning phase discriminator with intermediate storage, explaining sampling method and sample-hold-sample circuit

15 p2714 A70-32672

Finite settling response for single input/output feedback control system obtained by dual rate sampled data control algorithm

16 p2882 A70-33037

Distributed sampled-data control systems with memoryless nonlinear feedback element, deriving frequency domain stability criterion

16 p2884 A70-33308

Physiological tests of sampled data hypothesis in human motor control system

16 p2851 A70-33323

Actuating signal at sampling instants determined in phase plane by Mullin-Jury method for sampled data feedback containing quantizer and zero order hold circuit

16 p2886 A70-33336

Learning scheme with probabilistic teacher for unclassified samples, establishing convergence, comparing with linear estimator

17 p3128 A70-34851

Three digit hydromechanical step type actuator drives with slide valve assembly for computer data sampling systems

18 p3216 A70-37071

Automatic control system impulse response points identification by fast Fourier transform

19 p3393 A70-37852

Electro-optical modulation lock-in techniques for minimizing statistical fluctuations and eliminating internal noise in sampling of light signals

21 p3827 A70-41462

Sampled data compensators hybrid realization for discrete controllers, selecting canonical representation with minimum number of delay elements

22 p4002 A70-42846

Supervisor /monitor/ sampling frequency maximizing payoff function, using Bayesian preposterior information analysis

22 p4127 A70-43498

Time varying signals sampling, noting role of frequency in distortion

24 p4311 A70-45433

Signal distortion dependence on sampling frequency during continuous signals restoration

24 p4312 A70-45440

DATA SMOOTHING

Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity

01 p0167 A70-10229

Sensitivity analysis of discrete filtering and smoothing algorithms, noting in-track motion of circular orbit satellite and marine inertial navigation [AIAA PAPER 68-824]

03 p0459 A70-12913

Statistical testing role in synoptic meteorological analysis, discussing pressure and temperature patterns, front identification, computer applications, etc

07 p1329 A70-19574

High speed sampling used with digital computer providing response shock spectrum data

08 p1481 A70-20610

Clock corrections smoothing by linear transformation operator, calculating operator transfer function and averaged errors deviations

08 p1574 A70-21155

Observational data smoothing method starting from Whittaker method based on probability, recommending use with high speed computer

09 p1669 A70-23057

Eye-ball technique smoothing procedure discarding wild data points using minimum computer time for automatic treatment of digitally sampled test data [AIAA PAPER 70-386]

10 p1861 A70-24919

Kalman-Bucy filtering for estimating initial conditions and smoothing problems in linear dynamic systems, applicable to rectilinear motion of randomly accelerated spacecraft

12 p2186 A70-27905

FPS-16/Jimsphere wind profiles measurement, discussing effect of data smoothing on accuracy and resolution

14 p2607 A70-30569

Dynamic nonlinear estimation, deriving general algorithms for filtering, smoothing and prediction for continuous and discrete systems

14 p2562 A70-31366

Wolf numbers Zurich time series monthly values, evaluating mathematical expectation with probability smoothing by Whittaker operator

15 p2802 A70-32489

Nonlinear differential equations for smoothing density function and smoothed expectation of arbitrary function of state

16 p2941 A70-33057

X-22 VTOL aircraft initial parameter, state and covariance matrix estimates by Kalman filter and smoothing algorithms

16 p2885 A70-33329

Numerical integration of finite difference analogs of nonlinear partial differential equations, investigating data smoothing, filtering and boundary effects on computational instability

19 p3459 A70-38417

Aircraft trajectory postflight reconstruction involving photographic starfield and landmark referenced to inertial navigator output, discussing optimal data smoothing technique [AIAA PAPER 70-1022]

20 p3666 A70-39512

Minimum bias criteria for selecting data fitting curves, allowing for unknown true equation in improving data predictability

20 p3659 A70-40261

Inertial Navigation System /INS/, geodetic reference and optimal data smoothing for estimating vertical deflection and ocean currents

22 p4069 A70-43665

DATA STORAGE

UV sensitive spiropyran films coloration mechanism and color structure stabilization, discussing film and laser applications to optical data recording and storage

01 p0086 A70-10357

Information storage in complex automatic control systems with hierarchical structure composed of computers

01 p0047 A70-10983

SPIRAL system for free-flowing test information storage and retrieval in machine readable library

02 p0264 A70-12129

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer

02 p0265 A70-12143

Lidar technique capabilities and limitations in meteorological applications, emphasizing data storage and display instrumentation

03 p0450 A70-13673

Memory volume necessary to store intermediate data estimated for group processing from dependent Poisson information sources

04 p0661 A70-14552

ESRO 1 thermal behavior, discussing trajectory effects, onboard temperature measurement, data storage, data transmission, telemetered data and data comparison

04 p0762 A70-15164

Display storage tubes /DST/ for radar systems, describing operating principles and characteristics

04 p0660 A70-15525

Technique for coding data on cosmic ray variations based on packing digital information in computer storage, proposing selective statistical control for tape recording phase

05 p0898 A70-15929

Applied space research covering photovoltaic cells, electric propulsion, onboard data storage, vacuum lubrication and NASA-European organizations budgets

06 p1141 A70-17780

Hologram storage and retrieval in photochromic SrTiO crystals at ruby laser wavelengths

06 p1072 A70-18519

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

07 p1268 A70-19460

Word organized photodetector array design for holographic read-only optical memories

07 p1288 A70-20148

Hologram data efficiency improvement by spatial offset removal, analyzing plane and spherical reference waves and plane and solid objects

08 p1500 A70-21787

Room temperature cholesteric liquid crystals retention of information on past electric field excitation by changes in optical transmission properties

09 p1740 A70-22924

Holographic optical memory feasibility for digital data storage using Ar ion laser, acousto-optic beam deflector system, hologram storage plane and photodetector array

09 p1642 A70-23780

Hologram resolution and information storage along depth of reconstructed image related to maximum track density of bubble chamber

10 p1892 A70-25113

Holographic optical memory systems operational principles and potential advantages, discussing feasibility of 100 million bit memory capacity and one microsecond random access time

10 p1892 A70-25245

Random phase mask for Fourier Transform hologram recording of data mask, noting minimum space bandwidth required

11 p2049 A70-25637

Automatic base communication system /ABCS/ to handle USAF worldwide base record communications centered on electronic store and forward message switch, utilizing stored programs

11 p2009 A70-26266

Memory mechanisms of brain, discussing molecular physiology, information storage in living systems

12 p2168 A70-27278

Holographic memory devices design for information storage

13 p2405 A70-28792

Level quantization in time compression systems using storage devices with small dynamic range of recorded signals

15 p2733 A70-31578

Reliability criteria documents updating, discussing input vs output, experience retention, tradeoffs, etc

15 p2747 A70-32630

Interrelated computer programs and comprehensive parts data bank /REACT/ for reliability assurance analysis

15 p2706 A70-32654

Transfer properties of scanning phase discriminator with intermediate storage, explaining sampling method and sample-hold-sample circuit

15 p2714 A70-32672

Holographic data storage for random information display and retrieval in wide range consumer credit network

16 p2903 A70-33135

Ionospheric data representation in tabular form for computer storage and processing, noting memory cells reduction

18 p3250 A70-36934

Sodalites color centers creation by electron beam, discussing application in dark trace cathode ray storage display tubes

19 p3379 A70-38048

Coding device for computer storage of graphical information, describing construction and operation

19 p3385 A70-38576

DATA SYSTEMS

Semiautomatic data collection system for IR reflectivity measurements, recording digitized output on punched cards for computer analysis

01 p0088 A70-10747

Unified Flight Analysis System processing post-flight data from Saturn 5 launches, discussing system components, support programs and performance

02 p0264 A70-12127

Information storage and retrieval system development and operation for diversified crew/equipment task data, using general purpose digital computer

02 p0265 A70-12143

Product reliability engineering analysis, discussing coordination, communication and data accumulation systems

02 p0309 A70-12302

ESSA system operation, describing applications of satellite meteorological data

03 p0454 A70-13667

Integrated flight test data acquisition and processing system with real time graphic display, discussing ground station function

[SAE PAPER 690678] 05 p0793 A70-15867

Command control systems characterized as problem solving information processing systems, discussing information requirements specification prior to man-display design

05 p0806 A70-16177

Command and control display operational requirements within Allied Command Europe /ACE/, information flow, decision making and evaluation

05 p0959 A70-16178

Earth resources program data management system, discussing mission control, processing and distribution of data from satellite vidicon cameras and multispectral line sensors

[ALAA PAPER 70-321] 09 p1792 A70-22854

Earth resources data exploitation, describing potential organizational structures for data handling and various political, economic and technological problems

[ALAA PAPER 70-344] 09 p1793 A70-22859

Large scale aerospace data acquisition, processing, handling and dissemination systems analysis and design

[ALAA PAPER 70-322] 09 p1641 A70-22865

Data management functions of National Space Science Data Center /NSSDC/, discussing data processing and information system for secondary usage

[ALAA PAPER 70-320] 09 p1641 A70-22866

Omega Position Location Equipment /OPL/ system, testing operational feasibility of centralized global meteorological data collection system

09 p1722 A70-23030

Cost analysis for satellite data system determined for bit rates range and break-even distances

10 p1838 A70-24361

Thermoelectric outer planet spacecraft /TOPS/ project incorporating adaptable data handling system and self testing and repairing computer with triple redundancy subsystems

11 p1996 A70-25368

Product oriented cost data bank for satellite system cost prediction and negotiation designed for USAF communications satellite program

[ALAA PAPER 70-445] 11 p2152 A70-25477

Air traffic control surveillance and data system using synchronous satellites in inclined elliptical orbits for communications and aircraft position determination

12 p2268 A70-27644

Cockpit data monitor allowing pilot selection of instrumentation parameter readout

13 p2345 A70-28970

Aircraft turbojet engine/inlet compatibility, using data system for acquisition, identification and analysis of critical time variant pressure parameters

[ALAA PAPER 70-594] 13 p2375 A70-29877

Dynamic pressure data acquisition editing and processing system for engine inlet wind tunnel model tests

[ALAA PAPER 70-596] 13 p2375 A70-29879

Data flow in computerized automatic data acquisition systems, considering systems traceability of calibration to national standards

14 p2554 A70-31110

Data system obtaining sampling rate for cardiac volume measurement via fast biplane cineangiography

15 p2691 A70-31922

Experiment information management, discussing data flow patterns, acquisition, processing, storage, etc

[AAS PAPER 70-057] 17 p3199 A70-34807

Pseudonoise code command system for scientific satellite, describing added bits and decoder

17 p3046 A70-35276

Management program for digital data systems maintenance and repair

17 p3200 A70-35487

Low pressure measuring system for aerodynamic models tested in Mach 12-14 wind tunnel, discussing transducers and high speed digital recording and data processing system

17 p3062 A70-35493

On-line final V/STOL Wind Tunnel Data Encoding and Evaluation System /WINDEE/ for complex powered models, using computer monitoring

17 p3049 A70-35494

DC-10 airborne flight test PCM data system, discussing capability, onboard operating characteristics and test results

17 p3093 A70-35498

Digital data acquisition and control system for acoustic testing of large spacecraft

17 p3062 A70-35506

Flight data recording systems for accident investigation and operational purposes, discussing U.S., British and French regulations

18 p3258 A70-36341

Computerized airborne integrated data acquisition and analysis system, discussing hardware, software and airborne-ground elements interfaces

[ALAA PAPER 70-935] 19 p3382 A70-37393

Aircraft nonavionics systems performance condition and minimum maintenance duties diagnosis by integrated data system, discussing engine monitoring instruments

19 p3426 A70-37891

Digital flight data recording, considering aircraft integrated data systems /AIDS/

19 p3426 A70-37892

Flight data recording system /FDRS/ for crashes expanded to aircraft integrated data system /AIDS/ for airlines

19 p3426 A70-37893

Economic payback of AIDS /Aircraft Integrated Data System/ recording for operational performance monitoring and engine analysis

19 p3382 A70-37894

Airborne integrated data system /AIDS/ for accepting, processing, recording and displaying aircraft systems data, describing installation and design criteria

19 p3382 A70-37895

Data acquisition and processing system for electronic countermeasure aircraft tests

19 p3383 A70-37900

RMS spectrum analysis system for wideband acoustic data processing, using analog method with digital output

19 p3397 A70-37910

Data management methodology for test facilities, considering on-line analog/digital computers

19 p3383 A70-37922

Digital computer for high speed wind tunnel data acquisition, processing and operations control

19 p3397 A70-37923

Data collection system for prototype flight tests of Fokker F-28 based on DC-8 aircraft digital system

19 p3384 A70-38546

Integrated data systems for aircraft maintenance, noting information retrieval role in maintenance management for cost reduction and safety

20 p3740 A70-39647

Thermoelectric outer planet spacecraft /TOPS/ data subsystems for 12 year missions compared with Mariner subsystem

21 p3795 A70-41796

Data handling and processing methods for non-destructive test data translation and interpretation, using scanning test model

22 p3993 A70-42588

Automated air cargo and data flow system with on-line computers, discussing handling, document management, load planning, information transmission, storage and mechanized freight systems

22 p3994 A70-43271

NASA safety related research programs based on technology transfer involving information summarizing, indexing and storage from global aerospace research and development

23 p4285 A70-44457

Data management functions of National Space Science Data Center /NSSDC/, discussing data processing and information system for secondary usage

[ALAA PAPER 70-320] 23 p4285 A70-44514

Manned spacecraft onboard data management systems, discussing information transfer, processing, control, display and man machine interface

23 p4167 A70-44647

Space shuttle onboard cost effective data management system, discussing checkout, fault isolation, redundant element switching and crew interaction

[ALAA PAPER 70-1293] 24 p4418 A70-45975

DATA TRANSMISSION

NT AUTOMATIC PICTURE TRANSMISSION

NT CHANNELS [DATA TRANSMISSION]

Area navigation and automatic data communications in air traffic control proposed for New York area STOL aircraft operations and Boeing 747 aircraft

[ALAA PAPER 69-1054] 01 p0138 A70-10640

HEOS 1 satellite telemetry, telecommand and tracking systems, noting data transmission degradation due to high solar activity

01 p0045 A70-11115

FM data and telegraph signal transmission over PCM system analog channel, discussing adaptability to digital modulated signals

01 p0046 A70-11318

Technology transfer techniques within business firm, including specific examples used by successful companies

02 p0403 A70-12635

Optimum balance between program and functional organizations to promote technology transfer

02 p0403 A70-12637

Technology transfer experience in terms of aerospace company policies and technical management mechanics

02 p0389 A70-12638

Interruptions influence in discrete information flow on characteristics of radar tracking system

03 p0446 A70-13198

Bit transition time /bit synchronization/ estimation, developing bit synchronizer from Bayes estimation and optimization theories

[AAS PAPER 69-608] 04 p0647 A70-14655

Data transmission from automatic space stations on Mars and Venus, considering relaying via artificial planet satellite or direct transmission to ground station

04 p0648 A70-14931

Frequency bandwidth reduction for geophysical data transmission from satellites or lunar stations by time correlation of signal and transmission channel band changes

05 p0847 A70-15968

Information transmission capability of hologram without distortion, considering confocal resonator reconstructible transparencies for bounded hologram

05 p0848 A70-16265

Weather data communication, discussing transmission of radar, polar satellite and ATS satellite data to processing center and forecasts dissemination to public media

05 p0814 A70-16327

Ternary data transmission systems characteristics for modulated codes with known parameters or random initial phases

05 p0816 A70-17006

Worldwide Apollo data transmission network emphasizing computer operations for message collection and distribution, command and telemetry processing, etc

06 p1005 A70-17310

Broad beam Tracking Data Relay Satellite /TDRS/ for manned and automated spacecraft using VHF bands

06 p1006 A70-17345

Coding and signal selection for data relay satellite interrogation channel serving many low-powered unattended user terminals

06 p1006 A70-17347

Baseband transmission system information transmission rate improvement, using multivalued PCM signals

06 p1007 A70-17461

Differential game with opponent receiving information on phase coordinates of adversary with delay caused by reception and processing procedures

07 p1244 A70-18718

Digital data transmission over discrete time Gaussian channel with noisy feedback, investigating error-exponent /reliability/ and finite SNR

07 p1235 A70-19362

Terminal air traffic control automation, discussing Advanced Radar Traffic Control System /ARTS/ and control tower data transfer aspects

08 p1540 A70-20678

Digital communications and circuits and components for GHz data rate capability, discussing modulation techniques and bit stream coding

08 p1462 A70-21258

Millimeter guided wave communication systems information transmission capacity increase, using quaternary and higher order modulation techniques

08 p1462 A70-21506

Narrow width pulse-position modulated optical communication system design, determining performance in terms of error probability and information rates

08 p1463 A70-21778

Adaptive equalizer consisting of canonical link structure with minimum number of delay elements applied to fast data transmission

09 p1640 A70-22039

Air safety and navigation systems data transmission, discussing analog to digital conversion and modulation

09 p1720 A70-22550

Gigahertz rate circuits requirements for high speed digital data communication from component and system viewpoint, emphasizing coding and multiplexing techniques

09 p1633 A70-22605

Earth resources data transmission, describing picture reception and reproduction equipment

[ALAA PAPER 70-328] 09 p1634 A70-22856

Rapid and reliable data transfer within limited bandwidth and tracking time in earth resources technology satellites, discussing time division multiplexing, digitizing, etc

[ALAA PAPER 70-325] 09 p1635 A70-22858

Book on information transmission by orthogonal functions covering mathematical foundations, direct signal transmission, carrier transmission, statistical variables, etc

09 p1636 A70-23125

Digital record message communication satellite network system involving synchronous satellites and small earth terminals

10 p1834 A70-24327

Digital satellite communication system using multi-phase modulation optimized for phase positions number to maximize transmission capacity

10 p1835 A70-24334

Equipment design for burst synchronization control in TDMA experiment system

10 p1836 A70-24339

Independent burst and burst coherent TDMA methods compared for ground station-satellite communication

10 p1836 A70-24340

Intermeshed TDMA systems efficiency in interconnecting ground stations in communications satellite systems, discussing rigid and variable burst lengths

10 p1839 A70-24363

Digital transmission techniques optimal utilization of assigned frequency spectrum for phase modulation of frequency carriers

10 p1839 A70-24365

TDMA system control, considering access process control and switching process control, discussing burst transmission phase control and channel selection at receiving end

10 p1839 A70-24366

Physical formula for information content in communication signals based on receiver observation concept, noting role of channel properties and encoding

10 p1844 A70-25223

Information transfer services potential demand including telephone, telegraph, videophone, electronic mail, etc

[AIAA PAPER 70-443]

11 p2152 A70-25448

TATS Master tactical communication satellite network controller with modems and digital computer for semiautomatic control over terminals

[AIAA PAPER 70-412]

11 p2002 A70-25491

Computerized data communication system (CDCS)/equipment unit capacities and topology specified with aid of vertex weighted linear graph

11 p2009 A70-26253

Automatic base communication system (ABCS) to handle USAF worldwide base record communications centered on electronic store and forward message switch, utilizing stored programs

11 p2009 A70-26266

Data compression for telemetry transmission with sample choice based on time-varying stream slope thresholds illustrated for Ranger photograph

11 p2010 A70-26305

Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility

12 p2205 A70-26939

Materials/design optimization of antenna-aiming mechanism deployed on moon by Apollo 12 astronauts to transmit ALSEP experiments data to earth stations

12 p2231 A70-27130

Multiplexer-interface system for digital nuclear and position control data transfer from high altitude balloons to earth monitoring instruments

12 p2233 A70-27407

Nonlinear estimation with quantized measurements, applying algorithms to PCM, predictive quantization and data compression

12 p2192 A70-27420

ATC radar beacon system, discussing narrow interrogator beams, siting and beam shaping, interrogation environment control, data link transmissions and message content

12 p2268 A70-27641

Optimal linear band limited time invariant data transmission systems, discussing pulse interference tolerance based on eye parameters as quality criteria

12 p2185 A70-27688

Cost effective data transmission method for high performance under intersymbol interference and noise

12 p2187 A70-27935

Statistical characteristics and energy spectra of pulse code signals in data transmission estimated by matrix methods

13 p2364 A70-28871

Solar probe Helios data processing and transmission system, describing block diagram, PCM/PSK/PM telemetry and transmitter

13 p2367 A70-29558

Three dimensional images reconstruction with coherent light, facilitating transmission by holographic information volume reduction

14 p2581 A70-30146

Pulsed noise stability of discrete data transmission system having multipositional frequency manipulation as compared to binary system

14 p2547 A70-30148

Amplitude-frequency characteristics selection for minimum phase channel allowing for intersymbol interference and smooth noise during data transmission, calculating mean error probability

14 p2547 A70-30150

Real time Apollo PCM telemetry data compression and transmission using zero order predictor

14 p2550 A70-30768

Digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device

[AIAA PAPER 69-988]

14 p2615 A70-30771

Quantum mechanical communication system with thermal noise disturbance, analyzing reliability function and channel capacity

14 p2551 A70-31120

Optimum interleavers realization procedure for reordering contiguous symbols sequence to satisfy

minimum distance requirement for improving communication system performance

14 p2554 A70-31121

Geostationary tracking and data relay satellites (tdrs), discussing system design and advantages

14 p2615 A70-31182

Analog data transmission over PCM telemetry link, comparing noncoherent FSK vs PSK reception performance for waveform error

14 p2552 A70-31187

Sampled analog waveforms transmission, deriving optimum pre- and postfilters

15 p2703 A70-32557

Injection laser communication link for high data rate transmission, discussing design and construction of transmitter and receiver

16 p2862 A70-33139

Nonlinear least squares method reducing Burnett data to compressibility factors and virial coefficients

17 p3136 A70-35594

Frequency and time information transmission, discussing frequency and time measurement equipment at Czechoslovak facility

18 p3257 A70-36199

Optimal incoherent signal reception in discrete information transmission systems with fluctuation and concentration noise, including Rayleigh fading

18 p3228 A70-36600

Wideband analog signal data transmission, evaluating messages accuracy in terms of error probability

18 p3228 A70-36623

PCM data transmission, considering baseband code and modulated carrier formats and spectral distributions

19 p3379 A70-37905

Information optical transmission parameters with electroluminescent GaAs diode as radiation source, calculating energy received over various distances

19 p3389 A70-38069

Spacecraft data transmission efficiency improvement by budgeting onboard electric energy consumption among data types

21 p3790 A70-41364

Phase recovery in vestigial sideband (VSB) data transmission, deriving carrier acquisition time required to achieve satisfactory error rate for coherent demodulation of PAM

21 p3793 A70-42178

Information transmission and coding theory - Conference, Tashkent, Uzbek SSR, September-October 1969, Section 1, Data transmission theory, Methods of coding and decoding

22 p3985 A70-42490

Optimal binary and ternary signal system synthesis by information divergence procedure for communication channels with colored Gaussian noise

22 p3985 A70-42491

Nonbinary redundant error correcting codes for improving TV transmission speed and fidelity

22 p3985 A70-42493

Information transmission techniques by discrete amplitudes and increments, comparing effectiveness for noise rejection

22 p3986 A70-42495

Information transmission and coding theory - Conference, Tashkent, September-October 1969, Section 2, Statistical theory of signals and noise, Optimal reception methods

22 p3986 A70-42551

Optimal nonlinear filtration for continuous automatic data transmission with radio signal under white, narrow band and Markov noise

22 p4004 A70-42891

Earth resources technology satellite data link tradeoff between channel capacity and transmitter power

22 p4038 A70-43091

Tracking and data relay satellite system in low altitude synchronous orbit

[AIAA PAPER 70-1305]

24 p4311 A70-45085

DATING

U CHRONOLOGY

U TIME MEASUREMENT

DATUM (ELEVATION)

North American datum related to geocentric satellite reference system, using Lambeck method for geodetic parameters

05 p0841 A70-16644

DAWN CHORUS

VLF recordings and X ray flux measurements simultaneous analysis indicating evidence of relation between dawn chorus and electron precipitation, noting ELF whistler development

02 p0293 A70-12689

Dawn chorus frequency relation to solar activity, showing correlation to mean geomagnetic activity

10 p1886 A70-25282

Midlatitude chorus frequency spectrum changes in relation to previous local magnetic conditions

13 p2365 A70-29187

VLF radiation observation at conjugate points, discussing hisses, choruses and geomagnetic effects

19 p3416 A70-38587

DAYGLOW

Mariner 6 spectra establishing Fox-Duffendack-Barker bands and ionized carbon dioxide UV doublet bands as important components of Martian dayglow

10 p1938 A70-24073

Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data

13 p2399 A70-29240

Excitation and radiative transport of 1304 A triplet of atomic oxygen for dayglow and aurora

14 p2578 A70-31241

Sodium dayglow seasonal and diurnal variations observed with Zeeman cell photometer

14 p2579 A70-31253

Sodium and potassium dayglow seasonal and diurnal variations using resonance cell technique and sky polarization effect

14 p2580 A70-31263

Atomic hydrogen emissions in dayglow, considering excitation by resonance absorption of solar radiation

21 p3812 A70-40728

Nitrogen photoelectron excitation in dayglow, examining 3371 A band intensity, energy spectrum and flux in ionosphere

21 p3882 A70-41093

Daytime near horizon atmospheric luminescence measurement by Cosmos 224 satellite, discussing contributions of nitrogen and aerosol and Rayleigh scatterings

23 p4188 A70-44061

DAYTIME

Male rats locomotor activity responses to altered photoperiods during exposure to varied-light artificial days

01 p0015 A70-10367

Quasi-trapped particle currents having discontinuities on daytime and nighttime side of earth

01 p0171 A70-11487

Altitude variation of mesospheric daytime sky brightness from earth based measurements of twilight sky brightness, noting inconsistency in calculations based on standard atmospheres

06 p1053 A70-17207

Atmospheric long wave radiation fluxes and energy balance and daytime radiative temperature variations calculated and compared with thermocell measurements

06 p1098 A70-17831

Day sky Fraunhofer lines filling-in /Ring effect/ considered from analogous effects in surface albedo, suggesting role of Rayleigh wings

10 p1947 A70-24992

Earth-ionosphere cavity resonances diurnal variations by considering different propagation characteristics of day and night hemispheres

15 p2728 A70-31910

Vertical drift contribution to daytime N/h electron profiles in F 2 region, taking into account ionization-recombination processes and ambipolar diffusion

18 p3247 A70-36292

Daylight sky brightness at different wavelengths by airborne photometer, investigating statistical characteristics

19 p3460 A70-37419

Coupling processes in daytime D and E regions at LF and VLF, using thin film optics method for reflection and transmission coefficient matrices

19 p3413 A70-38002

High altitude wind measurement during daytime using photometer for detection of Li trail

20 p3630 A70-39486

Aircraft nighttime and daytime accident rate comparison, considering darkness, flight phase, etc

21 p3751 A70-41489

Daytime ionospheric effect of X ray flare from SCO XR-1, discussing LF radio wave intensity decrease

22 p4095 A70-43165

DC [CURRENT]

U DIRECT CURRENT

DC 8 AIRCRAFT

DC 8 Super 63 aircraft direct lift control flight evaluation

17 p3018 A70-35496

DC 9 AIRCRAFT

DC-9 aircraft instrument subsystems and operating procedures of KLM, discussing series 15 and 30 aircraft

14 p2530 A70-30416

DC-9 aircraft pilot training including jet introduction, DC-9 conversion and route training

14 p2542 A70-30417

Quiet V/STOL transport aircraft from DC-9-10 modification, discussing flying qualities, propulsion and control system interfaces, configurations, etc

[AIAA PAPER 70-1409]

24 p4291 A70-45916

DC 10 AIRCRAFT

Nondestructive inspection program for DC 10 aircraft maintenance

02 p0308 A70-12273

Ground support and service features present facilities to handle B-747 and DC-10 aircraft

03 p0463 A70-13264

- DC-10 aircraft wing engine calibration, isolated- and wing-nacelle testings using air-driven engine simulator [AIAA PAPER 70-590] 13 p2342 A70-29881
- DC-10 airborne flight test PCM data system, discussing capability, onboard operating characteristics and test results 17 p3093 A70-35498
- Wide body commercial jet transport structural design considerations applied to DC 10 aircraft [AIAA PAPER 70-895] 17 p3193 A70-35812
- Boeing 747, L-1011 and DC-10 introduction costs, profits and terminal facilities 19 p3357 A70-38951
- Noise suppression for high-bypass ratio CF6 turbofan engine in DC-10 airplane, considering effect on engine design [SAE PAPER 700804] 24 p4393 A70-45878
- DE HAVILLAND AIRCRAFT**
 NT DH 121 AIRCRAFT
 NT DH 125 AIRCRAFT
DE HAVILLAND DH 121 AIRCRAFT
 U DH 121 AIRCRAFT
DE HAVILLAND DH 125 AIRCRAFT
 U DH 125 AIRCRAFT
DE LAVAL NOZZLES
 U CONVERGENT-DIVERGENT NOZZLES
- DEACCLIMATIZATION**
 U ACCLIMATIZATION
- DEACTIVATION**
 Reversible cold induced deactivation of cat neocortex bioelectric activity in chronic experiment, noting cooling system 01 p0031 A70-10056
- Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states 04 p0684 A70-15750
- Excited oxygen molecules concentration in upper atmosphere calculated, considering deactivation during interactions in various energy states 14 p2576 A70-30834
- Ketene and diazomethane flash photolytic measurement of reaction rates of singlet-triplet methylene deactivation 15 p2694 A70-31729
- DEAD RECKONING**
 Dead reckoning navigation of manned lunar roving vehicle /MLRV/, describing hardware and coordinate system 12 p2266 A70-27414
- Computerized aircraft navigation utilizing Doppler dead reckoning system and Tacan integration with least square adjustment method 13 p2447 A70-28550
- Manned lunar surface navigation requirements emphasizing dead reckoning system 14 p2613 A70-30458
- Manned lunar roving vehicle /MLRV/ navigation scheme based on dead reckoning concept, discussing instruments effectiveness for vehicle velocity and orientation measurements 19 p3396 A70-37849
- Automatic ship navigation system using Transit satellites and onboard digital computer for routine tasks of dead reckoning 22 p4068 A70-42666
- DEADWEIGHT**
 U STATIC LOADS
- DEAFNESS**
 U AUDITORY DEFECTS
- DEATH**
 Sudden and early death in acute myocardial infarction, discussing prophylactic measures 04 p0637 A70-15472
- USAF aviation accidents diagnostic patterns of injury and death, noting increase in fire and/or associated complications 17 p3039 A70-35574
- Living organisms physiological death as biological problem, discussing hypotheses, theories and facts 23 p4145 A70-44225
- DEBRIS**
 NT RADIOACTIVE DEBRIS
 NT SPACE DEBRIS
- Energy partitioning process under strong shielding with debris acting as energy sink 06 p1130 A70-17181
- Dissection techniques for measuring dynamic parameters of debris clouds expanding from energetic events 14 p2584 A70-30510
- Fireballs atmospheric debris collection by high altitude filtration, describing analysis results 18 p3311 A70-35971
- DEBUGGING**
 U CHECKOUT
- DEBYE LENGTH**
 Spherically symmetric state of slightly ionized gas of unbounded expanse about catalytic conductor by nonequilibrium continuum theory, analyzing Debye number limit for electrostatic probes 14 p2665 A70-30946
- Spherical electrostatic probe in uniform quiescent continuum slightly ionized gas for range of bias potential and radius-Debye length ratio 16 p2912 A70-33863
- DEBYE TEMPERATURE**
 U SPECIFIC HEAT
- DECATETRIC WAVES**
 Rotation period of Jupiter based on decatetric component of radio emission, suggesting anticorrelation with sunspot number for drift observed 01 p0173 A70-10044
- Jovian decatetric radiation polarization during 1966-1967 apparition compared with cyclotron model predictions 02 p0364 A70-11793
- Fine structure morphology in dynamic spectra of Jupiter decatetric radiation determined from spectral recordings 08 p1562 A70-21514
- Jupiter decatetric noise storm commencement time defining constant planetary rotation period 08 p1580 A70-21572
- Baseline measurements of Jupiter decatetric radiation providing upper size limit to coherent and incoherent sources 09 p1755 A70-22512
- Cosmic radio waves discrete sources spectra measured in decatetric wavelength range, discussing wave generation and absorption 09 p1762 A70-23189
- Jupiter decatetric emission modulation by planetary rotation and Io position, suggesting role of magnetic tail diurnal swings 10 p1940 A70-24434
- Decatetric radio sources flux density time variations, discussing possible causes and radio emission spectra 12 p2299 A70-27308
- Twelve year periodicities of Jupiter decatetric radiation, noting correlation with Jupiter magnetic field rotation period 14 p2648 A70-31085
- Jupiter decatetric radio emission modulation by Io simulated by DC circuit model 18 p3321 A70-37120
- DECARBONATION**
 Foil decarbonization process monitored by mass spectrometry of secondary carbon ion emission 12 p2254 A70-27311

 NT TYPE 5 BURSTS
 NT X RAY FLUORESCENCE
- Transient system decay characteristics, discussing equilibrium point damping time for asymptotically stable systems of ordinary differential equations 19 p3542 A70-38066
- DECAY RATES**
 NT ELECTRON DECAY RATE
- Rapid photoprocesses decay kinetics, using CW Ar ion laser beam interrupted periodically by electro-optical shutter 02 p0314 A70-12742
- Extensive air shower models, noting role of nuclear active component energy decay rate 03 p0556 A70-13038

- Neutron star electrical conductivity, discussing stellar flux and magnetic field decay times 03 p0578 A70-14220
- Maximum plasma decay rate in heterogeneous medium determined from deionization process in rarefied gases 03 p0536 A70-14369
- Vibration decay rate measurement by pulse cycles counting 04 p0695 A70-15571
- Variational and Z-expansion calculations for magnetic quadrupole transitions decay rates of He sequence 05 p0920 A70-16942
- Mean lives measurement for excited levels in singlet system of neutral He using beam foil technique 07 p1338 A70-19821
- Neutron beta decay in strong quantizing magnetic field using Dirac wave function for electron, noting lifetime dependence on field strength 08 p1549 A70-21744
- CH, CD and CH ion excited states decay rates determined from phase shift and frequency data, discussing implications for astrophysics 09 p1731 A70-22513
- Pulsars period distribution not related to decay of magnetic field in rotating neutron star 09 p1756 A70-22518
- Karman trail vortices tangential velocity decay measurement by hot film anemometer experiments 09 p1661 A70-22961
- Carbon dioxide dissociation effects on refractive index gradients and decay rates in pulsed carbon dioxide-nitrogen laser mixture 10 p1900 A70-24602
- Ionospheric loss rates from rocket observation during auroral absorption interpreted by two ion model of recombination 10 p1881 A70-24813
- Time or space decay of turbulent parameters along flow direction in jets, wakes or grid-generated turbulence, illustrating time variation of wave number spectrum 12 p2211 A70-27831
- Burger turbulence model late decay statistical analysis using kernels of Cameron-Martin-Wiener expansion of random velocity field 13 p2386 A70-28820
- Time decay of higher order cyclotron harmonic resonances with decreasing perpendicular wave number 13 p2467 A70-29908
- Polyatomic molecules radiationless transition rate statistical analysis, suggesting role of Franck-Condon principle in determination of nonradiative decay rates 16 p2858 A70-34014
- Plane wave reflection decay rate representation by slowness diagrams 16 p2952 A70-34089
- Stress decay rates in Saint Venant boundary region in truncated semiinfinite elastic cone, using Papkovitch-Neuber functions for eigenfunctions formulation 18 p3339 A70-36489
- Ionospheric inhomogeneities electrodynamic decay rate, using ellipsoidal model with sharp boundary for irregularity 18 p3252 A70-36986
- Isotopic decay rates, solving time dependent atmospheric turbulent dispersion from steady state measurements 22 p4093 A70-42915
- DECCA NAVIGATION**
 Loran and Decca hyperbolic navigation systems 08 p1541 A70-21022
- STOL navigation systems, evaluating Vector Analog Computer, Decca Omnitrac IIB and inertial system 18 p3289 A70-36513
- Decca, Loran C/D and Omega LF and VLF hyperbolic navigation systems 23 p4215 A70-43865
- DECELERATION**
 NT SPIN REDUCTION
- Entry and terminal deceleration systems for unmanned Martian landers, discussing parachute landing and lifting entry vehicles 01 p0195 A70-10828
- Satellite 1965-11-4 /Cosmos 54 rocket/ braking, rotation periods and revolution from INTEROBS and SPIN observations, comparing K-index and solar activity parameters 02 p0363 A70-11768
- Lift-dump system for Hawker Siddeley DH 125, combining aerodynamic drag increase with lift reduction to improve deceleration 02 p0225 A70-12266
- Venus probe high level entry deceleration simulation, discussing test program, equipment and results 03 p0463 A70-13541
- VTOL flight investigation to develop decelerating instrument approach capability with control-command information display for three degrees of freedom [SAE PAPER 690693] 05 p0792 A70-15862

Traumatic rupture of aortic arch and descending thoracic aorta resulting from abrupt linear body deceleration
07 p1206 A70-19295

Two degrees of freedom assemblies transient motions using computer, solving acceleration and deceleration problems in mechanical systems
08 p1502 A70-20699

Initial deceleration of solar wind positive ions upstream of earth bow shock determined fromOGO 5 high time resolution plasma measurements
08 p1562 A70-21377

Hubble expansion constant and expansion deceleration value roles in cosmological model testing
08 p1581 A70-21752

Electromagnetic wave deceleration in open cylindrical waveguide, noting guide action as bandpass filter
09 p1633 A70-22415

Physiopathologic effects on organs of longitudinal and tangential accelerations, decelerations, vibrations and weightlessness
11 p1986 A70-25821

Lambda type pseudoshock /shock during supersonic flow deceleration to subsonic in duct/, investigating mechanism by schlieren photography
11 p2037 A70-26408

Monograph on axially symmetric tandem grids for supersonic flow deceleration to subsonic speeds, using schlieren optical tests and pressure measurements
11 p1977 A70-26525

Intense deceleration effects on mice and rats, including internal organs damage and enzyme activity increase
17 p3025 A70-35132

Repeated decelerations effects on mice and rats, noting fibrotic changes in liver
17 p3025 A70-35133

Meteor deceleration rates in atmosphere, using base line radar measurements
18 p3313 A70-36294

Parachute decelerator towline energy absorber shock attenuation characteristics, discussing drop test results
21 p3752 A70-41815

Earth rotation rate deceleration due to lunar tidal friction taking into account fluctuations from internal processes, discussing moon retreat from earth
21 p3921 A70-41970

Decelerated channel flow dynamics of ideal gas with supersonic velocity closed by compression shock, using finite difference method
21 p3747 A70-42203

Hot electrons bunch spread deceleration in collisionless plasma, discussing stationary moving jump formation similar to shock wave
22 p4077 A70-42299

Aircraft crash protection with preinflated air bag added to conventional seat/lap belt tested with human sled subjects
23 p4140 A70-44456

DECIDERS

U BRAKES [FOR ARRESTING MOTION]

DECIDING WAVES

Decimeter waves propagation along overland path, considering tropospheric radio relay systems development
16 p2863 A70-33238

Jovian decimeter radiation, discussing electron drift velocity in dipole field, characteristic time for energy loss and radiation belt dimensions
16 p2980 A70-34192

Pulsar RF spectral fine structure in decimeter wave range
17 p3163 A70-35050

DECISION ELEMENTS

U LOGICAL ELEMENTS

DECISION MAKING

Book on technological forecasting covering philosophical basis, Federal Government activity, R and D management resource allocation, correlation and regression analysis, etc
01 p0221 A70-11307

Dynamic structural analysis using computer graphics display, emphasizing applicability to man machine interaction at key decision making points
02 p0386 A70-11943

Man machine systems - IEEE/ERS Conference, Cambridge, England, September 1969, Volume 3, Decision making and mental work load
02 p0244 A70-12137

Pattern recognition concepts applied to synthesis of aircraft approach progress monitor as adjunct to pilot decision process, discussing feasibility experiments [SRCC-106]
02 p0335 A70-12138

Human decision making via man-computer interaction, noting skill role in nonoptimal performance handling of simultaneous factors
02 p0245 A70-12140

Multidimensional data efficient decomposition for communication interface between man machine system, considering decision making and pattern recognition on digital computers with orthogonal transformations
02 p0265 A70-12149

Restricted problem solving tasks /perceptual maze test/ formulated as multistage decision making, discussing use of dynamic programming and algorithms
02 p0246 A70-12321

Experienced and naive subject evaluation of probabilistic data, data source determination and prediction of subsequent data in complex decision task
02 p0247 A70-12379

Human feedback and response mode in performing Bayesian decision task
02 p0237 A70-12382

Analytical scoring model design for effective evaluation of competing research and development projects
02 p0402 A70-12634

Flights best day pair and weekly leg schedules concept based on decision making model for traffic volume estimation in airline operations
02 p0403 A70-12787

Decision model for R and D project selection
03 p0609 A70-12991

Signal detection theory analysis indicating within-session changes in human willingness to respond in visual monitoring task, considering optimal decision behavior
03 p0435 A70-13766

Decision analysis in R and D, discussing risk discounting and measure of value selection
03 p0610 A70-13956

NASA Source Evaluation Board process for major contractor selection, discussing procurement practices and management techniques
03 p0610 A70-13962

Managerial practices of problem identification, discussing research study in operating division of large corporation
03 p0610 A70-14051

Weapon systems acquisition projects, studying procurement decisions interactions [ASME PAPER 69-WA/MGT-6]
04 p0788 A70-14833

Human controller decision in air traffic control, discussing manpower, on-line computer use and maximized systems
04 p0643 A70-14903

Command and control display operational requirements within Allied Command Europe /ACE/, information flow, decision making and evaluation
05 p0959 A70-16178

Computer display graphic technique for business decision making, noting electronic aids
05 p0959 A70-16451

DOD systems acquisition management tools and policies, emphasizing role of development concept paper and outside personnel dialogue in DOD decision making
05 p0959 A70-16460

Decision algorithms simulating human controller adaptive behavior in controlling VTOL aircraft in hover following stability augmentation system failure
07 p1216 A70-18860

Risk-reducing information role in decision making using Marschak bidding procedure
07 p1203 A70-18964

Decision trees application to research projects selection, cost stages, probable return on investment and control device
07 p1427 A70-19001

Decision making leading to aircraft selection and buying by airline, evaluating traffic and technological aspects
08 p1601 A70-21866

Decision rules for incomplete a priori data, deriving informational risk estimates for Markov processes and optimal control problems
09 p1653 A70-22144

Computer aided design programs as decision-making tool for fighter development projects technical management [AIAA PAPER 70-364]
09 p1611 A70-23024

Large scale project grading into stepwise decision stages exemplified by aircraft weapon system development program
10 p1971 A70-24596

Response times in deciding same or different between successive visual stimuli
10 p1826 A70-24722

Associative analog designed for decision making by man searching for extremum in form of multilayer stochastic automaton
11 p1990 A70-25928

Aircraft pilot ability tests validity, applying correction methods in decision making regarding applicant acceptance [DFVLR-SONDDR-32]
12 p2176 A70-27031

Bayesian probabilistic information processing in psychological decision making in air traffic control, discussing bookbag and poker-chip applications
12 p2178 A70-27047

Tradeoff decision processes scheduling maintenance frequencies for commercial transport aircraft [SAE PAPER 700328]
12 p2243 A70-27461

Weibull process with unknown scale and shape parameters analyzed by Bayesian decision making
12 p2243 A70-28011

model, with application to component reliability problem
12 p2243 A70-28011

Book on probabilistic systems analysis covering models, decision making, random processes, distribution functions, mass and density functions, etc
13 p2441 A70-29455

Project cost estimate growth pressures on decision making by U.S. Air Force System Program Office director
14 p2667 A70-30521

Weather forecasting for manned space flights, emphasizing Apollo flights and operational decisions due to forecasts
14 p2606 A70-30557

Decision making role in management contribution towards success of research and development based on statistical decision theory
15 p2828 A70-31573

Forecasting necessity and limitations in management decision making process
15 p2829 A70-31574

Pilots brake-takeoff decision at critical engine failure speed, discussing operational aspects of accelerate-stop criteria
15 p2675 A70-32219

Technological forecasting as management concept in decision making process
17 p3199 A70-34679

Component decision logical and temporal arrangement in visual search, defining target by several attribute value combination
19 p3362 A70-38314

Visual sensory storage item selection efficiency
19 p3363 A70-38321

Choice prediction in partially repeatable decision situations, discussing phenomenological analysis
19 p3366 A70-38504

Attitude test validity taking into account selection board subjective decisions on pilot applicant acceptance
19 p3371 A70-38507

Solar system unmanned exploration decision making, discussing resource utilization, sequence optimization, etc
20 p3710 A70-40335

Pursuit evasion game with uncertain state-dependent measurements, modifying Brown-Robinson algorithm for behavior strategies computation
20 p3660 A70-40384

Unitary and compound stimuli and role of response categories in decision time
21 p3767 A70-40751

Subjective probability estimation for R and D decision making, using analytical models incorporating risk and uncertainty
21 p3955 A70-41175

Book on decision making in U.S. manned lunar landing commitment covering space policy, technical planning, national interests, Apollo experience, etc
22 p4126 A70-42314

Training simulation improving ejection decision making in naval aviation
23 p4178 A70-44467

Elastic continua structural optimization analysis decisions for maximizing calculation accuracy, insuring efficient complex numerical analyses
23 p4271 A70-44706

DECISION THEORY

NT STATISTICAL DECISION THEORY

Optimal maneuver decision strategy for space vehicle midcourse trajectory corrections
09 p1760 A70-22928

Hybrid computer for decision-directed estimators of two-class decision boundary, noting applications to medical diagnosis, communications and pattern recognition
09 p1641 A70-22965

Signal selection for phase coherent and incoherent additive noise channels to maximize receiver correct decision probability
11 p2010 A70-26327

Antenna array system for surface target detection in receiver noise and heavy clutter by space-time decision theory
16 p2860 A70-32954

Generalized iterative inverse algorithm for linear inequalities set involved in pattern recognition and threshold logic requiring decision functions determination
16 p2870 A70-33739

Decision theory model evaluation based on experimental findings concerning relationship between stimulus intensity and reaction time
17 p3036 A70-34605

Multidimensional decision models for optimal control, using piecewise constant functions
19 p3394 A70-38679

Water management decision model using earth resources information system with satellite-based remote sensors, evaluating costs and benefits by systems analysis
20 p3616 A70-39066

Discrete decision variable models formulated as linear integer programs, deriving shrinking boundary algorithm for optimization 22 p3994 A70-43497

DECLINATION

Latitude observations at Pulkovo, considering star declinations and proper motions 08 p1574 A70-21162

Positions measurement for 4C radio sources between declinations of 4 and 20 degrees, noting RMS errors 08 p1577 A70-21533

Molonglo pulsars observations, using multiperiod integration technique for declinations, periods and positions 13 p2487 A70-28632

Magnetometer for geomagnetic field declination measurement, eliminating thermal drift by light modulation method 13 p2415 A70-30042

Soviet book on declination observation of bright and faint stars in one system 18 p3314 A70-36402

Magnetic declination data, using spherical harmonics to examine global and secular geomagnetic field variations 23 p4189 A70-44067

DECODERS

High speed PCM terminal with 600 channel capacity, evaluating feasibility for high speed PCM codec, examining STN degradation factors 10 p1835 A70-24337

High speed sequential decoding machine design and performance test for deep space channels 11 p2014 A70-26245

Convolutional code decoder modeled as autonomous stochastic sequential machine, considering finite Markov chain theory for error probability 17 p3049 A70-34854

Pseudonoise code command system for scientific satellite, describing added bits and decoder 17 p3046 A70-35276

Error correcting decoders, investigating lower bounds on three complexity measures to meet error probability requirement 18 p3230 A70-35942

Four dimensional matrix type CRT decoder characterized by large storage capacity and high resolution 18 p3256 A70-36105

Sequential decoder program for low weight code-words in binary convolutional code over one-half constraint length 24 p4313 A70-46065

Suboptimum sequential algorithm for recovery decoding errors in convolutional codes, using Hamming distance criterion 24 p4314 A70-46066

DECODING

Algorithm for optimal decoding of convolutional codes confirmed using error probability upper bound 04 p0654 A70-15067

Binary decoding extension to achieve unquantized demodulation performance for nonfading phase shift keyed coherent channel with white Gaussian noise 06 p1008 A70-17525

Arithmetic codes rate upper bound derived by combinatorial analysis, discussing decoding method for multiple error correction 08 p1465 A70-20792

Viterbi decoding error probability for convolutional codes using finite Markov chain modeling 08 p1458 A70-20794

Bit error probability after decoding for binary perfect single error correcting codes 11 p2014 A70-26247

Digital simulation of linear filter, investigating noise and rounding errors effects on decoding signals from lunar and interplanetary probes 17 p3049 A70-34612

Maximum-likelihood decoding in analog form of linear convolutional codes with respect to constraint length by one-step threshold method 24 p4313 A70-46059

DECOMMUTATORS

Telemetry decommutation algorithm for applying Bayesian decisions to demodulated received bits data 11 p2008 A70-26238

Delta reprocessing operating system (DEPOS) for high speed telemetry format-independent decommutation and data compression 11 p2010 A70-26307

DECOMPOSITION

NT GLYCOLYSIS
NT HYDROGENOLYSIS
NT PHOTODECOMPOSITION
NT PHOTODISSOCIATION
NT PHOTOLYSIS
NT PROPELLANT DECOMPOSITION
NT RADIOLYSIS

Matrix decomposition and full release methods for substructure analysis 09 p1770 A70-22258

Gamma irradiation effects on thermal stability and decomposition of ammonium perchlorate 12 p2289 A70-26870

Self heating accompanying exothermic decomposition of gaseous diethyl peroxide in spherical vessel measured positionally by thermocouple 12 p2330 A70-27223

Thermal testing of decomposition and spontaneous ignition of diethyl peroxide before explosion 12 p3330 A70-27224

Molten lithium sodium carbonate electrolyte decomposition and evaporation at high temperatures in various atmospheres, noting water and carbon dioxide additives effects 12 p2166 A70-27763

Discrete time systems, deriving algorithm for testing decomposition property as necessary condition for linearity 13 p2375 A70-29939

Decomposition of unstable beta solid solution of Ti-V alloy, using X ray and microscopic analyses 17 p3125 A70-35336

Aligned composite materials preparation by unidirectional lamellar eutectoid decomposition in Co-Si, Cu-Al, Ni-In and in supersaturated solid solution Sn in Pb 18 p3274 A70-36052

Superconducting Nb-Ti-Zr alloy, investigating structure and decomposition at high temperatures by X ray and electron microscopy 18 p3276 A70-36310

Beta Ti alloy decomposition study during aging by diffraction electron microscopy, forming finely dispersed coherent precipitates 20 p3645 A70-39041

Chemically active surface decomposition in dissociated gas flow with turbulent boundary layer, determining diffusion fluxes in laminar sublayer 20 p3612 A70-39812

Decomposition kinetics of alumina particles injected into thermal argon induction plasmas 21 p3855 A70-40878

Peroxyacetyl nitrate decomposition products under continued and discontinued irradiations determined by IR spectral analysis 22 p3983 A70-42944

DECOMPRESSION

U PRESSURE REDUCTION

DECOMPRESSION SICKNESS

Biophysical symptoms and clinical treatment of ailments resulting from pressure drop, considering exposure to higher and lower pressure changes [DVL-894] 01 p0011 A70-10036

Lung lipid embolization effect in decompression sickness on obese mice, showing no relationship to dysbaric syndrome 01 p0015 A70-10361

Platelet and lipid changes in thrombocytopenic and control rats subjected to bends producing technique in aeroembolism 01 p0015 A70-10364

Sea-level pressure interval to prevent decompression sickness in humans flying in commercial aircraft after diving 01 p0032 A70-10366

Apollo space cabin atmospheres, evaluating diluent N effect on decompression sickness in intermittently exercising men 01 p0032 A70-10368

Book on subatmospheric decompression sickness in man, covering raised intrapulmonary pressure effects and compensating pressure applications [AGARDGRAPH-125] 01 p0019 A70-10514

Forward and rearward facing passenger seats effects in postdecompression emergency descent of high speed high altitude aircraft 03 p0437 A70-14061

Autonomic nervous system role in controlling body functions after rapid decompression, increasing tolerance to pressure gradients by physical training 04 p0630 A70-14575

Ground level denitrogenation duration effects on decompression sickness occurrence in space cabin atmospheres 06 p0999 A70-17289

Histopathological evidence for pulmonary emboli in experimental decompression sickness in dogs detected by radioisotopic lung scanning 06 p0991 A70-17295

Resistance to decompression sickness increased and mortality rate decreased in mice after adaptation to hypoxia at normal barometric pressure 07 p2106 A70-19469

Gas bubbles formation in supersaturated solutions and body fluids during decompression 07 p2108 A70-19511

Fat embolism and decompression sickness similarities, studying lipid stability changes resulting from liver tissue injury by nitrogen bubbles 07 p2122 A70-19936

Decompressed crewmember rescue onboard spacecraft and aircraft by compartmentalization combined with air locks 08 p1454 A70-21938

Decompression rates effect on altitude tolerance of white rats, discussing hypoxia influence on cardiovascular, respiratory, circulatory, thermal control and central nervous systems 09 p1614 A70-22084

Personnel protection against accidental decompression in transport aircraft at high altitudes, recommending flight stations with capsule to achieve ground level oxygen equivalent 09 p1627 A70-23459

Dogs breathing air or oxygen during slow and rapid decompression, measuring intraocular and cardiovascular pressure changes and retinal responses 09 p1621 A70-23460

Otitic Barotrauma with bilateral perforation of ear drums suffered during rapid decompression run in chamber, discussing diagnosis 10 p1811 A70-24040

Vasoactive agent effects on decompression sickness in rats, noting increased severity of bends by serotonin and platelet role 10 p1811 A70-24176

Gas bubbles formation in supersaturated solutions and body fluids during decompression 11 p1988 A70-26110

Commercial jet passenger emergency oxygen needs for cabin decompression studied in determining time of safe unconsciousness 11 p1992 A70-26511

Swimming activity effect on dysbarism in rats in simulated free ascent from deep water 15 p2681 A70-31877

Decompression rates effect on altitude tolerance of white rats, discussing hypoxia influence on cardiovascular, respiratory, circulatory, thermal control and central nervous systems 15 p2685 A70-32680

Aeroatelectosis and pneumothorax in fighter pilot postflight chest pains, noting decompression role 17 p3041 A70-35920

Decompression hazards in manned orbital systems, considering consciousness time, survival, pathological response, water vapor and denitrogenation effects and recompression rates 22 p3973 A70-43638

Decompression sickness prevention in space flight, discussing suit and capsule pressure, extravehicular activity and alleviation of conditions 22 p3980 A70-43640

Decompression sickness pathophysiology, discussing cardiovascular system, altitude effects, therapy and prevention 22 p3975 A70-43700

Decompression disorders after exposures to safe pressure or altitude in cats, noting potential embolia from nongradual high-to-normal pressure passage 23 p4157 A70-45080

Decompression sickness relationship to physical exercise during simulated Apollo flight 24 p4307 A70-45336

Bends incidence in altitude training, examining denitrogenation role 24 p4307 A70-45339

Critical supersaturation vs phase equilibration of tissue in computing decompression schedules from depth and exposure time 24 p4301 A70-45983

DECONTAMINATION

NT SPACECRAFT STERILIZATION

Vacuum cleavage device for producing small area evaporated metal semiconductor contacts free from oxygen or other contamination 02 p0304 A70-12748

Contamination control of spacecraft for planetary exploration missions emphasizing monitoring equipment and cleaning procedures 05 p0808 A70-16702

Sterile lander recontamination prevention from microorganisms during in-flight transfer from unsterilized carrier vehicle 11 p1991 A70-26049

DECOUPLING

Potential representation of vector fields effecting decoupling of vector wave equation of elasticity for radially heterogeneous isotropic media 01 p0208 A70-11189

Decoupling and pole assignments in linear multivariable control systems using geometric method 11 p2072 A70-26160

Effective moment of inertia in quantum mechanical three body problem, applying specific decoupling to wave functions 13 p2452 A70-29478

Decoupling by dynamic compensation using algebraic machinery, considering state space extension role in pole assignment 16 p2886 A70-33333

Linear second order equation systems decoupling transformation, noting applications to structural feedback, flutter and control systems 16 p2943 A70-33891

Linear time varying systems optimal control through decoupling of boundary value problems 19 p3393 A70-37866

Linear multivariable feedback control system, deriving conditions for existence of triangular decoupling transfer function matrices 20 p3605 A70-40118

Nonlinear coupling in systems with two degrees of freedom, deriving transformation laws for uncoupling 21 p3940 A70-42054

Decoupling and pole assignment in linear multivariable control systems, minimizing dynamic compensation 23 p4213 A70-44904

DEEP DRAWING

Press load prediction for deep drawing Ti-Al-V alloy, stainless steel and Inconel X under various lubrication conditions at room temperature [ASME PAPER 69-WA/PROD-15] 04 p0698 A70-14835

DEEP SCATTERING LAYERS

Illuminating conditions in deep layers of turbid plane-parallel medium for highly elongated scattering characteristic 04 p0745 A70-14497

DEEP SPACE

NT INTERPLANETARY SPACE
NT INTERSTELLAR SPACE

UN General Assembly outer space treaties governing international exploration and use and rescue and return of astronauts and objects 02 p0402 A70-12308

Spherical harmonics expansion for earth surface and outer space geopotential by mapping earth surface onto sphere 05 p0837 A70-15926

Gravitational waves and radiation study based on relativity theory, discussing outer space sources and antenna recording design and properties 10 p1916 A70-24384

Laser systems for deep space communications, considering high data rates, laser types, systems operation, earth atmosphere effects, hardware reliability, etc 11 p2005 A70-26036

Reusable earth-moon and deep space return transportation, assuming extraterrestrial nuclear rocket propellant source 14 p2653 A70-30766

Deep space optical communications link, fabricating operational prototype of flight hardware for spaceborne terminal 16 p2863 A70-33190

Search optimization for object drifting in outer space, considering approximate location and speed 17 p3172 A70-35668

Deep space spacecraft radioisotope thermoelectric generators, discussing testing and evaluating for future missions 18 p3215 A70-36229

Three body numerical solutions to low thrust guidance and navigation for outer planet orbiter with nuclear-electric propulsion [AIAA PAPER 70-1040] 19 p3527 A70-38855

Spacecraft-based navigation instruments for outer planet missions using celestial directions to outer planet natural satellites [AIAA PAPER 69-902] 20 p3669 A70-39681

Deep space microwave and optical communications, describing grand tour requirements 21 p3784 A70-40546

Thermal scale modeling of heat pipe in deep space, using material and heat flux preservation techniques 21 p3946 A70-41048

Reusable space transporter predicted applications evolution from earth circling to space bases and space colonies for deep space missions 21 p3930 A70-41495

Reaction kinetics of microbial sterilization in ultrahigh vacuum and in outer space 23 p4148 A70-44841

DEEP SPACE INSTRUMENTATION FACILITY

RF requirements of deep space-outer planet spacecraft communications for Jupiter, Saturn, Uranus and Neptune flyby missions 21 p3791 A70-41369

DEEP SPACE NETWORK

Deep space network /DSN/ functions and characteristics, discussing spacecraft control, data acquisition, orbit determination, data processing, etc 08 p1481 A70-20614

Clock synchronization system using lunar radar reflections for Deep Space Network needs, discussing remote clock receiver and antenna 09 p1656 A70-23037

Tracking station clock synchronization error measurement using Deep Space Network Mark I ranging system, discussing system theory, design, operation, economy and versatility 09 p1656 A70-23038

High speed sequential decoding machine design and performance test for deep space channels 11 p2014 A70-26245

Deep Space Network /DSN/ data accuracy limitations relation with ability to determine orbit of probe, examining improvements after Mariner 2 and trends 13 p2448 A70-28702

Grand tours navigation system consisting of deep space network radio and onboard TV for future TOPS /Thermoelectric Outer Planet Spacecraft/ applications 21 p3849 A70-41799

NT VACANCIES [CRYSTAL DEFECTS]

Electrodynamic contactless method for ultrasonic nondestructive testing of materials based on natural frequencies shift with and without defects 02 p0301 A70-12483

Lamb waves behavior applied to defect evaluation in nondestructive tests of solid elongated cylindrical objects 02 p0276 A70-12552

Refractory Ni alloys defects accumulation under creep and cyclic temperature variations assessed by relative lifetime additive method 05 p0866 A70-17032

Hyperelastic bodies containing finite number of inclusions and defects analyzed by continuous dynamic model 10 p1954 A70-24014

Axisymmetric imperfection distributions effect on buckling of circular cylindrical shells under axial compression, constructing test models from photoelastic liquid epoxy 12 p2319 A70-27140

Stiffened cylindrical shells buckling under axial compression, obtaining imperfections and prebuckling growth mappings 12 p2319 A70-27141

Spectral analysis of LF pulses from defects obtained by modulation method of monitoring using eddy currents with superposed converter 13 p2404 A70-28660

Electron beam welding, explaining high fusion zone homogeneity and weld defect formation by dynamic model 17 p3100 A70-34637

Viscoelastic materials fracture strength as function of cut length, defect size and temperature 17 p3146 A70-35221

Failure of materials under multicycle fatigue, deriving general theory of defects 18 p3341 A70-36586

Freckles origin in unidirectionally solidified castings, noting convective jets role 20 p3646 A70-39102

Ultrasonic pulse echo flaw detection, relating defect size to echo amplitude 20 p3636 A70-39192

Composite materials physical properties measurement and defect locations detection by NDT techniques 20 p3636 A70-39210

Asymptotic buckling analyses of imperfect columns on nonlinear elastic foundations by perturbation expansions, equivalent linearization and truncated hierarchy approximations 21 p3934 A70-40777

Acoustic fields of circular, rectangular and line focused ultrasonic emitters for small defect detection 22 p4048 A70-43618

Defect grouping role in MIL-STD-105D inspection techniques, discussing costs and acceptance probabilities 22 p4048 A70-43727

Axisymmetrically imperfect spherical thin shell stability analysis, comparing results with theory of initial postbuckling behavior 24 p4421 A70-45282

Angle beam ultrasonic testing of metals, considering beam and depth scanning characteristics and wave reflectability of various flaws 24 p4343 A70-45687

Flaw echo height dependence on ultrasonic testing pulse frequency spectrum 24 p4336 A70-45688

Defect size estimation, using ultrasonic angle beam probes and distance-gain-size /DGS/ diagram 24 p4343 A70-45689

Cylindrical boreholes as reference defects in ultrasonic inspection, discussing geometrical parameters effects on echo height 24 p4343 A70-45691

Defect detection by measurement of magnetic field leakage around flaw 24 p4346 A70-45727

Defect effects on welds fatigue properties in low carbon steel plates estimated, using radiograms 24 p4347 A70-45733

Elastoplastic properties of welded joints containing slag inclusions defects, determining sizes radiographically 24 p4347 A70-45734

Inspection penetrant development for flaw detection, considering entrapment efficiency and dimensional sensitivity 24 p4348 A70-45743

DEFENSE COMMUNICATIONS SATELLITE SYSTEM

Optimum sequence integration and ground testing of Defense Communication System Phase II Satellite, considering vibration, shock, space simulation, spin/despin, RF and acoustic requirements [AIAA PAPER 70-447] 11 p2030 A70-25444

Initial Defense Communication Satellite Program/augmentation satellite design and mission, on-board communications equipment, control subsystems, American-British cooperation, etc [AIAA PAPER 70-492] 11 p2121 A70-25449

Digital techniques application to military communication satellite systems, discussing 40 Mbps quadrature phase modems, convolutional encoders, TDMA, etc [AIAA PAPER 70-495] 11 p2002 A70-25488

X band aircraft antennas selection and design for defense communications satellite systems, emphasizing steerable phased array 16 p2865 A70-33712

DEFENSE COMMUNICATIONS SYSTEM [DCS]

Military communication satellite requirements considerations including tactical and strategic concepts integration to provide advantages over terrestrial systems [AIAA PAPER 70-1295] 24 p4315 A70-46188

DEFENSE INDUSTRY

NT WEAPONS INDUSTRY

Book on guide to aerospace defense contracts covering purchase control, marketing solicitation, project management, reports, logistics etc 22 p4126 A70-42723

DEFENSE PROGRAM

Command and control functions of DOD Manager for Manned Space Flight Support Operations in spacecraft recovery 05 p0827 A70-16180

DOD systems acquisition management tools and policies, emphasizing role of development concept paper and outside personnel dialogue in DOD decision making 05 p0959 A70-16460

DOD laser research and development contracts management 14 p2667 A70-30367

DEFLAGRATION

Aluminum additives effects on stoichiometric ammonium perchlorate/polyformaldehyde mixtures deflagration, determining temperature distribution, burning rate dependence on pressure and heat flow due to radiation 02 p0351 A70-12004

Ammonium perchlorate deflagrations, determining intrinsic stability of one dimensional burning configuration based on flame structure modeling [AIAA PAPER 70-123] 06 p1128 A70-18044

Ammonium perchlorate decomposition, deflagration, sublimation, crystal growth and surface properties, using scanning electron microscope 07 p1358 A70-19576

Low pressure deflagration limit dependence on strand size in terms of cross section dimensions for composite ammonium chlorate propellant [AIAA PAPER 69-144] 13 p2473 A70-29955

Pure ammonium perchlorate single crystal self deflagration, determining energy transfer mechanisms from pressure effects, combustion characteristics and subsurface profile [AIAA PAPER 69-142] 13 p2473 A70-29956

Aluminum particle combustibility in deflagration zone of ammonium perchlorate pellets, measuring combustion rate and pyrolytic behavior 17 p3145 A70-35208

Thermocouple transient response characteristics in deflagrating and ablative low conductivity materials with high temperature gradients [ASME PAPER 70-HT-7] 22 p4122 A70-42440

DEFLATING

U INFLATABLE STRUCTURES

U PRESSURE REDUCTION

DEFLECTION

Infinitesimal deflections of piecewise-regular unfolding scanning surfaces fixed along edge with respect to one point, discussing rigidity 03 p0591 A70-13414

Motion stability and time dependent deflections of thin flexible cylinder with zero bending rigidity in viscous stream 03 p0595 A70-13783

Energy methods used in thermoelastic analysis of thermal stresses and deflections in thin rings 07 p1401 A70-18935

Initial perturbation effect of smooth cylindrical shells stability under critical axial compression noting deflection factor 07 p1415 A70-20190

Static deflection effect on harmonic vibration of system with restoring forces of hardening nonlinear spring, considering gravity effect 08 p1586 A70-21035

Stresses and displacements in largely deflected cantilever beams subjected to gravity using photoelasticity 08 p1593 A70-21619

Laser beam deflection techniques for directional control of laser beams, noting applications to optical computer memories and active imaging and display devices 09 p1696 A70-22783

Elastic bending of clamped and supported elliptic and parabolic plates under external pressure investigated by lines of equal deflection
11 p2133 A70-25839

Finite deflections of nonlinearly elastic cantilevered bar
11 p2140 A70-26481

Deflection surface and edge moment prediction for uniformly edge loaded point-supported circular plates, comparing with optical method
13 p2509 A70-28534

Large deflections in impulsively loaded clamped circular Al alloy and steel viscoplastic plates
13 p2511 A70-28736

Deflection function for annular plate simply supported and loaded with eccentric concentrated force
13 p2518 A70-29981

Stress and deflection of nonisotropic assembled bar and plate composite structures, using computerized matrix displacement method
14 p2660 A70-31133

Radio source 3C279 position during October 1969 occultation by sun, determining SHF deflection in solar gravitational field
16 p2972 A70-33049

Macaulay method extended for slope and deflection of statically indeterminate beams, rewriting design equations into index notation for computer programming
[ASME PAPER 70-DE-2] 16 p2989 A70-33419

Mathematical techniques for optimal design of single purpose structures under dynamic deflection
17 p3182 A70-34544

Deflection behavior of uniformly loaded elliptical elastic plates on elastic foundation, using small parameter perturbation technique
18 p3343 A70-36713

Vertical deflections errors statistical analysis by gravity anomaly measurements, determining autocorrelation functions
18 p3248 A70-36771

Vertical gravimetric deflections calculation based on linear interpolated gravity anomalies
19 p3410 A70-37461

Optimum laser beam deflection for instrument design, considering tandem, rotary mirror and analog methods
19 p3446 A70-37879

Clamped edge thin flat elliptic plate subject to elliptic paraboloidal loading, determining middle surface deformations for nonlinear large deflections
19 p3547 A70-38359

Second approximations of deflection of vertical and quasi-geoid height dependence on difference between unknown earth surface and known hypsometric surface
20 p3617 A70-39072

Integral equations for plumb line deflections on earth surface model, considering Neumann, Molodenskii, Arnold methods, etc
20 p3617 A70-39074

Clamped circular shallow Al arches stability under impulsive loading, obtaining deflection time history by high speed photography and computerized data reduction
20 p3732 A70-40265

Mathematical techniques for optimal design of single purpose structures under dynamic deflection
20 p3733 A70-40381

Elastic-plastic axisymmetric shells of revolution, analyzing large deflection and yielding for internal and external pressures by finite element method
21 p3937 A70-41738

Weight-optimal sandwich beam design for given static deflection, using energy approach
22 p4113 A70-42535

Arbitrary shells large deflection transient response, using finite difference computer program
23 p4272 A70-44710

Approximation method for large deflection analysis of impulsively loaded rigid plastic circular plates and symmetric shells
23 p4275 A70-44943

DEFLECTORS

Light beam deflection for three dimensional fixed and time varying visual displays, discussing mechanical, acousto-optic, electro-optic, digital and holographic techniques
08 p1449 A70-20673

Laser color TV display acousto-optic deflectors equalization using prisms
15 p2751 A70-32043

Boeing 737 aircraft nose gear guard deflector and engine vortex dissipator
[AIAA PAPER 70-912] 17 p3020 A70-35824

Light beam direction variation by crystal deflectors, examining changing internal reflection angle by applied electric field or mechanical stress
23 p4196 A70-44411

DEFOCUSING

Steady state thermal defocusing of carbon dioxide laser radiation in gases as function of beam power, gas absorption coefficient and pathlength
06 p1079 A70-17190

Parabolic antenna radiation pattern synthesis under laboratory conditions with space limitations obtainable by defocused antenna method
10 p1853 A70-25132

Saturation of self induced thermal lens resulting from thermal distortion of carbon dioxide laser radiation in wind
11 p2063 A70-26401

Thermal defocusing and deflection of light beam by lateral wind effect in absorbing media
23 p4200 A70-43950

Monopulse tracking antenna beam broadening by feed displacement defocusing in parabolic reflector
23 p4165 A70-44956

DEFORMATION

NT AXIAL STRAIN

NT ELASTIC BENDING

NT ELASTIC BUCKLING

NT ELASTIC DEFORMATION

NT PLASTIC DEFORMATION

NT STATIC DEFORMATION

NT TENSILE DEFORMATION

NT WAVE FRONT DEFORMATION

Nonlinear dynamic beam response for classical and shear deformation theories, comparing stresses and deflections using traveling wave approach with finite difference schemes
01 p0206 A70-11147

Metallographic examination of impact induced deformation textures of Campo del Cielo iron meteorite, analyzing phase homogeneity, microstructures and shock intensity
02 p0377 A70-12511

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands
03 p0588 A70-13248

Axial geometry deformations of laser resonator due to fabrication errors and misalignment during operation
03 p0502 A70-13748

Quenching temperature and deformation conditions for Ti alloy bars optimal mechanical properties emphasizing effect of primary structure
03 p0497 A70-13856

Hologram interferometry accuracy, reliability, application to plate deformation and translation measurements, using moire method and correction factors
03 p0493 A70-13945

Antiplane strain deformation problems concerning crack extension along circular interface separating materials with different shear moduli
05 p0931 A70-16091

Refractory materials deformation and failure analysis based on relations between stresses, strains and irreversible energy absorption per cycle in thermal cyclic fatigue testing
05 p0867 A70-17042

Homogeneous gravitating sphere deformation by internal dislocations determined using Green dyad
06 p1055 A70-17605

Motion of gaseous medium with uniform deformation with respect to three dimensional Cartesian coordinates
06 p1036 A70-17854

Body displacement and deformation measurement by fringe separation in holographic interferometry
07 p1280 A70-19143

Chemical composition and heat treatment effects on deformation resistance of nonaging aluminum alloys during hot working, noting quenching effect on recrystallization
07 p1294 A70-19388

Molybdenum rolling-deformed single crystals recovery and recrystallization using diffraction electron spectroscopy
07 p1307 A70-19550

Stability equations of three layer panels with allowance for rigid filler transverse deformations
07 p1415 A70-20186

Deformable bodies subjected to given load using method of equivalences
08 p1584 A70-20589

Low temperature effects on deformability of middle C steel under complex stress state, showing invalid stress-strain relation and deviator similarity
08 p1516 A70-20983

Deformation amplitude effects on dislocation structure and strengthening mechanism of fcc aluminum under cyclic loading
08 p1516 A70-20985

Integration of Saint Venant equations of deformation continuity for region occupied by elastic medium
08 p1587 A70-21166

Green and Cauchy deformation tensors determined from moire fringe pitch and angle measurements, deriving equations by specimen and master grid geometries indicial representation
[ASME PAPER 69-APMW-21] 08 p1591 A70-21462

Hertzian contact stress deformation coefficients defined in transcendental equation with elliptic integrals noting errors
08 p1593 A70-21617

Oscillatory transverse and longitudinal magnetos-triction in single crystal Bi, obtaining deformation potentials
08 p1557 A70-21838

Optimal deformation and minimum wave drag for wings with supersonic leading and straight trailing edge, solving variational problem by Ritz method
09 p1604 A70-22444

Creep deformation in single crystals of gamma prime precipitation hardened nickel base alloys at intermediate temperatures
09 p1705 A70-22809

Shock deformation of single crystal biotite /lepidomelane/ imbedded in impedance matching NaI, relating kinking intensity to peak pressure and pulse duration
09 p1670 A70-23375

Three dimensional deformation of finite circular cylindrical shell under plane shock wave solved in linear form
09 p1785 A70-23618

Membrane deformations in second order rotating surfaces with positive Gaussian curvature investigated for external couple loaded spherical shells
10 p1958 A70-24515

Temperature, stresses and deformations in melting plates of elastic perfectly plastic material, using penetration depth concept with heat balance approach
11 p2138 A70-26134

Ring buckling under constant and centrally directed pressure, considering small displacement and inextensional deformation
11 p2141 A70-26492

Crack model analysis taking into account nonlinear force-deformation ahead of crack tip
11 p2143 A70-26667

Bar produced by sliding thin walled cross section along three dimensional curve, determining twisted shell curvilinear middle plane and deformations by differential geometry
12 p2326 A70-27796

Relaxation function of linear viscoelastic body, defining mechanical deformation process using Stieltjes integral
12 p2327 A70-28046

Atmospheric activity centers movements dependence on latitudinal variation of deformation force horizontal component, noting earth poles motion
12 p2265 A70-28224

Nonlinear theory describing mechanical behavior of prestressed laminated composites subjected to large deformations
13 p2511 A70-28738

Deformation, mechanical properties and processes during recrystallization annealing of nickel and alloys single crystals
13 p2433 A70-28761

Polymer materials fatigue strength and deformability testing in vacuum, air and gas atmospheres at low and high temperatures, subjecting to cyclic loading
13 p2385 A70-29428

Displacement component in chosen direction on deformed object surface, using hologram interferometry with double illumination
13 p2409 A70-29475

Sliding rigid conical indenter friction experiments over work hardenable metal flats in high adhesion conditions, observing forces, stresses and deformation modes
13 p2421 A70-29548

Operator form added to equations of state of continuous media in case of small and large deformations
14 p2656 A70-30473

Core shear deformations effects on stress, deflection and buckling load calculations for sandwich panels
15 p2815 A70-31931

Internal pressure deformation of thin cylindrical shells of materials with nonlinear stress-strain relations, considering Al alloy shell and axial strain
15 p2816 A70-32009

Solid state mechanics of deformable media, surveying development trends with emphasis on rheology and dislocation theory
15 p2818 A70-32176

Small deformation thermoelasticity theory, discussing thermal conductivity, dynamic elasticity, strain field-temperature relationship, etc
15 p2818 A70-32177

Spherical liquid drop deformation time dependence in unbound fluid at low Reynolds number, investigating effects of temperature, pressure, velocity and size
15 p2722 A70-32795

Shock deformation effects on strengthening and microstructure of Ti and Ti-Mo alloys
17 p3120 A70-34420

Core flexibility effects on deformation of uniformly loaded clamped parallelogrammic sandwich panels using linear theory
17 p3185 A70-34920

Metal matrix alloys with base of Co, Fe or Ni reinforced by transition metal carbide fibers, discussing deformation tests at various temperatures
17 p3124 A70-35142

Materials deformational flow theory, relating dislocation motions in solids to fluid viscosity concept
17 p3190 A70-35452

Cross section deformation effect on helicopter rotor blade torsional vibration, using differential equations of vibrating beam
18 p3334 A70-35959

Stability conditions in straight bar, taking into account stress direction changes caused by deformation
18 p3337 A70-36372

Thermodynamics of solids deformation, tracing macroscopic inelastic behavior to deformation induced internal structural changes governed by atomic and molecular processes
18 p3340 A70-36556

Low temperature creep deformation recorder with liquid He coolant, discussing Al and Pb single crystal tests
19 p3395 A70-37352

SiC whiskers X ray diffraction studies of crystal structure, suggesting single crystal permanent deformation at ambient temperatures
19 p3455 A70-37941

Deformation effects on metallic and semiconductor thin films conductivity
19 p3488 A70-38199

Prebuckling deformations effect on buckling of clamped thin walled circular cylindrical shells under axial loading and internal pressure
19 p3546 A70-38346

Clamped edge thin flat elliptic plate subject to elliptic paraboloidal loading, determining middle surface deformations for nonlinear large deflections
19 p3547 A70-38359

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moiré bands
19 p3548 A70-38466

Duraluminum dislocation structure dependence on deformation temperature by electron microscopy, discussing subgrain boundaries
20 p3646 A70-39045

Cylindrical shells subjected by sectors to constant radial pressure, investigating stress state and deformation
20 p3719 A70-39620

Mirror deformation effect on laser emission angular distribution, estimating output parameters by geometric optics
20 p3642 A70-39741

Diffusion processes effect on stress state, allowing for physicochemical coupling between deformed solid bodies based on continuous media theory
20 p3727 A70-39887

Deformable bodies rupture condition formulation by melting analogy, comparing results to experimental data
20 p3733 A70-40394

Thermally induced mirror deformations and wavefront distortions under radially nonuniform heating
21 p3942 A70-40806

Anisotropic material two dimensional crack propagation under deforming stress at infinity, examining fracture criterion, dislocation distributions and crack nucleation
21 p3936 A70-41413

Mechanical behavior differential equation representation in presence of finite deformations using state variables
21 p3937 A70-41434

Petrology, mineralogy and deformation of Apollo 11 rock samples using microscopic, X ray and electron microprobe methods
21 p3897 A70-41517

Invariance principle in mechanics of deformable continua connecting three dimensional and relativistic space-time formulation
21 p3940 A70-42097

Deformational characteristics of unidirectional glass epoxy composites with ductile and brittle matrices evaluated in flexure
22 p4059 A70-43101

Unidirectional fiber reinforced composite longitudinal shear deformation, deriving effective shear modulus
22 p4060 A70-43681

Fiberglass reinforced plastic strength and deformation properties under creep and stress relaxation, investigating temperature effects and load duration
23 p4209 A70-43980

Spherical shell nonaxisymmetrical deformation under varying loads, relating parameters, Poisson coefficient and complex function
23 p4267 A70-44168

Laser application to deformation and vibration analysis, discussing optical alignment, contactless measurement and holographic interferometry
23 p4201 A70-44335

Steady state creep behavior during multiple deformation process, developing grain boundary sliding relation to grain size
23 p4207 A70-44759

Cylindrical shells with unreinforced openings, determining limit pressures and deformation patterns
24 p4419 A70-45158

German monograph on deformations and tensile stresses calculation in axisymmetric bodies via finite element method involving matrix displacement method
24 p4420 A70-45225

Turbine blades deformation by centrifugal and aerodynamic forces, discussing theory for bending stress free blade design
24 p4288 A70-45505

Spacecraft astronomical instrument structural design, examining aging, vibration and temperature distribution deformations and optical surface contamination
24 p4339 A70-45823

Hydrogen effect on deformation and fracture of polycrystalline nickel
24 p4365 A70-46372

DEFORMETERS

Twin wave interferometer and strain gauge mechanism for press-fit measurements of contact deformation on metallic and polymer samples
03 p0484 A70-13426

DEGASSING

NT DEOXYGENATION

Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing [AIAA PAPER 69-265]
09 p1736 A70-23202

Degassing kinetics during dry friction in vacuum, suggesting gas separation correspondence to oxide film breakdown
13 p2421 A70-29430

Hydrogen separation from supersaturated solid solution in Zn-Zr alloy, measuring at room temperature with eudiometer
15 p2764 A70-32856

Venus deep mantle water degassing rate from atmospheric hydrogen escape data
17 p3154 A70-34610

DEGENERATION

Linear and nonlinear systems natural frequency and stability determination, using theorems for degenerate systems
16 p2944 A70-34284

DEGENERATIVE FEEDBACK

U NEGATIVE FEEDBACK

DEGRADATION

Tractive behavior in elastohydrodynamic lubrication contact noting role of surface degradation layer
05 p0854 A70-15888

Thermoelastic stress degradation of injection lasers at high excitation levels, giving critical current densities for short pulse, CW and quasi-CW conditions
08 p1512 A70-20861

Burning and degradation mechanism of polyester propellants correlated with mass regression rate dependent on surface temperature
11 p2099 A70-25990

Weather effects on plastic properties, discussing weathering interactions with plastics and polymer degradation
12 p2259 A70-27206

Albumin and IgG degradation, studying high altitude effect on hepatic function in man
15 p2683 A70-32532

Senescent *Drosophila melanogaster* flight muscle electron microscopic examination showing mitochondria in stages of degeneration
20 p3574 A70-40075

High voltage solar arrays for ion engines, discussing spacecraft propulsion, electric generation, insulation integrity, cell degradation and current leakage [AIAA PAPER 70-1138]
20 p3567 A70-40211

CdS thin film solar cells, describing manufacture for increased degradation resistance
22 p3966 A70-43537

DEGREES OF FREEDOM

Optimal damping of flexibly mounted rotor by providing system with additional degrees of freedom and applying damping to additional masses
01 p0199 A70-10121

Autonomous two degrees of freedom Hamiltonian system triangular libration points found stable for all mass ratios in circular restricted three body problem
01 p0192 A70-11575

Flight training simulators recording, playback, demonstration and instructor facilities and six degrees of freedom motion system
02 p0273 A70-11840

Dynamical systems with two degrees of freedom reduced to numerical investigation of quadratic area-preserving mapping
02 p0289 A70-11993

Two degree of freedom gyroscopes stability with hydrodynamic grooved rotor bearings, describing parallel and conical whirling rotor oscillations
02 p0307 A70-12163

N degree of freedom pendulum with suspension point vibrating vertically, determining conditions for parametric resonance occurrence
03 p0524 A70-13368

Distributed parameter systems with arbitrarily many degrees of freedom, studying conditions for destabilization absence
04 p0767 A70-14483

Stability characteristics of two degree of freedom gyroscope having hydrodynamic grooved journal rotor bearings, discussing frequency of self excited oscillation [ASME PAPER 69-LUB-H]
04 p0689 A70-14872

Coupled nonlinear systems with two degrees of freedom using transformation techniques
04 p0714 A70-15084

Single degree of freedom nutation damper motion instability on dual spin stabilized spacecraft ascribed to parametric excitation by transverse angular rates
04 p0764 A70-15585

Two degrees of freedom differentiating gyroscope response time decrease and phase and amplitude error reduction, using differential feedback
05 p0853 A70-17003

Electromagnetic wave scattering from finite plasma, discussing statistical measurement errors in degrees of freedom studies
06 p1007 A70-17464

Eigenvalue solutions convergence rates using two finite plate multidegrees of freedom bending elements
06 p1169 A70-17941

Dynamical systems with three degrees of freedom, presenting slice cutting and stereoscopic views graphical techniques for restricted three body problem with perturbations
06 p1149 A70-18462

Laser alignment sensors for measurement and control of five degrees of freedom with increased sensitivity, faster recording and remote meter readout
06 p1083 A70-18591

Book on gyroscope couple stabilizing role on ships, satellites and stabilized platforms, discussing kinetic motion, gyroscopic precession, degrees of freedom, etc
07 p1283 A70-19665

Improper integrals appearing in cross correlation of responses of two single degree of freedom systems to bandwidth limited white noise, deriving Laplace inversion formulas
07 p1236 A70-20067

Two degrees of freedom assemblies transient motions using computer, solving acceleration and deceleration problems in mechanical systems
08 p1502 A70-20699

Nonlinear quasi-harmonic systems forced vibrations using one degree of freedom system as example
08 p1543 A70-20700

Linear one degree of freedom mechanical system loaded by time dependent force with constraints on loading/unloading rate, studying minimum of dynamic coefficient
09 p1727 A70-22536

Shock absorbing forces for absorber with one degree of freedom optimized for given acceleration during periodic disturbances by variational method
09 p1727 A70-22537

Combination resonance in two degree of freedom dissipative nonlinear system using small parameter and Ritz-Galerkin methods
09 p1727 A70-22667

Three degrees of freedom astatic gyroscopes dynamic characteristics determination by vibration tests
09 p1681 A70-23300

Nonlinear many degrees of freedom systems steady state forced vibrations analysis, expressing response in nonlinear normal coordinates
10 p1954 A70-24010

Periodic orbits for reduced problem of conservative Hamiltonian system with two degrees of freedom, discussing emergence from resonant equilibrium
10 p1939 A70-24187

Flight simulator for advanced aircraft /FSAA/ featuring six degrees of freedom and 100 ft lateral travel [AIAA PAPER 70-359]
10 p1858 A70-24205

Aircraft flight displays, simulating low altitude high speed mission by four degree of freedom Dynamic Flight Simulator [AIAA PAPER 70-343]
10 p1859 A70-24216

Computer simulation of six degree of freedom motion system and actual system test, substantiating simulation accuracy [AIAA PAPER 70-358]
10 p1859 A70-24218

Equations of motion, modal vectors and natural frequencies of n-degree of freedom structurally damped linear system determined directly from test data
10 p1961 A70-25058

Three degrees of freedom astatic gyroscope drift due to base vibrations according to harmonic law
11 p2048 A70-25579

Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application
11 p2138 A70-26158

Ground testing apparatus with three degrees of freedom for artificial satellites attitude control

systems, establishing mathematical model by digital and analog techniques

11 p2031 A70-26290

Multidegree of freedom linear vibrating system analysis by dividing differential equation method

11 p2139 A70-26414

Random vibration isolation for two degrees of freedom model system investigated statistically, assuming wide band white noise

11 p2139 A70-26416

Elastic system stability with two degrees of freedom under action of retarded follower forces

11 p2142 A70-26631

Blade torsional degree of freedom effects on stability and flapping response of rotors operating at high advance ratios

13 p2507 A70-28444

Book on vibrations covering natural oscillations, damped and undamped oscillations, energy sources, forced vibrations, resonance and multiple degree of freedom systems

13 p2515 A70-29452

Missile aerodynamic characteristics investigation in subsonic low turbulence wind tunnel with three degrees of freedom angular motions

[AIAA PAPER 70-578]

13 p2342 A70-29891

Nutation damper for dual-spin spacecraft, considering various two degree of freedom systems with two natural frequencies

14 p2655 A70-31367

Equivalent linearization for random vibration, considering stationary statistics of bilinear hysteretic one degree of freedom oscillator response

14 p2661 A70-31428

Navier-Stokes equations derivation for multicomponent gas with internal nonrotary degrees of freedom, using moment equations

15 p2672 A70-31649

Stability loss of dynamic two dimensional mechanical elastic system with single degree of freedom under trajectory bifurcation

15 p2775 A70-32474

Linear systems with two degrees of freedom modeled as rigid beam on elastic supports, considering vibration damping

16 p2996 A70-34291

Tau-decomposition stability analysis method applied to two degrees of freedom system subjected to retarded follower forces

17 p3176 A70-34957

Pisarenko generalized equations for hysteresis loop contour applied to oscillations of one degree of freedom system

17 p3137 A70-35710

Nonlinear differential solutions for free isochronous oscillations of conservative one degree of freedom oscillators

18 p3283 A70-36386

Thermodynamical modeling by regular systems of deformable bodies bound by hyperelastic medium with internal degrees of freedom, formulating equations of motion

18 p3338 A70-36432

Asymptotic, averaging and Ritz methods for steady state periodic vibrations of nonlinear systems with many degrees of freedom

18 p3338 A70-36437

Gyroscope in gimbal suspension on free base of four solid bodies connected by flat hinges

18 p3259 A70-36593

Flutter analysis of n degrees of freedom system, basing stability criteria on energy balance considerations

19 p3542 A70-38244

Linear elastic structure with few degrees of freedom, discussing parameters experimental determination

21 p3935 A70-41409

Single degree of freedom gyroscope design factors applicable to strapdown guidance system, discussing torque-to-balance loop, multiple pulse bursting and error sources

[AIAA PAPER 69-848]

21 p3849 A70-41859

Nonlinear coupling in systems with two degrees of freedom, deriving transformation laws for uncoupling

21 p3940 A70-42054

Parametric phenomena in oscillatory system with unlimited number of degrees of freedom, illustrating segment of long line loaded at one end

22 p3995 A70-42395

Periodic motions of arbitrarily long periods for idealized nonlinear spring-mass systems with two or more degrees of freedom

22 p4073 A70-42699

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts

[AIAA PAPER 69-766]

22 p3961 A70-42703

Classical calculations for energy transfer to diatomic molecules with rotational and vibrational degrees of freedom in atom-diatom-molecule collisions

23 p4221 A70-44010

Laser sensors as alignment instrument for control and measurement of five degrees of freedom

24 p4351 A70-45383

Multidegrees of freedom electronic cabinets dynamic response to AM fast sine sweep

[SAE PAPER 700846]

24 p4380 A70-45884

DEHUMIDIFICATION

Aerodynamics, heat and mass transfer in vapor condensation from humid air on flat plate in longitudinal flow in asymmetrically cooled slot

01 p0004 A70-11178

Vacuum supersonic wind tunnel air continuous dehumidification by using multistage centrifugal blower with/without heat exchanger

12 p2206 A70-27153

DEHYDRATION

Dehydrated food effects on human functional state, noting published literature on food composition, preparation, caloric and nutritional values, digestibility, etc

03 p0435 A70-13703

Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets

03 p0435 A70-13713

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months

04 p0630 A70-14577

Mild temperature and dehydration effects on toxicity of caffeine and dextroamphetamine in mice

09 p1616 A70-22329

Dehydrated food effects on human functional state, noting food composition, preparation, caloric and nutritional values, digestibility, etc

11 p1989 A70-25503

Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets

11 p1989 A70-25513

Dehydration effects on rabbits acceleration resistance

17 p3025 A70-35134

Intracellular shifts in body fluids and dehydration tolerance in burro, comparing water content of desert animals

21 p3766 A70-42157

DEHYDROGENATION

Dicyclohexyl /DCH/ endothermic dehydrogenation to diphenyl /DP/ over platinum-alumina catalyst without added hydrogen considered for hypersonic aircraft engine cooling

14 p2546 A70-31175

Dehydrogenases activities in rabbit retina homogenates exposed to oxygen at high partial pressure for various time periods

21 p3765 A70-41487

DEICERS

Electrothermal helicopter rotor blade deicing system, discussing design, operation and solutions for mechanical and reliability problems

13 p2348 A70-29552

DEICING SYSTEMS

U DEICERS

DEIMOS

Phobos and Deimos photographic reconnaissance feasibility during 1971 orbiter and 1973 Viking missions, studying trajectory

06 p1146 A70-18191

Phobos and Deimos photographic reconnaissance feasibility during 1971 Orbiter and 1973 Viking missions, studying trajectory

23 p4243 A70-44507

DEIONIZATION

Maximum plasma decay rate in heterogeneous medium determined from deionization process in rarefied gases

03 p0536 A70-14369

Cosine dependence of F 1 critical characteristics on solar zenith angle discriminating alpha neutralization and mixed alpha-beta deionization

06 p1057 A70-17841

Metal corrosion product dissolution in reactor cooling deionized water, investigating Cu, W and Cd using chemical analyses

10 p1904 A70-24398

Ni particles induced quenching measured by probes in afterglow plasma of pulsed linear discharge, determining deionization rate

16 p2958 A70-33687

He/plus/-H/minus/ collisional charge exchange cross sections, using modulated inclined ion beams technique

21 p3852 A70-40599

DEKATRONS

U COUNTERS

DELAY

Saddle point existence in determinate integrodifferential games with variable delay, assuming given control function over time interval

10 p1911 A70-25183

Dwell time boundary and mean values for laminar flows through channel and tube reactors, obtaining field representation from streamline network and isochrones

16 p2893 A70-33745

Ignition delay of uncompressed composite solid or hybrid propellant mixtures in rocket engine igniters

18 p3301 A70-36651

DELAY CIRCUITS

Analog time delay device for returning respiratory flow signal to correct time

01 p0035 A70-10654

Axial emission impedance antenna converting strongly delayed surface wave into weakly delayed wave forming cophased front at antenna end

03 p0456 A70-13199

Dispersion equation and coupling impedance of two dimensionally periodic slow wave structure of cellular cylinder type with parallel perpendicular diaphragms

03 p0456 A70-13438

Adjustable pulse delay circuit design utilizing slow switching action of storage diodes emphasizing thermal stability

05 p0820 A70-16343

Microwave variable delay devices, discussing solid state microwave acoustic interactions

06 p1019 A70-17483

Corrective open-loop circuit, using delay elements for compensation of transient response in linear circuits with lumped parameters for pulse modulation transmissions

06 p1023 A70-17774

Delay locked closed loop system with and without signal clipping in noisy /Gaussian/ environment applied to radar, sonar and seismic propagation

07 p1242 A70-19997

Beam delay line for introducing variable gradients in Molonglo radio telescope, discussing circuits and performance

08 p1478 A70-21824

Adaptive equalizer consisting of canonical link structure with minimum number of delay elements applied to fast data transmission

09 p1640 A70-22039

Phase characteristics of nonperiodic slow EM wave delay structures determined by phase shift measurements

12 p2230 A70-26967

Power reduction consumed in vacuum by direct-direct voltage converter by introducing delay into breaker transistor control at output stage

15 p2677 A70-31945

DELAY LINES

NT ACOUSTIC DELAY LINES

NT DELAY LINES [COMPUTER STORAGE]

Radar primary plot extraction, suggesting signals summing technique in delay line

02 p0256 A70-11975

Rise time relationship with signal bandwidth for class of TEM mode microwave delay line filters

02 p0257 A70-12185

M-type transmission line with cyclotron waves to achieve phase inverter and delay line operation, showing phase sensitivity to magnetic field changes near cyclotron resonance

03 p0447 A70-13292

Transversal filters with continuously tapped delay lines, emphasizing synthesis of low pass filter and phase shifter

05 p0822 A70-16652

Wideband transversal coaxial cable delay lines used for improving radar systems target recognition by eliminating misleading signals and distortion

05 p0822 A70-16723

Microwave acoustic transducer and delay line properties determination from mathematical analysis

06 p1062 A70-17481

Multichannel correlator for turbulent signal processing in real time scale using natural delay

07 p1284 A70-19832

Radio telescopes relaying interferometers characteristics noting delay in IF channel and wideband performance

08 p1495 A70-21068

Cross type radio telescope beam forming and steering system, describing switched delay lines and phasing circuits

08 p1477 A70-21823

Beam delay line for introducing variable gradients in Molonglo radio telescope, discussing circuits and performance

08 p1478 A70-21824

Phase modulated optical range finder with RF coaxial delay line

13 p2412 A70-29872

Wideband pulse signal synthesis and optimal filtration by dispersive ultrasonic delay lines, estimating potential noise stability for analog data transmission

15 p2696 A70-31502

Avalanche transistor circuits for rectangular pulses generation, considering delay line for optimum results

18 p3233 A70-36774

Microwave L-band correlator using YIG delay lines varied by electronically changing magnetic bias

20 p3597 A70-39468

Magnetoplasma interaction with axially slotted delay line, examining coil behavior physical mechanisms by cold plasma model

22 p4079 A70-42365

S band tunable free running high Q triode oscillator phase and frequency instability measurement based on delay lines applications

23 p4170 A70-43796

DELAY LINES [COMPUTER STORAGE]

Analogue shift register for use as delay line and digital filter, discussing applications to radio astronomy

18 p3261 A70-37088

DELIVERY

Shot delivery per second per unit area from ejector nozzle during shot peening, determining ideal delivery rates for shot of various sizes

07 p1291 A70-18830

DELIRIN [TRADEMARK]

Kinetic model for acid catalyzed Delrin decomposition, testing for Delrin-citric acid system and predicting thermograms with nonlinear regression analysis

09 p1630 A70-22896

DELTA DART AIRCRAFT

U F-106 AIRCRAFT

DELTA FUNCTION

Green function type solutions of shell equations by small parameter technique for case of free terms consisting of Dirac delta function

01 p0212 A70-11565

Exchange perturbation theories applied to delta function model of molecular hydrogen ion, discussing EL-HAV second order energy at large internuclear separations

05 p0884 A70-15878

Aerodynamic coefficients of nonconvex bodies in free molecular flow of monatomic gases based on delta representation of flow velocity distribution function

08 p1432 A70-21084

Time and spatial evolution of shock and expansion wave evolution from density discontinuity for gas with repulsive delta function interaction between particles

13 p2388 A70-29224

LF passband ideal filter instantaneous pulse response, using delta function model

22 p4005 A70-43555

Delta function approximation in diffuse transmission and reflection of light for phase function with sharp forward peak, using scattering compensation

23 p4214 A70-44034

DELTA LAUNCH VEHICLE

OSO 1-6 spacecraft design, payloads and performance for continuous solar observation, discussing instrumentation and Delta launch vehicle characteristics

14 p2638 A70-30691

Delta launch vehicle for scientific and application satellites, describing three stage liquid and solid propulsion systems

15 p2810 A70-31783

Delta launch vehicle design modifications for increased payload and space research programs

17 p3179 A70-35261

DELTA MODULATION

Satellite communication system using delta modulation for telephone service to large number single channel earth stations

10 p1834 A70-24329

Delta modulation with slope-overload prediction, showing signal to noise ratio improvement from computer simulation

13 p2365 A70-29146

Delta modulation threshold extension technique for phase lock loop FM demodulator

15 p2703 A70-32559

Asynchronous delta modulation channels with RLC integrators in feedback circuit, measuring articulation in presence and absence of noise

20 p3587 A70-40144

Output signal/quantization noise ratio, dynamic range and transmission error effects for syllabically companded delta-sigma modulator systems

24 p4320 A70-46152

DELTA WINGS

Supersonic flow around thin warped delta wing, taking into account current separation at subsonic leading edges for pressure distribution and aerodynamic characteristics

01 p0002 A70-10546

Surface shape determination for thin delta wing with variable geometry to minimize drag for given open and closed configurations and cruising supersonic speeds

01 p0002 A70-10547

Minimum drag hypersonic delta wing, analyzing shape for given planform, lift, pitching moment and volume using correction for pressure coefficient

01 p0002 A70-10557

Leading edge suction analogy for predicting low speed lift and drag-due-to-lift characteristics of sharp edge delta and related wing planforms

[AIAA PAPER 69-1133]

01 p0002 A70-10607

Asymptotic method based on Landahl small perturbation theory applied to perturbation velocity potential for oscillating delta wing in transonic flow

02 p0223 A70-11775

Supersonic flow separation at antisymmetrical delta wing edges, noting eddy layer and vertical velocity fields effects on aerodynamic characteristics

02 p0224 A70-12625

Wave drag dependence of delta wings on thickness distribution

[DVL-888]

03 p0406 A70-13273

Slender delta wing aircraft dynamic behavior under vertical and lateral gusts, particularly during landing approach

[DGLR-69-52]

04 p0623 A70-15145

Delta wing of given volume and planform with maximum lift-drag ratio in hypersonic flow

04 p0618 A70-15243

Aerodynamic characteristics, stability and controllability of swept wing and delta wing supersonic aircraft at subsonic velocities

05 p0796 A70-16966

Three dimensional supersonic flow around delta wings, considering lifting and thickness problems, leading edge characteristics, separated and non-separated shock waves, etc

06 p0964 A70-17241

Nonlinear theory extended to slender triangular and rectangular wings with symmetric profile, taking into account finite wing thickness

06 p0966 A70-17254

Supersonic aircraft aerodynamic properties and control systems performance, considering piloting of delta wing fighters

07 p1194 A70-19640

Swept and delta wing supersonic military aircraft stability and controllability, discussing variation in maximum lift coefficient as function of Mach number

09 p1611 A70-23129

Triangular conical wing with supersonic leading edges analyzed for aerodynamic forces in supersonic flow

10 p1798 A70-24121

Flow past yawed delta wing at supersonic flight velocities, obtaining real velocity near singular surface and replacing Mach number by perturbed parameter

10 p1799 A70-24126

Off-centerline heating on lee surface of supersonic delta wing with separation and vortex initiation at leading edge

11 p1976 A70-25996

Delta wing low aspect ratio aircraft vorticity generating effects, discussing wind tunnel tests for hazardous effects

12 p2156 A70-27692

Tailless delta Avro Vulcan aircraft design, hardware and flight results

14 p2532 A70-31391

Displacement interacting boundary layer in symmetry plane region of flat hypersonic delta wing by control volume balances for mass, momentum and energy

17 p3010 A70-34975

Hypersonic flow around delta wings of finite thickness with supersonic leading edges

18 p3206 A70-36260

Mathematical model of three dimensional separated flows with applications to small aspect ratio delta wing and flat plate

18 p3207 A70-36438

Aerodynamic characteristics of thick sharp edged cropped delta and gothic wings, giving low lift-dependent drag

19 p3353 A70-38615

Hypersonic flow pattern past windward side of triangular wing with supersonic leading edges, joining potential and vortex regions behind shock wave

21 p3743 A70-40609

Wave rider aerodynamic properties at small Reynolds numbers, using non-Weiler wing for flow field, pressure and force measurements at rarefied flow conditions

[AVA-FB-7029]

23 p4135 A70-44668

Oscillatory motion of triangular wing with conical body of arbitrary cross section in supersonic flow, considering wing-body interference effects

24 p4288 A70-45592

Inviscid hypersonic flow fields past lower/compression/ surface of delta wing calculated by one strip approximation of integral relations method

24 p4289 A70-46245

DEMAND [ECONOMICS]

Information transfer services potential demand including telephone, telegraph, videophone, electronic mail, etc

[AIAA PAPER 70-443]

11 p2152 A70-25448

Demand analysis data generation for V/STOL systems suitable for New York-Philadelphia-Washington business travel market, applying model to selected designs

[AIAA PAPER 70-1241]

24 p4374 A70-45961

DEMULATION

Demodulation of signals modulated with respect to wave period, deriving spectral width of pulsed period modulation

03 p0446 A70-13200

Linear phase detection using FM demodulation for Apollo S band communication system eliminating baseband voice interference with telemetry

[AAS PAPER 69-610]

04 p0648 A70-14659

Binary decoding extension to achieve unquantized demodulation performance for nonfading phase shift keyed coherent channel with white Gaussian noise

06 p1008 A70-17525

PSK demodulation by optimal carrier and bit synchronization methods based on nonlinear filter theory, relating error probability to signal to noise ratios

08 p1458 A70-20795

Interferometric combinations of frequency-shifted mode-locked laser pulses achieved by optical modulation-demodulation methods

12 p2249 A70-27755

Automatic phase control of demodulating signal in one dimensional extremal system with harmonic tracking oscillations

12 p2205 A70-28338

Digital sampled data demodulation, discussing methods of obtaining quadrature channels from single signal

15 p2703 A70-32579

FM demodulation threshold extension by correlation detection implemented in impulse noise cancellation system

19 p3382 A70-38893

High speed photodetectors for microwave demodulation of light, discussing electrical properties, equivalent circuits and noise factors

21 p3799 A70-41420

Coherent reference for demodulating double sideband suppressed carrier [DSB-SC] signals in presence of frequency detuning, using squaring or Costas loop

22 p3990 A70-43326

DEMULATORS

NT FREQUENCY COMPRESSION DEMULATORS

NT PHASE DEMULATORS

NT PHASE LOCK DEMULATORS

Light pulse demodulator using zero crossing technique to eliminate photomultiplier bandwidth and sensitivity limitations

02 p0271 A70-12744

Modem selection for satellite communications system, considering bandwidth and power constraints, propagation characteristics, point-to-multipoint operation, etc

08 p1459 A70-20807

Higher order frequency demodulators with feedback in canonical form and with baseband filter

08 p1479 A70-20809

FM feedback demodulator performance model using mixer-correlator, showing cross correlation receiver design

08 p1479 A70-20810

Multichannel performance measurement of threshold extension FM demodulators using click suppression techniques

08 p1460 A70-20812

Communication satellite PSK modulator-demodulator /modem/ implementation requirements and design for optimal performance

10 p1835 A70-24336

Threshold extension demodulator /TED/ using bandpass filter without oscillator for FM multiplex

12 p2197 A70-27908

Modulation-demodulation system for multiple access tactical satellite communication

12 p2187 A70-27915

Demodulators threshold performance for satisfying carrier to noise ratios requirement of Intelsat 4 system

14 p2552 A70-31352

Multilevel FSK system with limiter discriminator followed by low pass filter as demodulator, calculating error rates for comparison with other analyses

23 p4161 A70-44003

DEMONSTRATION

U PROVING

DENDRITIC CRYSTALS

Electrolyte purity effect on initiation times and growth rate of Zn dendrites in alkaline zincate solution, discussing dendrite initiation retardation

07 p1356 A70-19387

DENITROGENATION

Ground level denitrogenation duration effects on decompression sickness occurrence in space cabin atmospheres

06 p0999 A70-17289

Bends incidence in altitude training, examining denitrogenation role

24 p4307 A70-45339

DENSIFICATION

Superplastic nickel superalloys fabrication by controlled densification during direct extrusion

12 p2257 A70-28020

WC as densification aid for NbC-C composites, examining fabrication temperature, mechanical properties, solid solution composition, etc

15 p2757 A70-31797

DENSITOMETERS

Jovian cloud layer light and dark matter albedo determination, applying photographic densitometry

02 p0375 A70-12431

Parachute-borne densitometer using forward scattering of low energy beta particles for direct measurement of atmospheric density at 30-60 km

[AAS PAPER 69-570]

04 p0687 A70-14654

Satellite lines from diffraction grating observed by densitometer tracings of plates connected with optical mixing in stimulated Brillouin scattering
04 p0701 A70-15030

Blood reflection densitometer with linear response to changes in indocyanine green dye concentration, using simple analog computation
07 p1221 A70-19589

Satellite-borne experiments of neutral molecular beam-solid surface interactions, describing Molsink chamber, densitometer, sphere and paddlewheel satellites
07 p1344 A70-20128

Transistor densitometer used for variable star interpretation by amateur photographers
15 p2740 A70-32348

DENSITY [MASS/VOLUME]

NT ATMOSPHERIC DENSITY
NT GAS DENSITY
NT SPACE DENSITY

Icarus asteroidal nature and fragmentation origin suggested from inclusion in angular momentum density-mass diagram
01 p0180 A70-10538

Nb binary and tertiary alloys density changes found proportional to alloying element content
03 p0511 A70-13489

Quarkian substance properties noting possibility of superconducting state at high densities
04 p0753 A70-15074

Turbulent wake behind plate due to confluence of two incompressible fluids with different densities
07 p1261 A70-20463

Inorganic ceramic materials in design and fabrication of microwave antennas, filters and stable resonators, discussing density and dielectric constant variability by ceramics foaming
09 p1689 A70-22007

Ti-Al-Nb system creep strength, oxidation resistance, density, forging and rolling
17 p3120 A70-34426

Thermal conductivity of particulate basalt as function of density in simulated lunar and Martian environments, noting temperature and pressure effects
18 p3316 A70-36772

Equation of state of nuclear neutron matter as function of density
19 p3524 A70-38695

W-Mo-Nb-Ta system with constant 30 percent W, discussing specific weight and hardness
19 p3453 A70-38714

Turbulent wake behind plate due to confluence of two incompressible fluids with different densities
20 p3557 A70-39263

DENSITY [NUMBER/VOLUME]

NT ELECTRON DENSITY [CONCENTRATION]
NT ELECTRON DENSITY PROFILES
NT ELECTRON DISTRIBUTION
NT ION DENSITY [CONCENTRATION]
NT IONOSPHERIC ELECTRON DENSITY
NT IONOSPHERIC ION DENSITY
NT MAGNETOSPHERIC ELECTRON DENSITY
NT MAGNETOSPHERIC ION DENSITY
NT MAGNETOSPHERIC PROTON DENSITY
NT METEOROID CONCENTRATION
NT PACKING DENSITY
NT PARTICLE DENSITY [CONCENTRATION]
NT PLASMA DENSITY
NT PROTON DENSITY [CONCENTRATION]
NT SPACE DENSITY

Neptune data from photoelectric observations of 7 April 1968 occultation of BD-17 deg 4388, determining hydrogen dominance and molecular density
14 p2642 A70-30890

Graphite fibers made from polyacrylonitrile yarn examining density-Young modulus relationship
17 p3127 A70-35149

Trojan asteroids in sun-Jupiter system, determining density near preceding Lagrangian point
17 p3171 A70-35445

Lunar crater number and density vs diameter graph, showing rhythmical deviations from mean asymmetrical cosine curve
19 p3517 A70-37990

K and M star molecular constituent density calculations using model atmospheres and observations
20 p3702 A70-39015

Small craters number density in southern lunar highlands, supporting Tycho Association cometary impact origin
21 p3920 A70-41882

DENSITY [RATE/AREA]

U FLUX DENSITY

DENSITY DISTRIBUTION

Density distribution measurements in flow field using interference methods, including laser light sources
01 p0085 A70-10268

Thermospheric neutral density amplitudes and phases using one dimensional model of geomagnetic activity effect, 27 day variation and semiannual variation
01 p0070 A70-10402

Density distributions of electrically charged trace components in axisymmetric jets, considering space charge effect and ambipolar diffusion
01 p0066 A70-11135

Atmospheric density variations in thermosphere determined from braking satellite data, discussing correlation with solar activity and temperature variations
01 p0077 A70-11202

Atmospheric density on basis of photographic observations of meteors, comparing vertical profile with CIRA profile
01 p0084 A70-11556

Jupiter atmosphere temperature and density profiles determined from thermal models based on thermal structure above dense cloud level
02 p0367 A70-11814

Velocity and density profiles obtained from mass diffusivity time measurements in axisymmetric turbulent air pipe flow over specific Reynolds number range
02 p0295 A70-11853

Chemical kinetics in reaction zone of shock heated hydrogen-carbon monoxide-oxygen mixtures, measuring density field behind normal shock wave by optical interferometry
02 p0250 A70-12022

Measurement techniques for determining density and temperature distributions along radius of plasma cylinder by electron cyclotron resonance, microwave refraction and acoustic resonance
02 p0349 A70-12758

Schlieren photograph intensity variations correlated with statistical parameters for turbulent flow density variations
03 p0464 A70-12941

Density effects on transport coefficients of gaseous mixtures, solving modified Boltzmann equation including collisional transfer and three-particle collision effects
03 p0606 A70-13576

MHD flow velocity and current density distributions in annular duct with radial magnetic field
04 p0725 A70-14531

Statistical electron density distributions and Thomas-Fermi-Dirac screening functions for positive ions with various ionization degrees
04 p0721 A70-14666

Electron beam technique to measure density profiles of strong shock waves in argon
04 p0692 A70-15325

Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase
04 p0654 A70-15728

Ionospheric air density profiles revision based on satellite orbits analysis
05 p0839 A70-16287

Lunar density gradient, free oscillation and tides study inferring lunar atomic number similarity to Si and earth mantle
05 p0908 A70-16316

Density spectra of cosmic ray showers measured by scintillators and GM counters
05 p0902 A70-16458

Electromagnetic wave phase characteristics after free space passage through statistical medium with wave disturbance producing density and ionization
05 p0815 A70-16735

Ionospheric horizontal discontinuities of electron density distribution parameters effect on penetration frequency, skip distances and arrival angles
05 p0842 A70-16743

Density wave theory and Schmidt model applied to Milky Way spiral structure, considering systematic motion of interstellar neutral hydrogen
05 p0918 A70-16928

Electron density distributions relation to D region diurnal and seasonal variations in radiowave absorption in terms of transport processes near mesopause
06 p1054 A70-17589

Automatic control for filling tanks with stably stratified liquids using analog mixture valve and digital metering pump methods
06 p1062 A70-17617

Pulsed plasma transfer systems weight analysis, studying propellant density gradients effects on coaxial plasma gun performance
06 p1133 A70-18231

[AIAA PAPER 70-168]

Unsteady nonlinear molecular flow problems concerning plane Couette flow, heat transfer between parallel plates and density discontinuity propagation solved by Monte Carlo method
06 p1113 A70-18321

Model sampling or Monte Carlo applied to normal shock, giving temperature and density profiles for Mach 10 shock
06 p1050 A70-18337

Density field around leading edge of blunted flat plate, using electron beam measurements in low density hypersonic wind tunnel
06 p0980 A70-18351

Cylinder wakes in rarefied gas flow at Mach 20, obtaining density profile data from electron gun, impact pressure and cooled film probe measurements
06 p0984 A70-18387

Cadmium vapor density distribution by cataphoresis in He-Cd laser discharge tube determined by side light measurements
06 p1084 A70-18613

Surface tension plotted against density and temperature of hydrocarbon jet fuels, determining critical temperature
07 p1357 A70-18653

Single parameter photometric analysis for density distribution of matter in comets atmospheres
07 p1374 A70-18707

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics
07 p1226 A70-18761

Material inhomogeneity during high temperature fatigue tests taking into account probability density of random failure coordinate distribution
07 p1401 A70-18839

Galaxies statistical distribution studied to determine superclusters existence, correlating results with random distribution expectations
07 p1375 A70-18868

Pressure drop at slender profile performing harmonic vibrations near interface between two media of different density solved by numerical method
07 p1254 A70-19079

Interstellar gas ionization and heating by background X radiation, studying neutral hydrogen density distribution between spiral arms and at galactic peripheries
07 p1383 A70-19401

Bumper materials effect on two component hypervelocity impact shields performance, noting material density influence
07 p1310 A70-19713

Helium and argon atoms number densities radial profiles in supersonic free jets of binary gas mixtures by molecular beam sampling
07 p1341 A70-20105

Integral methods of obtaining electron density profile of planetary ionospheres and interplanetary gases
07 p1388 A70-20160

Compressibility effect on density explaining Mercury-Venus density near equality to earth- Mars-moon, discussing theory of rotational break-up of parent planets
08 p1563 A70-20496

Density profiles of sphere wake in rarefied hypersonic flow compared to free molecular flow calculations
08 p1431 A70-20591

Interplanetary density distribution of cold interstellar origin hydrogen dependent on solar EUV flux, considering interaction with solar wind protons
08 p1562 A70-21401

Laser interferometric technique involving use of unstable external resonator to facilitate electron density measurements in presence of transverse plasma density gradients
08 p1499 A70-21693

Radiation transfer in scattering medium with nonuniform density distribution of absorbing matter expressed in terms of photon distribution
09 p1666 A70-22178

Uniformly rotating gas disk large scale spiral structure analysis, studying density waves due to gravitational disturbance by supersonic particle
09 p1755 A70-22503

Nonlinear stellar density waves in galaxy using gas dynamic equations, assuming one dimensional and steady waves
09 p1762 A70-23073

Blast waves in low Mach number regime with assumption of power law density profile in rear, obtaining particle velocity and pressure distributions
09 p1661 A70-23214

Ion density profile across shock in partially ionized gas measured in plasma jet wind tunnel for comparison with Rankine-Hugoniot relation
09 p1662 A70-23235

Earth shape formulas reduction to Taylor series, considering Molodenski reduction method for simple layer density integral equation
09 p1670 A70-23343

Transition from compressible to incompressible fluid assuming isothermal flows and finite stresses for density at or different from initial value
10 p1863 A70-24008

Latitudinal ionospheric electron density and temperature variations at 1000 km within and near auroral zone
12 p2222 A70-27186

Doped semiconductors electronic state density in forbidden band, assuming fluctuations in impurities in form of homogeneous spheres with varying charges and radii
12 p2286 A70-27363

Shock wave reflection into ideal gas flow with linear density variation analyzed for flow field
12 p2211 A70-27832

Gasdynamic flows strong and weak density discontinuity surfaces determination, using shadowgraphs and interference patterns
12 p2238 A70-28248

Low latitude atmospheric vertical density variations, comparing solar and geomagnetic activities effects

12 p2227 A70-28264

Turbulence spectrum due to density fluctuations in plasma with strong magnetic field, using hydrodynamic theory and Poisson equations

13 p2457 A70-28559

Plasmopause and polar wind, considering density discontinuity due to outer magnetosphere heating during magnetic storms

13 p2491 A70-29059

Time and spatial evolution of shock and expansion wave evolution from density discontinuity for gas with repulsive delta function interaction between particles

13 p2388 A70-29224

Density wave theory and spiral gravitational field effects in migrating stars orbits and origins in Milky Way spiral arm, using Schmidt model

13 p2495 A70-29801

Laminar flow of suspension over flat plate, analyzing particulate velocity and concentration profiles relationships to drag and lift forces

14 p2565 A70-30270

Stratospheric warmings effect on atmospheric density field variations

14 p2608 A70-30592

Backscattered signal power density distribution along equivalent propagation path of delayed components, determining reflecting layers characteristics from echo signal phase

14 p2550 A70-30812

Linear density gradients in isopycnic centrifugation technique for selecting synchronous daughter cells from asynchronous *Chlorella* cultures

14 p2546 A70-30985

Strong shock waves profiles in monatomic perfect gases by Monte Carlo simulation, obtaining maximum density slope thicknesses

14 p2567 A70-31031

Hypersonic low density transitional flow over slender conical vehicle, calculating drag coefficient and density profiles

14 p2529 A70-31365

Temperature and density extreme variations at various levels in stratosphere and mesosphere, analyzing sounding rocket data

15 p2723 A70-31661

Ionospheric density profiles measurement by accelerometers on SPADES and Cannon Ball 1 satellites, comparing results with prediction from atmospheric model

15 p2724 A70-31686

Terrestrial planetary ionospheres, discussing charged particle density distribution of Mars daytime ionosphere and Venus day and dark sides

15 p2799 A70-31748

Internal ballistics equations solution on basis of pressure index law of burning taking into consideration density approximation

15 p2786 A70-31849

Inhomogeneous ion beam plasma LF instability, showing oscillations amplitude maxima in radial density gradient regions

15 p2780 A70-32193

Power density fluctuations in emission peaks of ruby laser determined by splitting beam into two components and using photosensitive element and photomultiplier recording

15 p2754 A70-32874

Shock wave front propagation instability in decreasing density medium, applying to stellar structure

16 p2890 A70-33200

Turbulent kinetic energy equation for determining turbulent flow fields applied to free mixing problem of constant density streams

16 p2894 A70-33856

Turbulent flow in stratified fluids over flat plate, relating density profile curvature and heat transfer

16 p2895 A70-34242

NO in earth atmosphere, describing theory of formation for explaining observed density distribution

18 p3245 A70-36019

Density diffusion and buoyancy effects on horizontal boundary layers in stratified flow

18 p3239 A70-36193

Continuous signal a posteriori distribution density formed on basis of learning sequence with no a priori information about signal and noise statistics

18 p3229 A70-37105

Galactic spiral structure model, examining nonlinear stellar density waves in plasma cylinder

18 p3322 A70-37131

Tightly wound spiral nonlinear density waves in pressureless self gravitating disk with external gravitational field, examining solid body and differential rotation

18 p3331 A70-37192

Electron concentration vertical profile in ionosphere as function of altitude of radio wave reflection and group refraction and velocity characteristics

19 p3409 A70-37329

Light propagation in plane parallel layer of scattering medium containing absorbing substance with random density distribution

19 p3461 A70-37422

Fluctuations in radiation power density of solid state laser near focal plane of convergent lens, using device for selecting and recording individual peaks

20 p3643 A70-40022

Low voltage slotted hollow cathode laser tube design with transverse discharge operation and uniform axial distribution of laser media, including metal vapors

21 p3834 A70-40571

Subsonic air flow around airfoil in wind tunnel, detecting density gradients by pulsed ruby laser holographic visualization

21 p3822 A70-40809

Midlatitude stratosphere and lower ionosphere density model, discussing vertical, diurnal and seasonal variations effects on spacecraft trajectories

21 p3813 A70-40830

Reflection nebulae dust density, noting lower limit dependence on absolute magnitude of illuminating star

21 p3889 A70-41149

Turbulent density fluctuations statistical properties analysis by cross correlation technique with schlieren instruments

21 p3807 A70-41242

Axial propellant density gradients and circuit capacitance correlated with pulsed coaxial plasma gun efficiency

21 p3858 A70-41726

Pressure field behind shock wave after interaction with nonuniform density region, describing shock front shape

21 p3810 A70-41964

Radio source count formula in zero pressure model universe for background radiation differential density evolution function

21 p3923 A70-42104

Star content in Small Magellanic Cloud wing counted to determine detachability from tidal arm and main body

22 p4099 A70-42628

Cloud droplet growth rapid computation using number density mean value for integrating stochastic coalescence equation into differential equation

22 p4064 A70-42910

Stability conditions for relativistic stars, discussing mass-energy density distribution, Taylor instability, Schwarzschild criterion, Newtonian stellar model, gravitational red shift, etc

22 p4104 A70-42999

Lower chromosphere shock wave heating, analyzing density scale height effects

22 p4105 A70-43001

Magnetoplasma density modulation from LF and amplitude magnetic perturbations, using collisionless Boltzmann transport equation

22 p4082 A70-43255

Diurnal atmospheric density variations latitude dependence from satellite data

23 p4185 A70-43842

Oscillating vane and rotating disk pressure gauge theory, considering gas damping and density variations

23 p4198 A70-44948

Rarefied gas heat conduction between concentric cylinders in slip regime, obtaining perturbed temperature and density variations

23 p4284 A70-44985

Quasi-ambipolar diffusion in arc discharges in magnetic field, calculating ions and electrons density distributions between anode and cathode sheaths

24 p4384 A70-45148

Lighthill aerodynamic noise theory fundamental equation for acoustic field density distribution, determining flow fields for surfaces in uniform translational motion

24 p4324 A70-45268

Quasars red shift distribution extrapolated from density evolution and luminosity function

24 p4402 A70-45386

Interplanetary atomic hydrogen density distribution from Lyman alpha scattering calculation, explaining background radiation anisotropy detection by Vela 7 satellite

24 p4403 A70-45392

Sintered material density-sound velocity relation, deriving ultrasonic wave propagation time dependence

24 p4360 A70-45731

Planetary nebulae NGC 7662 and NGC 7009 axially symmetric models from density distributions, H continuum threshold optical depths and central star temperatures

24 p4409 A70-45757

DENSITY MEASUREMENT

NT X RAY DENSITY MEASUREMENT

Absolute calibration method for daily solar flux density discrepancies measurements at UHF, describing equipment and error analysis

01 p0168 A70-10259

Density distribution measurements in flow field using interference methods, including laser light sources

01 p0085 A70-10268

Giant planets structure, calculating Jupiter and Saturn densities using Russell solar mixture and internal heat from central core radioactivity

01 p0181 A70-10663

Air flow density measurements with interferometer in supersonic square Laval nozzle, showing flow core motion and wave structure

01 p0064 A70-11000

Atmospheric density profiles based on laser radar return from ruby laser detected by photomultiplier

01 p0079 A70-11220

Coordination technique for pressure, density and temperature measurements by probes during parachute reentry into planetary atmospheres, taking into account reentry dynamics

01 p0197 A70-11495

Air density variations calculated by visual satellite observations processing, comparing results of IN-TEROBS and average anomalies methods

02 p0288 A70-11766

Time resolved cavity perturbation technique to measure high plasma density in magnetic mirror compression experiment, obtaining total electron number

02 p0347 A70-12236

Optical density measurements in high speed confined air vortex, discussing light deflection mapping of vortex density field at off axis positions

03 p0480 A70-12906

Heat resistant alloys densities calculated from chemical composition, estimating error

03 p0512 A70-13778

Linear aliphatic polyesters unit cell dimensions and crystalline densities

03 p0517 A70-13808

Parachute-borne densitometer using forward scattering of low energy beta particles for direct measurement of atmospheric density at 30-60 km

04 p0687 A70-14654

Atmospheric density measurements from Explorer 17 satellite by density gage and drag techniques resolved for difference by calibration and systematic errors considerations

04 p0691 A70-15120

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes

06 p1056 A70-17788

Normal hypersonic shock wave structure in diatomic gas, measuring density by electron beam fluorescence technique

06 p1050 A70-18341

Ar-Kr integral collision cross sections based on density measurements of Ar beam passed through liquid nitrogen cooled Kr filled scattering chamber

07 p1344 A70-20135

Soviet monograph on constant of gravitation, mass and density of earth covering torsion balance, weight experiments and nonlinear vibration techniques

08 p1487 A70-20764

Plasma density measurement by LC tank circuit with plasma contained in induction coil, deriving expressions for circuit resistance and resonant frequency

08 p1550 A70-20846

Kerr cell-shuttered high speed stigmatic spectrograph for shock tube electron density distribution measurement

09 p1682 A70-23503

Plasma electron density errors in measurement by microwave interferometers, noting effects of inaccurate phase shift determination

09 p1738 A70-23634

Electron beam fluorescence probes for rarefied gas flow, describing local density and temperature measurement methods

10 p1888 A70-24399

Vertical air density profile from satellite measurements of atmospheric oxygen radio emission at 40-70 km altitudes

10 p1882 A70-25020

Extraterrestrial electron density precision measurement using HF impedance probe with guard ring to remove ion sheath effects

10 p1892 A70-25255

Pulsed laser holographic interferometry of density field created by high speed projectile motion in air

11 p2051 A70-25987

Rarefied gas stream density measurements with electron beam fluorescence experiment, determining pressures and densities behind plane shock wave and in supersonic nozzles

11 p2087 A70-26743

Air pressure, air density and gravity tables, including corrections for mercury barometer measurements

12 p2222 A70-27008

Stark broadening of neutral helium line in plasmas for electron densities measurements accuracy, comparing to H beta determined densities

13 p2456 A70-29225

Atmospheric density estimation from observation of satellite drag-induced energy dissipation

13 p2400 A70-29530

Hot-wire probe measuring He-ai mixture velocity and concentration following He discharge from circular orifice, noting calibration method

13 p2412 A70-29990

Atmospheric density variations and functional dependence of aerodynamic moment coefficient on incident angle from Saturn Workshop flight experiment

14 p2528 A70-30559

- Pitot probe for high altitude atmospheric density measurements integrated with telemetry system mounted on two stage Super Loki sounding rocket
14 p2585 A70-30576
- Plasma concentration measurement in coaxial accelerator, using gas laser and multiple wave interferometer in vacuum chamber
15 p2781 A70-32858
- Turbulent wakes density fluctuations measurement using pulsed laser holographic interferometry in ballistic range
[AIAA PAPER 70-727] 16 p2834 A70-33494
- Optical system measurement of density and rotational temperature in gaseous plume simulating auxiliary propulsion and oxygen hydrogen burner of S-4B
16 p2913 A70-34023
- Electron density measurements in lower ionosphere by narrow band VLF receiver flown in Tomahawk rocket during quiet daytime
17 p3076 A70-34938
- Air jets from sonic orifice, investigating three zones of isochor families by visualization and density measurement
17 p3070 A70-35046
- Ionospheric plasma disturbances due to moving space vehicle, investigating by electron density measurements in rarefied wake regions using gyro-plasma probe
17 p3142 A70-35763
- HEOS 1 low energy proton measurements in interplanetary space, discussing particle direction during solar event and anisotropy time history
19 p3495 A70-37505
- Whistler density variability correlated with solar activity during IQSY
19 p3462 A70-37924
- Metal vapors electrical conductivity and density measurement at high temperatures and supercritical pressures
20 p3648 A70-39637
- Atomic oxygen density and temperature diurnal variation determination by F region incoherent scatter measurements, using nonlinear regression analysis
21 p3817 A70-41096
- Mean density and temperature measurements in hypersonic Ti spheres wakes in nitrogen atmosphere, using electron beam fluorescence probes
21 p3745 A70-41754
- Carbon dioxide and water cryodeposits refractive indices and densities, using thin film interference technique
[ASME PAPER 70-HT-33] 22 p4122 A70-42344
- Liquids density measurement from digital data obtained from sample subjected to vibrations
22 p4030 A70-42848
- Wollaston prism schlieren interferometer for quantitative density gradient measurements in air
[SMPTE PREPRINT 25] 22 p4034 A70-43050
- Hypersonic projectile turbulent wake measurements, discussing velocity, mass density and temperature determination
[ICAS PAPER 70-07] 23 p4132 A70-44130
- Electron density measurements in ionosphere along rocket trajectory, using sweep frequency RF impedance probe with guard ring
23 p4192 A70-44877
- Air densities from polar satellites orbit analysis
24 p4329 A70-45550
- Density correlation measurements for diffusion coefficient in magnetized He plasma
24 p4386 A70-45614
- DEOXIDIZING**
Ni-Fe alloys texture formation, studying strong deoxidizers role in secondary recrystallization
06 p1088 A70-17614
- Benzoyl cyanide deoxygenation, describing reaction kinetics and products
17 p3041 A70-34750
- DEOXYGENATION**
Agents for deoxygenation of nitro and nitroso groups
17 p3042 A70-35329
- DEOXYRIBONUCLEIC ACID**
DNA penetration into normal and fast neutron irradiated yeast cells, using immunofluorescent microscopy
03 p0417 A70-13072
- Differential melting for partial purification of chemically distinct region of chromosome mycoplasma sp. /KId/
04 p0647 A70-15448
- Hydrostatic pressure effects on DNA, RNA and protein synthesis and division in *Escherichia coli* cultures
04 p0637 A70-15475
- Cytosine-thymine transitions from cytosine-5-H3 decay in bacteriophage S13 DNA, discussing coding change efficiency
05 p0803 A70-16948
- Calf thymus DNA structural and functional changes following exposure to hydrogen atoms and gamma radiation
07 p1215 A70-20050
- Density gradient sedimentation of *Escherichia coli* populations irradiated with Co 60 gamma rays, showing correlation between DNA degradation and cell death
08 p1441 A70-20680
- Escherichia coli* cell division patterns, discussing generation times spread, gamma ray irradiation in nutrient broth, DNA damage and growing points, etc
08 p1441 A70-20681
- DNA enzymatic breakdown in *Escherichia coli* as function of ionizing radiation and temperature
08 p1445 A70-20775
- Chromosome of temperature-sensitive mutant of *Bacillus subtilis* 168, observing multiforked replication at normal temperature and transfer of DNA
09 p1615 A70-22206
- Parental terminid-daughter strand linkage in initiation of DNA replication in *Bacillus subtilis* after thymineless germination
16 p2847 A70-33060
- Monograph on ionizing radiation effects on molecular biology of *Escherichia coli*, discussing cellular damage, DNA degradation and synthesis, incorporating radioactivity, mutations, etc
16 p2848 A70-33098
- Lambda prophage induction into lysogens, noting nalidixic acid role in DNA synthesis inhibition
20 p3573 A70-39774
- Simulated space flight radiation effects on dogs DNA synthesis and bone marrow cell differentiation
20 p3575 A70-40191
- Mammalian cells after X ray irradiation, showing two forms of DNA repair process
21 p3765 A70-42024
- Sunlight induced pyrimidine dimers formation in human cells in vitro, relating DNA lesions by 254 nm irradiation
24 p4304 A70-46139
- DEPENDENCE**
NT SPATIAL DEPENDENCIES
NT TIME DEPENDENCE
Dependence effects on nonparametric mixed statistical tests
06 p1095 A70-18622
- DEPENDENCY**
U DEPENDENCE
DEPENDENT VARIABLES
Short term weather forecast hydrodynamic equations reduced to solving nonlinear differential equations by introducing dependent variables
07 p1329 A70-19647
- Controlled variable perturbation effects on system with internal positive feedback
20 p3602 A70-39829
- DEPERSONALIZATION**
Air traffic controller role in future air traffic system, considering automation in operations
19 p3371 A70-38649
- DEPLOYMENT**
Titan 3 launch vehicles capabilities communication satellites deployment modes, presenting cost and availability data for preliminary mission planning
[AIAA PAPER 70-482] 11 p1212 A70-25451
- Earth-pointing satellites joined by tether, discussing reel back and drag brake orbital deployment techniques and dynamic behavior
15 p2799 A70-31776
- Radio Astronomy Explorer satellite boom deployment method resulting in gravity gradient capture, emphasizing role of predeployment attitude and antenna Vee angle
[AIAA PAPER 69-920] 21 p3931 A70-41856
- Harrier aircraft operation in Marine Corps for fast reaction close support based near maneuver units
[SAE PAPER 700835] 24 p4290 A70-45887
- DEPOLARIZATION**
Right and left atrial polarization time sequence as guide to p wave origin in heart diseased patients following electrical stimulation of atria and ventricles
01 p0015 A70-10437
- Model for simulating normal/abnormal depolarization and repolarization of heart and to reproduce electrocardiograms, describing design and programming
03 p0432 A70-12889
- Norepinephrine-induced depolarization effects on brown fat thermogenesis in cold-acclimated rats determined from in vivo measurement of intracellular potentials
05 p0799 A70-16020
- Scattering and depolarization of plane horizontally polarized electromagnetic wave from slightly rough lossless dielectric layer, using small perturbation theory
06 p1010 A70-18019
- Depolarization factor measurements of clear atmospheric air by lidar techniques and laser light scattering
06 p1083 A70-18244
- Geometrical light depolarization in randomly inhomogeneous medium, discussing light propagation in turbulent atmosphere and ionospheric radio propagation
10 p1844 A70-25162
- Gas laser radiation depolarization coefficient as function of radiation energy, cavity anisotropy and operating transition type
19 p3444 A70-37445
- Laser light polarization and depolarization during backscattering from aqueous suspensions
23 p4215 A70-44271
- Optical solar polarization broadband measurement interpretation with depolarization factor due to elastic collisions or additional source
24 p4414 A70-46172
- DEPOLARIZERS**
U DEPOLARIZATION
DEPOSITION
NT ANODIZING
NT ELECTRODEPOSITION
NT ELECTROPLATING
NT VACUUM DEPOSITION
NT VAPOR DEPOSITION
Reworking of deep-sea sediments as indicated by vertical dispersion of Australasian and Ivory Coast microtektite horizons, implying years of deposition
01 p0178 A70-10474
- Epitaxial Ge deposits on Si control by Kikuchi pseudolines, considering surface polish, crystallinity and substrate orientation
13 p2470 A70-28957
- Adherent Ta films deposition onto Teflon disks by sputtering
18 p3264 A70-37098
- Stellar wind effect on accretion, showing critical intensity of particle ejection replacement
18 p3324 A70-37148
- Lunar formation, investigating accretion rate ratio for earth and moon as function of distance
24 p4409 A70-45674
- DEPOSITS**
NT CRYODEPOSITS
Carbon deposit formation in gas turbine engines with various fuels, studying thermal insulation properties
09 p1742 A70-22472
- Growth rate and spatial distribution of solid deposit freezing onto vertical surface in presence of convective heat transfer at moving phase interface
12 p2331 A70-27696
- Circulated air natural and technical impurities effects on gas turbine time dependent performance emphasizing erosion, deposits and overheating
13 p2475 A70-29713
- Aircraft and engine fuel systems deposit formation and microstructure in various test rigs, using electron microscopy
[SAE PAPER 700258] 18 p3214 A70-36823
- Jet fuel system deposits measurement, noting reliability of oxygen combustion and beta ray backscattering techniques
[SAE PAPER 700257] 18 p3214 A70-36824
- Scaled-off carbon dioxide laser discharge deposits analyzed by mass spectroscopy
19 p3445 A70-37670
- DEPRESSANTS**
NT CENTRAL NERVOUS SYSTEM DEPRESSANTS
Differential effect of hypobaric hypoxia on depressant characteristics of sodium barbital, sodium pentobarbital and chloral hydrate in rats and mice
04 p0631 A70-14680
- DEPRESSURIZATION**
U PRESSURE REDUCTION
DEPRIVATION
NT SENSORY DEPRIVATION
NT SLEEP DEPRIVATION
NT WATER DEPRIVATION
DEPTH MEASUREMENT
Water depth determination by remote measurement of near IR reflectance of underwater plants, discussing effects of water path length changes
10 p1878 A70-24741
- Water depth determination by various remote sensing techniques, discussing bottom reflection, wave analysis, thermal anomalies and laser ranging by time difference
12 p2217 A70-26916
- Depth measurement of gas-saturated surface layer in Ti alloys, using microhardness method
18 p3277 A70-36472
- Lunar regolith depth measurement by Lunar Orbiters 4 and 5 high resolution photographs, discussing thickness relation with sinuous rilles in marial regions
18 p3319 A70-37054
- Vapor capillary /melt/ depth in electron beam welding, considering electron energy, radiative dissipation, etc
21 p3833 A70-41124
- Lava thickness measurement in lunar maria from projecting rim width of partially buried craters
23 p4242 A70-44292
- DEPTH PERCEPTION**
U SPACE PERCEPTION
DERIVATION CALCULUS
U DIFFERENTIAL CALCULUS
DESATURATION
Simultaneous satellite attitude control and flywheel desaturation using external torque
13 p2503 A70-28527

Optimal desaturation of angular momentum exchange controllers in spacecraft attitude control systems, using natural environmental torques
16 p2947 A70-33345

DESCENT

NT PARACHUTE DESCENT

Forward and rearward facing passenger seats effects in postdecompression emergency descent of high speed high altitude aircraft
03 p0437 A70-14061

Differential descent convergence demonstration based on relation between convex and Liapunov functions
08 p1534 A70-21007

Lunar landing training vehicle using Lunar Module free flight simulator for earth practicing of final descent handling
21 p3750 A70-41193

DESCENT PROPULSION SYSTEMS

Apollo lunar module descent engine exhaust organic combustion products, estimating ion intensities of various species in all mass spectra
02 p0356 A70-12693

Flight performance of Apollo LM descent-ascent propulsion systems, considering telemetry data, prediction correlation and modifications
[AIAA PAPER 70-673]
16 p2967 A70-33577

Lunar surface erosion due to Apollo 11 descent engine
18 p3316 A70-36960

DESCENT TRAJECTORIES

NT REENTRY TRAJECTORIES

Optimal control algorithm for spacecraft descent in atmosphere based on nominal trajectory and acceleration measurements
01 p0197 A70-11499

Optimal descent maneuver from planetary orbit for fixed atmospheric reentry angle, considering minimum impulse /fuel consumption/
04 p0745 A70-14496

Airborne digital letdown computer to guide VTOL aircraft flying complex trajectories to relieve airport congestion
05 p0880 A70-16416

Optimal landing of spacecraft on moon surface from low circular orbit, analyzing rocket thrust, altitude and landing site distance effect on spacecraft mass
06 p1155 A70-17880

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data
06 p1155 A70-17897

Apollo 11 premission planning, real time situation and postflight analysis for lunar descent and ascent phases, providing navigation correction capability for Apollo 12
[AIAA PAPER 70-25]
06 p1159 A70-18227

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality
07 p1393 A70-19482

Spacecraft trajectory control for hypersonic atmospheric entry
13 p2500 A70-28411

Control algorithm for vehicle descent after reentry based on descent range prediction by integrating motion equations allowing for motion three dimensionality
15 p2813 A70-32727

Lunar Module landing radar system design, discussing antenna and electronics assembly
16 p2865 A70-33681

Optimum guidance and control law for lifting reentry bodies, investigating plane descent trajectories for minimum structural heating
16 p2982 A70-33774

Aircraft climb and descent trajectories approximation compatible with air traffic control operation, noting parameters effects
24 p4375 A70-46239

DESENSITIZING

Initiator desensitization process involving use of volatile inert liquid to increase safety during assembly operations
03 p0549 A70-14137

Multiple wavelength desensitized hologram interferometry to extend displacement measurement range
21 p3822 A70-40814

DESERT ADAPTATION

Man and animals physiological adaptation and behavior under conditions of polar regions, highland and arid areas
01 p0030 A70-11465

Acid mucopolysaccharides in distal segments of medullary substance of kidneys of rodents under high ambient temperature, showing stable morphological characteristics
07 p1204 A70-19141

High temperature adaptation, gas exchange and thermoregulation in dogs during repeated overheatings in open sunshine
18 p3219 A70-36339

Intracellular shifts in body fluids and dehydration tolerance in burro, comparing water content of desert animals
21 p3766 A70-42157

DESERTS

NT LIBYAN DESERT

Remote photometric and spectrometric measurements for plant structure and productivity of grass and shrub vegetation in desert environments
12 p2218 A70-26923

DESIGN OF EXPERIMENTS

U EXPERIMENTAL DESIGN

DESORPTION

Molecular sieve mixed gas adsorption and vacuum desorption of carbon dioxide in Apollo spacecraft cabin
01 p0040 A70-11450

He and Ne adsorption and desorption on field ion microscope tip, determining minimum required field strengths of gas films at different temperatures
05 p0891 A70-15975

Quasi-equilibrium treatment of heterogeneous reactions applied to evaporation rate /desorption/ computation for volatile species formed in oxygen reactions with W, Mo and graphite
06 p1004 A70-17330

Quasi-equilibrium treatment of heterogeneous reactions applied to flash desorption data for oxygen reaction with tungsten surface, discussing species desorption dependence on adsorption temperature
06 p1004 A70-17331

Carbon dioxide adsorption and desorption in Martian bright areas, discussing assumptions relative to temperature, pressure and dust adsorption
08 p1579 A70-21566

Oxygen sticking coefficients and desorption kinetics on tungsten crystal by step desorption/ reflection technique, postulating formation and decomposition of surface oxide phases
10 p1832 A70-25147

Polycrystalline molybdenum desorption of adsorbed hydrogen, oxygen and water by electron impact
12 p2182 A70-27679

Resinous compounds content determination in jet fuels using ice cold acetic acid for desorbent to improve accuracy
16 p2961 A70-33203

Electron impact desorption kinetics of ions and neutrals from polycrystalline W surfaces, using cylindrical magnetic spectrometer
18 p3225 A70-36321

DESPINNING

U SPIN REDUCTION

DESTABILIZATION

Mechanical destabilizing model of nonlinear damping in nonconservative systems with follower forces, using Liapunov method
19 p3542 A70-38065

DESTRUCTION

Scout missile destruct charge system premature operational response to high temperature environment caused by combustion gas leak during stage separation
03 p0550 A70-14140

DESTRUCTIVE TESTS

Soviet book on experimental investigation of thin walled structures elastoplastic work with complex reinforcement, outlining test procedures
03 p0585 A70-12985

Reinforced plastics destructive and nondestructive testing including standard methods, equipment and procedures applicable to materials and parts
05 p0874 A70-16621

Impact forces and specimen bending moments generated during dynamic tear test interpreted in terms of system dynamics and material fracture characteristics
08 p1518 A70-21319

Thermomechanical tests effectiveness and determination of stress level defining boundary between destructive and nondestructive testing
09 p1689 A70-22004

Destructive and nondestructive tests optimum procedure for quality control based on information theory, decision statistics and cost optimization
09 p1691 A70-22573

DESYNCHRONIZED SLEEP

U RAPID EYE MOVEMENT STATE

DETACHMENT

Associative and collisional detachment in H atom and negative ion collisions based on complex adiabatic potential
09 p1733 A70-23431

Turbulent flow detachment in incompressible fluid around thick bodies, considering plane perpendicular to wind
11 p2037 A70-26466

DETECTION

NT AIRCRAFT DETECTION

NT CORRELATION DETECTION

NT FOREST FIRE DETECTION

NT RADAR DETECTION

NT SIGNAL DETECTION

NT TARGET RECOGNITION

Response variation and detection efficiency of funnelled channel electron multipliers for low energy protons and Ar ions
06 p1021 A70-17623

Fire and overheat detection system design for turbine powered vehicles
[ASME PAPER 70-GT-125]
18 p3260 A70-36891

Air hijacking as aviation safety problem, discussing history, prevention and detection methods and equipment, law enforcement, etc
23 p4285 A70-44496

DETECTORS

Voltage-power sensitivity, response time, frequency limit and minimum registered power of hot carrier thermoelectric detectors calculated from characteristic semiconductor parameters
03 p0540 A70-13436

Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimetric wavelength detectors and mixers
11 p2017 A70-25736

Azimuth measurement techniques for success-run detectors
11 p2019 A70-26712

Stellar sensors and deviation measurement procedures, discussing photosensitive elements, astrophysical data, etc
13 p2407 A70-29140

Thin ferromagnetic film sensitive elements for detection of weak magnetic fields
13 p2415 A70-30041

HF permittivity variations detector for blood circulation telemetry
14 p2542 A70-30389

Photoelectric detector sensitivity variation effect on long term instability of servomagnet variometers
14 p2588 A70-31261

Acoustical holography with single stationary point detector noting reciprocity between detector and point source illuminator
17 p3088 A70-35030

Hydrogen emanation and distribution in metals and alloys by Nd hydrogen metal detection method
20 p3651 A70-40071

DETERMINANTS

Deterministic and stochastic simulation models for obtaining optimal solution in operations research by trial and error
08 p1464 A70-20579

Sufficient conditions for convergence of infinite determinant
15 p2766 A70-31448

Automatic digital device for evaluating matrix determinants
20 p3591 A70-39788

Two dynamic systems synthesis achieving limited influence on each other by coordinates invariance criteria method involving determinant
20 p3604 A70-39841

DETERMINATION

U MEASUREMENT

DETONABLE GAS MIXTURES

Gas detonation dynamics associated with shock tube self ignition kinetics, noting chemokinetic factors role
02 p0397 A70-12024

Spherical detonation waves propagation initiated by laser-induced spark in gaseous explosives, discussing propagation energy regimes
02 p0278 A70-12029

Propane oxidation reaction and ignition delay times
[AIAA PAPER 68-633]
03 p0603 A70-12909

Flat flames in stationary gas in tubes useful for flame speed measurements without correction procedure
03 p0607 A70-13917

Induction distances, transient pressures and wave propagation rates for detonation waves in cylindrical tube low temperature hydrogen-oxygen mixtures
03 p0607 A70-13919

Temperature evolution of detonation products of Na seeded propane-oxygen mixtures, observing periodic variation for helicoidal cases
03 p0608 A70-14356

Ignition of cold premixed fuel by hot projectile, obtaining distance for ignition occurrence
[AIAA PAPER 70-150]
06 p1180 A70-18133

Gas dynamic effects of reaction center in explosive gas mixture analyzed by model and numerical computation
[AIAA PAPER 70-147]
06 p1181 A70-18144

Gas detonation in rough walled pipe, calculating Chapman-Jouguet detonation velocity, deriving existence criterion
07 p1419 A70-18752

Hydrogen concentration effect on self sustained detonation wave propagation in hydrogen-carbon monoxide-oxygen mixtures, using Q switched pulsed laser schlieren photography
07 p1420 A70-18918

Cold combustible mixture ignition at forward stagnation region of hot projectile, calculating temperatures for propane-air mixture
07 p1422 A70-19577

Ignition and extinction in opposed jet diffusion flame for flow of compressible fluid with competitive/chain reactions

07 p1422 A70-19578

Minimal initial size of explosion reaction center used to explain ignition process in flammable mixtures, noting dependence on pressure, temperature and composition

07 p1422 A70-19586

Flame propagation rate and combustion zone extension dependence on chamber dimensions for turbulent flow of homogeneous mixtures

08 p1597 A70-21187

Ternary detonation wave configurations calculated by shock polar method using methane-oxygen and hydrogen-oxygen mixtures in shock tubes

09 p1658 A70-22101

Air shock tube driven by exploding mixture of propane and oxygen investigated for shock overpressure variation with distance

10 p1863 A70-23992

Combustible gas /hydrogen-air/ subsonic and transonic flow past sphere, approximating combustion zone structure by model

10 p1801 A70-24142

Excess air ratio and heat release efficiency in combustion of kerosene mixture determined by volumetric gas analysis

10 p1968 A70-24283

Combustion gases compositions and adiabatic flame temperatures of potassium seeded propane-air mixtures calculated at various equivalence ratios and temperatures assuming thermal equilibrium

12 p2330 A70-27227

Sphere supersonic motion in combustible gas mixture of given temperature and pressure, discussing constant density two front detonation wave model

12 p2334 A70-28242

Unsteady one dimensional motion of reacting gas mixtures in presence of supercompressed detonation waves, discussing transformation into Chapman-Jouguet wave

13 p2522 A70-29772

Detonation process one dimensional stability in combustible aerosol, considering gas dynamic disturbances effect

14 p2665 A70-30397

Burning velocities for methane-air mixtures with water cooled porous metal flat flame burner, discussing surrounding ambient atmospheres effects

14 p2666 A70-31093

Microstructure and reaction kinetics of flat premixed fuel-rich hydrogen-oxygen-nitrogen flame at atmospheric pressure

16 p2998 A70-33900

Tetrafluorodibromo-ethane and bromethyl inhibiting effects on explosion development in constant volume container and flame expansion rates in hydrogen-air mixtures

18 p3345 A70-36241

Flame propagation velocity of gasoline-air mixture during two stage combustion process in laminar and turbulent flows, discussing combustion products effect

19 p3550 A70-37253

Flame stabilization in boundary layer during mixing of cold homogeneous fuel mixture and hot gas based on combustion and turbulent jets theories

20 p3736 A70-39267

MHD measurements of gas flow velocity and boundary layer in oxyhydrogen explosions in detonation tube

21 p3942 A70-40876

Atmospheric pressure hydrocarbon-air mixtures confined by thin plastic membrane, obtaining composition range for detonation initiation limits

21 p3865 A70-40884

DETONATION

Electromagnetic procedures and camera-spectrometer system for studying detonation processes, measuring mass flow rates and explosives spectra

01 p0090 A70-10887

Computerized stepwise construction of Hugoniot curve for detonation waves and Chapman-Jouguet detonation and deflagration points

03 p0607 A70-13920

Shock wave amplitude found strongest influence in explosives initiation to detonation by shock

07 p1359 A70-19675

Detonation mechanism in ammonium perchlorate ascribed to mechanical breakdown of charge occurring at pressure equal or above critical deformation of explosive

09 p1741 A70-22102

Detonation model, discussing combustion gases from solid explosives detonation

13 p2520 A70-28803

Spin detonation of tangential HF vibrations in liquid rocket engine combustion chambers, discussing instability prevention

13 p2474 A70-29422

Detonation process one dimensional stability in combustible aerosol, considering gas dynamic disturbances effect

14 p2665 A70-30397

Detonation in nonuniformly heated gas capable of chemical reaction, obtaining numerical solution

17 p3198 A70-35737

Two dimensional detonations structure by nonlinear theory for systems with hydrodynamically unstable steady state solutions, imposing periodic boundary conditions

20 p3609 A70-39658

DETONATION WAVES

Multiple pulsations mechanism during detonation spherical wavefront propagation in channels with various cross sections, noting volume effect

01 p0060 A70-10135

Critical detonation diameter as function of concentration and dimensions of inhomogeneities in explosive, assuming chemical reaction generated behind detonation front

01 p0217 A70-11005

Strong shocks and high temperature gases production using multistage gaseous detonation driven shock tube

02 p0274 A70-11855

Shock wave shapes in hypersonic flow past blunt conical nosed circular cylinders, using analogy with Savic perturbed hypersonic blast wave theory

02 p0277 A70-11862

Liquid diethylcyclohexane /DECH/ sprays detonation propagation in gaseous oxygen, studying drop size effect on steady state development

02 p0351 A70-12003

Shock and detonation waves stability in arbitrary media, noting overdriven and underdriven waves

02 p0397 A70-12023

Detonation of gaseous systems with marginal compositions, showing sensitivity to physicochemical factors

02 p0251 A70-12025

Detonation front macroscopic properties, Mach configurations, shock spacing, etc, considering effects of tube walls and nonlinear flow

02 p0278 A70-12026

Hydrodynamic structure of multifront detonation waves produced in gases by primary shock interaction with transverse disturbances

02 p0278 A70-12027

Three dimensional picture of wave system of single headed spin detonation constructed by simultaneously considering wave mapping in real and hodograph planes

02 p0278 A70-12028

Spherical detonation waves propagation initiated by laser-induced spark in gaseous explosives, discussing propagation energy regimes

02 p0278 A70-12029

Internal structure of ideal explosive waves at Chapman-Jouguet point, discussing coupling between flow and chemical reactions

02 p0279 A70-12103

Smoked-foil technique for transverse wave quantitative study in condensed-phase explosives

03 p0606 A70-13814

Induction distances, transient pressures and wave propagation rates for detonation waves in cylindrical tube low temperature hydrogen-oxygen mixtures

03 p0607 A70-13919

Computerized stepwise construction of Hugoniot curve for detonation waves and Chapman-Jouguet detonation and deflagration points

03 p0607 A70-13920

Flow field between infinitely massive wall and rigid piston accelerated by detonation products, comparing analytical results to finite difference numerical integration

05 p0830 A70-15782

Sonic bang simulation by linearly distributed explosives, creating blast waves with wide range of shapes and durations

05 p0796 A70-16796

Self similar flow patterns arising during cylindrical shock and detonation waves propagation in gas at rest, considering MGD shock waves

06 p1119 A70-17516

Explosive blast wave effects on flight vehicle in supersonic flow, using conical blast generator and short duration supersonic wind tunnel

06 p0972 A70-18127

Atmospheric thermodynamic properties determined from radar studies of detonation waves from cesium-seeded explosive bursts in lower ionosphere

06 p1012 A70-18542

Detonation front structure stability in gases, discussing spin detonation, transverse waves, perturbation, etc

07 p1418 A70-18751

Gas detonation in rough walled pipe, calculating Chapman-Jouguet detonation velocity, deriving existence criterion

07 p1419 A70-18752

Hydrogen concentration effect on self sustained detonation wave propagation in hydrogen-carbon monoxide-oxygen mixtures, using Q switched pulsed laser schlieren photography

07 p1420 A70-18918

Explosive driver development with hypervelocity gas in thin walled tube surrounded by concentric

cylinder of high explosive, discussing detonation wavefront propagation

07 p1248 A70-19098

Gaseous detonation transverse wave propagation and measurement from smoked foil records

07 p1424 A70-20006

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode

08 p1485 A70-21633

Ternary detonation wave configurations calculated by shock polar method using methane-oxygen and hydrogen-oxygen mixtures in shock tubes

09 p1658 A70-22101

One dimensional flow field behind ionizing detonation wave in magnetic field using Chapman-Jouguet hypothesis, accounting for Alfvén speed

09 p1660 A70-22722

Blast waves in low Mach number regime with assumption of power law density profile in rear, obtaining particle velocity and pressure distributions

09 p1661 A70-23214

Plane, cylindrical and spherical blast waves structure with ionization at local thermodynamic equilibrium analyzed using successive approximation to non-similar solution

10 p1967 A70-23991

Wall heat transfer effect on expansion following Chapman-Jouguet detonation wave, calculating pressure and gas velocity profiles from friction coefficient

10 p1869 A70-24423

Oblique blast wave interaction with small bend along plane wall analyzed for diffraction using conformal transformation and complex variable techniques

10 p1869 A70-24524

Explosion aerial blast wave for producing impulsive structural forced response, discussing spatial distribution method for increased wave duration

11 p1213 A70-25729

Lead azide detonation hazards and resulting pressure waves, evaluating protective glove material by dynamic pressure measurements

12 p2289 A70-27665

Computerized numerical integration of nonlinear partial differential equations describing blast wave in ionosphere with finite electric conductivity under uniform magnetic field

12 p2227 A70-28212

Sphere supersonic motion in combustible gas mixture of given temperature and pressure, discussing constant density two front detonation wave model

12 p2334 A70-28242

Plane cylindrical and spherical explosion waves propagation in detonating gas mixtures with counter-pressure, calculating perturbed flow parameters by numerical method of integral relations

13 p2388 A70-29308

Unsteady one dimensional motion of reacting gas mixtures in presence of supercompressed detonation waves, discussing transformation into Chapman-Jouguet wave

13 p2522 A70-29772

Vacuum effect on explosive coupling seismic energy considered in lunar geophysical experiment

16 p2896 A70-33092

Spherical shock from point explosion in medium with varying density, obtaining exact similarity solution for propagation

21 p3808 A70-41448

Detonation front position determination in explosive by photoelectric technique

22 p4121 A70-42341

Orthogonal multistreak recording by framing camera applied to arrival of detonation wave at front surface of explosive charge

22 p4034 A70-43045

Shock wave propagation studies by grating spectrograph with high speed camera, computing equilibrium detonation gases temperature from emitted light

22 p4035 A70-43057

Mammalian eardrum failure due to blast induced pressure variations, examining wave shape, character, magnitude and duration effects

23 p4148 A70-44839

DETONATORS

Linear separation systems for aerospace applications covering mild detonating fuse and cord flexible linear shaped charge, SUPER ZIP concepts, etc

03 p0546 A70-14103

Development and characteristics of inexpensive and reliable detonator for precise synchronization with high speed photographic or electronic experiments

03 p0547 A70-14110

Detonator insensitive to highest level of electrostatic voltage on human body for precise synchronization

03 p0547 A70-14111

Exploding bridgewire detonator electrical input requirements, discussing waveform, peak current and time to peak

03 p0550 A70-14143

DEUTERIUM

Nuclear fusion reactions by focused Q switched Nd doped laser beam on deuterium target, discussing neutrons from flowing plasma, electron temperature and counter experiments

03 p0501 A70-13684

Hydromagnetic normal ionizing shock wave properties in H and D mixtures and pure gases in SUPPER 2 shock wave tube

03 p0536 A70-14365

Lyman alpha transition line in exosphere deuterium line implying enrichment factor ratio to earth surface deuterium

04 p0742 A70-15129

Energy distribution of positive Ar ions scattered from thermal diatomic D noting inelastic collisions

07 p1339 A70-20056

Mass spectra of 1,2-cyclohexanediol and deuterium labeled analogs data recorded and mechanistic rationalizations of degradation processes given

07 p1225 A70-20200

Cross sections measured for symmetric (p, 2p) reactions on deuterium and He, discussing nonsymmetric (p, 2p) events in He

08 p1548 A70-21233

Deuterium Lyman alpha line profiles generated from microwave powered lamp for experimental testing of two layer model characterizing emission line profiles

09 p1730 A70-22066

Deuterium atom reaction with hydrogen molecule yielding HD and H using modulated crossed beams, plotting angular distributions and reaction velocities

10 p1920 A70-25148

Deuterium recovery in Jupiter atmosphere, describing equipment and techniques for hydrogen-helium gathering and processing

11 p2112 A70-26064

High speed shock wave propagation in deuterium gas, observing neutron production

21 p3806 A70-40744

Thermonuclear rate constant for deuterium atom recombination, using orbiting resonance theory

21 p3781 A70-41886

Thermal separation of ortho and para hydrogen and deuterium, discussing kinetic theory of nonspherical molecules in terms of rotational collision numbers

22 p3983 A70-43154

IR absorption spectra of high-cis forms of deuterated polyisoprenes

23 p4157 A70-44274

Extremely high temperature deuterium examination, using coaxial plasma accelerators to determine neutron production and vorticity

23 p4227 A70-44452

DEUTERIUM COMPOUNDS

CH and CD molecules UV absorption spectra, using flash photolysis of diazomethane

02 p0341 A70-11795

CH, CD and CH ion excited states decay rates determined from phase shift and frequency data, discussing implications for astrophysics

09 p1731 A70-22513

Vapor phase fluorescence spectra from benzene and deuterated benzene at zero point vibrational level

15 p2694 A70-31731

Transverse flow deuterium fluoride-carbon dioxide chemical laser for CW output without external energy source

24 p4355 A70-46084

DEUTERIUM PLASMA

Focused deuterium plasma discharge neutrons and X rays energy spectra, flux and time resolved collimation measurement with nuclear emulsions and scintillation detectors

02 p0348 A70-12241

Millimeter and nanosecond resolution of fast neutrons in pulse dense high temperature deuterium plasma discharge with polyethylene collimators and photomultipliers

02 p0303 A70-12739

Fusion reactions generation by high power laser beams focused on solid deuterium target

05 p0857 A70-15992

Temperature measurements in magnetic beach of steady state deuterium plasma, confirming ion-cyclotron waves thermalization

05 p0884 A70-16167

Self sustained fusion reaction in dense deuterium-tritium plasma, considering large atomic number contaminants optimal concentration calculations

07 p1351 A70-19848

Deuterium plasma expansion resulting from thermal shock produced by laser impulse

10 p1923 A70-24526

Controllable thermonuclear reactor with free-floating HF discharge plasma in deuterium

12 p2271 A70-27351

Deuterium plasma three dimensional flow in coaxial accelerators, examining magnetic structure of filaments/field lines bundles/

21 p3856 A70-41321

Controllable thermonuclear reactor with free-floating HF discharge plasma in deuterium

22 p4084 A70-43595

DEUTERONS

Deuteron splitting by solar neutrinos for neutrino detection, describing deuterium scintillation detector characteristics

05 p0899 A70-15954

Proton-deuteron elastic large angle scattering cross sections, noting backward peak consistent with baryon exchange mechanism with resonance transfer

07 p1345 A70-20198

Venusian ionosphere thermal protons and/or deuterons source observed by radio occultation method, suggesting dominance at high altitudes

10 p1938 A70-24068

Cosmic rays deuterons abundance calculation from H and He nuclei collisions with interstellar matter

19 p3506 A70-38125

Collapsing or neutronizing stars detection by recording neutrino and antineutrino flux, calculating antineutrino-deuteron interaction cross section and positron energy and angular distribution

20 p3698 A70-39302

Upper limit to primary deuteron flux and path length in space, using emulsion stack exposed near geomagnetic equator during minimum solar activity

22 p4093 A70-42673

DEVELOPERS [PHOTOGRAPHY]

U PHOTOGRAPHIC DEVELOPERS

DEVIATION

Deviation angle optimization for cruising hypersonic jet aircraft, noting effect of rotation losses on design

03 p0406 A70-13019

DEVITRIFICATION

U CRYSTALLIZATION

DEW

Dew-point temperature of lower troposphere by diffusion equation, noting use for fog and strati forecasting

09 p1717 A70-22655

Thermistor and dew cell as remote air temperature and dewpoint measurement at airports

21 p3822 A70-40760

DEWAR SYSTEMS

U CRYOGENIC EQUIPMENT

DH 121 AIRCRAFT

Trident passenger aircraft development, discussing airframe changes, engine development, weight and drag reduction, etc

05 p0794 A70-16112

Rolls-Royce boost engine fitted to Trident 3B for improving takeoff and climb performance, discussing mounting and effect on aircraft structure and passenger capacity

06 p0985 A70-17156

Trident aircraft automatic landing in nearly blind conditions in regular commercial service

11 p2079 A70-25851

Automatic landing system assurance of DH 121 aircraft schedule all-weather regularity through high safety level via redundancy

17 p3022 A70-35856

DH 125 AIRCRAFT

Lift-dump system for Hawker Siddeley DH 125, combining aerodynamic drag increase with lift reduction to improve deceleration

02 p0225 A70-12266

DIABATIC PROCESSES

U HEAT TRANSFER

DIADEME SATELLITE

French geodetic satellites Diademe I and II experiments in navigation, noting laser and Doppler devices

09 p1725 A70-23049

DIAGNOSIS

Prospective epidemiological recognition of clinical coronary heart disease, discussing effects of habitual physical inactivity, excessive dietary fat, socioeconomic stresses, etc

01 p0023 A70-10865

Simplified laboratory test program yielding serviceable information for possible direct laboratory diagnosis of risk factors affecting atherosclerosis

03 p0431 A70-14279

Automatic control algorithms for subsystem malfunction identification in multisubsystem plants, analyzing conditions for diagnostic tests existence

04 p0661 A70-14554

Computer aided medical diagnosis

04 p0644 A70-15359

Computer program for on-line analysis of exercise ECG considered for improved diagnosis of ischemic heart disease

05 p0805 A70-16105

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes

07 p1220 A70-19514

Aeromedical significance and pathophysiological mechanisms of clinical entities mimicking vasovagal syncope

08 p1454 A70-21946

Physiological mechanism and differentiation of altitudinal vertigo in flyers

08 p1449 A70-21947

Diagnostic-control tests for automatic homogeneous microelectronic structures, considering element coupling

09 p1643 A70-22142

Vectorcardiographic diagnosis of left ventricular hypertrophy based on changes in MQV magnitude and other QRS vectors

09 p1629 A70-23626

Hypoxia diagnosis based on excess lactate determination as indicator of oxidative metabolism changes

10 p1822 A70-25084

Human exhaled air contaminants analysis role in disease diagnosis, metabolism study and spacecraft cabin atmosphere changes

11 p1991 A70-26113

Focal myocarditis associated with aircraft accidents, discussing difficulties in diagnosis and assessment

17 p3033 A70-35571

Acoustical holography forming optical wavefield analog for nondestructive testing, medical diagnosis, underwater and seismic imaging

19 p3425 A70-37887

Electrocardiogram vs vectorcardiogram for myocardial infarction diagnosis

19 p3371 A70-38362

Astronauts medical examination, using thermal load as functional and diagnostic test

20 p3575 A70-40195

Automatic diagnosis of clinical electroencephalogram with digital computer, showing maximum and minimum points, basic pattern and paroxysmal wave

22 p3977 A70-42869

Atherosclerosis and latent coronary insufficiency diagnosis in flight crews, evaluating various tests

22 p3975 A70-43696

Hyperthyroidism diagnosis by pattern recognition, using computerized class featuring information compression

22 p3977 A70-43732

Obstructive lung diseases clinical, radiological and functional diagnosis in legal medicine

24 p4296 A70-45122

DIAGRAMS

NT CIRCUIT DIAGRAMS

NT CREEP DIAGRAMS

NT FEYNMAN DIAGRAMS

NT HERTZSPRUNG-RUSSELL DIAGRAM

NT PHASE DIAGRAMS

NT S-N DIAGRAMS

NT STRESS-STRAIN DIAGRAMS

Block diagrams of three stage device for extracting radioactive Ar from perchloroethylene considered for solar nucleus studies

05 p0845 A70-15933

Holo-diagrams for simplified evaluation of amplitude and direction displacement in double exposed holograms for interferometric measurements

07 p1287 A70-20086

Diagram extracting Lorentzian line widths from Fabry-Perot interferometer profiles

15 p2737 A70-32050

Holodiagram for making and evaluating holograms for large objects dimension, deformation and vibration measurement

17 p3084 A70-35004

Butterfly diagram for describing latitude distribution of sunspots during solar cycle, considering representation methods

22 p4106 A70-43264

Holo-diagrams for predicting fringe patterns in hologram interferometry caused by translation motion and rotation

22 p4040 A70-43610

DIALS

Human interpolation accuracy for pointer or index position between two scale graduations

24 p4308 A70-45512

DIALYSIS

Countercurrent sandwich type dialyzer for small animals, noting membrane support function and applicability to human use

13 p2360 A70-29950

DIAMAGNETISM

Boundary conditions for equilibrium diamagnetic plasma in magnetic dipole having constant and isotropic pressure in system

01 p0153 A70-11631

Diamagnetic plasma in nonuniform magnetic fields, determining equilibrium plasma configurations in and near neutral point for low and high pressure

09 p1734 A70-22478

Coulomb interaction during optical transitions between Landau subbands of Ge semiconductor valence and conduction bands in magnetic field, observing diamagnetic excitons

10 p1928 A70-25029

Thermal variation of diamagnetism and susceptibility of rhombohedral graphite

21 p3845 A70-42268

Beryllium orbital diamagnetic susceptibility calculated by pseudopotential method compared to experimental data

23 p4208 A70-44886

DIAMANT LAUNCH VEHICLE

Valois motor with nitrogen peroxide oxidizer for Diamant B first stage, describing design and assembly problems

10 p1930 A70-24375

Diamant B satellite launcher testing and construction, discussing DIAL/WIKA scientific satellite launch

12 p2314 A70-28299

DIAMETERS

Critical diameter and detonation parameters of nitromethane and tetranitromethane as function of powder content

01 p0217 A70-11004

Tabular results of Galaxy mean and angular diameters and smallest/largest ratios measured on Palomar Atlas

05 p0906 A70-15797

Atmospheric pressure-diameter relationship of common carotid artery in head and neck region of conscious men

08 p1447 A70-21508

Optical heterodyne interferometer for stellar diameter measurements

16 p2925 A70-33025

Jovian planets polar and equatorial diameters and lateral dimensions of Saturn rings by optical measurements

16 p2979 A70-34034

DIAMINES

NT GUANIDINES

Thermal stability of polymers based on aromatic diamines and isomeric dibenzoylbenzenes

21 p3782 A70-42129

DIAMOND WINGS

U LOW ASPECT RATIO WINGS

W SWEPT WINGS

DIAMONDS

NT METEORITIC DIAMONDS

Evidence disproving interstellar extinction by diamond crystals

03 p0572 A70-13818

Two parameter model for lattice vibrations applicable to diamond structured crystals, calculating phonon dispersion curves from dielectric screening theory

07 p1357 A70-19920

Semiconductor diamond films electrical conductivity obtained by injecting various ions during isochronal stepwise annealing, studying activation energy values

12 p2286 A70-27479

Hall constant and carrier mobility in semiconductor diamond films doped by boron ion injection, observing temperature dependence of mobility

12 p2287 A70-27480

Artificial B-doped semiconductor diamond crystals resistance temperature dependence, determining conductivity and luminescence spectra

15 p2782 A70-31630

Electrical conductivity of semiconductor diamonds made by alloying with Al under high pressure and temperature

19 p3488 A70-38728

DIAPHRAGM [ANATOMY]

Chest, abdominal wall and diaphragm displacements of rabbits during partial and whole body exposure to shock waves produced by hexotol charges

02 p0231 A70-11704

Asymptomatic pilot with idiopathic paralysis of hemidiaphragm, discussing clinical picture and aeromedical significance

07 p1215 A70-19942

Cinereidigraphic analysis of diaphragmatic ventilatory movements, obtaining correlation between lung volume and diaphragm and rib cage movement

14 p2537 A70-30383

Diaphragmatic muscle reactions and pneumogram changes in rats immediately after air passage obstruction

19 p3360 A70-37804

Sinus and diaphragmatic nerves impulse activity during hypoxia compared with normal respiration in cats

23 p4145 A70-44312

DIAPHRAGMS [MECHANICS]

Piezoelectric sensing diaphragm for detection of micrometeorites in space, noting vibration mode and effect of small beads contact time on calibration errors

04 p0695 A70-15567

Impedance and field distribution of bifurcated and stepped waveguide junctions with inserted diaphragm calculated by transformed singular integral equation

05 p0820 A70-16385

Diffused diaphragm pressure sensors in impact probes used in wind tunnel tests of dynamic response of supersonic air induction systems

06 p1074 A70-18605

Dimensionless strength parameter in determining bursting pressure of ductile metal diaphragms in square section shock tubes

08 p1481 A70-21034

Arc driven shock tunnel operation with expansive area change at main diaphragm, evaluating flow characteristics

09 p1657 A70-23279

Temperature and heat flux in plane, cylindrical and spherical multilayer diaphragms with boundary conditions, assuming harmonic temperature variation

10 p1970 A70-25321

Time dependence of shock wave attenuation at multiple reflection in shock tube after diaphragm burst, using damped vibration solution

11 p2034 A70-25495

Self opening em-operated secondary and ternary mylar diaphragms for expansion tubes and tunnels

11 p2031 A70-25982

Remote controlled diaphragm exploding device associated with shock tube for MHD generator

11 p2090 A70-26170

Water cooled metallic diaphragm thermal stability effect on plasmatron electric arc characteristics stabilized by vortex air flow

11 p2093 A70-26736

Semifluidic proportional industrial control systems using diaphragm summing junction including applications to temperature control, remote sensing and drill bit adaptive measurement

12 p2164 A70-27073

Turbulent mixing at contact surface in driven shock wave in shock tube with bursting diaphragm for He-Ar test gas mixtures

14 p2566 A70-31030

Two diaphragm combustion shock tube for plasma radiation energy transfer, describing development, performance, make-up and testing

15 p2779 A70-32019

Electromagnetic diaphragm for use in shock tubes, describing construction and operation

15 p2741 A70-32440

Superplastic deformation of thin circular diaphragms subjected to one-sided hydrostatic pressure, emphasizing thickness variations in bulged shapes

16 p2916 A70-32917

Holographic interferometry for evaluating bond between diaphragm and base in pressure transducer

16 p2904 A70-33138

Metallic diaphragms design, fabrication and testing for cryogenic fluid and positive expulsion systems [AIAA PAPER 70-683]

16 p2918 A70-33582

Diaphragm pressure transducer interaction with solid propellant grain, superposing solutions to clamped circular plate and halfspace

16 p2992 A70-33987

Thin concentric circular cylindrical shells joined at ends by rigid diaphragms, describing free and forced torsional motion

16 p2992 A70-34019

Reliable latch diaphragm release mechanism for separation of payload from spacecraft, discussing design, operation and tests

16 p2921 A70-34117

Pressure transducer diaphragms displacement measurement by holographic interferometry

17 p3085 A70-35010

H and E waves diffraction in circular waveguide by diaphragm thickness, using linear equations and Fourier-Bessel series for representation

19 p3378 A70-37731

DIASTOLE

Diastolic and systolic pressure measurement in acute and chronic experiments

09 p1627 A70-23302

Myocardium potential working capacity in relation to diastole duration of ventricles

13 p2355 A70-29767

Cardiac ventricular function in compression pump terms, relating mechanical activity to end-diastolic fiber length

20 p3571 A70-39364

DIATOMIC GASES

Heat and mass transfer in Couette flow of partially ionized symmetric diatomic gas for chemical equilibrium and chemically frozen flow cases

01 p0060 A70-10290

Collision induced dissociations of 2000 eV diatomic O, N, CO and NO positive molecular ions as function of reactant ion internal energy

01 p0148 A70-11354

Dynamic behavior of dissociating homonuclear diatomic gas, deriving instability equations, proposing stability loss in transonic region

01 p0068 A70-11584

Oscillations and decomposition of diatomic gas molecules at high temperatures during atom-molecule collisions, deriving kinetic equations for energy level changes

01 p0148 A70-11630

Hypersonic flow in thermodynamic equilibrium of diatomic dissociating gas with power law shock, investigating self similar solutions of Van Dyke small disturbance equations

03 p0405 A70-12925

Work function measurement for adsorption of diatomic I, Br and Cl on W crystal using electron beam retarding potential method

05 p0891 A70-15973

Molecular beam continuum model to determine structure of shock waves in diatomic gases, comparing calculated profiles with measurements in nitrogen

06 p1050 A70-18338

Kinetic theory study of shock wave structure in rotationally relaxing diatomic gases

06 p1050 A70-18339

Kinetic model equation for shock structures in rotationally relaxing gas with internal degrees of freedom

06 p1050 A70-18340

Normal hypersonic shock wave structure in diatomic gas, measuring density by electron beam fluorescence technique

06 p1050 A70-18341

Coupled vibrational relaxation in mixtures of diatomic gases, showing energy pumping phenomenon between species

07 p1338 A70-19627

Photodissociation of diatomic O and N molecules in far UV

07 p1338 A70-20052

Diatomic gases, describing rotational distribution function evolution by diffusion equation approximation, discussing apparent relaxation times

08 p1548 A70-21521

Nonequilibrium interaction of radiative and vibrational rate processes in IR-active diatomic gas using macroscopic equations

08 p1549 A70-21574

Rotational-translational energy transfer in collisions between homonuclear diatomic molecules and rotational relaxation time in diatomic gases

10 p1918 A70-23956

Weak plane waves propagation in binary mixtures of diatomic gases subject to vibrational relaxation, solving piston problem in acoustic approximation

12 p2209 A70-27151

Stark cell with high electric fields for studying inactive IR spectrum of homonuclear diatomic gas molecules

13 p2450 A70-28499

Potential energy curves for diatomic He molecules constructed by Rydberg-Klein-Rees procedures

14 p2618 A70-30112

Laminar boundary layer equations on plate with arbitrary catalytic properties in diatomic gas flow undergoing vibrational dissociative relaxation

20 p3611 A70-39802

Absorption diffuse band systems of diatomic argon molecule in vacuum UV region

21 p3853 A70-41395

DIATOMIC MOLECULES

Rotational excitation and scattering of diatomic molecules by structureless atoms, comparing approximation methods

01 p0147 A70-10470

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

01 p0147 A70-11035

CH and CD molecules UV absorption spectra, using flash photolysis of diazomethane

02 p0341 A70-11795

Quadrupole moment matrix elements in adiabatic approximation for transition bands of hydrogen, HD and deuterium molecules in ground electronic state

02 p0342 A70-11822

Rotation-vibration matrix elements of quadrupole moments and absorption coefficients of ground electronic states of hydrogen, HD and deuterium

02 p0342 A70-11823

Morse eigenfunctions for variational calculation of diatomic molecules vibrational-rotational energy level analysis, showing better convergence than harmonic oscillator basis

02 p0344 A70-12519

NH bands in stellar spectra by visual inspection of spectrograms, noting abundance of N in normal and strong CN stars

02 p0379 A70-12708

One and two center Coulomb, hybrid and exchange integrals contributing to orbit-orbit interaction in diatomic molecules evaluated for Slater orbitals combinations

03 p0528 A70-14010

Diatomic oxygen-nitrogen collisions in mixtures with CO, determining vibration-vibration energy exchange probabilities

04 p0723 A70-15562

Diatomic carbon swan band violet line absence from sunspot suggested in accordance with molecular equilibrium predictions

05 p0911 A70-16433

Vibrational energy transfer in oriented nonlinear collisions between diatomic molecule and atom, considering molecular vibration excitation

05 p0885 A70-17080

Electron scattering from diatomic molecular systems including coupling of partial waves in fixed-nuclei approximation

06 p1114 A70-18633

Rotating and oscillating spectra in diatomic molecule excited by slow and fast electrons,

discussing Boltzmann distribution of excited molecules

07 p1337 A70-19044

Chemical bonding of high temperature molecular species, discussing ab initio calculations for diatomic atoms

07 p1225 A70-19882

Coupled Schrodinger equations for diatomic molecules internal motion solved using best adiabatic approximation to obtain energy correction to Born-Oppenheimer method

08 p1548 A70-21522

Compound state resonance energies and widths in elastic scattering of diatomic molecule at energies below rotational excitation threshold

08 p1548 A70-21523

Forward and backward rate constants for diatomic recombination and dissociation in dilute gas

09 p1730 A70-22231

Scattering equations and cross sections for rotational excitation in collisions of rigid diatomic molecules interacting through soft potential

09 p1732 A70-22901

Hoeft-London factors calculated for general doublet transition in diatomic molecules, deriving energy levels

10 p1918 A70-23974

Diatomic molecules vibrational levels distribution near dissociation limit determined using WKB approximation

10 p1919 A70-24041

Free radicals role in astrophysics, considering diatomic or triatomic radicals in atmospheres of earth, sun, planets, comets, stars and interstellar space

10 p1943 A70-24839

Vibrational energy exchange between colliding diatomic molecules modulated by harmonic oscillators with insignificant frequency difference

10 p1920 A70-25004

Threshold photoionization cross sections for homonuclear diatomic N molecules calculated from Slater orbitals and Coulomb waves

11 p2086 A70-25833

Book on rotational structure of diatomic molecules spectra covering multiplets, intensity distributions and perturbations

12 p2274 A70-27094

Rotational, vibrational and equilibrium molecular constants for Phillips system of diatomic carbon

12 p2275 A70-27174

Dissociation energy and long range interatomic potential of diatomic molecules from vibrational spacings of higher levels

13 p2454 A70-28495

Quantum mechanical model of electron scattering by homonuclear diatomic molecule at ground state, calculating differential and integral cross sections for elastic scattering

14 p2618 A70-30113

Gaseous diatomic molecules quantum mechanical treatment, calculating Hamiltonian matrix elements for interpretation of electron resonance spectra

16 p2955 A70-33799

Thermal dissociation mechanism of diatomic molecules in inert diluent behind shock wave, assuming distribution function described by Fokker-Planck equation

18 p3292 A70-36242

HD molecule nuclear relaxation time in liquid state as function of temperature, discussing various mechanisms

19 p3473 A70-37367

Diatomic molecules inelastic collision cross sections for specific rotational transitions, discussing S matrix energy requirements for statistical analysis

19 p3474 A70-38268

Hydrogen molecules rotational excitation cross sections by electron impact in adiabatic excitation, discussing polarization and distortion effects

20 p3675 A70-39606

Diatomic fluorine dissociation energy by mass spectrometry

20 p3582 A70-39615

Resonance excitation of oscillations in diatomic molecules by slow electrons, calculating scattering on spherical potential well

20 p3642 A70-39753

Diatomic Cs 7667 A band vibrational spectrum analysis

20 p3676 A70-40349

Rotational relaxation of diatomic molecular excited electronic state at high temperatures, discussing nonequilibrium region behind shock wave front in nitrogen

21 p3854 A70-42060

Molecular vibrational temperature dependence on electron and neutral gas temperatures and degree of ionization for plasma excitation in nitrogen

22 p4078 A70-42358

Numerical solution of nonlinear master equation for diatomic molecule dissociation and recombination from uncoupled differential equations

22 p4062 A70-42746

Classical calculations for energy transfer to diatomic molecules with rotational and vibrational degrees of freedom in atom-diatom-molecule collisions

23 p4221 A70-44010

Strong coupled rotational excitation problem in atom-diatom molecule scattering system, discussing transition probability matrices statistical analysis

23 p4212 A70-44600

Transition entropy during dissociation, investigating Trouton-Pictet rule applicability to diatomic molecules [DFVLR-SONDDR-58]

24 p4430 A70-46412

DIBORANE

Oxygen difluoride-diborane reaction measured for pressure-temperature relationships and gas composition dependence on time, noting possible applications as hypergolic rocket propellants

11 p1995 A70-26138

Oxygen difluoride-diborane reaction kinetics and boron fluoride formation rate [WSCIPAPER 70-11]

13 p2362 A70-29611

Oxygen difluoride/diborane propellant thrust chamber and injector technology, discussing engine duty cycles and performance [AIAA PAPER 70-717]

16 p2962 A70-33550

Gelled space-storable oxygen difluoride and diborane analysis, including particle preparation, yield stresses, viscosities and storability [AIAA PAPER 70-609]

16 p2962 A70-33607

DIBROMIDES

Polymethylene-bis-lepidine dibromides effect on blood pressure and peripheral vessel tonus in dogs, analyzing depressor reaction as function of binding chain

04 p0632 A70-15204

DICHOTOMIES

Dichotomy of Venus in eastern and western elongations, determining time of occurrence by graphical method

03 p0574 A70-13886

DICHROISM

Ruby green /U/ absorption band magnetic circular dichroism calculations in linear approximation, considering spin-orbital interaction constant and magnetic field strength

01 p0156 A70-10188

Central fovea dichromacy tests, using color naming technique

22 p3972 A70-43410

Flow visualization measuring liquid flow velocity, using flow dichroism

24 p4338 A70-45816

DICKE RADIOMETERS

Absolute sky brightness temperatures measured with horn antennas and Dicke receivers, indicating spectrum change due to galactic nonthermal radiation

12 p2309 A70-27893

DICKE TYPE RADIOMETERS

U DICKE RADIOMETERS

DIELECTRIC CONSTANT

U DIELECTRIC PROPERTIES

DIELECTRIC MATERIALS

U DIELECTRICS

DIELECTRIC PERMEABILITY

Optical permittivity and dielectric permeability of electron gas in magnetic field, considering application to ferromagnetic materials

23 p4221 A70-45051

Doubly excited antiferroelectrics absorption spectrum band and bound states, discussing zero approximation 0-0 transitions of alpha oxygen molecules and permeability tensor

24 p4392 A70-46362

DIELECTRIC PROPERTIES

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius

01 p0149 A70-10164

Dielectric layers electrical conductivity in ceramics containing Ti during aging, observing different characteristics ascribed to nonequilibrium current carriers in junction

01 p0156 A70-10221

Electric field effects on dielectric properties and molecular arrangements of cholesteric liquid crystals with temperature dependent helical pitch

01 p0160 A70-11352

Thick walled incompressible hyperelastic dielectric sphere periodic oscillations, noting dielectric properties influence on amplitude and period

01 p0209 A70-11386

Conductivity and permittivity for ion and electron resonance region of ionospheric plasma model calculated in quasi-hydrodynamic approximation

01 p0082 A70-11528

Two band Drude model validity for analysis of IR optical properties of transition metals obtained from experimental dielectric constant data

02 p0339 A70-12452

Collection of papers on optics covering dielectric multilayer filter synthesis, photographic image, light interaction with free electrons, laser radiation, optical echoes, etc

02 p0340 A70-12828

Spectrum function in Booker scattering formula /first order Born approximation/ for dielectric constant fluctuations in hypersonic wake plasmas

03 p0529 A70-12908

Permittivity tensor calculations of weakly inhomogeneous plasma with monoenergetic component, using distribution function of particles produced by thermonuclear reactions

03 p0529 A70-13055

Three dimensional Gaussian light beam propagation in anisotropic inhomogeneous media with dielectric constant decreasing from energy flow direction

03 p0525 A70-13533

Numerical solutions to determinantal equation for predicting properties of periodically modulated dielectrically filled frequency scanning waveguide as microwave antenna

03 p0457 A70-13696

Dielectric loaded waveguide with symmetric microstrip line, evaluating transverse wave number by finite difference method

03 p0458 A70-14035

Large dielectric constant with small loss determined as function of frequency from resonant frequencies measurement

03 p0493 A70-14039

Normal incidence reflectance of BeO single crystals, analyzing data by Kramers-Kronig inversion for dielectric function and energy loss function

05 p0891 A70-16047

Crystallization and dielectric properties of glass containing barium, lead, titanium and boron oxides, noting frequency and temperature dependence

05 p0871 A70-16595

Cholesteryl chloride-cholesteryl myristate /CM/ mixture liquid crystal molecular and helical axes orientation from dielectric constant change measurements in magnetic fields

06 p1126 A70-17326

Plane light wave diffraction incident upon isotropic dielectric layer traversed by acoustic microwave using guided microwave theory

06 p1105 A70-17484

Transmission losses of plexiglass radome measured as function of frequency and antenna elevation angle, determining material dielectric constant

06 p1019 A70-17505

Plasma dielectric tensor derived quantum mechanically, emphasizing similarity in classical and quantum mechanical methods, discussing linear wave propagation, kinetic equations, etc

06 p1121 A70-17904

Scattering and depolarization of plane horizontally polarized electromagnetic wave from slightly rough lossless dielectric layer, using small perturbation theory

06 p1010 A70-18019

Lunar surface reflectivity determined by measuring reflected cosmic noise, determining dielectric constant and surface material properties

06 p1151 A70-18488

Crystals nonlinear permittivity related to temperature-time Green function for electromagnetic radiation, determining crystal polarizability by light-exiton method

07 p1335 A70-19868

Two parameter model for lattice vibrations applicable to diamond structured crystals, calculating phonon dispersion curves from dielectric screening theory

07 p1357 A70-19920

Spectrum of waves emitted from waveguide of two plane dielectric or isotropic plasma layers, solving dispersion equations numerically by computer

08 p1472 A70-20973

Quasi-optical beam splitter, using grid diffraction of plane wave at dielectric cylinder, suitable for millimeter and submillimeter wavelengths and thread measuring

08 p1496 A70-21219

Slot line wavelength, impedance, transitions and tolerances measured at S band using different dielectric constant materials

08 p1475 A70-21282

Relativistic electrons synchrotron radiation by calculating magnetoactive plasma permittivity tensor, determining normal waves polarization characteristics

08 p1554 A70-21812

Permittivity of thin films in millimeter and submillimeter wavelengths measured by diffraction grating method

08 p1464 A70-21985

Inorganic ceramic materials in design and fabrication of microwave antennas, filters and stable resonators, discussing density and dielectric constant variability by ceramics foaming

09 p1689 A70-22007

Thin resistive layers located in rectangular waveguide assuming constant and surface variable conductivity and permittivity

09 p1644 A70-22279

Natural frequencies and electromagnetic field distributions in rectilinear and cylindrical dielectric resonators used in microwave circuits

09 p1644 A70-22280

Laser measurements of permittivity fluctuations spectrum of turbulent atmosphere, noting proportionality to temperature spectra at optical frequencies 09 p1635 A70-22962

Coherent optical beam propagation measurement of fine scale turbulent atmosphere structure, inferring microscale size and permittivity spectra 09 p1635 A70-22963

Radiation losses of tapered single mode dielectric slab waveguide for TE and TM modes 09 p1650 A70-23369

Microwave signal fading in Venus atmosphere due to turbulence, discussing atmospheric dielectric permittivity variance 09 p1764 A70-23484

Materials permittivity measurement at millimeter and submillimeter wavelengths based on phase shift or sample optical thickness 09 p1684 A70-23648

Solid dielectrics permittivity measurement using beam deflection phenomenon in multislit waveguide antenna 09 p1652 A70-23656

Thermal emission of inhomogeneous plasma sphere having dielectric constant as function of radius 10 p1925 A70-25012

Two dimensional electromagnetic wave diffraction on arbitrary shaped homogeneous dielectric cylinder, solving integral equations on digital computer 10 p1842 A70-25105

Image contrast and diffraction efficiency of dielectric hologram made from diffuse signal beam, bleaching photographic emulsions 11 p2048 A70-25359

Anomalous water /polywater/ dielectric constant and effective parallel conductance, suggesting hydrosol classification 11 p1994 A70-25657

Relative permittivity of small thickness dielectric substrate plates determined from reflection coefficient in rectangular waveguides 11 p2011 A70-26603

Electromagnetic scattering from underdense plasma slabs with randomly varying dielectric constant, calculating reflection coefficient 11 p2095 A70-26763

Liquid crystal of cholesteryl chloride and myristate measured for complex dielectric constant, noting role of molecular rotation modes in dipole relaxation 12 p2180 A70-26859

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 12 p2272 A70-27359

EHF microwave absorption in compressed carbon density, measuring dielectric loss as function of gas density 12 p2273 A70-27571

Quasi-TEM analysis justification for limit cases of guided waves on microstrip transmission lines with dielectric constant approaching free space 12 p2190 A70-28168

Elastic, piezoelectric and dielectric properties of barium titanate single crystals of laminar domain structure 12 p2288 A70-28329

Nonlinear dielectric function and propagators of plasma submitted to electric field by Vlasov equation iterative solution, considering electron plasma in thermodynamic equilibrium 13 p2458 A70-28565

Magnetoplasmas nonlinear dielectric response function and parametric instabilities, discussing homogeneous pumping waves 13 p2459 A70-28568

Quartz-polyimide for missile radome exhibiting low dielectric constant and thin wall for use over broader frequency range 13 p2417 A70-28664

Temperature dependence of electrical properties and permittivity of barium titanate solid solutions containing Nb, Ta, Sb and La, using bridge-circuit of resonance techniques 13 p2469 A70-28853

Radiation characteristics of horn antennas loaded with curved transverse dielectric slabs and radial dielectric strips, discussing axial directivity and half-power beamwidth 13 p2370 A70-29836

Permittivity cell and encapsulation for liquids subjected to high pressures and temperature extremes 14 p2533 A70-30502

Surface wave radiation from plane dielectric waveguide, considering phase constants, directional properties and optimal distance location 15 p2696 A70-31503

Dielectric constants of zinc tungstate with wolframite structure 15 p2783 A70-31766

Earth surface temperature, emissivity and dielectric constant from satellite measurements of SHF radiation 15 p2771 A70-32072

Large amplitude electromagnetic waves propagation along plane parallel nonlinear dielectric layer, considering dispersion and permittivity 15 p2699 A70-32190

Weakly turbulent plasma dielectric constant nonlinear tensor for frequent Coulomb collisions, using hydrodynamic equations 15 p2781 A70-32824

Complex dielectric constant of alpha-AgI measured in microwave region and far IR, noting sample positioning 16 p2960 A70-33225

Low dielectric constant quartz-polyimide for radomes, considering curving methods 16 p2936 A70-33368

H-guide dielectric losses reduction by use of artificial and laminated dielectric slabs 16 p2875 A70-33401

Solid state dipole antenna array miniaturization by etching microstrip components on alumina substrate having high dielectric constant 16 p2876 A70-33409

Electromagnetic wave scattering on resonant dielectric sphere in rectangular waveguide, using reflection coefficient 18 p3227 A70-36419

Collisional contribution to finite wavelength high frequency dielectric constant of Coulomb plasma 18 p3295 A70-36439

Dielectric properties of thin barium titanate films from microwave resonance frequencies and resonance reflection coefficient 19 p3482 A70-37255

Trichroic IR absorption lines of triglycine selenate, computing optical and dielectric constants from transmission and reflection data 19 p3470 A70-37366

Fine structure of solar radiation-induced electrostatic fields on dielectric surface of comets and meteoroids 19 p3514 A70-37656

Strontium titanates ceramics containing various trivalent rare earth ions, observing dielectric relaxation 19 p3486 A70-37755

Breakdown electric field strength in S band microwave cavity for dry air, water vapor and mixture 19 p3423 A70-37757

Permittivity tensor of weakly turbulent magnetoactive cold electron plasma, calculating nonlinear currents 20 p3677 A70-39296

Inclined electromagnetic wave incidence on randomly inhomogeneous medium with changing mean dielectric permittivity, calculating reflected and scattered fields 20 p3587 A70-39726

Thermo-electret surface charge and dielectric constant time variation measurements, considering hole-electron pairs production hypothesis 21 p3797 A70-40890

Wide frequency range dielectric spectrometer for insulating materials permittivity and loss factor measurement and display 21 p3830 A70-41950

Thin two phase film conductivity, noting conditions for equality with geometric mean and for metal-to-dielectric transition 22 p4088 A70-43466

Monochromatic light propagation in medium with large scale Markov nonuniformities of dielectric constant using parabolic equation approximation 22 p4075 A70-43600

EM wave propagation in inhomogeneous media, examining permittivity and permeability 23 p4217 A70-43768

Intermaterial adhesion relation to association contact resistance-tension characteristics based on electric potential barrier model for Maxwell- Wagner effect 24 p4379 A70-45617

Graphite dielectric constant as function of frequency, considering electron energy loss anisotropy in UV 24 p4380 A70-45668

DIELECTRICS

NT RADOME MATERIALS

Dielectric overcoatings effect on Al interconnections electromigration in IC metallization, noting longer intervals between failures 01 p0153 A70-10083

Textolites and ferromagnetodielectric wedges mechanical strengths compared for use in open grooves of compound winding 01 p0008 A70-10195

Quadruple microwave probe applied to phase and attenuation variations measurements of HF wave propagating through dielectric media 02 p0345 A70-11898

Geometrical optics method for obtaining radar cross section of perfectly conducting sphere with inhomogeneous dielectric coating 02 p0262 A70-12599

Wave numbers determined in waveguide formed by laminar inhomogeneous medium enclosed between

homogeneous dielectric media, taking into account radiation losses through wall 03 p0447 A70-13290

Electromagnetic energy transmission factors for metal-dielectric-metal system, calculating net energy flux, noting effects of metal spacing, time, temperature level, etc [ASME PAPER 69-WA/HT-8] 04 p0784 A70-14822

Radiative transfer between two infinite parallel metallic surfaces separated by nonconducting thick film ideal dielectric based on electromagnetic wave theory [ASME PAPER 69-WA/HT-6] 04 p0784 A70-14824

Nonlinear theory of elastic dielectrics with polarization gradients, obtaining jump conditions and field and constitutive equations by variational principle 05 p0882 A70-16092

Backward and complex waves propagation in circular waveguide with coaxial dielectric rod, discussing arbitrary angular dependences 05 p0812 A70-16145

High speed photographic study of breakdown, crack formation, thermal explosions and molecular weight of transparent plastic dielectrics under laser beam 05 p0869 A70-16210

Nonlinear dielectric element /tandem/ for detecting IR radiation in contactless temperature measurement 05 p0848 A70-16363

Parametric coupling between space-time harmonics of electromagnetic wave propagating in dielectrics modulated by pump wave 05 p0815 A70-16660

Radio wave propagation in stratified media consisting of periodically stacked dielectric slabs solved for boundary condition by reducing Maxwell equations to Hill equation 06 p1007 A70-17463

Single mode neodymium laser second harmonic radiation self focusing resulting in filamentary fractures in solid dielectrics 06 p1080 A70-17496

Reflection coefficients, radiation patterns and surface wave excitation calculated from aperture electric field obtained for waveguide radiating through dielectric slab 06 p1020 A70-17561

Traveling wave maser with increased linear gain obtained by slow wave structure through asymmetrical positioning of dielectric 06 p1082 A70-17778

Three dimensional electrostriction theory for stress and displacement on penny-shaped crack in elastic dielectric with conducting oblate spheroidal inclusion 07 p1409 A70-19569

Electric field diffraction by infinitely long dielectric cylinder due to normally incident cylindrical wave, computing asymptotic value by geometric theory 07 p1235 A70-19684

Radiation hardened ICs development, discussing problem of dielectric isolation 08 p1468 A70-20627

Coplanar waveguide consisting of thin metallic film strip on dielectric slab with ground electrodes adjacent and parallel to strip for nonreciprocal gyromagnetic device applications 08 p1475 A70-21281

Circular dielectric waveguide modes self consistent description by asymptotic method, obtaining eigenvalues and eigenfunctions 08 p1476 A70-21288

Rectangular waveguides filled with magnetized ferrite with/without dielectric, calculating phase shift and attenuation by Ritz method 09 p1645 A70-22548

H guide with laminated dielectric strips separated by air layers, analyzing field distribution and characteristics 09 p1634 A70-22709

Polar gas phase dielectric under conditions of power saturation interacting with microwave radiation field in waveguide 09 p1728 A70-22908

Plane electromagnetic wave backscattering from dielectric-coated metallic cylinder calculated as functions of incidence angle and coating external radius 09 p1636 A70-23075

Rectangular coaxial waveguide with internal conductor contained between inhomogeneous magnetodielectric bars, deriving computer algorithm for natural mode fields 09 p1638 A70-23645

Point electric dipole EM radiation in presence of moving dispersive dielectric half space 09 p1639 A70-23669

Radiative capacity measurement for plasmas produced from nonconducting materials by pulsed discharges in magnetic field 10 p1923 A70-24252

Cerenkov radiation field in infinite parallel dielectric layer by sinusoidally bunched beam of electric charges moving with constant velocity along surface 10 p1916 A70-24408

Dielectric coatings resistance to laser radiation, measuring rupture threshold of vacuum coatings consisting of zinc sulfide layers

10 p1901 A70-25111

Radiation patterns widened from plane and circular waveguide ends closed by planoconcave homogeneous dielectric lens

10 p1843 A70-25135

Holographic dielectric gratings analyzed by Raman-Nath formalism modified for losses

11 p2050 A70-25640

Nonisothermal dielectric coating on conductor surface, analyzing temperature distribution effect on thermal emission characteristics

11 p2148 A70-25975

Coupling between parallel plate waveguides excited in TE modes using integral and differential equations, noting dielectric plug loading effect

12 p2198 A70-27954

Variational principle in electromagnetics to produce linear algebraic equations with Rayleigh-Ritz procedure for application to dielectrically coated slot antenna

12 p2198 A70-27957

Transverse electric field distribution in multilayered dielectric loaded rectangular guides determined by ray optics and residue calculus

12 p2199 A70-28051

Plane electromagnetic waves anomalous reflections from diffraction grating with periodic array of rectangular holes in dielectric layer, observing resonant character

12 p2191 A70-28175

Light pulse propagation in dispersive nonlinear dielectric analyzed on nonlinear Lorentz model

12 p2274 A70-28216

Thermoelastic stresses distribution in transmitting dielectric under short nonfocused laser pulses

12 p2251 A70-28327

Microdefects as centers of disk shaped destructive cracks in polymer dielectrics under laser irradiation

13 p2437 A70-28621

Circular shielded three layer dielectric waveguide critical parameters, estimating passbands for phase circulators with ferrite inserts

13 p2364 A70-28873

Plane electromagnetic wave reflection at interface of two semiinfinite dielectric media in relative motion perpendicular to incidence plane, noting polarization change

13 p2365 A70-29102

Pulse duration and beam diameter effects on threshold energy density in laser induced transparent dielectric breakdown

13 p2428 A70-29382

Light transmission losses in optical resonators partially filled with inhomogeneous dielectric, specifying optimal geometrical parameters

13 p2378 A70-29404

Pulsed electron beam irradiated dielectrics secondary electron emission in vacuum, emphasizing inelastic scattering

13 p2471 A70-29409

Electromagnetic energy propagation through absorbing single resonant frequency dielectric, deriving transport velocity and relaxation time

13 p2452 A70-29464

Strip lines transmission characteristics with rectangular outer conductor and multilayered layers within TEM wave approximation, using Green function and variational principle

14 p2558 A70-31316

Electromagnetic wave diffraction by heterogeneous planar dielectric structures, showing field distributions by single variable Fredholm equations

15 p2695 A70-31436

Normally incident plane monochromatic electromagnetic wave reflection and scattering from expanding dielectric slab, using invariant imbedding concept

15 p2695 A70-31438

Large amplitude electromagnetic waves propagation along plane parallel nonlinear dielectric layer, considering dispersion and permittivity

15 p2699 A70-32190

Refractive index and group velocity in moving dispersive half space/cold plasma or dielectric/under incident wave from vacuum

16 p2859 A70-32936

Periodically strip loaded dielectric slab guided electromagnetic waves, discussing attenuation and space harmonics amplitudes relationship

16 p2861 A70-32960

Excited circular cylindrical dielectric rod antenna radiation patterns derivation by Schelkunoff equivalence principle

16 p2872 A70-33121

H-guide dielectric losses reduction by use of artificial and laminated dielectric slabs

16 p2875 A70-33401

Super and subscular maxima in angular distribution of polarized radiation reflected from roughened dielectric surfaces

[ALAA PAPER 70-861]

16 p2999 A70-33906

Lateral heat transfer along parallel conducting and radiating plates spaced by absorbing and isotropically scattering dielectric

[ALAA PAPER 70-849]

16 p2939 A70-33916

Dielectric models of interstellar grains from calculations for smooth particles of homogeneous materials

17 p3159 A70-34879

Radiation from simple slots in moving dispersionless dielectric, using Minkowski electrodynamics

17 p3043 A70-34984

Lens antennas for performing radiation collimating function through refraction, discussing solid and artificial dielectrics lens design, beam scanning applications, etc

17 p3052 A70-35069

Satellite electronics production, discussing dielectric film capacitor, solar probe magnetic oxide memory core and thin film assemblies

17 p3053 A70-35268

Surface destruction of glass dielectric by pulsed laser beam, considering plasma clouds, shock waves, ablation and crack formation

18 p3266 A70-36153

Spatial signal transmission through open resonator determination based on resonator integral equation, extending to dielectric lens with finite Fresnel diffraction number

18 p3259 A70-36480

Maxwell-Wagner migrational polarization resulting from free ions or electrons drift in dielectrics and semiconductors, considering relaxation time

18 p3298 A70-36595

Plane electromagnetic wave diffraction by infinite grid above finite dielectric layer, calculating field distribution

19 p3375 A70-37281

Laser beam alignment system for monitoring dielectric film evaporation

19 p3445 A70-37686

Plane polarized electromagnetic wave diffraction by dielectric grating, obtaining linear algebraic equations for field coefficients

19 p3376 A70-37713

Dielectric layer and screen heat loss effects on diffraction radiation in resonant waveguide

19 p3377 A70-37725

Electromagnetic wave propagation perpendicular to slots of plane dielectric filled waveguide used as slow wave system and antenna

19 p3386 A70-37728

Magnetic coupling in solid dielectric cylinder under axial magnetic and perpendicular electric fields, noting memory and magnetostrictive effects

19 p3471 A70-37785

Viscous dielectric incompressible fluid cylinder capillary stability under small axisymmetric disturbances and axial electric field, deriving perturbed fluid flow equations

19 p3406 A70-38351

Dielectric rod and Yagi antennas radiation mechanism, determining pattern, gain and effective aperture

20 p3585 A70-39398

Radiation theory circular waveguide in dominant TE mode and flush mounted to infinite conducting flat ground plane covered by plasma or dielectric sheath

20 p3586 A70-39500

X band electromagnetic horn antennas, measuring triangular shape dielectrics effects on radiation pattern

20 p3599 A70-40312

Two dimensional and volume diffuse signal beam dielectric holoforms, calculating and measuring diffraction efficiency and signal to noise ratio

21 p3835 A70-40717

Arbitrary mode launching on fiber-optical dielectric waveguides by spatial filtering technique

21 p3829 A70-41930

Pressurized liquid nitrogen and hydrogen dielectrics for cryogenic cables, measuring dissipation factor and voltage breakdown by concentric cylindrical test cell

21 p3851 A70-42125

Ball lightning model assuming radiation field within plasma dielectric region resonant at higher than collision frequency

22 p4016 A70-42780

Self focusing in nonlinear optics, discussing physical processes of wave propagation in dielectrics

22 p4074 A70-43207

Electric strengths of liquid dielectrics during subjection to Q switched laser pulses, determining threshold currents for breakdown

22 p4051 A70-43338

Resonant frequencies of microwave dielectric resonator in magnetic wall waveguide

23 p4169 A70-43784

Electroreflectance at CdS-electrolyte interface, noting field strength effect on relaxation time

23 p4230 A70-43930

Dielectric covered narrow radiating slots in rectangular waveguide broad face, calculating impedance from equivalent circuits

23 p4175 A70-44952

Dielectric filled tubular monopole antenna driven by coaxial line with TEM mode, calculating current distribution from integral equation

23 p4175 A70-44953

EM wave backscattering from lossless dielectric sphere, examining diffracted field surface waves role

23 p4165 A70-44960

Radar cross section for thin dielectric plate and spherical and conical shells

23 p4166 A70-44975

Optical damage center structural defects in transparent dielectrics under high energy ruby laser radiation, noting nontransparent inclusions and dislocation centers

24 p4351 A70-45209

Microwave transmission systems, determining electric potential functions in inhomogeneous dielectrics by Earnshaw theorem and finite difference computation

24 p4318 A70-45217

Microwave transmission in partially dielectric filled circular waveguide, deriving cutoff wavelength and phase velocity vs frequency

24 p4315 A70-46260

DIENCEPHALON

Reduced visual perception time in patients under X ray treatment of diencephalo-hypophyseal region

08 p1443 A70-20736

Vegetative nervous system reactions of patients with diencephalic syndromes, investigating hypothalamo-hypophyseal-adrenal system role

13 p2352 A70-29353

DIENES

NMR spin-spin coupling constants between vinyl protons in cyclopentadiene, 1,3-cyclohexadiene and 1,3-cyclooctadiene from spectrum analysis

21 p3780 A70-41704

DIES

Matched die molding technology working principles, mat materials, mold taper, preforms, etc

05 p0856 A70-16613

Nickel base alloy as die material for creep forming titanium

11 p2060 A70-26424

Die surface composition effects on lubricant efficiency in metal working judged by friction coefficient and surface damage

13 p2418 A70-28830

Matched-die compression molding of complex shape structures from composite materials [SAE PAPER 700751]

24 p4348 A70-45874

DIETS

Human capacity to discriminate between poorly and well balanced diets and liability to select amino acid imbalanced mixtures for deficient nutrient

01 p0028 A70-11314

Diet and feeding method effects on food intake and plasma amino acid concentrations of rats fed low protein diet with amino acid imbalance

02 p0231 A70-11707

Dehydrated food effects on human functional state, noting published literature on food composition, preparation, caloric and nutritional values, digestibility, etc

03 p0435 A70-13703

Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets

03 p0435 A70-13713

Fraction of Chlorella and Scenedesmus biomass, noting changes in adrenal cortex and renal glomerulus

03 p0425 A70-13889

Sweet potatoes productivity and nutritive value as carbohydrates source in manned space flights

04 p0641 A70-14572

Prolonged dehydrated food diet effect on metabolism of humans, noting complete adaptation after three or four months

04 p0630 A70-14577

Myocardial infarction therapeutic prevention possibilities on basis of epidemiologic and dietary studies involving hypercholesterolemia and hyperlipemia in coronary disease

04 p0635 A70-15463

Flavor sweetening preference in high protein and high fat diets, basing human subjects experimental range on choice of formulas

07 p1216 A70-18948

Research diets cost analysis including labor, ingredients, preparation and storage

07 p1217 A70-18949

Hyperoxia effects on red blood cell (RBC) survival in rats on normal diets, noting relatively normal erythropoiesis after long term exposure

07 p1214 A70-19935

Unicellular algae protein diet effects on animal and human enteric microflora composition

09 p1615 A70-22087

Dietary intake and adrenal cortex effects on diurnal rhythm of hepatic tyrosine transaminase activity and adrenal corticosterone content in rats

09 p1621 A70-23437

Urinary calcium phosphate and carbonate precipitates reduction by protein and carbohydrate

diet change to casein and sucrose in *Macaca nemestrina*
09 p1621 A70-23456

Dehydrated food effects on human functional state, noting food composition, preparation, caloric and nutritional values, digestibility, etc
11 p1989 A70-25503

Excretion and balance of K, Ca, Mg, P, S and N during prolonged use of dehydrated food diets
11 p1989 A70-25513

Dietary protein and yeast RNA levels effect on uric acid metabolism in normal man
11 p1987 A70-26002

Unicellular algae protein diet effects on animal and human enteric microflora composition
15 p2685 A70-32683

Hypokinesia and reduced diet effects on human tolerance to static loads, discussing acceleration tolerance prediction
20 p3576 A70-40198

Growth and caloric intake of rats exposed to high altitude dependence on high carbohydrate, protein and fat diets
22 p3967 A70-42458

Space diets with pure nutrition for balanced nutrition obtained through biological and physicochemical synthesis
23 p4157 A70-45027

DIFFERENCE EQUATIONS

Difference set D of k distinct residues, extending Hall search with negative results, discussing multipliers, polynomial congruence, etc
01 p0132 A70-11073

Difference method for calculating one dimensional nozzle flow and expansion with allowance for relaxation, friction and heat losses, discussing fluorine-hydrogen mixture application
03 p0408 A70-13804

Difference methods application to supersonic gas flow past blunt body and unsteady axisymmetric flow past body of unspecified configuration, analyzing stability
04 p0670 A70-14957

Unsteady problems of gas dynamics solved by method of characteristics, Godunov method, difference methods, etc
04 p0670 A70-14958

Difference equations and axial stress tensor component for turbomachinery in curvilinear coordinates systems
04 p0776 A70-15268

Finite difference wave equation to obtain asymptotic estimate for magnitude of precursor effects
05 p0875 A70-16310

Homogeneous difference schemes for solving ordinary arbitrary-order differential equation with discontinuous coefficients
05 p0877 A70-16973

Numerical solution of nonlinear hyperbolic systems of differential equations using methods of differences, applying results to invariant cross section gas flow
06 p0964 A70-17236

Turbine machine elements approximation by difference equations of axisymmetrical elasticity theory problem
06 p1167 A70-17663

Ritz method applied to second order nonlinear differential-difference equations subjected to sinusoidal driving functions, studying stability criteria and resonance properties
07 p1327 A70-20023

Error propagation in linear first order difference equations studied to improve accuracy of derivative recursive computation
07 p1328 A70-20249

Steady oscillations under random forces of nonlinear system described by stochastic partial differential difference equations with distributed parameters and delayed argument
08 p1542 A70-20486

Difference schemes approximating quasi-linear heat conduction equation, demonstrating convergence
08 p1596 A70-20857

One dimensional difference scheme for gas dynamics with heat conduction
08 p1482 A70-20859

Matching operations for difference and differential equations describing discrete control systems dynamics having cyclic interruption of data quantization frequency
08 p1480 A70-20999

Nonlinear computational stability of partial difference approximations to meteorological equations
08 p1534 A70-21024

Optimal control with time delays in system model described by constant coefficient linear differential-difference equations
09 p1653 A70-22346

Beginning of table calculations using difference methods for numerical integration of ordinary differential equations
13 p2440 A70-28960

Partial differential equations in regions with curvilinear boundaries solved by difference network approximation method
13 p2440 A70-28961

Numerical solution to Laplace equation in spherical coordinates with axial symmetry, using Dirichlet method to obtain difference equations
15 p2767 A70-31751

Difference schemes approximating boundary value problem for heat conductivity and oscillation equations, considering brute force method stability
16 p2951 A70-33245

Closed form difference equations for finite element models in structural mechanics, noting plate and grid applications
16 p2990 A70-33672

First order difference equations for dynamical systems from Hamilton canonical equations
17 p3129 A70-34959

Class of third order difference methods for hyperbolic equations in one and two dimensions applicable to nonlinear initial value problems
17 p3131 A70-35893

Gasdynamic equations in Euler variables, constructing completely conservative difference schemes with first and second orders of approximation
18 p3241 A70-36288

Monotonic difference schemes for parabolic differential equations with nonlinear boundary conditions, discussing convergence and stability
18 p3282 A70-36361

Two dimensional turbulent film cooling, predicting initial region temperature distribution by solving finite difference form of thermal energy equation
18 p3346 A70-36497

Magnetohydrodynamic calculations, discussing various models, difference methods, codes, boundary conditions, etc
18 p3296 A70-36794

Soviet monograph on gas dynamics one dimensional problems in variable networks, discussing difference schemes, boundary conditions and discontinuities
19 p3407 A70-38930

Deep penetration radiation shielding calculations using discrete ordinates difference equations and computer program
23 p4216 A70-43808

Mathematical models derivation for systems of interconnected elastic segments, using variational method and energy summation via difference equations
23 p4266 A70-44019

MHD equations for one dimensional plane steady flow, considering conservative difference schemes for approximation
23 p4226 A70-44307

MHD nonstationary three dimensional problems, describing difference method
23 p4227 A70-44738

Krylov and Bogoliubov perturbation method extension to difference equations based on analogy between differential and difference equations
24 p4370 A70-46027

DIFFERENTIAL ALGEBRA

U DIFFERENTIAL CALCULUS

U MATRICES [MATHEMATICS]

DIFFERENTIAL AMPLIFIERS

Signal processing by differential data and common mode amplifiers and active filters, emphasizing low level transducers
19 p3431 A70-38529

DIFFERENTIAL ANALYZERS

U ANALOG COMPUTERS

DIFFERENTIAL CALCULUS

Differential properties of class of functions of many real variables
01 p0132 A70-11067

Differential strip method developed for turbulent boundary layer equations, describing flow by law of wall coupled to wake solution utilizing constant eddy viscosity
02 p0285 A70-12352

Boundary layer prediction methods criteria, discussing advantages and disadvantages of differential and integral methods for various flows
02 p0286 A70-12356

Differential correction procedures, using residuals to obtain celestial body orbital elements by linear programming
04 p0751 A70-14943

Second vertical derivative of gravity field, using formulas based on Taylor series expansion method
06 p1055 A70-17604

Infinite order differential operator in S type spaces for Cauchy problem solution uniqueness
08 p1533 A70-20722

Differential calculus for multifunctions using Radstrom embedding theorem for convex sets
09 p1710 A70-22060

Alternating direction implicit method for solving parabolic equation with variable coefficients in two space dimensions with mixed derivative
09 p1711 A70-22284

Iterative technique for determining zero of differentiable function
09 p1641 A70-22287

Endpoint sufficiency test based on differential calculus method, considering Bolza problem of continuous state and piecewise control variables
11 p2073 A70-26233

Differential game theory, discussing two player zero sum situation
20 p3659 A70-40108

DIFFERENTIAL EQUATIONS

NT BIHARMONIC EQUATIONS

NT BLASIVUS EQUATION

NT BURGER EQUATION

NT CAUCHY-RIEMANN EQUATIONS

NT PARABOLIC DIFFERENTIAL EQUATIONS

NT PARTIAL DIFFERENTIAL EQUATIONS

NT POISSON EQUATION

NT VLASOV EQUATIONS

Differential equation comparison with Liapunov vector function, applying Caratheodory condition
01 p0130 A70-10156

Finite difference scheme for linear second order third boundary value problem in ordinary differential equations
01 p0131 A70-10455

Reentry trajectory dispersions due to atmospheric uncertainties determined using continuous differential equations based on atmospheric random processes method
01 p0183 A70-10846

Autonomous functional differential equations with finite time lag using Liapunov functionals, discussing stability and instability
01 p0132 A70-11070

Two variable expansion method applied to ordinary differential equation and two wave propagation problems, comparing results with matched asymptotic expansions and coordinate stretching methods
01 p0132 A70-11072

Buckling of orthotropic sandwich plates derived for sixth order governing differential equation by variational theorem
01 p0204 A70-11139

Differential and integral inequalities theory and applications, Volume 1, Ordinary differential and Volterra integral equations
01 p0133 A70-11324

Diffusion phenomenon in cross linkage theory of biological aging formulated as model in differential equation form, obtaining solution and applications
01 p0028 A70-11374

Lagrange solution to differential equations of motion of body with fixed point, deriving directrices of mobile and fixed hodograph
01 p0144 A70-11429

Motion of body with fixed point reduced to single second-order differential equation, analyzing special cases of gyrostatic motion
01 p0145 A70-11437

Observation process optimization in system described by linear differential equations of motion reducible to optimal control problem
01 p0047 A70-11574

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations
01 p0146 A70-11604

Second order ordinary differential equations solution extended to higher order or partial differential equations using numerical integration
02 p0324 A70-12280

Energy dissipation and entrainment methods for calculating turbulent boundary layer development, involving simultaneous numerical solutions of ordinary differential equations for local variables
02 p0283 A70-12337

Integral methods for turbulent boundary layer solutions, emphasizing shape factor improvement in differential equations
02 p0286 A70-12357

Small parameter method for reducing self similar viscous flow problems to ordinary third order differential equations with boundary conditions at wall and infinity
02 p0288 A70-12821

Differential equation with associated boundary conditions constructed for radiative transfer with spherical symmetry, applying to gray gas between concentric black spheres
03 p0603 A70-12904

Generalized multiple scales method for solving linear differential equations with variable coefficients applied to Liouville-Green approximation
03 p0518 A70-12994

Cauchy problem of differential equation describing asymptotic nature of conservative system motion resulting from nonperiodic perturbing force

03 p0524 A70-13342

Gyroplatform angular position with respect to reference stars from solving nonlinear differential equations, applying Liapunov method

03 p0524 A70-13366

Discontinuous solutions of nonlinear boundary value problems of heat conduction for second order ordinary differential equations using modified difference method

03 p0604 A70-13390

Stability criteria for first approximation solutions of nonlinear ordinary differential equations of motion

03 p0524 A70-13431

Liapunov function for automatic control systems, deriving theorem to ensure stability

03 p0460 A70-13434

Dissipativity and asymptotic stability criteria derived for systems of ordinary differential equations, considering application to automatic control problem

03 p0518 A70-13469

Laplace transform applied to ordinary differential equations with variable coefficients, obtaining representations of integral and integrodifferential equations

03 p0519 A70-13506

Stress differential equations of equilibrium for thick prolate spheroid/left ventricle/, yielding practical values for mean stresses in thick walled ventricles

03 p0434 A70-13571

Periodic solutions for two dimensional cubic differential equation, covering one dimensional traveling wave and two dimensional types

03 p0519 A70-13581

Nonlinear differential equations for determining radiation density of three level pulsed gas laser as function of power losses, active medium parameters and time

03 p0502 A70-13745

Differential equations system under side condition, examining solutions existence

03 p0519 A70-14073

Existence conditions of conjugate points for nontrivial solution of fourth order differential equation

03 p0519 A70-14079

Nonlinear stochastic differential equations formulated during random loading processes generation, designing testing devices with stable performance parameters

03 p0598 A70-14236

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitian polynomials, using ordinary differential equations

03 p0526 A70-14302

Differential equations solution in terms of elementary functions applied to evaluate critical buckling loads for struts of variable cross sections

03 p0602 A70-14328

Analytical approach to gradient method within framework of Bolza problem of variational calculus, using linearized differential and isoperimetric constraints

03 p0520 A70-14341

R function method for solving plate bending problem by satisfying differential equations coordinates

04 p0767 A70-14489

Distribution of zeros of solutions of canonical fourth order linear differential equations

04 p0713 A70-14675

Transport theory application to differential approximations for radiative transfer problems

[ASME PAPER 69-WA/HT-45] 04 p0781 A70-14801

Numerical analysis of nonlinear boundary value problems for ordinary differential equations, considering patch bases and monotone methods

04 p0714 A70-15046

Differential equations for minimum variance linear filter separating signals from additive correlated noise, using discrete time optimum formulas

[AIAA PAPER 69-73] 04 p0663 A70-15586

Numerical solution for differential equations describing nonlinear beam-plasma interactions based on dispersion relation analysis

05 p0886 A70-15799

Momentum-energy complex obtained for nonlocalized fields in variational mechanics, deriving integrodifferential identities for Euler equations quadratures

05 p0881 A70-16078

Hori canonical equations solved by eliminating short period terms in general planetary theory, noting reduction to systems of linear differential equations

05 p0907 A70-16160

Hydrothermodynamic equations used in forecasting meteorological components solved by assuming equations of motion quasi-linear and reducing to ordinary differential equations

05 p0878 A70-16195

Self adjoint boundary value problems with interior point boundary conditions using differential operator in Hilbert space

05 p0876 A70-16423

Differential equation for crack propagation applied to threshold conditions for brittle fracture caused by impulsive load

05 p0939 A70-16486

Differential equations and applications - Conference, Bratislava, Czechoslovakia, September 1966

05 p0876 A70-16560

Ordinary linear differential equations of high order and normal form with integrable and bounded coefficients in real and complex planes

05 p0876 A70-16561

Liapunov function construction and stability criteria based on linear differential equations containing periodic and aperiodic coefficients and small parameter

05 p0883 A70-16859

Homogeneous difference schemes for solving ordinary arbitrary-order differential equation with discontinuous coefficients

05 p0877 A70-16973

Randomly perturbed linear differential equation involving first derivative of n-vector function of real variable

05 p0878 A70-17096

Existence and uniqueness, stability and asymptotic stability of nonlinear operator differential equation

05 p0878 A70-17098

Existence and stability problems of nonlinear operator differential equations containing linear operator with domain and range contained in real Hilbert space

05 p0878 A70-17099

Numerical solution of nonlinear hyperbolic systems of differential equations using methods of differences, applying results to invariant cross section gas flow

06 p0964 A70-17236

Laplace transform of piecewise continuous function derivative for application to differential equations

06 p1164 A70-17428

Diffusion processes governed by stochastic equations

06 p1093 A70-17581

Nonlinear differential equations variational formulation, giving practical applications

06 p1093 A70-17635

Rotta differential equation for turbulent boundary layer flow with fixed profiles of length scale, shear stress and kinetic energy

06 p1035 A70-17694

Electric network models of nonhomogeneous differential equations applied to elastic beam and thin plate bending and displacement equations

06 p1094 A70-17927

Meksyn asymptotic method of integrating boundary layer equations applied to ordinary differential equations for slip flow past semiinfinite flat plate

06 p0979 A70-18348

Stability and limiting frequency of analog computer solutions of differential equations with root shifts caused by resolver imperfection

07 p1321 A70-18689

Soviet collection of papers on boundary problems for differential equations covering variational problems in half space, polynomial behavior at infinity, function spaces, Fourier transformation, etc

07 p1322 A70-18851

Asymptotic behavior of approximate solutions of nonlinear differential equations

07 p1322 A70-18891

Equations for general shells of revolution reduced to simultaneous fourth order ordinary differential equations for stress and displacement functions

07 p1401 A70-18892

Pursuit games theory with bounded accelerations, using differential equations

07 p1323 A70-18947

Stochastic differential equations for approximate continuous nonlinear minimal variance filtering, discussing existence and uniqueness conditions

07 p1245 A70-19092

Optimal control of dynamical systems with transport lag determined using differential-integral equations

07 p1245 A70-19094

Periodic solution with nondegenerate orbit for functional differential equations taking into account small perturbation

07 p1324 A70-19199

Differential equations of motion for sensitive element of gyrocompass with torsional suspension under small amplitude spatial vibrations, taking into account torsional and flexural rigidities

07 p1282 A70-19534

Convergent power series solution for holonomous mechanical systems stability described by ordinary and partial differential equations

07 p1334 A70-19545

Asymptotically periodic solution of nonlinear differential equations, discussing digital or analog computer utilization

07 p1326 A70-19782

Prandtl problem solution by reducing integrodifferential equation to linear differential equation in disk of complex variable, noting application to elliptical or rectangular wings

07 p1258 A70-19783

Integrodifferential equation derived for energy balance in laminar boundary layer of fluid flow, taking into account viscous energy dissipation, radiative energy transfer, etc

07 p1423 A70-19813

Ritz method applied to second order nonlinear differential-difference equations subjected to sinusoidal driving functions, studying stability criteria and resonance properties

07 p1327 A70-20023

Two point boundary value problems of quasi-differential equations, discussing conditions for continuous and increasing lower bounds of functions

07 p1328 A70-20349

Stability criteria for systems of nonlinear stochastic differential equations on finite time interval, considering stable motion of physical processes

08 p1533 A70-20488

Quasi-stable linear differential equations systems with nearly periodic coefficients, noting application to equations with zero real portions of matrix characteristic roots

08 p1533 A70-20492

Differential correction algorithm for identifying airplane parameters from flight test data, assuming differential equations

08 p1465 A70-20783

Linear differential controller equations for optimal automatic control system with disturbances

08 p1479 A70-20870

Structural synthesis of functional control systems represented by first order differential equations, determining hypersurface

08 p1479 A70-20871

Characteristic equations for differential symmetry operators in homogeneous and nonhomogeneous Maxwell equations

08 p1544 A70-20990

Matching operations for difference and differential equations describing discrete control systems dynamics having cyclic interruption of data quantization frequency

08 p1480 A70-20999

Stability in whole of motion determined by system of nonlinear third order differential equations, using Liapunov functions

08 p1545 A70-21003

Differential descent convergence demonstration based on relation between convex and Liapunov functions

08 p1534 A70-21007

Stability of solutions to linear differential equations pair, determining bound conditions having S-property

08 p1534 A70-21100

Stability of continuously differentiable functions representing approximate solution to system of differential equations of perturbed motion

08 p1545 A70-21167

Nonlinear system oscillations analysis based on small parameter method and difference equations, including resonant case and stability criterion for periodic solutions

08 p1546 A70-21629

Digital differential analyzers improved speed and accuracy by extended resolution on Euler integration for differential equations solution programming

08 p1467 A70-21756

Repetitive electronic differential analyzer with transistorized operational amplifiers for iterated solutions of differential equations

08 p1478 A70-21836

Cup and vane anemometers theory, determining overestimation errors of differential equation for mean values in sinusoidally fluctuating winds

08 p1501 A70-21975

Quadrature formulas with minimum remainder estimate for differentiable functions classes, considering piecewise polynomial/spline/ functions characteristic properties

09 p1711 A70-22147

Interval of values with stability and convergence for correctors for differential equations

09 p1641 A70-22286

Mixed system of simultaneous linear differential equations under general boundary conditions, deriving numerical solution in Chebyshev series

09 p1711 A70-22288

Optimal control with time delays in system model described by constant coefficient linear differential-difference equations

09 p1653 A70-22346

Liapunov stability conditions for critical point of ordinary differential equation, determining optimal criterion

09 p1727 A70-22664

Nonlinear differential equations analysis based on weighted linear approximation applied to singular points and trajectories in phase plane in friction problems

09 p1727 A70-22665

Nonlinear differential equations approximate periodic solutions generation by finding equivalent system in sense of minimum mean square difference

09 p1712 A70-22666

- Differential equation formulation for pipeline in hydraulic automatic control system considered as lumped or distributed parameter plant
09 p1612 A70-22823
- Fourth order differential equation system with complex conjugate eigenvalues, deriving optimal control for fuel minimum
09 p1759 A70-22831
- Ordinary differential and algebraic equations correct analog model, noting residual system stability role
09 p1642 A70-22973
- Asymptotic splitting of system of linear differential equations with slowly varying coefficients in cases with characteristic equation having multiple roots
09 p1712 A70-23119
- Point boundary value problem solution for differential equations with parameters in form of power series, considering Cauchy problem
09 p1712 A70-23383
- Analytic systems theory using Volterra calculus of functionals applied to nonlinear differential equations
10 p1908 A70-23845
- Hodograph or Riemann invariants method generalization for nonelliptic systems, discussing three dimensional potential supersonic flows
10 p1863 A70-24087
- Discontinuous weak solutions of differential equations of gas dynamics as limits in topology of functions
10 p1866 A70-24109
- Power series solution convergence of differential equations system, changing independent variable by conformal mapping
10 p1909 A70-24181
- ALGOL algorithm for Runge-Kutta type numerical integration of simultaneous differential equations, using Merson method for step length determination
10 p1845 A70-24405
- Numerical method for linear differential equations extended to nonlinear ordinary differential equations, liquidating residuals by setting integrals equal to zero
10 p1909 A70-24419
- Quasi-linearization extension to numerical solution of multipoint boundary value problems for ordinary differential equations arising from state constrained optimal control problems
10 p1909 A70-24421
- Parameter introduction during boundary value problem solution for second order nonlinear ordinary differential equations
10 p1909 A70-24510
- Existence theorem for periodic solutions of nonlinear differential equations with deviating arguments
10 p1910 A70-24605
- Numerical integration method for function and solution of differential equation, considering equations governing two dimensional motion of particle in air stream
10 p1910 A70-25099
- Triangular system of linear differential equations reducible to block form by Liapunov transformation, deriving indices stability conditions
10 p1911 A70-25303
- Root loci construction for differential equations with quadratic free parameters applied to aircraft motion with roll control
11 p2071 A70-25393
- Automatic control systems synthesis for plants described by incomplete differential equations, measuring controlled value and input derivatives
11 p2023 A70-25610
- One-step numerical integration of linear differential equations based on Labotto quadrature, including higher order applications and stability analysis
11 p2071 A70-25840
- Coupled nonlinear systems analysis based on reducing coupled differential equations to equivalent uncoupled equations amenable to existing techniques
11 p2072 A70-25956
- First order differential equations for unsymmetrical bending of shells of revolution
11 p2135 A70-25978
- Vector-matrix differential equation for second order sensitivity coefficients applied to trajectory optimization, modeling and compensation and guidance and control
11 p2029 A70-26324
- Stochastic differential equations objectives, limitations and restrictive assumptions in physical problems, discussing electromagnetic wave propagation in random continuum or random d'Alembertian operator
11 p2074 A70-26550
- Random processes correlation functions determined by stochastic differential equations applied to lunar surface statistical characteristics determination
11 p2118 A70-26785
- Markov nonlinear optimal filtration theory exact equations replaced by finite system of approximate differential equations
11 p2012 A70-26805
- Kantorovich theorem application as weak Newton method used in boundary value problems containing Euler-Lagrange equation for variational problems and ordinary differential equations
12 p2260 A70-27002
- Differential equations in two point boundary value problems solved by combining Newton-Raphson iterative method with parameter variation extrapolation
12 p2260 A70-27003
- Differential equations perturbed linear systems convergence, extending Bridgland results
12 p2260 A70-27011
- Subdivisional method for linear systems vibration and buckling problems, reducing governing equation to ordinary differential equation with variable coefficients
12 p2320 A70-27145
- Integral manifolds of third order autonomous differential equations with unstable equilibrium point, investigating forward and negative asymptotic problems
12 p2261 A70-27375
- Differential equations of motion of manometers in log instrument systems with allowance for viscous liquid in sensor and pulse line
12 p2234 A70-27567
- Transient heat transfer combining conduction and radiation in absorbing plane layer analyzed by differential approximation
12 p2332 A70-27801
- Linear periodic coefficient differential equations stability analysis by infinite determinate method, considering applications to damped mechanical systems motion and dual spin satellite
12 p2261 A70-27813
- Algorithm for integrating ordinary differential equations system determined for stability condition by trial-and-error procedure programmed on computer
12 p2262 A70-28030
- Liapunov functions construction through conversion of differential equation with polynomial nonlinearities into auxiliary exact differential equation using algorithm
12 p2262 A70-28070
- Beginning of table calculations using difference methods for numerical integration of ordinary differential equations
13 p2440 A70-28960
- Partial differential equations in regions with curvilinear boundaries solved by difference network approximation method
13 p2440 A70-28961
- Nonlinear differential equations systems, deriving periodic solutions existence conditions
13 p2440 A70-29049
- Ordinary differential eigenvalue problems solution by successive transformations, describing computer program and applications to hydrodynamic stability
13 p2440 A70-29085
- Variable mesh multistep predictor-corrector method for iterative solution of ordinary differential equations, considering numerical stability and algorithm efficiency
13 p2440 A70-29087
- Finite difference methods for approximating first order nonlinear hyperbolic differential equations, considering convergence
13 p2441 A70-29098
- Numerical integration of differential equations with widely separated eigenvalues, outlining solution stability and accuracy problems
13 p2441 A70-29213
- Periodic solutions to linear differential equations with delay, applying numerical-analytical procedure
13 p2441 A70-29315
- Turbulent shear flow direct interaction equations simplification to differential equations amenable to computation
13 p2389 A70-29463
- Finite time stability of differential equations system using Liapunov functions
13 p2442 A70-29488
- Controllability test for second order differential systems, noting applicability to linear first order time dependent systems
13 p2443 A70-29972
- Covariance propagation via differential equations for time-varying eigenvalues and eigenvectors
13 p2450 A70-29979
- Book on differential dynamic programming covering algorithms for continuous time control, bang-bang, discrete time and stochastic systems
14 p2560 A70-30631
- Method of ascent for general representation in boundary value problems associated with differential equation of n variables
14 p2599 A70-30636
- Differential equations eigenvalue and boundary value problem finite difference approximation convergence under consistency and stability conditions
14 p2599 A70-30643
- Differential equations stiff systems numerical solution by linear one step integration methods
14 p2599 A70-30645
- Canonical representation for nonlinear differential equations periodic solutions
14 p2658 A70-30846
- Singular perturbation problems in theory of differential equations with almost periodic coefficients
14 p2599 A70-30847
- Fourth order differential equations eigenfunctions construction and convergence of expansions in theory of flexure of sector plates
14 p2658 A70-30997
- Riccati-like linear functional differential equation with quadratic cost, analyzing feedback control solution existence and uniqueness
14 p2600 A70-31204
- Monograph on nonlinear oscillation equations resonance solutions and solution stability, considering Green matrix, differential equations reduction to integrodifferential equations, etc
14 p2618 A70-31417
- Differential equation for longitudinal vibrations of rod at high temperature, giving asymptotic solution
15 p2814 A70-31589
- Unique solvability of mixed semihyperbolic linear equations of higher order with respect to spatial variables and time
15 p2768 A70-32475
- Nonlinear differential equations for smoothing density function and smoothed expectation of arbitrary function of state
16 p2941 A70-33057
- Particular solutions for nonlinear two point boundary differential equations with initial and final conditions
16 p2942 A70-33692
- Digital simulation of continuous systems described by differential equations
16 p2870 A70-33728
- Hypersonic internal flow investigation by differential equation numerical integration, determining shock shape and surface pressure
16 p2838 A70-33881
- German monograph on calculation and measurement of stress distribution in turbine rotors with radial flow, discussing differential equations for rotating disks
16 p2993 A70-34076
- Neutral type differential equations transformation to time lag system making periodic vibrations existence and stability theorems applicable
16 p2944 A70-34282
- Boundedness theorem for solutions to differential equations system in applied mechanics
16 p2944 A70-34287
- Differential equations numerical integration by one step method of high order accuracy
16 p2945 A70-34333
- Optimal control problems solution using Cartesian product of space of right-hand sides of differential equations with Euclidean n space
17 p3129 A70-34868
- Existence and uniqueness theorem for boundary value problem solutions to nonlinear canonical ordinary differential equations
17 p3131 A70-35339
- Three dimensional mixed boundary value problems, obtaining solutions for elastic body differential equilibrium equations
17 p3192 A70-35699
- Single axis gyroscopic stabilizer with floating-type integrating gyro, describing natural oscillations by differential equations of motion
17 p3096 A70-35701
- Explicit differences scheme for heat and mass transfer differential equations
18 p3345 A70-36114
- Power series solutions to linear and nonlinear differential equations in region of asymptotic stability
18 p3279 A70-36155
- Parametric functions of integral matrices representing linear differential system via continuous coefficients
18 p3279 A70-36156
- Stability conditions for control system third-order differential equations with double nonlinearity, using Liapunov function
18 p3280 A70-36157
- Stability criteria for differential equations with complex variables, considering boundary value requirements and sufficient conditions theorems
18 p3281 A70-36352
- Nonlinear second order differential equations with periodic coefficients and solutions, examining stability by phase and amplitude plots by marginal range diagrams
18 p3282 A70-36356
- Linear differential equation integration method, using Eulerian technique for error reduction
18 p3282 A70-36358
- Boundary value problem approximation method for large numbers, using projective method applicable to linear integral, integrodifferential and differential equations
18 p3282 A70-36360
- Eigenvalues and errors in asymptotic approximation of ordinary differential equations of second and fourth order
18 p3283 A70-36365
- Linear multistep algorithms in discretization of nonlinear initial value problems of ordinary differential equations
18 p3283 A70-36366

Inverse Laplace transform of network function with allowance for initial differential equation solution, determining circuit temporal characteristics

19 p3456 A70-37269

Soviet book on dynamic systems with cylindrical phase space covering differential equations with angular coordinates, parameter estimation, multidimensional and discontinuous systems, pendulums, etc

19 p3470 A70-37468

Differential equations for odd and even parity Regge-Wheeler perturbations on Schwarzschild metric

19 p3457 A70-37573

Uniform asymptotic solutions of second order linear differential equations with arbitrarily many turning points or Stokes lines

19 p3457 A70-37681

Modified differential equation for stability of oscillating nonlinear system

19 p3458 A70-37823

Periodic solutions of nonlinear second order differential systems containing symmetries, noting Marlin criteria

19 p3458 A70-38064

Round laminar jet with swirl, reducing Navier-Stokes equations to ordinary differential equations by similarity transformations

19 p3405 A70-38349

Ordinary differential equations piecewise polynomial approximation using subpartitioning to liquidate residuals

19 p3458 A70-38356

Stress differential equations of micropolar elasticity, considering mass forces and moments of inertia

19 p3459 A70-38672

Liapunov stability analysis of dynamic systems described by simultaneous ordinary and partial differential equations of motion, applying to satellite spin stabilization

[AIAA PAPER 70-1045]

19 p3472 A70-38860

Differential equations approximate solution by interval differential equations, obtaining graphs with analog computer

19 p3459 A70-38931

Linear homogeneous differential equations nonautonomous systems integration techniques, deriving finite forms of solutions

19 p3460 A70-38938

Integrodifferential equation derived for energy balance in laminar boundary layer of fluid flow, taking into account viscous energy dissipation, radiative energy transfer, etc

20 p3736 A70-39261

Upper atmospheric wind currents differential equations, obtaining physical data in terms of asymptotic expansion of Gaussian error functions

20 p3622 A70-39763

Nonlinear differential equations solutions in power series with indefinite coefficients, determining type of singular points

20 p3658 A70-39766

Perturbation theory for nonlinear systems of differential equations

20 p3658 A70-40104

Boundary value problems for linear ordinary differential equations with singularities, determining eigenvalues by computer oriented method

20 p3659 A70-40134

Multidimensional linear differential equations with periodic coefficients, proving analog of Floquet-Liapunov theorem

20 p3659 A70-40170

Elastomechanical system reciprocity relation principles using differential equations for bar with forces in two places

20 p3735 A70-40537

Symmetric two-step algorithms for differential equations

21 p3845 A70-40735

Circumstellar system crushing processes described by integrodifferential equations, deriving particle size distribution of fragments in interplanetary space

21 p3889 A70-41148

Control processes and optimization problems solutions by stochastic differential equations, discussing dynamic models and programming, linear filtering and optimal feedback

21 p3802 A70-41275

Recursive differential equation for moments of time-to-cycle slip in first and second order phase lock loops

21 p3802 A70-41350

Mechanical behavior differential equation representation in presence of finite deformations using state variables

21 p3937 A70-41434

Numerical procedure for second order nonlinear differential equations, discussing temperature distribution in seminfinitesimal solid homogeneous medium

21 p3950 A70-41449

Circular plates dynamic stability under variable periodic loads, using differential equations of vibrational motion for median surface

22 p4114 A70-42613

Quasi-linear higher order differential equations, examining periodic solutions existence and stability

22 p4062 A70-42698

Numerical solution of nonlinear master equation for diatomic molecule dissociation and recombination from uncoupled differential equations

22 p4062 A70-42746

Asymptotic method for nonlinear automatic control systems involving differential equations in Cauchy form with nonlinearities

22 p4001 A70-42834

Harmonic linearization for nonsearching self adaptive automatic control systems described by nonlinear differential equations

22 p4001 A70-42835

Cloud droplet growth rapid computation using number density mean value for integrating stochastic coalescence equation into differential equation

22 p4064 A70-42910

Nonlinear differential equations system under small perturbation, considering uniqueness for autonomous unperturbed system

22 p4062 A70-42969

Linear differential equation solution associated with FM signal generation, presenting analytical methods for FM and AM components

22 p4063 A70-43209

Differential rendezvous game theory with non-separated control inputs on right side of equations of motion applied to guidance problem

22 p4063 A70-43346

Two phase liquid one dimensional motion in variable cross section tube, deriving mass transfer, motion and phase interaction differential equations

22 p4012 A70-43721

Free jet stream effect on thin jet-flapped airfoil with fully developed wake, using linear theory

22 p3960 A70-43737

Whole operator with infinite defective numbers for Sturm-Liouville differential equation, describing spectral functions

23 p4210 A70-43977

Minimal deviation estimates for linear approximations by seminorms for space defined by differential equations

23 p4210 A70-44018

Shooting method for computing eigenvalues of Hermitian differential operators

23 p4210 A70-44020

Nonlinear differential equation systems overall stability, using qualitative methods

23 p4211 A70-44092

Differential equation systems with Jordan form block-triangular matrix, discussing homeomorphic mapping

23 p4211 A70-44093

Linear methods for approximate solutions of ordinary differential equations and Fredholm integral equations by polynomials

23 p4211 A70-44249

Ordinary differential equations boundary value problems solution based on continuation and reduction to Cauchy problems

23 p4211 A70-44309

Differential equations of motion for machine assembly, using Appel equations

23 p4200 A70-44319

Computer program for nonlinear differential equations related to nonlinear boundary value problems based on Newtonian iteration process difference analog of linearization method

23 p4212 A70-44338

Heat conductivity problem of body with variable density and specific thermal conductivity reduced to differential equation via power series

23 p4277 A70-44340

Weak compactness of set of measures in functional space corresponding to stochastic differential equations solutions for n-dimensional Euclidean space

23 p4212 A70-44341

Nonlinear properties of first order differential equations for axisymmetric velocity vector fields of ideal incompressible fluid, using nonlinear singular integral equation

23 p4181 A70-44343

Stability theory for approximate solutions and differential approximations for differential equations in Banach space

23 p4212 A70-44345

Restricted osculating two body orbit with time derivative of eccentric anomalies difference position as independent variable in perturbation differential equations

23 p4244 A70-44635

Sufficient condition for bounded solution of matrix Riccati differential equation

23 p4212 A70-44896

German monograph on Hamilton principle and Hermitian polynomials for solving linear and nonlinear differential equations via computer method

24 p4369 A70-45091

Runge-Kutta formulas with multiple nodes for differential equations solution

24 p4369 A70-45099

Fifth-order pseudo-Runge-Kutta methods for numerical solution of ordinary differential equations, determining optimal parameters

24 p4369 A70-45163

Continuous media theory, deriving first order constitutive differential equations for isotropic tensor functions

24 p4378 A70-45270

Virtual work equations steady state subharmonic solutions by Newton-Raphson method, developing generalized iterative procedure for nonlinear differential equations

24 p4423 A70-45577

Nonlinear second order differential equation periodic solutions, describing water column oscillation in U-tube

24 p4369 A70-46021

Krylov and Bogoliubov perturbation method extension to difference equations based on analogy between differential and difference equations

24 p4370 A70-46027

Differential equations with integrable coefficients, proposing asymptotic integration for second order system

24 p4370 A70-46031

Stochastic boundary value problem involving differential equation with random forcing function, proving monotone property of solution covariance variation

24 p4426 A70-46039

DIFFERENTIAL GEOMETRY

NT LIE GROUPS

NT RIEMANN MANIFOLD

NT SPINOR GROUPS

NT TENSOR ANALYSIS

Steady three dimensional motions using classical differential geometry, considering Navier-Stokes and helical flows

05 p0884 A70-17100

Bar produced by sliding thin walled cross section along three dimensional curve, determining twisted shell curvilinear middle plane and deformations by differential geometry

12 p2326 A70-27796

DIFFERENTIAL INTERFEROMETRY

Differentiating Fabry-Perot interferometer, obtaining emission spectrum derivatives respecting frequency in millimeter range

12 p2238 A70-28177

Time average hologram interferometry, calculating light beam modulation effects on fringe loci and localization

22 p4030 A70-42950

Low pressure supersonic wake measurement by differential interferometer in double pass polarized light [SMPT PREPRINT 95]

22 p4036 A70-43060

DIFFERENTIAL OPERATORS

U DIFFERENTIAL EQUATIONS

U OPERATORS [MATHEMATICS]

DIFFERENTIAL THERMAL ANALYSIS

Kinetic energy of atomic motions for vitreous and crystalline high polymers measured by differential scanning calorimetry and thermal analysis

02 p0253 A70-12522

Curve characteristics of differential thermalgram of high alumina allophane, observing endothermal peak for water loss

06 p1004 A70-17225

Composite propellant catalysts /copper chromate and chromite/ thermal decomposition using simultaneous thermogravimetric and differential thermal analysis

11 p2100 A70-26382

Differential thermal analyzer coupled to mass spectrometer for kinetics of reactions giving volatile products at high temperature, considering ablative materials

14 p2664 A70-30292

Premature exothermic decomposition suppression in propellant grade ammonium perchlorate, using differential thermal analysis

18 p3300 A70-36699

Simultaneous mass spectrometric differential thermal analysis of low pressure decompositions of nitrate salts of monomethylhydrazine and methylamine

20 p3688 A70-40475

High temperature combined differential thermal analysis and spectrophotometric cell for phase transformation monitoring of evaporated thin film and bulk phthalocyanine

21 p3827 A70-41459

Polyurethane adhesives differential thermal analysis, rebound resilience and tensile properties at cryogenic temperatures

21 p3844 A70-42141

Solid propellant ingredients and explosives differential thermal analyses, discussing thermogravimetry, isothermal or adiabatic constant volume decomposition, crystallographic phase changes, etc

21 p3865 A70-42263

Differential scanning calorimetry and thermogravimetric analysis combination for thermochemical kinetic measurements, matching analytical and experimental curves for data accuracy

23 p4196 A70-44429

Fe-Cr and Fe-Cr-V system miscibility gap, using differential thermal analysis and Mossbauer effect measurements 24 p4362 A70-46190

DIFFERENTIATION
Numerical differentiation of analytic functions involving Cauchy formula and error estimation 18 p3282 A70-36362

DIFFERENTIATORS
Electronic differentiator for physiological research, discussing electrical voltage derivatives reproduction, sensitivity, etc 19 p3371 A70-38219

DIFFRACTION
NT ELECTRON DIFFRACTION
NT FRESNEL DIFFRACTION
NT NEUTRON DIFFRACTION
NT PULSE DIFFRACTION
NT WAVE DIFFRACTION
NT X RAY DIFFRACTION
Diffraction limited resolution criteria for geoscene imagery 02 p0297 A70-11924
Multiparticle processes in acceleration energy region, comparing various models, noting role of diffraction 03 p0526 A70-13044
Electric field diffraction by infinitely long dielectric cylinder due to normally incident cylindrical wave, computing asymptotic value by geometric theory 07 p1235 A70-19684
Diffraction effects for bilinear screen with irregular apertures determined using correction weighting function for solution 09 p1639 A70-23668
Book on holography covering principles, applications, spatial and temporal coherence, interference and diffraction theory and optical filtering 16 p2908 A70-33266
Ray theory of diffraction from open-ended parallel plate waveguides, using Wiener-Hopf technique 23 p4219 A70-44404

DIFFRACTION GRATINGS
U GRATINGS [SPECTRA]
DIFFRACTION PATHS
Topside ray trajectories near upper hybrid resonance 04 p0650 A70-15119
Pulsars dispersions, setting upper limit to emission measure of dense plasma 05 p0921 A70-16984
Oblique measurements in HF on Kiruna-Stockholm path with two fixed frequency pulsed transmitters, comparing results to ionosonde measurements 07 p1232 A70-19175
Coherence degradation of collimated and focused Gaussian beams in turbulent atmosphere, using small perturbation method 13 p2453 A70-29824
Earth-space path attenuation measurements by 8-14 micrometer telescope appended to sun tracker 16 p2861 A70-32989

DIFFRACTION PATTERNS
NT RAINBOWS
Michelson interferometer with movable mirror using laser beam to measure linear by counting fringes number, discussing design features 01 p0085 A70-10032
Ultrasonic imaging of internal structure by Bragg diffraction, noting reflection and dark field extension and use for flaw detection and medical diagnostics 01 p0111 A70-10570
Martensite structure, discussing intensity anomalies in X ray diffraction pattern of intermetallic Ni-Nb 01 p0121 A70-10900
Optical spatial amplitude filtering techniques application to moire fringe patterns processing 01 p0058 A70-11060
Diffraction plates for classroom demonstrations of Fraunhofer patterns, Babinet principle and Rayleigh resolution by computer generation 01 p0093 A70-11292
Field pattern near paraboloid reflectors focus for low f/D ratios, considering vectorial character of electromagnetic field 02 p0268 A70-12474
Image formation with partially coherent light, summarizing basic properties and diffraction theory of image formation 02 p0315 A70-12831
Schwerd color drawings of amplitude and intensity distributions of Fraunhofer diffraction patterns, verifying accuracy with computer generated diffraction plate photographs 04 p0719 A70-15014
Simultaneous recording of near and far field diffraction patterns at several exposures for single laser pulse 04 p0701 A70-15022
Gabor holography producing interference phenomena, discussing far field fringes, circular fringes, diffuser, etc 05 p0849 A70-16529

Laser interferometer for earth strain study, measuring Michelson arm length changes by counting fringes in interference pattern 05 p0861 A70-16843
Electron transmission diffraction patterns of thin monocrystal films using Ar laser 06 p1080 A70-17444
Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns 06 p1063 A70-17643
Telescope resolution limit dependence on refractive index mean square fluctuation and effective aperture in turbulent medium 06 p1067 A70-18396
Body displacement and deformation measurement by fringe separation in holographic interferometry 07 p1280 A70-19143
Hologram interference fringes formation and location using grating model of diffusely reflecting surface 07 p1280 A70-19144
Diffraction pattern drift velocity increase with temporal frequency of Fourier components by dispersion analysis of interplanetary scintillation, noting solar wind structure 07 p1388 A70-20076
Vacuum UV spectrum interferometer with grazing incidence reflections between plane parallel mirrors to obtain coherent beams, discussing fringe patterns 07 p1286 A70-20081
Ionospheric irregularities-diffraction patterns relative drifts, verifying point source effect for radio waves reflected from E and sporadic E layers 07 p1236 A70-20162
Multibeam interferometer sensitivity restrictions due to diffraction effects on interference patterns near transparent inhomogeneities 08 p1493 A70-20540
Green and Cauchy deformation tensors determined from moire fringe pitch and angle measurements, deriving equations by specimen and master grid geometries indicial representation [ASME PAPER 69-APMW-21] 08 p1591 A70-21462
Low energy electron diffraction pattern from surface steps and facets resulting from recrystallization of Re single crystal 08 p1557 A70-21602
Electro-optical analogies application to sidelobe reduction of radar antenna illumination patterns and optics far field diffraction patterns in terrain image formation 09 p1631 A70-22009
LEED pattern and germanium surface conductivity during oxidation indicating electron states annihilation 09 p1738 A70-22215
Turbulent medium refractive index fluctuations effect on parameters of focused plane light wave, calculating diffraction patterns center of gravity 09 p1636 A70-23138
Compound semioaque thin films quality control for thickness uniformity by observing fringe patterns generated by optical data processing techniques 09 p1687 A70-23765
Diffraction pattern sampling for automatic pattern recognition in photographic imagery 09 p1689 A70-23802
Bragg diffraction imaging for sound fields visualization 10 p1893 A70-24170
TV camera with diffraction limited pinhole lens for visual simulation, solving depth of field and extending field of view without distortion 10 p1887 A70-24217
Image contrast and diffraction efficiency of dielectric hologram made from diffuse signal beam, bleaching photographic emulsions 11 p2048 A70-25359
Moire-holographic technique for deformed plane spatial displacements determination, describing diffraction patterns generation and stress analysis 11 p2140 A70-26487
Two dimensional remote sensing displays based on diffraction patterns generated by coherent light, discussing optical processing of photographs, drawings, maps, etc 12 p2229 A70-26944
Holographic method for reconstructing polarization of light emitted by photoelastic model, obtaining isochromatic and isoclinic fringe patterns 13 p2405 A70-28726
Fringe interpretation in stress-holo- interferometry, emphasizing isopachic-isochromatic interaction effects in photoelastic analysis [SESA PAPER 1642] 15 p2739 A70-32309
Fringe visibility and localization in double exposure holographic interferometry of diffusely reflecting flat objects 15 p2740 A70-32430
Rayleigh type holographic interferometer featuring production method for base pattern of variable fringe density 15 p2741 A70-32438
Wedge diffraction analyses of TE sub 10 mode slot radiation characteristics on circular and elliptical

cylinder, considering boundary value solutions existence 16 p2861 A70-32965
Holography techniques, discussing fringe pattern formation, various systems advantages and optical elements 17 p3084 A70-35002
Vibration measurement by hologram interferometry, discussing wave front reconstruction and fringe theory based on Rayleigh integral formulation of light propagation 17 p3086 A70-35017
Zero order Bessel function fringe shape measurement for holographic sinusoidal vibration fringes 17 p3087 A70-35020
Lunar occultation photoelectric measurement covering star angular diameters and diffraction patterns, ephemeris theory, astrometry close double star detection, etc 17 p3170 A70-35440
Shadow current method for asymptotic solution to two dimensional problem of electromagnetic wave far diffraction field on ideally conducting plane with infinite rectilinear slot 18 p3227 A70-36142
Plane electromagnetic waves diffraction by periodic structure of infinite system of parallel strips, reducing problem to solution of linear algebraic equations 18 p3227 A70-36287
Holographic registration of isochromatic and isopachous diffraction patterns of photoelastic birefringent objects, showing stress concentrations 19 p3422 A70-37649
Gas laser iterative alignment of Mach-Zehnder interferometer for monochromatic and white light fringes 19 p3424 A70-37880
Far field diffraction, radiation and gain of wide flare angle corrugated conical horns 19 p3389 A70-37970
High accuracy length measurement by fringe counting using laser interferometer 19 p3447 A70-38050
Photographic patterns from brittle coatings, grids, photoelasticity and moire, considering variability, association with other images and esthetic value 19 p3546 A70-38343
Interference wave functions for diffraction on cylinder and sphere, including noninterfering waves of geometric optics 19 p3380 A70-38398
Characteristic functions for frequency analysis of fringes obtained by time-average holographic interferometry of generalized time dependent optical phase function 20 p3628 A70-39133
Fresnel diffraction using He-Ne gas laser and opaque wire 21 p3834 A70-40549
Two dimensional and volume diffuse signal beam dielectric holograms, calculating and measuring diffraction efficiency and signal to noise ratio 21 p3835 A70-40717
Mach-Zehnder interferometer for plasma diagnostics measurements, discussing optical interference method, fringe shift determination and dispersion equations 21 p3856 A70-41150
Apollo 11 lunar rock plagioclases crystallography, obtaining single crystal X ray diffraction patterns by Buerger precession method 21 p3903 A70-41555
Equal thickness interference fringe networks behavior in singularities region of photoelasticity 21 p3941 A70-42260
Electromagnetic wave diffraction at multilayer wire grating, discussing computer program for diffraction field calculation 22 p3985 A70-42399
Tracking of point object in Fresnel zone from observation of amplitude-phase pattern in aperture plane 22 p4026 A70-42555
Elastic wave diffraction by rigid inclusion, calculating far field displacement and cross section by integral equation method 22 p4073 A70-42636
Ultrasonic transducer diffraction fields in highly anisotropic crystals obtained by plane waves angular spectrum 22 p4029 A70-42643
Time average hologram interferometry, calculating light beam modulation effects on fringe loci and localization 22 p4035 A70-43058
Holo-diagrams for predicting fringe patterns in hologram interferometry caused by translation motion and rotation 22 p4040 A70-43610

Cross slip between screw dislocations coplanar arrays in Ti-Al alloy, noting fringe pattern and bowing absence 24 p4359 A70-45248

Polymer crystal lattice defects and vacancies diffraction patterns observation and interpretation, using optical transformations 24 p4353 A70-45566

Holographic interference pattern interpretation, measuring object rotation 24 p4336 A70-45666

Al alloys structural analysis using electron diffraction pattern techniques 24 p4360 A70-45737

Partially space coherent diffraction by slit aperture with apodizing filter, calculating tolerance and apodization coefficients for correlation interval numbers 24 p4354 A70-45814

Multiple light beam interferences, using complex diagrams for reflection fringe visualization 24 p4381 A70-46096

Interference fringes on gas laser beam reflected by total reflection prism 24 p4356 A70-46272

DIFFRACTION PROPAGATION

Diffraction by single wire waveguide with obstacle, considering propagation phenomena of symmetrical modes 08 p1472 A70-21042

Diffraction radiation generator with CW operation in backward wave tube mode, discussing output power dependence on wavelength 18 p2321 A70-36410

Diffraction by star bounded by closed contour scalar field created by surrounding medium, reducing solution to boundary value problem via algorithm 19 p3470 A70-37431

Microwave aperture antenna in finite size ground plane, calculating radiation pattern distortion by superposition of boundary value and wedge diffraction solutions 20 p3599 A70-40314

DIFFRACTION TELESCOPES

U SPECTROSCOPIC TELESCOPES

DIFFRACTOMETERS

Nondestructive X ray stress measurement equipment for large specimen, using diffractometer focusing 01 p0085 A70-10022

DIFFUSE RADIATION

Diffuse illumination in holography indicating spread increase dependence on product of phase mean-square value and spatial frequency bandwidth 02 p0296 A70-11891

Speckle pattern in image plane of laser illuminated diffuse object, calculating pattern intensity and contrast 02 p0312 A70-12106

Double exposure holograms in diffuse radiation used to reconstruct in white light interferogram images localized in hologram plane 03 p0483 A70-13259

Spectral index for diffuse X ray sky background within specific band determined from rocket observations with wide angle telescope 03 p0479 A70-14223

Energy spectra of cosmic diffuse X ray component and distribution over northern sky, determining Crab Nebula and Cygnus spectral characteristics 05 p0901 A70-16305

Diffuse far UV radiation analysis in connection with stars and dust grains distribution and grains optical properties 05 p0903 A70-16571

Diffuse component of lunar radar echoes, using model with volume backscattering from within lunar regolith, noting rocks permittivity 05 p0816 A70-16826

Spatiotemporal correlation functions of random intensity field during diffuse scattering of coherent radiation by moving reflector 06 p1009 A70-17810

Haze model atmospheres scattering characteristics by computer simulation concerning optical contrast reduction by aerosols for direct and diffuse radiation [AIAA PAPER 70-194] 06 p1057 A70-18156

Inverse Compton collisions of relativistic electrons with universal black body photons for diffuse component of cosmic X rays 07 p1369 A70-20166

Diffuse radiation intensity determination in finite optical thickness atmosphere illuminated by parallel light beams 07 p1389 A70-20204

Monochromatic plane electromagnetic wave incident from vacuum on plane boundary of plasma half space, discussing specular reflection and diffuse scattering boundary conditions 08 p1553 A70-21611

Granularity spectrum of diffusing screen uniformly illuminated by normally incident coherent light, basing study on long and short distance visual observations 10 p1899 A70-24031

Diffuse light transmission from point sources over horizontal paths in lower atmosphere, discussing effect of range 10 p1912 A70-24424

Lunar radar echoes wavelength dependence in terms of backscattering behavior 10 p1841 A70-24644

Radiant heat transfer predictions between isothermal plates based on diffuse plus specular directional property model [AIAA PAPER 69-624] 11 p2149 A70-26157

Surface parameters influence on energy transfer to arc jet anode, discussing work function, accommodation coefficient and diffuse reflection coefficient of electrons [AIAA PAPER 69-107] 12 p2281 A70-27809

Diffuse galactic radiation and absorbing clouds luminescence illuminated by integral stellar radiation in Milky Way 12 p2307 A70-27866

Diffuse cosmic X and gamma ray background radiation isotropic component 12 p2295 A70-27887

Compton electron scattering generated galactic gamma ray flux effects on diffuse IR 13 p2476 A70-28630

Cosmic rays and cosmic X rays, considering galactic and extragalactic sources, diffuse background, detection devices, etc 13 p2477 A70-29160

Solar and terrestrial radiation measurements and computations in meteorology, considering diffuse radiation and radiative transfer in atmosphere 13 p2410 A70-29661

Angular distribution of diffusely reflected solar rays over spherical shell planetary atmosphere, determining halo brightness 14 p2632 A70-31222

Diffusely transmitted and reflected radiation fields for planetary isotropically scattering atmosphere bounded by Lambert law reflector 14 p2617 A70-31305

Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory 15 p2802 A70-32493

Solar stray light, determining spread function, limb profile and aureole at various wavelengths 15 p2795 A70-32625

Diffuse specular rough surface measure for imperfect reflections in thermal radiation transfer through slot passages [AIAA PAPER 70-860] 16 p2999 A70-33905

Diffuse-specular models for radiant heat interchange prediction for isothermal-adiabatic surface enclosure tested for steel and gold 16 p3003 A70-34197

Shadow moire method for comparing diffusely reflecting component against holographically recorded master shape, noting turbine blade measurement 17 p3088 A70-35025

IR radiation diffuse reflection, transmission and emission in water clouds 18 p3244 A70-35950

Interstellar hot low density intercloud medium in H I region, estimating diffuse emission in forbidden lines O I at 6300 Å and N I at 5200 Å 18 p3310 A70-37020

Diffuse cosmic X rays produced by Compton scattering of far IR radiation on cosmic ray electrons 19 p3505 A70-38113

Diffuse cosmic X and gamma ray spectrum analysis, considering implications for Compton scattering models in intergalactic space 20 p3695 A70-39049

Integrated Bragg X ray scattering intensities for monatomic crystalline lattices, considering thermal diffuse component contribution 20 p3686 A70-39193

Diffuse cosmic X rays, discussing energy spectrum and contribution of galactic integration 21 p3875 A70-40686

Diffuse background cosmic X rays in energy range 20-120 keV from balloon observations 21 p3876 A70-40689

Low energy diffuse cosmic X radiation flux comparison with power law spectrum, observing asymmetry with respect to galactic latitude 21 p3876 A70-40692

Diffuse background of 2-20 keV X rays over Scorpius to North Galactic Pole sky band by rocket measurements 21 p3876 A70-40693

Diffuse X rays from nonthermal intergalactic bremsstrahlung, discussing cosmic ray injection models 21 p3878 A70-40705

Lunar surface specific effective radio signal scattering area measured by Luna 9 and 13, describing signal fluctuations 21 p3884 A70-40838

Diffuse X ray background attributed to X ray emission during supernova early phases 22 p4095 A70-42998

Planetary atmospheric light diffuse reflection and transmission, applying anisotropic scattering theory 23 p4240 A70-43915

Delta function approximation in diffuse transmission and reflection of light for phase function with sharp forward peak, using scattering compensation 23 p4214 A70-44034

Scattered photon effects on cosmic diffuse X ray spectrum at balloon altitude, noting overcorrection for absorption of primary X rays 23 p4237 A70-44794

Planetary atmosphere diffuse radiative transfer reflection and transmission, deriving reciprocity relations from integrodifferential equations 24 p4409 A70-45756

Discrete source interpretation of isotropic component of diffuse gamma radiation in Milky Way galaxy 24 p4398 A70-46166

DIFFUSERS

Wind tunnel tests of isentropic inlet diffusers, describing two dimensional model, test apparatus and modification and results 06 p0963 A70-17235

Vortex refrigerators characteristics, examining configurations with cylindrical and conical hot ends with and without diffuser 06 p0988 A70-17855

Straight-walled two dimensional diffusers with incompressible steady flow, noting effects of inlet blockage and aspect ratio on performance 08 p1433 A70-21322

Pressure waves of varying amplitude effect on flow through turbomachine blade passages, discussing interaction with curved diffusers geometry 09 p1608 A70-23743

Pressure recovery and energy loss efficiencies of two dimensional diffusers with suction at entrance 11 p1977 A70-26418

Rotor wakes and diffuser blades interactions visualization using hydraulic setup 14 p2528 A70-30297

Image coherence of object by laser illumination through moving diffuser related to diffuser autocorrelation 14 p2588 A70-31208

Mass flow rate and geometry effects on pressure recovery of conical diffusers with annular secondary injection at inlet [ASME PAPER 70-FE-18] 16 p2835 A70-33631

Shrouded propeller diffusers, considering diffusion effects on propulsion performance 16 p2970 A70-33754

Collisionless monatomic gas flow density and velocity distribution on axis of diffusely reflecting circular cone at zero attack angle with free stream 16 p2839 A70-34273

Plane diffuser grid profiles for subcritical velocities of oncoming flow, using wind tunnel test data 18 p3205 A70-36129

Shock tube with diffuser in low shock wave Mach number range, considering gas flow models to relate wave intensity to initial conditions in chambers 20 p3606 A70-39820

Conical diffuser-tailpipe system performance, discussing cone angle, area ratio, Reynolds number and velocity distribution effects on pressure recovery 20 p3559 A70-40082

Total reflectance of composite light diffuser with nonuniform absorption by two beam model, noting application to photochemistry 21 p3829 A70-41936

SNR of moving diffuser illuminated by laser light, considering image plane and Fresnel field observations 24 p4354 A70-45670

DIFFUSION

- NT AMBIPOLAR DIFFUSION
- NT ATMOSPHERIC DIFFUSION
- NT ELECTRON DIFFUSION
- NT GASEOUS DIFFUSION
- NT IONIC DIFFUSION
- NT MAGNETIC DIFFUSION
- NT MOLECULAR DIFFUSION
- NT PARTICLE DIFFUSION

Tantalum base alloy T-111 creep tests in vacuum at elevated temperature suggesting diffusion controlled microcreep mechanism 01 p0120 A70-10738

Constant-inflow and constant-pressure perfusion effect on vascular responses of dog 02 p0232 A70-11716

Perfusion pressure effect on myocardial oxygen consumption and coronary flow in stable nonworking rat heart 07 p1202 A70-18865

Nonlinear steady state diffusion elliptic boundary value solutions exemplifying enzyme kinetics and radiation cooling 08 p1596 A70-20580

Collection of papers on diffusion processes in metals covering welded joints layers, radiation effects, radioactivity, nickel grain growth

11 p2067 A70-26593
Diffusion processes rate changes in metals and alloys resulting from radioactive emission, noting role in stress rupture strength mechanisms

11 p2068 A70-26595
Shock slip analysis of merged layer stagnation point air ionization, clarifying effects of reaction rates, species diffusion, etc

13 p2343 A70-29987
Molecular Markov processes application to vibrational relaxation and dissociation, small system kinetics, nucleation and droplet growth, thermalization kinetics and diffusion processes

14 p2619 A70-30615
Fluid quantum corrections to viscosity, thermal conductivity and diffusion, expanding Wigner operator in Planck constant

14 p2665 A70-30655
Organic solutes diffusion in stagnant blood plasma and red cell suspensions, using models from transport theory

15 p2686 A70-32847
Weld brittleness during laser beam welding of Ni-Cu, Ni-Ti and Cu-Ti due to diffusion processes

16 p2916 A70-33052
Chemical and structural microinhomogeneity, diffusion and mechanical properties of Ti alloys in connection with phase transformation characteristics

17 p3112 A70-34354
Density diffusion and buoyancy effects on horizontal boundary layers in stratified flow

18 p3239 A70-36193
Perfusion peristaltic pump for determining smooth muscle reaction in vascular bed, discussing applications to physiological and pharmacological investigations

19 p3372 A70-38958
Diffusion processes effect on stress state, allowing for physicochemical coupling between deformed solid bodies based on continuous media theory

20 p3727 A70-39887
Diffusion effect on carbon dioxide Gaussian laser beam amplification, measuring gain saturation via pin-hole method

22 p4051 A70-43335
Bcc Fe base alloys volume diffusion measurements, determining activation energy and frequency factor dependence on solute content

24 p4357 A70-45232
Round pulsed jet diffusion rate from velocity measurements, considering Strouhal number and pulse amplitude

24 p4327 A70-46205

DIFFUSION BONDING
U DIFFUSION WELDING
DIFFUSION COEFFICIENT

Diffusion coefficients for laminar multicomponent dissociating boundary layer at surfaces of thermally decomposing protective coatings

01 p0042 A70-11583
Mutual diffusion coefficient of hydrogen atoms and molecules in upper atmospheres of major planets calculated as function of temperature, using Chapman-Enskog theory

02 p0342 A70-11817
Static atmosphere model above 120 km, assuming oxygen atoms and molecules and nitrogen molecules presence to determine diffusion velocity and recombination coefficient

02 p0327 A70-12385
Temperature dependence of diffusion coefficient for carbon dioxide filled rigid polyurethane foam, using Fick law

02 p0321 A70-12524
Gas diffusion coefficients for He-N and nitrogen-carbon dioxide systems in diffusion cell utilizing porous stainless steel barrier

04 p0780 A70-14710
Hydrogen diffusion in pure Ti and beta Ti alloy VT15, determining diffusion coefficient for various temperatures

04 p0707 A70-15190
Diffusion rates in refractory metal alloys for thermionic emitters as function of time and temperature [GA-9495]

05 p0892 A70-16075
Charge carriers recombination and diffusion coefficients for confined gas discharge plasma obtained from data on radial particle distribution profile

05 p0888 A70-16330
Meteor trail drift characteristics from telescopic observations, determining velocity and diffusion coefficient

05 p0920 A70-16975
Thermal conductivity and diffusion-thermal coefficients analysis for nonequilibrium and highly ionized plasmas based on particle velocities

06 p1120 A70-17698
Radioactive sodium and potassium diffusion in single crystal and polycrystalline Mo and Nb at various temperatures, calculating activation energies and coefficients

06 p1089 A70-17745

Atmospheric density determined by using diffusion coefficients obtained from artificial luminous clouds observations

06 p1096 A70-17785
Hydrogen-oxygen difluoride flame burning velocity, diffusion coefficient and light output [WSC1 PAPER 69-49]

06 p1178 A70-17982
Solid electrolyte cells discharge characteristics and open-circuit voltage, evaluating diffusion coefficient of Ag from time dependent behavior of I-V relationship

07 p1196 A70-19386
Kirkendall effect in Fe-Ni and Fe-Co systems using measurement of radiotracer and intrinsic diffusion coefficients

07 p1314 A70-20015
Diffusion coefficient of charged particles in HF stabilization of current-convective instability measured in Ge semiconductor electron hole plasma

07 p1355 A70-20365
Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar observations, determining turbulent diffusion coefficient dependence on height

08 p1563 A70-20546
Binary and ternary systems phase diagrams construction by diffusion layer method and X ray analysis, studying concentration dependence of diffusion coefficient

09 p1703 A70-22564
Oxygen diffusion time into nitrogen in dichotomously branched human lung model calculated by finite difference technique, discussing alveolar plateau

10 p1809 A70-24003
Electron diffusion in trap with magnetic mirrors under pulsed field perturbations, determining coefficients by numerical integration of drift equation

10 p1931 A70-24311
Helium ions diffusion perpendicular to magnetic field in He gas, measuring coefficients as function of field strength and for various gas pressures

10 p1925 A70-25108
Electrons thermodiffusion and energy transport coefficients in noble gases at mean reduced electric field intensities, obtaining distribution functions

11 p2089 A70-25868
Wind velocity and direction and diffusion coefficients measurements by artificial luminous clouds, injecting appropriate reagents from rockets

11 p2075 A70-25918
Indicator dispersion model for cardio-pulmonary system based on continuity past sampling site, observing diffusion coefficient nonlinear increase with blood speed

12 p2174 A70-27019
Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers

12 p2210 A70-27322
Oxygen and hydrogen diffusion coefficients in aqueous potassium hydroxide electrolyte solutions at various temperatures and concentrations

12 p2181 A70-27575
Diffusion coefficients measurements in velocity space from ion-ion collisions and ion wave microturbulence, supporting theoretical calculations and diffusion equations in plasma

12 p2279 A70-27777
Turbulent diffusion coefficients and time dependent velocity pulsations in air flow, considering relation between Eulerian and Lagrangian turbulence characteristics

12 p2213 A70-28235
Thermal diffusion effects on F 2 region ion densities, deriving diffusion coefficients for partially ionized atomic oxygen plasma

13 p2398 A70-29232
Self diffusion coefficient for gaseous ammonia at specific temperature range, applying polar gases theory

13 p2453 A70-29800
Atmospheric turbulence parameters in meteor zone determined from simultaneous photographic and radar observations, determining turbulent diffusion coefficient dependence on height

15 p2796 A70-31455
Propylene carbonate, dimethyl formamide, acetonitrile and methyl formate diffusion coefficients measurement for estimating nonaqueous Li batteries transport limitations

15 p2766 A70-32528
Diffusion coefficient of dissolved oxygen in blood proteins aqueous solutions

15 p2686 A70-32848
Heterodiffusion coefficients and activation energy for Cu, Ag and Au impurities in Al, using gamma spectrometry and X ray emission microanalysis

16 p2930 A70-33081
Unequal diffusion film coefficient formulation based on transfer coefficient approach for ablative material coupled multicomponent boundary layer problems

16 p2998 A70-33879

Diffusion during high temperature exposure of protective coatings on Mo, noting compact layers and carbide forming elements effect on thermal stability

17 p3125 A70-35404
Fe diffusion in equiatomic Ni-Co alloy, using thin radioactive deposit method with tagged element Fe 59

18 p3277 A70-36440
Finite size particle physics for plasma computerized simulation, considering longitudinal oscillations, scattering cross sections, diffusion coefficients, etc

18 p3296 A70-36791
Alloying elements effect on diffusion coefficient of hydrogen in low-alloyed alpha titanium

19 p3449 A70-37274
Free atmosphere turbulent diffusion coefficient determination, releasing dipole reflectors from helicopter for radio echo observation

19 p3461 A70-37423
Nitrogen diffusion coefficient in Mo and W using degassing method

19 p3452 A70-37828
Alkali metal vapors diffusion coefficients in inert gases, determining atomic interaction parameters

19 p3473 A70-38190
Binary Nb vapor systems mutual diffusion coefficients concentration and temperature dependences, discussing interatomic bonds and melting point of alloys

19 p3454 A70-38715
Argon hydrostatic pressure effect on self diffusion coefficients and activation energy of Al and Be single crystals

20 p3644 A70-38961
Primary cosmic ray intensity variation during solar activity half cycle, expressing diffusion coefficient as function of sunspot group number

20 p3696 A70-39279
Solar cosmic rays emission spectrum for 23 February 1956 flare, taking into account nucleon diffusion coefficient dependence on particle rigidity and distance to sun

20 p3697 A70-39287
Turbulent heat diffusion coefficients in air and water tube flow calculated from statistical characteristics, extending method to boundary layers

21 p3811 A70-42063
Oxygen diffusion coefficient of alpha-Ti from oxidation of saturated and unsaturated beta phase in 932-1142 C range

22 p4053 A70-42731
Minor ion diffusion coefficients in F 2 region, noting Coulomb collisions role in ion density sensitivity to ionospheric fluxes

22 p4019 A70-43109
Interdiffusion coefficients for hydrogen-carbon dioxide and oxygen-carbon dioxide systems at low temperatures

22 p4076 A70-43393
Carbon dioxide molecular vibration excitation by Q switched carbon dioxide laser, obtaining accommodation and diffusion coefficients by relaxation measurements

24 p4351 A70-45369
Density correlation measurements for diffusion coefficient in magnetized He plasma

24 p4386 A70-45614

DIFFUSION EFFECT
U DIFFUSION
DIFFUSION FLAMES

Diffusion flame structure in boundary layer with fuel injection from wall, analyzing expansions with single step reversible chemical kinetics, including nonequilibrium case

01 p0214 A70-10334
Aerodynamic gas flame theory and computations, discussing diffusion burning, turbulent flow burning rate, Reynolds number effects, etc

01 p0217 A70-11006
Unmixed gases diffusion burning calculations, discussing turbulent flame burning aerodynamics in jet flows

01 p0217 A70-11007
Weightlessness effects on butyl alcohol diffusion flames, studying flame damping mechanism

01 p0217 A70-11012
Liquid sodium droplets spontaneous ignition and combustion in controlled oxidizing atmosphere, discussing vapor phase diffusion flame, burning rates and evaporation constants

02 p0396 A70-12005
Laminar diffusion flame spread against air stream over solid or liquid fuel bed, noting influence of stoichiometric and thermal properties and data inconsistency

02 p0396 A70-12016
Chemiluminescence in alkali metals and halogenated methanes diffusion flames, studying diatomic Cs spectral bands

02 p0250 A70-12018
Laminar counterflow diffusion flame chemical structure and blow-off mechanism established in forward stagnation region of porous cylinder at atmospheric pressure

02 p0398 A70-12032

Volumetric reaction rates and mass transport coefficients as function of position for ducted two dimensional turbulent hydrogen-air diffusion flame
02 p0398 A70-12036

Turbulence intensity, light intensity fluctuations and frequency optical measurement in diffusion flames of city gas with air, deriving turbulence spectral functions
02 p0398 A70-12038

Noise generation in turbulent premixed flames, turbulent diffusion flames and liquid-spray combustion of hydrocarbon fuels, using optical method
02 p0399 A70-12040

Supersonic diffusion flames produced by subsonic and supersonic free jet injection of hydrogen into high enthalpy airstream
02 p0399 A70-12042

Structure of hydrogen-oxygen diffusion flame in equilibrium using iterative solution
02 p0352 A70-12796

Boundary layer equations describing flow field in turbulent swirling jet diffusion flame solved in von Mises plane
03 p0603 A70-12911

Ignition and extinction of diffusion flames predicted from studying forced convection in boundary layers [WSCI PAPER 69-36]
06 p1178 A70-17976

Laminar flow mixing stability and diffusion flame flow field measurements revealing role of Tollmien-Schlichting waves in enclosed flames vibrations [WSCI PAPER 69-46]
06 p1179 A70-17985

HF periodic velocity oscillations effect on axisymmetric wake diffusion flames
06 p1182 A70-18179

Ignition and extinction in opposed jet diffusion flame for flow of compressible fluid with competitive/chain reactions
07 p1422 A70-19578

Granular diffusion flame theory application to low pressure burning of composite solid AP propellants
07 p1361 A70-19914

Mathematical model for calculating radiative heat transfer from turbulent diffusion buoyant flame and predicting liquid fuel burning rate
07 p1425 A70-20008

Organic compounds chemical reactions during burning in laminar diffusive flames, describing technique for pyrolysis and combustion products sampling
09 p1787 A70-22107

Turbulent flames bluff-body stabilization model, measuring recirculation zone concentrations and temperatures for methane and propane-air mixtures
10 p1967 A70-24092

Temperature distribution in opposed jet diffusion flames, discussing mass fluxes and fuel and oxygen concentrations effect
11 p2151 A70-26385

Hydrogen-air turbulent diffusion flame structure at differing air and hydrogen velocities
11 p2151 A70-26387

Temperature estimation of micro hydrogen-air diffusion flame from hydrogen content of unburned gas mixture
14 p2666 A70-31095

Diffusion flame development in homologous turbulent shear flow, investigating flame structure and chemical reaction by statistical theory
16 p2997 A70-33499

Velocity fluctuations in temperature gradient turbulent jets in diffusion flames, using hot wire in cooled pitot tube
17 p3096 A70-35749

Ethyl alcohol fuel diffusion flame, examining thermal decomposition pyrolysis and free electron concentration distribution
18 p3345 A70-36113

Ammonium perchlorate composite solid propellant pressure vs burning rate at various temperatures, discussing granular diffusion flame theory
20 p3694 A70-40266

Extinction condition for diffusion flame formed from opposing coaxial gas jets
20 p3739 A70-40399

Ducted laminar and turbulent diffusion flames, examining electric fields effect on heat transfer, geometry and velocity field
20 p3739 A70-40471

Gravitational effects on laminar gas jet diffusion flame stability, including zero gravity environment
21 p3949 A70-41316

Book on stationary flame structure, radiation and temperature covering flow visualization, burning velocity, propagation, ionization, etc
22 p4121 A70-42325

Laminar hexane diffusion flame, investigating distribution of final and intermediate combustion products
22 p4123 A70-42522

German monograph on soot formation and separation in turbulent diffusion flame in power plant combustion chamber, noting pyrolysis role
24 p4428 A70-45087

DIFFUSION THEORY

Complex formation mechanisms and effects on impurity diffusion profiles in semiconductors
01 p0155 A70-10180

Diffusion phenomenon in cross linkage theory of biological aging formulated as model in differential equation form, obtaining solution and applications
01 p0208 A70-11374

One dimensional diffusion equation serial solution implementation by hybrid computation, using equivalence between differential and integral equations
02 p0324 A70-12259

Impurity diffusion in Ni using diffusion theory, considering activation energies for Mo and W
02 p0317 A70-12396

Diffusion processes governed by stochastic equations
06 p1093 A70-17581

Temperature fields creation in infinite or finite regions by moving surfaces with given time dependence of temperature studied by subjecting diffusion equation to transformations
08 p1597 A70-20959

Atoms diffusion mobility enhancement in metal systems during irradiation suggested due to change in electrons energy states
09 p1707 A70-23192

Integral theorems on vorticity transport derived by Carstou method, suggesting need for redefining Truesdell concepts of convection and diffusion
11 p2037 A70-26175

Asymptotics of linear diffusion processes altered by weak nonlinear effects, discussing deterministic and statistical initial value problems
11 p2074 A70-26686

Analytic expressions for concentration distribution functions in inhomogeneous solids within intermediate stages of homogenization process
12 p2253 A70-27282

Grain boundary grooves growth kinetics in pure CoO at high temperatures, determining diffusion species and mechanisms
12 p2255 A70-27603

Diffusion processes on multidimensional cylindrical phase space for studying stochastic processes for physical systems with angular measurements, developing model for satellite under torque
12 p2273 A70-28067

Diffusion loss model for cosmic ray electron propagation in galaxy, considering direct and radio observations
14 p2631 A70-30538

Thermodynamic effects and transport phenomena in discontinuous system of gas filled containers connected by membrane, deriving entropy production and diffusion flux in membrane
17 p3197 A70-35531

Unsteady state Newtonian liquid diffusion in laminar flow in circular tube, using mathematical model
17 p3072 A70-35544

Fcc metals surface self diffusion temperature dependence, using model based on complex defects contribution to diffusion flux at high temperatures
19 p3483 A70-37545

Soviet book on diffusion kinetics in stationary media covering membranes, combustion, flame propagation, hydrodynamics, exothermal reactions, thermodynamics, heat transfer, thermal explosion, insulation, etc
20 p3673 A70-39800

Heavy elements diffusive separation as explanation of metallic and magnetic A stars abundance anomalies at outer convective envelope bases
24 p4410 A70-45775

DIFFUSION WELDING

Diffusion welding of dissimilar metals with or without intermediate layers, assessing joint strength factors
03 p0498 A70-14071

Roll diffusion bonding applicability to Ti, Ni and Fe alloys, discussing fabrication temperatures and tooling [AIME PAPER F-69-3]
07 p1290 A70-18813

Stainless steel wire-reinforced Al alloy diffusion bonded scarf joints, considering aluminum oxide coating and bonding times effects
08 p1509 A70-21906

Metal matrix fiber reinforced materials bonding, discussing brazing and fusion and diffusion welding [ASM PAPER W9-23.2]
09 p1690 A70-22557

Diffusion and electron beam welding combined with forging for cost reduction and production enhancement of titanium structural components
12 p2241 A70-27087

Diffusion bonding processes for Ti aerospace structural elements, describing electric blanket, roll and press bondings
12 p2242 A70-27089

Solid state diffusion bonding techniques for aerospace Ti structural components
12 p2242 A70-27093

HF resistance welding and roll diffusion bonding fabrication of thin complex structures from Ti alloys in aerospace industry
13 p2418 A70-28828

Solid state welding processes for space, nuclear and deep submergence technologies, discussing diffusion bonding of Al and stainless steels
13 p2419 A70-29117

Low pressure diffusion welding for joining Ti-6Al-4V alloy in Ar atmosphere under compressive loading, evaluating performance
14 p2591 A70-30933

Optimum diffusion welding temperature for Ti-6Al-4V alloy determined from tensile and creep tests
14 p2591 A70-30934

Solid state diffusion bonding applied to rocket engine injectors manufacture [AIAA PAPER 70-639]
16 p2968 A70-33597

Nondestructive testing of diffusion bonded metals for quality assurance
19 p3437 A70-38423

Optimum conditions and methods for vacuum diffusion welding of heat resistant alloys, removing thermodynamically stable surface oxide films by gaseous reaction products
20 p3636 A70-39197

DIFFUSIVITY

Velocity and density profiles obtained from mass diffusivity time measurements in axisymmetric turbulent air pipe flow over specific Reynolds number range
02 p0295 A70-11853

Voltage-step method to measure diffusivity of structured region in polar liquid electrolyte solutions, considering iodine near Pt microelectrodes in aliphatic alcohols
03 p0441 A70-14044

Diffusivities of argon, krypton and xenon determined in olive oil by curve-fitting analysis of sorption curves
03 p0429 A70-14159

Carbon in austenite derived for composition dependence of diffusivity using first order mixing statistics
12 p2256 A70-27611

Turbulent chemical reactions invariance preservation for zero diffusivity
14 p2546 A70-31044

Gas mass diffusivity measurements in plasma and reaction velocity constant in human and dog blood
15 p2692 A70-32311

DIFFUSION

NT CALCIUM FLUORIDES
Hydrogen-oxygen difluoride flame burning velocity, diffusion coefficient and light output [WSCI PAPER 69-49]
06 p1178 A70-17982

NT POLYTETRAFLUOROETHYLENE
Dichlorodifluoromethane ionization and attachment coefficients for wide pressure range
22 p4076 A70-42373

DIGESTING

Appetitive behavior of rats following cessation of hypothalamic stimulation, observing eating and drinking inhibition
01 p0027 A70-11275

Eating and digestion effects on arterial pressure and mesenteric and aortic blood flows in intact unanesthetized dogs
17 p3024 A70-34848

DIGESTIVE SYSTEM

NT ESOPHAGUS
NT GASTROINTESTINAL SYSTEM
NT INTESTINES
NT MOUTH
NT RECTUM
NT STOMACH
NT TONGUE

DIGITAL COMMAND SYSTEMS

MOSFET uses in spacecraft electronic subsystems, describing digital control unit and typical logic circuitry
03 p0456 A70-13534

Digital signals conversion into command and control TV displays in multiconsole systems
13 p2411 A70-29789

DIGITAL COMMUNICATION

U PULSE COMMUNICATION
DIGITAL COMPUTERS
NT IBM 360 COMPUTER
NT SEQUENTIAL COMPUTERS

Aerospace digital computer design development, proposing data processing system with improved flexibility by making subassemblies more independent with multiplexed interface
01 p0047 A70-10305

Table lookup/interpolation function generation for fixed point digital computations, illustrating sine-cosine generator
01 p0047 A70-10459

Digital computer for data recording in stress-strain curves and data points for mechanical tests
01 p0058 A70-11062

Digital computer display techniques relationship with man in modern environment, considering human

- engineering and educational problems and future impact on intellectual qualities
01 p0221 A70-11281
Integrated digital circuits for office type desk calculators based on machine concept
01 p0052 A70-11287
Analog, analog/digital, digital and hybrid computer simulation current advances, emphasizing physiological problems and optimum solution
02 p0264 A70-11687
Trainers and simulators based on digital computers, eliminating system sensitivity to ambient conditions, power fluctuations, circuit imperfections and digital to analog conversion
02 p0274 A70-11841
Digital computers in air traffic control, discussing reliability, automated area choice, controller tasks, planning, etc
02 p0331 A70-11960
Associative processor with content addressability and simultaneous arithmetic capability to circumvent speed restriction, comparing performance and cost with conventional digital computer
02 p0265 A70-12186
Hardware-software integrated time sharing computer system for testing transmission control units and associated terminals on line
02 p0275 A70-12189
Digital computer program for physiological measurements, outlining interpolation of mathematical functions describing signals time variations
03 p0436 A70-13900
Digital computers for calculating coefficients of electronic circuit functions polynomials, developing algorithm
04 p0659 A70-15205
Large wall display system for USAF command and control with central computer and seven color projector, discussing hardware and operational features
05 p0828 A70-16193
Real time computer control system queueing model to optimize preemptible and nonpreemptible job priority assignment
05 p0817 A70-16414
Special purpose computer organized as time-shared digital filter for real time applications with adaptable coefficients, programming and multiplexing scheme
05 p0818 A70-16415
Digital computer interface for ELDO launcher inertial guidance system linking with platform, autopilots, telemetry equipment and rocket subsequencers
05 p0818 A70-16572
Book on digital computer methods in engineering covering numerical and programming methods, algebraic and differential equations solutions, time-frequency domain analysis, etc
05 p0877 A70-16771
Digital computers structural and operational address format dependence on number of storage readouts expressible with aid of linear function
05 p0818 A70-17004
Worldwide Apollo data transmission network emphasizing computer operations for message collection and distribution, command and telemetry processing, etc
06 p1005 A70-17310
Computer operated digital system for controlling acoustic test environment and dynamic test data acquisition
06 p1030 A70-18432
Space rendezvous navigation and guidance based on optical sightings with hand-held sextant entered into and processed by small digital computer
07 p1331 A70-20061
Digital computer applications to structural analysis, discussing interactive graphics and engineering design
07 p1239 A70-20360
Aerospace digital computers automatic checkout, considering computers functional and mechanical properties and test equipment configuration and operation
08 p1469 A70-20653
Computers impact on engineering science and design, detailing digital computers use in aerodynamics, structures and aeroelasticity
08 p1466 A70-21030
Digital differential analyzers improved speed and accuracy by extended resolution on Euler integration for differential equations solution programming
08 p1467 A70-21756
Digital computer impact on aerospace sciences and technologies in terms of computerized design, interactive graphics, flight simulation, Apollo systems checkout, etc
09 p1642 A70-23277
Computer-generated holography involving three dimensional object perspective projections computation for incremental rotations
09 p1683 A70-23529
Signal converter for centimeter band-DC voltage transformation, noting applications to microwave power measurement by digital computers
09 p1650 A70-23629
Digital and analog computers applicability to graphic arts noting lack of aesthetic theories
10 p1845 A70-24235
TATS Master tactical communication satellite network controller with modems and digital computer for semiautomatic control over terminals
[AIAA PAPER 70-412] 11 p2002 A70-25491
Direct view storage tube /DVST/ as graphical display unit for small digital computer installation
12 p2232 A70-27374
Terminal automation system /ARTS/ digital computerized beacon tracking for future ATC facilities, noting add-on packages to increase system reliability
[SAE PAPER 700282] 12 p2206 A70-27441
Automatic computation at SNECMA for turbomachines R and D, emphasizing digital computer for scientific calculation and analog simulator for engine regulation
12 p2193 A70-28073
Digital correlator LSI circuits design, layout and mask considerations, diffusion, metallization and dielectric deposition
13 p2378 A70-29551
Digital computer controlled test system suitable for verifying response to single input pattern containing time dependent functions
13 p2374 A70-29684
Digital computers in automatic test equipment, describing required control tasks
13 p2375 A70-29690
Time shared computer system providing real time service to multiple laboratory instrumentation, discussing high speed channel, computer control and data abstracting techniques
13 p2375 A70-29830
Biresidue error-correcting codes for digital computers involving use of residue check circuitry working with arithmetic unit
13 p2375 A70-29938
Berkeley array processor /special purpose digital computer/ for correlation, convolution, recursive filtering, matrix multiplication, etc
13 p2376 A70-29941
Computer-controlled single-server queueing system with constant access cycle and general service times, calculating mean size and waiting time at statistical equilibrium
14 p2553 A70-30518
Digital computers for interplanetary spacecraft, comparing centralized and decentralized approaches for implementing onboard functions
[AIAA PAPER 68-840] 14 p2554 A70-30757
Spacecraft onboard computer for prelaunch targeting constants verification through checksum equation and error detection scheme, using generated number sequence
[AIAA PAPER 69-946] 14 p2599 A70-30769
Digital computers in aircraft, discussing automatic control systems, components and advantages over analog systems
15 p2705 A70-32299
Speed convergence of hybrid vs digital computer synthesis of optimal boost vehicle controller, considering fuel consumption and pitch dynamics
16 p2981 A70-33442
Fast Fourier digital processor for real time filtering of radar signals, discussing applications as Fourier transform system
16 p2870 A70-33738
Military aircraft avionics central digital computers, discussing memory capacity, computational speed requirements, cost and tradeoffs
17 p3049 A70-34673
Digital computer technology impact on advanced aircraft design, discussing airborne computers, distributed and lumped computer systems, outer loop control, engine control and system integrity
17 p3049 A70-34993
Nuclear rocket engine testing, monitoring reactor and facility performance with real time digital computer
17 p3135 A70-35212
Digital computer controlled positioning of telemetry antennas for tracking spacecraft
17 p3062 A70-35508
Digital computer six degree of freedom wind tunnel separation simulator for air launched missile trajectory analysis
17 p3063 A70-35509
High speed digital computer input device for reading data from magnetic tape, discussing design and operation principles
18 p3230 A70-36095
Hypotheses concerning optimal methods of solving mathematical physics problems, choosing algorithms employable in digital computers
18 p3291 A70-36284
Computerized air combat simulation with comparison of analog and digital approaches, noting Air to Air Combat Fort Worth
18 p3230 A70-36453
Brain-like computer with learning rather than programmable capability, discussing pattern recognition and task performance
18 p3230 A70-36775
Aero gas turbine engines digital computer control, discussing special properties, design and safety problems
[ASME PAPER 70-GT-40] 18 p3304 A70-36870
Iterative Hansen method of general perturbations programmed for digital computer, evaluating major and minor planetary theory
18 p3320 A70-37060
Automatic gain ranging amplifier for high speed digital computer controlled data acquisition system used to process input data levels
19 p3383 A70-37919
Digital electrodynamic vibration exciter control for sinusoidal, random and shock spectrum testing of aircraft, missiles and satellites
19 p3383 A70-37920
Data management methodology for test facilities, considering on-line analog/digital computers
19 p3383 A70-37922
Digital computer for high speed wind tunnel data acquisition, processing and operations control
19 p3397 A70-37923
Digital computer magnetic tape recording system for flight tests of Jaguar aircraft, discussing data treatment
19 p3384 A70-38537
Emmanuel magnetic recording system used with airborne digital computers for aircraft in-flight tests
19 p3432 A70-38547
Digital computer input language with multiple access for engineering calculations
19 p3385 A70-38577
Neutron monitor NM-64 design and operation, using Setun digital computer for around clock processing
20 p3629 A70-39310
Digital fail-operative flight control computers for automatic landings, describing system requirements and problems and flight test program
[AIAA PAPER 70-1032] 20 p3591 A70-39505
Small digital computer arithmetic unit design, discussing number representation, addition and subtraction methods for performance and cost
21 p3793 A70-40757
Fast pseudorandom number generators for digital computers
21 p3793 A70-40851
Electromagnetic test equipment transient waveform control using on-line digital computer in near real time configuration
21 p3805 A70-41270
Aerospace digital computers impact on aerospace systems design
21 p3794 A70-41685
Aerospace digital computer family structural commonality, considering architecture, hardware and support software
21 p3794 A70-41687
Aerospace digital computer and avionics systems man machine relationship optimization, considering human information and control response requirements
21 p3794 A70-41688
Aerospace system design, considering use of microprogram-controlled digital computers
21 p3795 A70-41690
Modular aerospace digital computer system architecture using off-shelf components for rapid avionic computing system realization
21 p3795 A70-41691
Aerospace microelectronic digital computer design, discussing optimal packaging by use of integrated circuits
21 p3795 A70-41694
Airborne digital computers in aircraft systems, discussing optimization, design and economic effectiveness
21 p3796 A70-41920
Automatic ship navigation system using Transit satellites and onboard digital computer for routine tasks of dead reckoning
22 p4068 A70-42666
Modular plated-wire digital associative processor with content addressable memory, distributed arithmetic and I/O capability at each word
22 p3994 A70-43104
Avionics digital computer system using associative memory for executive control functions implementation to mechanize task assignment algorithm
22 p3994 A70-43105
Automated air cargo and data flow system with on-line computers, discussing handling, document management, load planning, information transmission, storage and mechanized freight systems
22 p3994 A70-43271
Information processing methods in microwave measurement using digital computers, emphasizing active and passive transducers
23 p4193 A70-43795
Graphical link between operator and digital computer using CRT display and light-pen input system during automatic electronic circuit design
23 p4150 A70-43952
Digital computer constructed with diodes and transistors logic for evaluating matrix determinants and minors
23 p4166 A70-43955
Flight simulation in SAAB AJ37 aircraft development, describing analog and digital computers, cockpit simulators, automatic pilots, control and display devices
[ICAS PAPER 70-42] 23 p4178 A70-44140

- Automated high precision electrical resistance measuring system using digital computer control
24 p4334 A70-45384
- DIGITAL DATA**
- Semiautomatic data collection system for IR reflectivity measurements, recording digitized output on punched cards for computer analysis
01 p0088 A70-10747
- Man machine digital display low cost system for displaying black and white image data with gray levels, color image data and dot patterns
02 p0265 A70-12152
- Automatic universal-code digital data recorder for photogrammetric measurements
03 p0483 A70-13110
- Technique for coding data on cosmic ray variations based on packing digital information in computer storage, proposing selective statistical control for tape recording phase
05 p0898 A70-15929
- Onboard digital data acquisition instrumentation system for scientific satellites, combining existing functional blocks to obtain different configurations and performances
05 p0818 A70-16587
- Digital and analog large system data displays, considering CRT, laser, hybrid types, contrast control, etc
06 p1061 A70-17348
- Arithmetical divisible codes with error correction in single digit for nonbinary positional number systems, using comparison and group theories
07 p1246 A70-19645
- Error statistics recording for digital communications channel performance by extreme value technique
08 p1459 A70-20801
- Digital data display system designed for central station of German ground station system
08 p1462 A70-21369
- Automatic photographic data processing system with transient reproducer to obtain digital format for computer analysis
09 p1673 A70-22030
- Binary, ternary and multilevel digital signals transmission codes emphasizing PCM signals
09 p1631 A70-22038
- Gigahertz rate circuits requirements for high speed digital data communication from component and system viewpoint, emphasizing coding and multiplexing techniques
09 p1633 A70-22605
- Digital transmission techniques optimal utilization of assigned frequency spectrum for phase modulation of frequency carriers
10 p1839 A70-24365
- Phase noise and cycle slip optimization of steady state digital data transition tracking loop used as bit synchronizer in phase-coherent receiver
11 p2024 A70-26202
- Controlled digital data relay satellite system to provide multiple access between central station and user terminals, noting computer time sharing operation
11 p2008 A70-26230
- Digital air data system vibrating diaphragm pressure sensor
11 p1983 A70-26508
- Digital river and rainfall data automatic transmission from remote hydrologic platforms via ATS-1, studying system economic and technological feasibility
12 p2205 A70-26939
- Binary-valued digital pictures noise cleaning by propagation processes
12 p2188 A70-27937
- Digital signals transmission codes comparison for transient response by reducing channel bandwidth to obtain error probability
13 p2372 A70-28899
- Digital recording of geomagnetic field variations, using IBM or international telex code for radio transmission
13 p2415 A70-30043
- Harmonic analysis of digital data from satellite measurements of periodic phenomena with unknown periodicity
14 p2554 A70-31415
- Digital data detection in presence of noise and double sided intersymbol interference, deriving error rates for known and stochastic signals
15 p2703 A70-32561
- Digital sampled data demodulation, discussing methods of obtaining quadrature channels from single signal
15 p2703 A70-32579
- Digital color printer with opaque IBM card as filter for sea surface temperature and cloud vortex patterns display
16 p2907 A70-33180
- Digital data acquisition and control system for acoustic testing of large spacecraft
17 p3062 A70-35506
- Magnetic tape recorder for panoramic vertical ionospheric sounding data acquisition in digital form
18 p3261 A70-37041
- Digital flight data recording, considering aircraft integrated data systems /AIDS/
19 p3426 A70-37892
- Range channel width effect on radar signal digital detector function and parameters optimal value
19 p3380 A70-38068
- Cardiac rhythm, respiration and rhythmical processes of alimentary tract, using digital data device
19 p3370 A70-38214
- Piezoresistive Si pressure transducer design for Digital Air Data Computers, achieving optimum resistor matching and long term stability
19 p3430 A70-38521
- Digital data acquisition system for CF-5A flight test program, discussing recording system design
19 p3384 A70-38532
- Data collection system for prototype flight tests of Fokker F-28 based on DC-8 aircraft digital system
19 p3384 A70-38546
- Digital extraction of primary and secondary radar data for air traffic control
19 p3469 A70-38644
- Digital readout test equipment characteristics and parameters for electrical properties measurement, proposing pulse counting analog-digital conversion technique
19 p3432 A70-38701
- Satellite TV cloud picture digital representation, deriving algorithms for statistical analysis of geometrical features
19 p3463 A70-38755
- Digital correlation system for stationary and nonstationary random processes, estimating mathematical expectations and cross- and autocorrelation function
20 p3594 A70-39920
- Digital correlator errors due to quantization by levels, designing analyzer of slow processes
20 p3594 A70-39922
- Liquids density measurement from digital data obtained from sample subjected to vibrations
22 p4030 A70-42848
- EUV reflectance data for optical constants obtained in digital form directly on punched cards by data acquisition system
23 p4197 A70-44470
- DIGITAL FILTERS**
- Digital filters output error due to roundoff accumulation and input quantization calculated by floating point arithmetic
01 p0050 A70-10778
- Special purpose computer organized as time-shared digital filter for real time applications with adaptable coefficients, programming and multiplexing scheme
05 p0818 A70-16415
- Transverse nonrecursive digital filters for Hilbert transformation, investigating ideal quadrature filters with Chebyshev approximation errors
05 p0822 A70-16772
- Half wave stepped digital elliptic filter design showing improvements over microwave TEM line narrow band bandpass filter
08 p1476 A70-21284
- Roundoff noise output-dynamic range interaction in digital filters, discussing filter synthesis with transpose configurations concept
09 p1649 A70-23366
- Collection of papers on digital signal processing covering digital filter synthesis, Fourier transforms, algorithms, etc
11 p2003 A70-25575
- Digital filters response errors due to signal amplitude quantization, resulting from analog-to-digital conversion and arithmetic operations
11 p2029 A70-26333
- Satellite signal scintillation spectrum analysis by digital filtering of magnetic tape recording
11 p2012 A70-26718
- Bits quantity required to represent coefficient within digital controller with high sampling rate
12 p2203 A70-27410
- Digital range tracking, Doppler filtration and moving target selection in multichannel automatic surveillance radars
13 p2380 A70-29735
- Digital filter facilitating biological data analysis through zero or linear phase shift filtering without distorting time relationship in data
14 p2542 A70-30796
- Cascade digital filter computerized design with favorable signal to noise ratio, considering round-off errors
15 p2709 A70-32465
- On-line computer aided design of fixed point digital filters simulating direct, cascade and parallel bit representations
15 p2711 A70-32598
- Real time variable range digital filter design in suitable form for LSI realization, satisfying reduced dead-band requirement for input interface element
16 p2882 A70-33040
- Digital self optimizing distortionless filter for hybrid navigation system
17 p3054 A70-35281
- Analog shift register for use as delay line and digital filter, discussing applications to radio astronomy
18 p3261 A70-37088
- Digital filter synthesis, discussing transfer function determination based on prescriptions for frequency or time response properties
19 p3391 A70-38746
- Recursive digital filters for flight control system airborne computer, considering quantization effects and eigenvalue sensitivity
20 p3601 A70-39575
- Digital filtering of sampled narrowband sinusoidal signal embedded in wideband white noise, assessing hard clipping effect on performance by simulation on digital computer
21 p3791 A70-41948
- Adaptive channel equalization approach leading to adaptive detector for slowly time varying channel
22 p3989 A70-43172
- Digital frequency filter for data processing
24 p4318 A70-45435
- Analog and digital low pass filters for radiometric postdetector filtering
24 p4321 A70-45622
- Multifunction programmable digital filter design performing bandpass, bandstop, comb, nonlinear phase and matched filtering of signals
24 p4319 A70-46082
- DIGITAL INTEGRATORS**
- Digital differential analyzers one step integration method with iteration procedure truncation to single step
22 p3996 A70-42921
- DIGITAL NAVIGATION**
- Inertial navigation systems, discussing role as flight control sensor with advent of all digital interface automatic flight control systems and cost and reliability
02 p0334 A70-11988
- Digital guidance computer compatibility with analog attitude control loop in Digital Inertial Guidance System used in ELDO launch vehicle
11 p2080 A70-26280
- Global digital navigation and traffic control system via satellites, discussing position determination, surveillance and communication requirements
21 p3848 A70-41133
- Aircraft navigation control system by digital computer combined with inertial platform, considering emergency backup, slow drift and system malfunctions
24 p4374 A70-46092
- DIGITAL SIMULATION**
- IBM System/360 Operating System submodel simulator for multiprogramming, discussing language and structure
02 p0266 A70-12281
- Optimum numerical integration with application to real time digital simulation of continuous systems, deriving three step methods
03 p0455 A70-14173
- Nuclear rocket engine core thermal and neutronic transient and steady state dynamics digital simulation, showing advantages over lump model analysis [ASME PAPER 69-WA/NE-3]
04 p0717 A70-14757
- Dodge satellite postlaunch attitude stabilization and flight data comparison with digital simulation, underlining simulation use in design analyses
04 p0765 A70-15674
- Book on digital simulation of continuous systems covering programming, engineering and mathematical applications, equipment logic and construction, etc
06 p1014 A70-17475
- Flight software for onboard Apollo Primary Guidance, Navigation and Control System flight qualification by digital simulation, including software diagnostics [AIAA PAPER 70-173]
06 p1029 A70-18060
- Computer program for automated test station simulation, considering station operating characteristics and performance prediction
08 p1465 A70-20666
- Mars lander atmospheric entry digital simulation for deceleration system design, discussing ballistic coefficient, aeroshell diameter, parachute size and deployment altitude, etc
08 p1582 A70-20932
- Cardiovascular control system mathematical model incorporating fundamental properties of heart muscle for digital simulation using FORTRAN program
08 p1453 A70-21513
- DICAP system to analyze digital sequential switching circuits, studying simulation technique range and limitations of applicability
10 p1845 A70-24236
- Combined discrete event and continuous systems simulation language, discussing mathematical modeling and various applications
10 p1860 A70-24652
- Digital simulation of complex dynamic systems using homing missile as example, basing algorithm on 1 transforms for linear systems
11 p2013 A70-25692
- Digital computer simulation of Bake concept as related to tropospheric CW signal scatter measurement
11 p2009 A70-26240

Mars landing analysis and simulation for unmanned lander prototype, discussing digital simulation by Monte Carlo techniques and physical tests
11 p2032 A70-26291

Radar systems EM compatibility simulation, describing FORTRAN IV operational interference prediction program
12 p2193 A70-28139

Attitude control system for pointing rocket nose cone at sun examined by digital computer simulation
13 p2501 A70-28419

Fixed wing aircraft and associated subsystems simulation by digital computer, having full FORTRAN capability
[AIAA PAPER 70-572] 13 p2385 A70-29897

DMC computer code for simulation of two dimensional viscous incompressible flow about arbitrarily shaped bodies
14 p2527 A70-30271

Gas turbine performance dynamic modeling by analog and digital computer simulation providing clear picture of transient behavior
14 p2629 A70-30991

Interactive computer graphics using modified Continuous Systems Modeling Program /CSMP/
15 p2705 A70-31773

Computer simulation model documentation exemplified by cardiovascular simulation using Continuous Systems Modeling Program /CSMP/ and emphasizing format uniformity
15 p2689 A70-31774

Magnetic hysteresis dynamic model for digital simulation of stabilized satellite attitude motions
15 p2812 A70-32509

Digital simulation for turbine engine propulsion system testing
[AIAA PAPER 70-633] 16 p2869 A70-33593

Multibody lifting entry vehicle clusters separation dynamics, describing digital simulation, wind tunnel tests, separation mechanisms, etc
16 p2981 A70-33704

Interactive computer graphics applied to continuous system modeling program /CSMP/, describing hardware system configuration
16 p2870 A70-33727

Digital simulation of continuous systems described by differential equations
16 p2870 A70-33728

Digital simulation of linear filter, investigating noise and rounding errors effects on decoding signals from lunar and interplanetary probes
17 p3049 A70-34612

Satellite interference distribution prediction from digital simulation
17 p3177 A70-35250

Aircraft traffic on ground at airports by digital simulation, investigating influence of constraint represented by infrastructure of taxi tracks
18 p3236 A70-36390

Gas turbine engine dynamic performance simulation, using analog and digital techniques
[ASME PAPER 70-GT-23] 18 p3237 A70-36830

Global scale atmospheric circulation processes numerical simulation leading to long range weather forecasts for Northern Hemisphere
19 p3462 A70-38753

Isolated cumulus clouds formation numerical simulation, determining movement rates relationship to external wind speed
19 p3463 A70-38756

Apollo service module retrograde motion due to propellants reorientation after reentry jettison predicted by digital simulation
[AIAA PAPER 70-1047] 19 p3534 A70-38862

Variable parameter nutation damper SAS-A dual spin satellite, discussing design and expected in-flight performance by digital simulation
[AIAA PAPER 70-972] 20 p3669 A70-39557

Image detection in pattern recognition through bipolar correlation, discussing reference generating algorithms and digital simulation results
20 p3633 A70-39972

Digital filtering of sampled narrowband sinusoidal signal embedded in wideband white noise, assessing hard clipping effect on performance by simulation on digital computer
21 p3791 A70-41948

January climatology simulation experiment based on two layer version of global circulation model, comparing computed and observed results
21 p3847 A70-42120

Digital statistical modeling of nonlinear automatic control systems including accuracy analysis, generation of random perturbations and parameter optimization
22 p4004 A70-42892

Air traffic flow digital computer simulation model including departure, enroute and arrival phases for collision avoidance, weather effects and control constraints
[AIAA PAPER 70-1316] 24 p4373 A70-45945

DIGITAL SYSTEMS

Secondary surveillance radar to operate autonomously with digital techniques and digital handling systems, discussing design and ATC applications
02 p0266 A70-11957

Multiplying digital device for measuring motor speed, torque and power, discussing optional applications and design
02 p0297 A70-12076

Digital systems design laboratory as instructional tool and experimental model for education
02 p0275 A70-12190

Spatial registration of digitized multispectral video imagery obtained from multilens cameras, multichannel optical-mechanical line scanners and multiple TV camera systems
03 p0453 A70-13000

Binary systems noise resistance with various cross correlation functions and indefinite moment of arrival
03 p0448 A70-13512

Digital network reliability with redundancy to mask logic modules failure for asymmetric failure modes
03 p0454 A70-14022

Solid state digital pressure transducer incorporating Si diaphragm with piezoresistive sensing elements for computerized supersonic and subsonic data applications
03 p0496 A70-14194

Frequency selection systems synthesis with digital AND type logical elements, noting basic design relations
04 p0647 A70-14404

CRT display design for command and control with digital symbol and vector generation
05 p0817 A70-16184

Radar digital indicators generating deflection signals for digital PPI display, discussing scale ranges, symbols and digital circuits application
05 p0828 A70-16191

Computational algorithms transformation to forms convenient for aircraft computer adaptation for reducing digital network length with small accuracy penalty
05 p0818 A70-17005

Binary cyclic coding schemes for multiplex spectrometry in terms of linear least mean square unbiased estimate
06 p1013 A70-17217

Adjustment process dynamics in digital adaptive system with task of ensuring minimum quadratic criterion for parameters using gradient search technique
08 p1480 A70-21017

Digital communications and circuits and components for GHz data rate capability, discussing modulation techniques and bit stream coding
08 p1462 A70-21258

Error probability upper and lower bounds determined for self synchronized binary PSK communication systems, presenting maximum-likelihood and Monte Carlo computer simulation
08 p1463 A70-21777

Computer-generated shaded flicker-free on-line digital video display, allowing superimposed vector graphics with light-pen interaction
09 p1640 A70-22033

Digital autopilot design using stochastic noise generator for synchronous random pulse sequence controlled by clock
09 p1720 A70-22418

Book on numerical control covering principles, electromechanical system using digital logic circuits, binary numbers and arithmetic, etc
10 p1854 A70-24023

Digital sampled-data loop of phase lock control containing digital zone error detector and digital frequency regulator with reversible counter as memory unit
10 p1833 A70-24085

Error probability degradation for digital satellite communication systems, employing multiphase signal sets distorted by bandlimited filtering
10 p1836 A70-24342

Satellite relayed integrated digital multiple access systems, discussing traffic handling, satellite positioning, demand assignment, etc
10 p1839 A70-24369

SIMCON digital simulation control system optimizing man machine interaction, noting capability to generate solutions with minimum computer memory
10 p1860 A70-24654

Digital control systems simulation on analog computer with digital logic, using conventional analog amplifiers and integrators
10 p1860 A70-24655

Ionospheric fine structure from ionograms, discussing probe and half automatic digital evaluation method
10 p1884 A70-25257

Optimal fixed digital control for handling wide range plant parameters uncertainty involving random disturbances and measurement errors
11 p2026 A70-26248

Binary-coded sequential acquisition spacecraft ranging system operating at weak signals using HF digital logic
11 p2009 A70-26252

Upper bound on system errors caused by quantization in multirate digital control system
12 p2204 A70-27841

Digital transition tracking symbol synchronizer improving SNR without lowering loop bandwidth
[JPL-TR-32-1488] 13 p2367 A70-29591

Digital coding systems operational capabilities, discussing arithmetic procedures and equipment types
14 p2554 A70-30678

Iterative cellular logical array for nonrestoring binary division
14 p2556 A70-30685

Digital guidance and control system, discussing communication device providing data transfer between airborne digital computer and control device
[AIAA PAPER 69-988] 14 p2615 A70-30771

Stripline skin effect in digital equipment transmitting fast rising pulses
15 p2708 A70-31828

High pulse repetition rate digital systems signal processing using Gunn effect diodes
15 p2710 A70-32583

Digital logic control of chromatographic system for measuring instrumental contributions to band broadening
16 p2855 A70-33120

Digital controller bits number determination to meet nominal controller coefficients accuracy requirements
16 p2867 A70-33304

Upper bound determination for errors due to signal quantization in multirate digital control system through state variable or z transform formulations
16 p2867 A70-33306

Algebraic computation of diagnostic tests for combinational digital circuits single gate failure detection and location
16 p2868 A70-33455

High speed MOS circuitry design with application to digital equipment, noting low power and high packaging density
16 p2887 A70-33456

Design and reliability of digital systems for hard cores of fault tolerant computers /hybrid-redundant systems/, discussing advantages over multiplexed systems
[JPL-TR-32-1490] 16 p2887 A70-33734

Computer controlled frequency surveillance system design and operation
16 p2871 A70-34052

Digital spectrophotometer with automatic continuous wavelength selection, sample feed, measurement and printout
16 p2914 A70-34098

Coherent digital communication systems optimal design based on unified theory, discussing tradeoffs between error rates, Doppler tracking capability and time and frequency division multiplexing
16 p2866 A70-34258

Interference free high speed monolithic digital integrated gate, determining current swing, lead inductances and switching times
17 p3048 A70-34587

Binary data system parameters sudden change detection by noisy observation based on Bayes criterion
17 p3056 A70-34856

Management program for digital data systems maintenance and repair
17 p3200 A70-35487

Start-stop dynamics as cost effective method for computerized testing of digital modules and subassemblies, providing static and dynamic capability
17 p3062 A70-35504

Aircraft digital interior communication systems, combining multiplexing techniques with solid state integrated circuits technology and systems integration
[SAE PAPER 700302] 18 p3216 A70-36813

LSI technology effect on digital circuits and systems designs
19 p3387 A70-37847

Concorde prototype 002 flight test data recording instrumentation, emphasizing digital system for quasi-static parameters
19 p3432 A70-38545

Magnetic tape instrumentation system installed aboard Hawker Siddeley Harrier for flight development, discussing digital format recording system
19 p3384 A70-38549

Digital frequency synthesizer design, operation and stability
19 p3390 A70-38581

Apollo digital Range Safety Command System for signal-crowded communications channels
20 p3605 A70-39497

Statistical information processing equipment, describing correlators and digital coding devices design for graphic form information transformation into binary code
20 p3594 A70-39919

Digital systems reliability improvement by redundancy at circuit and system levels
21 p3797 A70-40762

Digital bit synchronization phase locked loop steady state and transient performance in white Gaussian noise
21 p3802 A70-41352

- Book on digital electronics with engineering applications covering switching circuits and logic designs, integrated circuits, error correcting codes, information storage and control, etc
22 p3999 A70-42324
- Optimal binary and ternary signal system synthesis by information divergence procedure for communication channels with colored Gaussian noise
22 p3985 A70-42491
- Nonbinary redundant error correcting codes for improving TV transmission speed and fidelity
22 p3985 A70-42493
- Computer controlled tester for digital circuits, giving diagrams and operations flow chart
22 p3996 A70-42849
- Computer-based seismic data acquisition system using digital vibroseis process for eliminating low signal to noise ratio characteristics
22 p4038 A70-43092
- Digital recording system for body temperature telemetry from small animals, using FM transmitter implanted in peritoneal cavities
23 p4151 A70-44381
- Optimal adaptive digital autopilot design and operation, discussing linear differential equations of motion, algorithms, etc
23 p4215 A70-44504
- Onboard digital information processing, discussing applications to tactical missile guidance and manned vehicles
[AIAA PAPER 70-1230] 24 p4317 A70-45976
- Dynamic errors of digital converter for digit-to-digit compensation estimated by probability and information characteristics methods
24 p4340 A70-46404
- ### DIGITAL TECHNIQUES
- Moving targets automatic identification by radar signals digital processing, describing radar echoes properties, moving window detector system and circuits design
01 p0137 A70-10358
- Digital log-linear companding technique for nonuniform quantization of speech and image signals
01 p0044 A70-10784
- Integrated digital circuits for office type desk calculators based on machine concept
01 p0052 A70-11287
- Textbook on applied numerical methods covering interpolation, approximation, integration, matrices, etc, with emphasis on digital computer algorithms
01 p0132 A70-11306
- Secondary surveillance radar to operate autonomously with digital techniques and digital handling systems, discussing design and ATC applications
02 p0266 A70-11957
- AFC by digital phase lock loop consisting of zone error detector with phase quantizing circuit and discrete frequency regulator with reversible counter
02 p0258 A70-12542
- Sampled signal and associated sequence with identical Fourier transforms, noting applications to digital spectral analysis onboard spacecraft
03 p0449 A70-13538
- Digital microcircuits for one kva three phase DC-AC inverter control to generate sinusoidal 400 Hz output using HF bridge chopper techniques
04 p0628 A70-15340
- Radar and sonar data processing for display in command and control systems using digital technique, discussing processor configuration
05 p0828 A70-16189
- Computer controlled radar guided tactical missile system using digital techniques in performing target detection, acquisition, tracking and illumination
05 p0814 A70-16328
- Theoretical performance computation of on-line analyzer for radar echo detection by digital techniques
05 p0814 A70-16359
- Computerized statistical analysis of digital filters used to eliminate digital radar interference
05 p0822 A70-16530
- Radiation patterns of scanning antenna using digital phase shifters to obtain suitable phase distribution to move sidelobes into invisible region
05 p0822 A70-16676
- Displacement measurement using single reflecting phase grating
06 p1060 A70-17148
- Digital control valve for high speed aerospace blending, considering propellant and cryogenics applications
06 p0989 A70-18602
- Oblique radio ray tracing at 2-10 MHz and application to signal strength calculation, concentrating on digital techniques
07 p1230 A70-19162
- Digital cross correlator design for impulse response determination in linear systems, noting real time operation without software and storage problems
07 p1236 A70-20068
- Electromechanical graph digital reader for records of cardiovascular studies
07 p1224 A70-20197

- Digital differential analyzers improved speed and accuracy by extended resolution on Euler integration for differential equations solution programming
08 p1467 A70-21756
- Digital image processing applied to picture generation, intensity and geometric manipulation, spatial frequency operations and image analysis
[JPL-TR-32-1482] 09 p1682 A70-23507
- Digital wavemeter description using interferometer with parallel plates and automatic frequency readout for submillimeter band
09 p1652 A70-23658
- Direct digital control valves in fluid flow process evaluated for performance by analog computer simulation
09 p1613 A70-23684
- Optimizing control system design using fluidic digital circuitry and FM type transducers
09 p1614 A70-23690
- Digital controlled phase-locked loop in burst mode operation, comparing recovery characteristics with carrier and bit-timing recovery techniques based on statistical analysis
10 p1835 A70-24333
- Communication commercial satellite systems capacity in terms of telephone channels, using frequency modulation and digital methods
10 p1836 A70-24344
- Digital plotters operational characteristics, capabilities and applications
10 p1845 A70-24581
- Book on principles of pulse code modulation covering analog to digital conversion, sampling, quantizing, coding, etc
10 p1841 A70-24775
- Digital techniques application to military communication satellite systems, discussing 40 Mbps quadriphase modem, convolutional encoders, TDMA, etc
[AIAA PAPER 70-495] 11 p2002 A70-25488
- Collection of papers on digital signal processing covering digital filter synthesis, Fourier transforms, algorithms, etc
11 p2003 A70-25575
- Digital control program parameters synthesis to realize time optimality with pure delay for ensuring absence of auto-oscillations under steady conditions
11 p2022 A70-25577
- Controlled missile reentry trajectory through dense atmosphere, describing digital computer solution of differential equations of motion
12 p2314 A70-27768
- Pipeline fast Fourier transform signal processor for digital spectrum analysis of wideband radars
12 p2186 A70-27904
- Automatic image interpretation and classification using two dimensional digital Fourier transforms
12 p2193 A70-28106
- Radiation patterns of phased array scanning antenna using digital phase shifter, reducing peak sidelobe level
13 p2380 A70-29785
- Airphoto interpretation, discussing descriptive, digital and photographic methods of representing recognition process results
14 p2585 A70-30642
- Avionics and instrumentation, discussing digital techniques application to engine control, electronic head-up and head-down displays, radiation pyrometry, etc
14 p2589 A70-31338
- Radiograph images digital processing by linear and nonlinear position invariant techniques, obtaining contrast enhancement
15 p2706 A70-32569
- Digital logic techniques for pulse modulated radar systems, with application to controlling and timing waveforms for display
17 p3042 A70-34570
- Associative processor concept for air traffic control, discussing tracking and correlation problem
18 p3288 A70-36392
- Recent radar developments covering ground and shipborne systems, clutter suppression and computer techniques
18 p3228 A70-36658
- Three digit hydromechanical step type actuator drives with slide valve assembly for computer data sampling systems
18 p3216 A70-37071
- Long period duration digital sinusoidal voltage generator, presenting schematic diagram and theoretical and operational characteristics
19 p3385 A70-37376
- ILS glide slope calibration using optically projected digital codes as reference
19 p3464 A70-37912
- Neutron flux measurement in nuclear reactors based on logarithmic techniques and digital approach, discussing temperature effects compensation
19 p3427 A70-37939
- High resolution successive approximation voltmeters using digital carry to improve speed and accuracy
19 p3427 A70-38049

- Solid state, digital, Resonant Capsule Pressure Transducer based on natural frequency variation of aneroïd capsules by pressure induced curvature changes
19 p3430 A70-38520
- Data processing systems functions and composition for random data reduction during aircraft flight tests based on analog and digital techniques
19 p3430 A70-38524
- Random values statistical characteristics by digital methods, deriving errors as function of quantization parameters
19 p3432 A70-38705
- Crystal controlled digital frequency setting for microwave oscillators in mobile FM radio links with remote handling
20 p3596 A70-39162
- Lunar module digital autopilot design, considering attitude state estimator, reaction control system and thrust vector control
[AIAA PAPER 70-991] 20 p3668 A70-39539
- Automatic digital device for evaluating matrix determinants
20 p3591 A70-39788
- Aircraft capacitive fuel gage improvement by integration with flowmeter system, DC torquer display and digital techniques, considering other measurement principles
21 p3821 A70-40619
- Seven segment in-line digital readout circuit for binary-quinary decade counter, using resistance transistor logic
21 p3793 A70-40763
- Digital optical storage for information system components
21 p3823 A70-40852
- Space-to-ground link wideband digital laser communications system design and performance tests
21 p3787 A70-41331
- Digital radar receiver based on pseudo Bayes likelihood ratio algorithms
21 p3789 A70-41353
- Remote digital mean wind speed indicator with numerical display, using photoanemometer for airport application
21 p3831 A70-42247
- Digital frequency and phase flip-flop comparator for slave oscillators fine control by master frequency
22 p3996 A70-42819
- Mathematically defined curve incremental generation by computer, discussing parametric and non-parametric representations and digital differential analyzer technique
22 p3993 A70-43072
- Digitally controlled milling machine for complex aerodynamic profiles and prismatic blades
22 p4046 A70-43117
- Digital Doppler ambiguity resolution method for pulsed S-band radar, using integrating interval approach
22 p3992 A70-43592
- Phased array radar for missile defense, discussing development trends toward adaptive system logic control and microwave digital circuitry for signal processing
23 p4172 A70-44012
- Functions of two variables, using digital method for curve family modeling
23 p4166 A70-44350
- Estimation errors of multilevel modified digital correlator using auxiliary random noise for unbiased output
24 p4312 A70-46054
- Digital to analog converters for signal processing in CRT character and sweep generation, programmable power supplies, resolver positioning, shaft angle conversion, etc
24 p4320 A70-46083
- Digital PCM telemetry link coding techniques, discussing encoding-decoding complexity, and concatenated block scheme for channel
24 p4315 A70-46258
- ### DIGITAL TO ANALOG CONVERTERS
- Direct, indirect, quasi A to D digital transducers principles and features
06 p1073 A70-18596
- Digital-to-analog converter for voltage representation of signals in 2-4-2-1 binary decimal code
12 p2235 A70-27681
- Digital to analog converters for signal processing in CRT character and sweep generation, programmable power supplies, resolver positioning, shaft angle conversion, etc
24 p4320 A70-46083
- ### DIGITAL TRANSDUCERS
- Direct, indirect, quasi A to D digital transducers principles and features
06 p1073 A70-18596
- Surface acoustic wave delay lines using interdigital transducers based on piezoelectrics with applications in VHF and UHF signal processing
11 p2005 A70-26165
- Interdigital Rayleigh wave transducers piezoelectric coupling coefficient from bulk constants, permitting equivalent circuit parameters prediction
17 p3055 A70-35875

DIGITALIS

Serum calcium-digitalis synergism effect on dogs heart excitability, noting hypoxia role in arrhythmia production

17 p3026 A70-35325

DIGITIZERS

U ANALOG TO DIGITAL CONVERTERS

DIGITS

NT BINARY DIGITS

DIHEDRAL ANGLE

Supersonic flow in dihedral angle between intersecting wings and in space between parallel wings, using integrating wave equation by Volterra method

03 p0407 A70-13492

Secondary velocities analysis in turbulent boundary layer in dihedral interior based on turbulence anisotropy and effects on wall pressure gradient

03 p0471 A70-14354

Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations

15 p2672 A70-32127

DIHEDRAL EFFECT

U LATERAL STABILITY

DIHYDRIDES

Titanium and zirconium dihydrides room and higher temperature electrical resistivity, Hall effect and thermal expansion coefficients

08 p1517 A70-21149

Electron exchange coupling of Gd and Gd-Y alloy dihydrides from ESR indicating negative hydrogen ion entry

21 p3862 A70-41703

DILATION

U STRETCHING

DILATOMETERS

U EXTENSOMETERS

DILATOMETRY

Dilatometric diagrams of phase transformations at low temperatures in Re steels, studying dilatation coefficient behavior

05 p0862 A70-16201

Volt-watt sensitivity of dilatocapacitor types of thermal radiation receivers, noting low natural noise levels

07 p1284 A70-19815

Phase transformations in TiNi with equiatomic composition, using internal friction, electrical resistivity and dilatometry

13 p2435 A70-29499

Fe-Co alloys critical points during rapid heating, determining alpha-gamma phase transformations onset from dilatometric curves

18 p3275 A70-36203

Dilatometric investigation of Fe alloys phase transformations, determining magnetic field effects and Curie temperatures

18 p3276 A70-36206

DILUENTS

Combustion characteristics of blended droplets composed of monopropellant and diluent, using theoretical model to predict life histories

06 p1180 A70-18141

Diluent resins properties for blending with glass fiber reinforced high density polyethylene concentrate

16 p2935 A70-33353

Diluent molecules effect on polymers relaxation behavior at cryogenic temperatures from internal friction measurements, noting loss peaks shift

21 p3844 A70-42138

DILUTION

Maximum isovolemic hemodilution by volume substitution determined by plasma expanders infusion in dogs

10 p1821 A70-25083

DIMENSIONAL ANALYSIS

Correlation characteristics and dimensionality of speech spectra from statistical properties derived from continuous speech and summarized by covariance-matrix eigenvectors

02 p0237 A70-12324

Dimensional analysis for describing steel surface microcracks growth under uniaxial fatigue loading, using stress-intensity factor and crack extension concepts of fracture mechanics

04 p0770 A70-14879

Scale dependence and optimal sample dimensions for strength tests of brittle refractory materials

05 p0955 A70-17064

Heat conduction transient field problems in two and three dimensional isoparametric finite element solutions using Galerkin method

06 p1178 A70-17938

Coaxial fluid streams mixing within finite length tube based on dimensional analysis of aerodynamic noise generation, discussing subsonic and supersonic flows within ejector

13 p2474 A70-29080

Microstrip circuit design, obtaining dimensions by computer programs incorporating subroutine sets

14 p2561 A70-30922

Hypervelocity impact theory, discussing Euler hydrodynamic codes, projectile cratering dimensional analysis, self similar solutions, etc

15 p2823 A70-32785

One dimensional analysis of stress and strain concentration resulting from longitudinal impact of viscoelastic rods

17 p3185 A70-34965

Viscoelastic materials fracture strength as function of cut length, defect size and temperature

17 p3146 A70-35221

Orifice length-to-diameter ratio effect on spray mixture uniformity from unlike impinging jets

17 p3073 A70-35671

Kylston comet head diameter relation to brightness from photometric observations using north polar sequence stars as reference, noting camera, equipment and exposure times

19 p3526 A70-38784

Single phase flow problem in heated vertical prismatic channel, using dimensional analysis from conservation equations with boundary layer approximation

21 p3954 A70-42170

DIMENSIONAL MEASUREMENT

Michelson interferometer with movable mirror using laser beam to measure linear by counting fringes number, discussing design features

01 p0085 A70-10032

Length measuring systems based on Michelson type interferometers, laser sources, fringe counting electronics, ambient air compensation, fringe-inch conversion and digital display

01 p0108 A70-10418

Light curve and relative dimensions of eclipsing system V338 Herculis, from photoelectric measurements, discussing component stars

01 p0184 A70-10951

Light curves of Algol eclipsing variable AD Herculis and semidetached system relative dimensions from BV photoelectric observations

01 p0184 A70-10952

Automated inspection for defects and dimensions - Conference, Eastbourne, England, May 1969

01 p0105 A70-11394

Left ventricle wall forces and dimensional measurements during cardiac cycle based on stress-strain terms, including results for mitral, aortic and myocardial disease

02 p0238 A70-12512

Thickness measurement of nonmagnetic coatings on magnetic substrates taking into account surface roughness effect

02 p0302 A70-12672

Pressure-volume-temperature measurements on H, calculating fugacity coefficients

04 p0719 A70-15057

Artificial crystallization zones width measurement error during time intervals after cloud seeding by aircraft and solar reflection methods

08 p1538 A70-21110

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics

11 p2107 A70-25556

Heart dimension measurement by miniature implantable ultrasonic sonomicrometer, describing system design and operation

12 p2174 A70-26897

Economical inspection of numerical-control produced parts through critical dimensions determination and dimension measurement reduction

12 p2241 A70-27086

Radio meteor train initial radius determination, discussing radio echo observation method

12 p2309 A70-27977

Decreasing gravitational constant effects on secular earth figure and dimension changes using Clairaut equation

14 p2568 A70-30143

Dimensional measurements of nuclear fuel cylindrical specimens by scanning neutron radiographic negative with microdensitometer, taking into account specimen geometry and neutron cross section

15 p2735 A70-31769

Thickness measurement for thin films in inaccessible locations using scanning electron microscope, comparing accuracy with interferometric techniques

15 p2741 A70-32435

Holodiagram for making and evaluating holograms for large objects dimension, deformation and vibration measurement

17 p3084 A70-35004

High accuracy length measurement by fringe counting using laser interferometer

19 p3447 A70-38050

Solar disk dimensions and RF emission characteristics from eclipse observation and flux recordings, considering brightness temperature distribution and lunar edge diffraction effects

19 p3521 A70-38551

Characteristic dimensions of large and small scale atmospheric turbulence by meteor trails photographic observations, determining energy dissipation

19 p3526 A70-38790

Meteor trail angular dimensions determined by frequency scanning method involving minimum points on reflected signal characteristics

21 p3892 A70-41306

DIMENSIONAL STABILITY

NT SHELL STABILITY

NT STRUCTURAL STABILITY

Dimensional stability of nickel maraging steel at ambient temperature measured for applications as gage block materials

01 p0120 A70-10742

Low melt viscosity prepolymers of diallyl phthalate and isophthalate in mold encapsulation showing dimensional, electrical and mechanical stabilities under adverse environments

05 p0869 A70-16035

Fiberglass content effects on reinforced polycarbonates long term dimensional stability during compression and tension creep tests

12 p2259 A70-28298

Precision reliability indices for automatic dimensional control vibration-contact sensor

15 p2714 A70-31582

Beryllium mirrors optical performance, describing causes and effects of anisotropy and dimensional instability

16 p2904 A70-33146

DIMENSIONLESS NUMBERS

NT FROUDE NUMBER

NT GRASHOF NUMBER

NT HARTMANN NUMBER

NT LAVAL NUMBER

NT LEWIS NUMBERS

NT MACH NUMBER

NT NUSSELT NUMBER

NT PECLET NUMBER

NT PRANDTL NUMBER

NT RAYLEIGH NUMBER

NT REYNOLDS NUMBER

NT RICHARDSON NUMBER

NT SCHMIDT NUMBER

NT STROUHAL NUMBER

Parachute inflation dispersion studied by plotting dimensionless products characterizing incompressible flow process

01 p0006 A70-10849

Contacting metal surfaces thermal conductance prediction in vacuum, formulating dimensionless parameters in terms of properties, surface measurements and load/temperature conditions of contact

[AIAA PAPER 70-852] 16 p2932 A70-33919

Dimensionless heat transfer and resistance coefficients during stabilized nonNewtonian fluid flow in circular pipe

20 p3613 A70-40176

DIMENSIONS

NT DIAMETERS

NT FILM THICKNESS

NT HEIGHT

NT LENGTH

NT RADII

NT SCALE HEIGHT

NT TARGET THICKNESS

NT THICKNESS

NT WIDTH

Resilience coefficient of intermediate elements of threaded connection related to transverse and axial nut dimensions by least squares method

05 p0856 A70-17012

Weight-dimensions correlation for gas turbine engine/airplane optimization analyses, determining tradeoffs among performance, noise, drag characteristics, etc

[AIAA PAPER 70-669] 16 p2967 A70-33575

Hot gas pipe thermoelastic reduction factors, determining elastic support, material and dimensions

20 p3720 A70-39624

Space three dimensionality compared with Huygens principle via quantum mechanics, discussing past and current theories and empirical arguments

24 p4380 A70-45643

DIMERIZATION

Well depth determination for weak intermolecular potentials based on dimerization enthalpy measurement of rare gas atoms by mass spectrometry

03 p0527 A70-13299

DIMERS

Ar and nitric oxide free jets dimmer and cluster abundance dependence on nozzle diameter and reservoir temperature and pressure

09 p1733 A70-22907

Sunlight induced pyrimidine dimers formation in human cells in vitro, relating DNA lesions by 254 nm irradiation

24 p4304 A70-46139

DIMETHYLHYDRAZINES

Raman and IR spectra of unsymmetrical dimethylhydrazine and unsymmetrical dimethylhydrazine-d2 recorded in liquid and gaseous states

06 p1128 A70-17329

Odor threshold levels for unsymmetrical dimethylhydrazine/UDMH/ and nitrogen tetroxides

18 p3224 A70-36227

DIMPLING

Local axisymmetric dimple imperfection effects on buckling load of circular cylindrical shell under axial compression

[AIAA PAPER 70-103] 06 p1170 A70-18167

Lunar dimple /drainage/ craters formation mechanisms, considering analogous earth drainage craters associated with lava tubes
09 p1666 A70-22311

DIODES

NT AVALANCHE DIODES
NT CESIUM DIODES
NT CRYSTAL RECTIFIERS
NT GERMANIUM DIODES
NT JUNCTION DIODES
NT PARAMETRIC DIODES
NT PHOTODIODES
NT PLASMA DIODES
NT THERMIONIC DIODES
NT TUNNEL DIODES
NT VARACTOR DIODES

Schottky barrier diodes design for wideband radiometer mixers to obtain optimum noise performance and broadband operation by DC bias application
03 p0457 A70-13968

Generation-recombination noise theory extension to nonlinear devices applied to double injection diode in various operation modes
03 p0458 A70-14028

Diodes on cordwood module measured for stress during soldering, foaming and operation, describing methods for mounting semiconductor strain gages
05 p0854 A70-16036

Adjustable pulse delay circuit design utilizing slow switching action of storage diodes emphasizing thermal stability
05 p0820 A70-16343

Laser harmonic-frequency mixing techniques extended into IR with IR metal-metal point contact diode
06 p1083 A70-17944

Step-recovery diodes to shape pulses with steep leading and trailing edges noting transient processes
07 p1241 A70-19734

Schottky barrier diodes microwave power rectification efficiency, developing diode losses theory based on back capacitance, series and front resistance and knee voltage
08 p1474 A70-21274

Five resonator broadband frequency doubler design using charge storage diodes
08 p1475 A70-21280

Current-voltage characteristics and lifetime of thin film diodes on chalcogenide glass substrate with symmetrical and asymmetrical electrodes
09 p1647 A70-22751

Iterative solution for balanced diode modulator performance, obtaining output spectrum using Fourier transformation
10 p1849 A70-24232

Negative resistance and cut-off voltage of doped Si p-i-n diodes subject to deep acceptor levels
10 p1849 A70-24274

Magnetron diode current fluctuations in interelectrode space, considering cathode emission current amplification by various modes
10 p1853 A70-25164

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes
11 p2020 A70-26813

GaAs vapor phase epitaxial growth characteristics noting applications to Gunn diodes
11 p2020 A70-26826

Epitaxial or bulk GaAs for Gunn diodes in high power microwave oscillators
11 p2021 A70-26828

Tensodiode effect in long plate-shaped semiconductors, noting bend direction effects on I-V characteristics
12 p2195 A70-27312

He-Ne laser focused beam effect on negative Si diodes base I-V characteristics
13 p2378 A70-29517

Gunn diode simulation with variable cross section, showing subthreshold and mode oscillograms
15 p2707 A70-31510

Analog simulation of frequency multipliers and dividers with step recovery diodes
15 p2709 A70-32467

Nonequilibrium charge carriers transient accumulation in p-i-n diode at superhigh injection levels
15 p2714 A70-32908

High power microwave pulse generation in SHF region, discussing use of boat-grown and epitaxial GaAs diodes
16 p2875 A70-33396

Thermal noise in space charge limited solid state diodes by Langevin equation, relating spectral intensity for open and short circuit voltage and current
16 p2878 A70-33694

Doped Gunn diode domain field width, nucleation and annihilation dependence on electron drift velocity
16 p2879 A70-34044

Frequency multipliers with charge storage diodes, examining recombination and hysteresis effects on performance
17 p3050 A70-34588

Switching circuit with Se diode, comparing I-V characteristics with Se rectifiers
17 p3054 A70-35411

Current oscillations of GaAs Gunn diodes over wide voltage range, discussing diode behavior dependence on polarity and applied voltage
18 p3230 A70-36197

Gunn phenomenon, discussing GaAs Gunn diodes preparation and applications
18 p3231 A70-36198

GaAs laser diodes thermal degradation, observing nature, extent and occurrence of permanent damage
19 p3446 A70-37818

IMPATT diode microwave oscillator with modulated bias current, discussing amplitude and frequency modulation sensitivity, thermal effects and load parameters
19 p3390 A70-38363

Gallium aluminum arsenide-GaAs laser diodes properties and applications for CW operation, discussing p-GaAs layer thickness effects
19 p3447 A70-38454

Semiconductor silicon power diodes nondestructive quality control, discussing optimal sampling procedures
20 p3595 A70-38969

Projected nuclear MHD system conditions, examining electrical measurements in K vapor with diode at atmosphere pressure and high temperatures
20 p3681 A70-40006

GaAs Gunn diodes design and fabrication, discussing material selection and operating heat removal
21 p3799 A70-41424

Secondary breakdown meter for semiconductor diodes and transistors with reverse base drive, utilizing I-V characteristics and voltage waveform
21 p3801 A70-42248

Electron beam interaction with external harmonic microwave field in planar diode gap, calculating electric field current and voltage distribution functions
22 p3995 A70-42396

GaAs point contact diodes quick response performance with glass-metal or metal-ceramic bases, obtaining Schottky-type rectifying barriers by half period currents
22 p3995 A70-42406

Gunn diode oscillators in domain suppression mode, showing dynamic I-V curve shape relationship to donor concentration and crystal thickness
22 p3997 A70-43128

Spectrum generator with step recovery diode multiplier, discussing line spacing, energy and phase coherence
22 p3990 A70-43485

Frequency measurement extension to 5 micron region by IR laser harmonic frequency mixing in point contact diode as multiplier chain
23 p4201 A70-44917

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes
24 p4317 A70-45185

DIOXIDES

NT CARBON DIOXIDE
NT ENSTATITE
NT HYDROGEN PEROXIDE
NT PYROXENES
NT QUARTZ
NT SILICON DIOXIDE

DIPHENYL COMPOUNDS

Dicyclohexyl /DCH/ endothermic dehydrogenation to diphenyl /DP/ over platinum-alumina catalyst without added hydrogen considered for hypersonic aircraft engine cooling
14 p2546 A70-31175

DIPHOSPHATES

NT ADENOSINE DIPHOSPHATE [ADP]
Indirect ADP deamination and reamination of corresponding deamino form of inosine diphosphate in rabbit brain tissue
01 p0018 A70-10506

DIPOLE ANTENNAS

Impedance and radiation pattern of quarter wave monopole and half wave dipole antennas in isotropic plasma, considering plasma density role
06 p1117 A70-17372

Two port isotropic antenna excited by independent noise sources for uniform power radiation in all directions and polarizations
06 p1021 A70-17574

Dipole antennas current distribution in dissipative homogeneous medium
07 p1240 A70-19219

Impedance radiation pattern and actual height of receiving dipole antenna in magnetoactive plasma calculated by electrodynamic reciprocity theorem
08 p1472 A70-20970

Standing wave measurements on radiating traveling wave dipole arrays with glide symmetric excitation, showing multimode propagation and effect on log periodic balancing
09 p1633 A70-22688

Mutual coupling in arrays of log periodic dipole antennas in terms of impedance and admittance matrices
09 p1645 A70-22690

Square Van Atta reflector with/without conducting plate used for mounting antenna half wave dipoles, considering scattering cross sections
09 p1646 A70-22695

Vertical Hertzian doublet with large circular screen placed above earth, calculating radiation pattern, directive gain, efficiency and radiation resistance
09 p1637 A70-23152

Reactive portion of mutual impedance of arbitrary antennas calculated from radiation patterns by interpolation method
09 p1648 A70-23162

Radiation field of electric and magnetic dipole in double layer medium, solving Sommerfeld integrals
09 p1650 A70-23550

Superwideband dipole antenna array reproducing radiation patterns in horizontal plane for signal polarization
12 p2196 A70-27539

Input impedances of small vertical and horizontal dipole and loop antennas above conducting ground plane, noting effect of refractive index
12 p2196 A70-27714

Vertical tubular dipole antenna input admittance and current distribution above infinite dissipative half space
12 p2197 A70-27953

Log-periodic dipole /LPD/ antennas compressed along transmission-line axis, considering frequency dependent behavior in narrow bands and radiation pattern
12 p2198 A70-27955

Optimum scattering from linear array of half-wave dipoles at bistatic angle, employing coupled impedance loading network
12 p2198 A70-27958

Dipole and monopole antenna radiation patterns, considering effects of soil conductivity and elevation above ground
12 p2199 A70-27979

Cylindrical electric dipole antenna in magnetoactive ionospheric plasma, noting ion sheath effect on input impedance and active length
13 p2399 A70-29402

Infinitesimal dipole moving through hot uniform electron plasma in magnetic field, investigating asymptotic time behavior of plasma resonance
13 p2467 A70-29912

Radiation from electric dipole oriented normal to magnetostatic field in plasma column improving antenna transmission characteristic during reentry
13 p2467 A70-29913

Dipole antenna current distribution in ionized homogeneous anisotropic medium, using dielectric permittivity tensor
13 p2371 A70-29923

Javelin rocket measurements of ionospheric AC electromagnetic fields, determining amplitude/frequency spectra and dipole antenna performance
13 p2401 A70-29926

Double sphere dipole antenna detecting VLF electrostatic plasma waves, discussing induced and contact potentials
13 p2372 A70-29927

Synthesis of vertically polarized omnidirectional pattern with cascade dipole antennas on conducting cylinder
15 p2697 A70-31832

Medium wave thin cylindrical dipole antenna arrays design, discussing operating impedance determination
15 p2714 A70-32816

Dipole antenna arrays feeds design and performance for spherical aberration correction, discussing polarization mismatch
16 p2871 A70-32955

Backfire antennas allowing for mutual impedance between dipole elements, determining radiated field from surface current distribution
16 p2861 A70-32958

Current distribution on isolated thin cylindrical center-fed dipole antenna, calculating axial electric fields and radiating properties
16 p2861 A70-32964

Mutual impedance between coplanar skew dipoles with arbitrary lengths and terminal positions, noting convenience for computer programming
16 p2861 A70-32970

Nonuniform parallel element dipole array field patterns and synthesis by three term theory, taking into account current distribution effects
16 p2872 A70-32972

Dipole and loop antennas in isotropic compressible plasma under wave incidence, using reciprocity theorem for receiving voltages and maximum powers
16 p2957 A70-32982

Solid state dipole antenna array miniaturization by etching microstrip components on alumina substrate having high dielectric constant
16 p2876 A70-33409

Dipole antenna finite three dimensional array, calculating excitation patterns
17 p3042 A70-34589

Thin long dipole antenna, determining input admittances, current and charge distributions and field patterns by Wiener Hopf technique
17 p3051 A70-35060

Log periodic antennas, discussing dipole array and planar sheath spiral structures, base current and far field pattern calculations, etc
17 p3052 A70-35073

Boundary value problem of Hertizian dipole antenna in presence of conducting half space, analyzing lossy earth effects on input impedance and radiation pattern
17 p3044 A70-35074

Infinitesimal electric and magnetic dipoles embedded in lossy media, investigating earth effect on electromagnetic field
17 p3045 A70-35075

Center fed cylindrical half wavelength dipole antenna, computing radiation pattern by trigonometric expansion approximation for current distribution
19 p3388 A70-37869

Dipole antenna radiation in compressible anisotropic electron plasma overlying imperfectly conducting half space, solving for lunar environment
19 p3381 A70-38407

Dipole antenna radiation in compressible anisotropic electron plasma overlying imperfectly conducting half space, evaluating Fourier-Bessel integrals for lunar environment
19 p3381 A70-38408

Ionospheric plasma sheath effect around floating cylindrical high power dipole antenna, obtaining electron, ion and potential profiles
20 p3589 A70-40466

Two identical parallel arbitrarily located thin asymmetrical dipole antennas, calculating self and mutual admittances
21 p3800 A70-41945

Log periodic dipole antenna arrays, calculating HF performance and patterns in presence of ground
22 p3997 A70-43176

Infinite periodic phased array over ground plane with dipole elements in parallelogram lattice, calculating driving impedance and gain loss due to mismatch
23 p4172 A70-44004

Broadside-endfire array of cylindrical dipoles and monopoles driven by interconnecting transmission lines, calculating admittance and field patterns
23 p4176 A70-44955

Dipole antenna in compressible lossy plasma, calculating sheath and absorptive surface effects on current distribution from boundary value problem formulation
23 p4228 A70-44963

Skew arrays of coupled linear antennas, calculating planar and nonplanar configurations mutual admittance vs rotation angle between dipoles
23 p4166 A70-44969

Octave bandwidth unidirectional circularly polarized reflector antenna, using crossed conical dipoles near second resonance
23 p4176 A70-44970

Elevated horizontal and vertical electric dipole VLF fields, discussing ionospheric TE and TM mode coupling, nighttime variations and amplitude fluctuations
24 p4314 A70-46131

DIPOLE MOMENTS

NT ELECTRIC MOMENTS

NT MAGNETIC MOMENTS

Molecular hydrogen Lyman bands radiative transition probabilities, using electronic dipole moment functions
02 p0344 A70-12659

Molecular dipole moments-electric field interaction induction of cholesteric liquid crystal transition to nematic phase
07 p1225 A70-20053

Heart dipole moment calculation error due to deletion of individual electrode contributions to surface potential map, analyzing multielectrode grids
08 p1453 A70-21753

Power spectrum of light scattered by two level atom driven by monochromatic electric field obtained from atomic dipole moment correlation function
10 p1920 A70-24632

Geomagnetic dipole field disturbances by trapped particles, calculating self consistent equilibrium configuration for ring current dipole moments
15 p2727 A70-31905

Plasma velocity and moment equations in magnetic dipole field as function of variations along coordinate directions
16 p2956 A70-32934

Elastic materials consisting of particles with rotary inertia, long range force and dipole interactions, deriving constitutive relations
19 p3538 A70-37794

DIPOLARS

Dipole shielding tensor of atom in arbitrary time dependent field, giving conditions for general variational calculations yielding results
04 p0721 A70-14389

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials
07 p1266 A70-19442

Spherical harmonic coefficients of eccentric dipole potential and coinciding magnetic and mass center, noting geophysical prospecting applicability
11 p2047 A70-26571

Plasma resonance excitation by small pulsed dipole in weakly inhomogeneous plasma determined using WKB solutions and stationary phase approximations
12 p2277 A70-27188

Alouette plasma resonance stimulated perpendicularly to magnetic field by planar dipole charge sheet and permeable grids
13 p2467 A70-29907

Geomagnetic field variations represented by optimal electric current loops or dipoles, noting advantages over spherical polynomials
18 p3249 A70-36916

Computer program transforming spherical harmonic coefficients into arbitrarily tilted coordinate systems, tabulating coefficients of International Geomagnetic Reference Field 1965 in dipole coordinate system
20 p3621 A70-39353

Plane electromagnetic waves diffraction on thin filaments cloud/passive dipoles/, discussing field fluctuations and mean power
20 p3588 A70-40298

Mutual impedance of interacting dipoles at wedge tip, determining errors for short spacing distances
21 p3796 A70-40638

DIRECT CURRENT

Potential created by DC point source in ionosphere at high and medium geomagnetic latitudes, taking into account electrical conductivity anisotropy and altitude variation
01 p0080 A70-11225

Hall generator DC brushless motor operation and applications, obtaining motor action by rotor and stator magnetic fields interaction
02 p0228 A70-12053

Brushless DC motors speed regulation with electronic commutators, discussing photoelectronic, magnetic sensing and magnetic-coil commutation
02 p0229 A70-12616

Longitudinal pressure gradient measurement for DC discharges in He, Ne and Ar, investigating effects of gas purity, tube geometry, etc
04 p0671 A70-14995

Digital microcircuits for one kva three phase DC-AC inverter control to generate sinusoidal 400 Hz output using HF bridge chopper techniques
04 p0628 A70-15340

DC electric arc with superimposed axial subsonic gas flow breakdown voltage and anode heat transfer using high speed photography
06 p1177 A70-17697

Colloid engine efficiency operating with pulsed positive voltages and square wave and sinusoidal voltages
06 p1132 A70-18158

[AIAA PAPER 70-178] AC to DC converter design for transforming average AC values into DC voltage
08 p1438 A70-20601

Static power processing efficiency illustrated by application to DC to DC converters
08 p1439 A70-20704

Plasma finite DC resistivity quantum theory, considering electron-molecule collisions energy absorption, noise generation, etc
08 p1551 A70-21099

Signal converter for centimeter band-DC voltage transformation, noting applications to microwave power measurement by digital computers
09 p1650 A70-23629

DC capacitance measurement based on capacitor discharge using auto-oscillatory macrocharge system variant as transducer of measured capacitance, time constant and insulation resistance
11 p1982 A70-25576

He-Ne optical laser CW operation under DC excitation, considering output power, discharge current, total pressure, mixture ratio, etc
11 p2062 A70-25827

Brushless DC motor with rotor position sensor and transistor commutator for armature current switching, describing design and operation
12 p2165 A70-27525

DC signals measurement in automatic control circuits, ensuring transformer isolation by use of transistorized amplifier
12 p2196 A70-27682

Electromagnetic wave penetration in plasma under uniform DC magnetic field, considering wave propagational direction and electric field
12 p2279 A70-27781

Magnetically constrained steady state plasma production by hot cathode DC arc discharge in He
13 p2465 A70-29819

Ionospheric DC electric fields long period oscillations at high latitudes observed by polar orbiting Injun 5 satellite
13 p2403 A70-30081

SCAMP 3 program for calculation of electronic circuit DC performances statistical distribution as function of component parameters variations
14 p2560 A70-30666

Ripple filters for DC power supplies using reliable small capacitance capacitors suitable for spacecraft applications
15 p2714 A70-32806

High voltage DC electric power systems design for aircraft, considering filtering, transmission and loads interaction
16 p2844 A70-33475

Helium plasma ionization rate in positive column with DC discharge, considering gas pressure, electron density, electric field strength and plasma radius
19 p3476 A70-37559

Stationary DC discharge positive column in helium, determining production balance and loss of charge carriers
19 p3476 A70-37560

Satellite electrometer for weak DC currents due to charged particle flux
19 p3428 A70-38485

Brushless DC motor types and sources, describing electronic commutation, AC inverter and limited rotation torque
20 p3564 A70-39725

Modular DC to DC switching mode converter for space power system
21 p3758 A70-41217

Thin titania films electrical breakdown under high DC fields in high vacuum, suggesting reduction to lower order semiconducting oxide
22 p4085 A70-42621

Space DC electric field measurement by quadrupole probe, discussing geomagnetic field and contact potential effects
22 p4029 A70-42792

DC-to-DC converter design to supply different isolated voltages from single input
23 p4142 A70-43875

Fluidic networks nonlinear component AC and DC behavior, discussing Bernoulli equation, nonlinear resistances, transmission lines and various flows
23 p4142 A70-44296

External DC electric field effect on microwave absorption in plasma
23 p4226 A70-44372

DIRECT POWER GENERATORS

NT ALKALINE BATTERIES

NT DRY CELLS

NT ELECTROSTATIC GENERATORS

NT FUEL CELLS

NT HYDROGEN OXYGEN FUEL CELLS

NT MAGNESIUM CELLS

NT MAGNETOHYDRODYNAMIC GENERATORS

NT METAL AIR BATTERIES

NT REGENERATIVE FUEL CELLS

NT SNAP 19

NT SNAP 27

NT SOLAR CELLS

NT THERMIONIC CONVERTERS

NT THERMOELECTRIC GENERATORS

Conducted interference on input power lines of AC to DC power supplies with diode rectification and smoothing capacitors predicted by Fourier analysis
01 p0049 A70-10089

High temperature solar energy converter cavity absorbers geometry, considering absorption parameters of radiation reflected by concentrator
01 p0010 A70-10761

Energy converters and radio transmitters for physiological telemetry, using electric power converted from thermal and mechanical energy of human respiratory activity
04 p0644 A70-15276

Static power processing efficiency illustrated by application to DC to DC converters
08 p1439 A70-20704

DC to DC switching power processor design considerations for avoiding system failures
08 p1439 A70-20705

Operation mode for full-bridge programmed waveform static inverter permitting saturation of power transistors in DC power conversion
08 p1439 A70-20707

Electrostatic energy converter load current analysis, deriving expression for space charge electric field with axially varying or constant charge distribution
10 p1808 A70-25036

Electrostatic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures
12 p2165 A70-27330

Electrostatic generator with spatial charge neutralization for direct thermal-to-electrical energy conversion at high gas pressures
21 p3760 A70-42071

Book on batteries and energy systems covering theoretical concepts, construction, operation principles, characteristics and applications of various types of primary and secondary cells
22 p3964 A70-42454

DIRECTION FINDERS [RADIO]

Satellite tracking antennas servo design including adaptive and compensation methods and digital computer applications

Design methods for self steerable antenna arrays in unidirectional and two directional radio links

Rapid fading intensity distribution formula for analysis of aperture phase and amplitude errors influence on antenna arrays directional characteristics

High gain antenna for 1973 Mars Soft Lander data transmission using sensors and digital computer to achieve autonomous precision pointing to earth [AAS PAPER 69-578]

Asymmetrical and symmetrical directional couplers coupling characteristics during linear and exponential variations of coupling coefficient

Shell directional antennas operational behavior at 2 and 4 GHz and mechanical properties

Radiation patterns of scanning antenna using digital phase shifters to obtain suitable phase distribution to move sidelobes into invisible region

Deep reflector antennas mode composition by graphic computer techniques for maximum efficiency feed matches

High gain paraboloidal reflector antenna with horn feed for satellite and terrestrial microwave links

Paraboloidal- and spherical-reflector antennas efficiency optimization obtained from optimum combination of amplitude and phase of hybrid modes propagating in guide

Optimal linear antenna synthesis, determining current distribution resulting in specified radiation pattern for superdirective antennas

Current distribution determination necessary for given directional characteristic of antennas in non-linear synthesis problem

Antenna pattern synthesis with circular distributed current source, analyzing directivity characteristics through Fourier series nth order mode concept

Nonlinear synthesis for direction-finding plane antenna aperture

Materials/design optimization of antenna-aiming mechanism deployed on moon by Apollo 12 astronauts to transmit ALSEP experiments data to earth stations

Linearly tapered zigzag antenna of constant pitch angle observed for radiation and impedance characteristics

Radiation characteristics of horn antennas loaded with curved transverse dielectric slabs and radial dielectric strips, discussing axial directivity and half-power beamwidth

Microwave axicon with dielectric cone at aperture of focused antenna to reduce far-field radiation pattern beamwidth

Electronically tracking antenna system for satellite reception in VHF range suitable for unmanned receiving stations

Real time computer algorithm for achieving optimal position of tracking antenna with nonlinear control system

Superdirective small linear antennas computer aided design using Fourier integral and transform techniques

Automatic tracking antenna aiming errors, discussing remedies, design, motion compensation and mechanical resonance damping

Receiver for artificial satellite transmission and optical tracking time signals, using crossed dipole directional antenna

Reflector antennas analysis, design principles and uses, with emphasis on paraboloidal and spherical reflecting surface types

Traveling wave antennas, analyzing modal characteristics of various waveguiding structures

Leaky wave antennas, deriving radiation field distribution in terms of power leakage from interior by Sommerfeld integral and Kirchhoff-Huygens integration

Surface wave antennas, operated on guided wave mode parallel to interface and with radiation at discontinuities, calculating excitation and radiation characteristics

Digital computer controlled positioning of telemetry antennas for tracking spacecraft

Highly directive radio telescope antenna parameters in near zone, using focusing at minimum distance

Statistical directivity, radiation pattern, drift and dispersion of segmented traveling wave antennas

Linear and circular apertures sum and difference radiation patterns for minimum sidelobe power

S band telemetry antenna with electronic tracking and polarity diversity for remote location missile testing

Millimeter wave reflector antennas, considering various system designs, performance, pointing capabilities, limitations and applications

Uniformly and nonuniformly spaced microwave antenna arrays, investigating directivity function and gain characteristics dependence on spacing

Unidirectional tear drop radiation Archimedean spiral broad band frequency independent antenna using printed circuit with cavity

Directional microwave transmitter for 300 frequency division multiplexed telephone channels, discussing transmission quality, reliability, design and operation

Monopulse tracking antenna beam broadening by feed displacement defocusing in parabolic reflector

Octave bandwidth unidirectional circularly polarized reflector antenna, using crossed conical dipoles near second resonance

Feed voltages and directional gain maximization for loaded long thin-wire antennas with multiple excitations, using matrix methods

Nonlinear synthesis for direction-finding plane antenna aperture

Dual channel circularly polarized feed of monopulse tracking antenna system, noting axial ratio and gain and open loop mode autotragging

DIRECTIONAL CONTROL

NT THRUST VECTOR CONTROL

Gyrotheodolites application to azimuth determination, discussing use for directional control, photogrammetry in geodetic measurements, etc

Automatic aiming system for laser range finders using directional information carried by light beam transmission

Coherent light beams scanning and propagation direction control by acoustooptical method for laser applications

Laser beam deflection techniques for directional control of laser beams, noting applications to optical computer memories and active imaging and display devices

North-finding gyroscope applicability for directional gyros and stabilized platforms

Solid body control moments ensuring braking from rotational motion, finite orientation and angular velocity under minimum energy constraint

Antenna system with linear polarization direction electronically changeable in microsecond

Main rotor wake adverse effects on tail rotor directional control in low velocity wind

Light beam direction variation by crystal deflectors, examining changing internal reflection angle by applied electric field or mechanical stress

DIRECTIONAL STABILITY

NT GYROSCOPIC STABILITY

Probability theory for gimbal errors in directional gyroscopes under irregular rocking, using linearization of functions of random arguments

Pitch angle anisotropy instabilities of electromagnetic waves in space, discussing warm plasma, solar wind and Van Allen belts

Optimal and suboptimal aircraft lateral directional stability augmentation applying optimal control and model-following techniques

Opposing mode interaction effect on ring laser unidirectional emission instability, discussing homogeneous and inhomogeneous line broadening

Hovercraft wind directional stability and control by cam operated fin-tab assembly

Turbulence effects on lateral directional flying qualities, examining pilot task performance, control workload and compensatory behavior [AIAA PAPER 70-998]

Directional solar thermal field/sunlight effect on coupled nonplanar transverse and torsional vibrations of satellite cylindrical antennas in orbit

Manual attitude control for Lunar Module employing directional stability, coordinated turn and attitude command

DIRECTIVITY

Directional transponders for telemetry command, tracking and communications in retrodirective communication satellites

Directivity characteristics of planar antenna arrays with discrete identical elements and uniform phase progression

Uniformly and nonuniformly spaced microwave antenna arrays, investigating directivity function and gain characteristics dependence on spacing

Short cylindrical microwave antenna radiation directivity enhancement by optimum double impedance loading

EM radiation beams higher directivity from sources in two layer plasma in planetary atmosphere

DIRECTORIES

U INDEXES [DOCUMENTATION]

DIRECTORS [ANTENNA ELEMENTS]

Electronic narrow sweep antenna array active element number reduction, discussing optical considerations

Pencil beam synthesis for large circular array with arbitrary number of directive elements, determining optimum excitations

DIRICHLET PROBLEM

Algorithm for solving Dirichlet problem of nonlinear elliptical differential equations representing atmospheric dynamics balance equation

Dirichlet problem of biharmonic operator in boundary region containing infinite number of pieces

Cauchy-Dirichlet problem for linear inhomogeneous polycaloric/polyparabolic equation with constant coefficients under certain boundary conditions

Second order elliptic differential equations solution involving Dirichlet problem reduced to equivalent singular integral equations

Thin airfoil theory, discussing harmonic Dirichlet problem for complex plane

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution

Scalar plane wave LF scattering by prolate spheroid of revolution, obtaining iterative solution for Dirichlet problem

Diffraction on strip, investigating for Dirichlet boundary conditions, deriving excited current density and scattered pattern

Dirichlet problem for elliptic linear system of partial differential equations with constant first order coefficients

Geomagnetic field upward calculation in lower ionosphere, discussing accurate data acquisition difficulties in Dirichlet problem solution

Dirichlet problem for Tricomi equation emphasizing gap in boundary data

Cauchy-Dirichlet type mixed problems for hyperbolic equations in cylindrical domain, using Zygmund-Calderson approximate calculus

23 p4210 A70-43978
23 p4211 A70-44239

DIRIGIBLES

U AIRSHIPS

DISARMAMENT

Soviet SS-9 ICBM role in international debates over antiballistic missile, multiple independently targeted reentry vehicles, superhard silos and offensive forces

04 p0760 A70-14501

DISCHARGE COEFFICIENT

Statistical model equations to predict discharge coefficients for concentric orifice plates as function of line size, diameter ratio and Reynolds number [ASME PAPER 69-WA/FM-6] 04 p0667 A70-14837
Contraction coefficients for compressible discharge through axisymmetric sharp edged orifice, obtaining approximate analytical expression based on one dimensional theory

13 p2389 A70-29549
15 p2721 A70-32137

Rarefied gas mixtures efflux from opening at various pressures, calculating component discharge coefficients for molecular flow conditions

Transonic flow in convergent and convergent-divergent conical nozzles with nonuniform inlet predicted by time dependent flow equations, discussing discharge and thrust coefficients [AIAA PAPER 70-635] 16 p2834 A70-33548
Conical convergent nozzles discharge coefficient for varying pressure ratios 19 p3352 A70-38243

DISCHARGE TUBES

U GAS DISCHARGE TUBES

DISCHARGERS

NT STATIC DISCHARGERS

DISCOLORATION

Cotton leaves ammonia induced discoloration spectrophotometric examination, discussing light reflectance, transmittance and absorbance 22 p4014 A70-42771

DISCONTINUITY

NT SHOCK DISCONTINUITY

Geographically smoothed geomagnetic cut-offs for eliminating discontinuity in neutron monitor latitude variation in Mexico City vicinity 01 p0167 A70-10229

Particle trajectory and associated wave determined for nonclassical trajectory problem from nonprobabilistic point of view, discussing discontinuity arising from unbounded velocities 01 p0142 A70-10657

Dynamic stress concentration factor in strut containing symmetrically located elliptical discontinuity, using photoelastic technique with modulated ruby laser light source 02 p0388 A70-12495

Solar wind discontinuity surfaces observed by spacecraft magnetometers determined from measured time delays and solar wind speed 03 p0558 A70-13600

Two dimensional wave diffraction problems involving discontinuity line, analyzing instability behavior of geometrically induced singularities by applying integral transform on Helmholtz equations 03 p0525 A70-14199

Tangential solar wind discontinuity observed by Vela 2A satellite, producing ground magnetic disturbances conjunctively with magnetospheric, ground and ionospheric currents 05 p0903 A70-16727

Irreversible radiative energy transfer effect on stability of flow with two dimensional stationary infinite contact discontinuity 09 p1731 A70-22431

Discontinuous weak solutions of differential equations of gas dynamics as limits in topology of functions 10 p1866 A70-24109

Gasdynamic flows strong and weak density discontinuity surfaces determination, using shadowgraphs and interference patterns 12 p2238 A70-28248

Stationary hydrodynamic equations of gas channel and nozzle flow with inlet tangential discontinuities 16 p2833 A70-33247

Initial condition sensitivity functions in bang-bang and optimal control, considering discontinuous functions, perturbation equations, iteration algorithms terminal states, cost functions, etc 16 p2885 A70-33325

Elastic wave with discontinuities propagation, calculating decay velocities and stresses at leading wave front by theory of characteristics 17 p3189 A70-35436

F region small scale ionization discontinuities parameters observational data concerning anisotropy, dimensions, velocity and lifetime 18 p3246 A70-36088

Cu-Ni diffusion couples voids and edges effect on concentration gradients measurement by electron probe microanalysis 22 p4054 A70-42740

Wave front arbitrary curvature, examining integration of weak discontinuities growth equation in quasi-linear hyperbolic system 22 p4062 A70-42953

DISCOVERING

U EXPLORATION

DISCRETE FUNCTIONS

Radiative transfer in plane parallel atmospheres computed by discrete space techniques based on invariance concept for application to planetary atmospheres 02 p0338 A70-11825

Discrete statistical stellar system relation existence with continuous model proved by introducing unique volume concept for discrete systems 02 p0376 A70-12443

Discrete space theory for radiative transfer in one dimensional scattering media of arbitrary constitution 02 p0340 A70-12642

Discrete spectrum of fourth order differential operator estimating number of eigenvalues in bounded interval of real line 06 p1094 A70-17740

Primal and dual algorithms for discrete optimal control incorporating antijamming procedures 07 p1245 A70-19271

Dynamic discrete systems unsteady motions stability, formulating theorem for finite characteristic numbers existence 08 p1543 A70-20493

Discrete process max-min problem, using dynamic programming to obtain upper and lower bounds 08 p1533 A70-20604

One dimensional discrete time nonlinear filters synthesis using Bayes theorem and digital techniques 09 p1654 A70-22934

Continuous media geometry with given discrete structure reduced to analyzing relations between functions in denumerable set of points, presenting selected points of subregions 10 p1954 A70-24016

Discrete calculus of variations for optimal control involving use of discrete time sequence and functionals 10 p1910 A70-24702

Random fields entropy estimation technique taking into account higher than immediately adjacent spatial dependencies 12 p2192 A70-27771

Discretized linear theory of arbitrary shell forms 13 p2513 A70-29151

Discrete time systems, deriving algorithm for testing decomposition property as necessary condition for linearity 13 p2375 A70-29939

Soviet papers on discrete control systems covering linearity, nonlinearity and applications 18 p3233 A70-36068

Spectral densities of input and output signals of discretely continuous systems as function of comparison moment 18 p3233 A70-36069

Nonlinear stochastic discrete time processes prediction and filtering by Monte Carlo techniques 18 p3234 A70-36338

Linear multistep algorithms in discretization of nonlinear initial value problems of ordinary differential equations 18 p3283 A70-36366

Discrete signals synthesis optimal with respect to given criterion, determining ambiguity function extremum 19 p3374 A70-37270

Nonlinear discrete uniform approximation of real valued functions by gradient method 19 p3459 A70-38677

Information transmission techniques by discrete amplitudes and increments, comparing effectiveness for noise rejection 22 p3986 A70-42495

Maximum principle for discrete systems of recurrence equations, applying Pontryagin principle 22 p4073 A70-42696

Nonlinear automatic optimal control for discrete system with delay 22 p4005 A70-43563

DISCRIMINATION

NT BRIGHTNESS DISCRIMINATION

NT SENSORY DISCRIMINATION

NT TACTILE DISCRIMINATION

NT VISUAL DISCRIMINATION

Retroactive and proactive inhibition in verbal discrimination learning, using paradigms characteristic of paired-associate retention studies 03 p0435 A70-13768

Age discrimination in employment policies of air carriers, discussing legislative measures, hiring practices and retirement rules concerning stewardesses and FAA pilots 12 p2336 A70-27772

DISCRIMINATORS

NT FRAUNHOFER LINE DISCRIMINATORS

Wide range pulse height discriminator with milliwatt power drain for use in nuclear experiments on scientific satellites 01 p0088 A70-10749

Unsaturable frequency discriminator influence in semiconductor laser feedback loop on laser emission spectrum 08 p1514 A70-21821

Static error of varactor-controlled tuning-locked discriminator using computer 09 p1638 A70-23323

Probability density function of click duration in FM discriminator 11 p2018 A70-26270

FM limiter-discriminator followed with ideal band-pass filter, deriving output signal to noise ratio 14 p2558 A70-31189

Wideband PCM/FM discriminator detection, predicting effects of predetection and postdetection filtering on system performance 14 p2558 A70-31192

Asymmetrical transient attenuation effects of bridge circuit phase discriminator on accuracy of phase difference measurements 15 p2707 A70-31508

Transfer properties of scanning phase discriminator with intermediate storage, explaining sampling method and sample-hold-sample circuit 15 p2714 A70-32672

Frequency discrimination circuits for multiple remote control receiver systems with high harmonic noise levels 18 p3235 A70-36428

Automatic calibration verification of subcarrier telemetry discriminators with selective channel readjustment 19 p3383 A70-37902

Frequency discriminators output voltages under action of fluctuating signal and noise with arbitrary energy spectrum 20 p3584 A70-39254

Threshold output characteristic of FM signals, generalizing Gaussian baseband modulation solution to obtain autocorrelation function of output signal plus FM discriminator noise 24 p4313 A70-46063

NT TOXIC DISEASES

NT TUMORS

Aerial color IR photography for crop disease identification by tonal and geographic patterns, discussing cameras, films, filters and exposure procedures 05 p0837 A70-16144

Flying disability period due to coccidioidomycosis in southwestern U.S., giving recommendations for earlier return to flying duty 06 p1000 A70-17300

Stomatologic diseases during prolonged space flights simulation, discussing gingivitis, stomatitis, dental caries, parodontitis and odontogenous inflammations 13 p2352 A70-29338

Long rhythms of periodic disparate heritable diseases in man 19 p3365 A70-38414

DISHES

U PARABOLIC REFLECTORS

DISINTEGRATION

Disintegration of charged distilled water jets, discussing drops size, velocity distribution and instabilities 03 p0467 A70-13781

DISKS

Monograph on integral calculation method for disk problems with mixed boundary conditions covering two dimensional stress-strain state, extrapolation methods, etc 11 p2140 A70-26474

Book on thermoelasticity covering thermal stresses in disks, plates, shells and bodies of revolution under steady and unsteady temperature fields 19 p3541 A70-37974

DISKS [SHAPES]

NT ACTUATOR DISKS

NT ROTATING DISKS

Laser beam technique applied to thermal shock testing of metal disks, using solid state laser, compared to predicted results

01 p0113 A70-11058

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

03 p0588 A70-13242

Disk stress concentrations calculation beyond elastic limits taking into account effect on bearing capacity

04 p0775 A70-15261

Forced torsional vibration of elastic stratum produced by rigid circular disk approximated by Fredholm equations

04 p0777 A70-15497

Unsteady temperature field of uniformly thick disk for inhomogeneous boundary conditions and small Fourier numbers solved by Laplace operation

05 p0958 A70-17013

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

08 p1580 A70-21657

Stress distribution in anisotropic disk shaped into wedge loaded at vertex by concentrated moment determined by complex potentials method

10 p1956 A70-24084

Steel conical disks two dimensional stressed state determined with deformations at elastic and elastoplastic strains using digital computers

10 p1956 A70-24242

Dynamic stresses, temperature and displacements fields in thin circular disk under transient heat sources, considering mechanical resonance vibration

10 p1958 A70-24518

Nonaxisymmetric free oscillations of self gravitating disk reduced to eigenvalue problem to investigate galactic spiral structures

10 p1917 A70-25207

Gasdynamic test stand analyzing elastoplastic strains in aircraft gas turbine disks and liquid-propellant rocket engines turbopumps under alternating nonisothermal loads

10 p1862 A70-25298

Pinhole expansion in anisotropic plastic disks determined by obtaining solutions for Tresca and Mises yield functions, assuming plane stressed state

11 p2138 A70-26171

Electromagnetic waves diffraction and scattering from acoustically soft and hard and perfectly conducting disks in plane or arbitrary incidence directions

15 p2701 A70-32414

Plane wave incident on oblate spheroid or disk, deriving LF field scattering

18 p3335 A70-35974

Anisotropic disk compressed by isotropic ring of smaller radius, considering elastic equilibrium

18 p3336 A70-36134

Turbine disk strength calculations, obtaining matrix expressions and optimum algorithm for arbitrary disk shapes

19 p3548 A70-38460

Boundary value problems in potential theory for electrical disk and spherical cap reduced to problems for two dimensional Laplace equation

20 p3657 A70-39446

Disk equations to determine tensions around arbitrary hole or stiffening contours

20 p3720 A70-39623

Incompressible Newtonian fluid laminar radial flow between parallel stationary disks, obtaining integral solution for Navier-Stokes equation

22 p4007 A70-42302

Radiation patterns and scattering cross sections of plane black disks excited by electromagnetic and acoustic waves

22 p3984 A70-42391

Comparative load capacity of disk models of natural gas blowers of different designs under plastic strain

23 p4232 A70-43941

DISLOCATIONS [MATERIALS]

NT CRYSTAL DISLOCATIONS

NT EDGE DISLOCATIONS

NT SCREW DISLOCATIONS

Dislocation climb theories of creep and superplasticity derived, postulating strain hardening and recovery processes with independently determined rates

02 p0317 A70-12315

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands

03 p0588 A70-13248

Fatigue crack incremental propagation under cyclic shear loading, developing discrete dislocation model for crack and plastic zones

[ASME PAPER 69-WA/APM-7] 04 p0772 A70-14919

Planar dislocation array in displacement dependent stress field, investigating tip stress intensification regarding crack nucleation

05 p0932 A70-16170

Field theory of moving dislocations in Cosserat continuum considered incomplete regarding constitutive equations, basing analysis on Mie-developed mathematical analogy to electrodynamics

07 p1334 A70-19564

Static and shock kink bands in biotite deformed by metamorphism, meteorite impact, nuclear explosion and laboratory experiments

09 p1665 A70-22053

Dislocations maximal concentration during metal fatigue

10 p1955 A70-24081

Metallic materials damage accumulation and structural failures due to fatigue, considering surface changes, crack initiation and dislocation pattern

15 p2757 A70-31928

Solid state mechanics of deformable media, surveying development trends with emphasis on rheology and dislocation theory

15 p2818 A70-32176

Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc

17 p1383 A70-34603

Imperfect solid deformation, presenting formalism for elastic theory nonlinear aspects of continuous distributions of dislocations and point defects

17 p3190 A70-35456

Orowan stress calculation, discussing line tension, screw or edge character, spatial distribution and yield strength

17 p3191 A70-35457

Soft metal and dilute alloy dynamic yielding, describing high dislocation mobility effects on mechanical properties

17 p3191 A70-35459

Inhomogeneous deformation measurements in stress concentration zones using differential rasters in direction of distance between moire bands

19 p3548 A70-38466

Elastoplastic work hardening continua incremental boundary value problem with allowance for distributed dislocations, using quadratic programming concepts

19 p3549 A70-38667

Al-Zn-Mg alloys structural transformations by diffraction electron microscopy, investigating grain boundary and dislocation structure as function of heat treatment and chemical composition

20 p3646 A70-39044

Duraluminum dislocation structure dependence on deformation temperature by electron microscopy, discussing subgrain boundaries

20 p3646 A70-39045

Dislocation network recovery kinetics of cold worked undoped powder metallurgical W wires by electrical resistivity measurements, determining activation energy

21 p3839 A70-40797

Maraging steels hardening mechanisms, discussing dislocations density and distribution and Ni, Mo and Co additives effects

23 p4208 A70-44919

Plastic deformation dislocation motion and incompatibility relationship, describing strain rate, velocity and stresses

24 p4420 A70-45229

DISORDERS

Carbohydrate metabolism disorders in head injury cases, comparing incidence with EEG abnormalities

10 p1810 A70-24037

DISORIENTATION

Spatial disorientation of human subjects in centrifuge, examining otolith role in reorientation and eye sensory mechanisms

22 p3976 A70-43707

DISPERSING

Temperature limit of efficiency threshold for ground based liquid propane sprayer for supercooled fog dispersal at Orly airport

02 p0324 A70-11872

Wastes dispersion discharged into sea analyzed by aerial photography, measuring diffusion

10 p1879 A70-24749

Polarized light scattering angle relationship with Mueller matrix elements for polydisperse systems of irregular randomly oriented particles

15 p2775 A70-32040

DISPERSION

Single dispersion statistical analysis by simultaneous parameters tolerances application

03 p0518 A70-12937

Dispersion and correlation function for atmospheric transparency due to water vapor, from statistical model of absorption bands and effective mass

06 p1053 A70-17204

Dispersion function and measured line profile distortion by rectangular detector slit of order scanning Fabry-Perot spectrometer

06 p1063 A70-17622

Dispersion equation harmonic analysis for three dimensional periodic structure

09 p1637 A70-23156

Dispersion function model based on mixed second order kinetics with distributed relaxation times

11 p2086 A70-25831

Dispersion/peak broadening in gel chromatography measured with nonporous and porous column packings, suggesting diffusion controlled separation with linear permeation isotherm

12 p2181 A70-27474

Dispersion relations for linearized Grad equations of three dimensional rarefied gas dynamics, including nonequilibrium pressure term for bulk viscosity

12 p2210 A70-27520

Radiant dispersion, position, areas and orbital axis in meteor showers by double-station photographic observations, noting Apollo group detection

21 p3884 A70-40875

Dispersion relations for linearized Grad equations of three dimensional rarefied gas dynamics, including nonequilibrium pressure term for bulk viscosity

21 p3807 A70-41168

Convergent numerical method for principal value integrals in dispersion relations of coupled channel scattering problem involving wave phase shifts

22 p4062 A70-42748

Isotopic decay rates, solving time dependent atmospheric turbulent dispersion from steady state measurements

22 p4093 A70-42915

Unguided rockets dispersion firing pattern and accuracy, discussing aerodynamic forces and ballistic coefficients

22 p4110 A70-43156

Sounding rockets dispersion, considering deviations from predicted point of impact due to wind effects, thrust vector errors and manufacturing inaccuracies

23 p4262 A70-44845

Natural dispersion effect on bandwidth of glass fiber transmission line using optical glasses

24 p4319 A70-46079

Gel permeation chromatography peak broadening, discussing liquid dispersion factors and column efficiency

24 p4310 A70-46349

DISPERSION PRECIPITATION HARDENING

U PRECIPITATION HARDENING

DISPERSIONS

NT AEROSOLS

NT COLLOIDAL PROPELLANTS

NT COLLOIDS

NT EMULSIONS

NT FOG

NT LIQUID-GAS MIXTURES

NT NUCLEAR EMULSIONS

NT PHOTOGRAPHIC EMULSIONS

NT PLASTISOLS

NT SMOKE

Reworking of deep-sea sediments as indicated by vertical dispersion of Australasian and Ivory Coast microtektite horizons, implying years of deposition

01 p0178 A70-10474

Surface interactions in incompressible dynamics and stability of ferrofluid with nonlinear magnetization properties

04 p0665 A70-14451

Vibration spectra, kinetic and dispersion equations of solid spherical particles moving in incompressible weakly viscous liquid

13 p2388 A70-29368

DISPLACEMENT

Normal and tangential displacements distribution at surface and along cross section of bar with free boundaries computed for symmetric and antisymmetric oscillations

02 p0301 A70-12484

Integral formulas of thermoelasticity theory for calculating displacements and rotations caused by temperature field action in micropolar Cosserat and Hooke media

02 p0391 A70-12817

Nozzle boundary layer displacement thickness at Mach 30-70 in helium using Langley hotshot tunnel tests

04 p0675 A70-15603

Dynamics theory of displacement on basis of equations of motion solution by stress functions

05 p0931 A70-16133

Shear stress in thick cylindrical closed shells subjected to plastic torsion determined from displacement distribution over thickness and generatrix

08 p1588 A70-21182

Stress and displacement distribution formulas for two and three dimensional crack extension problems in linear viscoelastic body

09 p1775 A70-22611

Linearly exact displacement and strain variations in transverse coordinate within shell structure

09 p1781 A70-23233

Stresses and displacements determinations in spherical shells under concentrated loads, considering transverse shear deformation effect

11 p2139 A70-26347

Semiinfinite composite medium displacement caused by nucleus of torsional strain with axis perpendicular to constituent isotropic layers interfaces

12 p2321 A70-27159

Indentation pressures in rigid perfectly plastic solids correlated with ratio between indenter strain and material yield strain for various indenter geometries

12 p2322 A70-27232

Iteration solution for three dimensional equations of equilibrium of elastic body in boundary displacements, discussing convergence rate and computer applications

12 p2272 A70-27553

Stressed state of infinite plate with circular hole induced by displacement discontinuity in form of cracks

13 p2514 A70-29292

Vector displacement numerical calculations for rectangular parallelepipeds of infinite and finite lengths

15 p2767 A70-32018

Shallow shells displacement theory, representing solution in terms of analytical functions

15 p2817 A70-32160

Small displacements in noncircular cylindrical shells under various loads

16 p2987 A70-32992

Displacements and stresses in freely vibrating aeolotropic deep spherical shells, including effects of shear deformation, rotary inertia and transverse normal strain

16 p2993 A70-34091

Solutions for normal and tangential displacements and concentrated forces on shallow cylindrical shells

17 p3186 A70-34969

German monograph on stress and displacement in plane elastic circular rings, disk strips and wedges, considering single load distributions

17 p3189 A70-35370

Shell theory for shear deformations in covariant notation involving displacement power series expansion

18 p3337 A70-36371

Pressurized shells of revolution loaded axisymmetrically, formulating equations for calculation of displacements, forces and stresses

18 p3338 A70-36406

Discrete element stress and displacement analysis of elastoplastic plates

18 p3342 A70-36686

Flexural vibrations of laminated composite plates, maintaining continuity of displacements and surface tractions at interfaces between reinforcing layers and composite matrix

19 p3537 A70-37790

Infinite linearly elastic solid response with random variations in material elastic properties, obtaining average energy in displacement field by method of moments

19 p3538 A70-37796

Stress and displacement within internally pressurized composite cylinders having continuous fiber reinforcement in circumferential direction, using finite element method

19 p3538 A70-37797

Electric dipole displacement of heart estimation by supplementing orthogonal with precordial lead, discussing stationary and moving point dipole hypotheses

19 p3369 A70-38209

Sandwich panels geometrically and physically nonlinear theory, obtaining equations of motion and boundary conditions consistent with strain displacement relations

19 p3547 A70-38360

Elastoplastic continua incremental solution for large displacements and small strains, determining sufficient condition of uniqueness

19 p3549 A70-38666

Compressible boundary layer equations with second order surface curvature and displacement effects

21 p3809 A70-41751

Displacement effect of hot-wire anemometric probes near wall as function of support orientation

22 p4038 A70-43241

Composite laminates under uniform axial strain, determining interlaminar stresses and displacements by finite difference techniques

22 p4060 A70-43684

Three dimensional elasticity for figures close to ellipsoid of revolution with displacements on boundary

23 p4266 A70-43988

DISPLACEMENT MEASUREMENT

Elastic sensor for measuring linear displacements using fine crossed filaments and torsion principle

03 p0485 A70-13482

Simple harmonic oscillator vibrations due to local random processes in spacecraft launching, calculating oscillator displacement variance

04 p0774 A70-15102

Beam fluctuations damping in beam waveguide, determining fluctuations cause as random displacement of lenses

04 p0651 A70-15290

Saint Venant torsion problem using finite element method, establishing direct matrix relation between forces and displacements

04 p0778 A70-15527

Stereophotogrammetric measurement for dynamic deformation of circular membrane subjected to underwater detonation

05 p0927 A70-16009

Displacement measurement using single reflecting phase grating

06 p1060 A70-17148

Displacement measurement to fractions of micron using laser interferometer

06 p1060 A70-17149

Displacement rate measurement in initial portion of blank subjected to explosive forming by capacitance pickup

06 p1076 A70-17868

Body displacement and deformation measurement by fringe separation in holographic interferometry

07 p1280 A70-19143

Holo-diagrams for simplified evaluation of amplitude and direction displacement in double exposed holograms for interferometric measurements

07 p1287 A70-20086

Mangler displacement thickness correction for slender cones

08 p1590 A70-21320

Grid shadow moire method to measure displacement contours of large plates, discussing sensitivity changes

11 p1311 A70-25589

Moire-holographic technique for deformed plane spatial displacements determination, describing diffraction patterns generation and stress analysis

11 p1240 A70-26487

Central shock and target displacement of underexpanded supersonic jets with obstacle at nozzle exit, using Toepler schlieren photographs

12 p1256 A70-27293

Displacement component in chosen direction on deformed object surface, using hologram interferometry with double illumination

13 p2409 A70-29475

Displacement sensor based on interference fringes counting by laser interferometry

14 p2594 A70-30683

Stress analysis for plate with large displacements by multicamera photogrammetry, comparing results with numerical solution by finite differences

15 p2821 A70-32313

IR radiating bodies angular displacement determination by vacuum evaporated thermocouple radiation detectors, describing stationary communication satellite altitude control

15 p2740 A70-32422

Displacement and velocity measurements using strain gauges, linear potentiometers and seismic transducers

15 p2743 A70-32799

Pressure transducer diaphragms displacement measurement by holographic interferometry

17 p3085 A70-35010

Optical correlator for displacement measurements using laser produced speckle patterns of scattered coherent light

17 p3088 A70-35026

Small swing angle detector for balloon payloads, using rate gyro principle

17 p3090 A70-35314

Deflection behavior of uniformly loaded elliptical elastic plates on elastic foundation, using small parameter perturbation technique

18 p3343 A70-36713

Damped linearly tapered cantilever beam elastically restrained against rotation at wall, analyzing displacement under general initial and distributed load conditions

19 p3539 A70-37802

Micropolar mechanics application to stress and displacement within separate components of fibrous composite material

19 p3541 A70-37961

Thin elastic shells displacement vector and strain boundary conditions determination from stress-strain relations

20 p3728 A70-39896

Holographic measurement of general forms of motion based on reconstructed images dependence on coherence

21 p3822 A70-40810

Fraunhofer holography for small spherical particles three dimensional position and velocity measurements

21 p3822 A70-40811

Multiple wavelength desensitized hologram interferometry to extend displacement measurement range

21 p3822 A70-40814

Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement

21 p3935 A70-41406

Nondestructive measurement of elastic and plastic deformation in soldered joints and printed circuit boards by holographic interferometry

22 p4047 A70-43521

Various Frank loops in quenched and annealed Pt, examining dislocations with field ion microscopy and computer simulated approximations

23 p4230 A70-44758

Monograph on future air traffic control concerning radio navigation, color display and computer determined flight paths

01 p0136 A70-10090

Optical data display involving laser light deflection by vibrating mirrors actuated by mechanical resonators

01 p0108 A70-10355

Length measuring systems based on Michelson type interferometers, laser sources, fringe counting electronics, ambient air compensation, fringe-inch conversion and digital display

01 p0108 A70-10418

Duty factor and contrast in scanned displays, discussing light modulator and emitting displays

01 p0043 A70-10780

Real time recording and permanent display, using high power energy density focused Ar laser beam for ink transfer

01 p0111 A70-10782

Visual simulation limitations, discussing parallax error correction in display system, wraparound system, image generation, TV and motion picture film systems

01 p0036 A70-10813

Display systems used in space capsule window simulation for flight training, discussing erecting eyepieces, field of view and exit pupils

01 p0058 A70-10814

Hardware CRT display system based on digital computer for dynamic flight simulation of moving spatial objects

01 p0089 A70-10818

Line length effects on sequential blanking in visual perception demonstrated by computer-based CRT display and interpreted with information processing model

01 p0039 A70-11164

Visual flight displays technological and human engineering development

01 p0039 A70-11259

Electronic displays role in pilot-aircraft interaction, considering flight safety, cost effectiveness, onboard data input, etc

01 p0039 A70-11260

Information display - Conference, Arlington, Va., May 1969

01 p0048 A70-11276

Computer driven display terminal as part-task limited area simulator, examining operational requirements and input characteristics

01 p0059 A70-11277

Numeric keyboard CRT display for weather data acquisition from ships at sea, utilizing ATS-3 satellite as transmission medium

01 p0048 A70-11279

Digital computer display techniques relationship with man in modern environment, considering human engineering and educational problems and future impact on intellectual qualities

01 p0221 A70-11281

Operational planning system for Strategic Air Command for data accessing, generating, displaying and editing using computer complex

01 p0048 A70-11282

Moving map displays applications in marine and air navigation, discussing human factors and impact on ATC

01 p0139 A70-11284

ATC terminal displays procurement and use, discussing effects of traffic growth and FAA automation program

01 p0139 A70-11285

Display console characteristics for meeting increasing applications, predicting price reduction trends, color emphasis and CRT competition as primary display component

01 p0221 A70-11286

Electronic head-up display experience in transport aircraft flight tests including human factor, installation, operational applications, etc

02 p0224 A70-11836

Head-up display for horizon, desired and actual approach paths information to assist pilot during approach, landing and overshoot

02 p0330 A70-11842

Projected and head-up flight information displays using cathode ray tubes, discussing optical system, lens design and landing aid application

02 p0330 A70-11843

Dynamic structural analysis using computer graphics display, emphasizing applicability to man machine interaction at key decision making points

02 p0386 A70-11943

ATC display devices, discussing digital systems requirements, data storage, etc

02 p0331 A70-11962

Secondary surveillance radar (SSR) automatic plot extractors and display processors for providing information on aircraft height and identity for air traffic control

02 p0256 A70-11963

Alphanumeric label and vector scan converted bright display operation, characteristics and equipment, discussing line scanning method, visual storage, display phosphor problems, etc

02 p0256 A70-11974

TV raster scan display using CRT and beam steering scan systems, comparing alphanumeric capability for airport information and control problems

02 p0274 A70-11976

Aircraft navigation systems performance, discussing navigation aid integration by digital management computer coupling navigation sensors to display and control devices

02 p0334 A70-11984

Airborne computer civil navigation system designed for output coordination from navigation sensors

02 p0334 A70-11986

ALGOL Dynamic Display System for debugging and optimizing computer source language program, providing real time portrayal of static and dynamic block structure, etc

02 p0264 A70-12128

Adaptive man machine systems, display design - IEEE/ERS Conference, Cambridge, England September 1969, Volume 4

02 p0245 A70-12147

Display system for Apollo Telescope Mount designed for unclouded sun view by orbiting astronaut-scientists, discussing human factors, film budgeting, etc

02 p0298 A70-12151

Man machine digital display low cost system for displaying black and white image data with gray levels, color image data and dot patterns

02 p0265 A70-12152

Display system utilization for diverse graphical operations, discussing interactive tasks and tradeoffs

02 p0265 A70-12153

Vigilance of human monitors detecting additions and deletions of relevant and irrelevant signals presented on computer matrix display

02 p0246 A70-12377

Color coding effects in compatible and noncompatible display control arrangements

02 p0247 A70-12381

Autostereoscopic display using vibrating varifocal mirrors, including laboratory computer generated real time image and movie projection systems

02 p0302 A70-12631

Small read-out stations for automatic picture reception from meteorological satellites, detailing design

02 p0382 A70-12648

Display devices for ballistocardiographic test data obtained from professional pilots free of cardiovascular disease subjected to displacement and acceleration

02 p0247 A70-12676

Lidar technique capabilities and limitations in meteorological applications, emphasizing data storage and display instrumentation

03 p0450 A70-13673

Cockpit information transfer between pilot and flight control information displays improved by on-board data processing system

03 p0436 A70-14021

Three dimensional display of human body surface potential distributions as diagnostic tool of cardiac abnormalities

04 p0641 A70-14557

Black and white roentgenograms conversion to full color and three dimensional CRT radiograph displays, incorporating electronic data processing circuitry

04 p0641 A70-14560

Computer method to combine autofluorescence data to produce three dimensional display of absorbed radioactive material from multiview images

04 p0686 A70-14563

Variable anamorphic motion picture system to produce visual display for use with flight simulator [ASME PAPER 69-WA/BHF-8]

04 p0642 A70-14852

Cockpit display system to reduce aircraft pilot workload and aid judgment making during critical operations [ASME PAPER 69-WA/BHF-12]

04 p0642 A70-14854

Scanned CRT display optimum spot size in relation to raster pitch, assuming Gaussian luminance distribution

04 p0691 A70-15136

Pilot visual information display systems influence on flight safety, discussing aircraft accidents and human error factors

04 p0691 A70-15143

Display storage tubes /DST/ for radar systems, describing operating principles and characteristics

04 p0660 A70-15525

VTOL flight investigation to develop decelerating instrument approach capability with control-command information display for three degrees of freedom

[SAE PAPER 690693]

05 p0792 A70-15862

Gigacycle correlator involving sampling oscilloscopes for real time display of correlation functions over adjustable time interval, discussing design and performance

05 p0847 A70-16066

Human macrosaccadic eye movements related to four dial display conditioned by concurrent variable interval schedules of signals

05 p0800 A70-16127

Displays for command and control centers - NATO/AGARD Conference, Munich, November 1966

05 p0826 A70-16176

Command control systems characterized as problem solving information processing systems, discussing information requirements specification prior to man-display design

05 p0806 A70-16177

Command and control display operational requirements within Allied Command Europe /ACE/, information flow, decision making and evaluation

05 p0959 A70-16178

Operational/technical system improving air traffic control services efficiency by increased utilization of automation, displaying radar information and synthetic air situation presentations

05 p0827 A70-16179

Display Oriented Computer Usage System /DOCUS/, discussing on-line display console management in multiaccess environment, display oriented language, compiler, etc

05 p0817 A70-16181

BR-90 visual analysis control as flexible and versatile display for command and control, discussing on-line data processing, maintenance, etc

05 p0827 A70-16182

Systems concepts in design of computer operated display systems in air defense and air traffic control systems, discussing alphanumeric display, panoramic display, etc

05 p0827 A70-16183

CRT display design for command and control with digital symbol and vector generation

05 p0817 A70-16184

Computer generated displays and USAF equipment design for operational command and control systems, discussing Ag halide film technique

05 p0847 A70-16185

Electroluminescent matrix displays, discussing limitations in control element

05 p0827 A70-16186

Ferroelectric control circuits controlling electroluminescent cells in matrix, pointer, bargraph, alphanumeric and other displays

05 p0827 A70-16187

Projection display methods using scanned and modulated multicolor laser beams, discussing beam generation, modulation and scanning

05 p0858 A70-16188

Real time large screen display systems operation, brightness, accuracy, resolution, contrast ratio, data rates, reliability, fail-safe and management functions

05 p0828 A70-16190

STRIDA II consoles operation for treating air defense data, discussing data display system, work positions organization and console construction method

05 p0828 A70-16192

Large wall display system for USAF command and control with central computer and seven color projector, discussing hardware and operational features

05 p0828 A70-16193

Display/control system and key technical decisions at Manned Space Mission Control Center, discussing command consoles

05 p0829 A70-16194

Computer display graphic technique for business decision making, noting electronic aids

05 p0959 A70-16451

Information display devices, discussing interactive graphic consoles, reusable film, magneto-optics, broadband laser, etc

05 p0851 A70-16725

Aircraft visual flight control displays development, considering liquid crystals in alpha numeric data output devices and holograms for three dimensional structures reproduction

05 p0853 A70-17090

Flight deck controls and instrument disposition in business aircraft emphasizing size

06 p1061 A70-17318

Flight deck displays based on digital computer providing signals for CRT and instrumentation

06 p1061 A70-17319

Communications and displays - Conference, North Hollywood, August 1969

06 p1005 A70-17342

Digital and analog large system data displays, considering CRT, laser, hybrid types, contrast control, etc

06 p1061 A70-17348

Color CRT system to display engineering data based on real time analysis, discussing performance requirements

06 p1061 A70-17349

Electronic sine-cosine converters construction in devices for visual display of hydroacoustic transducers radiation patterns

06 p1064 A70-17773

Multichannel magnetograph display for pattern recognition of solar feature morphology compared with spectroheliograms

06 p1142 A70-17993

Holographic recording and reconstruction for wide angle three dimensional displays noting limitations

07 p1287 A70-20085

Enhanced real time operational impact and casualty analysis /ERIOCA/ for range safety, discussing computer-driven CRT display and missile flight parameters selection

[AIAA PAPER 70-247]

07 p1251 A70-20371

Flight test evaluation program for airborne multisensor electro-optical display systems performance in TV mode under variety of optical conditions

07 p1289 A70-20403

Collision avoidance system /CAS/ cockpit display equipment design and operation

08 p1492 A70-20480

Electronic displays and flight control system of Multi-Role Combat Aircraft developed by Germany, Italy and UK

08 p1493 A70-20631

Aircraft gas discharge displays, discussing segmented alphanumeric annunciator devices with field effect electroluminescent elements and incandescent lamps

08 p1493 A70-20671

Alphanumeric and graphic computer driven CRT displays, discussing systems and component selection

08 p1465 A70-20672

Light beam deflection for three dimensional fixed and time varying visual displays, discussing mechanical, acousto-optic, electro-optic, digital and holographic techniques

08 p1449 A70-20673

Attack aircraft cockpit displays, discussing design requirements and pilot ability as controller

08 p1435 A70-20674

Optical suitability to pilot visual requirements in head-up displays, discussing telecentric viewed system permitting binocular disparity tests

08 p1449 A70-20675

Machine-plotted pseudo three dimensional turbocharger rotor whirl display, discussing amplitude and frequency

08 p1496 A70-21300

Display design for improved target detection performance taking into account human attention to display field areas

08 p1452 A70-21301

Digital data display system designed for central station of German ground station system

08 p1462 A70-21369

Display media - Conference, Cambridge, Mass., September 1967

08 p1498 A70-21676

Computer managed display system using CRT and appropriate solid state displays providing flight crew with automatically sequenced time varying information

08 p1498 A70-21677

Control display requirements for manned spacecraft, integrating human operator with vehicle control system and determining man machine relations in stabilization, control and guidance

08 p1498 A70-21678

Workload relieving displays and controls for general aviation, discussing feasibility of digital computer driven integrated displays

08 p1601 A70-21679

CRT display devices and R and D, discussing electron generation, luminescent materials, resolution, brightness, etc

08 p1498 A70-21680

Carrier injection luminescence properties useful for display medium applications, discussing group II-VI compounds as injection host crystal materials

08 p1557 A70-21681

Thermochromic materials feasibility for applications in CRT display devices, observing reversible color changes during electron beam irradiation

08 p1499 A70-21682

Fluidic display, discussing applications for fluidic computers and control systems

08 p1441 A70-21684

Magnetic display devices covering magneto-optical displays, magnetic-electrostatic technique combinations and ferromagnetography

08 p1499 A70-21685

Display devices using electrostatic forces, discussing electrostatic printing, magnetic display system, etc

08 p1499 A70-21686

Laser display systems, discussing mechanical, diffractive and refractive beam deflection techniques, electro-optical polarization devices, holographic displays, etc
08 p1499 A70-21687

Plasma display system characteristics and history, discussing gas discharge cell construction and behavioral mechanisms
08 p1499 A70-21688

Electroluminescent displays design capable of generating all primary colors in single compact element
08 p1499 A70-21689

Display media development and implementation from engineering psychology viewpoint for information transfer in form compatible to sensory-perceptual capabilities
08 p1447 A70-21690

Visual display media requirements of future high performance vehicles, considering spacecraft and aircraft
08 p1499 A70-21691

Aircraft electronic attitude display indicators using symbology generation to combine several flight monitors indications
08 p1500 A70-21737

Integrated display for crowded tactical aircraft cockpits, presenting multisensor information for weapons and fire control systems
08 p1500 A70-21760

Display objectives and relationships to recording techniques examined for memory/display system, considering requirement for elastic erasing technique
08 p1467 A70-21761

Display devices luminance and luminous efficiency measurement as function of angle
08 p1500 A70-21762

Resolution, contrast and gray scale performance of CRT displays compared to dot matrix displays
08 p1500 A70-21763

Solid state IC-compatible display devices optical, electrical, mechanical and thermal characteristics
09 p1642 A70-22018

CRT color displays advantages and limiting factors, considering beam-penetration tube with high voltage switching
09 p1673 A70-22031

Fluidic logic elements to control firing and extinction of plasma matrix display system cells with constant electrical power supply
09 p1673 A70-22032

Computer-generated shaded flicker-free on-line digital video display, allowing superimposed vector graphics with light-pen interaction
09 p1640 A70-22033

Projection CRT with liquid-cooled phosphor faceplate, showing linear relationship between brightness and beam current
09 p1673 A70-22034

Apollo mission simulation, discussing Command Module Simulator /CMS/, onboard computer system and dynamic visual presentation via infinity- optics display
09 p1655 A70-22226

Computer-generated holography involving three dimensional object perspective projections computation for incremental rotations
09 p1683 A70-23529

Fluidic logic elements for controlling selected cells extinction in hybrid plasma-fluidic display
09 p1738 A70-23758

Temperature limitation on CRT tube performance in high brightness displays imposed by glass breakage danger, discussing liquid cooling of phosphor substrate
09 p1686 A70-23759

Textured gray-scale imagery by computer simulating lunar display
09 p1642 A70-23771

Alphanumeric solid state displays with vertically stacked character rows for text format reading, using injection electroluminescence technology
10 p1846 A70-23882

Light-emitting integrated circuit semiconductor display devices with inherent memory permitting logic and optical output functions performed on surface
10 p1846 A70-23883

Human operator transinformation sensitivity to display gain and forcing function bandwidth in rate control tracking task
10 p1823 A70-23896

Real time wide angle multicolor scanned laser display for visual flight simulators, utilizing flying-spot camera and rotating optical polygons
[AIAA PAPER 70-361] 10 p1857 A70-24203

V/STOL cockpit three degree of freedom multicrew research simulator, utilizing visual display and digital computer
[AIAA PAPER 70-356] 10 p1858 A70-24207

Amplitude and Rotational 3-Axis Flight Simulators for handling qualities research, outlining physical constraints and methodology for driving visual display and motion systems
[AIAA PAPER 70-353] 10 p1858 A70-24210

Aircraft flight displays, simulating low altitude high speed mission by four degree of freedom Dynamic Flight Simulator
[AIAA PAPER 70-343] 10 p1859 A70-24216

Data display systems parameters and functional elements, considering resolution, brightness, contrast, command and control, storage, etc
10 p1889 A70-24576

Digital plotters operational characteristics, capabilities and applications
10 p1845 A70-24581

Functional visual field selective process, studying performance as function of display angle
10 p1827 A70-24769

Symbols design for machine displays based on Gestalt pattern perception theory, considering symbol learning, perceptibility, detail, boundaries, etc
10 p1827 A70-24771

Spatial and amplitude modulators for laser-photochromatic display system producing real time TV pictures or images
11 p2062 A70-25734

CRT displays for business aircraft emphasizing EADI/electronic attitude director indicator/
[SAE PAPER 700210] 11 p2079 A70-25882

Business aircraft fuel management system using capacitance and mass flow rate measurements, displaying fuel quantity and flow rate and flight time remaining
[SAE PAPER 700225] 11 p1983 A70-25896

Nonimaging remote sensor data display in spatial registration with ground scene to determine sensor boresight position accuracy
12 p2229 A70-26940

Two dimensional remote sensing displays based on diffraction patterns generated by coherent light, discussing optical processing of photographs, drawings, maps, etc
12 p2229 A70-26944

Computers graphical display devices for rapid designer-computer communication
12 p2191 A70-27013

Holographic dynamic head-up display system for aircraft carrier deck landings in low visibility
12 p2232 A70-27371

Current-sensitive single gun color CRT with phosphor screen for display systems
12 p2195 A70-27373

Direct view storage tube /DVST/ as graphical display unit for small digital computer installation
12 p2232 A70-27374

Acoustographic imaging system /AGIS/ using liquid crystal detection screen to provide color display of ultrasonic wave information
12 p2235 A70-27724

Human detection capability for objects on electro-optical imaging displays calculated as function of SNR, viewing distances and brightness levels
12 p2236 A70-27903

Course deviation indicator /CDI/ display applicability to tracking Omega lines of position, providing reduction in weight, volume, cost and complexity
12 p2269 A70-27920

Chrysler lunar vehicle design featuring flexible metal wheels and Ackerman front wheel steering, noting back-to-back seating and centrally mounted control display panel
12 p2208 A70-27947

Cockpit data monitor allowing pilot selection of instrumentation parameter readout
13 p2345 A70-28970

Tactical aid displays /TAD/ for lightweight multisensor airborne ASW localization missions, discussing mission planning, avionic design, operator direction airborne tactical decision structures, etc
[AIAA PAPER 70-517] 13 p2407 A70-29036

Pictorial display area navigation system for air traffic control in terms of cockpit utilization, interface with ground navigation aids, parallel multiple routes, etc
[AIAA PAPER 69-798] 13 p2449 A70-29171

Semiconductor alphanumeric multicolored displays, discussing phosphor coating of GaAs diodes
13 p2408 A70-29217

Visual acuity determination by tape with staggered squares rotating behind screen with window
13 p2350 A70-29298

Vibrotactile display operational skill acquisition, discussing stimuli quality and spacing effects on lumen of temporal ordering of sensory events in haptic space
13 p2354 A70-29596

Compensatory tracking task with tactile displays determining gains and body locations by describing function and error power analyses
13 p2354 A70-29599

Digital signals conversion into command and control TV displays in multiconsole systems
13 p2411 A70-29789

Virtual infinity CRT display systems testing, discussing effects of large apertures, operational modes and observer physiological requirements on measurements
13 p2411 A70-29790

Holographic display requirements anticipating applications to motion pictures and TV
13 p2411 A70-29791

Real time signal processor for correlation and spectrum analysis, displaying results on cathode ray oscilloscope
13 p2370 A70-29817

AC and DC driven gas discharge aircraft displays, discussing capabilities and applications
13 p2412 A70-29875

Visual display reference system rotation effect on control quality and tracking error compensation using stick signal control
14 p2540 A70-30249

Civil aircraft altitude display design, anticipating application to supersonic transport
14 p2582 A70-30287

Avionics and instrumentation, discussing digital techniques application to engine control, electronic head-up and head-down displays, radiation pyrometry, etc
14 p2589 A70-31338

Passive optical crossed beam detection systems monitoring meteorological parameters in rocket or aircraft environments, noting real time display
15 p2736 A70-32032

Laser color TV display acousto-optic deflectors equalization using prisms
15 p2751 A70-32043

Visual IR laser beam displacer, using cathode ray tube phosphor with variable sensitivity and range control
15 p2752 A70-32441

X ray inspection with direct TV viewing, discussing specimen geometry effects, equipment, applications, etc
15 p2742 A70-32778

Dual raster high brightness-high resolution TV display using time sharing with conventional CRT
16 p2903 A70-33131

Holographic data storage for random information display and retrieval in wide range consumer credit network
16 p2903 A70-33135

Real time angular readout system for declination axis of U.S. Naval Observatory six inch transit circle, using Inductosyn as basic transducer
16 p2906 A70-33176

Foreground presence for computer generated and painted three dimensional photographic displays using fly eye lenses
16 p2906 A70-33177

Solid state electroluminescent phosphor displays for aircraft/spacecraft instrument panels
16 p2906 A70-33178

Drosograph high brilliance display device for rapid line-pattern projections and optical signal processing
16 p2906 A70-33179

Real time video data display at visual and thermal IR wavelengths, demonstrating performance improvement for target recognition
16 p2910 A70-33436

Human factors requirements for effective utilization of electronic reconnaissance displays, noting SNR and TV lines over target effects on performance
16 p2851 A70-33459

Display-control relationships in visual display information processing, considering spatial incompatibility effects on reaction time
16 p2852 A70-33661

Electronic pulsarium displaying flashing or beeping properties of pulsars
16 p2911 A70-33795

Electronic attitude director indicator /EADI/ integrated vertical situation display, noting information volume and TV format flexibility
16 p2911 A70-33817

Low cost headup displays /HUD/ for pilot error reduction during takeoff, approach and landing, discussing displayed functions vs cost tradeoffs
16 p2911 A70-33818

Head up display /HUD/ flight tests, examining effects decreasing quality of manually handled instrument approach, discussing space myopia and disorientation
16 p2912 A70-33819

INTIC tube memory image intensifier with contrast enhancement, describing design and performance
16 p2880 A70-34269

Metal grid capacitive memory for INTIC and direct view storage tubes, describing image contrast control
16 p2880 A70-34270

Digital logic techniques for pulse modulated radar systems, with application to controlling and timing waveforms for display
17 p3042 A70-34570

CH-47 cruise guide indicator for displaying fatigue loading to pilots, discussing design and operation
17 p3082 A70-34705

Heavy lift helicopters cockpit display problems, describing photographic flight research program for data acquisition
17 p3082 A70-34731

Real time data processing and display for spacecraft thermal vacuum testing, using hybrid computer 17 p3059 A70-35176

On-line display of pulsed rocket engine performance data using hybrid computer 17 p3063 A70-35512

Computer driven on-line CRT graphics displays for data acquisition and reduction 17 p3063 A70-35513

Solid state display for on-line information retrieval using light emitting crystals, integrated circuits and hybrid packaging 17 p3063 A70-35514

Visual display and automatic taxi guidance system testing for improved aircraft docking accuracy [AIAA PAPER 70-916] 17 p3064 A70-35828

Aircraft perspective display as independent landing monitor based on electronic runway lights, discussing simulator development and flight validation [AIAA PAPER 70-924] 17 p3064 A70-35835

Commercial aircraft flight deck systems controls and time sharing displays, emphasizing crew management [AIAA PAPER 70-938] 17 p3021 A70-35847

Heat-up display [HUD] system, discussing development, production, commercial aircraft applications and flight sequences uses 18 p3223 A70-36210

Automated radar terminal system, ARTS-III Beacon Tracking Level for continuous aircraft identity on controllers radar display 18 p3288 A70-36393

Left ventricular dynamics ultrasonic visualization, involving catheter-borne transducers array and computer for data acquisition and display 18 p3225 A70-36750

Real time analog display inputs for electronic computers and tracking in physiological control circuits, describing various manual controls 19 p3367 A70-37564

Display/control technology for high performance input/output between man and machine, describing man-in-loop simulation 19 p3369 A70-37875

Electronic attitude director indicator [EADI] for supersonic transport, employing CRT display, head down TV and microvision sensors 19 p3463 A70-37911

Apollo spacecraft parts environmental simulation and testing, using real time computer generated graphic display 19 p3532 A70-37918

Sodalites color centers creation by electron beam, discussing application in dark trace cathode ray storage display tubes 19 p3379 A70-38048

Airline area navigation in national airspace system, emphasizing moving map display for navigation charting 19 p3465 A70-38233

Pictorial display methods for pilot error reduction in area navigation via guidance control and capability beyond visual field 19 p3465 A70-38234

Human monitoring behavior, discussing display, task and organismic variables effects 19 p3363 A70-38323

Automatic test equipment, considering capability, control and display facilities and system cost 19 p3401 A70-38542

ATC simulation at EUROCONTROL Experimental Center, discussing dynamic simulator, data processor and display 19 p3468 A70-38638

TV display simulation of instrument and visual aircraft landing approaches, investigating color, collimation and resolution effects on pilot evaluations 20 p3578 A70-39172

Aircraft landing maneuver optimization by in-flight monitoring of approach and landing phases, furnishing decision making display [AIAA PAPER 70-1000] 20 p3560 A70-39531

Radar consoles with various display components under different illumination levels to determine optimal operator performance, discussing push-button design recommendations 20 p3580 A70-39713

Airborne integrated computerized ASW system, describing navigation, flight control, display and sensor subsystems 21 p3821 A70-40575

Aircraft capacitive fuel gage improvement by integration with flowmeter system, DC torque display and digital techniques, considering other measurement principles 21 p3821 A70-40619

Oscilloscope polar coordinate displays for multidimensional analog signals, noting human detection capability 21 p3823 A70-40853

Computerized aerospace systems man machine interface mechanization for performance optimization, emphasizing integrated approach to avionic displays 21 p3795 A70-41689

Electro-optic device using ferroelectric bismuth titanate, discussing electrical and optical properties and matrix addressed display 21 p3830 A70-42114

Airborne test computer for in-flight radar checkout featuring tape storage of computer program and cockpit mounted optical readout 22 p3993 A70-42320

Area navigation for aircraft guidance with radio aids, discussing advantages, airborne equipment, Dynamic Map Displays, etc 22 p4067 A70-42658

Horizontal Situation Display [HSD] map computer mechanization transforming earth location to X, Y coordinates for Lambert conformal projection [AIAA PAPER 69-987] 22 p4068 A70-42710

Visual system recording neuron pulse potential spatial and temporal responses to sinusoidal stimuli 23 p4144 A70-43922

Computer-aided aircraft design, discussing parts geometry data bank, visual display, etc [ICAS PAPER 70-27] 23 p4200 A70-44106

Flight simulation in SAAB A137 aircraft development, describing analog and digital computers, cockpit simulators, automatic pilots, control and display devices [ICAS PAPER 70-42] 23 p4178 A70-44140

U.S. SST flight deck instrumentation and cockpit displays during flight, discussing economic analysis of operations [ICAS PAPER 70-59] 23 p4139 A70-44155

Real time contourgraphic electrocardiographic display determining heart rate from CRT face on beat-by-beat basis 23 p4150 A70-44377

Optimal color hierarchy for pyrotechnic markers and signals indicating red, violet and amber hues on top 23 p4146 A70-44459

Enhanced real time operational impact and casualty analysis for range safety, discussing computer-driven CRT display and missile flight parameters selection [AIAA PAPER 70-247] 23 p4178 A70-44517

Manned spacecraft onboard data management systems, discussing information transfer, processing, control, display and man machine interface 23 p4167 A70-44647

Automatic Data Processing and Display System for ATC over Belgium, Holland and Germany, relieving traffic controller routine tasks 23 p4216 A70-44860

ATC radar data processing and display systems equipment and operation, emphasizing economy 23 p4216 A70-45044

Aircraft binocular head-up display, discussing system operation, history and potential applications 24 p4372 A70-45349

Human tracking performance as function of information precision in electrocutaneous display 24 p4308 A70-45508

Flickerless regeneration rates for CRT displays as function of scan order and phosphor persistence, using computer experiment 24 p4298 A70-45511

Readability of segmented numerals under critical accuracy and limited exposure time, comparing with conventional displays 24 p4308 A70-45514

Aircraft onboard radar system with landing monitor perspective display of runway operating independently of ground based electronic equipment [AIAA PAPER 70-1336] 24 p4373 A70-45932

Electronic data handling and CRT display of ATS satellite cloud pictures 24 p4371 A70-46048

Human compensatory two dimensional visual display tracking performance with superimposed apparent vertical vibration, studying frequency dependent eye pursuit movements 24 p4309 A70-46078

Upper Air Space Control Center Automatic Data Processing and Display System for air traffic control 24 p4323 A70-46238

Vibrational relaxation and continuous spectrum transition during dissociation of diatomic low temperature plasma 04 p0721 A70-14539

Dissociative recombination coefficient ratio between O ion and nitrogen oxide ion in ionosphere using rocket data 04 p0683 A70-15743

Equilibrium existing at gaseous-condensed phases interface inferred as mechanism for dissociative sublimation of ammonium perchlorate 05 p0894 A70-17079

Electron energy distribution function for carbon dioxide laser plasmas in gas mixtures, discussing dissociation products role in electron energy exchange 06 p1080 A70-17447

Dissociative charge-transfer reactions of positive He ions with molecular N and O measured in drift tube-mass spectrometer 06 p1109 A70-17490

Projection operators in dissociative attachment theory, considering use of truncated diagonalization method 07 p1347 A70-20248

Fixed low pressures of nitrogen generated by chemical dissociation in system at equilibrium at constant temperature, applying results to vacuum measurement device calibration 09 p1630 A70-22954

Dissociative-recombination rate coefficient measured for dissociative recombination reaction in inviscid nozzle flow of reflected shock tunnel, using high temperature and pressure nitrogen 09 p1737 A70-23225

Diatomic molecules vibrational levels distribution near dissociation limit determined using WKB approximation 10 p1919 A70-24041

Molecular I ground state dissociation energy value, proposing spectroscopic reassignment 12 p2180 A70-26861

Integral Hellmann-Feynman formula for dissociation energies in H, Li and LiH molecules, discussing transition densities and dissociation energy 12 p2275 A70-27569

Dissociation energy and long range interatomic potentials of diatomic molecules from vibrational spacings of higher levels 13 p2454 A70-28495

Predissociation of excited molecules in molecular hydrogen and deuterium by electric field as linear function of field strength 13 p2362 A70-29479

Dissociative recombination coefficient ratio between O ion and nitrogen oxide ion in ionosphere using rocket data 14 p2576 A70-30827

Transition probabilities for Markov chain describing bond breaking and molecular energy transfer in vibrational relaxation and dissociation 16 p2953 A70-33009

Dissociation energy of vanadium and chromium dicarbide and vanadium tetracarbide, using Knudsen effusion mass spectrometric method 16 p2857 A70-33654

Weak predissociation effects of hydroxyl compounds electron state on radiative lifetime via phase shift method 19 p3374 A70-38270

Electron-ion recombination in Ar plasma, discussing transition from collisional-radiative to dissociative process as function of electron density and temperature 21 p3858 A70-41711

Transition entropy during dissociation, investigating Trouton-Pictet rule applicability to diatomic molecules [DFVLR-SONDDR-58] 24 p4430 A70-46412

DISSOLUTION

U DISSOLVING

DISSOLVING

Metal corrosion product dissolution in reactor cooling deionized water, investigating Cu, W and Cd using chemical analyses 10 p1904 A70-24398

Lead ion effects on single crystal zinc dissolution and electrodeposition in alkaline solutions investigated microscopically 13 p2361 A70-28928

Rotating Ti disk in liquid Co flow, investigating titanium carbide dissolution kinetics 20 p3648 A70-39245

Isothermal kinetic rates of polymer swelling and dissolution, using thermomechanical analyzer 22 p4059 A70-43078

NT ALTIMETERS NT GEODIMETERS NT LASER RANGE FINDERS NT OPTICAL RANGE FINDERS NT RADIO ALTIMETERS NT RANGE FINDERS NT TELLURIMETERS

Minimum operational characteristics /MOC/ for vertical guidance in airborne area navigation systems, including VOR-DME accuracy criteria

01 p0138 A70-11049

Airborne DME minimum operational characteristics for air traffic control navigation and communication systems including equipment specifications, environmental conditions, accuracy and range

01 p0138 A70-11050

Space triangulation net using direction and distance measurements from satellite photographic and Doppler observations, including tracking data leveling

03 p0446 A70-13194

Electronic distance measurements involving transit time determination for signal from instrument to far point and back

03 p0495 A70-14176

Microwave and IR distance measuring devices design and operational principles, discussing main circuits and reading displays

05 p0851 A70-16799

Distance of spacecraft descending on parachute through planetary atmosphere measured from center of planetary mass using onboard instrument data

06 p1155 A70-17897

Lasers industrial application to distance and flow rate measurement, automated machining and tunneling, inspection, die hole punching, welding, etc

06 p1078 A70-18431

European air transport navigation, discussing air traffic control and planned VHF omnirange/distance measuring equipment network /VOR/DME/

07 p1332 A70-20226

Doppler VOR offering increased course accuracy and allowing precise area coverage in conjunction with DME ground station

09 p1723 A70-23036

Sequential collation of range /SECOR/ satellite tracking system using electronic phase comparison for measuring ground station-satellite distance

09 p1724 A70-23047

Apollo 11 lunar laser reflector for earth-moon distance measurement

10 p1898 A70-23847

Galactic radio source W 31 distance from sun determined from measurements of OH, H I and formaldehyde absorption lines

10 p1937 A70-23949

Laser methods for industrial length measurements

11 p2061 A70-25355

Intra- and extragalactic distance indicators and Hubble constant calibration

12 p2301 A70-27581

Short distance VHF omnirange navigation and distance measuring equipment considered for performance improvements feasibility to meet civil air traffic demands through 1980

12 p2268 A70-27643

Radiotelescope measurements for geodetic purposes, applying interferometric principles to quasar radiation

13 p2396 A70-29163

Short range VOR/DME area navigation techniques in U.S. National Airspace System

16 p2948 A70-33470

Pulsar distance calculation, assuming immersion in uniform average electron density medium

18 p3328 A70-37174

H 2 region galactic clusters and exciting stars, reevaluating distances by color magnitude diagrams

18 p3329 A70-37178

Association Carina OB 2 photometric investigation of mean distances

18 p3330 A70-37186

Eurocontrol evaluation of navigational aid systems air traffic control, examining HARCO and VORDAC systems

19 p3468 A70-38641

Ultrasonic sensor for detecting altitude and vertical velocity of aircraft near ground, applying to helicopter hovering flight or conventional airplane takeoff and landing

[AIAA PAPER 70-1031]

20 p3631 A70-39506

Onboard velocity sensors for VOR/DME navigation systems positional accuracy improvement, describing optimal and suboptimal data filtering

[AIAA PAPER 70-1024]

20 p3666 A70-39511

Pulsar observational data and theories, discussing main pulse shape, wavelength, polarization, fine structure distance estimates, intensity and scintillations

20 p3706 A70-39935

Extragalactic radio sources observable and intrinsic properties relationship for distance estimates, considering surface brightness, diameter, luminosity, etc

21 p3889 A70-41145

Position experiments for navigation satellite system parameters determination, using satellite ATS-3 distance measurements

22 p4066 A70-42653

Position fixing by distance measuring to geostationary satellites, discussing ATS-3 and ship experiment accuracy and orbit interference

23 p4215 A70-44232

Flueric position and distance sensor characteristics

24 p4293 A70-45427

DISTANCE PERCEPTION

U SPACE PERCEPTION

DISTILLATION

Propylene carbonate applications in nonaqueous electrolyte batteries, describing impurities identification by gas-liquid chromatographic analysis

12 p2164 A70-27069

Carrier distillation DC arc emission spectrography, determining lead, bismuth and tin traces in nickel base alloys after conversion to oxides

14 p2546 A70-30957

DISTILLATION EQUIPMENT

Vacuum distillation vapor filtered catalytic oxidation for water reclamation from human waste, using radioisotopes for thermal energy

20 p3579 A70-39437

Vacuum distillation vapor filtered catalytic oxidation water recovery system, using radioisotopes for thermal energy supply

21 p3769 A70-40994

Potable water recovery from urine by vacuum distillation and vapor pyrolyzation

21 p3769 A70-40995

DISTORTION

NT FLOW DISTORTION NT SIGNAL DISTORTION NT SURFACE DISTORTION

Heat treatment induced shape distortions measurements in maraging steel bars, plates and sheets, noting dependence on number of anneals and product form

14 p2595 A70-30544

Distorting and distorted components during geometrical illusions stereoscopic registration

19 p3366 A70-38926

Al alloy products heat treatment, using synthetic quenchants for distortion control

20 p3650 A70-39967

Satellite tracking camera lens-distortion coefficient from comparison of standard stellar and measured X-Y coordinates

22 p4029 A70-42596

Spheroidal three mirror telescopes distortion involving dioptrics combination

23 p4194 A70-44213

DISTRIBUTED AMPLIFIERS

Input conductance variation for common-emitter triode distributed-gain wideband amplifier, deriving energy equations improving tube characteristics

08 p1472 A70-20862

Noise and gain formulas for wideband distributed-gain amplifiers using quadrupole elements and transmission line configurations

08 p1472 A70-20863

Multivibrators with improved stability and frequency-division capacity, using distributed R-C-NR structures

24 p4321 A70-46396

LF narrow band-pass amplifiers with distributed RC structures

24 p4321 A70-46397

DISTRIBUTION [PROPERTY]

NT ANGULAR DISTRIBUTION NT ANTENNA RADIATION PATTERNS NT BOLTZMANN DISTRIBUTION NT CHARGE DISTRIBUTION NT CURRENT DISTRIBUTION NT DIFFRACTION PATTERNS NT ELECTRON DENSITY PROFILES NT ELECTRON DISTRIBUTION NT ENERGY DISTRIBUTION NT FLOW DISTRIBUTION

Iron behavior in GaAs during crystallization, studying Fe distribution ratio, impurity migration and diffusion coefficient

01 p0156 A70-10219

Far and near side lunar crater chains regularities in distribution and size

03 p0574 A70-13879

Australite distribution pattern in Southern Central Australia

11 p2119 A70-26846

V and Cu emission spectrographic analyses in chondrite types, noting distribution patterns between groups based on meteoric chemical fractionation mechanisms

24 p4411 A70-45789

DISTRIBUTION FUNCTIONS

Particle diffusion distribution function of two component ionized degenerate gas from Boltzmann transport equation, giving tables for various spin and mass ratios

01 p0151 A70-10318

Satellite orbital elements optical determination accuracy by differential corrections, presenting computations for data distributed along small arc

02 p0254 A70-11754

Collective interactions effect on electron scattering opacity in stellar interiors, using Debye-Huckel radial distribution function and neglecting collisions

02 p0364 A70-11789

Molecular velocity distribution function measured in normal He shock wave in low density wind tunnel by electron beam fluorescence technique

02 p0299 A70-12229

Electron distribution function for steady homogeneous plasma of arbitrary ionization degree under strong electric fields, discussing kinetic equations for elastic and nonelastic encounters

02 p0346 A70-12231

Spatial distribution function calculation for muons in extensive air shower model and secondary particles mean transverse momentum estimation

03 p0556 A70-13039

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field

03 p0564 A70-13227

Energy distribution function of electrons in weakly ionized plasma layer at electrode calculated, allowing for possible plasma concentration inhomogeneities

03 p0540 A70-13525

Electrostatic instability criterion for plasma with distribution function having discontinuities and sharp bend at minima

03 p0532 A70-13526

Formation of Maxwell and nonMaxwellian energy distribution in gases, noting reduction of time reversible to time irreversible equations

03 p0606 A70-13861

Laser amplifier electromagnetic field in arbitrary quantum mechanical state, deriving complex amplitude distribution function to calculate phase uncertainty

03 p0503 A70-14174

Spatially homogeneous Boltzmann equation containing initial distribution functions expandable into Hermitean polynomials, using ordinary differential equations

03 p0526 A70-14302

Maximum entropy principle used in rarefied gas dynamics for optimal representation of distribution function, examining difficulties associated with constraints on boundary conditions

04 p0718 A70-14492

Distribution of zeros of solutions of canonical fourth order linear differential equations

04 p0713 A70-14675

Distribution functions for solving moment equations of Maxwell-Boltzmann equation used in studying heat conduction through rarefied gases within concentric cylinders and spheres

[ASME PAPER 69-WA/HT-17]

04 p0783 A70-14817

Stars distribution in depleted globular clusters determined by integral equations describing distribution as function of cluster parameters

04 p0754 A70-15256

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

04 p0742 A70-15718

Kinetic theory for calculating electron distribution function of weakly ionized plasmas in arbitrarily time dependent electromagnetic fields

05 p0886 A70-15800

Electron distribution function in quasi-static free moderately ionized plasma with partial radiation trapping determined from electron-electron collisions

05 p0889 A70-16452

Plane magnetopause models assuming ionospheric electrons ability to short circuit electric fields, constructing distribution functions by Vlasov theory

05 p0840 A70-16568

Characteristic equation for phase velocity of surface wave propagating on helix for forbidden zone, suggesting current distribution function

05 p0815 A70-16775

Maximum gust correlation with gust mean distribution within given hour determined from high speed anemometer

06 p1096 A70-17414

Spatially homogeneous distribution function describing uniform gas motion derived to permit computer calculations in obtaining numerical solutions to kinetic equation

06 p1036 A70-17753

Iteration for Boltzmann equation solution for relaxation of gas having solid molecules with time variable and velocity dependent distribution function

06 p1109 A70-17757

Supersaturation during droplet-liquid phase formation in clouds estimated from trough formed on curve of distribution function

06 p1097 A70-17796

Distribution function distortions produced in counting devices due to simultaneous arrival of particles, correcting errors

06 p1064 A70-17830

Corpuscular radiation distribution function with trapped particles maximum density fixed in equatorial plane and reflection points vicinity of magnetic force line

06 p1135 A70-17894

Solar wind temperature, using distribution function for solar wind ions in anisotropic Maxwell distribution form

06 p1135 A70-17895

Electron distribution functions in weakly ionized plasmas by asymptotic analysis of boundary layer near wall

06 p1121 A70-17903

Boltzmann equation for binary mixtures of rarefied gases solution involving specific expansion of distribution functions

06 p1047 A70-18311

Discrete ordinate technique for nonlinear Boltzmann equation tuned for computing collision integrals to instantaneous nature of distribution function

06 p1047 A70-18319

Boltzmann equation fourth moment numerically solved to study distribution function characteristics during monatomic gases spherical expansions into vacuum

06 p1048 A70-18320

Surface diffusion slip velocity in binary gas mixture above solid surface, basing calculation on distribution functions determined from Boltzmann equation

06 p1049 A70-18333

Particles infinite systems equilibrium state by canonical ensemble theory, demonstrating existence and uniqueness of limiting distribution functions dependence on density

07 p1333 A70-18936

Convolution formulas for Cauchy and standard normal random variable distributions derived from geometry of circular symmetric distribution on plane

07 p1323 A70-18946

Particles and surface brightness distributions in nonionized cometary tails, considering near nucleus source and particle acceleration

07 p1378 A70-19035

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

07 p1349 A70-19553

Statistical methods for characterizing interval sequences of ECG, treating interval distribution and joint probability density function of adjacent interval pairs

07 p1211 A70-19593

Compton-Getting effect for cosmic ray particles and photons and Lorentz-invariance of distribution functions, discussing thermal background radiation, proton spectra, etc

07 p1369 A70-20071

Stellar velocity distribution function for small mass stars in nonrotating systems

07 p1389 A70-20208

Plasma oscillations analytic second order theory verification by computerized simulation, using Fourier-Hermitian expansion of distribution function in phase space

08 p1550 A70-20636

Diatom gases, describing rotational distribution function evolution by diffusion equation approximation, discussing apparent relaxation times

08 p1548 A70-21521

Kinetic equation describing variation of distribution function of stellar residual velocities under action of gravitational field, discussing stellar diffusion in velocity field

08 p1580 A70-21660

Fatigue limits distribution functions of full-scale machine parts estimated by rupture similarity criterion, discussing stress concentration and scale factor effects

09 p1776 A70-22616

Crystallite orientation distribution function refinement procedure, considering application to isotactic polystyrene

09 p1631 A70-23446

Boltzmann collisionless transport equation for relativistic plasma solved by expanding distribution function in terms of unnormalized spherical harmonics

10 p1923 A70-24228

Independent identically distributed random variables sequence, obtaining asymptotic expansion for large deviations of distribution function

10 p1910 A70-24799

Observational data for distributions of physical and optical companions to spiral galactic systems and number of satellites as function of central galaxy size

10 p1948 A70-25247

Dispersion function model based on mixed second order kinetics with distributed relaxation times

11 p2086 A70-25831

Components life determination from calculating cumulative damage using empirical stress amplitude distributions

11 p2133 A70-25844

Electrons velocity distribution function in homogeneous stationary weakly ionized Lorentz plasma in neon, investigating effect on mobility, collision frequency, diffusion and kinetic energy

11 p2089 A70-25871

Boltzmann equations for distribution functions of gas, analyzing neutral or ionized components by linearization method

11 p2090 A70-25946

Transformed distribution function of particle velocity of plasma in Debye thermodynamic equilibrium approximation based on statistical mechanics

11 p2091 A70-26459

Autocorrelation and brightness distribution functions for irregular variable star

11 p2115 A70-26579

Analytic expressions for concentration distribution functions in inhomogeneous solids within intermediate stages of homogenization process

12 p2253 A70-27282

Limiting distributions of sums of random variables coupled in homogeneous Markov chain with finite number of states

12 p2261 A70-27551

Free electrons non-Maxwellian equilibrium kinetic energy distribution function, considering partially ionized hydrogen-like plasma in thermal equilibrium

13 p2459 A70-28634

Cratered planetary surface distribution and covariance functions of elevations using statistical model

13 p2488 A70-28763

Jeans escape rate error for atmospheric H and He attributed to perturbed velocity distribution function, using realistic atom-atom elastic scattering cross sections

13 p2398 A70-29226

Self gravitating collisionless particles instability related to anisotropic random velocity distribution function in presence of disk-galaxy type spiral wave perturbations

13 p2492 A70-29299

Type 3 solar bursts theory covering beam-type instabilities and quasi-linear relaxation of fast electron distribution functions

13 p2478 A70-29389

Book on probabilistic systems analysis covering models, decision making, random processes, distribution functions, mass and density functions, etc

13 p2441 A70-29455

Boltzmann equation in circular magnetic field solved by Fourier series and Legendre polynomials, correcting distribution function due to Fourier harmonics

13 p2464 A70-29485

Light scattering from plasmas with nonMaxwellian electron velocity distribution function

14 p2622 A70-30694

BBGKY hierarchy pair correlation function for magnetoplasma under weak external force, using

operator method and time periodic ansatz for distribution functions

14 p2623 A70-30697

Eleven year cosmic ray variation and solar activity cycle analysis, showing variation amplitude dependence on both numbers and heliolatitudinal distribution of sunspots

14 p2632 A70-30802

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

15 p2777 A70-31460

Linear distributed dynamic system simulation using infinite product expansions for transcendental terms in transfer functions

16 p2942 A70-33348

Electron momentum distribution function of p-type semiconductor with arbitrary band structure under electric and magnetic fields

17 p3144 A70-35704

Pontryagin stability for distributed delay or parameter systems, using Brin criterion

18 p2335 A70-36478

Q switched laser turn-on nonlinear dynamics, deriving field intensity distribution function

18 p2370 A70-36743

Book on abstract methods in partial differential equations, covering functional analysis and distributions, elliptic theory, linear and nonlinear problems, evolution equations, etc

18 p3284 A70-36782

Two dimensional phase distribution function of mixture of Gaussian noise with amplitude modulated signal

18 p3229 A70-37110

Density and distribution functions for quotient of ellipsoids of variance volumes, yielding probabilities and fractiles in three dimensional sets of points

19 p3382 A70-37835

Distribution functions of cosmic ray path length, obtaining exponential type for high and low energy data

19 p3509 A70-38146

Risk interpretation of prior distributions in acceptance sampling by Bayesian analysis

19 p3440 A70-38817

Kinetic equations derivation for correlation functions and time dependent distribution functions of irreversible processes, using projection operators

20 p3672 A70-39588

Random radio signals distributions properties with parameters subject to random variation

21 p3785 A70-40639

Homogeneous plasma in unidirectional oscillatory electric field, solving Boltzmann equation by electron distribution function expansion

23 p4225 A70-44240

Electron distribution function in homogeneous ionized plasma under oscillating electric fields and steady magnetic fields, solving Boltzmann transport equation

23 p4226 A70-44248

Limiting distribution of additive nonnegative continuous functional of homogeneous Markovian process with conditional transfer function

23 p4212 A70-44346

Quasi-homogeneous approximation validity for electron velocity distribution function disturbance in gas plasma column ionization waves discharge involving high currents

24 p4386 A70-45794

High resolution cylindrical capacitor observation of fine structure of distribution function of electron beam interacting with plasma

24 p4387 A70-45820

DISTRIBUTION MOMENTS

NT MEAN

NT STANDARD DEVIATION

NT VARIANCE [STATISTICS]

Electron and photon spatial distributions in cascade air shower, applying moment method to space/angle problem solution

03 p0557 A70-13050

Recursive differential equation for moments of time-to-cycle slip in first and second order phase lock loops

21 p3802 A70-41350

Five-moments approximation calculation of magnetoplasma dynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field

23 p4228 A70-44935

Magnetoplasma dynamic hydrogen arc radial pressure profile as function of ambient pressure and superimposed magnetic field, using thirteen-moments approximation

23 p4228 A70-44936

DISTURBANCE THEORY

U PERTURBATION THEORY

DISTURBANCES

Incompressible inviscid free shear layer stability with respect to spatially growing three and two dimensional disturbances, considering hyperbolic tangent velocity profile

[DFVLR-SONDDR-10]

03 p0468 A70-13786

Initial disturbances propagation in gas mixtures by asymptotic analysis, observing diffusely and viscously damped modes
05 p0833 A70-16404

Linear differential controller equations for optimal automatic control system with disturbances
08 p1479 A70-20870

Three axis large angle attitude control system global analysis, determining system stability, responsiveness and sensitivity to disturbances
[ALAA PAPER 70-996]
20 p3668 A70-39534

DISTURBING FUNCTIONS

Tidal disturbing functions developed with amplitude factor and lag angle expressed as sums of zonal spherical harmonics, discussing lunar formation and orbit evolution
03 p0576 A70-14083

Stationary and periodic solutions for commensurable cases of mean motions in restricted three body problems by expanding disturbing functions
04 p0745 A70-14474

Periodic solutions with moderate eccentricities and high inclinations for three dimensional restricted three body problem by expanding disturbing functions by high speed computer
09 p1759 A70-22773

DISULFIDES

NT CARBON DISULFIDE

Quantitative and qualitative analysis of biochemically and radiobiologically important thiols and disulfides via gas-liquid chromatography
19 p3373 A70-37836

Transition metal disulfides and diselenides as solid lubricants, investigating sliding friction characteristics
[ASLE PREPRINT 70AM 6E-1]
19 p3438 A70-38801

DITCHING [LANDING]

Ground and ditching emergency evacuation tests of C-9A aeromedical aircraft under worst possible simulated crash conditions
01 p0035 A70-10716

DC-8 aircraft ditching in San Francisco Bay on 22 November 1968, discussing accident sequence, evacuation operations, life raft stowage and deployment, etc
06 p0985 A70-17705

Passenger survival and evacuation of civil jet transport aircraft after ditching at sea
15 p2676 A70-32223

Modeling techniques based on Froude scaling laws for helicopter ditching and flotation stability characteristics
17 p3016 A70-34738

Model testing for helicopters, considering scaling, ditching and rotor performance
19 p3402 A70-38610

DITHIOLS

U THIOLS

DIURNAL RHYTHMS

U CIRCADIAN RHYTHMS

DIURNAL VARIATIONS

Harmonic analysis of upper atmospheric wind periodic data from radar sounding of meteor trails, defining principal diurnal wind variations
01 p0134 A70-10201

Underground and surface telescope measurements of second harmonic of primary cosmic ray daily variation and upper solar modulation limit
01 p0170 A70-10405

Cosmic ray electron intensity diurnal variations measured with combined Cerenkov telescope and Pb-scintillator sandwich detector on balloon flight
01 p0170 A70-10408

Nonlinear flow conductance and convective terms effects on planetary thermospheres heating diurnal variations, emphasizing solar EUV heating
01 p0178 A70-10413

Seasonal, solar diurnal and semidiurnal variations of cosmic ray soft component observed at sea over seven year period
01 p0170 A70-10467

Wind oscillations in stratosphere, lower mesosphere and meteor heights noting periodicities
01 p0074 A70-10591

Diurnal variation for structure and energy balance of thermosphere, noting effect of global wind pattern
01 p0074 A70-10592

Rocket and satellite studies of geomagnetic field during IQSY, confirming ionospheric currents responsible for magnetic diurnal variations
01 p0075 A70-10596

Magnetic bay microstructures occurrences at low latitude not restricted to day or night hemisphere
01 p0076 A70-10668

HF radio waves propagation between antipodal transmitter and receiver, discussing diurnal variations and reception over polar caps and water
01 p0045 A70-11103

Thermospheric horizontal winds diurnal bulge, discussing maximum density-maximum temperature phase relationship
01 p0078 A70-11210

F 1 layer nonlinear ionospheric continuity equation to investigate role of diurnal variations of loss and

production processes in electron density midday biteout effect
01 p0079 A70-11221

Ionosphere total electron content diurnal and seasonal variations at midlatitudes, based on data analysis from Explorer 22 in polar orbit
01 p0080 A70-11223

Stable geomagnetic pulsations related to plasma density shock position in magnetosphere and to magnitude of diurnal variations
01 p0082 A70-11508

Secondary corpuscular stream effect on diurnal variations in cosmic ray intensity obtained from statistical analysis
01 p0172 A70-11524

Interplanetary magnetic field sectoral structure effect on diurnal cosmic ray intensity and geomagnetic field, noting field direction influence
01 p0172 A70-11525

Auroral electron energy diurnal variation, noting ground observations of polar auroras, riometric absorption, vertical changes in ionization layer maximum position, etc
01 p0083 A70-11535

Lunar diurnal variation parameters at Irkutsk determined from IGY data concerning geometric field components
01 p0083 A70-11538

Diurnal variations in sporadic E layer and wind in ionosphere during equinox and solstice periods, noting wind shear mechanisms and ambient electron density
01 p0084 A70-11552

Air density variations calculated by visual satellite observations processing, comparing results of INTEROBS and average anomalies methods
02 p0288 A70-11766

Diurnal variations of intensity and height profile of diametric O concentration from photometric rocket measurements compared with balloon data
02 p0297 A70-12066

Predawn O I 6300 A airglow enhancement, observing time variations and suggesting mechanism
02 p0289 A70-12120

Seasonal effect on F region midlatitude slab thickness diurnal variations during magnetic disturbances using monitoring VHF signals from geostationary satellites
02 p0290 A70-12160

Lunar atmospheric tidal wind semidiurnal variations from Hong Kong and Uppsala data, discussing agreement with theory
02 p0325 A70-12217

Canary Bird synchronous satellite radio signal transmissions scintillations from recordings, noting diurnal scintillation pattern
02 p0260 A70-12573

Earth daily rotation effects on magnetosphere electric currents, discussing Pederson currents in dynamo region and E region ionization
02 p0293 A70-12775

Cloud cover recurrence estimators from set of unconditional probabilities tested against sample of Northern Hemisphere diurnal variation data
03 p0521 A70-13164

Large amplitude wave trains in cosmic ray neutron intensity compared with diurnal variations, determining interplanetary space directional distribution from monitor data
03 p0559 A70-13912

Sidereal cosmic ray diurnal variations from underground muon telescopes in Northern and Southern Hemispheres, proposing model producing variations at earth vicinity
03 p0560 A70-13978

Winter diurnal behavior of northern high latitude ionospheric electron density using temperature data from Langmuir probes
03 p0478 A70-13993

Diurnal variations of phase coupling between heart beat and respiration under resting conditions and modification by quantitatively regulated physical effort
03 p0431 A70-14294

Charged primary cosmic rays sidereal anisotropy generated diurnal/semidiurnal variations phase characteristics, using energy meson telescopes
04 p0738 A70-14513

Lunar tide in E region phase height from measurements of diurnal phase path change for continuous wave
04 p0678 A70-14973

Lunar tides in midday critical frequency of F 2 layer, determining phase reversal location
04 p0651 A70-15309

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum
04 p0684 A70-15745

Upper atmosphere wind and semidiurnal and diurnal tide interactions observed by meteoric radar, noting relation to gravity waves
05 p0878 A70-15818

Diurnal cosmic ray intensity variations first and second harmonics amplitudes during sudden phase

variations diagrammed from neutron monitor data during IGY
05 p0898 A70-15936

Cosmic rays neutron component solar-diurnal variations as function of solar activity using magnetically quiet data
05 p0898 A70-15941

Time dependent variation of first and second harmonics amplitudes of diurnal cosmic ray variations during SC magnetic storms
05 p0898 A70-15942

Meteor rate data tabulated from controlled parameter radar survey of Southern Hemisphere activity, noting diurnal and annual variations
05 p0907 A70-16001

Daily variations of winter stratospheric zonal wind and planetary waves based on synoptic charts from balloon observation
05 p0878 A70-16148

Meteorological parameters influence on diurnal variations of radionuclide activity and resulting global air pollution
05 p0903 A70-16662

Diurnal and seasonal variations of mortality due to cardiac and circulatory failure using model representing daylight regulation of human organism
05 p0802 A70-16663

Cosmic ray angular distribution spectrum and interplanetary magnetic field properties determined from semidiurnal cosmic ray variations data
05 p0903 A70-16732

Time and altitude induced variations in daytime NO and molecular and atomic oxygen ions
05 p0841 A70-16736

Polar aurora rays mean length diurnal variations determined from photographic and visual observations in Tiksi bay
05 p0843 A70-16763

Solar daily atmospheric oscillations from pressure, wind and temperature recordings at ground level, discussing seasonal and worldwide variations of daily component
06 p1053 A70-17307

Cesium clocks at fixed locations compared for precision and accuracy, noting influence of radio frequency diurnal variations
06 p1139 A70-17474

Electron density distributions relation to D region diurnal and seasonal variations in radiowave absorption in terms of transport processes near mesopause
06 p1054 A70-17589

Phase path variation of stable continuous wave transmission reflected from E region during daytime, discussing night time results
06 p1055 A70-17593

Proton satellites measurements reconciliation with diurnal stellar variation data and cosmic rays origin models
06 p1135 A70-17885

Ionospheric absorption diurnal and seasonal variations determined from field strength recordings
07 p1263 A70-19154

Effective LUF fade-out and fade-in times seasonal and diurnal variations for oblique ionospheric propagation paths, noting sunspot number effects
07 p1233 A70-19180

Diurnal variations of lower F region ion composition and recombination coefficient based on numerical modeling of continuity equations for electrons and molecular species
07 p1265 A70-19431

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms
07 p1367 A70-19456

Pc micropulsations with periods of 4-12 sec, discussing occurrence probability and diurnal characteristics
07 p1268 A70-19465

Intensity variations of cosmic ray neutrons and mesons analyzed to isolate lunar day period
07 p1368 A70-20033

Topside ionosphere morphology during IQSY, emphasizing plasma scale height diurnal and latitudinal variations role in satellite data interpretation
07 p1270 A70-20073

Magnetic storms effect on cosmic ray neutron component diurnal variation, determining amplitudes and phases of harmonics by harmonic analysis
07 p1372 A70-20341

Diurnal variations of cosmic ray neutrons following solar proton flares, proposing anisotropic diffusion model for phase and amplitude
07 p1372 A70-20342

Global distribution of F 2 layer critical frequencies by expanding empirical function of diurnal variations into natural orthogonal components
07 p1277 A70-20451

Electron, oxygen and NO molecular ions concentrations for E region from computer calculations of diurnal model compared to observations
08 p1490 A70-21391

Diurnal vertical shifts of constant electron concentration levels in D region, considering effects of chromosphere, nuclear explosions, solar eclipses, etc
08 p1490 A70-21430

Atmospheric density in thermosphere observed by satellites, noting daily and semiannual variations related to solar and geomagnetic activities
09 p1667 A70-22626

Cosmic ray diurnal anisotropy, demonstrating two-solar-cycle variations for nucleonic component
09 p1746 A70-23478

Equatorial electrojet diurnal variability in intensity, position and width obtained from H records of magnetometers
09 p1747 A70-23495

Lunar daily variation in geophysical data determined by Chapman-Miller method, improving probable error determination method and giving computer program in FORTRAN
09 p1764 A70-23701

Asian zone solar daily and storm time ionospheric disturbance variations synoptic study during IGY-IGC period
10 p1872 A70-23822

Loran C radio wave field intensity diurnal variations measurements, investigating ionospheric waves characteristics
10 p1832 A70-23921

Ionospheric electron content diurnal, latitudinal variations and equivalent slab thickness determined from observing satellite signals Faraday fading
10 p1874 A70-24426

Daily horizontal intensity spectrum for equatorial observatories, computing power densities near 27 day variation during high, moderate and low solar activity
10 p1875 A70-24440

Diurnal variations of concentrations of ions and neutral components of NO, O and N in E region from analysis of chemical and photochemical processes
10 p1881 A70-24809

Scintillation sudden inception in Faraday rotation in Sodankyl and Oulu, noting diurnal north-south frontier movements in polar ionosphere
10 p1884 A70-25262

Statistical analysis of aurora backscatter VHF measurements, discussing related stream plasma instability theory and diurnal variation
10 p1885 A70-25263

Near IR radiation diurnal variations in corn canopy accounted for by Duntley equations for unidirectionally incident light propagation through diffusing medium
11 p2082 A70-25364

Diurnal variation of equatorial ionospheric electron concentration from Schooner observations
11 p2043 A70-25548

Electron temperature diurnal variations data from rocket soundings used for determining recombination coefficient in E region
11 p2044 A70-25550

Annular current effect on auroral oval location during morning and evening hours, noting airglow region shift toward equator and expansion
11 p2044 A70-25555

Lunar semidiurnal tidal oscillations of surface pressure in atmosphere, observing constant amplitude with maximum and minimum phase lag variations
11 p2045 A70-25645

Lunar tides relationship with equatorial electrojet currents using daily variations at fixed lunar ages and monthly variations at solar hours of horizontal magnetic field
11 p2114 A70-26564

First harmonic of diurnal variation in pressure corrected cosmic ray neutron monitor rate, discussing amplitude variation with height and observed time dependence
12 p2291 A70-27177

Solar and lunar daily geomagnetic variations, correcting harmonic components calculated values
12 p2303 A70-27673

Long term ionospheric absorption measurements in Japan from IGY through IQSY using A1 method, discussing annual and diurnal variations correlation with solar activity
12 p2226 A70-28059

Long term ionospheric absorption measurements in Northern Hemisphere from IGY through IQSY, discussing annual and diurnal variations correlation with solar activity
12 p2226 A70-28060

Cosmic radiation yearly semidiurnal anisotropy characteristics based on worldwide neutron monitor stations data analysis
13 p2477 A70-29177

Cosmic radiation periodic variations measurements noting second harmonic importance of daily variations
13 p2478 A70-29230

Balloon-borne photometer for collecting twilight and daytime OH intensity and rotational temperature variations data
13 p2399 A70-29240

Altitude dependence of low latitude cosmic ray diurnal variations from cosmic ray neutron data
13 p2479 A70-29792

Mesospheric daytime/nighttime ozone abundance vertical profile diurnal variations
14 p2568 A70-30130

Diurnal and seasonal variations of sporadic E layer observed at ionospheric station
14 p2568 A70-30134

F 1 region ion structure diurnal variations, calculating photoionization rates
14 p2571 A70-30227

Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
14 p2547 A70-30235

UHF propagation measurement over sea for varying surface refractivity and meteorological conditions, noting diurnal variations
14 p2549 A70-30513

Neutral winds effect on F region vertical ion drifts derived from continuity equation, noting diurnal and seasonal variations
14 p2574 A70-30738

F region horizontal drift velocity height and diurnal variations, using ionograms
14 p2574 A70-30751

Daily variations of geomagnetic field horizontal component at dip equator associated with ionospheric current
14 p2575 A70-30792

Diurnal fluctuations of quiet F 2 region intensity at midlatitude based on vertical probe observations during solar activity minimum
14 p2576 A70-30829

Mars surface material properties from radio emission observations, considering daily temperature variations distribution
14 p2648 A70-31083

Stratospheric and mesospheric ozone diurnal variation by rocket-borne ozonesonde in January 1968
14 p2577 A70-31170

5577 A /OI/ airglow emission diurnal variations during IGY by normalization method, observing seasonal effects
14 p2578 A70-31239

Nonlinear diurnal tide and gravity wave interactions at meteor heights below mesopause
14 p2579 A70-31251

Sodium dayglow seasonal and diurnal variations observed with Zeeman cell photometer
14 p2579 A70-31253

Sodium and potassium dayglow seasonal and diurnal variations using resonance cell technique and sky polarization effect
14 p2580 A70-31263

Balloon systems characterized by day to night altitude variations for permanent atmospheric sounding
14 p2531 A70-31312

Circadian rhythmical changes in biological organisms by earth rotation, emphasizing diurnal variations role in sleep-wakefulness rhythm
15 p2680 A70-31742

Atomic hydrogen escape effects on altitude distribution, discussing lateral flow limitations on thermospheric diurnal variation
15 p2725 A70-31796

Correlated daily variations of ionospheric drift and anisotropy parameters in E and F regions at Thumba, India
15 p2725 A70-31858

Daily amplitude variability of equatorial electrojet current related to solar extreme ultraviolet radiation /XUV/ influx
15 p2727 A70-31873

Numerical model of diurnal variations of minor neutral constituents in mesosphere and lower atmosphere including molecular and eddy diffusion
15 p2727 A70-31909

Earth-ionosphere cavity resonances diurnal variations by considering different propagation characteristics of day and night hemispheres
15 p2728 A70-31910

Superposed effects in solar quiet daily variations of geomagnetic horizontal component, using Lerwick and Eskdalemuir data
15 p2728 A70-31991

Diurnal, seasonal and latitudinal variations of maximum electron concentration in F 2 region, using global network observations
15 p2729 A70-32077

F 2 layer afternoon and evening ionization maxima dependence on season, zenith angle and solar activity
15 p2730 A70-32084

Diurnal vibrations damping in inertial navigation system, demonstrating equations asymptotic stability for coordinates autonomous determination
15 p2775 A70-32156

Upper troposphere pressure variations through 20 km separation layer, noting interdiurnal temperature changes
15 p2772 A70-32458

Ionospheric small scale ionization discontinuities vertical drift effect on diurnal variations of F 2 layer critical frequency
18 p3246 A70-36086

Ionospheric cosmic noise absorption diurnal and seasonal variations at Alma-Ata during IQSY, noting chromospheric flares effects
18 p3306 A70-36089

Short wave propagation above F2 maximum usable frequency, observing field intensity and SNR seasonal and diurnal variations
18 p3226 A70-36092

Diurnal variations of lower F region ion composition and recombination coefficient based on numerical modeling of continuity equations for electrons and molecular species
18 p3249 A70-36905

Cosmic radio absorption nightly variations, considering ionospheric structure and composition and various scattering mechanisms
18 p3309 A70-36930

Pc micropulsations with periods of 4-12 sec, discussing occurrence probability and diurnal characteristics
18 p3250 A70-36939

Ionization-recombination parameters based on diurnal variations of electron concentration in F 2 layer maximum, discussing latitudinal variations
18 p3254 A70-37033

F 2 layer maximum electron concentration diurnal variations dependence on ionization intensity and dissociative recombination and ion-molecular reactions rate coefficients
18 p3255 A70-37039

Global diurnal variations in F 2 layer seasonal anomaly during high and low solar activity, noting corpuscular radiation role
19 p3491 A70-37326

F 2 region critical frequency diurnal variation forecasting, using series expansion of natural orthogonal components
19 p3409 A70-37327

Diurnal variations in polarization axis direction of Pc 1 pulsations
19 p3410 A70-37333

Polar cap absorption correlation with solar protons flux into magnetosphere, discussing diurnal and spatial variations and magnetic storm effects
19 p3411 A70-37492

LF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index changes
19 p3412 A70-37995

HF geomagnetic micropulsations recordings by two component induction magnetometer, relating diurnal frequency and occurrence variations to local K-index
19 p3412 A70-37996

Simultaneous primary energy spectrum, chemical composition and sidereal daily variation analysis for cosmic ray origin, using Proton measurements
19 p3500 A70-38080

Sidereal daily variation in cosmic ray muon intensity at 60 mwe depth, indicating extragalactic origin
19 p3509 A70-38149

Sidereal cosmic ray diurnal variations using underground mu-meson telescopes in Northern and Southern Hemispheres
19 p3510 A70-38150

Galactic cosmic ray anisotropy, discussing amplitude and phase values of daily sidereal variation
19 p3510 A70-38152

Cosmic noise absorption diurnal variations at auroral zone conjugate areas during geomagnetically disturbed periods
19 p3414 A70-38379

Upper atmospheric density and temperature diurnal phase and amplitude discrepancy reconciled by dynamic diffusion model
19 p3414 A70-38381

Diurnal variations of thermospheric atomic hydrogen, investigating lateral flow effects on global distribution
19 p3415 A70-38419

Sporadic E layer occurrence probability over Dushanbe from ionospheric station data, discussing curves for diurnal and annual PE variations
19 p3417 A70-38785

Cosmic ray anisotropy sidereal-diurnal effects isolation by solving simultaneous amplitude and phase modulation problem
20 p3696 A70-39282

Cosmic ray neutron semidiurnal variations day and night components with respect to geomagnetic and solar activity
20 p3697 A70-39288

Solar cosmic rays diurnal and semidiurnal variations modulation by noncoincidence between earth rotation axis and normal to ecliptic plane
20 p3697 A70-39289

High energy charged particles equations of motion in quiet interplanetary magnetic field for primary cosmic ray distribution, calculating diurnal and semidiurnal variations
20 p3698 A70-39297

Maximum to minimum exospheric temperature ratio determination, concluding solar wind dependence of diurnal variation in thermosphere
20 p3621 A70-39345

- Diurnal anisotropy variations of cosmic ray intensity, taking into account neutron monitors data
20 p3699 A70-39346
- Morning and evening current reversals in equatorial electrojet, discussing seasonal variation data for refining models
20 p3621 A70-39352
- Ionospheric VLF diurnal transmission loss differences on two long paths, analyzing values for first and second modes
20 p3585 A70-39455
- Diurnal variations and spatial distribution of total electron content in equatorial ionosphere
20 p3623 A70-40477
- Ionospheric electron density response to geomagnetic storms at midlatitudes, noting diurnal variations detected by ATS 3 VHF signals
20 p3623 A70-40479
- Scintillation LF observations with synchronous satellite radio signals at low latitude station, noting magnetic activity effects on night and day scintillations
20 p3590 A70-40488
- Diurnal variations of sudden enhancements and decreases of ELF atmospherics, using mode theory
21 p3814 A70-40939
- Atomic oxygen density and temperature diurnal variation determination by F region incoherent scatter measurements, using nonlinear regression analysis
21 p3817 A70-41096
- Diurnal variation of equatorial ionospheric electron concentration from schooner observations
21 p3819 A70-41298
- Electron temperature diurnal variations data from rocket soundings used for determining recombination coefficient in E region
21 p3819 A70-41300
- Annular current effect on auroral oval location during morning and evening hours, noting airglow region shift toward equator and expansion
21 p3819 A70-41305
- Transmeridian flights effect on diurnal urinary excretion of unconjugated 17-hydroxycorticosteroids in males, evaluating time shift effects
21 p3770 A70-41477
- Recombination model of diurnal variation of electron density in midlatitude D region, assuming NO ionization by solar Lyman-alpha radiation
22 p4020 A70-43158
- F region electron content day-to-day changes observed by Early Bird satellite, determining cross correlation with magnetic indices
22 p4020 A70-43161
- Day and nighttime E and sporadic E layer drifts over low latitude station recorded by spaced receiver technique
22 p4020 A70-43166
- Geomagnetic daily variations analysis in terms of universal time components, considering solar wind-magnetosphere interactions, auroral zone effects, etc
22 p4021 A70-43278
- High altitude outer radiation zone boundary region electron energy measurement by satellite Injun 3, noting angular distribution dependence on local time, latitude, etc
23 p4236 A70-43833
- Diurnal atmospheric density variations latitude dependence from satellite data
23 p4185 A70-43842
- Exospheric neutral hydrogen temperature diurnal variation from satellite resonance filter data, suggesting Lyman alpha source external to geocorona
23 p4186 A70-43852
- Air current in upper atmosphere meteor zone above equator, noting diurnal and semidiurnal harmonics in wind velocity components
23 p4188 A70-44049
- Diurnal variation symmetry of upper atmosphere molecular oxygen concentration in terms of ozone photodissociation
23 p4190 A70-44083
- Thermosphere diurnal thermal influx theory, allowing for heat conductivity
23 p4214 A70-44265
- Hough eigenfunctions of lunar diurnal and semidiurnal atmospheric oscillations using matrix and group methods
24 p4328 A70-45351
- F I region ion structure diurnal variations, calculating photoionization rates
24 p4331 A70-46302
- Lower ionosphere influence on radio reflection from sporadic E layer, determining diurnal variations of D region absorption for various frequencies
24 p4316 A70-46310
- DIVERGENCE**
Gas laser beams divergence at various laser power levels vs resonator nonconfocality
01 p0106 A70-10062
- Thin airfoil magnetoaerodynamics problem revised solution to avoid divergent integrals expressing kernels of integral equations
03 p0405 A70-12933
- Laser beam trajectory equation in scanning ultrasonic cell for nonzero incidence angle, relating input and output beam divergence
07 p1300 A70-19865
- Axial-vector current divergence in external gravitational field, using perturbation approach in Minkowski space
07 p1336 A70-20167
- Divergence measurement of beam emitted by ruby laser in relaxation mode as function of cavity length and excitation voltage
11 p2063 A70-26462
- Nondiverging filter with single additional multiplication by fixed scalar s at each observation time, proposing algorithm
16 p2887 A70-33872
- Radiation divergence from gas laser resonator with coupling aperture
20 p3642 A70-39752
- DIVERGENT NOZZLES**
Boundary layer separation in divergent portion of conical ducts in overrelaxed supersonic regime in air and water, showing influence of medium, pressure and thrust
03 p0467 A70-13682
- Supersonic jet flow from diverging nozzle into space with given pressure or into supersonic slipstream, noting barrel shock formation inside jet
04 p0617 A70-15235
- DIVERTERS**
Plasma jet motion stability in axial magnetic field of stellarator diverter and solenoid
24 p4386 A70-45660
- DIVIDING [MATHEMATICS]**
Binary division by logic gates cellular arrays, noting accuracy and operating speed
14 p2556 A70-30517
- Iterative cellular logical array for nonrestoring binary division
14 p2556 A70-30685
- Semigroup B, uniquely divisible range space for compact divisible commutative semigroups
16 p2941 A70-33095
- Cellular logic arrays design for nonrestoring binary division, with application to Napierian logarithm generation
17 p3050 A70-34571
- DIVING (UNDERWATER)**
Endtidal oxygen and carbon dioxide partial pressures, oxygen uptake and carbon dioxide after apnea and during apneic diving
02 p0235 A70-12089
- Systolic and diastolic pressure in central artery of retina in deep-sea divers during oxygen inhalation at atmospheric pressure
23 p4150 A70-45081
- Critical supersaturation vs phase equilibration of tissue in computing decompression schedules from depth and exposure time
24 p4301 A70-45983
- DME-A SATELLITE**
U EXPLORER 31 SATELLITE
DNA
U DEOXYRIBONUCLEIC ACID
DO-31 AIRCRAFT
V/STOL supersonic fighter VJ 101, transport Do 31 and VTOL fighter/reconnaissance VAK 191 development in West Germany, discussing control and stabilization during hovering
03 p0413 A70-13794
- Civil jet VTOL transportation based on Do 31, discussing market, passenger requirements, noise, flight safety and economic factors
10 p1805 A70-24051
- [AIAA PAPER 70-001]
- DOCKING**
U SPACECRAFT DOCKING
DOCUMENT STORAGE
Aircraft accident filing system data analysis using Fortran programs
22 p3962 A70-42880
- DOCUMENTATION**
Signature theory application to space mission planning and archeological project
11 p2051 A70-26034
- Computer simulation model documentation exemplified by cardiovascular simulation using Continuous Systems Modeling Program /CSMP/ and emphasizing format uniformity
15 p2689 A70-31774
- DOCUMENTS**
NT ABSTRACTS
NT BIBLIOGRAPHIES
NT CATALOGS [PUBLICATIONS]
NT DRAWINGS
NT HANDBOOKS
NT PAPERS
NT RECORDS
Reliability criteria documents updating, discussing input vs output, experience retention, tradeoffs, etc
15 p2747 A70-32630
- DODGE SATELLITE**
Dodge satellite postlaunch attitude stabilization and flight data comparison with digital simulation, underlining simulation use in design analyses
04 p0765 A70-15674
- DODGE satellite launched into near-synchronous orbit to demonstrate gravity-gradient stabilization at high altitude and to experiment with damping techniques
06 p1159 A70-18218
- [AIAA PAPER 70-69]
- DODGE satellite gravity gradient stabilization at synchronous altitude by flywheel and magnetic sample-and-hold damping, noting boom bending
13 p2501 A70-28425
- Torsion wire libration damper for satellite gravity-gradient stabilization at near synchronous altitudes
16 p2985 A70-34134
- DOGHOUSES**
U PROTUBERANCES
DOGS
Cardiac activity temperature coefficients in dogs, specifying physical and chemical cardiac functions
01 p0012 A70-10052
- Arterial pressure pulse waves mathematical analysis applied to variations in stroke volume in anesthetized dogs subjected to spine-to-breast accelerations
01 p0012 A70-10125
- Thermoregulatory salivary responses of dog to various ambient temperatures, emphasizing hypothalamic temperature, threshold and proportionality constant
01 p0017 A70-10465
- Physiological interpretation of blood velocity curves recorded in right heart cavities of dogs by ultrasonic directional probe, using Doppler effect
01 p0035 A70-10709
- Piezoelectric ultrasonic crystal on cardiac catheter tip measuring cardiac diameter in vitro and in excised canine hearts
01 p0038 A70-11025
- Neurons and perineuronal glial cells quantitative relations in visual cortex from anesthetized dogs
01 p0025 A70-11030
- Erythropoietic response in anesthetized dogs subjected to sublethal whole-body proton irradiation followed by hypoxic hypoxia, discussing test procedure and results
01 p0027 A70-11300
- Hyperbaric oxygenation /OHP/ effect on left ventricular function evaluated by measurement on anesthetized dogs of myocardial contractility
02 p0230 A70-11701
- Constant-inflow and constant-pressure perfusion effect on vascular responses of dog
02 p0232 A70-11716
- Oxygen uptake increase following sodium L-lactate isomer infusion into anesthetized dogs
02 p0233 A70-11721
- Canine aortic flow as function of simultaneous mean aortic and mean right atrial pressures
02 p0233 A70-11723
- Lactate rise diminution in anesthetized paralyzed dogs subjected to hypoxia by gas mixtures before and after beta-adrenergic blockade
02 p0233 A70-11724
- Phasic phrenic nerve electrical activity relation to systemic blood pressure oscillations produced in paralyzed dogs by ventilation arrest or hemorrhage
03 p0416 A70-13010
- Increased oxygen partial pressure effects on cerebral bioelectric activity from EEG recordings on unanesthetized dogs
03 p0422 A70-13690
- Sinocarotid pressor reflexes effects on coronary circulation in anesthetized dogs noting changes in blood pressure, peripheral resistance and cavity pressure
03 p0422 A70-13693
- Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs
03 p0423 A70-13706
- Experiments on frozen dogs to determine localized shielding effectiveness in astronauts protection from radiation
03 p0423 A70-13710
- Pleural space of dogs investigated by spheres injection of varying density and diameter, discussing sedimentation velocities
03 p0429 A70-14160
- Solar and geomagnetic effects on variations in physiological tests using alimentary reflex of dogs
04 p0639 A70-15512
- Blood volume and circulation rate in dogs subjected to traumatic shock and hemorrhage under high mountain conditions
07 p1198 A70-18708
- Posthypoxic vasodilation in extremities of anesthetized dogs preserved after carotid and aortic reflexogenic zones exclusion
07 p1204 A70-19139
- Oxygen uptake increase phenomena in passively hyperventilated anesthetized and paralyzed dogs
07 p1205 A70-19293
- Cerebrum hyperemia of dogs subjected to craniocerebral hypothermia, recording rheoencephalograms by occipitofrontal needle electrodes
07 p1207 A70-19473
- Left ventricular function myocardial infarction induced acute depression and subsequent recovery in intact conscious dogs
07 p1211 A70-19615

- Thoracic cage, heart and extirpated lung dimensions measurement for dogs before and after explosive decompression and after ground level recompression 08 p1448 A70-21793
- Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs 09 p1614 A70-22083
- Conscious dogs temporary local hypoxia effect on coronary blood flow regulation 09 p1623 A70-23585
- Vertical distribution of pulmonary blood flow /DPBF/ in dogs without thoracotomy prone, supine, head-up, head-down and right and left decubitus positions 10 p1810 A70-24004
- Pulmonary blood flow direction and distribution in dogs during near vacuum exposure and recompression 11 p1984 A70-25351
- Peripheral blood, neutrophil myeloid hematopoiesis, phagocytic activity and serotonin level in gamma irradiated dogs 11 p1985 A70-25506
- Experiments on frozen dogs to determine localized shielding effectiveness in astronauts protection from radiation 11 p1985 A70-25510
- Cold air inhalation effect on vital physiological functions of dogs, describing heat exchange simulator of upper respiratory tract 11 p1985 A70-25672
- X ray irradiation effects on phonocardiograms, EKGs, cardiac activity phases and Kunos-Garan mechano-electrical coefficient in dogs 13 p2350 A70-28890
- Comparative cardiac output measurements in dogs using left/right heart dye injections and pulmonary/aortic electromagnetic flow probes 15 p2688 A70-31434
- Unanesthetized dogs renal hemodynamic response to negative centrifugal acceleration 15 p2681 A70-31883
- Chronic gamma irradiation effects on bone marrow mitotic activity and chromosome aberrations in dogs 15 p2685 A70-32679
- Evoked potentials in dogs sensorimotor cortex during defensive instrumental conditioning 18 p3221 A70-37213
- Mongrel dogs pulmonary and systemic circulatory responses to dopamine infusion 20 p3569 A70-38986
- Blood vessels constriction in rear limbs, small intestine and spleen of dog with arterial blood heated above rectal temperature 20 p3574 A70-40173
- Skeletal muscles static tension influence on dog respiratory center functional properties, showing increased frequency volume and sensitivity under stimulation 20 p3574 A70-40174
- Excised perfused dog lungs stratified dead space changes due to transpulmonary pressure and breathing frequency increase, considering pulmonary circulation 24 p4303 A70-46114
- DOMAIN WALL**
- Magnetic trap chamber walls adverse effect on plasma heating produced by electron beam injected at low hydrogen pressures 07 p1350 A70-19845
- Ferromagnetic domain wall-dislocations magnetoelastic interaction in Fe and Ni computed as function of relative separation, discussing effects on magnetic properties 09 p1705 A70-22811
- DOMAINS**
- NT MAGNETIC DOMAINS**
- Algebraic criterion for polynomial with complex coefficients having all zeros in certain regions of complex plane 07 p1324 A70-19201
- Gunn oscillator voltage supply influence on domain capacity, considering frequency stability 13 p2377 A70-29302
- Saint Venant principle treating Neumann problem with nonthin two dimensional domain 15 p2767 A70-31855
- Semiconducting gallium arsenide LF oscillations, considering domain behavior and illumination effects 15 p2783 A70-31972

- Monograph on normal frequency generator serving devices measuring differential Doppler effect, discussing generator design for ionospheric research satellites frequencies 09 p1645 A70-22531
- Plasma electron density determination by number of extreme resolved line, considering broadening action by Doppler effect for Balmer, Lyman and Paschen series 09 p1734 A70-22731
- Signal properties and measurement accuracy of noncontacting optical heterodyne velocity sensing method used in differential Doppler velocity measurements 09 p1678 A70-22926
- Doppler VOR offering increased course accuracy and allowing precise area coverage in conjunction with DME ground station 09 p1723 A70-23036
- Doppler-effect-like phenomena of waves or pulses reflected and refracted at moving boundary layers 09 p1728 A70-23072
- Doppler effect induced small spectral line shifts measured by modified duochromator in MPD arc jet 09 p1684 A70-23531
- Laser Doppler velocimeter optics, noting minimal heterodyne alignment needs and stress and vibration stability 10 p1889 A70-24556
- Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator 10 p1901 A70-25123

Optical heterodyning of Doppler shifted signal with minimal instrumental spectral broadening and high SNR, applying to turbulence structure measurement by CW laser

11 p2062 A70-25630

Circumterrestrial dust component in Doppler shifted zodiacal light, considering Mie theory

11 p2045 A70-25698

Ionospheric electron and ion temperatures information extraction from Doppler broadening of radar returns based on correlation measurement

12 p2183 A70-27163

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics

12 p2246 A70-27352

Carbon dioxide CW laser-Doppler velocimeter for detecting aircraft wing tip trailing vortices by measuring atmospheric aerosols backscatter

12 p2249 A70-27630

Satellite based random Doppler environmental measurement technique for Global Atmospheric Research Program /GARP/, receiving signals from balloons, buoys and land stations

13 p2407 A70-29176

Ionic temperature difference from Arecibo data indicated in Injun 3 and Alouette 1 sonograms of proton whistlers propagation time, noting Doppler shift role

13 p2372 A70-29928

Vertical ionospheric electron concentration profiles, horizontal gradients and integral component from Doppler and Faraday signal recording on geophysical rockets, using diversity reception

14 p2569 A70-30205

Phased array monopulse autotracking, radiointerferometer and Doppler frequency methods for radar tracking systems for artificial satellite orbits

15 p2697 A70-31836

Doppler effect pulsed ultrasonic blood flowmeter using transducer alternating as transmitter and receiver

15 p2690 A70-31919

Laser Doppler heterodyning system for velocity measurements without directional ambiguity, employing incident beams of different frequencies through rotating diffraction grating or Bragg cell application

15 p2751 A70-31986

Gas flow velocity measurement by coherent detection of scattered laser radiation from small particles suspended in fluid, using Doppler effect

15 p2751 A70-32030

Laser Doppler velocimeter for measuring turbulence in gas and fluid flows

16 p2926 A70-33140

Laser Doppler-shift velocimeter with self aligning optics, discussing performance parameters

16 p2926 A70-33143

Pressure broadened line widths in electric field induced fundamental hydrogen spectral band, noting linear variation with density

16 p2954 A70-33276

Recursive estimation and Kalman filtering for space vehicle trajectory tracking, using Doppler shift measurements

16 p2866 A70-34071

Doppler shifted radiation production, using time and space dependent radiant energy sources

16 p2952 A70-34255

Ionospheric refraction during radio wave propagation using space diversity recordings of Faraday and Doppler effects for coherent signals from geophysical rockets

19 p3407 A70-37306

Dual scatter laser Doppler velocimeter /LDV/ technique, considering system design, performance and experimental verifications

19 p3424 A70-37876

Aperture size effect on frequency shift and frequency width variation of beat signals observed with laser Doppler velocity meter

19 p3428 A70-38502

Velocity measurement by Doppler effect in two-point direction finding, calculating error dependence on angular coordinates and distance

20 p3587 A70-39792

Amplitude-phase data from gathering receiving antenna array, obtaining Doppler frequency spectrum as arrival angle function

20 p3599 A70-40319

Ionosphere and magnetosphere total electron content from beacon method of measuring difference-differential-doppler /DDD/ and Faraday effects via synchronous satellite signal frequencies

20 p3590 A70-40484

Doppler beat spectrum and modulation depth of He-Ne laser emission with backward beam reflected from moving mirror into resonator

20 p3643 A70-40516

Doppler frequency shift of reflected radio waves for ionospheric disturbances, discussing solar flares, geomagnetic variations, etc

21 p3820 A70-42256

Doppler effect in interference fringe formation in holographic vibration analysis, discussing path length variation

22 p4038 A70-43152

Emission spectrum of neon-helium laser receiving Doppler shifted signal from moving mirror, showing memory effect due to beat harmonics

22 p4052 A70-43596

Flowing medium turbulent velocity measurement using laser Doppler device

22 p4040 A70-43615

ELF acoustic gravity wave arrival from Apollo launches recorded by Doppler shift ionospheric sounder channeled near mesopause and lower thermosphere

23 p4187 A70-43859

Optical FM system with laser interferometer and sideband carrier circuit for measuring mechanical shock by Doppler shift

23 p4193 A70-43964

Doppler effect simplification to classical Laplacian orbit determination, deriving equations in perturbed gravity field for initial point determination

23 p4246 A70-44697

Coherent motion effects on brightness of clouds moving above photosphere, describing H alpha Doppler brightening and Lyman alpha Doppler dimming in solar prominences

24 p4400 A70-45313

Doppler satellite measurements in semidynamic geodesy using data from Mediterranean ground stations

24 p4312 A70-45543

Ionospheric HF Doppler frequency dispersion at low latitudes under various geomagnetic disturbance conditions

24 p4314 A70-46129

Aircraft Doppler VHF omnidirectional radio range /DVOR/ performance test, noting improvement over VOR system

24 p4375 A70-46240

Vertical ionospheric electron concentration profiles, horizontal gradients and integral component from Doppler and Faraday signal recording on geophysical rockets, using diversity reception

24 p4330 A70-46280

Laser Doppler shift theory and applications to vibration and flow velocity field measurements

24 p4340 A70-46351

DOPPLER NAVIGATION

Doppler memory mode of ground speed and drift angle calculations analyzed by operators for possible errors

04 p0716 A70-14629

Computerized aircraft navigation utilizing Doppler dead reckoning system and Tacan integration with least square adjustment method

13 p2447 A70-28550

Preflight error statistics of earth based Doppler tracking for Mariner navigation concerning Mars 1971 and Venus-Mercury 1973 missions

[AIAA PAPER 70-1077]

20 p3670 A70-40023

Integrated air navigation by least square adjustment, analyzing Doppler navigation errors

22 p4067 A70-42655

DOPPLER RADAR

Ferrite-type phase shifter production by microstrip technique and integrated microwave system use in Gunn element Doppler radar

01 p0052 A70-11290

Doppler radar spectrum mean and variance derived for reflectivity gradients combined with linear wind shear velocity gradient

02 p0328 A70-12508

Reliability of Doppler radar hail detection, discussing corrupting effects of turbulence and shear, size-sorting and vertical air motions

03 p0443 A70-13167

Self excited microwave mixer and transmitting oscillator using Gunn diode applied to short distance Doppler radar

05 p0822 A70-16678

Gravity anomalies of moon mapped by time differentiation of Doppler-tracked satellite velocities, noting isostatic equilibrium

05 p0915 A70-16827

X band Doppler radar observation of horizontal motion of precipitation particles in low levels of slow moving thunderstorm

06 p1101 A70-18580

Navigational accuracy of two way Doppler tracking of interplanetary spacecraft during heliocentric and planetary encounter trajectory phases

[AIAA PAPER 69-899]

07 p1331 A70-19727

Precipitations microstructure remote measurements using Doppler method and attenuation coefficients measurements, estimating errors

08 p1536 A70-21095

Atmospheric small scale turbulence observation by Doppler radar, noting role of tracers radial velocity spectrum

09 p1716 A70-22364

Lower atmosphere turbulence under convective conditions, comparing Doppler radar and instrumented aircraft wind speed fluctuation measurements

09 p1716 A70-22367

AM and FM CW Doppler radar by combined AM-FM waveform, noting automatic track while scan radar application

10 p1840 A70-24445

Pulsed Doppler radar technique for monitoring and diagnosing severe storms, obtaining wind velocity and direction within cloud

10 p1844 A70-25242

Vertical air velocity in convective clouds by pulsed Doppler radar observations of thunderstorm

11 p2004 A70-25650

Turbulent ionized wakes Doppler radar scattering spectrum parameters in terms of wake characteristics using double convolution integral

11 p2010 A70-26271

Sea roughness effect on bandwidth of radar backscatter, analyzing Doppler signals of eight millimeter aircraft navigation system

12 p2228 A70-26906

Subclutter visibility /SCV/, resolution and interclutter of MTI or Doppler search radars in land, sea and weather clutter

12 p2188 A70-27940

Doppler radar aircraft navigation system with gyroscopic reference platform and computer, showing error propagation dependence on velocity and latitude

13 p2449 A70-29621

Radar reflectivity correlations with lunar surface structure in Mare Imbrium, using delay-Doppler radar maps

17 p3154 A70-34568

Doppler radar frequency tracker with servomechanism applicable to velocity computation of aircraft for self contained navigation

18 p3226 A70-36063

Vortex signature recognition from radial velocity field by Doppler radar

20 p3664 A70-40067

Digital Doppler ambiguity resolution method for pulsed S-band radar, using integrating interval approach

22 p3992 A70-43592

DORNIER AIRCRAFT

NT DO-31 AIRCRAFT

DO-231 fixed wing V/STOL airliner project based on DO-31 development, construction and flight tests, considering design problems, controls, safety, performance targets, etc

05 p0793 A70-15901

V/STOL Do 231 design, discussing propulsion, control, safety, traffic control and economic factors

08 p1435 A70-20640

DORNIER DO-31 AIRCRAFT

U DO-31 AIRCRAFT

DOSAGE

NT RADIATION DOSAGE

Empirical formulas derived for intuitive estimates of blood coagulability in patients to facilitate medication dosage prescription

07 p1210 A70-19558

Venturi tube optimal design and operation parameters for small liquid quantities dosage

11 p2035 A70-25778

Antimotion sickness drugs evaluated for effectiveness under standardized stress conditions in slow rotation room

20 p3572 A70-39439

DOSE

U DOSAGE

DOSIMETERS

NT THRESHOLD DETECTORS [DOSIMETERS]

Radiation dosimetry and shielding onboard Cosmos 110 artificial satellite, noting earth belt proton radiation

01 p0198 A70-11518

Book on photographic action of ionizing radiations in dosimetry and medical, industrial, neutron, auto- and microradiography, emphasizing photographic materials reaction to photons and particles

02 p0337 A70-11696

Biological dosimetry techniques for irradiation damage evaluation

02 p0239 A70-12581

Space environment radiation dose monitoring systems requirements and implementation, discussing material distribution, dose equivalence, parameters accuracy, etc

06 p0990 A70-17262

Radiation dose measurements from satellite and space probe experiments, considering radiation and shielding characteristics, sensor orientation effects, etc

06 p0990 A70-17266

Dosimetry data and personal radiation sensors from Apollo and Gemini flights, noting spacecraft geometry shielding effects

06 p1134 A70-17268

Soviet manned space flight radiation dosimetry evaluation, comparing U.S. and Soviet techniques for astronaut protection

06 p0990 A70-17271

- Thermoluminescent glass X ray dosimeter sensitivity tested as function of rigidity of gamma and X radiation, noting compensating filters for incident radiation
08 p1496 A70-21217
- Continuous generation of gas trace component quantities into carrier gas flow using dosage device
09 p1672 A70-22028
- Anthracene, polystyrene and stilbene for scintillation counters measuring cosmic ray protons, analyzing dosimetric properties
17 p3151 A70-35352
- CW laser beam power density distribution monitoring by self calibrating photographic dosimetry technique
24 p4307 A70-45343
- DOSIMETRY**
U **DOSIMETERS**
DOUBLE BASE PROPELLANTS
NT **DOUBLE BASE ROCKET PROPELLANTS**
Reaction heat for flameless combustion of double-base propellant using differential scanning calorimetry and thermogravimetric analysis, noting pressure effects
[AIAA PAPER 70-125] 06 p1179 A70-18045
Low pressure burning rate of double base propellants at various initial temperatures in argon and in air
12 p2332 A70-27844
Acceleration effects on burning rates of double base propellants with and without Al additive
16 p2963 A70-33883
Autoignition, ignition and surface temperatures of M-2 double base propellant at low pressure, correcting thermocouple measurements by theoretical model
18 p3299 A70-36697
Thermocouple and IR temperature measurement techniques comparison for double base solid propellants at low pressures
20 p3694 A70-40275
- DOUBLE BASE ROCKET PROPELLANTS**
Cast double base technique for free-standing and case-bonded propellant charges, discussing manufacturing and mathematical model of casting and curing
07 p1360 A70-19906
Pressure surges originated by tangential instabilities in solid propellant motors, using double base homogeneously compounded cylindrical grains
09 p1743 A70-22661
Composite and double base solid rocket propellants manufactured by French factory for ballistic missiles, discussing plant installations
11 p2030 A70-25520
- DOUBLE CUSPS**
Minor planets orbits coordinates and velocities data at osculation time
09 p1756 A70-22654
- DOUBLE SIDEBAND TRANSMISSION**
Coherent reference for demodulating double sideband suppressed carrier (DSB-SC) signals in presence of frequency detuning, using squaring or Costas loop
22 p3990 A70-43326
- DOUGLAS AIRCRAFT**
NT C-9 AIRCRAFT
NT C-47 AIRCRAFT
NT DC 8 AIRCRAFT
NT DC 9 AIRCRAFT
DOUGLAS DC-8 AIRCRAFT
U DC 8 AIRCRAFT
DOUGLAS DC-9 AIRCRAFT
U DC 9 AIRCRAFT
DOUGLAS MILITARY AIRCRAFT
U MILITARY AIRCRAFT
DOVAP
U **DOPPLER EFFECT**
DOWNTIME
Reliability figure of merit variations for predicted microwave radio system outages, using computer method
20 p3583 A70-38987
- DOWNWASH**
Test chamber to simulate helicopter rotor downwash for engine inlet air particle separator optimization
01 p0056 A70-10676
Optimal control conditions for elastic aircraft motion with delayed wing downwash determined by hyperbolic partial differential equations with delay
08 p1480 A70-21178
Isolated convective plumes immersed in return flow turbulent downdraft
15 p2769 A70-31440
Aircraft condensation trails formation by interactions of exhaust emission, vorticity of wing induced downwash and ambient atmosphere
22 p3958 A70-42684
Downwash angle behind straight wing for unsteady aperiodic flight at subsonic speeds, using vorticity model
22 p3959 A70-42802
Small airplane unsteady motion downwash angle at low speeds, comparing results from rectilinear steady flights
[ICAS PAPER 70-25] 23 p4138 A70-44108
- DRAFTING (DRAWING)**
Engineering design and drafting techniques in aerospace industry, emphasizing cost reduction
13 p2423 A70-29820

DRAG

- NT **AERODYNAMIC DRAG**
NT **ELECTROSTATIC DRAG**
NT **FRICTION DRAG**
NT **INTERFERENCE DRAG**
NT **MINIMUM DRAG**
NT **PRESSURE DRAG**
NT **SATELLITE DRAG**
NT **SUPERSONIC DRAG**
NT **VISCOUS DRAG**
NT **WAVE DRAG**
Solar wind-induced drag resulting from collisionless plasma shock on sunward-side of large magnetic comet, using similarity with earth magnetosphere
01 p0168 A70-10258
Chaplygin equation solution for wedge flows applied to Rethy flows, evaluating drag coefficient and approximate hodograph equations for subsonic and transonic regimes
04 p0614 A70-14613
Aligned electric current effect on drag of sphere with arbitrary conductivity moving in current carrying fluid
04 p0671 A70-14993
Free stream turbulence effect on drag coefficient of bluff sharp edged cylinders with small square section
05 p0789 A70-15923
Transonic flow theory, investigating thin three dimensional lifting wings, similarity for lift and drag, plane flow past airfoil, far field and hodograph solutions
[D1-82-0878] 05 p0834 A70-16693
One dimensional compressible flow analysis for near field aerodynamics of tube-vehicles, showing drag coefficient dependence
[AIAA PAPER 70-140] 06 p1038 A70-18077
Drag of diffusely reflecting and cool slender cone in hypersonic flow, using nonlinear Boltzmann equation for hard spheres
06 p0981 A70-18359
Dynamic simulation parameters for sphere drag coefficient data correlation in near free molecular flow
06 p0983 A70-18374
Free flight ballistic range method for measuring average drag coefficients for microscopic spherical iron particles in free molecular flow
06 p0983 A70-18378
Sphere and sharp slender cone drag coefficients in hypersonic transitional flow measured by flow modulation technique
06 p0984 A70-18389
Nonlinear pursuit problem solution taking into account drag and lift in pursuing object equations of motion
07 p1330 A70-18682
Aerodynamic drag coefficients and moments for axisymmetric bodies of revolution in rarefied plasma derived for limiting case of delta flux
08 p1432 A70-21088
Current sheet velocity in coaxial plasma accelerator, noting drag due to insulator ablation and degassing
[AIAA PAPER 69-265] 09 p1736 A70-23202
Variations after one revolution in semimajor axis, period and eccentricity computed for orbit using variable drag coefficient involving satellite and air thermal speeds
10 p1951 A70-24824
Hypersonic low density transitional flow over slender conical vehicle, calculating drag coefficient and density profiles
14 p2529 A70-31365
Interstellar drag resulting from relativistic rocket elastic collisions with interstellar matter, discussing effects on minimum time acceleration limited relativistic trajectories
17 p3155 A70-34752
Steady state tangential drag by solar wind on geomagnetic cavity, describing unipolar induction
22 p4013 A70-42469
Relaxation gas dynamics, discussing vorticity and drag generation by relaxation, linearized theory and shock waves structure
23 p4178 A70-43889
Parachute trajectory and opening load prediction based on inflation process and added mass, determining drag area as function of distance
[AIAA PAPER 70-1168] 23 p4137 A70-43993
Bodies of revolution optimal configuration, considering minimum head drag coefficient and low heat transfer at hypersonic speeds, using modified Newtonian and hypersonic flow theories
23 p4136 A70-45021
- DRAG BALANCE**
U **AERODYNAMIC BALANCE**
U **LIFT DRAG RATIO**
DRAG CHUTES
Tractor rocket powered escape system of 600 knot extraction capability using drogue parachute and barometric time delay device
[AIAA PAPER 70-1209] 21 p3751 A70-41809
Reentry vehicle recovery deployment initiation, comparing performances of conical wake drogue and body attached spoilers hypersonic deceleration devices
[AIAA PAPER 70-1207] 21 p3752 A70-41811

DRAG COEFFICIENT

- U **AERODYNAMIC COEFFICIENTS**
U **DRAG**
DRAG DEVICES
NT **AERODYNAMIC BRAKES**
NT **BALLUTES**
NT **DRAG CHUTES**
NT **SPOILERS**
NT **TRAILING-EDGE FLAPS**
NT **WING FLAPS**
Streamers (drag devices) tests at subsonic speeds, measuring drag dependence on size, weight, shape and velocity
20 p3559 A70-40282
Euler buckling of inflated toroidal drag bodies, including packaging and load deflection tests for Mylar, dacron-neoprene and stainless steel-silicone fabrics
[AIAA PAPER 70-1198] 21 p3932 A70-41818
Attached Inflatable Decelerator for planetary atmospheric entry, discussing mission applications and wind tunnel models performance
[AIAA PAPER 70-1163] 21 p3931 A70-41848
- DRAG EFFECT**
U **DRAG**
DRAG MEASUREMENT
Air-glass particle suspensions flows in shock tubes, deriving effective drag coefficients from simultaneous particle concentration and pressure measurements
[ASME PAPER 69-WA/FE-21] 04 p0667 A70-14778
Periodic drag of vibrating cylinders as function of excitation amplitude and frequency, noting similarity to nonlinear oscillator subjected to forced vibration
04 p0691 A70-15148
Pressure distribution and drag measurements at flat triangular bodies and rectangular plates with blunt trailing edge in compressible flow
06 p0965 A70-17243
Sphere drag measurements in low density hypersonic transition and near free molecular flow
06 p1124 A70-18373
Plastic lubricants motion in circular pipes, determining drag and cross sectional velocity profile of laminar flows
07 p1290 A70-18652
Drag on sharp cones in hypersonic flow, studying effects of intense transverse mass injection through porous walls
09 p1603 A70-22441
Drag coefficients for spheres and sharp cones in rarefied hypersonic air flow obtained in shock tunnel using free flight technique
09 p1605 A70-23221
Drag measurement for star-shaped body at hypersonic speeds, comparing results with cone-shaped model
10 p1799 A70-24122
Boundary layer equations for laminar flow, drag and heat transfer of gas in circular tube, considering parabolic and uniform entrance velocity profiles
15 p2722 A70-32692
Exhaust nozzle model tests at high subsonic Mach numbers, investigating differences in nozzle drag in contrast to engine conditions
[AIAA PAPER 70-668] 16 p2967 A70-33573
Wing camber and twist effects on transonic drag, using wind tunnel measurements
16 p2840 A70-34321
Magnetic field and permeability effects on drag in steady axisymmetric MHD flow of incompressible fluid around full and hollow spheres
19 p3477 A70-37577
Cylindrical afterbodies base pressure drag under powered supersonic flight, modifying Korst flow model recompression criterion
22 p3959 A70-42713
Strike fighter aircraft fuselage side air intakes, measuring external drag as function of design at subsonic and supersonic speeds
[ICAS PAPER 70-49] 23 p4133 A70-44146
Entrainment theory for incompressible turbulent boundary layer velocity and drag on bodies of revolution employed in fuselage, submersible and cowlings for propulsion design
23 p4182 A70-44400
Free jet flow axial gradient effects on drag coefficient measurement of slender blunted cones at zero attack angle
23 p4135 A70-44584
- DRAG REDUCTION**
Monograph on aircraft aerodynamic nozzle asymmetry effects for pressure drag reduction in critical conditions
03 p0465 A70-13003
Laser velocimeter measurements on drag reducing polyacrylamide solution compared to water
03 p0502 A70-13821
Supersonic missile drag reduction through wake heating assuming conical shaped missile tail and flow nonseparation
[DFVLR-SONDDR-36] 04 p0616 A70-15165
Drag reduction on blunt-based body of revolution with boat-tailed afterbodies in low speed flow
05 p0790 A70-16501

- Frictional drag reducing polymer solution injection into boundary for turbulent pipe flow, discussing Reynolds number, injection rate, injection points and concentration
06 p1032 A70-17215
- Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions [AIAA PAPER 70-56]
06 p1037 A70-18030
- Boundary layer research during past decade covering crosshatching during reentry, transition, drag reduction by LFC or compliant surfaces
08 p1483 A70-21040
- Camber and twist distributions for closed ground effect wing optimum design for zero induced drag, employing linearized theory
10 p1801 A70-24158
- Viscous fluid dynamics for reducing hydrodynamic resistance, discussing aquatic animals speeds, vortex flows, etc
10 p1871 A70-25193
- Cylindrical afterbody drag reduction in transonic flow by combined gas ejection and boat-tailing
11 p1976 A70-25991
- Maximum thrust and drag reduction for supersonic missiles by base burning, showing dependence on chemical reaction and Mach number
12 p2158 A70-28208
- Model for hydraulic resistance reduction for turbulent fluid flows by injecting suspended impurities
15 p2719 A70-31489
- Long chain molecule additive effect on drag reduction in turbulent flow of aqueous polymeric solutions
17 p3066 A70-34525
- Drag optimal stern section of plane body at supersonic flow, allowing for friction forces
18 p3206 A70-36261
- Spike effect on nose drag and static stability of blunt bodies, estimating optimum length for drag reduction at zero angle of attack
20 p3558 A70-39702
- Minimum-drag boattail configurations optimization for supersonic flow, determining wave drag coefficients
22 p3961 A70-42714
- DRAGULATORS**
U BRAKES [FOR ARRESTING MOTION]
U DRAG DEVICES
- DRAINAGE**
Aerial photography analysis of drainage basin discharge properties, discussing surface runoff, subsurface flow and underground water movement
10 p1879 A70-24750
- Automatic measurement of drainage networks for lengths and areas by copper plate etching or flying spot scanner on transparencies or radar images
20 p3633 A70-39794
- DRAINING**
U DRAINAGE
- DRAWINGS**
Regular and irregular line-drawing data processing, discussing quantization and encoding methods
12 p2193 A70-28104
- Mars 1969 planetary surface drawing and photograph evaluation, noting dark spot east of Nodus Lacoontis
17 p3154 A70-34677
- DREAMS**
Collection of articles on fatigue, sleep and dreams covering mechanisms, biochemistry, pathological physiology, etc
15 p2680 A70-31739
- DRIFT**
HF instabilities effect on magnetospheric drift waves, considering Alfvén mode in auroral plasma
13 p2482 A70-30084
- DRIFT [INSTRUMENTATION]**
Doppler memory mode of ground speed and drift angle calculations analyzed by operators for possible errors
04 p0716 A70-14629
- Telescope servocontrol system with low pointing error and drift rate, permitting extended time exposure photography of star or deep space probe
12 p2202 A70-26869
- Drift of two platform gyroazimuth with stabilized base under harmonic or random vibrations
15 p2734 A70-31622
- Viscous friction force moments effect on gyroscope drift in gimbal suspension during base angular vibrations, obtaining drift velocity
15 p2738 A70-32153
- Open faced polyimide-backed strain gage for transducer and/or long term applications, considering drift and zero shifts
15 p2739 A70-32329
- Drift reducing NMR stabilization of Hall regulated electromagnet, applying error signal to bias coil
21 p3827 A70-41456
- DRIFT RATE**
Ionospheric discontinuities drift velocities from diversity reception data indicating no dependence on solar activity
01 p0083 A70-11531
- Electron transverse and perpendicular drift velocities calculated at moderate and strong magnetic fields for hydrogen, using Maxwellian energy distribution and equivalent pressure concept
02 p0348 A70-12654
- Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data
03 p0565 A70-13231
- Kinetic equation of helicons interactions in electron-hole plasma, discussing turbulence spectrum and effect on current carrier drift velocity
03 p0531 A70-13407
- Magnetic activity effect on ionospheric drift speeds variation with latitude, observing correlation with electron density
05 p0837 A70-15922
- Large scale ionospheric inhomogeneities anisotropy, dimensions and drift velocities from simultaneously measured irregular refraction
05 p0841 A70-16739
- Radio astronomical observations of shape and drift velocity of focusing ionospheric discontinuities
05 p0841 A70-16740
- Meteor trail drift characteristics from telescopic observations, determining velocity and diffusion coefficient
05 p0920 A70-16975
- HF drift instabilities of plasma with nonuniform magnetic field, studying anomalous ion heating and resistance in Zeta instabilities
06 p1119 A70-17502
- Propagation in perturbed magnetically focused electron beams, noting influence of spatially varying drift velocity and damping effect
07 p1239 A70-18867
- Diffraction pattern drift velocity increase with temporal frequency of Fourier components by dispersion analysis of interplanetary scintillation, noting solar wind structure
07 p1388 A70-20076
- Interplanetary plasma inhomogeneity size, shape and spatial orientation and drift velocity and direction determined from radio telescope data
08 p1580 A70-21664
- Horizontal ionospheric drift rates and traveling wave disturbances, showing differences between winter and summer
09 p1667 A70-22493
- Drift dissipative instability of weakly ionized plasma, considering ion motion along magnetic lines in dispersion equation
10 p1923 A70-24407
- Solid state plasma drift velocity effect on helicon propagation constant assuming isotropic momentum relaxation time and effective mass
10 p1928 A70-24831
- Archeomagnetic measurements showing westward drift of geomagnetic intensity and correlation of magnetic earth moment with radiocarbon production
11 p2044 A70-25599
- Spherical electroacoustic waves in drifting thermal plasma, describing ion acoustic perturbations
12 p2279 A70-27779
- Drift wave instabilities nonlinearities, discussing plasma growth rate and saturation coefficients, damping rate as function of amplitude and lower mode modification
12 p2280 A70-27786
- Drift waves relation to anomalous cross field diffusion in fully ionized magnetoplasmas, introducing model predicting amplitude, correlation time, fluctuation spectrum and diffusion process
12 p2280 A70-27788
- Lower ionosphere nonuniformities drift velocity and direction using space diversity reception
14 p2571 A70-30233
- Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field
14 p2624 A70-31046
- Barium ion clouds striation formation above E layer ascribed to LF gradient drift instability
15 p2727 A70-31908
- Electron mobility, diffusion, drift velocity and attachment in oxygen, determining Townsend primary ionization coefficient
15 p2776 A70-31969
- Viscous friction force moments effect on gyroscope drift in gimbal suspension during base angular vibrations, obtaining drift velocity
15 p2738 A70-32153
- Doped Gunn diode domain field width, nucleation and annihilation dependence on electron drift velocity
16 p2879 A70-34044
- Drift velocity for bound electron orbital motion in static axisymmetric magnetic field
16 p2959 A70-34187
- Refractive index equation for Whistler propagation in weakly drifting magnetoplasma
16 p2959 A70-34224
- VHF auroral scatter signal correlation analysis, determining scale size and drift velocity of scattered field
17 p3047 A70-35548
- Ionospheric drift velocity fluctuations by similar fading method, discussing applicability and errors
19 p3408 A70-37312
- Auroral phenomena interdisciplinary investigations, discussing electron precipitation and conjugate point drift due to geomagnetic axis position variations
19 p3411 A70-37493
- Electron drift velocity longitudinal variation in equatorial electrojet, noting land-sea boundary and magnetic anomalies effects
20 p3620 A70-39337
- Slow ions mobility, diffusion and reactions in gases by drift tubes, developing mathematical analysis of drifting ion swarm space-time behavior
20 p3676 A70-40152
- Gaseous neon plasma positive column electrons density and drift velocities measurements by Langmuir probe technique
20 p3683 A70-40163
- Pulsars subpulse intensities and shapes in magnetic field, noting drift speed sawtooth patterns
20 p3713 A70-40428
- Satellite-borne sensor for ionospheric ions velocity measurement, describing design and principles of operation
21 p3813 A70-40834
- Ionospheric ions drift velocity horizontal and vertical components distribution, using satellite-borne sensor
21 p3813 A70-40835
- Collisionless nitrogen plasma drift velocity measurement by ion acoustic wave method
21 p3859 A70-41760
- Dynamo region electrostatic fields effects on magnetospheric drift, taking electrical conductivities and solar and lunar tidal modes into account
23 p4185 A70-43836
- Electron precipitation latitude extent and drift rate magnetospheric substorms from ESSA riometer data
23 p4186 A70-43850
- Plasma with oriented charged particle fluxes macroscopic parameter measurement by multigrad probes facing and reversed to drift, noting graphical data processing
24 p4385 A70-45454
- Pressure gradient induced drift waves in collisionless hydrogen plasma in homogeneous magnetic field
24 p4388 A70-46209
- Lower ionosphere nonuniformities drift velocity and direction using space diversity reception
24 p4331 A70-46308
- DRILLING**
Equations for deep hole drilling errors calculations ensuring accuracy
07 p1291 A70-18826
- Electrochemical machining for drilling deep holes in alloys and refractory metals used in jet engine hardware
10 p1893 A70-23857
- Drilling rates improvement for Ti by adding ultrasonic vibration to conventional process
19 p3437 A70-38421
- Carbon dioxide laser adapted for high speed drilling of fine holes in thin rubber sheeting
23 p4201 A70-44474
- Drilling machinability of wrought Al alloys, relating tool force to hardness, feeding and cutting speed
24 p4349 A70-46195
- Si content and chip treatment effects on drilling machinability of Al-Si alloys
24 p4349 A70-46199
- DRINKING**
Hunger, thirst and environmental stimuli roles in development and elicitation of stimulus bound eating and drinking in animals
13 p2355 A70-29806
- Photoperiod effects on rats food and water intake, noting endogenous feeding rhythm correlation with activity patterns
24 p4296 A70-45332
- DRIVES**
Simulator servo drive system dynamic requirements for single-axis manual control task using pilot models and computer
10 p1858 A70-24208
- [AIAA PAPER 70-355]
Hypothalamic motivation, presenting data supporting less anatomical specificity
13 p2355 A70-29794
- DROGE PARACHUTES**
U DRAG CHUTES
- DROGUES**
U TOWED BODIES
- DRONE AIRCRAFT**
NT TARGET DRONE AIRCRAFT
TV system for controlling QF-9 drone aircraft landing, takeoff and BQM-34A target drone in-flight test operations
01 p0058 A70-10815
- Remote control turboprop drone aircraft for long unmanned electronic intelligence or tactical communications relay missions
08 p1435 A70-20625
- Negative g Drone aircraft surface tension fuel system preventing air inclusion in turbojet engine fuel by tank filters/screens/ [AIAA PAPER 70-910]
17 p3019 A70-35822

DRONE HELICOPTERS

U DRONE AIRCRAFT
U HELICOPTERS

DRONE VEHICLES

NT DRONE AIRCRAFT
NT TARGET DRONE AIRCRAFT

Parachute recovery system for surveillance drone and landing bag subsystem
[AIAA PAPER 68-935] 14 p2531 A70-30858

DROP SIZE

Holograms of light scattered by clouds of water droplets to determine drop size, noting agreement with Mie theory 02 p0296 A70-11890

Liquid diethylcyclohexane /DECH/ sprays detonation propagation in gaseous oxygen, studying drop size effect on steady state development 02 p0351 A70-12003

Supersaturated vapor condensation in supersonic nozzles, obtaining flow and droplet growth equations for local equilibrium condition 02 p0279 A70-12049

Disintegration of charged distilled water jets, discussing drops size, velocity distribution and instabilities 03 p0467 A70-13781

Frozen wax measurement of droplet sizes and sprays from impinging injector elements, concerning like and unlike doublets and quintuplets 04 p0786 A70-15416

Cloud chamber investigation of artificial cloud of water droplets in electrostatic field, discussing cloud precipitation, collection efficiency and fog dissipation 05 p0879 A70-16689

N-heptane and Freon-13 droplets vaporizing size and temperature at supercritical pressures in heated air stream [AIAA PAPER 70-6] 06 p1182 A70-18204

Airborne precipitation drop sampler imprint size relationship to water drop diameter 10 p1857 A70-23932

Nozzle fuel and air system geometrical parameters to determine mean diameter of fuel droplets, dispersion angle and spectrum and flame jet shape 10 p1930 A70-24295

Fog droplet size growth time dependence and spectral variations during simulated cloud formation by water vapor condensation in chamber 14 p2601 A70-30128

Model for droplet size spectrum in cloud with spatial inhomogeneity of nuclei concentration, determining characteristic size dependence on altitude 14 p2601 A70-30129

Monopropellant rocket combustion one dimensional theory with uniform velocity and size droplets injection, obtaining chamber length 14 p2629 A70-30773

External burning fuels environmental temperature requirements from nonlinear droplet ignition model, emphasizing droplet size importance [AIAA PAPER 70-607] 16 p2997 A70-33604

Cloud droplet agglomeration by weak shock waves, discussing growth mechanism 17 p3067 A70-34549

Centrifugal atomizer mean drop size dependence on geometry, fluid properties and discharge velocity 18 p3300 A70-36274

Prototype cloud physics laser nephelometer design and performance, determining droplet concentration and size from scattered light pulse count and amplitudes 20 p3626 A70-39081

Water droplet size measurement by forward light scatter holography, evaluating reconstructed wave front by Fresnel transform 20 p3628 A70-39132

Aerosol IR emission, discussing relative humidity, water droplet size and temperature effects on atmospheric radiance levels 21 p3846 A70-40804

Fuel nozzle sprays mean droplet diameter based on computerized analysis of small angle forward scattered light profile 21 p3806 A70-40805

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Fuel atomization drop size calculation for mechanical swirl injectors with and without air input 21 p3867 A70-41770

Drop-weight tear test evaluation taking into account operator, test machine, specimen thickness, notch type and strength level effects 15 p2759 A70-32241

Hydrostatic stability and damping characteristics of perforated plates and screens for passive propellant control schemes from drop tower tests [AIAA PAPER 69-531] 15 p2787 A70-32510

Drop weight tests U DROP TESTS

DROPS (LIQUIDS)
NT RAINDROPS

Mathematical model of spherically symmetric quiescent droplet undergoing quasi-steady vaporization near thermodynamic critical point 01 p0213 A70-10291

Mass loss rate of evaporating liquid droplet with vapor reacting with oxygen of atmosphere in combustion front [DFVLR-SONDDR-16] 01 p0216 A70-10932

Fuel droplets burning at pressures sufficient to reach critical temperature under zero gravity conditions in free fall apparatus 02 p0351 A70-12002

Liquid sodium droplets spontaneous ignition and combustion in controlled oxidizing atmosphere, discussing vapor phase diffusion flame, burning rates and evaporation constants 02 p0396 A70-12005

Burning constants prediction for suspended hydrocarbon fuel droplets based on modified theoretical equation 03 p0544 A70-13916

Flame structure of liquid methanol burning spheres, discussing temperature and composition profiles 03 p0544 A70-13924

Physical and chemical phenomena and critical factors underlying, furthering or impeding water droplets coalescence in glass-fiber bed of filter-separator 04 p0625 A70-14709

Frozen wax measurement of droplet sizes and sprays from impinging injector elements, concerning like and unlike doublets and quintuplets 04 p0786 A70-15416

Ignition of freely falling single fuel droplets, considering initial size, oxidizer temperature, fuel composition, droplet spacing, etc 04 p0733 A70-15540

Supersaturation during droplet-liquid phase formation in clouds estimated from trough formed on curve of distribution function 06 p1097 A70-17796

Combustion processes and ignition criteria in shock wave ignition of liquid fuel drop in oxidizing atmosphere [AIAA PAPER 70-9] 06 p1180 A70-18142

Evaporation rate from spherical drop into vacuum influenced by molecular collisions occurring in gas cloud formed by emitted particles 06 p1113 A70-18283

Solid surface-compressible liquid drop high speed impact damage, discussing contact pressure 06 p1053 A70-18611

Burning rates of monopropellant droplet evaluated by variable property models, discussing dimensionless mass flow rate 07 p1358 A70-18914

Integral method for time development of viscous, heat and mass conducting layer over leading edge of volatile drop instantaneously immersed in gas stream 07 p1358 A70-18916

Quasi-steady adiabatic vaporization and exothermic decomposition of monopropellant spherical droplet in inert and reactive environments 07 p1359 A70-19580

Metal erosion under liquid drop impingement attack, investigating damage from microplastic deformation to surface material removal using wheel and jet apparatus 08 p1519 A70-21354

Electrohydrodynamics of charged water drop pairs disintegration in electric field concerning warm cloud electrification 10 p1912 A70-24806

Warm clouds electrification calculated for electromagnetic field growth by inductive mechanism, noting role of water drop pair interaction 10 p1913 A70-24807

Oxide transport and water vapor effects on flash-heated beryllium droplet combustion 10 p1969 A70-25042

Initial cloud formation model, computing drop concentration and supersaturation 11 p2075 A70-25917

Deposition zone on sphere and aerosol particles flux onto sphere as functions of flow Reynolds and Stokes numbers, discussing drop deformation effects 12 p2263 A70-27513

Carrier gas effect on homogeneous condensation in supersonic nozzle using liquid drop theory 12 p2211 A70-27829

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using

Prandtl mixing length theory to estimate pulsation velocities 12 p2213 A70-28218

Radiating drop unsteady vaporization or growth for uniformly distributed internal heat sources, discussing gas temperature distribution and diffusion thermal effect 13 p2521 A70-29417

Shock wave interaction with burning liquid fuel droplets in gaseous oxygen atmosphere, observing wave amplification due to mass combustion rate increase 13 p2522 A70-29424

Surface temperature fluctuations during dropwise condensation at various heat fluxes 14 p2663 A70-30256

Cloud droplets coagulation growth, calculating aerosols inertial capture coefficient by fine jet method 14 p2602 A70-30390

Droplets collision and coagulation for processes in aqueous aerosols, discussing interaction with collectors 14 p2603 A70-30391

Evaporation and combustion kinetics of droplets and particles in hot air stream, observing luminous trace 14 p2664 A70-30392

Liquid fuel droplet ignition quasi-stationary theory occurring at maximum chemical reaction rate 14 p2664 A70-30393

Flameout from burning liquid fuel droplet within reduced film theory 14 p2664 A70-30394

Spherical liquid drop deformation time dependence in unbound fluid at low Reynolds number, investigating effects of temperature, pressure, velocity and size 15 p2722 A70-32795

Gaseous flows and local droplet velocity measurement in dense gas/liquid sprayfields, using noninterference technique [AIAA PAPER 70-728] 16 p2910 A70-33491

LF unsteady behavior of liquid propellant rockets from droplets evaporation and combustion rates [AIAA PAPER 70-620] 16 p2968 A70-33589

Liquid nitrogen drops anomalous behavior in film boiling, resolving vaporization time discrepancies 17 p3194 A70-34741

Capillary ball game phenomenon under weightlessness, showing photographs of mercury droplet reflection from fluid boundary 18 p3242 A70-36638

Nonisothermal condensation in ionized vapor as function of energy additions to droplets 20 p3680 A70-39989

Solid particles or liquid drops admixture effect on propagation of inhomogeneous turbulent gas jet, using Prandtl mixing length theory to estimate pulsation velocities 20 p3612 A70-40091

Interfacial instability effect on heat transfer to liquid nitrogen drops undergoing film boiling on flat Al surface, obtaining vaporization rates and times 21 p3948 A70-41203

Liquid droplet shape effect flow field velocity and pressure distribution over windward surface in high speed gas streams 21 p3809 A70-41762

Gas velocity and static pressure effects on evaporation rate of moving liquid fuel droplets 21 p3953 A70-42094

Cloud droplet growth rapid computation using number density mean value for integrating stochastic coalescence equation into differential equation 22 p4064 A70-42910

Water drop-solid surface collision experiments to study rain impact erosion process, using gas gun projectiles, high speed photography, photomicrography and profilometry techniques 22 p4116 A70-43096

Liquid droplet breakup by aerodynamic forces, obtaining solutions for fluid flow inside droplet and in coupled liquid-gaseous boundary layer 22 p4012 A70-43741

Liquid nitrogen drops undergoing film boiling on Al surface, measuring heat transfer coefficient 23 p4279 A70-44360

Spherical shape gas or liquid drop steady motion at large Reynolds numbers, examining buoyancy forces and velocity gradients 24 p4326 A70-45996

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Photographic measurement of droplets size, velocity and number during sprayed liquid fuel combustion, using Xe flash bulbs 24 p4429 A70-46008

Xanthine dehydrogenase activity in *Drosophila* and *Habrobracon* under hypogravity conditions onboard Biosatellite

DRY CELLS

NT MAGNESIUM CELLS

NT NICKEL ZINC BATTERIES

Nickel cadmium battery construction capabilities and limitations from design engineer and aircraft operator viewpoint

11 p1983 A70-25898

DRY FRICTION

Surface roughness effects on dry friction between two metals, considering conical asperities and friction coefficients

[ASME PAPER 69-LUB-10] 01 p0102 A70-10394

Unlubricated wear characteristics of polyimide resin sliding against carbon steel in air, noting effects of surface temperature, bearing pressure and velocity

01 p0103 A70-10448

Harmonic vibration testing of aircraft structural nonlinearities caused by dry friction, describing pitch control system

02 p0387 A70-12215

Power gyro stabilizer stability with dry friction at bearings, using point mapping to obtain system phase image

03 p0484 A70-13365

Particle, resin and inorganic bonding of solid lubricant to surface and dry lubricant film performance

05 p0855 A70-16043

Metal surfaces contact with cones and pyramids asperities, analyzing surface roughness effects on dry friction

11 p2060 A70-26412

Degassing kinetics during dry friction in vacuum, suggesting gas separation correspondence to oxide film breakdown

13 p2421 A70-29430

Dry friction and wear tests of various materials in vacuum at low temperatures

18 p3263 A70-36471

Polymethyl methacrylate glasses microcracks removal by dry friction

21 p3841 A70-40645

Moving object coordinates autonomous determination errors in accelerometers with dry friction, investigating inertial navigation system with integral horizon correction

23 p4193 A70-43981

DRY HEAT

Dry heat resistance of bacillus subtilis var. niger spores on selected planetary lander capsule surface materials

04 p0645 A70-15442

DTMB-430 GROUND EFFECT MACHINE

U GROUND EFFECT MACHINES

DUAL THRUST NOZZLES

Dual flow turbojet engine rotor slip constraints during turning, investigating turbine blade strength, thrust deviation, fuel consumption and compressor stability

10 p1930 A70-24285

DUCTED BODIES

Hypersonic flow region about ducted blunt bodies of revolution, assuming correspondent flow conditions to maximum intake through duct

04 p0617 A70-15233

Heat transfer from inner wall of annular ducted cylindrical body cooled by liquid nitrogen, discussing effects of Teflon, asbestos and vaseline coating and thickness effects

08 p1596 A70-20577

DUCTED FAN ENGINES

NASA acoustically treated nacelle program reducing noise under commercial transport flight path near airports

22 p4089 A70-42529

Acoustic lining technology and materials for turbofan engine ducts, considering environmental factors and noise spectra

22 p4089 A70-42530

Structural and environmental design criteria for acoustical duct-lining materials in turbofan noise suppression

22 p4089 A70-42531

Duct lining parameters effects on engine inlet and fan discharge noise reduction during fan jet landing

22 p4090 A70-42532

Acoustically treated inlet and fan exhaust duct configurations for JT3D turbofan engine on DC 8 aircraft

22 p4090 A70-42533

DUCTED FANS

Optimum low speed ducted fan design for minimum noise generation

[ASME PAPER 69-WA/GT-4] 04 p0734 A70-14891

Rotating acoustic modes generated at blade passing frequencies in inlet duct of axial flow fan or compressor measured

04 p0691 A70-15079

Design parameters for optimum heavily loaded single rotation ducted fan characterized by ultimate wake vortex system

[AIAA PAPER 69-222] 12 p2157 A70-28083

Shock wave radiation from supersonic ducted rotor, determining sound power at blade passing harmonic frequency

19 p3353 A70-38614

DUCTED FLOW

NT KNUDSEN FLOW

Reflection and transmission characteristics of screens in duct obstructing shock propagating in unsteady compressible fluid, describing theoretical models and experimental detection

01 p0060 A70-10224

Entrainment of electrically conducting liquid by moving wall in long duct with rectangular cross section and magnetic induction field

01 p0151 A70-10656

Unsteady incompressible laminar flow under time dependent body force solved for rectangular and circular conduit and plane and cylindrical Couette flows

01 p0066 A70-11130

Flow patterns in circular ducts with circumferential roughness variation, determining axial turbulence, Reynolds number effect and applications as two phase flow analog

01 p0066 A70-11132

Modified shock layer theory for predicting hypersonic internal flow in axisymmetric converging duct with attached shock at leading edge

02 p0276 A70-11854

Laminar isothermal entrance flows in circular cross section ducts with uniform mass injection at wall from

boundary layer equations, discussing molecular weight effects

02 p0288 A70-12859

Monograph on laminar flow heat transfer in thermal entrance region of flat and profiled ducts, treating construction and efficiency of plate heat exchangers

03 p0603 A70-12988

Temperature sensor location for accurate averaging in fluid flowing through heated or cooled circular duct

03 p0486 A70-13557

Incompressible viscous fluid rectilinear flow along arbitrary cross section duct under pressure gradients oscillating at large frequencies

03 p0468 A70-14147

Unsteady MHD flow of viscous incompressible electrically conducting fluid through rectangular duct under transverse magnetic field

03 p0471 A70-14333

Heat transfer coefficient in turbulent duct flow of fine particles suspension, using coupled similar equations

03 p0608 A70-14382

Striated plasma flow in MHD duct of conducting rings using Ar with K vapor detected by high speed camera

04 p0725 A70-14533

Ideal fluid flow past sphere in rectangular duct and slot solved in series form in spherical functions

04 p0666 A70-14605

Incompressible electrically conducting fluid flow along rectangular duct under transverse magnetic field, noting equivalency of Hunt solutions and thin wall restriction

04 p0726 A70-14614

Hypersonic flow region about ducted blunt bodies of revolution, assuming correspondent flow conditions to maximum intake through duct

04 p0617 A70-15233

Ducted turbulent mixing and burning of coaxial streams, presenting experimental results for rocket-air mixing system

[AIAA PAPER 69-85] 06 p1130 A70-17171

Dynamic characteristics of systems consisting of train and air in tunnel using one dimensional incompressible fluid description

[AIAA PAPER 70-141] 06 p1042 A70-18216

Thermal entrance region effect on Nusselt number determination in asymmetrically heated rectangular duct with uniform heat flux

07 p1425 A70-20223

MHD flow in rectangular duct with arbitrary conductivity via modified Fourier method, obtaining magnetic induction and current for various Hartmann numbers

[ASME PAPER 69-WA/APM-17] 08 p1551 A70-21308

Instantaneous velocities measured for wall region of smooth duct during turbulent fluid flow by chronophotography of particles

09 p1658 A70-22046

Steady laminar gas flow on duct wall boundary layer considering external swirling flow and wall heat transfer

09 p1659 A70-22428

Average velocities profile measurement in wall region of turbulent fluid flow in smooth duct

09 p1661 A70-22838

Shock wave initiated two dimensional time dependent ducted flows in nonuniform regions using fluid-in-cell method, discussing density, pressure and energy distributions

09 p1665 A70-23740

Spectrum analysis of unsteady duct flow caused by pressure loss induced instability

10 p1863 A70-24026

Gas flow from nozzle into duct with enlarged cross section investigated for flow pattern and boundary conditions, noting oscillation behavior

10 p1799 A70-24123

Wall shear stress distribution in rectangular ducts, discussing secondary currents and main flow prediction

11 p2035 A70-25779

Nonsteady flow past duct junctures, investigating ventilation system of underground bomb shelter for blast wave passage prevention

11 p2036 A70-26139

Lambda type pseudoshock /shock during supersonic flow deceleration to subsonic in duct, investigating mechanism by schlieren photography

11 p2037 A70-26408

One dimensional compressible flow with heat addition in nonconstant area duct extended for friction addition, discussing critical thermal shocking

11 p2041 A70-26651

Wall shear stress distribution in noncircular ducts with steady incompressible fluid flow

12 p2209 A70-27217

Turbulent and laminar heat transfer to gases in circular ducts entry region, considering various gas properties

12 p2212 A70-28114

Inflow and pressure difference for mean flow in straight suction duct with porous walls, using elementary momentum analysis 13 p2392 A70-30020

Incompressible turbulent fluid flow through ducts and pipes by integral boundary layer techniques, considering entrainment principles 14 p2564 A70-30258

MHD power generation, investigating replenishment of zirconia electrodes from plasma in open flame and duct configurations 14 p2534 A70-30535

MHD experiments showing effects of local water supply electrical conductivity from measurements of voltage distribution, pressure gradients and extracted power 16 p2957 A70-32998

Ignition and combustion in ducted turbulent supersonic flow, discussing premixed and unpremixed ethylene [AIAA PAPER 70-720] 16 p2997 A70-33488

Integral model for combustion of metal particle laden jet mixing with subsonic secondary stream in duct, considering air breathing engine design [AIAA PAPER 70-736] 16 p2964 A70-33490

MHD flow velocity and magnetic flux profiles in rectangular ducts for secondary boundary layer 16 p2959 A70-34239

Turbulent air flow in vertical square duct, investigating local heat transfer and friction coefficients 18 p3347 A70-36506

Sound transmission and suppression in turbomachinery fans and compressor ducts, using three dimensional wave equation [ASME PAPER 70-GT-58] 18 p3304 A70-36873

Laminar incompressible flow in arbitrary cross sectioned entrance region of ducts by numerical technique after transformation to boundary value problem [ASME PAPER 70-GT-91] 18 p3243 A70-36878

Axissymmetric one dimensional compressible flow theory applications to compressible fluids ducted flow [ASME PAPER 70-GT-82] 18 p3243 A70-36882

Liquid with small electrical conductivity and kinematic viscosity in intense transverse magnetic field, examining plane and three dimensional duct flow 19 p3478 A70-37589

Velocity profiles of laminar flow through rectangular duct with moving wall and arbitrary cross section under nonslip boundary condition 19 p3405 A70-38043

Perturbation method for nonlinear acoustic wave propagation in steady one dimensional flow through variable cross section duct 20 p3673 A70-39612

Plasma inhomogeneities effects on MHD generators I-V characteristics, energy conversion efficiency and optimum duct geometry 20 p3564 A70-39636

Mach number effect on sound propagation in tuning acoustically lined rectangular duct with uniform flow 20 p3673 A70-39709

Laminar flow of liquid in duct with zero heat resistance of walls, calculating temperature distribution during radiative convective heating 20 p3613 A70-40297

Turbulence measurements in ducted coaxial air flow with faster outer stream pertinent to gas core nuclear rocket feasibility 21 p3809 A70-41748

Multiple tube manometer with selector switch for measuring flow channel wall pressures 23 p4194 A70-44000

Sound radiation from unflanged circular waveguide duct with flow, calculating reflection coefficients, directivity pattern and power for comparison with approximate methods 23 p4219 A70-44392

Incompressible laminar flow in entrance region of rectangular duct allowing direct computation of eigenvalues 24 p4287 A70-45294

DUCTED PROPELLERS

U SHROUDED PROPELLERS

DUCTILITY

Transformation induced plasticity steels tensile properties measurement indicating loss of ductility due to H embrittlement 01 p0118 A70-10729

Polycrystalline Mo ductility at low pressures in tension at ambient temperature, discussing H type embrittlement mechanism 01 p0121 A70-11234

Tensile tests of polycrystalline Nb-H alloys at low temperatures, noting cooling rate effect on ductility in terms of microstructure 01 p0122 A70-11240

High temperature ductility improvement in stainless steels containing He, analyzing lattice damage and interphase cavities after fast neutron irradiation 01 p0123 A70-11246

Cr alloys applications in high temperature environments, describing alloying elements effects on strength and ductility 03 p0511 A70-13566

Elastoplastic bar stability compressed by tangential force, showing ductility effect on critical parameters, perturbed motion and stability loss process 04 p0767 A70-14484

Erosion characteristics similarities and differences of brittle and ductile materials, noting dependence on particle velocity and diameter [ASME PAPER 69-WA/MET-7] 04 p0704 A70-14761

Prealloyed powders of Ni base alloys, made by inert gas atomization for improved strength and ductility 04 p0706 A70-14951

Maraging steels microstructure and ductility influence on stress corrosion resistance in magnesium chloride salt chamber 04 p0711 A70-15681

Alloy E1 602 ingots low ductility during forging ascribed to nonferrous metal atoms, decreasing iron diffusion and forming brittle nitride and carbide compounds 05 p0863 A70-16545

Continuous metal fiber composites tensile strength and ductility in terms of plastic instability 05 p0946 A70-16924

Creep, ductility and short term tensile and compression strength test facility for graphite in 300-3500 K temperature range 05 p0875 A70-17068

Cold reduction and annealing temperature effects on Al sheet ductility noting roles of hardness, crystallographic orientation and microscopic structure 06 p1075 A70-17146

Polycarbonate ductile fracture measured for strain energy release rates and plastic zone size and shapes to correlate with existing theories and experimental data 07 p1321 A70-20041

Temperature, transformation and strain rate effects on tensile ductility properties of stable and metastable compositions of austenitic stainless steels 08 p1524 A70-21956

Heat resistant alloys creep ductility, considering grain boundary cavitation, sliding and migration 09 p1701 A70-22554

Microstructure and ductility of air- and vacuum-melted heats of corrosion resistant steels, investigating tensile and yield strengths for all grain directions 10 p1905 A70-25170

Interstitial and substitutional impurity effects on fracture strength, plastic properties and ductile-brittle transition temperature of vanadium determined from impact and tensile tests 11 p2066 A70-25913

Ti alloys tensile properties correlated with microstructure for multiple heat treatment cycle variations for high strength and adequate ductility 12 p2252 A70-27107

Rhenium alloying effect on room temperature ductility of Cr, Mo and W, measuring lattice parameters by Debye-Scherrer method 12 p2256 A70-27616

Metals and metal alloys ductility development, discussing plastic flow problem in metal working 12 p2327 A70-28144

Engineering development role in metal forming industry expansion, discussing metals ductility or plasticity increase for extending processes 12 p2244 A70-28146

Plastic deformation in brittle and ductile fracture, discussing elastoplastic stress analysis of cracked bodies, plane strain deformation near cracks, etc 13 p2509 A70-28601

Ductile fractures analysis using critical strain near crack tip as criterion 13 p2432 A70-28673

Plastic strain state effect on ductility and toughness of structural steels 13 p2432 A70-28675

Ductile fracture in Al matrix composite reinforced with unidirectional stainless steel fibers described by critical crack tip displacement and fracture strain criteria 13 p2512 A70-28917

Instrumented Charpy impact test evaluating strain rate, alloying and irradiation effects on ductile-brittle transition temperature and fracture of pressure vessel steels 15 p2820 A70-32239

Metal fiber multiple necking effect on uniaxial metal matrix composites ductility and plastic deformation behavior for brass-W model system 15 p2761 A70-32378

Work to fracture measurements on brittle fiber ductile-matrix metal composites, using Charpy test 15 p2763 A70-32832

Ti alloys beta forging effect on physical properties and tensile ductility 17 p3097 A70-34358

Unalloyed Ti hydrogen embrittlement, determining factors affecting brittle-ductile transition temperature 17 p3117 A70-34398

High yield strength alpha-beta Ti alloys ductility control, observing fracture strength dependence on morphology, grain location and size for constant heat treatment 17 p3119 A70-34417

Ti-Al-Sn-Zr system high temperature creep strength and ductility retention 17 p3120 A70-34424

Plastic deformation of two phase alloy with small nondeformable particles in ductile matrix, discussing cross slip, yield and flow stress, work hardening etc 17 p3126 A70-35460

Fiber reinforced composite with ductile matrix, discussing fatigue life prediction from strain hardening characteristics 17 p3128 A70-35465

Cobalt addition to Ti-Al-V alloys, examining yield strength, heat treatment, ductility and microstructure 18 p3271 A70-35964

Hydrostatic pressurization effect on ductile-brittle transition temperature of polycrystalline chromium 18 p3274 A70-36053

Rene 41 ductility reduction by environmental oxygen promoting intergranular cracking at high temperatures 18 p3277 A70-36524

Creep resistant Ni-base superalloys ductility and thermal shock resistance improvement by precision casting technique, producing columnar grain and single crystal structures 20 p3648 A70-39415

Hot work effect on properties and microstructure of wrought Waspaloy, observing temperature decrease effect on fracture ductility 22 p4054 A70-42739

Heat treatable beta Ti alloys cold workability, fracture toughness, tensile ductility and applications [SAE PAPER 700856] 24 p4361 A70-45880

Longitudinal phenomena and two phase structures effect on ductility of low carbon steel-chromium subjected to high temperature torsion 24 p4361 A70-46173

Zn-Al alloy high velocity deformation characteristics, examining ductility and aging at various temperatures and heat treatments 24 p4363 A70-46194

Precompression and pressurization effects on ductile-brittle transition of polycrystalline cast Cr, W and Mo bcc transition metals 24 p4365 A70-46371

DUCTS

NT ACOUSTIC DUCTS

NT AIR DUCTS

Fast neutron transport characteristics of helical ducts using Monte Carlo code FASTER, computing neutron fluxes and attenuation 05 p0884 A70-16163

Shock wave interactions effect on propagation in ducts with gradual or sudden change in cross section, using schlieren spark photography 09 p1664 A70-23735

Curved porous wall channels for noise suppression in power plants, ventilation systems, etc 18 p3216 A70-36302

DUFFING DIFFERENTIAL EQUATION

Large amplitude free vibration of rectangular plates subjected to aerodynamic heating with different boundaries and temperature distribution, deriving Duffing nonlinear differential equation 10 p1957 A70-24417

DUMMIES

Flotation dummy to simulate unconscious survivors characteristics analyzed for life jacket design 07 p1218 A70-19004

DUMMY LOADS

U IMPEDANCE

U LOADING

U OUTPUT

DUNGEYS WIND SHEAR MECHANISM

U WIND SHEAR

DUOCHROMATORS

Doppler effect induced small spectral line shifts measured by modified duochromator in MPD arc jet 09 p1684 A70-23531

Concentric polarization Fabry-Perot duochromator for spectral line displacement measurements applied to ion drifts in hollow cathode plasma 15 p2737 A70-32042

DUPLEX OPERATION

Duplex aging treatment effect on Ni-Co-Mo-Ti maraging steels mechanical properties 10 p1905 A70-25171

DUPLEXERS

Antenna-duplexer assembly comprising log periodic antennas, power divider and hybrid loop 09 p1649 A70-23324

DUPLICATING

U REPRODUCTION [COPYING]

DURABILITY

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens 02 p0315 A70-11658

Low alloy and stainless steels durability in various natural atmospheres, discussing corrosivity dependence on atmosphere pollutants, temperature and humidity 02 p0318 A70-12476

Molybdenum disulfide surface and bulk properties, comparing endurance of fractions and grades with synthetic chalcogenides at same layer thickness in dry atmospheres
[ASLE PREPRINT 69-LC-7] 02 p0322 A70-12538
Cyclic heating and thermal stresses effect on fatigue strength and durability of turbine blade alloys and structural elements 09 p1771 A70-22463

Materials durability in presence of stress concentration under biharmonic loading 15 p2813 A70-31527

HF endurance tests of Al sheet alloy used in welded aircraft structural components, plotting curves for heat treated and untreated specimens 19 p3452 A70-38431

Step-amplitude stress cycle program effects on durability of heat resistant alloy for turbine blades under cyclic loading 23 p4204 A70-43934

Statistical analysis of durability data of heat resistant alloys for gas turbine engines, using long term strength tests of melts in mass production 23 p4204 A70-43940

DUST

NT COSMIC DUST
NT INTERPLANETARY DUST
NT LUNAR DUST
NT METEOROID DUST CLOUDS
NT TERRESTRIAL DUST BELT
NT ZODIACAL DUST

Sand and dust environmental test of T-63 regenerative engine, discussing performance depreciation, recuperator inspection and comparison with non-regenerative t63-a-5a engine 01 p0164 A70-10685

Ice nucleating properties of dust particles above 80 km compared with soil and AgI particles 01 p0081 A70-11296

Turbulence in hypersonic nozzle due to two phase flow of ideal gas and solid spherical particles, discussing thermal and dynamic differences 03 p0407 A70-13494

Materials science experimental and diagnostic phases in mechanisms of metal erosion by impacting dust particles [ASME PAPER 69-WA/MET-8] 04 p0704 A70-14760

Radiative heat transfer through dust clouds in radiative equilibrium and isothermal clouds between parallel plates measured with heat flowmeter [ASME PAPER 69-WA/HT-41] 04 p0781 A70-14802

Dust devil wind velocity relationship to environmental parameters including atmospheric temperature, wind direction and vorticity, etc 07 p1269 A70-19948

Ar-arc-produced dust of iron, carbon, silicon carbide and silica, investigating shapes, sizes, grouping and optical absorption to simulate interstellar grains 10 p1944 A70-24957

Solid particle motions in dusty gas in inviscid hypersonic shock layers of slender wedges and cones and stagnation regions of cylinders and spheres 12 p2156 A70-27827

Dusty gas dynamics, examining shock wave structure, boundary layers stability, flow equations, acoustic damping, velocity and density perturbations, etc 17 p3068 A70-34671

Gas turbines, dust and air cleaners interrelationship in preventing failure due to air contaminants [ASME PAPER 70-GT-104] 18 p3305 A70-36890

Upper atmospheric dust composition and optical properties by crepuscular technique, using photometric measurements in 5200 A region 18 p3251 A70-36978

Dust content effect on hypersonic wind tunnel flow test results, noting drag force on slender and blunt nosed models 21 p3749 A70-42224

Atmospheric vorticity and dust devil rotation direction relationship, suggesting shear in horizontal flows associated with convective activity in unstable atmosphere 22 p4065 A70-42912

H II region dust grains thermal emission, examining effect on diffuse nebulae 24 p4413 A70-46158

DUST COLLECTORS

Boeing inertial separator system for eliminating air dust taken by CH-46 helicopter engines during takeoff and landing on unprepared areas 01 p0162 A70-10677

Particle removal efficiency of engine inlet separator-filter devices evaluated at Naval inlet test facility for simulated engine airflows, scavenging conditions, etc 01 p0163 A70-10679

DWARF STARS

NT WHITE DWARF STARS

M dwarf stars spectroscopic, spectral and photometric parallaxes calibration based on trigonometric measurements 01 p0188 A70-11333

Duplicity characteristics of low luminosity stars, considering nearby M dwarfs, white dwarfs and high velocity subdwarfs 01 p0188 A70-11334

Convective red dwarfs Kr 60 A and 60 B structure and stability taking into account electrostatic interactions between gas particles 01 p0188 A70-11337

Faint, metal poor, subluminoous and red degenerate stars occurrence and properties, considering spectra of candidate degenerates 01 p0188 A70-11338

Cool dwarf stars atmospheric models including IR opacity due to water vapor and pressure induced dipole of molecular hydrogen 01 p0190 A70-11347

M dwarf stars model atmosphere construction taking into account molecular opacities in cool stellar atmospheres 01 p0190 A70-11348

High temperature atmospheric models for red dwarf stars and sun to determine convection effect on atmospheric surface layers and emitted flux 01 p0190 A70-11349

Nongray and constant radiative flux model atmosphere for K dwarf stars with 4000 K effective temperature and 4.5 log surface gravity 01 p0191 A70-11350

Electron pressure and negative H ion population in late type dwarfs atmospheres by Ca I resonance line observation, noting non-LTE mechanism 01 p0191 A70-11351

Isophote flattening functions of elliptical galaxies including identification of giant and dwarf galaxies 02 p0377 A70-12449

Barnard two planet solar system, dwarf star perturbations, orbital parameters and comparison with Solar system 10 p1943 A70-24758

Hydrogen recombination and hydrogen molecules formation may explain sharp brightness variations in later dwarf stars 11 p2115 A70-26581

Red dwarfs and supernovae determination in stellar clusters, outlining statistical probability technique for total number of flare stars 12 p2308 A70-27872

Dwarf and neutron stars as pulsar energy sources, considering Crab Nebula X ray emission and gravitational collapse 12 p2310 A70-27990

Dwarf Me stars flare spectra, examining hydrogen recombination layer and impulse heating of photosphere 20 p3702 A70-39013

Soviet book on red dwarf star flares covering data acquisition, flare frequency, mechanisms and nebular model 20 p3705 A70-39722

Intermediate band photometry of companions to RR Lyrae variables, identifying AP Ser K line excess subdwarf 21 p3892 A70-41187

High velocity stars in Large Magellanic Cloud from spectroscopic observations, including A dwarfs and G-K giants 23 p4240 A70-44212

G8, IV subdwarf 31 Aql spectrum at 4000-6600 A, discussing Ba II 4554 A, G and CN bands and spectral lines 24 p4414 A70-46329

DWELL

Dwell time boundary and mean values for laminar flows through channel and tube reactors, obtaining field representation from streamline network and isochrones 16 p2893 A70-33745

DYADICS

Homogeneous gravitating sphere deformation by internal dislocations determined using Green dyad 06 p1055 A70-17605

Planetary motion zero-rank effects numerical integration, using Hill secular perturbation method and trace of dyadics 14 p2639 A70-30704

DYES

Photochromic aminotriarylmethane filter solutions for flash blindness protection, noting stability against xenon flash UV exposure 04 p0690 A70-15028

Saturable Q switch of cryptocyanine used in ruby laser for pulse sharpening, describing dye sensitivity to solar radiation 04 p0701 A70-15035

Flash lamp pumped tunable organic dye laser, using capacitor bank for reliable operation 05 p0861 A70-16845

Breakdown of cryptocyanine dye in methanol solution by ruby laser pulses providing passive Q switching mechanism 06 p1083 A70-18524

Blood reflection densitometer with linear response to changes in indocyanine green dye concentration, using simple analog computation 07 p1221 A70-19589

Dye laser stimulation by pumping with pulsed nitrogen laser line to obtain entire visible spectrum 07 p1301 A70-26016

Optical pumping energy effects on lasing pulse duration during pulse excitation of alcohol solutions of rhodamine 6G 08 p1511 A70-20522

Retunable lasers with organic dye dispersive resonators, studying space-angular, spectral and energy emission characteristics 08 p1511 A70-20538

Dye laser tuned to sodium D line used for measuring ionospheric atomic sodium 08 p1492 A70-21757

Organic dyes investigated for amplification characteristics of Raman emission stimulated by Q switched ruby laser 09 p1694 A70-22134

Dye laser small signal gain via pumping by UV nitrogen laser 13 p2426 A70-28811

Bleachable dye filters selection for periodic undamped output power oscillations in laser 15 p2753 A70-32859

Rhodamine C chemiluminescent material for atmospheric ozone measurements, describing preparation and luminescence spectrum 19 p3373 A70-37638

Organic dye lasers output bandwidth and tunability extension by acidification of solution 19 p3445 A70-37675

Power, energy and efficiency of emission from dye solutions pumped by incoherent light pulses, allowing for particle accumulation at metastable level 19 p3448 A70-38738

Flash lamp pumped organic dye laser intensity for dye solutions in contact with different argon-oxygen compositions, noting effect of oxygen partial pressure 21 p3834 A70-40569

Aortic regurgitated flow estimation by dye injection technique, noting correlation with cineangiography method 22 p3977 A70-42301

Excited state complexes laser action in coumarin dyes indicated from stimulated fluorescence time dependence 22 p4048 A70-42328

Rhodamine 6G triplet lifetime under continuous pumping by Ar laser 22 p4050 A70-43225

Amplification factor time dependence of dye lasing under rectangular pumping pulse, noting threshold conditions and burnout time relation to material parameters and resonator 24 p4352 A70-45473

Laser gain coefficient increased via organic compounds addition to rhodamine 6G aqueous solution 24 p4356 A70-46273

Nonlinear closed-loop automatic control systems steady state characteristics calculation by graphic method 01 p0052 A70-10194

Book on dynamics of complex systems represented by control and human operators and animals behavioral activities models 01 p0034 A70-10501

Two velocity hydrodynamic scheme for describing dynamic behavior of two phase supersonic flow past slender body 01 p0003 A70-10995

Dynamic characteristics of model of spacecraft-astonaut-tether system during approach, deriving kinetic potential 01 p0192 A70-11587

Characteristics of dynamic mechanical systems including solid state and hydrodynamic analogs of ideal incompressible fluids, based on statistical theory of turbulence 01 p0068 A70-11594

Planetary atmospheres dynamics, discussing rotational and MHD effects, energy sources, etc 02 p0366 A70-11806

Dynamical systems with two degrees of freedom reduced to numerical investigation of quadratic area-preserving mapping 02 p0289 A70-11993

Waves vs eddies in dynamics of turbulent boundary layer fluctuating motions with scale of mean flow 02 p0287 A70-12361

Self gravitating galaxies theoretical properties, including structural and dynamic characteristics of interacting and colliding galaxies 02 p0376 A70-12444

Self consistent field method to calculate effective dynamic characteristics of elastic media with filler for plane longitudinal wave propagation 02 p0388 A70-12485

Steady, homogeneous, electromagnetic plasma acceleration fields, demonstrating electric and magnetic fields effects on dynamic behavior 03 p0529 A70-12989

Unidirectional carbon and glass fiber reinforced polyester resins dynamic characteristics under torsional and flexural vibration, showing damping independence of cyclic stress amplitude 03 p0514 A70-13111

Phonon-photon scattering intensity and line shape used to study laser-excited impurity centers dynamic characteristics in stimulated induction regime 03 p0499 A70-13256

Dead zone initial disturbance of sensitive element dynamic coordinate in two rotor gyrocompass determined using method of averages 03 p0484 A70-13419

Stability and dynamics of dielectrophoretic equilibria, considering circular cylindrical column of inviscid liquid with rigid body rotation 03 p0525 A70-13784

Harmonic equilibrium method applied in dynamic properties analysis of autopilot electrohydraulic servomechanisms stability 03 p0415 A70-13930

Resistance, capacitance and inductance in passive hydraulic circuits considered in analogy with electric circuits to determine dynamic characteristics 03 p0415 A70-13931

Perturbed motion of solid body with cylindrical cavity partially filled with viscous fluid, using Rabinovich equations 04 p0766 A70-14476

Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings [ASME PAPER 69-WA/LUB-5] 04 p0697 A70-14768

Static and dynamic characteristics of inertia load driving systems using electrohydraulic pressure and flow control servovalves [ASME PAPER 69-WA/FLCS-15] 04 p0626 A70-14842

Fluidic component linearized characteristics in coupled or uncoupled environment determined for wide frequency range, discussing application to proportional fluidic amplifier [ASME PAPER 69-WA/FLCS-2] 04 p0626 A70-14847

Boundary layer momentum integral equations to predict shear layer behavior, developing method to avoid nonphysical constraint appearance [ASME PAPER 69-WA/APM-11] 04 p0669 A70-14916

Soviet monograph on numerical determination of dynamic characteristics of plates and shells by method of summary representations, covering oscillation and stability problems 04 p0773 A70-14954

Integral-criterion optimization of transient processes in mechanical systems synthesis with favorable dynamic and damping characteristics 04 p0720 A70-15218

Sound vibrations effect on pulsation characteristics of turbulent gas jet 04 p0618 A70-15248

Dynamic vibration absorbers /DVA/ efficiency in limiting excessive vibrations in mechanical systems by transferring motion to auxiliary system 04 p0699 A70-15306

Multiple skirt air cushion vehicle /ACV/ pitch and heave dynamic characteristics, describing mathematical modeling and analog computer simulation 04 p0624 A70-15389

Parasitic transient process in automatic control system during switching to mode stabilized with respect to certain coordinates 04 p0662 A70-15433

Thermal and gas dynamic characteristics of aircraft turbine engine annular vaporizing combustion chamber determined from air distribution ratio 05 p0895 A70-15897

Rotor-driven vibrational gyroscopic device dynamic characteristics, stability, transient delta function, signal response and sensitivity assessment 05 p0848 A70-16222

Dynamic strain measurement by solid state direct coupled amplifier with flat frequency response 05 p0936 A70-16322

Radio waves propagation along polar auroras region, obtaining ionospheric parameters for magnetic disturbances based on penetration probability 05 p0842 A70-16744

Plane and cylindrical elastic waves dynamic characteristics propagating in half space with holes, reducing boundary value problem and deriving formulas for interacting waves 05 p0946 A70-16858

Dynamic characteristics from equations of motion of gyroscope with allowance for structural damping forces between inner gimbal and rotor 05 p0852 A70-16961

Kinematic characteristics of annular-blank elements extruded by pulsed magnetic fields, noting proportionality to energy stored in capacitor bank 05 p0857 A70-17018

Dynamics of composite, sandwich and stiffened shell type structures with various geometries 06 p1160 A70-17158

Dynamic behavior of earth magnetosphere, discussing geophysical micropulsations, geomagnetic field diagnostics, cold plasma density, etc 06 p1139 A70-17535

Laser mode interaction characteristics determination using resonator field equation taking into account competition and coupled modes 06 p1081 A70-17765

Adaptive control algorithm for parameter adjustment of unknown dynamic characteristics of linear systems 06 p1025 A70-17956

Transducer for pressure fluctuations measurement in wide frequency range based on piezoelectric microphones, discussing dynamic characteristics 06 p1071 A70-18472

Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity 07 p1296 A70-18764

Thermoelasticity equations derived for regular systems of M bodies in dynamic and thermal interaction using nonlocal continuous model 07 p1407 A70-19381

Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies 07 p1267 A70-19455

Dynamic characteristics approximation in transfer functions class with singularity at infinity 07 p1327 A70-19806

Microwave mixer design to increase dynamic range applied to communications and video systems 07 p1243 A70-20216

Uniqueness theorem for coupled dynamic problem of linear thermoviscoelastic theory assuming contact-type boundary conditions 07 p1416 A70-20296

Soviet collection of articles on machine dynamics covering various rotor vibrations, machine/operator system, etc 08 p1501 A70-20693

Human operator dynamic properties working to maintain given process parameters, obtaining differential equations for closed machine operator system 08 p1449 A70-20696

Soviet book on liquid rocket engines dynamics, emphasizing computational engineering methods and engines automatic control 08 p1558 A70-20757

Transfer functions representing continuous dynamic systems, identifying parameters by obtaining coefficients of discrete system transfer function relating input and output sampled sequences 08 p1478 A70-20777

Model characteristics selection for dynamic system behavior simulation, studying characteristics variability extent without changing trajectory behavior dependence on parameter space 08 p1544 A70-20953

Matching operations for difference and differential equations describing discrete control systems dynamics having cyclic interruption of data quantization frequency 08 p1480 A70-20999

Adjustment process dynamics in digital adaptive system with task of ensuring minimum quadratic criterion for parameters using gradient search technique 08 p1480 A70-21017

Spatially inhomogeneous semiconductor structures dynamic characteristics, obtaining equations 08 p1474 A70-21207

Dynamic compressive properties of polypropylene, polystyrene bead and extruded polystyrene foams tested at given strain rate under room temperature 08 p1527 A70-21329

Dynamic tensile properties of monolithic and pyrolytic graphite compared with static tensile strength 08 p1527 A70-21334

Dynamic mechanical properties of filled polymers as function of filler concentration, particle agglomeration and ratio of particle to polymer modulus 08 p1527 A70-21335

Human biological organism analysis based on physiological determination of regulating and control functions dependence on oscillatory properties 08 p1452 A70-21460

Auroral zone electrojets spatial structure and dynamic behavior based on IGY and IQSY geomagnetic data 08 p1491 A70-21717

Strength and plasticity criteria for anisotropic reinforced materials model taking into account material structure, components properties and behavior 09 p1768 A70-22119

Double resonator ruby maser dynamic and static characteristics for centimeter band improved by pumping frequency modulation 09 p1695 A70-22188

Geometric, cinematic and dynamic conditions of ideal fluid adiabatic nonstationary movement expressed by differential external system /s/ 09 p1659 A70-22254

Linear one degree of freedom mechanical system loaded by time dependent force with constraints on loading/unloading rate, studying minimum of dynamic coefficient 09 p1727 A70-22536

Soviet book on servo systems for radar automatic tracking and control stations covering static, dynamic and frequency characteristics, amplifiers and correction devices 09 p1654 A70-22597

Dynamical characteristics of variable-mass flexible spinning rocket with internal flow, investigating rigid body motion, elastic displacements and vibrations 09 p1767 A70-23252

Three degrees of freedom astatic gyroscopes dynamic characteristics determination by vibration tests 09 p1681 A70-23300

Simulator servo drive system dynamic requirements for single-axis manual control task using pilot models and computer [AIAA PAPER 70-355] 10 p1858 A70-24208

Amplitude and Rotational 3-Axis Flight Simulators for handling qualities research, outlining physical constraints and methodology for driving visual display and motion systems [AIAA PAPER 70-353] 10 p1858 A70-24210

Geomagnetic pulsations /pc 4/ characteristics from analyzing magnetosphere model yielding plasma densities consistent with experimental data 10 p1875 A70-24483

Impact problems of slip clutch and beam scales dynamic characteristics simulation by 1130 CSMP /Continuous System Modeling Program/ 10 p1860 A70-24653

Dynamic characteristics of structures measured, using digital computer to analyze transient data from frequency sweep tests 10 p1961 A70-25059

Linear steady and unsteady systems time optimal control switching points determination by introducing parameterization to reduce number of transcendental equations 11 p2021 A70-25339

TACSAT 1 communication satellite design, dual-spin stabilization principles and dynamic characteristics, noting nutation behavior [AIAA PAPER 70-455] 11 p2120 A70-25447

Thermal conductivity determination for charring materials by dynamic technique, with application to carbon, graphite and silica cloth phenolics 11 p2068 A70-25766

Analog integrating moving window detector performance analysis for use with scanning pulse radar allowing for antenna radiation pattern and detection process dynamic characteristics 11 p2009 A70-26262

Microscopic behavior and excitational processes found similar in argon ion lasers with hollow cathode or conventional heated oxide cathode discharge 11 p2063 A70-26370

Connecting wires length effect on sensitivity and current-voltage characteristics of sensors for dynamic values measurement, deriving integral electrical parameters 11 p2055 A70-26445

Turbine flowmeter dynamic characteristics dependence on individual parameters, deriving equations of motion and time constant

11 p2055 A70-26450

Dynamic measurements of aerospace mechanical quantities covering tensometry, vibration, torque, angular velocity, pressure, telemetry and data processing

11 p2057 A70-26750

Gyroscopic platform stabilizers (GPS) dynamic properties improved by compensation of perturbing torques

12 p2237 A70-28155

Coupled microstrip transmission lines characteristics from parameters evaluation, considering various geometries, inductive and coupling coefficients, dielectric constant and impedance

12 p2190 A70-28167

Laminar MHD boundary layer equations at nonconducting surface, determining flow core parameters influence on boundary characteristics

13 p2462 A70-28967

High speed dynamic systems synthesis with optimal damping of elastic vibrations, using gradient method

14 p2617 A70-31354

Stochastic terminal optimal control for nonlinear dynamical systems with state independent noise

14 p2600 A70-31420

Stochastic medium mathematical model for loose medium motion in potential field of forces

15 p2821 A70-32342

No-inertia line, lumped parameter and distributed parameter models for dynamic characteristics of fluid transmission lines

15 p2678 A70-32526

Servocontrolled laser strainmeter based on Michelson-Morley interferometer, determining dynamic characteristics dependence on feedback loop filter type

16 p2925 A70-33022

Bypass door control system for SST axisymmetric intake operation in external compression mode, obtaining dynamic performance

16 p2966 A70-33558

Vibrations of shells, plates and membranes carrying dynamic systems at discrete points on surface, obtaining eigenfunction and eigenvalue equations

16 p2993 A70-34090

Linear system under ergodic random processes, determining optimal dynamic characteristics by approximation of spectral density by Laguerre series

16 p2944 A70-34280

Dynamics of continuously operating linear servosystems stimulated by stochastic signals, using vectorial equation and impulse response matrix

16 p2944 A70-34295

Transversely isotropic Timoshenko beam states and dynamics under initial stress and transverse loading

17 p3182 A70-34561

Dynamic behavior of eccentric annular mercury nutation damper, using variational principle of least viscous frictional power loss

17 p3023 A70-34770

Parameter variation effects on iterative identification of linear system by learning method

17 p3130 A70-35299

Dynamic characteristics of hydraulic fatigue testing machines, using hydraulic activation efficiency factor

17 p3064 A70-35718

Magnetospheric plasmopause duskside bulge dynamic behavior during substorms, using whistler data

18 p3312 A70-36013

Supply valve influence on dynamic characteristics of volumetric hydraulic actuator

18 p3215 A70-36126

Structurally similar models, investigating space vehicles dynamic characteristics

18 p3332 A70-36161

Quasi-equilibration of static or dynamic universal solutions of compressible or incompressible simple bodies, investigating homogeneity of symmetry and objectivity conditions

18 p3336 A70-36221

Polymers dynamic properties in hyperelastic and vitreous states as function of temperature, using torsion pendulum method

18 p3263 A70-36469

Damped vibrations of single-mass elastic systems, determining E function singularity effect on dynamic characteristics

18 p3341 A70-36587

Sporadic E layers structure and dynamic characteristics during polar aurorae, determining critical frequencies

18 p3250 A70-36929

Meteorological prediction methods based on dynamic or thermodynamic considerations

18 p3285 A70-36949

Two mode gas laser behavior under external signal action showing mode locking possibility by combination frequencies due to medium nonlinearity

18 p3271 A70-37108

Late-type barred spiral galaxies structure and dynamics with asymmetric mass distribution, using

model consisting of small prolate spheroid displaced from disk center

18 p3331 A70-37194

Algorithm for dynamic processes in unsteady linear automatic control system during finite time interval

19 p3470 A70-37256

Polynomial and logic theories of dynamic systems, explaining linear and nonlinear elements of automatic control systems

19 p3392 A70-37447

Time transient and step-jump dynamic analyses of gas lubricated bearing, illustrating hybrid journal and Rayleigh-Step thrust bearings

[ASME PAPER 69-WA/LUB-5] 19 p3436 A70-37619

Dynamics of composite materials using extensions of continuum theories based on combination of elastic and geometric properties

19 p3455 A70-37950

Thermoelastic composite materials, deriving crystal lattice type model of equations for predicting dynamic or thermomechanical behavior

19 p3540 A70-37958

Equilibrium homogeneous steady state highly ionized non-Debye plasma for investigation of electrical conductivity, viscosity, dynamic properties, etc

19 p3480 A70-38183

Upper atmosphere semiannual variations dependence on lower thermosphere dynamic properties seasonal variations, using steady state models

19 p3415 A70-38384

Elastoplastic oscillator dynamic behavior with one degree of freedom compared with bilinear hysteretic model results, investigating mechanical scheme with continuous skeleton intrinsic curve

19 p3432 A70-38665

Feedback regulator synthesis for linear time invariant dynamic system with quadratic performance index, using computer algorithm for algebraic Riccati matrix equation

19 p3395 A70-38937

Low power thyristors in relaxation oscillation circuits, considering static and dynamic characteristics in large signal mode

20 p3596 A70-38971

Free wing aircraft dynamic characteristics, discussing gust alleviation and handling qualities

[AIAA PAPER 70-947] 20 p3561 A70-39580

Boundary value problems in dynamic two dimensional elasticity theory for domains bounded by circles and straight lines

20 p3721 A70-39770

Thermal stress and changes in modulus of elasticity and expansion coefficient effects on dynamical properties of turbine disks at high temperatures

20 p3721 A70-39783

Cardiovascular blood circulation system dynamic characteristics analysis by linear statistical correlation methods, describing test for determining weighting function

20 p3581 A70-39905

Controlled nonstationary plant dynamic characteristics determination by model, evaluating accuracy

20 p3673 A70-39906

Uncontrolled plant dynamic characteristics analysis based on signal recordings, using black box without input method

20 p3705 A70-39909

Statistical analyzer for complex plants dynamic characteristics

20 p3604 A70-39912

Dynamic theories for wave propagation in laminated and fiber reinforced composites, using dispersion curves for transverse and longitudinal motions

20 p3730 A70-40036

Composite material dynamic properties, discussing modulus and damping during constant strain rate, viscoelasticity, fracture strength and high loading tests

20 p3731 A70-40048

Nonlinear dynamic systems phase coordinate variations statistical characteristics, describing data reduction method

20 p3674 A70-40183

Elastic body steady forced oscillations under monoharmonic excitation, investigating hereditary nonlinearity effects on systems dynamic characteristics

20 p3733 A70-40395

Solar corona streamer and interstreamer regions, examining geometrical and dynamic structure by energy transport process

20 p3712 A70-40417

Dynamical theorems to control number of collisions for sequences in generalized Boltzmann equation, discussing binary collisions involving three molecules

21 p3852 A70-40946

Coupled rotational vibration system dynamic behavior near critical speed, using graphs of autonomous two degree of freedom system on reduced phase plane

22 p4112 A70-42271

Gas lubricated three-foil bearing for high speed rotor support, considering dynamic and static behavior in zero gravity environment

[ASME PAPER 70-LUBS-18] 22 p4044 A70-42443

Dynamic characteristics of turborotor simulator supported on gas lubricated foil bearings, considering rotor response to imbalance

[ASME PAPER 70-LUBS-11] 22 p4044 A70-42449

Dynamical linear thermoelasticity theorem generalization with time dependent conductivities, elasticities and density

22 p4112 A70-42483

Dynamic characteristics of autooscillatory nonlinear self adaptive systems under random noise, using statistical and harmonic linearization

22 p4003 A70-42884

Computerized mathematical modeling of transistors statistical and dynamic characteristics as functions of structural parameters

23 p4171 A70-43954

Dynamic elasticity theory for multiply connected region

23 p4266 A70-43990

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics

23 p4270 A70-44562

Nonrigidly supported ballast effects on dynamic characteristics of slender body during atmospheric entry

23 p4258 A70-44594

NACA/NASA rotating wing aircraft research history 1915-1970, Part 2, autogyro flight test experiences, rotor blade dynamics research, interest in helicopters, etc

23 p4142 A70-44852

Viscoelastic laminated composite linear anisothermal theory, presenting homogeneous continuum model to describe dynamic characteristics

24 p4368 A70-45992

Dynamic errors of digital converter for digit-to-digit compensation estimated by probability and information characteristics methods

24 p4340 A70-46404

DYNAMIC CONTROL

Gyroscope bearing cross-torque control techniques, noting ball-group misalignment coupling

[ASME PAPER 69-LUB-17] 01 p0101 A70-10388

Posture and motion control for functional organizations of nervous systems, emphasizing reflexes and relation between suprasegmental structures and controlling organs

01 p0017 A70-10499

Adaptive man machine system for automated training of pilot dynamic control skills/decision and motion/, describing synthesis procedure

02 p0246 A70-12148

Analog computer model of human cardiovascular control system to reproduce subject response to submaximal workload

03 p0438 A70-14081

Nonlinear control systems with linear controls appearance defined for controllability concepts and sufficient conditions to reduce to lower dimensional problem

04 p0660 A70-14524

Algorithmic and digital computer method for approximating irrational transfer functions by rational functions in control systems

04 p0662 A70-15336

Differential game analysis of dynamic systems feedback control, presenting extremal aiming for successful pursuit completion

07 p1332 A70-18681

Statistical analysis of dynamic plant based on steady signal, showing numerical determination of operator by least squares method

07 p1226 A70-18726

Optimal control mathematical modeling for dynamic systems under statistically indeterminate disturbances based on game theory and pattern recognition

09 p1653 A70-22141

TDMA system control, considering access process control and switching process control, discussing burst transmission phase control and channel selection at receiving end

10 p1839 A70-24366

Low altitude operational meteorological and navigation spacecraft, discussing need for orbit adjustment by dynamic control

13 p2500 A70-28404

Training algorithms in designing multilevel quasi-optimal controllers for dynamic processes, using pattern recognition methods

13 p2383 A70-29581

Third order dynamic relay control system, determining periodic motion and motion stability

13 p2507 A70-29719

Electrohydraulic control system dynamics, examining executive component loading at low speeds and nonlinear resistances

13 p2345 A70-29720

Controllability test for second order differential systems, noting applicability to linear first order time dependent systems

13 p2443 A70-29972

Dynamical optimal control for infinite dimensional linear systems, examining Balakrishnan solution technique

14 p2562 A70-31201

Dynamical systems optimal control approximation without solving differential equations, considering linear systems with quadratic cost functional

14 p2562 A70-31411

Decoupling by dynamic compensation using algebraic machinery, considering state space extension role in pole assignment

16 p2886 A70-33333

Linear distributed dynamic system simulation using infinite product expansions for transcendental terms in transfer functions

16 p2942 A70-33348

Recurrence scheme for parameter estimation by quasi-linear equations of motion method and Kalman filtering for nonlinear dynamical systems

16 p2887 A70-33349

Mechanical system with n material points, deriving control algorithms for realizing constrained programmed motion

16 p2953 A70-34297

Dynamic control model of lift helicopters with two cable sling loads using multiple part motion equations. [AIAA PAPER 70-29]

17 p3020 A70-35839

Spectral densities of input and output signals of discretely continuous systems as function of comparison moment

18 p3233 A70-36069

Soviet book on dynamic systems with cylindrical phase space covering differential equations with angular coordinates, parameter estimation, multidimensional and discontinuous systems, pendulums, etc

19 p3470 A70-37468

Book on optimal control covering optimization, estimation, dynamic and linear control systems, programming, probability and random processes, environmental influence, etc

20 p3600 A70-39124

Two dynamic systems synthesis achieving limited influence on each other by coordinates invariance criteria method involving determinant

20 p3604 A70-39841

Dynamic plants optimal control, deriving algorithm for determining a posteriori probability density of generalized state vector

20 p3604 A70-39907

Extremal dynamic controlled plant with random input signals, identifying components weighting functions by statistical approximation

20 p3604 A70-39908

Amplitude-phase characteristics of relay slave mechanisms with AC and DC motors under dynamic braking, using harmonic linearization

22 p4002 A70-42842

German monograph on dynamic control behavior of jet engines covering computation for normal external actions and perturbation effects

23 p4233 A70-44396

Decoupling and pole assignment in linear multivariable control systems, minimizing dynamic compensation

23 p4213 A70-44904

DYNAMIC LOADS

NT AERODYNAMIC LOADS

NT BLAST LOADS

NT GUST LOADS

NT IMPACT LOADS

NT LANDING LOADS

NT ROLLING CONTACT LOADS

NT SHOCK LOADS

NT THRUST LOADS

NT TRANSIENT LOADS

NT VIBRATORY LOADS

NT WING LOADING

Stiffeners reinforced rectangular plates parametric stability under dynamic load, deriving equilibrium equations and boundary conditions by averaging stiffener effects

01 p0205 A70-11146

Dynamic loads calculation on teeth of cylindrical straight tooth gears under engaged and disengaged conditions, performing strength analysis

01 p0105 A70-11421

Two asymptotic dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads

01 p0212 A70-11563

Thin simply supported circular rigid ideally plastic plate subjected to dynamic transverse load uniformly distributed over central circular region

02 p0389 A70-12668

Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration

03 p0601 A70-14318

Thin elastic plate oscillations plane two dimensional steady state problem assuming constant thickness, finite dimension and moving load

04 p0766 A70-14420

Principal instability region of hinged cylindrical shell under dynamic loading

04 p0776 A70-15271

Parametric oscillations of unclamped rod under variable longitudinal force applied to end, approximating resonance boundaries and instability regions

05 p0934 A70-16226

Dynamic torsion of anisotropic circular cantilever beams and small pitch diameter springs under linear time dependent moment calculated by Saint Venant method

06 p1037 A70-17862

Semiinfinite simply supported cylindrical shell transient response due to axisymmetrically engulfing step pressure wave, investigating moving load critical velocity

[AIAA PAPER 70-18]

06 p1170 A70-18063

Three dimensional latching dynamics and loads induced during Apollo spacecraft docking, using linear stiffness or flexibility matrices for structural elasticity

[AIAA PAPER 70-21]

06 p1158 A70-18181

Shallow orthotropic shell of rectangular platform with edges under dynamic load, studying forced vibrations by anisotropic shell theory

07 p1403 A70-19057

Inhomogeneous elastic half space surface response to moving line loads

08 p1584 A70-20645

Strain rate effects on mechanical properties of solids under dynamic loading

08 p1590 A70-21328

Transient waves propagation in homogeneous isotropic linearly elastic half space excited by traveling normal point load on surface, deriving displacements

[ASME PAPER 69-APMW-12]

08 p1592 A70-21468

Popping pressure of relief valve with helical spring under dynamic load noting frequency dependence

[ASME PAPER 69-VIBR-48]

08 p1441 A70-21479

Machine parts fatigue strength calculated from failure probability parameter during unsteady loading

09 p1776 A70-22622

Dynamic stresses during abrupt temperature changes of medium, showing internal stress waves amplitude increasability by suitable internal stress source selection

09 p1778 A70-23089

Polarization-optical kinematographic method for study of mechanical stresses during dynamic loading

09 p1680 A70-23174

Dynamic force measurement, evaluating hybrid system with reaction force summation and operational compensation subsystems

10 p1889 A70-24580

Space vehicle residual thrust oscillation and dynamic response using power spectral density functions from flight data

10 p1953 A70-25068

High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking for elastic pulses

[AIAA PAPER 69-360]

11 p2066 A70-25964

Cylindrical shells plastic flow buckling under radially inward impulsive loading, showing mode number dependence on shell length

11 p2140 A70-26486

Stresses in dynamically loaded struts with one or three holes by photoelasticity, using Fastax camera

12 p2315 A70-26878

Airframe structures fatigue crack propagation with and without strain hardening during variable amplitude loading

12 p2315 A70-27014

Structural design for allowable plastic deformation under dynamic loads, deriving finite element representation of elastic-plastic plane frame beam

12 p2317 A70-27117

Filament reinforced composites tested under dynamic compression loads for determining relations among strain rate, constituent properties, stress-strain behavior, fracture energy and mode

12 p2253 A70-27119

Dynamic behavior and moments of oscillatory systems under steady perturbations using linear differential equations

12 p2261 A70-27555

Plastic symmetrical bending of freely supported beam under transverse local pulsed load, discussing deflection velocity fields during loading and unloading stages

13 p2514 A70-29307

Slope deflection method for computing spatial trusses and plane frameworks under dynamic aperiodic forces

13 p2516 A70-29532

S glass fibers strength characteristics at quasi-static strain rates, considering temperature effects on elastic modulus

13 p2439 A70-29707

Inertial load-time effects in instrumented impact tests, showing corrections for bending stress and dynamic fracture toughness measurements

15 p2820 A70-32240

Dynamic fracture toughness test on heat treated precracked steel specimens under dynamic loading

15 p2759 A70-32243

Plane strain stress intensity factor-Charpy V notch impact test correlations in transition temperature range under slow bend and dynamic loading

15 p2759 A70-32244

Stress rupture shear strength of fiberglass reinforced plastics under monotonic, prolonged and cyclic loading

15 p2766 A70-32853

Sandwich rings inplane transient response to concentrated radial impulsive loads based on Timoshenko type theory, noting dependence on extensional to shear stiffness ratio

16 p2993 A70-34093

Wave propagation from two dimensional expanding load on liquid half space with load fronts decelerating monotonically from initial supersonic speed

17 p3069 A70-34976

Dynamical stresses in members and structures under impulsive loads, taking into account solid viscosities and frequencies effects

17 p3187 A70-34998

Holographic measurement of transient behavior of structures under unsteady or impulsive loading, using pulsed lasers

17 p3085 A70-35008

Shakedown theory of elastic-plastic structures under time dependent loadings

17 p3188 A70-35191

Variable loads programming by semicomputers/semihardware method for 747 fatigue testing

17 p3050 A70-35511

Optimal design of elastic sandwich, solid beam and plate structures under dynamic harmonically varying loads

18 p3336 A70-36220

Elastic Cosserat half plane, analyzing wave propagation of small amplitude thermoelastic disturbances and uniform motion of concentrated line load along surface

18 p3338 A70-36434

Dynamic axisymmetrical loading of thin elastic shallow spherical rigidly clamped dome, using variational method

18 p3341 A70-36582

Dynamic and static stress effects on martensite formation temperature in Fe-Ni-C alloys

19 p3451 A70-37569

Magnetomotive loading of cantilevers, beams and frames, studying dynamic loading of structures

19 p3541 A70-38045

Load rating methods for cage-type and full complement needle bearings dynamic capacity

[ASLE PREPRINT 70AM 3D-2]

19 p3438 A70-38802

Elastic shell stability criterion during short duration dynamic loading

20 p3725 A70-39864

Clamped circular shallow Al arches stability under impulsive loading, obtaining deflection time history by high speed photography and computerized data reduction

20 p3732 A70-40265

Lunar crystalline rock static and dynamic deformation, examining regolith and silicates textures and structures

21 p3897 A70-41515

Boundary value problem solution for elliptical crack subjected to impulsive load by method of characteristics and discontinuity relations, calculating stress distribution

21 p3938 A70-41960

Rigid circular cylindrical inclusion elastic bedding dynamic loading, calculating stresses in interface

22 p4112 A70-42345

Cantilevered tube conveying fluid, calculating forced vibration under time dependent loading and arbitrary initial conditions

22 p4010 A70-42650

Transient stresses and strains in plane wedge under dynamic load, using photoelastic, high speed photographic and strain gage studies

[SMPE PREPRINT 93]

22 p4036 A70-43062

Rigid and elastic rectangular plates vibration under uniformly distributed dynamic load, investigating bending behavior by Galerkin method

23 p4268 A70-44170

Dynamic deformation in thin walled axisymmetric plastic shells and filaments under time variable loads applied to high energy rate forming techniques

23 p4200 A70-44235

Integration operators for transient structural response in qualification tests for internal components of dynamically loaded structures

23 p4273 A70-44719

Wrought Nimonic alloy, measuring stress redistribution due to creep under variable load and temperature

23 p4274 A70-44911

DYNAMIC MODELS

Two band Drude model validity for analysis of IR optical properties of transition metals obtained from experimental dielectric constant data
02 p0339 A70-12452

Mathematical elastodynamic model for parametric dynamic study of forced response solution of motion equations during head trauma
02 p0238 A70-12548

Multiparticle processes in acceleration energy region, comparing various models, noting role of diffraction
03 p0526 A70-13044

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads
03 p0587 A70-13241

Magnetosphere dynamic morphology model, including qualitative phenomena
03 p0475 A70-13850

Device modeling for computer aided design and analysis of integrated circuits, discussing list of desirable properties and applications to transistor design
03 p0454 A70-14026

Analog computer model of human cardiovascular control system to reproduce subject response to submaximal workload
03 p0438 A70-14081

Visco-elastic column analysis based on mechanical model, investigating relationships between solid viscosities, loading velocities, initial deflections and dynamic buckling loads
03 p0596 A70-14146

Pulsatile flows in living animals and model arteries, discussing flow profiles, instability and wall shear
03 p0430 A70-14244

Electron scattering by molecules, demonstrating formal equivalence of fixed nucleus and free rotator scattering models
04 p0722 A70-14949

Dynamic model for Martian ionosphere modification by solar wind, assuming negligible Mars magnetic moment and neutral atmosphere
04 p0753 A70-15103

Flutter investigation on model designed and constructed for tail unit of HFB 320 Hansa jet aircraft, discussing classical and statistical methods
04 p0775 A70-15180

Decaying isotropic turbulence spectrum evolution model, verifying numerical integration of differential equations
04 p0673 A70-15249

Circulation model of joint ocean-atmosphere system constructed with ocean and atmospheric models, discussing heat transfer by ocean currents
04 p0680 A70-15297

Energy state approximation for supersonic aircraft performance optimization with extension to maximum range problems, noting comparison with complex dynamic models
04 p0623 A70-15376

Nonsimple dynamic model of regular system of interacting deformable bodies, deriving motion equations for nonlocal and local model
05 p0928 A70-16023

Magnetized solar wind steady state inviscid single fluid model developed using MHD, including heat equation with thermal conduction
05 p0902 A70-16445

Dynamical models of relative motions during earthquakes, solving numerically integral equations with nonintegral kernels in crack propagation and elastic wave diffraction
05 p0941 A70-16527

He excitation by low energy He ions giving support for Rosenthal-Foley postcollisional interaction model, testing model predictions
05 p0885 A70-16556

Control system employing adaptive modeler to estimate state, dynamics and future trajectory of unknown plant through performance index minimization
06 p1025 A70-17965

Unified model for transverse gaseous jet penetration into supersonic stream agreeing with measured flow field properties
06 p0976 A70-18201

One dimensional cumulus convection model modified by incorporating rain evaporation rate and temperature changes from downdrafts
06 p1099 A70-18568

Ciliary nerve stimulation and lens motion data to identify open-loop plant dynamics of lens accommodation
07 p1216 A70-18858

Burning rates of monopropellant droplet evaluated by arbitrary property models, discussing dimensionless mass flow rate
07 p1358 A70-18914

Three dimensional unsteady and steady sediment distribution obtained by Monte Carlo simulation method, using stochastic hydrodynamics model for transport
07 p1255 A70-19103

Two parameter model for lattice vibrations applicable to diamond structured crystals, calculating phonon dispersion curves from dielectric screening theory
07 p1357 A70-19920

Similarity model for spherically symmetrical flow following explosion in rarefied atmosphere satisfying hydrodynamic energy conservation equation
07 p1260 A70-19981

Hydromagnetic ionizing shock wave structure in electromagnet fields, using model composed of strong adiabatic shock to translational equilibrium followed by ionization initiation
07 p1351 A70-19985

Model of ideal accelerometer in form of mass point suspended within body of accelerometer mounted in spatial elastic weightless suspension on moving object
07 p1288 A70-20178

Historical survey of celestial mechanics including three body problem and solar system dynamic model construction
08 p1565 A70-20561

Stellar gas ejection processes in corona-interplanetary plasma system, proposing hydrodynamic model with frequent collision region having finite radius
08 p1573 A70-21060

Kinetic model developed for Cl-HBr reaction pulsed chemical laser
08 p1513 A70-21337

Turbulence model, noting possibility of turbulence energy to vanish with distance from tunnel central point of entrance
08 p1486 A70-21770

Fracture mechanics model for stress corrosion cracking of Al alloys, discussing bond strength lessening by adsorption of damaging species
09 p1706 A70-22941

Constant flux gas core nuclear rocket acoustic instabilities, presenting idealized physical model with gas dynamic field perturbed by wave phenomena
09 p1725 A70-23227

Electrical narrowband noise model for laser speckle pattern, obtaining image intensity statistical properties
09 p1638 A70-23370

Discrete dynamic models construction using Gaussian quadrature formula with Jacobian weight, noting Raleigh function role
09 p1785 A70-23597

Hyperelastic bodies containing finite number of inclusions and defects analyzed by continuous dynamic model
10 p1954 A70-24014

Model testing gas flow calculation in system emitting electron beam into atmosphere through supersonic gas seal
10 p1895 A70-24590

Digital simulation of complex dynamic systems using homing missile as example, basing algorithm on 1 transforms for linear systems
11 p2013 A70-25692

Hybrid satellite attitude control system deformation model, utilizing pivoted flexible boom with tip mass as actuator and inertia wheels to dampen gravity induced librations
11 p2123 A70-26127

Nonlinear viscoelastic turbulence model with monotone increasing time scale to predict behavior in homogeneous shear and in pure strain
11 p2040 A70-26544

Crack model analysis taking into account nonlinear force-deformation ahead of crack tip
11 p2143 A70-26667

Spacecraft orientation control system optimization by plotting controlled motion kinematic models
13 p2501 A70-28417

Homogeneous and stationary turbulence in incompressible fluid, proposing dynamic model for strong wave interactions during cascade process
13 p2457 A70-28557

Fracture kinetics model for polymers emphasizing quantum effects even at room temperature
13 p2510 A70-28670

Dynamic linear system simplification and order reduction, showing utilization precautions and validity
13 p2381 A70-28938

Earth core flow velocity field to construct kinematic model of hydromagnetic dynamo, discussing magnetic field development
13 p2398 A70-29209

Turbulent diffusion random model of foreign substance, investigating latent parameters existence
13 p2387 A70-29211

Time variable dynamic medium nonlinear conductive heat transfer equation obtained by power series procedure
13 p2521 A70-29313

Earth dipole field disk dynamo model, studying connection between polarity intervals and precession effects
14 p2638 A70-30619

Biphase rockets combustion characteristics, comparing results with propellant vaporization and nonlinear instability models
14 p2665 A70-30950

Magnetic hysteresis dynamic model for digital simulation of stabilized satellite attitude motions
15 p2812 A70-32509

No-inertia line, lumped parameter and distributed parameter models for dynamic characteristics of fluid transmission lines
15 p2678 A70-32526

Compartmental physiological system dynamics by bilinear control model, relating homeostasis to system
15 p2693 A70-32571

Nonlinear time-invariant lumped parameter dynamic systems, determining mathematical model by piecewise continuous power series expansions
15 p2768 A70-32576

Historical survey of celestial mechanics including three body problem and solar system dynamic model construction
15 p2805 A70-32716

Gas-core nuclear rocket engine simulation by induction coupled plasma torch, determining gas flow patterns
[AIAA PAPER 70-691] 16 p2950 A70-33555

Exhaust nozzle model tests at high subsonic Mach numbers, investigating differences in nozzle drag in contrast to engine conditions
[AIAA PAPER 70-668] 16 p2967 A70-33573

Grain boundary sliding model subjected to shear strain, discussing effect on mechanical properties
16 p2932 A70-33789

Frequency analysis of cylindrically curved panel with clamped and elastic boundaries, using mathematical and panel models
17 p3181 A70-34524

Thermodynamical modeling by regular systems of deformable bodies bound by hyperelastic medium with internal degrees of freedom, formulating equations of motion
18 p3338 A70-36432

Necessary and sufficient conditions for optimal control law existence for model following system, discussing applications to aircraft control
18 p3235 A70-36443

Reduced dissipation of biharmonic oscillations, examining dynamic model under force and kinematic harmonic perturbation
18 p3344 A70-37070

Hydrodynamic model analogy to water bag/incompressible homogeneous fluid in phase space, investigating nonlinear collisionless plasma oscillations
19 p3474 A70-37365

Linear damping theory, discussing simple harmonic motion model extension to transient motion
19 p3472 A70-38041

Model gas turbine engine blades fatigue strength under stress conditions, considering tensile stresses reproducibility from centrifugal loads
19 p3548 A70-38459

Dynamic airfoil stall simulation in wind tunnels, considering pitch rate, Reynolds number, oscillation and test equipment effects
[AIAA PAPER 70-945] 20 p3558 A70-39582

Controlled nonstationary plant dynamic characteristics determination by model, evaluating accuracy
20 p3673 A70-39906

Magnetoplasma interaction with axially slotted delay line, examining coil behavior physical mechanisms by cold plasma model
22 p4079 A70-42365

Free and forced oscillations of dynamic system with linear hysteretic damping, using nonlinear model
22 p4114 A70-42700

Rotating magnetic star dynamic evolution, discussing magnetic and rotation axes inclinations for oblique rotator model
23 p4252 A70-44827

Be star rotation dynamics phenomenon, discussing time variations on main sequence scale
23 p4252 A70-44828

Atmospheric response to heating in stable auroral red arc by two dimensional steady state dynamic model of neutral thermosphere
24 p4329 A70-45357

DYNAMIC PRESSURE

Flight maneuver for roll modulated lifting reentry vehicle to reduce deployment dynamic pressure
07 p1394 A70-19724

Buckled plates flutter at zero dynamic pressure, considering initial plate imperfections, including aerodynamic damping in quasi-steady supersonic approximation
11 p2135 A70-25988

Dynamic pressure data acquisition editing and processing system for engine inlet wind tunnel model tests
[AIAA PAPER 70-596] 13 p2375 A70-29879

Magnetotail plasma sheet temporal variations during substorms and plasma pressure as related to dynamic pressure of solar wind from Vela satellites observation
13 p2480 A70-30061

Dynamic pressure transducer calibration system using fluidic pressure generators
19 p3358 A70-37897

- Dynamic intravascular pressures measured in small vessels of frog lung using micropressure transducer inserted into vessel lumen
19 p3364 A70-38368
- Solar wind static and dynamic pressures on earth magnetosphere, using geomagnetic parameters
21 p3878 A70-40845
- Parawing canopy behavior during deployment in free flight at specific altitudes and dynamic pressures [AIAA PAPER 70-1189]
21 p3751 A70-41804
- Surface pressure coefficient dependence on specific heat ratio for yawed conical lifting bodies in supersonic streams
21 p3747 A70-41877
- ### DYNAMIC PROGRAMMING
- Optimization of distributed parameter control systems described by linear integro-partial differential parabolic equation with delayed argument, using dynamic programming
01 p0131 A70-10548
- Dynamic programming for optimizing distributed parameter control systems described by parabolic linear integrodifferential equation with delayed argument
01 p0131 A70-10556
- Boundary value problems of thin beams theory transformed into initial value problems, using dynamic programming and invariant imbedding
05 p0926 A70-15977
- Circular antenna arrays synthesis, minimizing peak sidelobe level by dynamic programming
06 p1022 A70-18021
- Optimal control for distributed parameter systems described by biharmonic linear partial differential equation using dynamic programming
07 p1244 A70-18843
- Primal-dual algorithm for optimal control with fixed or free terminal time
07 p1238 A70-19269
- Optimum systems synthesis in computation of programmed movements including dynamical programming methods, control under uncertainty and division problem
07 p1325 A70-19270
- Discrete process max-min problem, using dynamic programming to obtain upper and lower bounds
08 p1533 A70-20604
- Apportionment optimization of reliability and maintainability by Lagrange multipliers and dynamic programming, discussing maintainability cost model and computerized simulation
09 p1792 A70-22211
- Optimality condition for singular control problems derived using differential dynamic programming to obtain expression for change in cost produced by control variation
09 p1653 A70-22345
- Narrow throat problems of linear dynamic programming concerning maximum linear functional determination in set of vector functions, giving algorithm for solution
10 p1855 A70-24393
- Dynamic programming successive approximations optimization technique involving system state variables reduction with convergence proofs
10 p1845 A70-24871
- Dynamic programming successive approximation method application to airline scheduling, reviewing real time dispatching, operations, schedule and fleet planning
11 p2013 A70-26209
- Nonlinear discrete time sampled systems optimal control by dynamic programming, with application to stochastic systems
12 p2204 A70-28068
- Dynamic programming applications to optimal stochastic orbital transfer strategy, describing computer program [AIAA PAPER 68-872]
13 p2447 A70-28502
- Terminal guidance by dynamic programming to obtain optimal feedback control law in nominal trajectory neighborhood for minimum energy consumption
13 p2449 A70-29963
- Maximum convergence function in image recognition using dynamic programming and sequential optimization
14 p2553 A70-30419
- Book on differential dynamic programming covering algorithms for continuous time control, bang-bang, discrete time and stochastic systems
14 p2560 A70-30631
- Interplanetary low thrust orbit transfer optimization by dynamic programming, including gravitational perturbation effects from earth, Mars and Jupiter
14 p2640 A70-30759
- Minimum energy feedback control for electrically driven vehicles by dynamic programming
16 p2884 A70-33310
- Optimal control problem solution methods, comparing Euler-Lagrange equations, Pontryagin principle, dynamic programming and invariant imbedding
17 p3057 A70-35589
- Differential dynamic programming algorithm for discrete time orbit transfer optimization
21 p3919 A70-41737
- ### DYNAMIC PROPERTIES
- #### U DYNAMIC CHARACTERISTICS
- #### DYNAMIC RESPONSE
- ##### NT TRANSIENT RESPONSE
- Nondestructive testing and fatigue life analysis of cyclically loaded mechanism, determining dynamic responses to velocity shocks by computer techniques
01 p0053 A70-10010
- Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dashpot model [ASME PAPER 69-LUB-23]
01 p0101 A70-10384
- Synchronous dynamic response of gaseous double squeeze film thrust plate with very high frequencies, showing increased load capacity and stiffness [ASME PAPER 69-LUB-8]
01 p0102 A70-10395
- Nonlinear dynamic beam response for classical and shear deformation theories, comparing stresses and deflections using traveling wave approach with finite difference schemes
01 p0206 A70-11147
- Linear structures response to pressure fields of deterministic excitation with input function spectra as meromorphic functions of wave number and frequency
01 p0208 A70-11191
- Time independent kernel integral equations in dynamic contact problems of elasticity and mathematical physics
01 p0146 A70-11571
- Turbulent boundary layer response to sudden changes in surface conditions or pressure gradients, considering equilibrium attainment
02 p0287 A70-12360
- Aircraft controls response critical speed as function of transmission lag and transfer function of control link elements
02 p0227 A70-12410
- Vibrational response of simply supported and clamped circular plates subjected to gyroscopically induced inertia loads, using equations of motion
03 p0583 A70-12920
- Solid propellants ignition response to radiative and conductive heat transfer
03 p0544 A70-13921
- Spectrum deductions from profile excited random vibration response, considering single profile imposed displacements
03 p0600 A70-14250
- Linear isothermal response of viscously damped thin homogeneous polygonal plates subjected to uniform dynamic loading, calculating forced solutions by numerical integration
03 p0601 A70-14318
- Pulse width modulated /PWM/ electrohydraulic servo response characteristics from modulator transfer characteristic determination by Fourier series analysis of PWM signal [ASME PAPER 69-WA/AUT-2]
04 p0625 A70-14831
- Slender delta wing aircraft dynamic behavior under vertical and lateral gusts, particularly during landing approach [DGLR-69-52]
04 p0623 A70-15145
- Spectral response of cylindrical shell due to random acoustic pressure input computed using modal approach
04 p0778 A70-15528
- Response characteristics of asymptotic or Gordan type thin foil heat flux transducer, discussing heat transfer coefficient effect on response time and curve
04 p0694 A70-15548
- Dynamic plastic response of finite bar subject to axial impact load noting reflected waves, stress-strain-time histories and residual strain
04 p0779 A70-15599
- Aircraft engine support system dynamic loads induced by fan unbalance analyzed by coupling pylon and engine vibration modes [SAE PAPER 690613]
05 p0895 A70-15850
- Dynamic response of simply supported rectangular plate under suddenly applied transverse load, comparing solutions of classical and improved plate theories
05 p0933 A70-16174
- Thermometer dynamic response under various working conditions predicted from time constant curves
05 p0849 A70-16518
- Pseudosound field wall pressure correlation obtained to predict response characteristics of aircraft panel mounted along jet wake
05 p0835 A70-16785
- Dynamic response of constant resistance anemometers, investigating unsteady probe thermal equilibrium, inductance and feedback equations
06 p1063 A70-17620
- Dynamic response of free-free beams on viscoelastic Winkler foundation using complex foundation modulus based on antivibration isolator
06 p1165 A70-17627
- Single and double cylindrical Langmuir probe responses in highly expanded low density flowing Ar plasma [AIAA PAPER 70-85]
06 p1066 A70-18207
- Airframes dynamic response during simulated launchings of externally carried missile measured in laboratory, describing dynamic load simulation and structural analysis
06 p1159 A70-18439
- Diffused diaphragm pressure sensors in impact probes used in wind tunnel tests of dynamic response of supersonic air induction systems
06 p1074 A70-18605
- Dynamic response of gas lubricated radial sliding bearing from transfer function derived from pH linearized mathematical model of gas lubrication
07 p1290 A70-18739
- Circular plates dynamic response to axisymmetric time dependent loads, analyzing transverse restraint effects on response maxima by plate theory
07 p1404 A70-19251
- Improper integrals appearing in cross correlation of responses of two single degree of freedom systems to bandwidth limited white noise, deriving Laplace inversion formulas
07 p1236 A70-20067
- Digital cross correlator design for impulse response determination in linear systems, noting real time operation without software and storage problems
07 p1236 A70-20068
- Dynamic response of joined elastic quarter spaces of solids to time varying free surface shear tractions parallel to plane of juncture [ASME PAPER 69-APMW-16]
08 p1591 A70-21467
- Dynamic response of infinite cylindrical shell subjected to arbitrary time and space dependent forcing function in acoustic medium
08 p1593 A70-21621
- Inplane shear stress-strain response determined for unidirectional composites, using uniaxial test method for laminated plates
08 p1530 A70-21884
- Vibration theory damping using mathematical model emphasizing controlling response under steady state resonance and random excitation
09 p1769 A70-22238
- Longitudinal structural vibration and lateral bending response mass and spring coupling in Saturn AS-502 during boost with longitudinal excitation by pogo effect
09 p1766 A70-23239
- Roundoff noise output-dynamic range interaction in digital filters, discussing filter synthesis with transposition configurations concept
09 p1649 A70-23366
- Nonlinear many degrees of freedom systems steady state forced vibrations analysis, expressing response in nonlinear normal coordinates
10 p1954 A70-24010
- Channel electron multipliers design and operation, investigating parameters influencing amplification, resolving power and response probability
10 p1888 A70-24484
- Shell dynamics equations role in natural frequencies, determining dynamic response with damping allowance
10 p1960 A70-25052
- Forced vibration of rib-skin structures under random pressure and heavy damping using wave group theory
10 p1963 A70-25066
- Space vehicle residual thrust oscillation and dynamic response using power spectral density functions from flight data
10 p1953 A70-25068
- Aircraft arresting hook response to impact regarding beam flexibility and internal damping using numerical wave propagation methods
10 p1963 A70-25069
- Explosion aerial blast wave for producing impulsive structural forced response, discussing spatial distribution method for increased wave duration
11 p2133 A70-25729
- Sinusoidal and random loading response of age hardening aluminum alloy determined by fatigue testing
11 p2133 A70-25732
- Light aircraft lateral and longitudinal response to atmospheric turbulence, presenting equations and charts for design load calculations [SAE PAPER 700239]
11 p1981 A70-25908
- Transfer functions estimation by taking Fourier transform ratio of finite length samples of input and response measurements, considering error term probability density
11 p2071 A70-25954
- Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application
11 p2138 A70-26158
- Reaction impulse during steel spheres impacts at lead surface in vacuum dependent on kinetic energy, velocity and spheres material
11 p2146 A70-26794
- Missile and rail launching structure combined dynamic response determined by discrete element dynamic analysis
12 p2312 A70-27116

Complex structures vibration using component vibration modes, considering dynamic behavior from interface reactions effects

12 p2317 A70-27123

Cylindrical shell response to random acoustic excitation, considering single point transfer functions and equivalent force power spectral densities

12 p2317 A70-27125

Pressurized orthotropic cylindrical membrane shells free and forced vibration, considering dynamic response dependence on internal pressure

12 p2326 A70-27815

Gust response calculations compared with flight measurements for two fighter aircraft and jet transport to determine accuracy
[AIAA PAPER 68-892]

12 p2162 A70-28077

Spin stabilized nonrigid satellite dynamics, considering liquid propellant behavior effect

13 p2499 A70-28401

Prelaunch dynamic response test parameter selection for control systems for space complexes with form of Nyquist locus

13 p2381 A70-28423

Stability and wind response determining spacecraft structure forces and bending moments
[AGARDOGRAPH-115]

13 p2504 A70-28754

Spacecraft parameters role in response to atmospheric disturbances, considering model design and control systems effects
[AGARDOGRAPH-115]

13 p2504 A70-28757

Aircraft dynamic response to homogeneous isotropic atmospheric turbulence analyzed for power spectral density, taking into account spacewise variations in airframe loading

[AIAA PAPER 70-544]

13 p2345 A70-29010

Rudder control of aircraft nullifying yawing and sideslip angles, analyzing rolling response to proportional control by ailerons

13 p2348 A70-29450

Automatic dynamic response system for testing logic and semiconductor devices

13 p2379 A70-29693

Temporal structure and spectral evolution of Nd laser emission with self locking axial modes, noting gain saturation effects

13 p2430 A70-29776

Circular elastic shell response to moving and simultaneous loads, using impulse simulation method

13 p2518 A70-29986

Human temporal motor response models relating reaction, movement and manipulation time to stimulus, movement and manipulation information

14 p2540 A70-30248

Helicopter gust response at high forward speed for various rotor loads noting effects of gust shape, gradual penetration, nonsteady aerodynamics and blade aeroelasticity

[AIAA PAPER 68-981]

14 p2531 A70-30855

Plane frames with and without shear walls, determining dynamic response under vibration by finite element method

14 p2660 A70-31137

Piezoelectric annular disk transducer mechanical response to step voltage input with prescribed temperature field

14 p2588 A70-31228

Equivalent linearization for random vibration, considering stationary statistics of bilinear hysteretic one degree of freedom oscillator response

14 p2661 A70-31428

Upper atmospheric short lived disturbances connected with geomagnetic storms characterized by determining equivalent duration D/I value

15 p2723 A70-31651

Finite settling response for single input/output feedback control system obtained by dual rate sampled data control algorithm

16 p2882 A70-33037

Flight vehicle dynamic response prediction from elastic filler stiffness contained between rigid sphere and ellipsoidal shell

16 p2991 A70-33878

Dynamic response of simply supported elastic bodies due to oscillating point mass executing longitudinal harmonic motion based on linear theory

16 p2993 A70-34092

Rate-sensitive perfectly plastic linear strain hardened rings and tubes, calculating response to impulsive loads

17 p3184 A70-34907

Tracked air cushion vehicle dynamic heave response, examining flow characteristics, active lip control, guideway contact, acceleration response, etc

17 p3017 A70-35178

Shock wave response of metals and nonmetals under high strain rates

17 p3188 A70-35223

Elastic plate vibration with damping under random load, calculating linear response by harmonic analysis

18 p3334 A70-35958

Solid or hollow anisotropic elastic cylinders rotating with variable angular velocity, determining dynamic response by Hankel and Laplace transforms

18 p3338 A70-36433

Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads

18 p3338 A70-36436

Infinite Bernoulli-Euler beam transient and steady state response, considering damping, elastic foundation and constant axial load effects

18 p3339 A70-36490

Shock function response and Fourier spectra relationship, using Fourier transform for equation of motion solution

19 p3456 A70-37381

Dynamic response to step transverse loads of viscoelastic annulus of constant Poisson ratio in plane strain, analyzing work and spring-dash model
[ASME PAPER 69-LUB-23]

19 p3435 A70-37607

Infinite linearly elastic solid response with random variations in material elastic properties, obtaining average energy in displacement field by method of moments

19 p3538 A70-37796

Automatic control system impulse response points identification by fast Fourier transform

19 p3393 A70-37852

Group variational procedure for first integrals of nonconservative dynamical systems

19 p3458 A70-38060

High order servosystems approximation characterized by gain, time constant and dead time, discussing application to response prediction

19 p3394 A70-38503

Three axis large angle attitude control system global analysis, determining system stability, responsiveness and sensitivity to disturbances

[AIAA PAPER 70-996]

20 p3668 A70-39534

Pneumatic actuator control system improvement, using invariance theory to compensate load variability and dynamic response of medium

20 p3564 A70-39848

Long thin circular cylindrical shell resonance velocities in steady response to fluid motion

20 p3727 A70-39884

Dynamic response of distended carbon materials to shock loading defined by measuring equation of state, unloading behavior and spallation strength

20 p3657 A70-40263

Dynamic response of simply supported nonhomogeneous beam and triangular pulse loads

21 p3933 A70-40584

Thin cylindrical shell under nonaxially symmetric concentrated stationary radial loading, calculating random responses and stability

21 p3940 A70-42051

Light rigid civil aircraft response to continuous atmospheric turbulence estimated using two rigid body degrees of freedom method for vertical and lateral gusts

[AIAA PAPER 69-766]

22 p3961 A70-42703

Wind tunnel response tests of cup, vane and propeller wind sensors, determining wind direction and speed parameters, damped and natural frequencies, etc

22 p4030 A70-42914

Conjunctors and traditors circuit realizations, discussing resistive and dynamic nonlinear networks

22 p3996 A70-42919

Strain rate sensitivity and stress waves effects on dynamic response and adhesion failures of rain erosion resistant coatings

22 p4059 A70-43102

Resistance strain foil gage response to dynamic plastic strain

22 p4039 A70-43451

Linear FM radar pulse compression matched filter response calculated by computer evaluation of cross ambiguity function for design tradeoff between resolution and performance

22 p3992 A70-43589

Differential equations of motion for machine assembly, using Appel equations

23 p4200 A70-44319

Rubber mount vibration and shock isolation problems, discussing dynamic response to reaction forces and force concentration

23 p4269 A70-44330

Mechanical structure dynamic response to vibration environment, using mobility method analysis

23 p4269 A70-44334

Structural optimization of designs with requirements including restrictions on structure dynamic response and characteristics

23 p4270 A70-44562

Cantilever plate random vibration response, calculating eigenvectors and natural frequencies by finite element method

23 p4270 A70-44591

Lightly damped second order linear system mean square response to nonstationary random load excitation

24 p4421 A70-45280

Cylindrical shells dynamic thermoelastic response to sudden rotating thermal inputs, using Galerkin method

24 p4421 A70-45285

Gyroscope system steady states, showing dynamic couplings centering in finite angular precession rate case

24 p4335 A70-45630

Multidegrees of freedom electronic cabinets dynamic response to AM fast sine sweep
[SAE PAPER 700846]

24 p4380 A70-45884

DYNAMIC STABILITY

NT AERODYNAMIC STABILITY

NT AIRCRAFT STABILITY

NT ATTITUDE STABILITY

NT BOUNDARY LAYER STABILITY

NT COMBUSTION STABILITY

NT CONTROL STABILITY

NT DIRECTIONAL STABILITY

NT FLAME STABILITY

NT FLOW STABILITY

NT FREQUENCY STABILITY

NT GYROSCOPIC STABILITY

NT HOVERING STABILITY

NT LATERAL STABILITY

NT LONGITUDINAL STABILITY

NT LOW SPEED STABILITY

NT MAGNETOHYDRODYNAMIC STABILITY

NT MOTION STABILITY

NT ROTARY STABILITY

NT SPACECRAFT STABILITY

High speed rotor supported by air lubricated foil bearings subjected to periodic unidirectional excitation by vibrator, noting stability at high speeds
[ASME PAPER 69-LUB-E]

01 p0099 A70-10376

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis

[ASME PAPER 69-LUB-14]

01 p0101 A70-10391

Dynamic stability of simply supported column of linear viscoelastic materials under sinusoidal loading

01 p0206 A70-11148

Second order dynamic systems stability, analyzing nonlinear and self excited oscillations by using two differential equations

01 p0146 A70-11604

Nongeostrophic baroclinic stability theory predictions test experiment with vertical heating provision, describing fluid motions

02 p0289 A70-11830

Shock and detonation waves stability in arbitrary media, noting overdriven and underdriven waves

02 p0397 A70-12023

Snap-through dynamic instability of clamped shallow arches subjected to timewise step loads, establishing stability and instability conditions

03 p0583 A70-12919

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud

03 p0565 A70-13235

Dynamic stability of flexible aircraft fuselage in controlled supersonic flight at zero angle of attack, basing analysis on elastic oscillation equations

03 p0579 A70-13418

Elastoplastic bodies stability under compression, using theory of small elastoplastic deformations and linearized equations of nonlinear elasticity theory

03 p0591 A70-13440

Energy requirement for nonconservative elastic system unperturbed state stability, using direct Liapunov method

03 p0594 A70-13502

Energetic stability theorems of dynamical feedback system, removing assumption concerning local square integrability

03 p0460 A70-13971

Two dimensional wave diffraction problems involving discontinuity line, analyzing instability behavior of geometrically induced singularities by applying integral transform on Helmholtz equations

03 p0525 A70-14199

Lumped model formulated for dynamics of proportional fluidic amplifiers, describing flow visualization experiments for resonances and instabilities mechanisms
[ASME PAPER 69-WA/FLCS-3]

04 p0627 A70-14848

Interstellar gas instability, discussing thermal, magnetic and cosmic ray effects

04 p0753 A70-15072

Spherical caps axisymmetric static and dynamic buckling under load, using axisymmetric nonlinear elastic shell theory approximation and finite difference equations
[AIAA PAPER 69-89]

04 p0778 A70-15587

Rate equation analysis of steady state behavior of double cavity GaAs diode laser, noting solution stability by perturbation method

04 p0703 A70-15618

Helicoid precession in reentry problem found unstable in sense of Liapunov and Lagrange and asymptotically stable in sense of Poincare

04 p0765 A70-15666

Stability conditions for relief valves assumed to be part of closed hydraulic line simulating receiving part

05 p0797 A70-15899

Stereophotogrammetric measurement for dynamic deformation of circular membrane subjected to underwater detonation

05 p0927 A70-16009

Soviet book on anisotropic plates theory, strength, stability and oscillations including corrections to classical theory

05 p0928 A70-16016

Stability of nonlinear plasma waves set up by counterstreaming cold electron beams immersed in background of stationary ions

05 p0889 A70-16531

Liapunov second method extension to dynamical systems stability, illustrating wing torsional divergence and panel supersonic flutter

05 p0941 A70-16564

Conjugation principle for control system stabilization based on relation between controlled plant and stabilizing element stability

05 p0824 A70-16851

Transonic dynamic stability of free flight half angle cones in wind tunnel for high drag planetary entry vehicles, discussing Mars entry trajectories

[AIAA PAPER 69-105] 06 p1154 A70-17164

Dynamic stability loss on ablating vehicles ascribed to boundary layer transition effect from turbulent aft body heating

[AIAA PAPER 69-106] 06 p0961 A70-17166

Einstein field equations based on variational principle applied to stability of general self gravitating relativistic gaseous mass obeying specific equation of state

06 p1138 A70-17304

Parasitic elements influence on stability of linear equivalent circuits with tunnel diodes

06 p1022 A70-17674

Three dimensional motion of nonrigid parachute and payload system analyzed for dynamic stability

[AIAA PAPER 70-209] 06 p0987 A70-18062

Dynamic stability of complex aeroelastic structures including V/STOL aircraft using simplified technique, noting application to tilt rotor aircraft design

[AIAA PAPER 70-22] 06 p1170 A70-18119

Dynamic instability of finned missiles occurring as angle of attack undamping and caused by differential lift from windward and leeward fins

[AIAA PAPER 70-206] 06 p1158 A70-18178

Whistler amplification in magnetosphere for electron interaction with background plasma to produce wave growth, discussing stability of various anisotropic velocity distributions

06 p1059 A70-18533

Gyroscopes orientation cross coupling effect on dynamic drift of three axis gyrostabilizer solved by method of successive approximation

07 p1278 A70-18736

Periodic motions and dynamic stability of nonlinear distributed sampled data system of closed loop of pulsed element governed by heat conduction equation

07 p1226 A70-18749

Detonation front structure stability in gases, discussing spin detonation, transverse waves, perturbation, etc

07 p1418 A70-18751

Gaseous spheres gravitational stability in proper field, considering convection and radial perturbations effects

07 p1383 A70-19408

Gravitating particles systems equilibrium states, solving kinetic equations for sphere and cylinder in isotropic and anisotropic cases

07 p1389 A70-20207

Dynamic stability of pendulum-weight system during vertical HF small amplitude vibration of suspension point by averaging method

08 p1543 A70-20494

Central equilibrium position stability of gas bearing supported rotor allowing for inertia and lubricant compressibility

08 p1502 A70-20695

Dynamic stability of shallow shells, taking into account longitudinal inertial forces and nonlinear geometry

08 p1587 A70-21170

Stability and potential cavitation of centrifugal pump operating with four working wheels with different geometric parameters

08 p1558 A70-21196

Vibration stability of two identical particles constrained to plane and restrained by three linear springs with initial stress

08 p1591 A70-21466

Lagrangian stability of stellar systems of Trapezium in Orion type situated within large stellar cluster or cosmic cloud

08 p1580 A70-21668

Free vibrations and dynamic buckling of hinged extensible beam under axial force

09 p1768 A70-22061

Fluids equilibrium stability within medium at constant temperature and pressure, discussing time behavior of thermodynamic processes

09 p1786 A70-22062

Variational principle application to stability in failure mechanics of arbitrary linearly elastic bodies, discussing inertia effect on steady state vibrations of cracked bodies

09 p1771 A70-22465

Dynamic stability of Jeans spheroid and Roches ellipsoid using small perturbations method

09 p1759 A70-22749

Free flight static, dynamic stability and drag data for 10 degree semiangle cone obtained at 8-16 Mach numbers

[AIAA PAPER 69-133] 09 p1605 A70-23218

Lifting reentry dynamic stability of flare stabilizers and flap controls

09 p1766 A70-23242

Elastic chain systems stability and natural vibrations using parameter coupling method permitting integral equation construction

09 p1784 A70-23596

Beam vibration eigenfunctions with allowance for shear compliance used to determine beams dynamic stability under pulsating axial load

09 p1785 A70-23600

Computer simulation of six degree of freedom motion system and actual system test, substantiating simulation accuracy

[AIAA PAPER 70-358] 10 p1859 A70-24218

Pulsed solid state laser power output stability in terms of kinetic theory noting laser action threshold role

10 p1899 A70-24254

Coupled control of space vehicle orientation with reference to three celestial bodies, reducing plane vibrations to dynamic third order system

10 p1914 A70-24307

Horizontal fluid layer heated from above or below analyzed for gravitational field sinusoidal modulation effects on stability

10 p1968 A70-24523

Thin elastic plates and shells parametric resonance amplitudes by solving nonlinear differential equations, considering dynamic stability

11 p2129 A70-25523

Balanced rotor with radial sliding bearing bushings, studying lubricant gas restoring force effect on stability with allowance for bushings translational movements

11 p2058 A70-25581

Asymptotic stabilization of multivariable dynamic systems, using subsystem decomposition and Liapunov second method

11 p2023 A70-25607

Nonlinear dynamic theory describing elastic Cosserat curves plane motion, developing linear displacement equations and dynamic stability concept

11 p2142 A70-26632

Electric arc stability with descending static I-V characteristics in plasmatrons using direct Liapunov method

11 p2093 A70-26734

Equations of motion for dynamic stability of flexible freely spinning Alouette-type satellite with crossed dipole configuration

12 p2312 A70-27194

Three dimensional variational dynamic and static large deformation equations solutions for stability and natural frequencies and wave propagation in bodies under initial strains

12 p2322 A70-27331

Dynamic systems absolute stability, optimality and passivity algebraic criterion in terms of real even polynomial coefficients

12 p2261 A70-27412

Dynamic stability of multipoint servocontrol system actuating thin deformable primary mirror of orbiting telescope

12 p2203 A70-27413

Amplitude and phase fluctuations in laser with nonlinear absorption due to spontaneous emission, studying lasing instability near hysteresis threshold

12 p2248 A70-27548

Dynamics of gravity stabilized satellite having maximum damping rate

13 p2499 A70-28391

Minimum time control for placing circular orbit satellite in gravitationally stable position

13 p2502 A70-28440

Blade torsional degree of freedom effects on stability and flapping response of rotors operating at high advance ratios

13 p2507 A70-28444

Two mirror astigmatic resonator mode fields and stability determined by writing Fredholm equation suitable to geometrical optics approximation

13 p2424 A70-28596

Soviet book on dynamics of rockets covering solid and liquid fuel rocket stability, controllability and transfer functions

13 p2505 A70-28799

Reentry vehicles dynamic stability analysis involving pitch, yaw and roll motions modes coupled by asymmetries

[AIAA PAPER 70-561] 13 p2341 A70-29027

Blunt heat shield effectiveness for trailing payload in reentry capsules, discussing dynamic instability effect

[AIAA PAPER 70-563] 13 p2341 A70-29028

Transonic static and dynamic stability of large angle spherically blunted high-drag cones

[AIAA PAPER 70-564] 13 p2341 A70-29029

Pulsed noise stability of discrete data transmission system having multipositional frequency manipulation as compared to binary system

14 p2547 A70-30148

Liapunov type analysis of linear structural dynamic system excited by stochastic parametric load, discussing radially loaded thin circular plates

14 p2657 A70-30763

Cylindrical propellant tanks dynamic stability and parametric resonance, analyzing axial preload, liquid depth top impedance and ullage pressure by Donnell theory

14 p2657 A70-30764

Dynamic stability derivatives calculation using steady and oscillatory lifting surface theory with allowance for Bryan limitations

14 p2529 A70-30864

Static and dynamic stability of wind tunnel models with flexible support, considering binary rigid body freedoms

14 p2564 A70-31398

Stability loss of dynamic two dimensional mechanical elastic system with single degree of freedom under trajectory bifurcation

15 p2775 A70-32474

Massive hydrogen burning stars evolution with pulsational mass loss based on minimizing pulsational instability degree to specify mass loss rate

15 p2803 A70-32612

Shock wave front propagation instability in decreasing density medium, applying to stellar structure

16 p2890 A70-33200

Linear dynamic systems under nonconservative and harmonic forces, examining stability conditions

16 p2952 A70-33896

Nonlinear dynamic stability of fluid layer heated from below in time dependent bounded domain

16 p2943 A70-34249

Nonlinear dynamic systems described by matrix equation, formulating asymptotically stable conditions, discussing motion equations of two degree of freedom system

16 p2995 A70-34281

Neutral type differential equations transformation to time lag system making periodic vibrations existence and stability theorems applicable

16 p2944 A70-34282

Tau-decomposition stability analysis method applied to two degrees of freedom system subjected to retarded follower forces

17 p3176 A70-34957

Equilibria stability of linear discrete dynamic systems involving elastic, nonconservative, dissipative and gyroscopic forces, using Liapunov-type energy method

17 p3129 A70-34958

First order difference equations for dynamical systems from Hamilton canonical equations

17 p3129 A70-34959

Minimal interference thin metal strap support system for dynamic stability tests of high fineness ratio wind tunnel models

17 p3063 A70-35657

Solar prominences thermal and dynamical stability in terms of optically thin plasma supported by magnetic field against gravity

17 p3174 A70-35867

Constraint torque elimination from vector equations canonical system for attitude dynamics of satellite consisting of arbitrarily interconnected rigid bodies

[AIAA PAPER 69-923] 18 p3316 A70-36679

Flat model galaxy stability, examining unstable two armed density wave by numerical methods

18 p3330 A70-37190

Dynamic unbalance effects in rigid body rotors, discussing lubricant temperature changes and instability hysteresis

[ASME PAPER 69-LUB-14] 19 p3435 A70-37606

Transient system decay characteristics, discussing equilibrium point damping time for asymptotically stable systems of ordinary differential equations

19 p3542 A70-38066

Blast loaded cylindrical shell collapse hinge dynamic instability prediction by mathematical model

19 p3545 A70-38334

Gravity effects on impact damper performance, investigating dynamic stability and kinematic viability of various steady state motion solutions

20 p3717 A70-38974

Gravitational effects on impact damper performance, discussing dynamic stability and kinematically viable periodic motion and resonant conditions

20 p3717 A70-38975

Relativistic gas spheres and collisionless star cluster models with large red shifts, showing radial perturbation stability

20 p3703 A70-39175

Spinning blunt entry vehicles dynamic stability tests in terminal regime, discussing dependence on angle of attack [AIAA PAPER 70-988] 20 p3714 A70-39541

Nonrolling lifting gliding vehicle hypersonic longitudinal dynamic stability, applying analysis to space shuttles [AIAA PAPER 70-977] 20 p3715 A70-39552

Cruciform-finned missiles dynamic stability investigation by nonlinear differential equations of motion, considering roll lock-in, resonance instability and catastrophic yaw [AIAA PAPER 70-969] 20 p3715 A70-39560

Two dimensional detonations structure by nonlinear theory for systems with hydrodynamically unstable steady state solutions, imposing periodic boundary conditions 20 p3609 A70-39658

Thin walled circular cylindrical steel shells dynamic stability partly filled with liquid and subjected to longitudinal excitation 20 p3723 A70-39852

Elastic shell stability criterion during short duration dynamic loading 20 p3725 A70-39864

Rotating elastic shafts rectangular shape stability under creep conditions, considering single mass rotor 20 p3727 A70-39883

Dynamic stability of cylindrical shell with small curvature under static or periodically variable axial pressure loads 21 p3932 A70-40554

Be star HD 37202 zeta Tauri II envelope instability, discussing radial velocities, profiles, line width and electron density in layers 21 p3888 A70-41119

Inlet data for engine stability analyses, developing technical management procedure patterns for pretest test and posttest results [AIAA PAPER 70-1214] 21 p3745 A70-41320

Book on stability of dynamic systems and solid bodies covering variation equations, Liapunov method and functions, approximations, harmonic balance and applications 21 p3850 A70-41370

Static and dynamic longitudinal stability of semirigid parafoil gliding descent system in pitching motion [AIAA PAPER 70-1191] 21 p3753 A70-41825

Fin slots and tabs effect on dynamic stability characteristics of low drag bomb, discussing free rolling and pitching tests 21 p3747 A70-41880

Spatial stability of transferred arc anode spots during cutting with plasma jets, noting currents associated with microspots 22 p4043 A70-42380

Linear dynamic systems stability under various types of forces 22 p4061 A70-42536

Elastic bodies under motion-dependent loads, examining thermodynamic conditions of equilibrium states stability 22 p4123 A70-42538

Circular plates dynamic stability under variable periodic loads, using differential equations of vibrational motion for median surface 22 p4114 A70-42613

Earth gravity deforming effect on flexible crossed-dipole satellite configuration, considering dynamic stability and spin stabilization 22 p4110 A70-43434

Heavy homogeneous material free elastic rod dynamic stability under distributed scanning load, investigating plane transverse vibrations by differential equations 22 p4121 A70-43722

Dynamic systems stability with periodically varying parameters analyzed by Hill type infinite determinant, exemplifying helicopter rotor aeroelastic stability in forward flight 23 p4220 A70-44556

Pendulum dynamic stability under parametric excitation, presenting transient and steady state solutions by linear and nonlinear theory applications 24 p4379 A70-45587

Formation flight stability in dynamic environment, using stationkeeping geometry simulation [AIAA PAPER 70-1337] 24 p4373 A70-45931

DYNAMIC STRUCTURAL ANALYSIS

Random vibration of interconnected systems, analyzing power flow and energy levels in linear oscillator interacting with environments, using Thevenin-Norton representations 01 p0207 A70-11161

Transfer matrix method analysis of dynamic behavior of beam structures applied to single rows of aircraft panels 01 p0209 A70-11200

Book on vibrational motions of straight and curved shafts, covering dynamic analysis for noncircular cross sections, applications to machine tools and vehicles design, etc 01 p0209 A70-11378

Asymptotic dynamic theory for elastic cylindrical shells incorporating thickness effects, considering longitudinal wave propagation in infinite length shell 02 p0385 A70-11877

Dynamic structural analysis using computer graphics display, emphasizing applicability to man machine interaction at key decision making points 02 p0386 A70-11943

Rigid body dynamics of turborotors in fluid film journal bearings, investigating initial transients effect on motion stability by Runge-Kutta technique [ASME PAPER 68-LUB-7] 02 p0307 A70-12165

Triangular conforming plate bending element applied to static and dynamic problems, investigating convergence rates of finite element approximations 03 p0584 A70-12924

Visco-elastic column analysis based on mechanical model, investigating relationships between solid viscosities, loading velocities, initial deflections and dynamic buckling loads 03 p0596 A70-14146

Axisymmetric structures under load and temperature distribution analyzed by matrix displacement method [DGLR-69-62] 04 p0774 A70-15167

Postdamage structural analysis based on Hardy-Cross method, describing mathematical techniques 04 p0776 A70-15391

Transient excitation methods for structures dynamic analysis, discussing suitable forcing transients choice 06 p1165 A70-17646

Three dimensional latching dynamics and loads induced during Apollo spacecraft docking, using linear stiffness or flexibility matrices for structural elasticity [AIAA PAPER 70-21] 06 p1158 A70-18181

Elastic membranes deformation compressed by restraints using discrete dynamic programming 07 p1400 A70-18680

Natural oscillations of three dimensional bundle of parallel strapped rods with variable elastic mass parameters determined by Hamilton-Ostrogradskii variational principle 08 p1583 A70-20485

Inhomogeneous elastic half space surface response to moving line loads 08 p1584 A70-20645

Stress-strain analysis for rod-shaped structural elements under combined tensile and bending loads 08 p1588 A70-21191

Lateral buckling of simply supported uniform diaphragm using slope-deflection equations for orthogonally intersecting beams, prescribing boundary conditions 08 p1589 A70-21244

Prismatic thin walled shells with box type cross section under torsion using Vlasov variational method in conjunction with transfer matrices 08 p1589 A70-21248

Dynamic buckling of thin circular ring subjected to radially directed impulsive load, investigating in-plane and out-of-plane modes 08 p1596 A70-21978

Rotating circular disk under angular acceleration, analyzing stress and deformation distributions 08 p1596 A70-21980

Potential function of creep strain rates for incompressible nonstrengthening materials exhibiting different creep characteristics in tension and compression 09 p1769 A70-22122

Rotatory inertia and shear deformation effects on structural vibrations of Timoshenko beams and frameworks using matrix formulation 09 p1770 A70-22257

Four point supported square plate fundamental frequency by finite difference and energy methods 09 p1770 A70-22389

Matrix theory of elastic locking structures, programming for analysis under given loads and displacements 09 p1771 A70-22396

Flexo-torsional elasticity ellipse determining displacements, hyperstatic reactions and influence lines in beams with straight axis and variable cross section 09 p1771 A70-22398

Self excited vibrations in balanced vertical shaft running on plain lubricated bearings, making numerical analysis of small perturbation transition to fully developed swirl 09 p1690 A70-22399

Inertia effect in failure mechanics for steadily developing equilibrium cracks in dynamic system with time dependent periodically variable load 09 p1771 A70-22466

Soviet book on rocket structure mechanics covering acting loads and selection of tanks, stage segments, nose section and propulsion units 09 p1772 A70-22527

Constant cross section beam bending and torsion with allowance for moment stresses, deriving differential equations for displacement functions 09 p1773 A70-22538

Forced vibrations of trusses calculated by dynamic rigidities method allowing for friction forces 09 p1773 A70-22540

Truss vibrations calculations by method of dynamic rigidities, describing numerical methods for solving frequency equation to save computer storage capacity 09 p1773 A70-22546

Spherical and cylindrical cavities dynamic plastic expansion analysis by finite element method allowing for inertia forces 09 p1777 A70-22724

Sensors design for studying temperature fields and stressed state of structures 09 p1680 A70-23106

External plane dynamic problems reduction to infinite algebraic equations in elasticity theory for simply connected domains based on Helmholtz equation solution in curvilinear coordinates 09 p1783 A70-23391

Dynamic photoelastic analysis of fracturing plastic plates, studying elastic and stress fields around propagating cracks 09 p1783 A70-23448

Finite deformations of flexible inelastic orthotropic shells of revolution for generalized plastic flow and deformation theories 10 p1955 A70-24079

Finite deflections theory applied to elastic-plastic arches, introducing coefficients depending on shape and degree of yielding of cross section 10 p1955 A70-24080

Bending of homogeneous orthotropic rectangular plate of variable thickness supported on opposite edges, obtaining solution as Fourier series 10 p1955 A70-24083

Dynamic shear modulus and depth of dominant layer of vibrating elastic medium, assuming foundation as isotropic stratum on rigid bed 10 p1957 A70-24481

Kinematic analysis of limit loads of equilateral triangular plates under various boundary conditions 10 p1958 A70-24517

Dynamic stresses, temperature and displacements fields in thin circular disk under transient heat sources, considering mechanical resonance vibration 10 p1958 A70-24518

Structural behavior during creep by step by step process suitable for computers after linearizing non-linear equations [ONERA-TP-805] 10 p1958 A70-24545

Structural dynamics - Conference, Loughborough, Leics., England, March 1970, Volume 1 10 p1960 A70-25051

Shell dynamics equations role in natural frequencies, determining dynamic response with damping allowance 10 p1960 A70-25052

Structural dynamics - Conference, Loughborough, Leics., England, March 1970, Volume 2 10 p1962 A70-25064

Moving mass effects on Euler beam analysis extended to Timoshenko beam, obtaining numerical solutions by finite difference method 10 p1963 A70-25073

Torsional vibration of rotating tapered and twisted turbomachine blade, constructing digital computer program for convergence and boundary conditions [SAE PAPER 700180] 11 p2128 A70-25373

Momentum theory of small elastic-plastic deformations, proving minimum potential energy, simple loading and elastic unloading theorems 11 p2128 A70-25387

Explosion arial blast wave for producing impulsive structural forced response, discussing spatial distribution method for increased wave duration 11 p2133 A70-25729

Dynamic synthesis of hinged four-element mechanism with respect to driven link position, transmission relations and allowance for transmission angle 11 p1983 A70-25934

Dynamic buckling of shell or arch structure determined from response of two degrees of freedom structure to step load application 11 p2138 A70-26158

Thin cylindrical shells of perfectly plastic rigid material, analyzing dynamic plastic deformation under internal impulsive pressure 11 p2139 A70-26413

Nonuniform beam element stiffness matrices for dynamic and elastic instability analysis, determining frequencies, mode shapes and critical loads 11 p2143 A70-26643

Elastic postbuckling and imperfection sensitivity of discrete structural systems using perturbation approach 11 p2143 A70-26668

Lunar Orbiter spacecraft vibration responses based on mathematical models, comparing results with experiment 12 p2315 A70-27098

Materials and structural dynamics - AIAA-ASME Conference, Denver, April 1970 12 p2315 A70-27101

Apollo lunar module structural integrity for lunar landing verified by Monte Carlo dynamic analysis
12 p2312 A70-27114

Airframe structural tests in elevated temperature environment by applied load ratios and room temperature static results
12 p2205 A70-27134

Space shuttle structural dynamic problems, discussing stall flutter due to transition from high angle of attack to normal aircraft flying attitude [AIAA PAPER 70-740]
12 p2312 A70-27150

Semiinfinite composite medium displacement caused by nucleus of torsional strain with axis perpendicular to constituent isotropic layers interfaces
12 p2321 A70-27159

Elastic-plastic plane stress analysis of two dimensional structures based on Tresca yield criterion, using finite element technique
12 p2326 A70-27795

Dynamic analysis involving crack extension force for two dimensional multiple radial crack division
13 p2510 A70-28602

Dynamic instability of multirecess hydrostatic journal bearings at critical shaft rotation velocity
13 p2418 A70-28745

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body
13 p2517 A70-29763

Eigenvalue and eigenvector derivatives in dynamic system designs involving vibrations and oscillations, discussing applications in modeling
13 p2518 A70-29971

Dynamic stiffness, natural frequencies and mode shapes of prismatic and thin walled open grids, including warping and shear flange deformation
14 p2659 A70-31132

Plane frames with and without shear walls, determining dynamic response under vibration by finite element method
14 p2660 A70-31137

Elastic membranes deformation compressed by restraints using discrete dynamic programming
15 p2813 A70-31472

Matrix analysis of discretized dynamical system with constraints, considering case of damped oscillators
15 p2774 A70-31697

Dynamic structures design optimization subject to shock spectrum, describing conversational type computer program [ASME PAPER 70-DE-28]
16 p2989 A70-33501

Dynamic seal effectiveness prediction, considering bearing and sealing pressure distributions, friction coefficient, flow characteristics, etc [ASME PAPER 70-DE-53]
16 p2918 A70-33514

Nonlinear dynamic analysis of shells of revolution under symmetric and asymmetric loads, obtaining solutions for shallow cap buckling
16 p2994 A70-34229

Mechanical vibrations models and analysis techniques, emphasizing problem of weak couplings in discrete systems
16 p2996 A70-34290

Mathematical techniques for optimal design of single purpose structures under dynamic deflection
17 p3182 A70-34544

Dynamical stresses in members and structures under impulsive loads, taking into account solid viscosities and frequencies effects
17 p3187 A70-34998

Impulsive loading of structures via light-initiated sprayed explosives
17 p3059 A70-35162

Impulse loading of rings using magnetically accelerated flyer plates
17 p3187 A70-35163

Torsional vibration of thin beam with varying cross section, formulating fundamental equation and boundary conditions
18 p3339 A70-36519

Three dimensional dynamic analysis of small harmonic stress wave propagation in elastic-plastic and viscoplastic materials, using finite differences
18 p3344 A70-36724

Magnetomotive loading of cantilevers, beams and frames, studying dynamic loading of structures
19 p3541 A70-38045

Rectangular plates free and forced vibrations, including rotatory inertia and shear deformation effects in dynamic response analysis
19 p3544 A70-38327

Rectangular plate with three clamped edges, analyzing free vibration by Ritz method with deflection functions
19 p3544 A70-38328

Circular sandwich arc subject to central concentrated load and symmetrically applied edge couple, obtaining shakedown interaction curve
19 p3546 A70-38354

Dynamic testing of turbine machine parts using strength and vibration equations and similarity method
19 p3437 A70-38472

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body
20 p3732 A70-40101

Mathematical techniques for optimal design of single purpose structures under dynamic deflection
20 p3733 A70-40381

Stress-strain characteristics at high strain rates, obtaining materials dynamic plastic properties by thin wafer technique
21 p3932 A70-40543

Dynamic response of simply supported non-homogeneous beam and triangular pulse loads
21 p3933 A70-40584

Skew panels supersonic flutter and vibration calculated by matrix displacement method
21 p3933 A70-40586

Free vibration optimization analysis by reducing stiffness and mass matrices
21 p3933 A70-40587

Dynamics of deployable space structures stiffened by centrifugal forces due to spin, discussing L F radio telescope
21 p3931 A70-41854

Analytical iteration method extended to critical load of clamped beam with symmetrically variable cross section
21 p3939 A70-41965

Cylindrical cavity uniform expansion in compressible elastic plastic solid, calculating pressure by similarity solution
22 p4114 A70-42634

Cantilevered tube conveying fluid, calculating forced vibration under time dependent loading and arbitrary initial conditions
22 p4010 A70-42650

Strapdown inertial attitude indication, describing static and dynamic tests, error propagation profiles, performance prediction, etc
22 p4068 A70-42668

Rectangular plates natural vibration problem, using straight line method with approximate separation of variables
23 p4265 A70-43982

Data acquisition and processing in structural modal characteristics analysis during ground resonance tests [ICAS PAPER 70-36]
23 p4267 A70-44133

Mechanical structure dynamic response to vibration environment, using mobility method analysis
23 p4269 A70-44334

Thin shells static and dynamic finite element analysis
23 p4273 A70-44721

Complex structures component modal dynamic analysis technique, describing investigations with combination of finite element and composite modes computer program
23 p4273 A70-44722

Dynamic structural stability analysis, describing integral equation matrix technique
24 p4419 A70-45156

Rectangular cable networks covered by or embedded in membrane matrix, calculating vibration response under load by Galerkin method
24 p4421 A70-45279

Lightly damped second order linear system mean square response to nonstationary random load excitation
24 p4421 A70-45280

Natural frequencies of elastic bodies with variable properties, using external forcing function and continued fractions approximation
24 p4422 A70-45295

DYNAMIC TESTS

Dynamic testing instrumentation for oxygen breathing equipment emphasizing demand regulators and masks, connecting hose, helmets and individual components
01 p0041 A70-11458

Metal adhesive joints peeling and stripping strength determinations, describing static and dynamic tests
08 p1503 A70-20884

Stress, strain and strain rate relations determined from dynamic flexural beam tests with bending moment in terms of curvature
08 p1592 A70-21475

Dynamic force measurement methods, considering reaction force and operational compensation
09 p1672 A70-22013

Analog computer methods applied to aerospace dynamic test data analysis and high speed screening [AIAA PAPER 70-595]
13 p2375 A70-29880

Charpy V notch and dynamic tear tests compared for fracture toughness characterization of Ni-Cr-Mo-V steel
14 p2596 A70-30931

Impact test machines, specimen design and energy measurement in dynamic tear test method for steel fracture strength
15 p2759 A70-32242

Start-stop dynamics as cost effective method for computerized testing of digital modules and subassemblies, providing static and dynamic capability
17 p3062 A70-35504

Gyro test package, dynamic test facility and real time attitude algorithm to investigate operational capabilities of strapdown inertial attitude package
17 p3134 A70-35652

Dynamic system modeling pulse test data reduction by digital computer and functional approximation for Fourier transform calculations
18 p2320 A70-36458

Rocket engine tests dynamic data oscillographic presentation and digital processing
19 p3490 A70-37916

Magnetic perturbations effect neutralization for satellite attitude stabilization by real time simulation of satellite angular motion in magnetic field
19 p3399 A70-38286

Inertial platform with integral dynamic self test and fault monitoring scheme, describing design and operation [AIAA PAPER 70-1013]
20 p3667 A70-39520

Helicopter dynamic tests for aeroelastic and mechanical instabilities and forced vibration problems
21 p3749 A70-40583

Shock and bump testing for dynamic mechanical environments effects encountered by vehicle equipment and components
23 p4195 A70-44331

DYNAMICS

Dynamic discrete systems unsteady motions stability, formulating theorem for finite characteristic numbers existence
08 p1543 A70-20493

Book on dynamics of mechanisms with elastic connections and impact systems covering differential and finite difference equations, equations of motion, friction effects, etc
08 p1502 A70-20753

Dynamics dominant on different scales in atmosphere by spectral analysis, showing marked gap under most synoptic conditions
09 p1717 A70-22376

Insular system energy and momentum definition in external gravitational field, using dynamic equations and Einstein theory
19 p3513 A70-37412

Dynamic systems stability in sense of Poisson, relating motions commutative and stable families
19 p3472 A70-38936

Hamilton-Jacobi theorem for nonlinear dynamic system moving with holonomic Cetaev constraints, investigating necessary and sufficient conditions
23 p4210 A70-44024

DYNAMO THEORY

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field
01 p0173 A70-10133

Two layer truncated harmonic model of Rossby wave dynamo for solar cycle, accounting for maintenance and reversal of magnetic fields
01 p0174 A70-10238

Polar magnetic disturbances during IQSY characterized by SP field superposed on Sq field generated by ionospheric dynamo
01 p0075 A70-10599

DC dynamo models for planetary electromagnetic conditions, considering nonrotationally symmetric turbulence induction actions and critical values for field maintenance
01 p0185 A70-10956

Dynamo theory of stellar and planetary magnetic fields, discussing mathematical analysis and electronic computation of eigenvalue problems and field parameters
01 p0185 A70-10957

Earth daily rotation effects on magnetosphere electric currents, discussing Pederson currents in dynamo region and E region ionization
02 p0293 A70-12775

F 2 small scale inhomogeneities drift relation to current systems of dynamo region, discussing solar activity effects on ionospheric conductivity
07 p1267 A70-19452

Stratosphere-ionosphere coupling, dynamo theory on geomagnetic Sq variation and ionosphere radio wave absorption and reflection
07 p1274 A70-20271

Hypothetical magnetic configurations in presence of Coriolis forces from convective cell hydromagnetic activity in solar plasma, considering dynamos with increasing magnetic field
08 p1576 A70-21409

Ionospheric wind velocity fields calculated from atmospheric dynamo effects taking into account electric field, current density and conductivity tensor
10 p1881 A70-24819

Homogeneous turbulent velocity effect on magnetic field distribution in electrically conducting fluid with no external source, observing dynamo action
11 p2091 A70-26545

Ionosphere dynamo region thermal input by Joule heating and solar radiation and coupling to various thermotidal modes, observing semidiurnal and semianual effects
11 p2047 A70-26569

Earth core flow velocity field to construct kinematic model of hydromagnetic dynamo, discussing magnetic field development 13 p2398 A70-29209

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models 14 p2568 A70-30202

Earth dipole field disk dynamo model, studying connection between polarity intervals and precession effects 14 p2638 A70-30619

Spatially periodic dynamos, analyzing homogeneous conducting fluid motions and magnetic field forms 18 p3291 A70-36407

F 2 small scale inhomogeneities drift relation to current systems of dynamo region, discussing solar activity effects on ionospheric conductivity 18 p3249 A70-36926

Solar magnetic field origin and behavior, discussing hydromagnetic dynamos, cyclonic convection and generation times 20 p3706 A70-39927

Earth magnetic dipole represented by Rikitake two-disk MHD dynamo system 22 p4013 A70-42633

Dynamo region electrostatic fields effects on magnetospheric drift, taking electrical conductivities and solar and lunar tidal modes into account 23 p4185 A70-43836

Dynamo role in magnetospheric disturbances and ionospheric inhomogeneities, allowing for charged particle concentration height dependence 23 p4237 A70-44059

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models 24 p4330 A70-46277

DYNAMOMETERS

Multiplying digital device for measuring motor speed, torque and power, discussing optional applications and design 02 p0297 A70-12076

Dynamic hysteresis loop measurement of energy dissipation in materials, showing deformation effects on accuracy 19 p3535 A70-37346

Stabilograph and support dynamograph based on amplitude modulation of carrier frequency for standing stability determination in humans 19 p3371 A70-38220

DYNODES

Fatigue effects of incident illumination on area sensitivity, dynode gain stability and anode output for end-on photomultipliers 09 p1683 A70-23511

Hybrid Cockroft Walton multidynode photomultiplier supply for space applications, using miniature components and thick film technology 12 p2233 A70-27406

DYSON THEORY

Radiation transfer problem in waveguide with statistically uneven walls reduced to Dyson and Bethe-Salpeter equations in quantum field theory 03 p0524 A70-13066

Coherent wave reflection from random half space, solving scalar Dyson equation in bilocal approximation for oblique incidence 12 p2189 A70-27972

DYSPROSIUM

Absorption spectra of single crystals TbAlG and DyAlG garnets, investigating Verdet constant dependence on ion concentration 07 p1355 A70-18705

Phase diagram of dysprosium oxide-chromium oxide system constructed by microstructural analysis in 1600-2400 C range in argon atmosphere 08 p1556 A70-21118

Isotropical crystals of Dy compounds investigated for magnetic behavior using high resolution photoelectric optical spectroscopy 12 p2261 A70-27243

E

E LAYERS

U E REGION

E REGION

NT E-2 LAYER

NT SPORADIC E LAYER

Heat sources in E region from electron temperature data analysis recorded by rockets during eclipses in July 1963 01 p0082 A70-11491

Electron gas heating at E region altitudes as function of ionization of atmospheric gases, noting rocket experiments during solar eclipse 01 p0082 A70-11492

Rocket sounding data on ionospheric currents at mid and low latitudes noting absence in D and above E region 01 p0082 A70-11529

Auroral breakup effects on sporadic E via comparison between sequential ionograms and riometer absorption data indicating transient effect in D/E regions 02 p0288 A70-11744

E layer kinetic energy viscous dissipation and transfer to potential energy by turbulence and irregular winds shear 02 p0327 A70-12292

Lower E region turbulence interpretation based on high resolution photographs of artificial sodium vapor trails 03 p0476 A70-13913

Radar Thomson backscatter observations of ion temperature and ion-neutral collision frequency used to investigate reversible heating in E region 03 p0477 A70-13988

Uniform stratified layers in equatorial E region determined from Centaur rocket capacitance probe electron density observations, suggesting internal atmospheric gravity waves mechanism 03 p0478 A70-14222

Lunar tide in E region phase height from measurements of diurnal phase path change for continuous wave 04 p0678 A70-14973

F region ionograms processing with correction for ionization effects between E and F layers 04 p0684 A70-15748

Magnetic disturbance associated with E layer east-west electric current calculated in terms of ionization production and loss 05 p0838 A70-16282

Phase path variation of stable continuous wave transmission reflected from E region during daytime, discussing night time results 06 p1055 A70-17593

Seasonal variations of maximum electron concentration in stratified E-F region, including E 2 layer recombination coefficient and F layer characteristics probability 06 p1057 A70-17842

D and lower E region absorption of short waves, studying absorption distribution with height 07 p1263 A70-19153

Lowest useful frequency /LUF/ prediction on long distance quasi-antipodal circuit, considering E layer blanketing 07 p1232 A70-19178

Barium ion artificial clouds motions and striations due to cloud-ionosphere coupling, studying electron density variations below cloud in E layer 07 p1271 A70-20155

Ionospheric irregularities-diffraction patterns relative drifts, verifying point source effect for radio waves reflected from E and sporadic E layers 07 p1236 A70-20162

Radar measurements of magnetic dip in E region compared with surface values and spherical harmonic models for dip angles 07 p1271 A70-20163

Reactions determining ion composition in E region, discussing neutral composition variations from day to night and during solar activity cycles 07 p1276 A70-20431

E layer atmospheric circulation model for meteor zone, noting solar thermal radiation role 08 p1575 A70-21215

Electron, oxygen and NO molecular ions concentrations for E region from computer calculations of diurnal model compared to observations 08 p1490 A70-21391

Deviating and nondeviating absorption of radiowaves in ionosphere, deriving vertical distribution of particle collisions in E layer 08 p1490 A70-21431

Excessive absorption in night E layer with and without geomagnetic disturbances for almost complete solar cycle, discussing winter increases /anomalies/ 09 p1669 A70-23170

Ionospheric F and E layers collision frequency estimates, comparing pulse absorption and cosmic radio noise measurements 10 p1880 A70-24804

Diurnal variations of concentrations of ions and neutral components of NO, O and N in E region from analysis of chemical and photochemical processes 10 p1881 A70-24809

Asymmetric cross correlation functions in D and lower E region drift measurements interpreted in terms of moving screens 10 p1881 A70-24811

Nocturnal E layer electron density profile dependence on solar activity 10 p1885 A70-25265

Sunspot cycle and ionospheric D and E layers daily radio wave absorption correlation, observing seasonal variation effect 10 p1885 A70-25267

Ion component drift displacing components from E and F layers ascribed to vertical electric field presence in hydrogen arc 11 p2104 A70-25541

Electron temperature diurnal variations data from rocket soundings used for determining recombination coefficient in E region 11 p2044 A70-25550

Wind shear caused ionospheric E region irregularities investigated by horizontal plasma density gradients determination 11 p2045 A70-25652

E and F layer ion chemistry dependence on ion-neutral reactions and dissociative recombination 12 p2223 A70-27720

E region plasma parameters measurement by in situ probes, considering electron density and temperature 12 p2225 A70-27737

Three-point simultaneous observations for ionospheric drift characteristics in E and F regions 13 p2396 A70-29097

Vlasov interaction of magnetically coupled E layer with dissipative structures including injection, trapping and drag effects 14 p2623 A70-30698

F region ionograms processing with correction for ionization effects between E and F layers 14 p2576 A70-30832

Hydrogen UV geocorona photoionizing effect on nighttime E region electron density in low and midlatitudes, comparing with ionosonde data 14 p2581 A70-31270

E region ion composition from rocket-borne mass spectrometer data 15 p2725 A70-31689

Correlated daily variations of ionospheric drift and anisotropy parameters in E and F regions at Thumba, India 15 p2725 A70-31858

Barium ion clouds striation formation above E layer ascribed to LF gradient drift instability 15 p2727 A70-31908

Ionization-neutralization processes and recombination coefficient in F and E regions, using radiophysical measurements 15 p2730 A70-32083

Single pulse ionospheric sounding system for detecting and identifying E region echoes 16 p2859 A70-32940

Nighttime E region structure variations observed by Wallops Island rocket flights, obtaining electron density profiles by Langmuir probe during ascent 17 p3076 A70-34941

Ionospheric E layer formation, investigating role of solar X ray control by electron production rate and density calculations 17 p3151 A70-34943

Ionospheric E region winds correlations to lower atmosphere meteorological phenomena 17 p3077 A70-34950

Nighttime E region molecular ion production rate estimation, taking into account windshear effect 18 p3245 A70-36022

Lower E region electron concentration variations relationship with geomagnetic field disturbances 18 p3255 A70-37037

Ionization in ionospheric E and upper D regions, considering solar short wave radiation, small components, atmospheric dynamics and vertical mass transport 19 p3407 A70-37301

E layer electron concentrations, effective recombination coefficient and ionization sources during solar eclipse, noting soft X radiation intensity 19 p3408 A70-37310

Ionization rate experimental profiles during maximum solar activity compared with calculations, showing additional source of ionization in E region 19 p3409 A70-37322

Vertical profile of electron collisions effective frequencies in auroral ionosphere E region 19 p3409 A70-37330

Multiple reflection processes in D and E regions at LF and VLF, using Pitteway full wave method 19 p3413 A70-38001

Coupling processes in daytime D and E regions at LF and VLF, using thin film optics method for reflection and transmission coefficient matrices 19 p3413 A70-38002

Intermode coupling processes in nighttime D and E regions, using thin film optical method for propagation phenomena at LF and VLF 19 p3413 A70-38003

Solar eclipse effects on E and F layers, discussing photoionization rate, electron density and temperature, plasma diffusion, electric fields, etc 19 p3418 A70-38903

E and F region electron density response to incident radiation intensity on upper atmosphere during solar eclipses 19 p3419 A70-38916

Ion component drift displacing components from E and F layers ascribed to vertical electric field presence in hydrogen arc 21 p3882 A70-41291

Electron temperature diurnal variations data from rocket soundings used for determining recombination coefficient in E region 21 p3819 A70-41300

Nighttime equatorial E region small scale irregularities detected by rocket-borne Langmuir and plasma noise probes, discussing generation mechanism

22 p4018 A70-43108

Lower E region recombination coefficients from electron density and flux measurements in glow aurora by Nike-Apache rocket

22 p4020 A70-43163

Day and nighttime E and sporadic E layer drifts over low latitude station recorded by spaced receiver technique

22 p4020 A70-43166

Upper atmosphere ionization balance, examining metastable species in E and F regions

22 p4106 A70-43306

E region winds response to solar radiation variations, including geomagnetism role

23 p4186 A70-43848

Wind induced modification of E region ionization density profiles, using coupled continuity equations for ion species

23 p4214 A70-44040

E region ion composition nighttime variations, examining nitrogen monoxide and O ion nonequilibrium concentrations by ionic-molecular reactions

23 p4189 A70-44074

E region additional ionization source during solar activity maximum, analyzing ion production function and electron concentration

23 p4190 A70-44077

E region electron concentration profiles, using ground sounding equipment allowing accurate signal reflection altitude measurements

23 p4190 A70-44078

Equatorial E region electrojet plasma irregularities, discussing electron density, drift velocity, profile structure, etc

24 p4384 A70-45150

E-2 LAYER

Soviet book on ionospheric interlayer formations covering electron concentration distribution, E-2 layer occurrence frequency, recombination coefficient, etc

20 p3622 A70-39823

NT EARDRUMS
NT LABYRINTH
NT MIDDLE EAR
NT SEMICIRCULAR CANALS
NT VESTIBULES

Frequency function of sound localization in median plane measured psychoacoustically at both ears with narrow band signals

09 p1624 A70-22762

Microdissection morphology of vestibular apparatus sensory regions in guinea pig, rabbit, cat, squirrel, monkey and man

10 p1811 A70-24200

Partial oxygen pressure in hyperaemic earlobe capillary blood under hypoxic conditions, noting correlation with age and body weight

10 p1822 A70-25088

Loudness lateralization of acoustic signals in right and left ear during binocular interaction

12 p2174 A70-28357

Temperature change relation between anterior hypothalamus and concha auricularae in rabbits

18 p3218 A70-36532

Auditory perception by neuroelectrical tests based on logic coincidence among several detectors, discussing bullfrog inner ear

21 p3765 A70-41991

EAR PRESSURE TEST

Hearing threshold and ear canal pressure levels, using circumaural enclosure with varying acoustic field

06 p0994 A70-17598

EAR PROTECTORS

Army aviation personnel ear protection, evaluating APH-5 and SPH-4 helmets

06 p1002 A70-17703

Ear protection for persons exposed to various jet aircraft noise environments

24 p4306 A70-45121

EARDRUMS

Otic Barotrauma with bilateral perforation of ear drums suffered during rapid decompression run in chamber, discussing diagnosis

10 p1811 A70-24040

Mammalian eardrum failure due to blast induced pressure variations, examining wave shape, character, magnitude and duration effects

23 p4148 A70-44839

EARLY BIRD SATELLITES

Syncom and Early Bird systems development, launch procedure and operation, discussing common components

14 p2654 A70-31144

EARLY STARS

NT PROTOSTARS
NT T TAURI STARS

Stratospheric balloon measurement of near UV from early type stars, discussing gondola, observation

method, telescope and photographic recordings analysis

04 p0750 A70-14704

Statistical analysis of rotation and macroturbulence in early type Ia and IaB supergiants, discussing evolutionary effects

08 p1571 A70-20908

Coefficients for linear and nonlinear limb darkening in early type stars

11 p2113 A70-26469

Chandrasekhar polarization upper limit in early type stars noting effects of thermal absorption, wavelengths and effective temperature

12 p2303 A70-27675

Young stars evolution rates in expanding and disintegrating stellar associations, giving age estimates

12 p2306 A70-27862

UV interstellar extinction, examining reddened and unreddened early stars with OAO satellite spectrophotometric scans

17 p3159 A70-34878

Early-type star spectral scan analysis from OAO observation, comparing model atmosphere calculations

17 p3161 A70-34887

Luminosity effects in Balmer lines of early type stars, noting H alpha equivalent width decrease

17 p3170 A70-35388

Young cepheids galactic distribution determined by photometric method, showing correlation with spiral arms

18 p3330 A70-37184

Early B stars photometric examination of variable spectral lines, discussing beta Cephei stars possibility

21 p3922 A70-41981

Stellar rotation effects on atmospheres of early type main sequence stars, using models for surface gravity and temperature variations

23 p4249 A70-44810

Early type Ia and IaB supergiant stars macroturbulence and rotation, investigating spectral line broadening, mass loss and angular momentum

23 p4250 A70-44813

Upper main sequence and close early type binaries evolution by fission of rapidly rotating protostars

23 p4250 A70-44815

Southern early stars away from galactic plane, reporting magnitudes and colors on UBV system and MK spectral classifications

24 p4404 A70-45412

EARLY WARNING SYSTEMS

Tiros solar proton monitor program, describing detector design, operational data processing and early warning network

17 p3180 A70-35304

EARTH (PLANET)

Spherical earth wind field correlation matrix, relating scalar fields to isotropic vector field

01 p0135 A70-10204

Human activities inadvertent effects on planet earth, discussing catastrophic physical environment changes and compensation methods

01 p0077 A70-11045

Satellite positions from simultaneous measurement by laser along geocentric arc usable for determining earth mass center position

02 p0253 A70-11752

Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique

03 p0473 A70-13236

Penumbra visibility of earth on lunar disk related to moon distance during lunar eclipse, discussing moon vanishing

03 p0569 A70-13361

Earth exploration and service by satellites - Conference, Rome, March 1969

03 p0572 A70-13826

Cloud cover consequence on earth photographing space missions simulated by Monte Carlo method using worldwide statistics

04 p0676 A70-14636

Heat transport conduction mode and earth as heat sink in solar atmosphere, discussing mesopause coldest region, turbulence and solar plasma-earth electromagnetic interactions

04 p0677 A70-14644

Earth model based on free air gravity anomaly with condensed topography for eliminating gravity reduction difficulties, noting use in Vening-Meinsz formula

05 p0840 A70-16640

Magnetovariational sounding procedure for determining vertical distribution of earth mean electrical conductivity using geomagnetic field spatial derivatives for spherical earth

05 p0843 A70-16767

Solar wind flow different interactions with earth, Venus and moon

06 p1136 A70-18284

Soviet monograph on constant of gravitation, mass and density of earth covering torsion balance, weight experiments and nonlinear vibration techniques

08 p1487 A70-20764

Geogravitational constants and mass determination, discussing Cavendish constant and measurement theory and technique

08 p1491 A70-21669

Earth shadow effect on solar radiation pressure induced short periodic perturbations of satellite orbits

09 p1761 A70-23054

Rare gases abundance patterns on earth and in chondrites, proposing chemical adsorption mechanism at planetesimal stage during accretion

09 p1764 A70-23610

Earth mechanical properties and composition compared with moon and other terrestrial planets

11 p2047 A70-26616

Penumbra visibility of earth on lunar disk related to moon distance during lunar eclipse, discussing moon vanishing

11 p2118 A70-26726

Terrestrial external gravitational field approximation using sphere and ellipsoid attraction, showing mass, angular velocity and size dependence

12 p2300 A70-27477

Variational equations from Herrick variation of parameters method for Icarus encounter with earth

13 p2488 A70-28823

Replicating molecules on primordial earth, suggesting chemical evolution on Jupiter via demonstrable alpha-aminonitriles synthesis

14 p2536 A70-30364

Brightness field spatial structure of solar radiation reflected from earth by Cosmos 149 satellite, discussing homogeneity and isotropy

18 p3247 A70-36629

Lunar surface mapping and comparison of geological features with earth, considering mass, volume, density, gravity, rotation and energy and matter balance

19 p3518 A70-37994

Space environment physical properties near earth, discussing neutral atmosphere, solar radiation, ionosphere, electric and magnetic fields and radiation belts

19 p3520 A70-38277

Earthshine bright parts relationship to average brilliance of sun during total eclipse

21 p3893 A70-41445

Earth ellipticity in past, using hydrostatic equations based on density distribution and angular velocity to obtain oblateness

21 p3820 A70-41973

EARTH ALBEDO

Satellite multispectral photometry data in airglow bands correlated with cloud characteristics and surface albedo variations

04 p0715 A70-15522

Night airglow variations observed during Cosmos satellite orbits, determining atmospheric albedo wavelength dependence for solid and medium cloudiness and clear skies

05 p0841 A70-16728

Earth and atmosphere effect on solar radiation balance in Southern Hemisphere

06 p1054 A70-17413

Vertical short wave albedo profiles in lower troposphere under cloudiness and clear sky using actinometric sounding

08 p1537 A70-21105

Day sky Fraunhofer lines filling-in /Ring effect/ considered from analogous effects in surface albedo, suggesting role of Rayleigh wings

10 p1947 A70-24992

Polarization of radiation reflected and transmitted by earth atmosphere, calculating scattering matrix for aerosol size distribution model

21 p3820 A70-41725

Planetary albedo changes due to pollution aerosols, showing absorption-to-backscattering ratio function in atmospheric heating or cooling

22 p4096 A70-43419

Echo 1 and PAGEOS 1 orbital elements variations, determining perturbing effects of earth albedo radiation pressure

24 p4409 A70-45558

EARTH ATMOSPHERE

NT ARTIFICIAL RADIATION BELTS

NT D REGION

NT E REGION

NT E-2 LAYER

NT EXOSPHERE

NT F REGION

NT F 1 REGION

NT F 2 REGION

NT FREE ATMOSPHERE

NT INNER RADIATION BELT

NT IONOSPHERE

NT LOWER ATMOSPHERE

NT LOWER IONOSPHERE

NT MAGNETOPAUSE

NT MAGNETOSPHERE

NT MESOPAUSE

NT MESOSPHERE

NT MIDLATERAL ATMOSPHERE

NT OUTER RADIATION BELT

NT OZONOSPHERE

NT PROTON BELTS

NT RADIATION BELTS

NT SPORADIC E LAYER

Atmospheric density variations during solar maximum and minimum, discussing solar corpuscular stream and EUV radiation

01 p0075 A70-10594

Atmospheric water vapor photodissociation and resulting O evolution recalculated for determining O abundance in absence of biological activity

01 p0081 A70-11294

Wave structure function dependence on altitude, comparing function ratio for up/down propagation through atmosphere

02 p0258 A70-12461

Space research photography role in studying earth and moon atmospheres and surfaces, determining spectral bands for contrast

03 p0483 A70-13168

D-2 experiments measuring atomic oxygen emission from terrestrial atmosphere and polarization rate and emission intensity from geocoronal hydrogen

03 p0559 A70-13828

Venus-earth carbon dioxide atomic parameters used to determine ionization and optical emission rates in Venus upper atmosphere resulting from solar cosmic rays

05 p0901 A70-16276

Earth, Venus and Mars atmospheric structure, discussing gases escape, temperature, density, IR radiation and solar radiation absorption

05 p0914 A70-16628

Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field

05 p0843 A70-16768

Earth and atmosphere effect on solar radiation balance in Southern Hemisphere

06 p1054 A70-17413

Meteor motions at cosmic velocities in real atmosphere studies to determine cause of sudden flares

06 p1140 A70-17735

Earth oxygen atmosphere age estimated from sulfur isotope composition of geological phlogopite and lazurite deposits from South Baikal region

06 p1056 A70-17798

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane

07 p1331 A70-19483

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres

07 p1386 A70-19488

Extra-atmospheric submillimeter astronomy, discussing emission observations between IR and RF region and astrophysical-cosmological applications

07 p1387 A70-19643

Atmospheric regions interactions concerning stratosphere, mesosphere, troposphere, etc, noting solar activity effects

08 p1490 A70-21428

IR energy interaction with earth atmosphere, determining multispectral scanner optimum wavelength intervals for earth resources applications [AIAA PAPER 70-289]

09 p1669 A70-22892

Spectral, angular and spatial evolution of earth twilight aureole brightness pattern from visual observation and spectrophotometry on Soyuz 5 spacecraft

10 p1873 A70-24270

Satellite studies geoeactive particles and photoelectrons, including interactions with earth atmosphere

10 p1874 A70-24312

Atomic oxygen IR emission in earth atmospheric models, using reduction factor for comparison with optically thin atmosphere

10 p1875 A70-24439

Earth orography shape effect on cyclogenetic properties of atmosphere noting mountain height, slope, air mass thermal properties, etc

10 p1913 A70-25196

Earth atmosphere circulation mechanisms, discussing zonal and meridional components and eddy motions

11 p2075 A70-26030

Antimatter motion in solar system and earth atmosphere, discussing vaporization and annihilation energy in collisions with interplanetary gas atoms

11 p2119 A70-26793

Satellite based random Doppler environmental measurement technique for Global Atmospheric Research Program /GARP/, receiving signals from balloons, buoys and land stations

13 p2407 A70-29176

Jeans escape rate error for atmospheric H and He attributed to perturbed velocity distribution function, using realistic atom-atom elastic scattering cross sections

13 p2398 A70-29226

Earth atmosphere formation and oxygen-carbon dioxide balance mechanisms, including water vapor photodissociation, photosynthesis, fossil fuel burning, etc

14 p2572 A70-30350

Solar activity predictions for earth upper atmosphere models emphasizing linear repression method

14 p2638 A70-30565

Quartz crystal particulate sensor instrument for terrestrial and Mars atmospheres

14 p2585 A70-30575

Earth atmosphere model for weather forecasting using space technology, noting Global Atmospheric Research Project /GARP/

14 p2576 A70-30973

Numerical modeling for earth atmosphere in terms of six pressure levels using digital computers

14 p2577 A70-31151

Absorption spectrum of terrestrial atmosphere with sun as source, obtaining formaldehyde line with rotating grid spectrometer

14 p2579 A70-31256

Terrestrial planetary ionospheres, discussing charged particle density distribution of Mars daytime ionosphere and Venus day and dark sides

15 p2799 A70-31748

Earth-ionosphere cavity resonances diurnal variations by considering different propagation characteristics of day and night hemispheres

15 p2728 A70-31910

Atmospheric optical properties at various altitudes, using lunar disk photometric observations at different wavelengths during eclipse

15 p2801 A70-32476

Optimal control program using multiple maxima method for maneuvering spacecraft in earth atmosphere with aim of changing orbital plane

15 p2813 A70-32728

Mariner 4 and 5 and Venera 4 data used for comparing terrestrial planets ionospheres

15 p2805 A70-32733

Earth/atmosphere system outgoing microwave radiation calculations, surveying aircraft/ satellite measurements at various wavelengths

16 p2896 A70-33217

Atmospheric oxygen history, using primeval anoxic terrestrial atmosphere simulation to show organic molecule formation by abiogenic process

16 p2898 A70-33990

Earth atmosphere transmission coefficients determination by relation between transparency and daytime sky brightness, noting limits of applicability

16 p2899 A70-34180

Earth atmosphere transmission coefficient and optical stability based on solar aureole observation

16 p2899 A70-34186

Cloud-free earth areas determined via reflected radiance measurements from ATS 3 cloud camera

17 p3133 A70-35930

NO in earth atmosphere, describing theory of formation for explaining observed density distribution

18 p3245 A70-36019

Meteor deceleration rates in atmosphere, using base line radar measurements

18 p3313 A70-36294

Simultaneous measurements of earth atmosphere radiation, comparing short and long wave data consistencies at various altitudes

18 p3286 A70-36963

Soviet papers on physical processes in earth upper atmosphere covering emissions, dust, particle distribution, Rayleigh scattering, temperature, inhomogeneities, etc

18 p3250 A70-36976

Terrestrial atmospheric tidal theory applicability to Venus and Mars, considering dependence on parameters variation among planets

19 p3519 A70-38253

Moon as standard radio source for eliminating earth atmosphere influence during solar radio radiation measurements

19 p3522 A70-38564

VLF wave propagation in earth atmosphere waveguide, calculating various atmospheric types from waveguide field dependence on frequencies

19 p3416 A70-38566

Earth atmosphere cosmic ray neutron albedo from balloon measurement of flux vertical distribution

20 p3698 A70-39298

Soviet book on physical atmospheric parameters covering model, solar and earth radiation fluxes and spectral energy distribution

20 p3664 A70-39799

Earth-moon system formation theory, discussing condensation from terrestrial hot extended silicate atmosphere

22 p4098 A70-42548

Aircraft condensation trails formation by interactions of exhaust emission, vorticity of wing induced downwash and ambient atmosphere

22 p3958 A70-42684

Coherent reflection waves produced by radio wave propagating through entire earth atmosphere

23 p4159 A70-43757

Atmospheric optical properties at various altitudes, using lunar disk photometric observation at different wavelengths during eclipse

23 p4239 A70-43901

Statistical-dynamical atmosphere model for global circulation simulation, taking into account meteorological variables of velocity, temperature, pressure and eddy statistics

23 p4213 A70-44029

Earth atmospheric boundary layer wind velocity, temperature gradients and specific humidity differences, calculating climatic correlations from mathematical circulation model

23 p4214 A70-44264

Earth/atmosphere system outgoing microwave radiation calculations, surveying aircraft/ satellite measurements at various wavelengths

24 p4328 A70-45192

EARTH AXIS

Geodetic coordinate system referred to center of mass and earth rotation axis constructible from satellite observations

03 p0472 A70-13186

Earth poles motion influence on latitude, longitude, azimuth and geocentric rectangular coordinates of points determinations on earth surface

03 p0473 A70-13187

Satellite observations used to construct coordinate system referred to earth center of mass and axis of rotation

03 p0474 A70-13733

Earth axis position and displacements measured by earth-moon laser telemetry

06 p1058 A70-18452

Triaxial earth attraction potential from expanding certain elliptical functions into series, noting consistency with concepts of astronomy and geodesy

15 p2731 A70-32148

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates

15 p2732 A70-32497

Statistical test of Melchior laws governing Chandlerian motion of earth pole based on polar coordinates

23 p4187 A70-43918

EARTH CORE

Core convection consequences with regard to earth figure and continental drift, indicating no changes in magnitude of magnetization

01 p0076 A70-10899

Cyclonic convective cell fluctuation and nonuniform core rotation effects on reversal of geomagnetic field, investigating fossil magnetism

04 p0676 A70-14600

Geomagnetic field secular variations relation to variations of magnetic field of optimum dipoles, noting earth core role

05 p0842 A70-16747

Earth central region chemical exploration using antineutrino flux produced by natural radioactive isotopes

09 p1761 A70-22985

Seismology as tool for investigation of planets, discussing earth rigidity, tides and long period oscillations

11 p2111 A70-26040

Earth core flow velocity field to construct kinematic model of hydromagnetic dynamo, discussing magnetic field development

13 p2398 A70-29209

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

14 p2568 A70-30202

Sulphur in earth core composition, considering volatile element abundances and iron melt in thermal models

18 p3256 A70-37078

Geomagnetic axial dipole deviation from true north associated with earth core asymmetric motion, discussing geomagnetic reversal

22 p4020 A70-43231

Earth hydromagnetic dynamo spectrum fluctuation related to secular geomagnetic field variations, using unsteady kinematic models

24 p4330 A70-46277

EARTH CRUST

Canadian Shield ridges and meteorite impact scars, discussing state of earth crust during meteoritic bombardment of earth and moon

08 p1563 A70-20500

Gravity long wave variations correlation with crust and upper mantle geological activity, describing anomaly distribution

08 p1488 A70-21014

Geometrical analysis of partial fusion in earth crust and mantle formation, discussing solid solution and boundaries in MgO-iron oxide-silicon dioxide system

09 p1670 A70-23398

Continental migration role in lunar maria formation, suggesting similarity with geological formation of earth ocean floor

09 p1765 A70-23797

Lunar-earth early crust anorthosites comparison, including occurrence sites, physical and chemical properties, etc

13 p2486 A70-28616

Ionization potentials of elemental abundances in lunar rocks compared with earth crust and class I carbonaceous chondrites, showing lunar materials differentiation

15 p2801 A70-32463

Carbonaceous complex use as indicators of geothermal history and high temperature organic geochemistry 17 p3042 A70-35331

Phase delay of solid earth tide, minimizing ocean and atmosphere loading by strain seismograph measurement 18 p3255 A70-37077

Astronomically determined latitude longitude and azimuth reduction to common epoch, discussing secular nonperiodic pole motion due to crust drift 18 p3323 A70-37144

EARTH CURRENTS

U TELLURIC CURRENTS

EARTH ENVIRONMENT

Earth climatic control by reflecting satellites producing artificial solar irradiation 03 p0581 A70-13835

Satellite observation of energetic particles and magnetic fields, discussing radiation belts, magnetosphere, galactic cosmic rays, etc 04 p0740 A70-14620

Earth environmental satellite data for oceanography and hydrology, discussing sea surface temperature mapping, low level wind conditions, snow and ice mapping, etc [AAS PAPER 69-596] 04 p0676 A70-14635

Satellite monitoring of air pollution, discussing sulfur dioxide measurement in UV, optical correlation techniques, IR and visible spectra, stratospheric balloon tests, etc [AIAA PAPER 70-305] 09 p1668 A70-22875

Satellites application to studying and monitoring earth ecology, discussing environmental space research and space program priorities 09 p1794 A70-23333

Soviet book on solar activity influence on earth natural processes covering atmospheric circulation and pressure, air temperature, precipitations and hydrological changes 09 p1719 A70-23471

Cryobiotic potentialities on earth, investigating life forms physiological response to temperature, cryotolerance mechanisms, etc 16 p2848 A70-33093

Bioastronautics and earth ecology, discussing environmental pollution, nutritional, microbiological and psychological problems 18 p3350 A70-36757

Circadian and seasonal adaptive function rhythms in animals, discussing terrestrial environment and thermoregulation 19 p3365 A70-38409

Optical solar observatory for investigation of solar activity and impact on earth environment, discussing site selection and equipment 22 p4005 A70-42349

EARTH FIGURE

U GEODESY

EARTH HYDROSPHERE

Earth surface hydrology effect incorporated into atmospheric circulation mathematical model for climate, considering ocean as atmospheric moisture reservoir 04 p0680 A70-15296

Circulation model of joint ocean-atmosphere system constructed with ocean and atmospheric models, discussing heat transfer by ocean currents 04 p0680 A70-15297

EARTH MANTLE

Shear velocity variation with depth in upper mantle for Basin and Range province of western North America, using S waves measurements 02 p0292 A70-12505

Abundance levels of K, Rb, Sr and Ba in pyroxenes, olivines and garnets of ultramafic rocks for upper mantle composition 03 p0472 A70-13149

Pb isotope data from young mantle derived volcanics suggesting mantle evolution and lunar capture 04 p0743 A70-14396

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 04 p0682 A70-15735

Melting zone evolution in thermal history of earth, investigating upper mantle heat transfer effect on layer motion due to radioactive decay 06 p1056 A70-17804

Gravity long wave variations correlation with crust and upper mantle geological activity, describing anomaly distribution 08 p1488 A70-21014

Rayleigh number effects on convection in planetary mantles, considering conservation equations of mass, energy and momentum 09 p1752 A70-22312

Geometrical analysis of partial fusion in earth crust and mantle formation, discussing solid solution and boundaries in MgO-iron oxide-silicon dioxide system 09 p1670 A70-23398

Crystal-chemical and geophysical implications concerning earth mantle phase transitions from beta magnesium silicate crystal structure 11 p1994 A70-25333

Geogravity-geomagnetic fields correlation due to lateral temperature variations in upper mantle 13 p2393 A70-28620

Convection effects in mantle on earth gravitational field using hydrodynamic model 13 p2488 A70-28764

Variational analysis of low latitude magnetic sounding data to determine structural differences between various earth mantle regions, noting additional observations required 14 p2575 A70-30819

Earth mantle electrical conductivity profiles, using Lahiri-Price model and spherical harmonic analysis of quiet day daily variations 16 p2896 A70-33077

Earth upper mantle phase change instability, discussing temperature gradient, transformation influence on fluid, olivine-spinel phase flow patterns and tectonics 21 p3820 A70-41895

Electromagnetic variational soundings of ocean floor earth crust upper mantle near magnetic equator 23 p4189 A70-44066

EARTH MOTION

Earth rotational velocity irregularities and horizontal motions of continental blocks at expense of oceanic hemisphere, noting seasonal distance changes 04 p0681 A70-15477

Earth axis position and displacements measured by earth-moon laser telemetry 06 p1058 A70-18452

EARTH MOVEMENTS

NT EARTHQUAKES

Collapse prone land detected by multispectral scanning and photography with analog data processing 12 p2220 A70-26933

Seismic measurements of sonic boom induced ground vibrations for hazard to structures 12 p2227 A70-28078

Gutenberg-Bullen interior model applied to fading of earth spheroidal oscillations 14 p2568 A70-30153

Surface waves free period partial derivative correlation and relation to resolution of gross earth data 19 p3414 A70-38374

EARTH ORBITAL RENDEZVOUS

Optimal rendezvous maneuver of two spacecraft in circular orbits with minimum fuel consumption, taking into account propelled vehicle control program and flight path 01 p0193 A70-10424

EARTH ORBITING SPACE STATIONS

U EOSS

EARTH ORBITS

NT APOGEES

NT PERIGEEES

Space rescue techniques and equipment in NASA recovery programs, considering low earth orbit and water landing 01 p0035 A70-10717

Space programs to monitor earth resources from synchronous orbit of 19,400 nautical miles, discussing geostationary systems characteristics related to optics and telemetry 01 p0093 A70-11280

Geocentric orbital elements of lunar particles expelled into space by meteorite impact, using spheres of influence method 03 p0574 A70-13880

Satellite motion in earth gravitational field under additional forces using Stockel theorem 04 p0760 A70-14432

Drift, anti-Fermi retardation, convective transfer and diffusion effects on solar cosmic ray energy spectrum in earth orbit proximity 05 p0898 A70-15943

Second order secular perturbations formulas of distant earth satellite motion valid for nearly circular orbits with small inclination to ecliptic plane 06 p1141 A70-17823

Satellite temperature determination in earth orbit, testing mathematical thermal model in simulation chamber 06 p1155 A70-17935

Reusable space shuttle employing two stages resembling subsonic aircraft for carrying passengers and cargo between earth surface and orbit 07 p1392 A70-18873

Climate variations and earth orbital elements secular perturbations, noting solar radiation and celestial mechanics roles 09 p1666 A70-22177

Optimal acceleration from earth orbit to hyperbolic velocities of low thrust space vehicle, constructing asymptotic expansions near and far from central field 10 p1940 A70-24305

Space propulsion systems for public transportation to and from orbit and throughout near solar system, discussing commercial requirements 11 p2102 A70-26060

Earth orbital parameters estimation in manned flight by manual space navigation sensors and computer 13 p2446 A70-28406

Satellite motion in earth gravitational field under additional forces using Stockel theorem 13 p2503 A70-28457

Magnetic moment measurement of satellite in near earth orbit, using data transmitted by rectangular magnetic sensors 13 p2454 A70-30032

Synchronous navigation satellite system for ships and aircraft applicable to earth orbital and lunar operations 14 p2614 A70-30463

Primary mirror development problems for large orbiting telescopes 17 p3083 A70-34873

Solar eclipse calculation and prediction, discussing relationship between possible forms and earth-moon orbital configurations 21 p3924 A70-42173

Radiation pressure effects on artificial satellite motion, including earth shadow perturbation 24 p4408 A70-45554

EARTH PLANETARY STRUCTURE

Moon-earth historical relationship, comparing differences in figure and interior with terrestrial planets 03 p0562 A70-12875

Earth oblateness effects on lunar and interplanetary trajectories, using algorithm based on orbital elements variations [AIAA PAPER 70-97] 06 p1146 A70-18203

Earth surface mapping and shape and internal constitution determination by satellite geodesy 10 p1876 A70-24642

Earth interior structure models using geophysical data in Monte Carlo inversion procedure 11 p2042 A70-25332

Earth continents and ocean basins as clues to planetary evolution, considering crust composition, moon origin, continental drift, etc 11 p2111 A70-26032

Seismology as tool for investigation of planets, discussing earth rigidity, tides and long period oscillations 11 p2111 A70-26040

Precession-nutation dependence on earth structure based on oscillations theory of ellipsoid with rotating fluid contained in rigid envelope 16 p2980 A70-34316

Terrain imaging radar applied to sensing earth resources 02 p0298 A70-12181

Remote sensing system for earth resources surveys temporal information employing human interpreter and machine for spatial and spectral data processings 03 p0491 A70-13668

Aircraft multispectral IR scanning systems for earth resources remote sensing, discussing capabilities 03 p0491 A70-13670

Multispectral scanner technology for earth resources exploration from space 03 p0492 A70-13671

Earth resources applications of Apollo 6 photography, describing camera system and photographic coverage 03 p0474 A70-13672

Remote sensing aerial and space surveys application to agriculture, forestry and water resources, discussing imaging systems and information acquisition and analysis techniques 05 p0838 A70-16164

Geostationary mode application to earth sensing, examining resolution requirements for earth scanning tracking telescope 06 p1154 A70-17152

Satellites for meteorological and geographical studies using information from TV and IR pictures 08 p1487 A70-20716

Aircraft mounting plate for 70-mm multispectral mapping quadricamera assembly to photograph wildland and agricultural resources 08 p1497 A70-21542

Electromagnetic radiation sources for remote sensing application to identification of water, moist soil and vegetation, discussing optical properties of diverse materials 09 p1667 A70-22851

Earth resources data exploitation, describing potential organizational structures for data handling and various political, economic and technological problems [AIAA PAPER 70-344] 09 p1793 A70-22859

International legal and political aspects of earth resource surveying by satellite remote sensors, considering U.S. policy
[AIAA PAPER 70-331] 09 p1793 A70-22862

Specifications nomographs for earth resources IR radiometers, considering ground resolution, aperture diameters, detector arrays, etc
[AIAA PAPER 70-317] 09 p1677 A70-22870
Earth resources sensor integration into satellite or aircraft, discussing cost effectiveness
[AIAA PAPER 70-316] 09 p1677 A70-22871
Synthetic aperture radar in earth resource monitoring by satellite, determining topography and surface nature from spatial patterns
09 p1635 A70-22872

Multiband high resolution spaceborne imagery telemetry with optical mechanical scanners from earth orbiting satellites in earth resource applications
[AIAA PAPER 70-314] 09 p1677 A70-22873

Automatic change discrimination applications to weather prediction, land resource management and city planning, using photographic, IR and radar sensor imagery
[AIAA PAPER 70-311] 09 p1677 A70-22876

Remote sensing systems for vegetation analysis, discussing machine-aided photointerpretation methods for data analysis
[AIAA PAPER 70-308] 09 p1678 A70-22879

Remote sensors for earth resources observation by satellites, discussing electromagnetic spectrum, device operation, atmospheric transmission, measuring instruments, etc
09 p1678 A70-22888

Earth resources remotely sensed data analysis with emphasis on machine analysis over manual photointerpretation, discussing pattern recognition techniques, information systems, etc
[AIAA PAPER 70-292] 09 p1678 A70-22891

Multipurpose multiband photographic system used for aerial remote sensing of earth resources
09 p1686 A70-23755

Photointerpretation applications to kaolin deposit detection, railway tunnel collapse analysis and highway drainage
10 p1873 A70-24075

Satellite system applicability to earth resources data collection from in situ sensors, discussing synoptic, local time, emergency and demand data collection
10 p1840 A70-24371

Earth Observation Satellites - BIS-NATO Conference, Cambridge, England, July 1969
10 p1950 A70-24635

Spacecraft and boosters for earth resources surveys, discussing design, payloads, orbits, etc
10 p1950 A70-24641

Aerial photographic surveys of urban land use and natural resources, considering data analysis, display, computer compilation, updating and remote sensing
10 p1891 A70-24738

Remote sensing techniques for water resources evaluation and hydrobiological features mapping with multiband scanner imagery
10 p1879 A70-24742

Remote sensing techniques for earth resources inventory, describing image enhancement role in multiband space photography
12 p2220 A70-26936

Microwave radiometry assumptions relating to absorptivity, emissivity and reflectivity data for earth resources remote sensing applications
12 p2230 A70-26959

Terrain spectral imagery from satellites for natural resources investigations
12 p2235 A70-27745

Earth resource observation from orbiting spacecraft, discussing photo-image map construction for continents and continental shelves, terrain analysis, delta formation, etc
12 p2225 A70-27747

Orbital earth resources sensors, outlining user oriented method of determining measurement requirements
15 p2735 A70-31777

Correlation spectrometry for earth resources, considering sulfur dioxide, nitrogen oxide and iodine pollution
20 p3626 A70-39055

Data acquisition by earth resources technology satellite /ERTS/ for user needs in forestry and agriculture
20 p3616 A70-39062

Spectral signature recognition for automatic interpretation of earth resources multispectral data
22 p4037 A70-43088

Earth orbital space stations as long term investment for future benefit of mankind, considering earth resources management, environmental and pollution control, etc
22 p4128 A70-43652

EARTH RESOURCES PROGRAM

Space programs to monitor earth resources from synchronous orbit of 19,400 nautical miles, discussing geostationary systems characteristics related to optics and telemetry
01 p0093 A70-11280

University/industry team project Bonanza conducting aircraft flight over Colorado to investigate earth resources remote sensing techniques
[AAS PAPER 69-574] 04 p0788 A70-14637

Remote sensor capability in land use, urban and soil moisture analysis data acquired by NASA Earth Resources Program
[AAS PAPER 69-575] 04 p0676 A70-14641

Orbital spacecraft/sensor systems for earth resource surveys and measurement, considering agriculture, forestry, geology, mineralogy, hydrology, etc
[AAS PAPER 69-584] 04 p0761 A70-14643

Apollo 9 space photography of earth surface and use for quantitative analysis of earth resources, including supporting aircraft photography
[AAS PAPER 69-572] 04 p0687 A70-14650

Multiband photographic system for automatic earth resources aerial sensing and lunar orbital mapping with manual override provisions
[AAS PAPER 69-582] 04 p0687 A70-14657

Earth resources remote sensing investigations from spacecraft and aircraft, noting Gemini and Apollo photography, hydrological surveys and radar techniques
05 p0849 A70-16450

Earth resources observation satellite /EROS/ program, discussing geologic terrain and land-use planning maps
[SPE PAPER 2703] 06 p1053 A70-17155

Earth resources program data management system, discussing mission control, processing and distribution of data from satellite vidicon cameras and multispectral line sensors
[AIAA PAPER 70-321] 09 p1792 A70-22854

Multidiscipline systems analysis of satellite assisted information system improving earth resource management, developing User Decision Models
[AIAA PAPER 70-335] 09 p1792 A70-22855

Earth resources data transmission, describing picture reception and reproduction equipment
[AIAA PAPER 70-328] 09 p1634 A70-22856

Communications satellite technology for earth resources data collection
09 p1634 A70-22857

Earth Resources Satellite Information Systems, discussing NASA Space Application Program relation to national goals, federal spending, cost effectiveness analysis, information sales, etc
[AIAA PAPER 70-333] 09 p1793 A70-22860

Earth resources observation satellite /EROS/ program, describing remote sensor data acquisition, processing, dissemination and utilization
[AIAA PAPER 70-332] 09 p1667 A70-22861

Earth Resources Data Processing Center magnitude and facility planning compared with NASA centers
[AIAA PAPER 70-324] 09 p1793 A70-22863

Earth Resources program automatic data correlation system noting lower cost, faster processing, degraded imagery and compensation for vehicle perturbations and terrain relief
[AIAA PAPER 70-323] 09 p1667 A70-22864

Ground truth calibration for aircraft and spacecraft earth resource sensors, discussing ground truth instrumentation, procurement procedures, reduction techniques, etc
[AIAA PAPER 70-296] 09 p1678 A70-22887

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission
[AIAA PAPER 70-294] 09 p1678 A70-22889

User information traffic forecasting method for operational Earth Resource Satellite System, discussing user expectations
[AIAA PAPER 70-293] 09 p1793 A70-22890

IR energy interaction with earth atmosphere, determining multispectral scanner optimum wavelength intervals for earth resources applications
[AIAA PAPER 70-289] 09 p1669 A70-22892

Earth resources program function of early orbital manned space station in remote sensing
09 p1687 A70-23760

Aerial remote sensing package for Earth Resources Program
09 p1687 A70-23761

Operational planning for earth resources surveys using spacecraft
09 p1672 A70-23762

Manned and unmanned earth resources observation satellite program, noting international cooperation
10 p1971 A70-24636

Worldwide crop calendar development from repetitive satellite observation to perform agricultural change detection
12 p2218 A70-26922

Earth resources satellite systems synthesis, describing analytical techniques in R and D preceding operational status
12 p2334 A70-26942

Earth resources satellite ground data handling system providing initial processing, reproduction, indexing, storage, retrieval and dissemination functions
12 p2191 A70-26943

Optimal use of remotely sensed data from NASA Earth Resources Program by matching user models with capabilities of aircraft/satellite remote sensing system
16 p3004 A70-33708

Aerospace methods for revealing and evaluating earth resources - Conference, Princeton University, September 1969
20 p3615 A70-39051

Earth resources data from man operated airborne/spaceborne sensors and data handling systems, examining Apollo Applications Program
20 p3616 A70-39056

Earth resources ground data processing in image formats from sensors in aerospace platforms, discussing collection control, image storage, retrieval, etc
20 p3591 A70-39058

Aircraft/spacecraft assisted agricultural resource information system design concerning nongovernmental user and remote sensing needs
20 p3740 A70-39067

Multispectral photography in earth resources research, noting three return beam vidicons for technology satellites
20 p3628 A70-39128

EROS program earth imaging models characteristics, describing airborne and spaceborne film return and global and geosynchronous space data transmission
[AIAA PAPER 70-294] 21 p3829 A70-41871

Multispectral IR scanner system for earth resources survey programs
22 p4037 A70-43087

Multispectral hydrometeorological environment monitoring in Earth Resources Survey Program
23 p4191 A70-44664

Earth resources information systems using space, aerial and ground measurements, discussing Apollo 9 IR color photograph of Mississippi Valley and timber inventory applications
23 p4192 A70-44679

EARTH RESOURCES SURVEY AIRCRAFT

Remote sensing application to agriculture, forestry and range resources in terms of human priority over monetary benefits, noting high altitude aircraft use
[AAS PAPER 69-583] 04 p0788 A70-14638

Earth resources survey aircraft system producing optical spectrum imagery of continental U.S. with photometric and photogrammetric fidelity
05 p0850 A70-16686

Optimal use of remotely sensed data from NASA Earth Resources Program by matching user models with capabilities of aircraft/satellite remote sensing system
16 p3004 A70-33708

Aircraft/spacecraft assisted agricultural resource information system design concerning nongovernmental user and remote sensing needs
20 p3740 A70-39067

EARTH RESOURCES TECHNOLOGY SATELLITES

Earth resources satellites use in agriculture, considering materials reflectance and emittance, electromagnetic spectrum wavelengths identification and data accuracy standards
[AIAA PAPER 69-1083] 01 p0220 A70-10624

Multispectral scanner for Earth Resources Technology Satellite, discussing agriculture applications and advantages over return beam vidicon
03 p0493 A70-13957

Earth resources satellites capabilities and requirements emphasizing orbit parameters, remote sensing, data handling and telemetry systems
[AAS PAPER 69-587] 04 p0760 A70-14642

Earth resources observation satellite /EROS/ program, discussing geologic terrain and land-use planning maps
[SPE PAPER 2703] 06 p1053 A70-17155

Earth resources and meteorological data collection from in situ sensors via satellite, discussing system considerations
06 p1006 A70-17343

Return Beam Vidicon /RBV/ system compatibility with requirements for Earth Resources Observation Satellite /EROS/, featuring high resolution image sensor for decreasing signal noise
07 p1280 A70-19231

Earth resources satellite TV cameras operating on different spectral bands, discussing data preprocessing for correlation with topographic maps
09 p1674 A70-22259

Earth resources satellite imagery processing techniques, discussing sensor and transmission link distortions, image quality and optical or digital approach
[AIAA PAPER 70-297] 09 p1677 A70-22852

Rapid and reliable data transfer within limited bandwidth and tracking time in earth resources technology satellites, discussing time division multiplexing, digitizing, etc
[AIAA PAPER 70-325] 09 p1635 A70-22858

Earth resources observation satellite /EROS/ program, describing remote sensor data acquisition, processing, dissemination and utilization
[AIAA PAPER 70-332] 09 p1667 A70-22861

Multispectral point scan camera system as remote sensor for Earth Resources Satellite, noting real time automatic data processing and interpretation [AIAA PAPER 70-319] 09 p1677 A70-22867

Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data channel efficiency, etc [AIAA PAPER 70-309] 09 p1668 A70-22878

ERTS satellite role in resource policy, management and remote sensing [AIAA PAPER 70-304] 09 p1668 A70-22881

Photographic and IR multiband spectral discrimination for rock and soil mapping from orbiting ERTS satellites [AIAA PAPER 70-303] 09 p1668 A70-22882

Philosophy and technology of spacecraft-borne sensors for earth resource surveys, noting ERTS-A satellite [AIAA PAPER 70-302] 09 p1668 A70-22883

Multidiscipline applications for Earth Resources Satellite data, including data simulation and interpretation techniques 09 p1669 A70-22886

User information traffic forecasting method for operational Earth Resource Satellite System, discussing user expectations [AIAA PAPER 70-293] 09 p1793 A70-22890

Atmospheric limitations on remote sensors using visible sunlight, noting applications to Earth Resources Technology Satellite and human vision [AIAA PAPER 70-288] 09 p1718 A70-22893

Information extraction efforts using imaging sensors on earth resources satellites compared to data processing for environmental satellite imaging sensors [AIAA PAPER 70-284] 09 p1669 A70-22894

Tiros M requirements for earth resources sensor systems, discussing spacecraft structure, dynamics, power, command and communications subsystems 10 p1950 A70-24638

ERTS multispectral scanner with optimal sensitivity and resolution for agricultural scenes signature analysis 12 p2229 A70-26941

Earth resources satellite real time wideband relay communication link to ground station [AIAA PAPER 70-326] 13 p2368 A70-29614

Optimal use of remotely sensed data from NASA Earth Resources Program by matching user models with capabilities of aircraft/satellite remote sensing system 16 p3004 A70-33708

Earth resources technology satellite /ERTS-A/ for Eros program, producing telemetric imagery spatially correlated to earth surface 16 p2898 A70-34046

Earth resources satellite /ERS/ TV camera configurations, return beam vidicon camera characteristics and devices for TV picture reproduction on film 16 p2915 A70-34312

Automatic speech recognition and tracking techniques of moving objects, considering applicability to processing data from earth resources satellites 16 p2871 A70-34313

Space legal problems involving earth resource survey /ERS/ satellites and weather modification 17 p3203 A70-35799

Earth resources survey satellite programs, examining aspects of international participation 18 p3349 A70-36297

Satellite observations of earth by human or automatic methods, discussing principle applications of Earth Resources Technological Satellite 19 p3410 A70-37387

Earth resources satellite missions TV systems design, using vidicon as sensing element 20 p3626 A70-39052

Earth resources satellite orbits and imaging sensors, discussing multispectral spin scanner design 20 p3626 A70-39053

Unmanned spacecraft for earth resources survey, investigating ERTS payload, performance characteristics and ground station 20 p3713 A70-39057

Data processing for Earth Resources Satellite users, investigating partitioning and mosaicking 20 p3591 A70-39059

Earth Resources Satellites political background, investigating international implications 20 p3739 A70-39060

Data acquisition by earth resources technology satellite /ERTS/ for user needs in forestry and agriculture 20 p3616 A70-39062

ERTS programs status and prospects from international utility viewpoint 20 p3739 A70-39064

Satellite earth resources, discussing cost benefit analysis and economics in agriculture, forestry and mapping 20 p3739 A70-39065

Water management decision model using earth resources information system with satellite-based remote sensors, evaluating costs and benefits by systems analysis 20 p3616 A70-39066

Aircraft/spacecraft assisted agricultural resource information system design concerning nongovernmental user and remote sensing needs 20 p3740 A70-39067

Earth Resources Technology Satellite program and international participation, taking into account UN involvement in outer space 20 p3741 A70-39796

Earth resources observation satellite program and organization for acquiring, processing, utilizing and disseminating remote sensor data 20 p3741 A70-39944

Digital computer processing of airborne multispectral data, discussing automatic recognition and mapping of terrain distribution, Earth Resources Technology Satellite data, channel efficiency, etc [AIAA PAPER 70-309] 21 p3829 A70-41851

ERTS line scanning system for cartographic data of water, snow, vegetation and cultural areas 22 p4037 A70-43090

Earth resources technology satellite data link tradeoff between channel capacity and transmitter power 22 p4038 A70-43091

Multipurpose earth resource satellites design, emphasizing land use factors and data reduction problems 23 p4286 A70-45005

Earth Resources Technology Satellites /ERTS/ providing high resolution image data regarding agriculture, geology, hydrology, geography, etc [SAE PAPER 700761] 24 p4416 A70-45869

EARTH ROTATION

Geocentric coordinate system definition by earth mass center and rotation axis and Greenwich meridian plane 01 p0082 A70-11456

Random variations of terrestrial rotation rate effects on pulsar observations, discussing methods to minimize effects 02 p0371 A70-12203

Earth daily rotation effects on magnetosphere electric currents, discussing Pederson currents in dynamo region and E region ionization 02 p0293 A70-12775

Geodetic coordinate system referred to center of mass and earth rotation axis constructible from satellite observations 03 p0472 A70-13186

Cyclonic convective cell fluctuation and nonuniform core rotation effects on reversal of geomagnetic field, investigating fossil magnetism 04 p0676 A70-14600

Time determination and georotation - Conference, Riga, Latvian SSR, June 1965 04 p0755 A70-15476

Earth rotational velocity irregularities and horizontal motions of continental blocks at expense of oceanic hemisphere, noting seasonal distance changes 04 p0681 A70-15477

Earth rotation seasonal fluctuations analyzed from astronomical observations using frequency markers and quartz clocks 04 p0681 A70-15478

Geophysical-solar phenomenological interrelationships, considering earth rotation and nutation, sunspot area, earthquake energy, etc 06 p1056 A70-17636

Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation 08 p1565 A70-20563

Earth free diurnal nutation parameters determination from latitude observations, establishing amplitude and phase time-independent variations 08 p1488 A70-21154

Terrestrial rotation changes effects on pulsar period observations 08 p1575 A70-21260

Gerstenkorn moon capture theory taking into account tidal evolution of earth-moon system, discussing marine organisms time rate synopsis for earth rotation retardation 10 p1943 A70-24840

Magnetosphere large-scale motions dependence on earth magnetic axis inclination against rotational axis 10 p1885 A70-25279

Mesoscale waves in jet stream flow within Coriolis force over rotating earth by amplitude functions and phase velocities asymptotic series representation 12 p2265 A70-28334

Upper atmosphere superrotation velocity based on satellite polar orbit calculation of 1968-59A, correcting for lunisolar perturbations 13 p2394 A70-28895

Earth rotation perturbations, analyzing secular polar shift dependence on dimensions, depth and location of seismic event 13 p2400 A70-29604

Circadian rhythmical changes in biological organisms by earth rotation, emphasizing diurnal variations role in sleep-wakefulness rhythm 15 p2680 A70-31742

Earth rotation coordinates, discussing system coupled to earth by fixing of axes to zeniths of selected observatories and equatorial plane orientation 15 p2805 A70-32718

Earth continental drift and polar wandering measurements by laser ranging to two synchronous satellites 19 p3529 A70-38882

Earth rotation rate deceleration due to lunar tidal friction taking into account fluctuations from internal processes, discussing moon retreat from earth 21 p3921 A70-41970

Tidal friction theories relating to earth rotation and lunar evolution 21 p3921 A70-41972

Upper atmosphere average rotation speed and height variation, presenting atmospheric and earth angular velocity ratio from satellite orbit inclinations 24 p4328 A70-45353

- Earth satellites magnetic survey contributions to World Magnetic Survey project /WMS/, discussing international reference standards and magnetic mapping
01 p0075 A70-10595
- Unmanned teleoperator spacecraft /UTS/ for future orbital demonstration, discussing manipulators, multifunction viewing, stabilization, human factors, etc [AIAA PAPER 69-1067]
01 p0195 A70-10649
- Earth satellite orbit parameters determination from angle measurements using computer program and least squares estimation technique
03 p0573 A70-13843
- Earth environmental satellite data for oceanography and hydrology, discussing sea surface temperature mapping, low level wind conditions, snow and ice mapping, etc [AAS PAPER 69-596]
04 p0676 A70-14635
- Temperature distribution causes in earth orbiting satellite, outlining thermal control and temperature calculation methods and prelaunch ground tests
05 p0956 A70-15813
- Large spacecraft in circular earth orbit calculated for internal gravitational field
05 p0924 A70-16637
- Relative motion of two bodies linked by flexible weightless tether in artificial earth satellite orbit, simulating extravehicular walk
06 p1142 A70-17882
- Instantaneous and integral solar irradiance of earth oriented satellite surface, noting solar illumination nomogram representation
06 p1155 A70-17893
- Artificial earth satellites photographic observation without chronometric recording aids, determining location and time by single indicator
09 p1635 A70-23055
- Angular motion of deformable earth satellite as solid-elastic system with distributed masses, applying automatic control transfer function
10 p1914 A70-24308
- Extraneous earth satellites interferences in ground communication line, determining combined duration and numbers average values
11 p1996 A70-25346
- Cloud cover effect on earth photographing space missions by Monte Carlo computer simulation, using worldwide cloud statistics
11 p2075 A70-25600
- Method of dependence involving triangulation applied to reducing photographs of earth satellites
11 p2006 A70-26185
- Artificial earth satellites orientation determined by onboard telemetric measurements, constructing model for rotational motion around center of mass
12 p2314 A70-28255
- Vinti potential with spheroidal coordinates for equations of motion in earth satellite orbit computation
13 p2486 A70-28503
- Scanning celestial attitude determination system /SCADS/, providing triaxial information for earth stabilized satellites
16 p2946 A70-33159
- Satellite path geometry along Keplerian elliptical orbit, taking earth flattening into consideration
18 p3312 A70-36167
- Extraneous earth satellites interferences in ground communication line, determining combined duration and numbers average values
20 p3589 A70-40458
- Secondary propulsion subsystem earth synchronous orbital mission requirements, discussing thrust vector alignment and control, colloidal propellants and pulsing [ASME PAPER 70-AV/SPT-31]
21 p3866 A70-40870
- Terrestrial satellites ground tracks by FORTRAN IV computer program, investigating orbital parameters effects
21 p3892 A70-41325
- Earth orbital experiments synthesis in space programs methodology, discussing examples in astronomy, biology and oceanography research
22 p4097 A70-42500
- EARTH SHAPE**
U GEODESY
EARTH SURFACE
- Remote sensors to determine atmospheric characteristics and underlying earth surface structure, using electromagnetic and acoustic waves as signal carriers
01 p0093 A70-11266
- Secular variations distribution on earth surface, plotting isopore charts from mean annual values of magnetic elements /1960-1965/
01 p0083 A70-11540
- Space research photography role in studying earth and moon atmospheres and surfaces, determining spectral bands for contrast
03 p0483 A70-13168
- Lyman alpha transition line in exosphere deuterium line implying enrichment factor ratio to earth surface deuterium
04 p0742 A70-15129
- Spherical harmonics expansion for earth surface and outer space geopotential by mapping earth surface onto sphere
05 p0837 A70-15926
- IR imagery by InSb detectors applied to mapping earth surface thermal distribution
05 p0840 A70-16498
- Surface impedance of spherical earth isolated by nonconducting atmosphere from ionospheric currents producing alternating electromagnetic field
05 p0843 A70-16768
- Atmospheric difficulties in earth surface remote sensing by satellites, describing absorption, emission and scattering as wavelength functions [AIAA PAPER 70-193]
06 p1057 A70-18083
- Geophysical parameters of atmosphere and underlying surfaces from outgoing thermal radio emission measurements on Cosmos 243 satellite
07 p1261 A70-18724
- Reusable space shuttle employing two stages resembling subsonic aircraft for carrying passengers and cargo between earth surface and orbit
07 p1392 A70-18873
- Self calibrating radiometer for in-flight measurement of earth surface thermal microwave radiation
07 p1282 A70-19616
- Altitude asymmetry of instantaneous auroral oval plotted for geomagnetic pole and earth surface
07 p1277 A70-20456
- Earth deviations from isostatic equilibrium, showing irregularities dependence on distance from surface for various tectonic zones
08 p1487 A70-20715
- Reflection patterns of solar radiation from cloud, water and land surfaces measured by airborne radiometer, observing anisotropy
09 p1671 A70-23523
- Reflected solar radiation polarization over land, sea and cloud surfaces to determine atmospheric pollution
09 p1747 A70-23603
- Terrestrial surface radiometric imaging by sensing thermal radiation at centimeter wavelengths to reduce atmospheric scattering attenuation
09 p1687 A70-23763
- Ionospheric current flow past circular inhomogeneous spot with Pedersen and Hall conductivities, calculating earth surface magnetic field by Lipshits-Hankel integral
10 p1873 A70-24309
- Downward ozone transport from troposphere to atmospheric boundary layer by turbulent diffusion calculated by model, estimating annihilation rate
10 p1875 A70-24486
- Earth surface mapping and shape and internal constitution determination by satellite geodesy
10 p1876 A70-24642
- Earth profile influence on two dimensional nonlinear lee waves in troposphere, discussing Helmholtz perturbation equation and stream function field
11 p2075 A70-25391
- Atmospheric hemispheric general circulation model numerical time integration with moist processes and uniform earth surface
12 p2262 A70-26882
- Spatial-temporal distribution of meteorological elements allowing for effects of underlying surface
12 p2263 A70-27511
- Nonlunar origin of tektites indicated from molten glass dispersion generated by terrestrial crater-forming meteorite impact
12 p2302 A70-27584
- Meteorite craters on U.S.S.R. territory, discussing impact, explosive and complex craters
12 p2311 A70-28308
- Earth colorimetry data improvement by separating signals of each bandwidth on one photographic emulsion or TV tube
13 p2406 A70-28987
- Plane stationary nonlinear problem of air flow over earth surface roughnesses, using three layer atmospheric model
14 p2602 A70-30160
- High winds simultaneous occurrence and duration to 150 meter height, showing coherence tendencies
14 p2607 A70-30583
- Transient excitation of Schumann earth-ionosphere cavity resonances by large ELF atmospherics, using propagation model
15 p2726 A70-31865
- Earth surface temperature, emissivity and dielectric constant from satellite measurements of SHF radiation
15 p2771 A70-32072
- Lake covered ancient meteorite impact crater in Canada, noting eroded rim and microscopic shock criteria
15 p2732 A70-32849
- Earth resources technology satellite /ERTS-A/ for Eros program, producing telemetric imagery spatially correlated to earth surface
16 p2898 A70-34046
- Boundary value problem of Hertzian dipole antenna in presence of conducting half space, analyzing lossy earth effects on input impedance and radiation pattern
17 p3044 A70-35074
- Tiros satellites window radiation applied to day and night surface temperature measurements on land and sea
17 p3081 A70-35932
- Air surface layer stationary electric field, considering ionization balance equation, turbulent diffusion coefficient, ion concentration vertical distribution, etc
18 p3247 A70-36520
- Airborne IR scanner as geophysical research tool depicting surface emission and heat mass transfer
18 p3259 A70-36558
- Gravitational field on Liapunov surface approximating earth relief, using double sphere solution
19 p3407 A70-37299
- Geological and cartographical data acquisition and processing, considering aircraft and satellite-borne photography of earth surface
20 p3616 A70-39061
- Second approximations of deflection of vertical and quasi-geoid height dependence on difference between unknown earth surface and known hypsometric surface
20 p3617 A70-39072
- Integral equations for gravity field and plumb line deflections solved by Neumann and Molodenskii methods
20 p3617 A70-39073
- Integral equations for plumb line deflections on earth surface model, considering Neumann, Molodenskii, Arnold methods, etc
20 p3617 A70-39074
- Earth surface pressure changes related to PCA of high energy protons
20 p3695 A70-39187
- Lunar and earth surfaces imaging for astronaut training in LEM simulator
20 p3607 A70-40320
- Distribution functions of errors in earth and moon horizon sighting due to planetary surface unevenness
21 p3884 A70-40840
- Mapping from satellite-collected earth surface images, emphasizing optical/mechanical scanner images
22 p4037 A70-43089
- Solar wind intensity and direction correlated with intensity of earth surface magnetic disturbances and geomagnetic pi-2 type pulsations
22 p4022 A70-43284
- Spectral brightness temperature, directional emissivity and surface temperature of earth from remote radiance observations by balloon-borne multidetector grating spectrometer
23 p4194 A70-44035
- Anomalous multiple reflections from ionosphere showing concave surface focusing
23 p4164 A70-44374
- Electromagnetic ground wave propagation, deriving exact solution from two dimensional cylindrical earth model with any number of homogeneous sections
23 p4164 A70-44405
- Space technology applications to earth survey, discussing use of automatic satellites and manned space laboratories for meteorological, geophysical and related purposes
23 p4191 A70-44634
- Spectrophotometry of earth surface from manned Soyuz spacecraft, obtaining transfer function of atmosphere by aircraft flights
23 p4191 A70-44636
- Gravitational field fine structure representation near earth surface as sum of global model in spherical harmonics and local model in harmonic B functions
24 p4328 A70-45287
- EARTH-MARS TRAJECTORIES**
- Solar electric propulsion Mars high data rate orbiter trajectory design and analysis, including landing site selection and spacecraft parameters optimization [AIAA PAPER 70-1119]
20 p3710 A70-40224
- EARTH-MOON SYSTEM**
- Moon-earth historical relationship, comparing differences in figure and interior with terrestrial planets
03 p0562 A70-12875
- Moon origin theories emphasizing fission from earth, noting objections to capture theory
04 p0751 A70-15058
- Interplanetary magnetic field fluctuations stimulated by lunar wake, using Explorer 35 satellite measurements
04 p0753 A70-15122
- Mariners 6 and 7 range and Doppler tracking data for studying Martian mass and earth-moon mass ratio
06 p1151 A70-18486
- Lunar periodicity detected from radio aurora data as possible cause of lunar interaction with magnetosphere
07 p1389 A70-20164
- Tidal friction induced secular changes in earth-moon system near minimum of angular momentum of moon orbit, including temporal changes in moments of inertia
08 p1579 A70-21570

- Solar attraction effects on zero-mass body planar motion near triangular earth-moon libration points, obtaining variational equations of motion
09 p1754 A70-22477
- Lunar surface luminescence considered for correlation with tidal forces of earth
09 p1758 A70-22748
- Apollo 11 lunar laser reflector for earth-moon distance measurement
10 p1898 A70-23847
- Gerstenkorn moon capture theory taking into account tidal evolution of earth-moon system, discussing marine organisms time rate synopsis for earth rotation retardation
10 p1943 A70-24840
- Ecliptic obliquity secular change rate apparent discrepancy possibly due to earth-moon barycenter motion
10 p1945 A70-24962
- Book on moon covering motion, earth-moon system, internal structure, hydrostatic equilibrium, thermal history, global form, gravitation, topography, etc
12 p2298 A70-27096
- Lunar spring board effect to minimize impulses for given velocity at great distance of earth-moon system, discussing nonimpulsive grazing passage
14 p2635 A70-30289
- Celestial methods for lunar navigation, considering terrestrial and selenographic differences
14 p2613 A70-30459
- Earth/moon mass ratio and Mars mass and ephemeris from Mariners range and Doppler tracking data, noting relativistic time delay measurement possibility
15 p2798 A70-31652
- Earth and moon meteor fall probabilities calculation using hyperbolic encounters method and lunar near and far sides crater densities difference interpretation
15 p2798 A70-31658
- Translational-rotational motion of axisymmetrical moon in earth gravitational field
15 p2803 A70-32496
- Lunar gravitational field effect on sun-earth exterior libration point location, examining placement on line passing through sun and earth-moon barycenter
18 p3320 A70-37059
- Near parabolic trajectories between moon and cislunar libration point, considering earth perturbative influence
19 p3529 A70-38874
- Distribution functions of errors in earth and moon horizon sighting due to planetary surface unevenness
21 p3884 A70-40840
- Earth rotation rate deceleration due to lunar tidal friction taking into account fluctuations from internal processes, discussing moon retreat from earth
21 p3921 A70-41970
- Earth-moon system age and origin from tidal evolution equations, considering growth line counts on living and fossil marine invertebrates
21 p3921 A70-41971
- Ephemerides for lunar-orbiting observation of dust clouds in earth-moon system libration points L4 and L5 by observer orbiting over lunar equator
22 p4097 A70-42308
- Earth-moon system formation theory, discussing condensation from terrestrial hot extended silicate atmosphere
22 p4098 A70-42348
- Translational-rotational motion of axisymmetrical moon in earth gravitational field
23 p4240 A70-43917
- Interplanetary mission propellant reduction by using earth-moon-sun gravity field properties, discussing swingby techniques, low energy trajectories, etc
23 p4244 A70-44607
- Lunar formation from ejected terrestrial magma, considering distribution of seas, gravitational anomalies and craters with rays
23 p4247 A70-44772
- Lunar formation, investigating accretion rate ratio for earth and moon as function of distance
24 p4409 A70-45674
- Earth-moon laser distance measurements, examining relationship between Newtonian and relativistic field coordinates
24 p4413 A70-46160
- EARTH-MOON TRAJECTORIES**
- Earth-moon-earth flight characteristics, discussing spacecraft trajectory, velocity and corrections for close distance placement and return for soft landing
03 p0569 A70-13483
- Translunar Apollo orbit analysis from elementary equations relating to elliptical and hyperbolic orbits in inverse square force field
06 p1148 A70-18397
- Hybrid patched conic technique as iterative procedure for generating translunar and transearth trajectories emphasizing computing time saving
06 p1152 A70-18495
- Apollo 8 mission, spacecraft and booster details, calculating earth-moon flight parameters based on laws of mechanics
07 p1375 A70-18776
- RF EMI propagation between manned spaceflight network and Apollo 10 launch vehicle in translunar mission, considering cochannel interference possibilities
12 p2189 A70-28137
- Lunar spring board effect to minimize impulses for given velocity at great distance of earth-moon system, discussing nonimpulsive grazing passage
14 p2635 A70-30289
- Reusable earth-moon and deep space return transportation, assuming extraterrestrial nuclear rocket propellant source
14 p2653 A70-30766
- French photographic observations of Apollo 12 translunar trajectory
15 p2697 A70-31676
- Low cost earth-moon transportation system based on shuttle station mode concept
17 p3176 A70-34806
- Saturn 5 launch vehicle targeting methods for lunar missions, solving earth departure variables via iterative process
19 p3528 A70-38867
- Interplanetary trajectories calculation using constant and/or slowly varying functions for accuracy, noting application to earth-moon spacecraft
19 p3530 A70-38888
- EARTH-VENUS TRAJECTORIES**
- Solar probe trajectory optimization, using Venus gravitational field for braking
23 p4243 A70-44506
- EARTHQUAKES**
- Dynamical models of relative motions during earthquakes, solving numerically integral equations with nonintegral kernels in crack propagation and elastic wave diffraction
05 p0941 A70-16527
- Earth rotation perturbations, analyzing secular polar shift dependence on dimensions, depth and location of seismic event
13 p2400 A70-29604
- Ionospheric acoustic wave propagation from seismic waves of Kurile Islands earthquake on 11 August 1969
17 p3075 A70-34569
- Thermoelastic seismic-energy release as source mechanism for volcanic earthquakes, describing thermal microfracture tests
20 p3619 A70-39217
- EATING**
- Hunger, thirst and environmental stimuli roles in development and elicitation of stimulus bound eating and drinking in animals
13 p2355 A70-29806
- Eating and digestion effects on arterial pressure and mesenteric and aortic blood flows in intact unanesthetized dogs
17 p3024 A70-34848
- Photoperiod effects on rats food and water intake, noting endogenous feeding rhythm correlation with activity patterns
24 p4296 A70-45332
- Alpha and beta reciprocal hunger regulating systems localized in rats hypothalamus areas by varying injection sites of alpha and beta adrenergic drugs
24 p4304 A70-46233
- EBULLITION**
- U BOILING**
- ECCENTRIC ORBITS**
- HEOS 1 satellite for interplanetary space exploration, describing eccentric orbit, structure, power supply, attitude measurement and control, spin rate control, telemetry and telecommand systems
01 p0196 A70-11114
- Jupiter capture of comets with parabolic orbits taking into account solar gravitational influence
05 p0905 A70-15757
- HEOS-A2 project development plan for investigating unexplored interplanetary space in eccentric orbit
05 p0923 A70-16588
- Capture and gravity gradient stabilization of LIDOS satellite in eccentric orbit
06 p1154 A70-17175
- Eccentric and inclined motions of satellite of spherical planet in planet centered coordinate system, applying formulas to Jupiter motion
07 p1374 A70-18693
- Nonspinning satellite orbit eccentricity effect on attitude stability
09 p1766 A70-23229
- Orbit eccentricity effect on gravity gradient system with single damping boom, investigating optimum steady state and transient response conditions
11 p2123 A70-26129
- Errors in determining controlled satellite rotation periods, proposing scheme for corrected trajectory calculation of small eccentricity orbits
11 p2118 A70-26779
- Resonant and nonresonant satellite eccentric orbits for determination of high order terms in geopotential
20 p3709 A70-40073
- Orbital eccentricity effects on solutions of eclipsing binary light curves, comparing circular orbits solutions
23 p4242 A70-44290
- Practical stability of highly eccentric orbits quasi-normal to ecliptic, discussing lunar effects on orbital lifetime
23 p4243 A70-44510
- ECCENTRICITY**
- Misalignment and eccentricity effect on face seal, discussing leakage dependence on phase angle
[ASLE FICFS PREPRINT 15A] 02 p0308 A70-12171
- Eccentric face seal with tangentially varying film thickness, analyzing leakage flow proportional to eccentricity and surface waviness
[ASLE FICFS PREPRINT 15B] 02 p0308 A70-12176
- Periodic solutions with moderate eccentricities and high inclinations for three dimensional restricted three body problem by expanding disturbing functions by high speed computer
09 p1759 A70-22773
- Reinforcing ribs eccentricity effect on closed circular cylindrical shell stability using strain energy method
09 p1786 A70-23720
- Eccentricity and clamping effects on stability and critical pressure of ring-reinforced cylindrical shells under internal pressure
10 p1956 A70-24248
- Eccentric cylinders with outer cylinder rotating measured for eccentricity and clearance ratios effects on pressure distribution and force on inner cylinder
11 p2060 A70-26409
- ECHELETTE GRATINGS**
- High dispersion stellar spectroscopy with echelle grating, discussing instrument design, operation and performance
22 p4040 A70-43613
- ECHO SATELLITES**
- NT ECHO 1 SATELLITE
NT ECHO 2 SATELLITE
Solar UV radiation reflected from Echo satellites measured and compared with UV fluxes from Lyrae
01 p0095 A70-11614
- ECHO SUPPRESSORS**
- Radio wave reflection from ionosphere, discussing suppression of magnetoionic component with fluctuating elliptical polarization
11 p2003 A70-25534
- Transmission delay and echo effects in long distance satellite relay telephony links, describing echo suppression and speech quality
12 p2183 A70-27004
- Radio wave reflection from ionosphere, discussing suppression of magnetoionic component with fluctuating elliptical polarization
21 p3786 A70-41284
- ECHO 1 CARRIER ROCKET**
- U THOR DELTA LAUNCH VEHICLE**
- ECHO 1 SATELLITE**
- Echo 1 satellite orbital acceleration correlated with solar activity, determining atmospheric density from drag observations using PERLO computer program
24 p4408 A70-45552
- ECHO 2 SATELLITE**
- Echo 2 satellite orbital elements from optical observations covering last passages over Milan before orbital decay
17 p3172 A70-35628
- ECHOES**
- NT ANGELS
NT AURORAL ECHOES
NT CLUTTER
NT LUNAR ECHOES
NT LUNAR RADAR ECHOES
NT RADAR ECHOES
NT RADIO ECHOES
NT SIGNAL REFLECTION
NT SOLAR RADAR ECHOES
NT VENUS RADAR ECHOES
Optical echoes using model of spins precessing in magnetic field, presenting time dependent theory of perturbation
02 p0341 A70-12830
- Ionogram conjugate echoes observed at Singapore longitudes by Alouette 2 topside sounder, attributing sequential occurrence to field-aligned irregularities in magnetosphere
03 p0477 A70-13986
- Cardiac echography applied to diagnosis and therapy evaluation in idiopathic hypertrophic subaortic stenosis
05 p0800 A70-16103
- Light inductions and echo intensities in liquids and gases, investigating thermal vibrations, translational Brownian motion, particle collisions and laser diffusion effects
06 p1082 A70-17809
- Spontaneous echoes amplitude resulting from damped electronic plasma plane wave excitation in collisionless plasma
09 p1735 A70-22843
- Fokker-Planck Coulomb collisions effect on plasma wave echoes
09 p1736 A70-23181

Ultrasonic echography for ventricular size determination, calculating stroke volume and valvular regurgitation severity 10 p1820 A70-24938

Seismic echo produced by jettisoned Apollo 12 S-4B stage impact at lunar surface analyzed by multiscascade scattering theory 12 p2298 A70-27280

Proton cyclotron echoes in topside ionograms using Alouette 2 satellite data 12 p2226 A70-28064

Delayed ionospheric resonance echoes radiated from topside plasma after pulse sequence stimulation by Alouette 2 satellite 13 p2370 A70-29904

Dispersion and group velocity characteristics of topside resonance oblique echoes near plasma frequencies observed by satellite 13 p2467 A70-29909

Temporal wave echoes and Landau damping in collisionless plasma using signal averaging and time delay techniques 14 p2622 A70-30687

Plasma echo oscillations due to superposition of consecutive perturbations separated by intervals greater than characteristic decay time 16 p2957 A70-33198

Electron spin-echo device as programmable linear matched filter for PN modulated carrier waveforms detection 16 p2864 A70-33480

Collisional effects on second order spatial ion wave echo, evaluating velocity integral 19 p3475 A70-37539

Higher order magnetic field-free temporal and spatial plasma wave echoes, solving collisionless Boltzmann equation by method of characteristics 19 p3476 A70-37557

Temporal echo in plasma for applied rectangular pulses, discussing ballistic approximation 19 p3480 A70-38174

Ultrasonic pulse echo flaw detection, relating defect size to echo amplitude 20 p3636 A70-39192

Adiabatic bounce periods of particle gyrophase coherence in earth field for cyclotron echo and triggered emission analyses 20 p3621 A70-39343

Cold nonuniform plasma slab model for afterglow echoes at upper hybrid resonance in uniform magnetic field 20 p3679 A70-39664

Low latitude observations of spread F echoes and stationary satellite scintillations, correlating with ionospheric disturbances and geomagnetic activity 21 p3818 A70-41097

Plasma wave echo, observing oscillatory behavior of perturbed distribution with different phases and amplitudes 21 p3858 A70-41389

Impulse length effect on space echo electric field in collisionless plasma 22 p4082 A70-43237

Neutron-electron collision damping and displacing of space echo in plasmas, indicating use for density measurement 22 p4082 A70-43244

Anomalous multiple reflections from ionosphere showing concave surface focusing 23 p4164 A70-44374

Flaw echo height dependence on ultrasonic testing pulse frequency spectrum 24 p4336 A70-45688

Echoes with ion sonar waves in ionized gases, considering ion density disturbances under local excitation 24 p4387 A70-45795

ECLIPSES

NT LUNAR ECLIPSES

NT SOLAR ECLIPSES

ECLIPSING BINARY STARS

Light curve and relative dimensions of eclipsing system V338 Herculis, from photoelectric measurements, discussing component stars 01 p0184 A70-10951

Light curves of Algol eclipsing variable AD Herculis and semidetached system relative dimensions from BV photoelectric observations 01 p0184 A70-10952

Photometric results on beta Lyrae from various observatories during 1959 international campaign with data reduced to BV system, showing reddening at primary eclipse 02 p0369 A70-12064

Orbits computation from double lined spectra of eclipsing binaries 31 Men and 9 Cha, emphasizing systemic velocity and mass ratio derivation method 03 p0565 A70-13268

U Geminorum type variables properties, orbital period changes in close binaries and origin of outbursts 03 p0567 A70-13322

Light variation curves for distorted white dwarf hypothetical secondaries in close binary systems calculated by integrating monochromatic fluxes 03 p0567 A70-13323

Binary system Nova WZ Sge model with nonnegligible secondary component contribution to total light explaining W UMa type light curve 03 p0568 A70-13324

Nonperiodic changes in radiation connected with orbital period in eclipsing conventional binaries observed in R Canis Majoris 03 p0568 A70-13326

Beta lyrae light curve changes by comparing international program observations with 1958 Lick Observatory results, discussing period, brightness, spectra, etc 03 p0568 A70-13326

AD Herculis components as Algol system with gas flow based on observed absorption effects 03 p0577 A70-14100

Color photoelectric study of eclipsing binary RY Gemini for determining orbital elements and structure 04 p0754 A70-15217

Bolometric albedo of main sequence stars with deep convective envelopes in close binary systems derived as function of photometric proximity using entropy invariance 05 p0914 A70-16694

Brightness curves for eclipsing binary V448 Cygni indicating gas stream flows in system 08 p1577 A70-21441

Secondary minimums role in studying eclipsing variable stars, correlating observability with detection of line of apsides motion 08 p1581 A70-21759

Phase variations in polarization parameters of eclipsing binary Z Vul during polarimetric studies for interstellar polarization component 09 p1751 A70-22156

Eclipsing binary beta Aurigae effective temperature and surface gravity determination from photoelectric spectrum and abundance analyses 10 p1938 A70-24100

Algol variable RV Ophiuchi photoelectric observation in B and V, representing light curve characteristics by gas stream model 10 p1945 A70-24967

WZ Sagittae ultrashort period binary evolution, considering mass-radius relation, initial separation and present position 11 p2108 A70-25696

Cyg XR-1 X ray spectrum variability by balloon-borne detectors as eclipsing properties of binary system 15 p2799 A70-31750

Helium abundance in unevolved main sequence eclipsing binaries by comparing to homogeneous models in mass luminosity plane 18 p3318 A70-37023

Eclipsing binary with very hot white dwarf, discussing effective temperature and photometric observations 21 p3889 A70-41158

BM Orionis eclipsing binary spectra, determining radial velocity curve 21 p3890 A70-41161

Light curve for eclipsing stars with scattering envelopes applied to V444 Cygni binary system 22 p4103 A70-42989

Computer synthesis of completely eclipsing binary light curves including limb darkening and simulated observational errors 22 p4103 A70-42990

Orbital eccentricity effects on solutions of eclipsing binary light curves, comparing circular orbits solutions 23 p4242 A70-44290

Algol type semidetached eclipsing binaries main sequence components rotational velocities, determining deviations from synchronism 23 p4251 A70-44818

Eclipsing binary stars minima variations related to orbit perturbations and rotational angular momentum of component interiors 23 p4251 A70-44819

ECLIPTIC

Minor meteor showers radiants determined close to ecliptic plane from systematic visual observations during November, December and January 1961-67 08 p1577 A70-21532

Ecliptic obliquity secular change rate apparent discrepancy possibly due to earth-moon barycenter motion 10 p1945 A70-24962

ECOLOGICAL SYSTEMS

U ECOLOGY

ECOLOGY

NT COASTAL ECOLOGY

EEG investigation of cerebral biocurrents during polar night-day cycle, studying central nervous system nonspecific automatic control mechanism dependence on ecological factors 01 p0030 A70-11466

Organisms resistance to biological environmental factors, surveying published literature on pressure

chamber experiments, tissue resistance, cellular protein stability, etc 03 p0422 A70-13701

Radiobiological and radioecological aspects of radioactive pollution of earth atmosphere, considering international cooperation for preventive measures 07 p1199 A70-18781

Satellites application to studying and monitoring earth ecology, discussing environmental space research and space program priorities 09 p1794 A70-23333

Organisms resistance to biological environmental factors, surveying published literature on pressure chamber experiments, tissue resistance, cellular protein stability, etc 11 p1985 A70-25501

Remote sensing in ecology - Conference, Madison, Wisconsin, June 1968 17 p3078 A70-35611

Ecological potentials in spectral signature analysis, using laboratory leaf and soil spectral reflectance data 17 p3078 A70-35612

Remote multispectral sensing of environmental and vegetative gradients in Yellowstone National Park by intercomparison of thermal IR and visible band imagery 17 p3079 A70-35617

Shallow water bottom biota, sediments and morphology determination by aerial and satellite photography 17 p3079 A70-35620

Multispectral remote sensing for detection and mapping of ecological objects and energy budget parameters measurement 17 p3079 A70-35622

Aircraft bird hazards in New Zealand, discussing ecological research techniques and preventive measures 18 p3212 A70-35985

Bird scaring from airfields based on ecological research 18 p3222 A70-35990

Bioastronautics and earth ecology, discussing environmental pollution, nutritional, microbiological and psychological problems 18 p3350 A70-36757

Holography application to marine ecological studies, using laser beam reduction techniques for image recording and reconstruction of large areas and volumes 21 p3823 A70-40821

Biological life support systems mass exchange processes analysis based on mathematical models, predicting artificial ecological systems stability 23 p4149 A70-45029

ECONOMICS

NT DEMAND [ECONOMICS]

Economic tradeoffs in airport and commercial aircraft design, considering traffic growth, increased weight impact minimization and costs 01 p0056 A70-10623

Communication satellite system proposed for small users, assessing viability based on market saturation points estimation 01 p0043 A70-10629

Commercial aircraft design, considering structural allowables effect on economics, using shear web analysis program as example 02 p0225 A70-11947

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects 03 p0522 A70-13610

Boeing 747 aircraft family design options related to utilization, performance and economics, discussing development through large turbofan engine availability 04 p0624 A70-15382

Integrated logistic support economics considered in selecting support system for generating quantitative data for cost optimization 05 p0959 A70-15846

Integrated space program with merger of manned and automated activities for coming decade permitting costs comparable to aircraft-based scientific programs 07 p1375 A70-18872

Demand assignment economics relative to ground stations in satellite telecommunication systems 10 p1838 A70-24360

Direct domestic reception of TV signals from satellites, discussing microwave components, economics and reliability 10 p1840 A70-24448

Communication satellite technology impacts on potential socio-economic developments of emerging nations of Asia, Africa and South America [AIAA PAPER 70-473] 11 p2152 A70-25426

Educational satellite TV for developing countries, giving model relating economic development to education and applied technology 11 p2152 A70-25429

Satellite video-telephone systems promoting economic growth in developing nations through linkage with developed nations advanced centers [AIAA PAPER 70-474] 11 p2000 A70-25455

Wideband transmission media for global communication networks, comparing submarine cables and satellites based on economic tradeoff in terms of circuit density and distance
[AIAA PAPER 70-444] 11 p2001 A70-25475

Communications satellite systems for developing nations, considering educational TV, economic growth, cost estimates, etc
[AIAA PAPER 70-475] 11 p2152 A70-25479

Edwards Report consideration of economic and investment opportunities in civil aviation, discussing denationalizing airways corporations
11 p2153 A70-25859

Edwards Report on UK domestic air services, considering unprofitability, trunk route competition and V/STOL development exploitation
11 p2153 A70-25860

Nonzero sum differential games with cost criteria minimized by inputs control to single dynamic system, emphasizing application to economic competition
11 p2072 A70-26227

Passive and active satellite systems for point-to-point communication network with multiple access capacity, comparing technical and economic competitiveness
11 p2011 A70-26335

Economical inspection of numerical-control produced parts through critical dimensions determination and dimension measurement reduction
[SME PAPER IQ-70-710] 12 p2241 A70-27086

VTOL profitability in Northeast Corridor, discussing city center ports accessibility for S-65-200 short hauls and economic and ground acreage advantages
[SAE PAPER 700310] 12 p2335 A70-27452

Economic factors in developing STOL and VTOL metroflight service, proposing evolutionary process beginning with short term demonstration
[SAE PAPER 700313] 12 p2335 A70-27454

Telecommunication satellite system operation reliability taking into account maintenance and economics, discussing spacecraft acceptance and performance tests
12 p2313 A70-27470

STT feasibility for U.S., considering program costs, financing, investment return and airport and community noise aspects
12 p2162 A70-27991

High speed commercial transport hovercraft economic factors, considering traffic needs, fares, service frequency, reliability, etc
13 p2347 A70-29158

Gear pumps for hydraulic systems, discussing costs, types and applications
14 p2590 A70-30302

Government defense contract warranties in terms of consumer interests protection and economics
14 p2667 A70-30522

Economic factors in aviation - RAS Conference, London, May 1970
14 p2668 A70-30935

Military aviation economics in UK emphasizing aircraft industry and government cooperation in meeting RAF requirements
14 p2668 A70-30938

R and D impact on transport aircraft design economics
14 p2669 A70-30945

Airliner fuselage shape design and effect on manufacturing and flight operation economics
14 p2532 A70-31369

Optimal control theory applied to oligopoly, considering economic problems and Nash equilibrium solutions
15 p2831 A70-32552

General aviation growth forecast during next decade, considering economic importance, air traffic control, collision avoidance, etc
16 p3003 A70-33469

Power plants development for air transport propulsion system economics, noting engine reliability, traffic delays, etc
16 p2841 A70-33770

Long haul air transportation profitability based on Polish Lot airline ton passenger-km computation comparison
17 p3199 A70-34691

Power plant efficiency, size, maintenance and operating economics of propulsion systems for air transport
17 p3200 A70-34917

Air transport operations and economics in 1970 decade, taking into account cost-revenue ratio and cost effectiveness of various aircraft
17 p3204 A70-35852

Aircraft accident prevention and investigation, noting economic factors as deterrent to safety measures implementation
17 p3022 A70-35860

Ignition surges role in combustion economics
18 p3348 A70-36652

STOL systems 1975 technical and economic characteristics in terms of passenger market, aircraft design, terminal facilities and ATC capability
[SAE PAPER 700311] 18 p3350 A70-36812

Optimum reliability level in terms of economic benefits and external constraints
19 p3554 A70-38595

Value engineering for British aerospace industry management planning
19 p3555 A70-38619

Economics of reliability relating risks of failure and cost of failure prevention
19 p3555 A70-38841

Satellite earth resources, discussing cost benefit analysis and economics in agriculture, forestry and mapping
20 p3739 A70-39065

Telecommunication, ATC and navigation satellite systems, examining economic bases for aeronautical and maritime space systems
20 p3740 A70-39407

Air transport regulatory system, considering operational, technological and economic factors
21 p3954 A70-40579

Aeronautical satellite system for civil flight safety, discussing operational, technical and economic aspects
21 p3848 A70-41131

Worldwide common satellite network for sea and air navigation, discussing cost estimate and economics
23 p4216 A70-44608

Nondestructive testing for aircraft maintenance, considering economics
24 p4342 A70-45677

Wide-bodied and SST aircraft impact on airport design based on economic, social and environmental considerations
[AIAA PAPER 70-1269] 24 p4323 A70-45970

Technological and economical characteristics of serviced and unserved automatic hydrometeorological stations and second class nonautomatic station
24 p4340 A70-46406

ECONOMY

Fighter aircraft design combining optimal qualities with economy
05 p0793 A70-15902

Economic flight conditions for civil aviation VTOL aircraft selected by graph-analytical method concerning phases of ascent, cruising and descent
06 p0987 A70-17875

Midwestern political economy and federal R and D funds distribution, surveying bidding practices and NASA contracts for five year period
07 p1428 A70-19733

Satellite TV transmission economic, technical and practical feasibility, describing direct transmission system
09 p1634 A70-22766

Project economic evaluation, discussing value analysis from market research recommendations
19 p3555 A70-38620

EDDIES

U VORTICES

EDDINGTON APPROXIMATION

Eddington equation for white dwarf pulsation solved by treating eigenfunctions as differential moment of inertia functions
04 p0751 A70-15050

EDDY CURRENTS

Eddy current inspection method for detecting fatigue cracks location and depth in fastener holes
01 p0097 A70-10008

Spherical conducting body effect on induction coil impedance and EMF in nondestructive testing using eddy current probes
02 p0300 A70-12478

Inductive eddy current strain gage for repeated strains measurement in magnetic and nonmagnetic sheets offering direct readout and remote recording
03 p0485 A70-13475

Modulation type eddy current flaw detector with striding converter, considering envelope shape of carrier frequency oscillations
06 p1079 A70-18631

Magnetic suspension and guidance of high speed vehicles realized via magnetic field interaction of vehicle-mounted superconducting magnets with eddy currents
08 p1543 A70-20576

Nondestructive testing of small metal tubing, discussing eddy current, ultrasonic and electromagnetic inspection and dye penetrants
08 p1509 A70-21748

Spectral analysis of LF pulses from defects obtained by modulation method of monitoring using eddy currents with superposed converter
13 p2404 A70-28660

Eddy currents magnetic field structure over surface defects in conducting objects, noting NDT applications
13 p2404 A70-28661

Two axis eddy current and single axis gravity gradient dampers for satellite stabilization
16 p2985 A70-34135

Eddy currents in Hall generator with conducting side wall, studying velocity and temperature effects for turbulent boundary layer and laminar flows
21 p3859 A70-41733

Multiparameter eddy current test methods, describing test coil output signal amplification, demodulation and recombination
22 p4028 A70-42592

Pulsed eddy currents in metals nondestructive testing, discussing masked probes, reflection systems, correlation and filtering methods, etc
22 p4028 A70-42593

Ferromagnetic cylindrical specimens eddy current density distribution under influence of field strength dependent permeability corresponding to Rayleigh law
24 p4344 A70-45695

Finite thickness metal plate eddy current response to pulsed field from aperture probe
24 p4344 A70-45696

Eddy current nondestructive tests for surface defects detection, determining optimum test parameters based on calculation
24 p4344 A70-45697

Eddy current magnetic probe with frequency scanning for signal-noise discrimination in nondestructive testing of tubes
24 p4336 A70-45698

Metal sheets thickness measurement and monitoring by through-transmission eddy current nondestructive testing, using phase locked amplifier
24 p4344 A70-45699

Magnetic and nonmagnetic metals flaw detection, using orthogonal eddy current probe to reduce permeability and conductivity variations effects
24 p4344 A70-45700

Metals flaw detection, using electronic balancing type eddy current detecting coil
24 p4336 A70-45701

Encasing and welded pipes flaws detection with high resolution by nondestructive testing, using eddy current method
24 p4345 A70-45702

Nondestructive tests of work-hardening Al alloy structural deterioration due to overheating, using eddy current conductivity techniques
24 p4345 A70-45703

EDDY DIFFUSION

U TURBULENT DIFFUSION

EDDY VISCOSITY

Boussinesq eddy viscosity concept solving equations of two dimensional incompressible turbulent boundary layer, using implicit five point finite difference method
02 p0285 A70-12350

Differential strip method developed for turbulent boundary layer equations, describing flow by law of wall coupled to wake solution utilizing constant eddy viscosity
02 p0285 A70-12352

Finite difference solution of compressible turbulent boundary layer equations of motion, using eddy viscosity concept
02 p0286 A70-12353

Eddy viscosity equation derived from flat plate turbulent boundary layer velocity data, considering shear stresses and mixing length profiles
03 p0464 A70-12943

Turbulent boundary layer model using two region characterization for eddy viscosity and similarity solution taking into account interfacial conditions
[ASME PAPER 69-WA/APM-27] 04 p0668 A70-14905

Viscosity superposition principle applied to isotropic turbulence analysis, approximating self similar solution by time factor averaging
07 p1258 A70-19698

Turbulent Prandtl number and eddy viscosity distribution in thermally stratified turbulent boundary layer of air shear flow dependent on wall distance and thermal stability
08 p1599 A70-21581

Turbulent trailing vortex decay calculated from circumferential velocity and eddy viscosity dependent on Reynolds number
10 p1802 A70-24561

Reynolds momentum and mass transport at velocity half radius of coaxial jet compared to eddy viscosity models
14 p2564 A70-30260

Plane turbulent impinging jet by iterative finite difference technique, assuming eddy viscosity dependence on energy fluctuations and turbulence length scale
[ASME PAPER 70-FE-27] 16 p2835 A70-33634

Oscillatory flow in turbulent boundary layer modeled by eddy viscosity distribution, deriving mass transport velocity induced by progressive and standing waves
20 p3608 A70-39358

Turbulent boundary layers calculation with and without mass addition based on eddy viscosity concept, including accelerating flows
21 p3807 A70-41029

EDEMA

Brain oxygen supply during cerebral edema, examining venous and arterial blood gases, circulation, oxygen uptake, blood volume and pressure and EEG
10 p1822 A70-25087

Hyperbaric oxygen exposure produced hypertension and pulmonary edema, discussing carbon dioxide transport mechanism in blood 20 p3572 A70-39430

EDGE DISLOCATIONS

Temperature effects on tensile deformation mechanism of Mo single crystals, investigating stress-strain characteristics and slip geometry 02 p0316 A70-11699

Steady creep process microscopic mechanisms, discussing creep due to glide of jogged screw dislocations, climbing of edge dislocations and stress directed vacancy diffusion 08 p1593 A70-21519

Plastic properties of tungsten carbide single crystals at room temperature, determining slip system crystallographic orientations 08 p1520 A70-21557

Temperature effect on plastic flow in Ti-scavenged Fe, attributing microyielding to edge dislocations motion 08 p1525 A70-21959

Ferromagnetic domain wall-dislocations magnetoelastic interaction in Fe and Ni computed as function of relative separation, discussing effects on magnetic properties 09 p1705 A70-22811

Fast brittle crack slowing by mechanical twins in transformer steel and by slip bands in LiF and NaCl crystals 15 p2755 A70-31526

Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes 15 p2756 A70-31561

Elastic properties of dislocations in Ti basal, prismatic and pyramidal slip systems, discussing dilatational fields of edge and screw dislocations 17 p3115 A70-34385

Parallel edge dislocations in elastically isotropic crystals, discussing climb and glide forces 17 p3126 A70-35454

Edge dislocation and uniform and radial fissures in elastic isotropic nonhomogeneous bodies under two dimensional deformation 19 p3540 A70-37956

Slip band formation dislocation-diffusion mechanism for single crystal and polycrystalline metals, considering stress intensity and load cycles effects 21 p3936 A70-41416

Plastic zones between symmetric and collinear edge cracks in thin plexiglass strips, using He-Ne laser interferometry 21 p3939 A70-41967

Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis 21 p3939 A70-42028

Optimal weight design of axisymmetric rotating elastic disks for specific edge radial displacement 22 p4112 A70-42463

Stress fields of screw and edge dislocations in linearly elastic isotropic Cosserat continuum using stress functions 23 p4266 A70-44022

EDGE LOADING

Thin flat plates effective width under axial edge compression slightly beyond buckling limit, solving von Karman differential equations 01 p0198 A70-10094

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations 01 p0205 A70-11141

Elastic bending of thin circular conical shell subject to arbitrary variation of edge loads 01 p0209 A70-11385

Donnell shallow circular cylindrical shell equation, obtaining approximate solution for stresses in infinitely long circular cylindrical shell with circular hole subjected to edge loading 03 p0601 A70-14320

Structural analysis of rectangular plates simply supported on two edges subjected to free edge uniform moments 03 p0602 A70-14332

Stress analysis of shell loaded at free edge by concentrated forces and moments 04 p0772 A70-14920

Fiberglass reinforced rectilinear plastic plates bending under various edge loads, noting shear pliability 05 p0934 A70-16220

Shallow orthotropic shell of rectangular planform with edges under dynamic load, studying forced vibrations by anisotropic shell theory 07 p1403 A70-19057

Rectangular plate girder webs buckling under partial edge loadings, using finite element method for flange-web interaction 08 p1589 A70-21247

Elastically symmetric thin plate stress-strain state under uniformly distributed load applied to edges 08 p1591 A70-21415

Green function for stress intensity factors of rectangular plate edge cracks, noting application to thermal stresses [ASME PAPER 68-WA/MET-19] 08 p1591 A70-21457

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms 08 p1594 A70-21635

Axisymmetric free vibrations of orthotropic cylindrical shell loaded on ends by constant axial force, investigating nonlinear elasticity 09 p1785 A70-23625

Stress distribution in infinite strip of finite thickness under symmetric edge loading analyzed by linear couple stress theory using Fourier transforms 10 p1954 A70-24017

Influence coefficients for toroidal shells under axisymmetric edge loads, taking one term in asymptotic expansion of Hankel function 11 p2132 A70-25693

Characteristic equation roots for circular cylindrical shells deformation under edge load 11 p2135 A70-25960

Thin circular cylindrical panels of arbitrary curvature calculated for end support and loading at contour 12 p3232 A70-27335

Deflection surface and edge moment prediction for uniformly edge loaded point-supported circular plates, comparing with optical method 13 p2509 A70-28534

Stress concentration factors determined for u-shaped and semielliptical edge notches in semiinfinite sheet under uniaxial tension parallel to edge 13 p2509 A70-28535

Postbuckling of flat variable thickness rectangular plates with unloaded transverse edges, using dynamic relaxation method 13 p2518 A70-30024

Thin spherical shell postbuckling behavior with constrained rigid boundary under edge load, using deep and shallow shell theory 14 p2658 A70-30848

Shells of revolution zero moment stressed state calculation by analytical functions, solving boundary value problem for edge loading 15 p2814 A70-31587

Linear model of edge effect in supersonic gas flow past dihedral angle of intersecting wings, using Abel equations 15 p2672 A70-32127

Nonlinear bearing surface of symmetrical rectangular edge wings without slipping in incompressible flow, using oblique horseshoe vortex model 15 p2673 A70-32128

Thin plates with central circular holes, investigating creep behavior for biaxial edge tractions 15 p2822 A70-32359

Alternating stress required for edge crack propagation in metal plates under tensile loading cycles 15 p2762 A70-32464

Thin walled cylindrical shell stability under axial compression edge load beyond limit of proportionality 19 p3534 A70-37243

Edge distribution of transverse reactive forces of rectangular plate with nonuniform flexural rigidity at buckling load 19 p3541 A70-38042

Elastic stability theory Cosserat surface subjected to conservative nongyroscopic surface and edge loading 21 p3939 A70-42027

EDGES

NT LEADING EDGES

NT SHARP LEADING EDGES

NT TRAILING EDGES

Boundary conditions at reinforced edge of shell by separating solution into zero moment stress and edge effect solutions 01 p0209 A70-11407

Edge smear in far field holography as function of interference orders, using short-cut trace technique 09 p1684 A70-23532

Object contrast effects on straight edge images in partially coherent illumination 10 p1898 A70-23910

Shear deformation of sandwich plate cross sections with hinged opposite edges, constructing transfer matrix for state variables 13 p2508 A70-28483

Steady expansion flows at three dimensional supersonic edges with small corner angles using analytical method of characteristics 13 p2338 A70-28491

Focusing lens edge diffraction effect on angular distribution of laser radiation, considering zero mode field distribution 13 p2428 A70-29367

EDUCATION

NT ASTRONAUT TRAINING

NT EJECTION TRAINING

NT FLIGHT TRAINING

NT PILOT TRAINING

NT SPACE FLIGHT TRAINING

Human subjects performances on fixed interval reinforcement schedules, emphasizing effects of instruction 01 p0035 A70-10793

Digital computer display techniques relationship with man in modern environment, considering human engineering and educational problems and future impact on intellectual qualities 01 p0221 A70-11281

System analysis and synthesis processes applied to educational requirements identification and programs implementation, emphasizing use of functional model with man machine interface 01 p0221 A70-11283

Student development and exercising of electron physics principles by designing, assembling, operating and studying electron and ion devices 01 p0093 A70-11291

Diffraction plates for classroom demonstrations of Fraunhofer patterns, Babinet principle and Rayleigh resolution by computer generation 01 p0093 A70-11292

Digital systems design laboratory as instructional tool and experimental model for education 02 p0275 A70-12190

Great Britain air transport industry manpower recruitment and training, technology changes effects and costs 02 p0402 A70-12307

Network analysis for systems application program /NASAP/ computer-aided circuit design program for network analysis, discussing application in education 06 p1015 A70-18418

Computer aided network design course using FORTRAN 4 emphasizing modeling of semiconductor devices 06 p1015 A70-18419

Critical comments on teaching switching theory concerning mathematics role, logic functions, Boolean equations, etc 06 p1026 A70-18423

Survival training for safety promotion in emergency, discussing psychological factors, communication, living off land and shelter 07 p1218 A70-19007

Inhibitive stimulus control related to behavioral contrast during discriminative training 08 p1441 A70-20476

Direct broadcast voice satellite for educational system improvement, discussing lesson formatting, ground receiver/programmer, multichannel capacity, etc [AIAA PAPER 70-449] 11 p1998 A70-25423

Systems analysis approach to problem solving, discussing application to sociological and educational considerations 17 p3130 A70-35297

ATC personnel training at International ATC Academy, discussing objectives and syllabus 19 p3372 A70-38650

Oxygen pressure effects on tracking control training for stable reactions, investigating muscles bioelectrical activity changes during elevated pressure breathing 20 p3581 A70-40291

Age, grade, educational institution and attitude effects on pilot personality test performance 22 p3977 A70-42870

Aerospace medicine approach to medical investigator training for aircraft accidents, noting flight surgeon role as life support specialists chief 23 p4152 A70-44454

Survival training program preparing physicians as advisors regarding survival equipment and medicine 23 p4152 A70-44463

Heat transfer and viscous flow pedagogy, discussing classroom use of remote time sharing computer terminals 23 p4166 A70-44642

Industry-university interaction in competitive teaching of spacecraft design 23 p4285 A70-44643

EDUCATIONAL TELEVISION

Software production for Brazilian Advanced Educational Technology System [AIAA PAPER 70-470] 11 p2152 A70-25403

Educational satellite TV for developing countries, giving model relating economic development to education and applied technology [AIAA PAPER 70-514] 11 p2152 A70-25429

Satellite ETV/ITV broadcast system, discussing frequency, receiver population, channel number, beam number, minimum cost solutions, etc [AIAA PAPER 70-452] 11 p1999 A70-25437

Satellite video-telephone systems promoting economic growth in developing nations through linkage with developed nations advanced centers [AIAA PAPER 70-474] 11 p2000 A70-25455

Instructional communication system for U.S. using synchronous satellites over 15 regions [AIAA PAPER 70-450] 11 p2000 A70-25465

Communications satellite systems for developing nations, considering educational TV, economic growth, cost estimates, etc [AIAA PAPER 70-475] 11 p2152 A70-25479

- Microwave converter system for ETV satellite reception, discussing characteristics and costs for mass production
[AIAA PAPER 70-439] 11 p2017 A70-25493
- Low cost microwave receiver and antenna for instructional satellite TV broadcasting in developing nations
21 p3789 A70-41355
- Educational TV system via satellite, discussing social benefits for Spanish speaking countries in South America
23 p4285 A70-44602
- Juridical problems in satellite direct TV broadcasting, discussing regulation proposals submitted to UN and educational applications
24 p4430 A70-45596

EEG [ELECTROENCEPHALOGRAMS]

U ELECTROENCEPHALOGRAPHY

- EFFECTIVENESS**
NT COST EFFECTIVENESS
NT SYSTEM EFFECTIVENESS
Complex systems effectiveness analysis by computer simulation technique
15 p2706 A70-32633
- Systems consisting of redundant and different modules, deriving vector and matrix expressions for effectiveness
17 p3099 A70-34581

EFFECTORS

U CONTROL EQUIPMENT

- EFFERENT NERVOUS SYSTEMS**
Relationships between frog vestibular afferents, cerebellum and efferent vestibular system, using electron microscopy and Nauta degeneration technique
01 p0014 A70-10351
- Cerebello-otolith system represented by axons of Purkinje cells, studying inhibitory vestibular efferent system relation to cerebellum in frog
01 p0014 A70-10352
- Morphological analysis of connections between auditory cortex zone and claustrum in anesthetized cats, establishing efferent nerve fibers presence
01 p0025 A70-11039
- Efference role in eye tracking of moving targets, discussing oculomotor system role
03 p0439 A70-14345

- Astronauts physical training for space flight requirements
04 p0629 A70-14564
- Immobilization effects on alpha rhythm, locomotor coordination and visual alimentary motor reflexes of cats
04 p0629 A70-14570
- Postrest upswing or muscles warm-up in motor skill learning
05 p0803 A70-16671
- Human motor reactions rhythmic system, relating reaction-skin-galvanic reflex to formation of successive conditioned connections
07 p1197 A70-18697
- Efferent and afferent fibers presence in optic nerves determined by unilateral and bilateral enucleation of dogs and cats
07 p1207 A70-19476

- Bioelectrical activity of brain during conditioned motor reflex system operation modes in response to stimulating light pulses
08 p1447 A70-21450
- Discrete motor act short term retention measurement to investigate decay and interference effects
09 p1621 A70-23378
- Startle auditory stimuli effects on motor performance and recovery characteristics from heart rate and skin conductance recordings
09 p1628 A70-23577
- Neuron activity of cortical motor and visual regions and corpus geniculatum laterale in cats during diffuse thalamic electrostimulation combined with light signals
12 p2173 A70-28355

- Excitation conduction velocity maximum along motor fibers of peripheral nerves as function of age in healthy subjects
15 p2679 A70-31602
- Human postural motor control systems nonlinearities, describing physiological experiments and mathematical models
15 p2693 A70-32568
- Physiological tests of sampled data hypothesis in human motor control system
16 p2851 A70-33323

- Moving stripe stimulus inducing optokinetic turning movements in goldfish, discussing efferent influence on vestibular organ
21 p3762 A70-41141
- Active recreation in motor function regulation in aging individuals
22 p3968 A70-42897
- Kinesophilia mechanisms of motor-visceral integration in aging organism
22 p3969 A70-42902
- Spinal cord thermal stimulation effects on regional sympathetic activity in rabbits and cats determined from integrated sympathetic efferents discharges
22 p3971 A70-43406

- Auditory cortex projections to caudate nucleus and functions of associative subcortical area in cats
24 p4300 A70-45838

EFFICIENCY

- NT COMBUSTION EFFICIENCY
NT COMPRESSOR EFFICIENCY
NT ENERGY CONVERSION EFFICIENCY
NT NOZZLE EFFICIENCY
NT POWER EFFICIENCY
NT PROPELLER EFFICIENCY
NT PROPULSIVE EFFICIENCY
NT THERMODYNAMIC EFFICIENCY
NT TRANSMISSION EFFICIENCY
Efficiency of terminal state control systems defined, relating efficiency, random parameters and reliability
07 p1246 A70-19528

- Efficiency loss with tip clearance predicted for mixed and axial flow single stage turbomachines, using perfect fluid model
11 p1974 A70-25787
- Aircraft stretch efficiency factor as function of productivity and payload growth
[SAWE PAPER 838] 20 p3563 A70-40369

EFFLUENTS

- Environmental surveillance associated with ground tests of nuclear rocket engine prototypes, determining statistical nature of radioactive effluent
19 p3470 A70-38013

EFFLUX

- Conducting gas unsteady efflux from plane tube into vacuum, determining time dependent position of expanding rarefaction wave fronts
10 p1924 A70-24569
- Gas-particle efflux from nozzle at critical velocities, noting particle size and concentration effects on inlet pressure
15 p2721 A70-32136
- Rarefied gas mixtures efflux from opening at various pressures, calculating component discharge coefficients for molecular flow conditions
15 p2721 A70-32137

EFFUSIVES

- CaO reaction rate with ZrC in effusion cells as function of reactant ion diffusion through product layer
13 p2362 A70-29496

EGGS

- Organism reactions to gravity forces, discussing experimental zero and hyper g simulation studies with frog and nematode eggs
23 p4146 A70-44630
- Altered gravitational field effects on frog eggs centrifuged under various conditions after fertilization, noting time dependence of induced abnormalities
24 p4298 A70-45619

EGRESS

- High energy emergency exit systems for passenger survival in aircraft accidents
23 p4140 A70-44466

EIGENFUNCTIONS

U EIGENVECTORS

EIGENSTATES

U EIGENVECTORS

EIGENVALUES

- Dynamo theory of stellar and planetary magnetic fields, discussing mathematical analysis and electronic computation of eigenvalue problems and field parameters
01 p0185 A70-10957

- Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium
01 p0208 A70-11185

- Lower bounds of Stekloff and free membrane eigenvalues for sloshing of incompressible inviscid fluid, subject to gravity in rigid tank with free surface
02 p0278 A70-11999

- Summary representations method to determine eigenfrequencies of finite difference Laplace operator for boundary conditions
03 p0518 A70-13079

- Eigenfunctions of oscillating infinite perforated membranes for various boundary conditions at holes
03 p0591 A70-13415

- Homogeneous waveguide solutions by finite element method using matrix operator and function minimization to assure rapid convergence to eigenvalue
03 p0457 A70-13936

- Upper and lower bounds for eigenvalues of lumped parameter straight line torsional system determined by receptance synthesis based on Holzer method
04 p0773 A70-15083

- Eigenvalue and eigenfunction of H01 wave in bend of cross shaped waveguide, determining field components and propagation constant change
04 p0651 A70-15291

- Surface wave spectrum and propagation in non-homogeneous bounded elastic solid, considering existence and eigenvalues approximation
05 p0925 A70-15789

- Eigenvalues upper and lower bounds of vibrating anisotropic material with multiple elastic constants, predicting free vibration frequencies by bounding isotropic moduli
05 p0937 A70-16408

- Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments
05 p0939 A70-16502

- Green operator structure and eigenvalue approximation of boundary value problems regarding vibrations and buckling of clamped plates using orthogonal invariants
05 p0876 A70-16563

- Discrete spectrum of fourth order differential operator estimating number of eigenvalues in bounded interval of real line
06 p1094 A70-17740

- Eigenvalues of spheroidal wave functions calculations dependent on complex propagation constants, discussing branch point values in tabular form
06 p1009 A70-17907

- Eigenvalue solutions convergence rates using two finite plate multidegrees of freedom bending elements
06 p1169 A70-17941

- Eigenvalue corresponding to decaying modes for wave equation in exterior of obstacle investigated for dependence on obstacle geometry
06 p1095 A70-18474

- Capacity calculation of N identical discrete memoryless nonsingular channels cascade, discussing dependence on eigenvalues and eigenvectors of subchannel transition matrices
06 p1013 A70-18628

- Characteristic equations for differential symmetry operators in homogeneous and nonhomogeneous Maxwell equations
08 p1544 A70-20990

- Circular dielectric waveguide modes self consistent description by asymptotic method, obtaining eigenvalues and eigenfunctions
08 p1476 A70-21288

- Fluge characteristic equation approximate roots for closed cylindrical shell compared with Donnell equation solution
08 p1593 A70-21625

- Natural oscillation frequencies of subsonic gas flow past plate array, solving eigenvalue problem by splitting method
09 p1603 A70-22117

- Plane Couette flow stability numerical analysis, predicting eigenvalue behavior for arbitrary Reynolds and wave numbers
09 p1658 A70-22124

- Asymptotic distribution of operator eigenvalues for self adjoint elliptic boundary value problem in unbounded region using Green function
09 p1711 A70-22148

- Eigenvalues and eigenvectors evaluation for real symmetric matrices by iterating simultaneously with trial vectors
09 p1641 A70-22283

- Fourth order differential equation system with complex conjugate eigenvalues, deriving optimal control for fuel minimum
09 p1759 A70-22831

- Asymptotic splitting of system of linear differential equations with slowly varying coefficients in cases with characteristic equation having multiple roots
09 p1712 A70-23119

- Blast wave eigenvalues in asymptotic expansions approximation for hypersonic flows past blunt bodies
10 p1797 A70-23953

- Closed loop control system design with preassigned eigenvalues based on multipoint linear stationary system synthesis with dynamic feedback
10 p1855 A70-24394

- Asymptotic eigensolutions for equations governing flow between oppositely rotating infinite plane disks in inviscid limit
10 p1870 A70-24607

- Stability of multiconnected nonlinear controlled systems with nonsingle equilibrium position, representing lumped parameter system with characteristic equation having complex roots
11 p2021 A70-25338

- Elastic wave propagation, deriving characteristic equations in generalized curvilinear coordinates using linear elastic, isotropic and homogeneous constitutive equations
11 p2132 A70-25680

- Nonlinear partial differential operators eigenvalue solution using modified Newton iteration method, noting advantages over perturbation method
11 p2074 A70-26423

- Classical eigenvalue problem transformation by invariant imbedding into initial value problem suited for numerical integration, noting applications to columns elastic buckling
12 p2261 A70-27424

- Dimensional stability derivatives from XV-4B aircraft simulator varied in computer program for extracting roots of lateral-directional characteristic equation
[AIAA PAPER 70-551] 13 p2346 A70-29016

- Ordinary differential eigenvalue problems solution by successive transformations, describing computer program and applications to hydrodynamic stability
13 p2440 A70-29085

- Quasi-pyramidal horn waveguide TE and TM modes eigenvalues computed by asymptotic formula
13 p2377 A70-29147
- Numerical integration of differential equations with widely separated eigenvalues, outlining solution stability and accuracy problems
13 p2441 A70-29213
- Eigenvalue and eigenvector derivatives in dynamic system designs involving vibrations and oscillations, discussing applications in modeling
13 p2518 A70-29971
- Covariance propagation via differential equations for time-varying eigenvalues and eigenvectors
13 p2450 A70-29979
- Differential equations eigenvalue and boundary value problem finite difference approximation convergence under consistency and stability conditions
14 p2599 A70-30643
- Eigenvalues of membranes and plates, comparing asymptotic and numerical values
14 p2600 A70-31223
- Radial Schrodinger equation bound state eigenvalues and properties by iterative method, calculating Coulomb potentials
14 p2600 A70-31360
- Natural oscillation frequencies in rectangular shallow shells weakened by cuts, using summary representations method for eigenvalues determination
15 p2814 A70-31585
- Feedback gains for repeated eigenvalues in Simon-Mitter pole allocation algorithm
16 p2941 A70-32986
- Radial energy eigenvalue problem conversion into one dimensional by infinite set of transformations, considering WKB quantization condition
16 p2942 A70-33691
- Complex matrix eigenvalues bound derivation by constructing integral equation with degenerate kernel
17 p3131 A70-35934
- Hurwitz matrix of real Hurwitzian polynomial, discussing relation between eigenvalues and zeros locations
18 p3279 A70-36062
- Ritz procedure for problems with eigenvalues in boundary conditions
18 p3336 A70-36222
- Eigenvalues of transfer matrix and vibrations generation for passive mechanical systems with n degrees of freedom based on Laplace transformation
18 p3337 A70-36225
- Eigenvalues and errors in asymptotic approximation of ordinary differential equations of second and fourth order
18 p3283 A70-36365
- Nontrivial eigenvalues of stochastic matrices
19 p3456 A70-37414
- Noniterative homogeneous solutions of integral equations for coupled open channel and coupled eigenvalue scattering
19 p3473 A70-38264
- Electromagnetic wave propagation in spherical impedance waveguide, determining eigenvalues with negligible refraction
19 p3381 A70-38565
- Perturbation calculation for linear ordinary differential operators, considering equivalence to eigenvalue problems
19 p3459 A70-38681
- Neighboring normal matrix pairs eigenvalues determination
19 p3459 A70-38685
- Mode clamping theorems for eigenvalues upper and lower bounds
20 p3657 A70-39232
- Recursive digital filters for flight control system airborne computer, considering quantization effects and eigenvalue sensitivity
20 p3601 A70-39575 [AIAA PAPER 70-953]
- Thin shells of revolution static and dynamic stability under symmetric loads, presenting eigenvalue algorithm for boundary value problems
20 p3725 A70-39863
- Vibrating plate thickness function, applying eigenvalue problem
20 p3726 A70-39877
- Feedback control system characteristic equation generalized root locus following technique using straight line approximation
20 p3659 A70-40121
- Boundary value problems for linear ordinary differential equations with singularities, determining eigenvalues by computer oriented method
20 p3659 A70-40134
- Jeffery-Hamel flows in symmetric divergent channels with small wall curvature, calculating eigenvalues and nonlinear stability limits
22 p4010 A70-42638
- Nesbet algorithm modified for iterative evaluation of eigenvalues and corresponding eigenvectors for large matrices
22 p4062 A70-42749
- Shooting method for computing eigenvalues of Hermitian differential operators
23 p4210 A70-44020
- Multidimensional correspondences between Helmholtz equation eigenfunctions and eigenvalues, including involutorial transformations
23 p4218 A70-44211
- Approximate bounds for differential eigenvalues of self adjoint linear operators in Hilbert space
23 p4211 A70-44245
- Iterative Rayleigh-Ritz method for eigenvalue determination in natural vibration problems
23 p4270 A70-44580
- Gradient minimization and higher order discrete elements application to shell buckling and vibration eigenproblems, using 48 degree of freedom Bogner cylindrical panel element
23 p4271 A70-44705
- Structural eigenvalue problems solved by sparsely populated matrices for structural vibrations and critical buckling, using finite element method
23 p4271 A70-44708
- Eigenvalue problem in elasticity theory, treating nonlinear equations solutions multiplicity by topological methods
24 p4420 A70-45273
- Variational solution of eigenvalues and eigenfunctions of second boundary value problem of elasticity minimizing functional
24 p4424 A70-45629
- Ionospheric wave propagation, using medium model, perturbation theory for vertical variation and computer eigenvalues of matrix system
24 p4314 A70-46132
- Spheroidal wave function theory, calculating eigenvalues with branch points for propagation constants complex values
24 p4315 A70-46134
- EIGENVECTORS**
- Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium
01 p0208 A70-11185
- Morse eigenfunctions for variational calculation of diatomic molecules vibrational-rotational energy level analysis, showing better convergence than harmonic oscillator basis
02 p0344 A70-12519
- Eddington equation for white dwarf pulsation solved by treating eigenfunctions as differential moment of inertia functions
04 p0751 A70-15050
- Eigenvalue and eigenfunction of H₀₁ wave in bend of cross shaped waveguide, determining field components and propagation constant change
04 p0651 A70-15291
- Convergence of eigenvalues and eigenvectors in torsional vibration problems of continuous systems via improved matrix displacement analysis using points of freedom in segments
05 p0939 A70-16502
- Capacity calculation of N identical discrete memoryless nonsingular channels cascade, discussing dependence on eigenvalues and eigenvectors of subchannel transition matrices
06 p1013 A70-18628
- Self adjoint operator generated by differential expression and pseudodifferential boundary conditions, using Berezanskii procedure for operator eigenfunction expansion
07 p1327 A70-19809
- Characteristic equations for differential symmetry operators in homogeneous and nonhomogeneous Maxwell equations
08 p1544 A70-20990
- Circular dielectric waveguide modes self consistent description by asymptotic method, obtaining eigenvalues and eigenfunctions
08 p1476 A70-21288
- Fluge characteristic equation approximate roots for closed cylindrical shell compared with Donnell equation solution
08 p1593 A70-21625
- Eigenvalues and eigenvectors evaluation for real symmetric matrices by iterating simultaneously with trial vectors
09 p1641 A70-22283
- Asymptotic splitting of system of linear differential equations with slowly varying coefficients in cases with characteristic equation having multiple roots
09 p1712 A70-23119
- Beam vibration eigenfunctions with allowance for shear compliance used to determine beams dynamic stability under pulsating axial load
09 p1785 A70-23600
- Nonautonomous boundary value problems for plates in plane and three dimensional supersonic flows, obtaining eigenfunctions of vibration by Laplace transform
10 p1956 A70-24118
- Stability of multiconnected nonlinear controlled systems with nonsingular equilibrium position, representing lumped parameter system with characteristic equation having complex roots
11 p2021 A70-25338
- Elastic wave propagation, deriving characteristic equations in generalized curvilinear coordinates using linear elastic, isotropic and homogeneous constitutive equations
11 p2132 A70-25680
- Dimensional stability derivatives from XV-4B aircraft simulator varied in computer program for extracting roots of lateral-directional characteristic equation [AIAA PAPER 70-551]
13 p2346 A70-29016
- Geopotential fields seasonal statistical analysis over first natural synoptic region, using expansion into orthogonal eigenfunctions
13 p2446 A70-29674
- Eigenvalue and eigenvector derivatives in dynamic system designs involving vibrations and oscillations, discussing applications in modeling
13 p2518 A70-29971
- Covariance propagation via differential equations for time-varying eigenvalues and eigenvectors
13 p2450 A70-29979
- Fourth order differential equations eigenfunctions construction and convergence of expansions in theory of flexure of sector plates
14 p2658 A70-30997
- Couette flow stability between coaxial rotating cylinders, calculating eigenvector in first approximation small perturbation equations
17 p3073 A70-35695
- Feedback control system characteristic equation generalized root locus following technique using straight line approximation
20 p3659 A70-40121
- First order linear distributed systems with two point boundary values, obtaining eigenfunction expansion by generalized Fourier method
21 p3846 A70-41949
- Steepest descent method for determining lowest ground state eigenvectors for molecular wave configurations
22 p4062 A70-42747
- Nesbet algorithm modified for iterative evaluation of eigenvalues and corresponding eigenvectors for large matrices
22 p4062 A70-42749
- Multidimensional correspondences between Helmholtz equation eigenfunctions and eigenvalues, including involutorial transformations
23 p4218 A70-44211
- Cantilever plate random vibration response, calculating eigenvectors and natural frequencies by finite element method
23 p4270 A70-44591
- Variational solution of eigenvalues and eigenfunctions of second boundary value problem of elasticity minimizing functional
24 p4424 A70-45629
- EINSTEIN EQUATIONS**
- Einstein equations for Bianchi type IX universe model suitable for numerical solution and application to cosmology with pure fluid stress tensor
01 p0142 A70-10522
- Conformally plane solutions to Einstein equations derived with energy momentum tensor characteristics of pulverized material representing gravitational fields
01 p0193 A70-11629
- Einstein equations for five dimensional spherically symmetric space solved using gravitational constant without singularities on Schwarzschild sphere
05 p0880 A70-15793
- Shear-free gravitational radiation described by Einstein equations, analyzing physical properties including energy, angular momentum, radiation flux and trapped surfaces
06 p1104 A70-17185
- Einstein field equations based on variational principle applied to stability of general self gravitating relativistic gaseous mass obeying specific equation of state
06 p1138 A70-17304
- Observation operators and cosmology, constructing equations for cosmological aggregates governed by Einstein field equations
06 p1105 A70-17529
- Lagrangian invariance transformation application to steady state solution for Einstein-Maxwell equations interpreted as external field of charged isolated rotating source
06 p1106 A70-17747
- Stationary solutions of Einstein-Maxwell equations constructed from Einstein-Maxwell or vacuum fields
06 p1106 A70-17748
- Einstein-Maxwell equations solutions relation to Robinson and Robinson metrics compared with Reissner-Nordstrom solution relation to Schwarzschild
07 p1333 A70-18961
- Cosmological solution of Einstein gravitational equations with singularity in time
07 p1381 A70-19361
- Hamiltonian methods applied to homogeneous cosmological models, obtaining Einstein equations, passing to quantum theory by imposing canonical commutation relations
07 p1336 A70-19921

- Singularity for absolute zero of time suggested for beginning of universe by Einstein relativity theory
07 p1336 A70-19922
- News function relation with far fields of sources obtained in linear approximation for axisymmetric case in integrating Einstein field equation
08 p1543 A70-20721
- Matter distribution and motion in conformally flat gravitational fields, analyzing Friedmann solution to Einstein equations
08 p1544 A70-20991
- Gravitational waves in general relativity theory, discussing Kaigorodov exact solution to Einstein equations
08 p1545 A70-20993
- Einstein gravitational equations general solution having physical singularity with respect to time
08 p1546 A70-21424
- Local uniqueness and instability theorem for Einstein-Liouville equations using energy inequalities, noting relevance to Cauchy problem
11 p2084 A70-26458
- Metric analyticity around each point of C cubed static vacuum space-time for Einstein equations
11 p2084 A70-26553
- Gravitational collapse of star and general relativity role, considering Schwarzschild solution to Einstein vacuum equations
12 p2298 A70-27058
- Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields
12 p2310 A70-28221
- Kerr-Schild space-time manifolds with electromagnetic field, solving Einstein equations
13 p2451 A70-29166
- Four dimensional Einstein space metric of signature 2 with N type Weyl tensor and nonintegrable rays
13 p2453 A70-29636
- Closed universe classical and quantum dynamics by ADM Hamiltonian treatment of Einstein equations for homogeneous cosmological models
13 p2495 A70-29812
- Dynamic spectrum of density fluctuations and galaxy clustering in Einstein universe, considering self gravitation of medium
14 p2652 A70-31389
- High velocity center to center collision of two absolutely elastic rods in acoustic medium in terms of Einstein nonclassical mechanics
15 p2775 A70-32890
- Uniform model universes containing gaseous matter and background blackbody radiation, solving Einstein equations without zero pressure assumption
18 p3313 A70-36215
- Schwarzschild exterior metric stability against perturbations from asymptotic behavior of Einstein field equations solution in Kruskal coordinates
18 p3291 A70-36650
- Insular system energy and momentum definition in external gravitational field, using dynamic equations and Einstein theory
19 p3513 A70-37412
- Variational principle application to relativistic MHD, deriving Einstein field equations, Maxwell equations and equations of motion for self gravitating charged fluid
19 p3478 A70-37591
- Einstein equations derivation in comoving reference frame for spatially homogeneous gravitational fields
20 p3710 A70-40096
- Time travel and cosmological model based on Einstein relativity theory, considering hypothetical motor design, energy supply, tachyons and four dimensional orbits implications
20 p3710 A70-40132
- Einstein equations solved for steady axisymmetric physical schemes by varying Kerr metric constants, considering electromagnetic field case
22 p4073 A70-42717
- Einstein gravitational equations solution for expanding universe, discussing possible sudden collapse into zero volume with infinite density
22 p4105 A70-43215
- Optical point characteristics of static spherically symmetric space-times of de Sitter universe, Einstein universe and exterior Schwarzschild field
23 p4239 A70-43821
- Einstein field equations for spatially homogeneous spaces, considering rotating matter model in regularized Euler-Lagrange form
23 p4219 A70-44406
- Newton and Einstein gravitation theories applied to light velocity in gravitational field
24 p4379 A70-45487
- Einstein equations internal solution other than Schwarzschild for case of central symmetry and static source
24 p4379 A70-45628
- Hermitian symmetry in Einstein unified field theory in terms of pseudotensor
24 p4380 A70-45819
- Mathematical model for ejection fraction of human left ventricle incorporated with fiber orientation and ventricular geometry, showing consistent results with biplane angiocardiographic films
03 p0433 A70-12975
- Aircraft life support systems and equipment evaluated in Vietnam combat environment, discussing combat ejection conditions, injuries cause and severity, fatalities, etc
05 p0806 A70-16298
- Materials jet-like ejection from metal surfaces under high density laser radiation action, investigating erosion and plasma spectrum
19 p3448 A70-38734
- In-flight escape systems and survival equipment reliability in U.S. Navy ejections
23 p4143 A70-44460
- EJECTION INJURIES**
Helmet loss and failure role in major and fatal head injuries of USAF ejections
01 p0032 A70-10370
- Fatal ejections in USN, suggesting initiation delay as prime causal factor
07 p1191 A70-19006
- Combat and noncombat ejection/extraion fatalities and major injuries to USAF crewmen
07 p1192 A70-19023
- Pathogenic mechanisms of fatal injuries during supersonic ejection determinable by radiography
09 p1627 A70-23114
- Vertebral injury prediction of seated human subjected to caudocephalad acceleration, suggesting consideration for head and torso forward flexion and external restraints effects
09 p1627 A70-23462
- Multiple emergency noncombat ejections by USAF aircraft pilots, investigating success rates on second ejection relation to injuries on first
13 p2359 A70-29444
- Combat and noncombat ejection/extraion fatalities and major injuries to USAF crewmen
17 p3039 A70-35576
- Long term effects of ejecting from aircraft, discussing disability incidence after more than ten years
17 p3033 A70-35577
- Spinal injury prediction during emergency ejection and crash impact protection research
23 p4153 A70-44489
- EJECTION SEATS**
Aircraft escape/rescue capability /AERCAB/ flying ejection seat design and test programs, noting rotary wing, fixed wing and parawing feasibility
01 p0035 A70-10714
- Aircraft seat ejection systems using SCID /small column insulated delay/ distribution system taking advantage of standard end devices
01 p0035 A70-10718
- Rocket catapult design, development and qualification for Advanced Concept Ejection Seat System /ACES/
06 p0987 A70-17724
- Advanced concept ejection seat /ACES/ system design and performance, considering gyro-controlled vernier rocket motor and electronic time delays
07 p1192 A70-19016
- Flying ejection seat providing capability for leaving hostile area before vertical descent by parachute, using Princeton Sailing and bypass fanjet
07 p1192 A70-19020
- Search and rescue /SAR/ concepts behind advanced Navy systems, emphasizing flying ejection seat /AERCAB/ for air to air self rescue
07 p1192 A70-19024
- AERCAB /Aircraft Escape/Rescue Capability/ flying ejection seat, considering rotary wings, fixed wings and parawings
21 p3751 A70-41806
- SIIS-3 ejection seat escape system design, considering minimum weight, cost and maximum performance
21 p3751 A70-41808
- Tractor rocket powered escape system of 600 knot extraction capability using drogue parachute and barometric time delay device
21 p3751 A70-41809
- Optimum drogue gun firing angle of stabilization times for MEW /Minimal Envelope and Weight/ ejection seat system, considering zero and high velocities
21 p3751 A70-41810
- Pilot airborne recovery device /PAR/ midair rescue system, discussing buoyancy, midair pickup, seat ejection energy absorber, homing avionics and human factors
21 p3752 A70-41812
- Modularized multiple use SIIS-3 ejection seat escape system, discussing weight, envelope and low cost
23 p4143 A70-44499
- EJECTION TRAINING**
Emergency ejection from lunar landing training vehicles, describing working sequence and experimental results on astronaut and test pilot
06 p1003 A70-17717
- Training simulation improving ejection decision making in naval aviation
23 p4178 A70-44467
- EJECTORS**
Exhaust gas ejectors for engine cooling, discussing ejector design, flow rates, fuel consumption, etc
06 p1129 A70-17144
- Coaxial fluid streams mixing within finite length tube based on dimensional analysis of aerodynamic noise generation, discussing subsonic and supersonic flows within ejector
13 p2474 A70-29080
- High secondary/primary mass ratio multinozzle jet pump /ejector/ operation feasibility
13 p2342 A70-29890
- Supersonic cylindrical ejectors without induced flow for rocket engine studies
16 p2837 A70-33763
- Underwater recovery requirements for flight data recorders, suggesting compressed air instead of explosive charges for ejection force
18 p3258 A70-36343
- Ejector maximum compression ratio calculation based on inlet nozzle gas flow model
21 p3746 A70-41767
- Two stream ejector type propelling nozzles for supersonic aircraft, investigating various configuration effects over range of secondary/primary air flow ratios
23 p4133 A70-44145
- VTOL aircraft ejector thrust augmentors, discussing configurations in wing root section
23 p4139 A70-44152
- EKKMAN LAYER**
U BOUNDARY LAYER TRANSITION
ELASTIC ANISOTROPY
Elastic interaction energy involved in Ti solution hardening by oxygen determined using anisotropic elasticity, presenting atomistic calculations and chemical bonds breaking role
05 p0862 A70-15906
- Stress-strain relations for elastic anisotropic crystal lattice systems derived in terms of orientation vectors and scalar moduli
05 p0932 A70-16135
- Crystal structure imperfections and elastic anisotropy of crystallites in condensed Ni films by X ray analysis
07 p1309 A70-19636
- Strength conditions for orthotropic Hooke law materials with complex elasticity, giving elastic potential boundary values in tensor form
12 p2325 A70-27560
- Nonlinearly elastic bodies under subcritical strain, analyzing boundary value problems for three dimensional stability
15 p2818 A70-32179
- Anisotropic elastic solids linear dynamic theory, discussing uniqueness theorem, reciprocal identity and far elastodynamic field quiescence
20 p3718 A70-39231
- ELASTIC BARS**
Elastic bending of pretwisted elliptical bars, showing stiffness response
02 p0387 A70-12216
- Elastoplastic bar stability compressed by tangential force, showing ductility effect on critical parameters, perturbed motion and stability loss process
04 p0767 A70-14484
- Dispersion curves for wave propagation in infinite elastic bars of elliptic cross section obtained by method of collocation
04 p0773 A70-15080
- Kacner method applied to longitudinal vibrations study of nonhomogeneous nonuniform bars, noting applicability to geometrical and elastic properties variations
04 p0779 A70-15702
- Shape optimization of elastic rod compressed by force directed toward point on undeformed rod axis, deriving optimal bending line
05 p0937 A70-16373
- Elastic bars self excited oscillations at audible frequencies, determining natural frequencies from analyzing sound
07 p1401 A70-18847
- Optimizing shape of elastic bar compressed by polar force obtained by determining functional extremum representing volume of bar at constant critical force
09 p1769 A70-22252
- Finite deflections of nonlinearly elastic cantilevered bar
11 p2140 A70-26481
- High velocity center to center collision of two absolutely elastic rods in acoustic medium in terms of Einstein nonclassical mechanics
15 p2775 A70-32890
- Infinite elastic beams system supported on two parameter elastic foundation solved by analogy to single beam lying on one-parameter elastic foundation
17 p3189 A70-35229
- Kinetic instability of elastic cantilever beam under excitation by rotating masses, relating bending and torsional vibrations to masses angular velocity
18 p3334 A70-35960

EJECTION

NT STELLAR MASS EJECTION

One dimensional magnetostrictive bar electromagnetically forced vibration, using Lagrange equations and normal mode analysis

19 p3472 A70-37959

Nonlinear stress-strain model of unloading in symmetric longitudinal impact of two elastic-plastic bars, using numerical method

19 p3541 A70-38046

Elastic beams optimal design for multipurpose loading, considering compliance and minimum cross section constraints

20 p3733 A70-40382

Stress-strain state of finite length elastic beam free of bending moments and coupled to semiinfinite plate

21 p3933 A70-40603

Elastic bar attached to free edge of infinite length cantilever plate, calculating free flexural vibration for comparison with experiment

22 p4114 A70-42648

Heavy homogeneous material free elastic rod dynamic stability under distributed scanning load, investigating plane transverse vibrations by differential equations

22 p4121 A70-43722

ELASTIC BENDING

Elastic bending of thin circular conical shell subject to arbitrary variation of edge loads

01 p0209 A70-11385

Attachment loads and beam bending moments design curves for linear and right angle fittings on honeycomb inserts to determine internal loading

02 p0386 A70-11949

Elastic bending of pretwisted elliptical bars, showing stiffness response

02 p0387 A70-12216

Bending strength analysis for high strength beam with thin and long fibers embedded in matrix of viscoelastic material noting maximum stress

03 p0584 A70-12934

Linear nonaxisymmetric bending of infinite plate coupled to elastic half space under concentrated loads using double Fourier transforms

04 p0766 A70-14480

Fiberglass reinforced rectilinear plastic plates bending under various edge loads, noting shear flexibility

05 p0934 A70-16220

Shape optimization of elastic rod compressed by force directed toward point on undeformed rod axis, deriving optimal bending line

05 p0937 A70-16373

Electric network models of nonhomogeneous differential equations applied to elastic beam and thin plate bending and displacement equations

06 p1094 A70-17927

Bending stress concentrations in elastic square plate with central hole under uniform load, using finite element solutions of modified Rayleigh-Ritz method

06 p1168 A70-17940

Effect of uniformly distributed circular holes in infinite double row on stress distribution in transversely bent strip, based on Kirchhoff bending theory

07 p1407 A70-19385

Stressed state of plate with reinforced circular hole under tension and bending using Airy stress functions

07 p1407 A70-19540

Nonuniqueness theorems for von Karman equations governing thin flat elastic plate deflections clamped at edges and subjected to normal and edge loading

09 p1768 A70-22063

Constant cross section beam bending and torsion with allowance for moment stresses, deriving differential equations for displacement functions

09 p1773 A70-22538

Transverse Dember effect in elastically bent Ge single crystal illuminated by light beam, considering EMF distribution and photocell application

09 p1740 A70-23191

Finite deflections of nonlinearly elastic cantilevered bar

11 p2140 A70-26481

Finite element solution procedures for inextensible beams elastica problem, using galerkin method for element stiffness matrices

11 p2143 A70-26640

Residual stress determination in flat strip elastoplastically deformed by finite bending

13 p2508 A70-28485

Elastic bending of perforated inhomogeneous plane with circular holes or inclusions

18 p3340 A70-36579

Elastoplastic flexure and critical loading of isotropic rectangular plates of constant and variable thickness, using Lagrange principle with numerical integration

22 p4115 A70-42810

Symmetrical bending of isotropic elastic half-strip with free longitudinal edges and end displacements, indicating use for plate and shell theory

22 p4118 A70-43568

Soviet bibliography on flexible plates covering elastic bending, elastoplastic state under transverse load and bending beyond elastic limit

22 p4119 A70-43710

ELASTIC BODIES

Book on nonlinear stress waves propagation in elastic solids covering adiabatic shocks, isentropic

plane waves, Lagrange equation, spherical waves, heat conduction effect, etc

01 p0202 A70-10966

Nonlinear vibrations in mechanical systems of elastic components having equivalent circuits represented by finite number of discrete masses interconnected by weightless infinite rod

01 p0143 A70-11027

Stresses in plane elastic bodies analyzed by generalizing biharmonic stress function equation in polar coordinates, assuming constant Poisson ratio and nonhomogeneity

01 p0206 A70-11152

Equations of motion, conservation of mass, momentum and energy for elastic bodies with lattice-type surface defects

01 p0209 A70-11400

Optimal dynamic design of system consisting of elastic cantilever rod with two concentrated masses subjected to harmonic vibrations under force at free end

02 p0384 A70-11739

Aerodynamic load distribution due to wind action on elastic structures, calculating various ratios between wind and critical divergence velocity

02 p0385 A70-11913

Viscoelastic boundary value problems involving time dependent boundary regions reduced to elastic problems, starting with aging viscoelastic body

02 p0388 A70-12269

Singular perturbation problem solution asymptotic expansions applied to linearized theory of elasticity equilibrium problem with stress couples

02 p0389 A70-12685

Integral equation solution in viscoelasticity theory based on creep tests with polymer containing elastic inclusion, improving convergence of approximations method

02 p0390 A70-12801

Mixed boundary value problem for viscoelastic body with constant Poisson ratio solved by variables separation method, proving convergence

02 p0390 A70-12802

Elastoplastic bodies stability under compression, using theory of small elastoplastic deformations and linearized equations of nonlinear elasticity theory

03 p0591 A70-13440

Natural oscillation frequencies lower bounds of orthotropic plates determined as coupled elastic systems

03 p0592 A70-13451

Energy requirement for nonconservative elastic system unperturbed state stability, using direct Liapunov method

03 p0594 A70-13502

Axisymmetric problem analysis for cylindrically anisotropic elastic bodies with restricted orthotropy based on Love-Lekhnitsky stress function generalization

03 p0601 A70-14327

Nonlinearity sources in elastic structures under large displacements, developing general matrix formulation

04 p0768 A70-14748

Nonlinear connected oscillations of vibrator and rigid bodies, analyzing plane-parallel and spatial motions, including elastic beams self excited oscillations

04 p0720 A70-15446

Forced torsional vibration of elastic stratum produced by rigid circular disk approximated by Fredholm equations

04 p0777 A70-15497

Plane Lamb problem in semiinfinite micropolar elastic body solved by transformation to one dimensional wave propagation problem in elastic half space

05 p0925 A70-15785

Surface wave spectrum and propagation in non-homogeneous bounded elastic solid, considering existence and eigenvalues approximation

05 p0925 A70-15789

Three dimensional analysis of nonhomogeneous elastic solids based on finite element method and equilibrium equations, discussing iterative solution

05 p0926 A70-15915

Nonsimple dynamic model of regular system of interacting deformable bodies, deriving motion equations for nonlocal and local model

05 p0928 A70-16023

Stress distributions in infinite elastic solids for shear loadings prescribed over coplanar circular regions, solving integral equations iteratively for coplanar penny-shaped cracks

05 p0928 A70-16057

Spread criterion and stress distribution near penny shaped crack in elastic solid under axisymmetric body forces distribution

05 p0930 A70-16079

Thermodynamics of elastic continuum with microstructure, modifying second law to include microtemperatures

05 p0930 A70-16083

Stress distribution in vicinity of stress-free Griffith crack in elastic solid acted upon by symmetric distribution of body forces

05 p0930 A70-16084

Plane circular crack in homogeneous and isotropic elastic body under uniform uniaxial tension using linearized couple-stress theory

05 p0931 A70-16089

Adhesive or frictionless compression /or extension/ under axial load of elastic rectangle between two identical elastic half spaces in condition of plane strain

05 p0931 A70-16132

Static deformation fields producible in isotropic homogeneous incompressible elastic body with uniform transverse stretch

05 p0931 A70-16134

Linear and nonlinear inelastic spherical inclusion in elastic and viscoelastic isotropic matrix with constant strain or stress fields at infinity

05 p0932 A70-16171

Mixed boundary value problems of isotropic elastic half space with ring shaped separation region

05 p0935 A70-16232

Natural frequencies upper and lower bounds of elastic clamped vibrating curved beams /arcs/ determined on basis of differential operator theory

05 p0937 A70-16405

Stress distribution in restrained hyperelastic sphere based on elastomer reinforcement theory by carbon black

05 p0940 A70-16510

Dynamic strength calculation for linear viscoelastic body and elastic-viscous liquid with retardation and relaxation times spectra respectively

05 p0940 A70-16511

Inherent stresses in elastic solid assuming inherent strain as stress source, integrating stress functions

06 p1160 A70-17131

Compatibility conditions of theory of micromorphic elastic solids using Riemann theorem

06 p1164 A70-17530

Dual model for describing brittleness and plasticity of solid elastic deformable body, formulating criteria for passage into inelastic state

06 p1166 A70-17656

Model for impact behavior of elastic body at elastic half space, measuring gas molecule impulse exchange at metal surfaces

06 p1171 A70-18260

Micropolar homogeneous and anisotropic elastic solids linear dynamic theory, deriving reciprocity and variational theorems

06 p1172 A70-18512

Equilibrium cracks in elastic bodies on basis of atomic interaction law, using Griffith problem to estimate bearing capacity

07 p1400 A70-18666

Prestrain effect on waves propagation along slender low density unoriented polyethylene rod, indicating uniform phase velocity change over audio frequency range

07 p1248 A70-19237

Isotropic elastic body occupying half plane assuming elasticity coefficients of certain class

07 p1407 A70-19376

Piecewise linear elastic material with jump-like nonhomogeneity, analyzing stress-strain relation

07 p1407 A70-19384

Three dimensional nonlinear viscoelastic body stability under triaxial compression, extending results obtained for elastic body

07 p1408 A70-19542

Quasi-steady propagation of Prandtl crack in viscoelastic body, noting stress distribution identity for viscoelastic and elastic cases

07 p1414 A70-20181

Point matching technique for plane elastic problems extended to axisymmetrically loaded elastic body of revolution, developing general computer program

07 p1416 A70-20303

Two dimensional wave front shapes induced in finitely strained elastic body by impulsive point body force, discussing normal and double inflection points

08 p1584 A70-20581

Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action

08 p1544 A70-20951

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

08 p1585 A70-20956

Elastic systems vibrations calculated with allowance for amplitude and frequency dependent energy dissipation using hysteresis loop contour expression

08 p1585 A70-20978

Optimal control conditions for elastic aircraft motion with delayed wing downwash determined by hyperbolic partial differential equations with delay

08 p1480 A70-21178

Amplitude-frequency characteristics of arbitrary elastic system performing flexural vibrations determined using computer

08 p1588 A70-21184

Thermomechanical coupling effect on stability of elastic continuous systems subjected to nonconservative forces, reducing flutter load by thermal damping

08 p1589 A70-21245

Electromagnetic fields interaction with nonconducting neutral elastic solid, formulating relativistic variational principle for balance laws and constitutive equations

08 p1545 A70-21252

Constitutive inequalities for isotropic elastic solids under finite strain generated by introducing concept of conjugate pairs of stress

08 p1590 A70-21351

Elastic post stability under longitudinal impact on rigid support, considering loading/unloading phases for calculating shock half wave length and critical rate

08 p1591 A70-21443

Astatic equilibrium in Saint Venant principle applied to surface of linear elastic body, discussing stress field produced by boundary loading

08 p1591 A70-21463

Transient waves propagation in homogeneous isotropic linearly elastic half space excited by traveling normal point load on surface, deriving displacements

[ASME PAPER 69-APMW-12] 08 p1592 A70-21468

Semiinfinite elastic strip supporting thin heavy beam using Airy stress function and Laplace transform, with boundary conditions expressed as Fourier series

08 p1594 A70-21768

Matrix theory of elastic locking structures, programming for analysis under given loads and dislocations

09 p1771 A70-22396

Variational principle application to stability in failure mechanics of arbitrary linearly elastic bodies, discussing inertia effect on steady state vibrations of cracked bodies

09 p1771 A70-22465

Boundary problem for displacement equilibrium equations of elastic body using iterative methods, demonstrating convergence of difference equation solution

09 p1771 A70-22467

Optimum control for shock absorber of elastic body solved by graph analytic method

09 p1727 A70-22535

Elastic body equilibrium forms bifurcation solution for uniform strain applied to cylindrical rod and shell under compressive strain

09 p1773 A70-22539

Two dimensional continuum of objectivity and isotropy principles applied to study of elastic tridimensional vault

09 p1777 A70-22899

Temperature fields and stress-strain state in elastic bodies with thin walled cylindrical shell inclusions during uniform heat flow at infinity

09 p1778 A70-23083

Thermal stress state of nonuniformly heated elastic body with bounding surfaces formed by parts of coordinate surfaces

09 p1778 A70-23087

Elastic beam stability, natural frequencies and critical forces under longitudinal impact with nonuniform compressing force

09 p1780 A70-23116

Flat rectangular elastic body stable oscillations with clamped base under compression loads, deriving difference scheme for approximation

09 p1782 A70-23297

Boundary value problem of torsion for equilibrium of elastic body based on moment theory in absence of bulk forces

09 p1782 A70-23381

Numerical solution of three dimensional equation of elastic body equilibrium in displacements, giving convergence rate of iteration processes

09 p1783 A70-23384

Hyperelastic bodies containing finite number of inclusions and defects analyzed by continuous dynamic model

10 p1954 A70-24014

Finite deflections theory applied to elastic-plastic arches, introducing coefficients depending on shape and degree of yielding of cross section

10 p1955 A70-24080

Material elasticity effects on librational motion of arbitrary shaped satellite

10 p1950 A70-24177

Angular motion of deformable earth satellite as solid-elastic system with distributed masses, applying automatic control transfer function

10 p1914 A70-24308

Elastic stress-strain states in spherical reservoir and thick walled tube during nuclear radiation induced phase transformations

10 p1894 A70-24513

Elastic shaft with central unbalanced disk, deriving equation of motion for rotation in flexible bearings

10 p1958 A70-24520

Free vibration analysis of elastic structures using Rayleigh-Ritz method and finite element methods

10 p1961 A70-25055

Contact stresses in elastic half plane with boundary connected to rod and moment applied at arbitrary point

10 p1965 A70-25324

Semiinfinite elastic body with instantaneous heat source on surface, analyzing temperature and thermal stress distributions

11 p2139 A70-26406

Stress concentration around elastic spheroidal inclusions in isotropic elastic body under shear

11 p2140 A70-26483

Circular elastic helix phase velocities determined by internal constraints method, comparing results with other theories

11 p2085 A70-26557

Elastic wedge under spatially uniform but time dependent shear tractions, studying shear stress and transient wave propagation

11 p2142 A70-26629

Elastic system stability with two degrees of freedom under action of retarded follower forces

11 p2142 A70-26631

Lumped linear model parameters determined from dynamic test data on mode shapes and frequencies for approximating distributed elastic structure

12 p2317 A70-27122

Reissner variational theorem applied to stress analysis of vertically accelerated end burning solid propellant grain in studying elastic rocket launch failure

12 p2313 A70-27196

Iteration solution for three dimensional equations of equilibrium of elastic body in boundary displacements, discussing convergence rate and computer applications

12 p2272 A70-27553

Elastic beam vibration under constant amplitude and varying frequency periodic forces during passage through resonance

12 p2326 A70-27798

Free elastic rotating beam with tip masses and inertia, developing solutions for flexible modes and natural frequencies of H-type configuration

12 p2273 A70-27820

Finite element method applications to finite axisymmetric deformations of incompressible elastic solids of revolution

13 p2510 A70-28734

Elastic stability of structural systems with generalized coordinates and independent loading parameters associated with critical point

13 p2511 A70-28739

Oscillatory perturbed motion of elastic body in general relativity space time, discussing energy tensor, unitary speed vector and density

13 p2451 A70-28954

Rigid solid replacement by elastic body in relativistic mechanics

13 p2451 A70-28955

Isotropic elastic three dimensional body steady stressed state under large subcritical triaxial strains described by solving linearized equations

13 p2515 A70-29316

Elastic anisotropic body analysis, formulating boundary value problem solutions

13 p2516 A70-29525

Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source

14 p2661 A70-31229

Stress and deformations three dimensional solution in semiinfinite elastic body with spherical cavity based on Boussinesq stress function

14 p2661 A70-31328

Elastic two cavity hyperboloid of revolution under stress due to rotating rigid stamp, solving torsional problem numerically

15 p2819 A70-32189

Boundary value problem of elastic isotropic material, obtaining pointwise bounds of Cosserat continuum, considering couple stresses and constrained rotation of particles

15 p2821 A70-32340

Elastic micropolar body thermal stresses induced by discontinuous temperature field, using differential equations of thermoelasticity

15 p2822 A70-32353

Deformation formulas for simply connected micropolar isotropic homogeneous centrosymmetric elastic body under external forces and heating

16 p2990 A70-33742

Flight vehicle dynamic response prediction from elastic filler stiffness contained between rigid sphere and ellipsoidal shell

16 p2991 A70-33878

Dynamic response of simply supported elastic bodies due to oscillating point mass executing longitudinal harmonic motion based on linear theory

16 p2993 A70-34092

Safety, microdamages and lifetime of elastic structures under random Poisson pulsed loads

16 p2996 A70-34328

Bond stress distribution in elastic solid with axisymmetrical inclusions under uniform tension, using three function and point matching techniques

17 p3184 A70-34911

Axisymmetric mixed boundary problem for elastic infinite cone, obtaining solution by assuming zero shearing stresses

17 p3192 A70-35698

Three dimensional mixed boundary value problems, obtaining solutions for elastic body differential equilibrium equations

17 p3192 A70-35699

Stress decay rates in Saint Venant boundary region in truncated semiinfinite elastic cone, using Papkovitch-Neuber functions for eigenfunctions formulation

18 p3339 A70-36489

Spinning body with rigid and elastic parts, using Liapunov direct method for attitude stability analysis

18 p3292 A70-36677

Acceleration wave propagation in materially uniform inhomogeneous isotropic elastic bodies, using tensor analysis

19 p3536 A70-37563

Torsional and longitudinal vibrations of cylindrical cylinders of micropolar elastic solids in terms of Laplace and Helmholtz equations solutions

19 p3537 A70-37789

Physically nonlinear elastic solid three dimensional and generalized plane strain problem, discussing application to composite materials

19 p3538 A70-37798

Edge dislocation and uniform and radial fissures in elastic isotropic nonhomogeneous bodies under two dimensional deformation

19 p3540 A70-37956

Continuous one dimensional nonconservative elastic systems under complex forces, examining stability theory

19 p3546 A70-38341

Elastic body with incompressible fluid filled cavities, studying motion and stability by deriving motion equations starting from principle of least action

20 p3672 A70-39376

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

20 p3719 A70-39379

Elastic bodies stability criteria, investigating loss under nonconservative forces influence

20 p3722 A70-39785

Elastic bodies static stability theory variational principles, introducing equilibrium equations and boundary conditions of initial state by Lagrange multipliers

20 p3724 A70-39857

Microstresses in plasticity theory, considering continuous elastic body model of crystal with dislocations

20 p3724 A70-39859

Elastic bodies collision, determining temperature field variations and contact pressure

20 p3725 A70-39869

Rotating elastic shafts rectangular shape stability under creep conditions, considering single mass rotor

20 p3727 A70-39883

Linear relations between stress state and Euler strain rate in isotropic elastic bodies during superposition of small deformation on finite strain

20 p3728 A70-39893

Elastic body steady forced oscillations under monoharmonic excitation, investigating hereditary nonlinearity effects on systems dynamic characteristics

20 p3733 A70-40395

Dynamic external boundary value problems for elastic body bounded by spherical surfaces

20 p3734 A70-40433

Elastic deformable satellite motion stability in central Newtonian force field

21 p3927 A70-40827

Linear elastic structure with few degrees of freedom, discussing parameters experimental determination

21 p3935 A70-41409

Anisotropic elastic solid body thermal stresses, investigating static plain strain problem in thermoelastic linear theory

21 p3936 A70-41414

Thermoelasticity theory for elastic material with different moduli in tension and compression, noting heteroresistance

21 p3937 A70-41428

Microlelastic solids theory achieved with application of internal constraints from postulate of principal coincidence

21 p3939 A70-42029

Constitutive equation for homogeneous and isotropic elastic solids

21 p3940 A70-42101

Elastic bodies under motion-dependent loads, examining thermodynamic conditions of equilibrium states stability

22 p4123 A70-42538

Load transfer to elastic fiber in infinite elastic matrix, determining fiber force distribution

22 p4113 A70-42539

Deformations with constant strain invariants for elastic bodies under surface traction

22 p4113 A70-42543

Hyperelastic bodies stability subject to conservative configuration dependent forces, formulating surface potential for hydrostatic loading

22 p4114 A70-42695

- Stability of elastic stretched ring on thin spherical shell under critical loads 23 p4268 A70-44318
- Elastic structure equilibrium state stability, discussing damping and stiffening effects 23 p4275 A70-44941
- Rumanian book on torsion in thin walled elastic structures of various cross sections covering calculation methods for box beams, cylindrical and conical shells, aircraft wings, etc 24 p4418 A70-45147
- Undamped elastic cantilever column with concentrated masses, considering transition from stability to divergence under nonconservative forces 24 p4421 A70-45286
- Natural frequencies of elastic bodies with variable properties, using external forcing function and continued fractions approximation 24 p4422 A70-45295
- Controllable states with prescribed heat flux for incompressible isotropic thermoelastic bodies with temperature dependent response functions 24 p4426 A70-46041
- ELASTIC BUCKLING**
- Buckling of orthotropic sandwich plates derived for sixth order governing differential equation by variational theorem 01 p0204 A70-11139
- Finite element method for postbuckling analysis of thin elastic plates, using iterative method to obtain equilibrium configurations 03 p0583 A70-12917
- Cylindrical shells buckling under biaxial compression and transverse loads, examining critical loads dependence on shell parameters, end conditions and elastic properties 03 p0590 A70-13380
- Visco-elastic column analysis based on mechanical model, investigating relationships between solid viscosities, loading velocities, initial deflections and dynamic buckling loads 03 p0596 A70-14146
- Buckling in one dimensional elastic media, discussing pendulum equations for Jacobi elliptic functions, critical loads determination, Timoshenko energy method, etc 03 p0597 A70-14227
- Elastic postbuckling behavior of axially stiffened and barreled cylindrical shells [ASME PAPER 69-APM-U] 04 p0769 A70-14866
- Continuum, harmonic and finite element perturbation studies of elastica to yield postbuckling path derivatives from nonlinear energy formulation 05 p0927 A70-16011
- Buckling equations for neutral equilibrium of arbitrary elastic shells specialized to uniformly loaded circular cylindrical shell with accuracy 05 p0929 A70-16064
- Closed form solutions describing nonlinear motions of incompressible fluid flowing in thin walled tube buckled by uniform external pressure 05 p0832 A70-16090
- Simply supported skew plates calculated for buckling loads by Rayleigh-Ritz method using double Fourier series 05 p0940 A70-16514
- Static buckling load for beam with pinned ends and Wiegardt-type elastic foundation, considering shear stresses effect 05 p0955 A70-17105
- Static stability criterion applicable to elastoplastic problems with/without nontrivial equilibrium states, noting effect on buckling loads 06 p1167 A70-17900
- Buckling behavior of elliptical cylinders under normal pressure using linear thin shell theory and Galerkin method, compared with test results [AIAA PAPER 70-105] 06 p1169 A70-18038
- Shallow spherical caps elastic buckling under uniform pressure, considering symmetric and asymmetric deformation modes 07 p1405 A70-19252
- Segmented elastic shells of revolution supported by rings, studying buckling and vibration by matrix method 07 p1405 A70-19257
- Elliptical cylinders buckling under normal pressure analyzed on polyvinyl chloride sheet models 07 p1406 A70-19304
- Horizontally curved I beams flanges elastic buckling, determining prebuckling flange stresses in longitudinal and radial directions 07 p1413 A70-20001
- Dynamic buckling of thin circular ring subjected to radially directed impulsive load, investigating in-plane and out-of-plane modes 08 p1596 A70-21978
- Buckling of elastic cylinders with rectangular cut-outs and reinforcements under axial or lateral loading, using modified Newton method [AIAA PAPER 69-92] 09 p1780 A70-23208
- Dynamic postbuckling response of thin elastic circular plates under axisymmetric time dependent radial thrust, discussing response to step loading 10 p1964 A70-25206
- Initial geometric imperfections effect on buckling and postbuckling behavior of laminated composite cylindrical shells under axial compression, considering reinforcing fiber orientations [AIAA PAPER 69-93] 11 p2135 A70-25986
- Elastic stability of discrete conservative structures under combined loads 11 p2142 A70-26636
- Elastic postbuckling and imperfection sensitivity of discrete structural systems using perturbation approach 11 p2143 A70-26668
- Axisymmetric imperfection distributions effect on buckling of circular cylindrical shells under axial compression, constructing test models from photoelastic liquid epoxy 12 p2319 A70-27140
- Axially stiffened and barreled cylindrical shells elastic postbuckling behavior, considering effects of stringer and load eccentricities 12 p2321 A70-27175
- Thin cylindrical shells elastic buckling under uniform axial compression, considering Kirchhoff-Love hypotheses in critical stress determinations 12 p2324 A70-27396
- Classical eigenvalue problem transformation by invariant imbedding into initial value problem suited for numerical integration, noting applications to columns elastic buckling 12 p2261 A70-27424
- Clamped shallow spherical cap elastic buckling and initial postbuckling behavior under uniformly distributed load over circular region centered at apex 12 p2326 A70-27814
- Buckling, postbuckling and limit analysis of symmetric elastic structure subjected to increasing loads 13 p2511 A70-28737
- Reticulated shell structure buckling using approximate equivalent shell and discrete analysis of individual beams 15 p2816 A70-32007
- Cylindrical shells under axial compression, using elastic stability analysis for critical loads prediction 15 p2822 A70-32512
- Monograph on optimal angles and section partition for buckling strength of twisted and displaced bent bars 16 p2988 A70-33300
- Buckling loads and postbuckling behavior of curved panels under axial compression, noting dependence on boundary conditions 17 p3188 A70-35225

ELASTIC DEFORMATION

NT ELASTIC BENDING
NT ELASTIC BUCKLING

Nonlinear stress relation in elastic media incompatible deformations, eliminating elastic distortions for known temperature distribution and thermal distortion 01 p2021 A70-10890

Elastic curve deformation of rod in equilibrium under end loads, using equations analogous to Kharlamov kinematic equations and Chaplygin solution 01 p0094 A70-11440

Kirchhoff kinematic analogy applied to solution of gyrostat motion, noting elastic rod deformation under torsion, using Kharlamov equations 01 p0094 A70-11441

Linear theory of second grade elastic materials for small deformations, discussing special case of couple stress 02 p0387 A70-11995

Lubrication problem for centrally pivoted tilting-pad sector thrust bearings with temperature and elasticity effects, noting iterative solution for coupled equations [ASME PAPER 68-LUB-4] 02 p0307 A70-12166

Elastic deformation of plates with circular holes, determining stress concentration factors for compressible and incompressible materials on digital computer 02 p0390 A70-12810

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load 03 p0589 A70-13336

Flexible cylindrical shell elastoplastic state determined by theory of small elastoplastic deformations, utilizing material incompressibility in plastic state 03 p0593 A70-13500

Deformability calculation of two phase composite solid materials through laminated structural models 03 p0602 A70-14337

Nonlinearity sources in elastic structures under large displacements, developing general matrix formulation 04 p0768 A70-14748

Energy balance relations for elastic material with different elastic moduli in two regions of deformation space 05 p0925 A70-15824

Nonlinear stress-strain laws and yield conditions derived for anisotropic materials on basis of one, two and three invariants 05 p0926 A70-15914

Stress factor-displacement relation in cruciform line crack deformation in elastic medium under arbitrary internal pressure 05 p0926 A70-15976

Dual trigonometric series solution for mixed boundary value problems in two dimensional elasticity 05 p0926 A70-15979

Perturbation effects on elastic material deformation due to nonorthogonality of curves defining curvilinear aeolotropic, with application to circular cylindrical tube 05 p0929 A70-16065

Viscoelastic behavior of styrene-butadiene rubber under finite uniaxial and equal biaxial deformations for nonisothermal case 05 p0929 A70-16068

Static deformation fields producible in isotropic homogeneous incompressible elastic body with uniform transverse stretch 05 p0931 A70-16134

Adhesive rocking and parallel translation contact for circular cylindrical punch indenting elastic half space solved using simultaneous equations 05 p0932 A70-16139

Static and dynamic solutions for isothermal deformation of elastic cylindrical and spherical Cosserat surfaces with holohedral isotropy 05 p0932 A70-16140

Static-geometric analogy of Kirchhoff-Love shell theory applied to Timoshenko complex equations allowing for transverse shear deformation 05 p0934 A70-16219

Displacement determination by orthogonality relationship for dynamic vibrations and stresses in composite elastic plates 05 p0937 A70-16406

Displacements and stresses obtained for elastic half plane with variable Poisson ratio under certain traction boundary conditions, using Fourier transform method 05 p0940 A70-16512

Simply supported beams large deflection analysis in bending under symmetrical pair of forces, based on integration of elastic line differential equation 05 p0941 A70-16521

Asymmetric deformation of shells of revolution with variable thickness solved by asymptotic method in form of higher Fourier series harmonics 05 p0945 A70-16853

Incremental stress distribution near circular crack with internal pressure in neo-Hookean solid under deformation due to triaxial compression, illustrating initial stress effect 05 p0956 A70-17108

Structural elements elastoplastic deformation regularities under repeated loadings, using adaptability theory 06 p1163 A70-17394

Unsteady interaction of compressible fluid and flat circular deforming elastic membrane analyzed by coupled computer program method [AIAA PAPER 70-75] 06 p1039 A70-18082

Elastic membranes deformation compressed by restraints using discrete dynamic programming 07 p1400 A70-18680

Elastic and plastic deformation zones stress-strain state under complex stresses, obtaining relation for stress and strain components 07 p1401 A70-18834

Numerical analysis of axisymmetric elastoplastic deformation of circular plates under combined lateral load and membrane force 07 p1402 A70-18977

Isotropic shells with shear deformations, investigating stress-strain relations in Cosserat continuum applied to plates [DFVLR-SONDDR-23] 07 p1404 A70-19233

Disturbances in infinite aeolotropic inhomogeneous medium due to transient forces and twists on elastic cylindrical source surface 07 p1407 A70-19382

Fundamental integral for small deformations superposed on finite triaxial extension of neo-Hookean elastic material 07 p1409 A70-19563

Abrasive wear of polymers subject to plastic and elastic deformation, considering papers, metal gauze and rough metal surfaces 07 p1296 A70-20003

Axisymmetric elastoplastic deformation theory for elastic cylindrical shell using Saint Venant yield condition, obtaining expressions for strain components, longitudinal deformation, etc 07 p1415 A70-20185

Stress relaxation in polytetrafluoroethylene (PTFE) at various compression deformations and temperatures, considering residual stresses degree 07 p1321 A70-20228

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form 08 p1585 A70-20956

Rotating parabolic mirror /antenna/ on multisupported suspension analyzed for static rigidity, determining elastic deformation under mirror weight 08 p1586 A70-21055

Rectangular thin plates in small deformation transient creep bending, using finite element method in iterative procedure 08 p1590 A70-21356

Nonorthotropic pinched plates deflections solution, demonstrating asymptotic convergence of small parameter method 09 p1769 A70-22151

Variable modular elasticity theory demonstrated for anisotropic body subjected to plane stressed state, deriving expression for potential energy of deformation 09 p1769 A70-22152

Boundary problem for displacement equilibrium equations of elastic body using iterative methods, demonstrating convergence of difference equation solution 09 p1771 A70-22467

Two dimensional Poiseuille flow stability at deformable walls, assuming pressure proportionality to displacement and rate 09 p1660 A70-22533

Irreversible processes thermodynamics during thermoelastic deformation of solid bodies, deriving thermodynamic potentials, state and coupled heat equations 09 p1777 A70-23077

Multilayer orthotropic conical shell cyclic deformation equation obtained in hypergeometric functions 09 p1777 A70-23079

Thermal stress concentrations at arbitrary holes for nonlinearly elastic materials, developing small deformation theory for two dimensional problem 09 p1779 A70-23093

Numerical solution of three dimensional equation of elastic body equilibrium in displacements, giving convergence rate of iteration processes 09 p1783 A70-23384

Nonlinear plane deformation of elastic medium with cylindrical cavity under uniform axial tension using successive approximations 09 p1784 A70-23591

Asymmetric deformation of spherical shell by solving homogeneous differential equation in spherical functions, assessing approximation error 09 p1786 A70-23719

Shear and cross sectional deformation of prismatic rectilinear rods with unicellular or multicellular thin walls, determining elastic behavior under arbitrary loads 10 p1955 A70-24055

Thin cylindrical shell stresses and displacements enclosed in elastic casing under pressure band using classical theory of Flugge and Love functions 11 p2128 A70-25336

Momentum theory of small elastic-plastic deformations, proving minimum potential energy, simple loading and elastic unloading theorems 11 p2128 A70-25387

Stress concentration in elastoplastic and creep deformations determined by approximate solution 11 p2134 A70-25845

Plane electromagnetic waves propagation in nonabsorbing photoelastic material with finite deformations, formulating theory from Eulerian and Lagrangian point of view 11 p2139 A70-26173

Elastodynamics mixed initial and boundary value problems numerical solution method applied to deformation of elastic solid 11 p2140 A70-26485

Nonlinear dynamic theory describing elastic Cosserat curves plane motion, developing linear displacement equations and dynamic stability concept 11 p2142 A70-26632

Deformation theory for small elastic-plastic strains in orthotropic material and discretization and iterative solution techniques 11 p2144 A70-26684

Large deflection analysis of elastic-plastic shells of revolution by computer program based on nonlinear theory and multisegment method of numerical integration 12 p2320 A70-27147

Transversely isotropic shells stability with respect to subcritical deformation under axial compression using three dimensional linearized equations, determining critical loads 12 p2324 A70-27529

Metallic cylindrical shells design reinforced with elastic glass fiber rings, considering elastoplastic deformation 12 p2324 A70-27530

Maximum impact force and central deflection time function of transversely struck beam, assuming no reflected elastic wave effects on stresses [DFVLR-SONDDR-48] 12 p2325 A70-27619

Residual stress determination in flat strip elastoplastically deformed by finite bending 13 p2508 A70-28485

Radial displacements in cylindrical circular shell by impinging spherical waves propagating in acoustic medium, deriving equations by Fourier and Laplace transforms 13 p2515 A70-29318

Filled elastomers elastic and anelastic behavior, investigating strain dependence 13 p2440 A70-29964

Buckling equations for thin nonlinearly elastic circular plates with affine initial deformation, considering Lure theory and variational principle for uniform compression load 14 p2657 A70-30714

Al alloy welded sheets strength and plasticity under biaxial tension, examining excess elastic energy effects on strain kinetics and rupture 14 p2597 A70-30967

Stress and deformations three dimensional solution in semiinfinite elastic body with spherical cavity based on Boussinesq stress function 14 p2661 A70-31328

Elastic membranes deformation compressed by restraints using discrete dynamic programming 15 p2813 A70-31472

Elastic body bounded by parallel planes, solving three dimensional equilibrium problem by eigenfunction expansion of nonself adjoint differential operator 15 p2814 A70-31593

Elastic half plane with crack perpendicular to free surface and under arbitrary pressure distribution, obtaining exact solution for stress and displacement fields 15 p2767 A70-31854

Mechanical and morphological characteristics of overload and fatigue in dog ulnas, showing elastic and plastic deformation zones 15 p2682 A70-31935

Thin two dimensional shells static linear elastic deformations analysis using difference based variational method 15 p2815 A70-32001

Thin elastic shell deformation, considering random imperfections in regions adjacent to contour 15 p2817 A70-32162

Axisymmetric elastoplastic deformation of compressible plate with arbitrary hardening under uniform load, solving in quadratures 15 p2817 A70-32167

Nonlinearly elastic bodies under subcritical strain, analyzing boundary value problems for three dimensional stability

15 p2818 A70-32179

Elastic equilibrium of unbounded body with central hole and concentric cracks under symmetric load

15 p2819 A70-32188

Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608]

15 p2821 A70-32319

Semiclamped strut supported rectangular plate deflection determined holographically, mechanically and analytically

15 p2740 A70-32331

Transverse vibration of thin circular elastic turbine disk of variable thickness rotating axially at constant angular velocity

16 p2916 A70-32994

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

16 p2988 A70-33251

Deformation formulas for simply connected micropolar isotropic homogeneous centrosymmetric elastic body under external forces and heating

16 p2990 A70-33742

Arterial wall nonlinear distensibility effects on blood flow velocity profiles, considering various mathematical and physical artery models

17 p3035 A70-34468

Elastic thin walled toroidal shell under internal pressure, investigating large deformation and stress behavior

17 p3184 A70-34910

Anisotropy and variable thickness effects on elastic stress distribution in rotating disks, discussing limiting cases

17 p3185 A70-34912

Imperfect solid deformation, presenting formalism for elastic theory nonlinear aspects of continuous distributions of dislocations and point defects

17 p3190 A70-35456

Perturbation method for finite elastodynamic deformation of nonlinear systems

17 p3191 A70-35590

Equilibrium theory of finite deformation of elastic solids, discussing applications and approximate solution methods

18 p3335 A70-35975

Elastoplastic deformations during explosive extrusion of pipes of different materials with linear strain hardening law

18 p3335 A70-36132

Spherical shell of variable thickness, calculating stress-strain state around reinforced circular hole during elastoplastic deformation

18 p3336 A70-36138

Forced vibration in Cartesian half space filled with elastic medium, investigating uniqueness conditions

18 p3337 A70-36289

Shell theory for shear deformations in covariant notation involving displacement power series expansion

18 p3337 A70-36371

Thermodynamical modeling by regular systems of deformable bodies bound by hyperelastic medium with internal degrees of freedom, formulating equations of motion

18 p3338 A70-36432

Elastic and plastic cylindrical shells, investigating dynamic buckling under impulsive loads

18 p3338 A70-36436

Axisymmetric structure with elastic contact, analyzing stresses by finite element method with differential displacements

18 p3339 A70-36496

Damped linearly tapered cantilever beam elastically restrained against rotation at wall, analyzing displacement under general initial and distributed load conditions

19 p3539 A70-37802

Composite bodies under plane deformations, determining stress dependence on elastic constants

19 p3455 A70-37952

Edge dislocation and uniform and radial fissures in elastic isotropic nonhomogeneous bodies under two dimensional deformation

19 p3540 A70-37956

Minimum weight thermoelastic design of sandwich beam for given deflection, using potential energy principle

19 p3541 A70-38044

Composite body with free surface under plane deformation, analyzing residual, thermal and dislocation stresses dependence on elastic constants

19 p3544 A70-38332

Quadrature solution for elastic sphere deformation by axisymmetric normal loads, writing Green function of boundary value problem in finite form

20 p3719 A70-39379

Elastoplastic deformation of thin circular plates under uniformly distributed transverse loads, using mixed type variational equation

20 p3721 A70-39776

Soviet papers on mechanics of solid deformed body covering elasticity and plasticity theories, shell stability, eigenvalue problems, etc

20 p3722 A70-39851

Axisymmetric deformation of cylinder based on solution of elasticity theory plane problem for rectangular strip

20 p3724 A70-39858

Anisotropic plasticity yield conditions, analyzing elastic to plastic deformation transition geometry

20 p3727 A70-39889

Linear relations between stress state and Euler strain rate in isotropic elastic bodies during superposition of small deformation on finite strain

20 p3728 A70-39893

Continuum mechanics application to elastic composite materials, investigating plane deformation of reinforced medium

20 p3730 A70-40038

Perforated infinite plate finite elastic deformation under biaxial tension, using successive approximation in connection with complex variable method of plane elasticity

21 p3932 A70-40551

Multilayer three dimensionally woven fiberglass-reinforced materials, measuring strength and deformation under tension, compression, bending, torsion and shear tests

21 p3841 A70-40646

Cantilever bending under gradual contact with cylindrical supporting surface compared with solution by elasticity theory

21 p3934 A70-41251

Elastic-plastic deformation analysis at finite strain by two component thermodynamic model

21 p3937 A70-41431

Elastic stability theory Cosserat surface subjected to conservative nongyroscopic surface and edge loading

21 p3939 A70-42027

Half plane with stress-free surface deformed by protrusions or notches, deriving edge force or screw dislocation by linear elastic analysis

21 p3939 A70-42028

Microelastic solids theory achieved with application of internal constraints from postulate of principal coincidence

21 p3939 A70-42029

Deformations with constant strain invariants for elastic bodies under surface traction

22 p4113 A70-42543

High speed camera rotating mirror dynamic surface deformations, discussing reflected waves, astigmatism, gas turbulence and pressure effects

22 p4033 A70-43043

[SMPTE PREPRINT 34] Elastic bending, vibration and buckling of simply supported thick orthotropic rectangular plates and laminates

22 p4116 A70-43205

Stress fields of screw and edge dislocations in linearly elastic isotropic Cosserat continuum using stress functions

23 p4266 A70-44022

Nonlinear elasticity theory, deriving geometrical relations applicable to small deformation tensor components

23 p4267 A70-44167

Elastic body bounded by parallel planes, solving three dimensional equilibrium problem by eigenfunction expansion of nonself adjoint differential operator

23 p4268 A70-44286

Nonlinear elasticity equations in displacements by Green and Hencky deformation tensors, discussing stress-strain of body with spherical cavity

23 p4268 A70-44287

Linear viscoelastic solid quasi-static deformation, deducing associated minimum principles under assumption of unique solutions existence for boundary value problems

24 p4420 A70-45264

Thick isotropic rectangular laminates free vibration and buckling, applying three dimensional linear small deformation theory of elasticity

24 p4422 A70-45296

Inhomogeneous anisotropic elastic plates large deflection, using asymptotic integration of nonlinear elasticity equations to obtain successive field equations systems

24 p4423 A70-45580

Crystal elastic dislocations general solution, deriving stress function for stress and displacement fields in bipolar coordinates

24 p4426 A70-46018

ELASTIC MEDIA

Nonlinear stress relation in elastic media incompatible deformations, eliminating elastic distortions for known temperature distribution and thermal distortion

01 p0201 A70-10890

Nonlinear stress-strain equations for incompressible hyperelastic media developed for undeformed and deformed continuum states

01 p0201 A70-10892

Elastic support effect on bending of clamped circular, elliptical, rectangular and skewed plates, using variational method and small perturbation technique

01 p0205 A70-11144

Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium

01 p0208 A70-11185

Linear theory of second grade elastic materials for small deformations, discussing special case of couple stress

02 p0387 A70-11995

Self consistent field method to calculate effective dynamic characteristics of elastic media with filler for plane longitudinal wave propagation

02 p0388 A70-12485

Mixed anisotropic linear elastic solids stability with internal friction due to mechanical interaction, considering asymptotic motion stability

03 p0586 A70-13116

Buckling in one dimensional elastic media, discussing pendulum equations for Jacobi elliptic functions, critical loads determination, Timoshenko energy method, etc

03 p0597 A70-14227

Elastoplastic media revised mathematical model with allowance for cumulative damages effect on elastoplastic property under variable loads

04 p0775 A70-15199

Energy balance relations for elastic material with different elastic moduli in two regions of deformation space

05 p0925 A70-15824

Nonlinear theory of elastic dielectrics with polarization gradients, obtaining jump conditions and field and constitutive equations by variational principle

05 p0882 A70-16092

Constitutive equations for isotropic elastic and thermoelastic materials with microstructure derived using free energy function, giving uniqueness theorems

05 p0932 A70-16136

Time-varying loads effect on linear elastically hereditary media described by generalized fractional-order exponential functions and Rzhantitsyn type viscoelastic kernels

05 p0946 A70-16954

Support moment of beam with ends embedded in elastic medium subject to creep, noting dependence on load

05 p0947 A70-17010

Uniqueness and reciprocity theorems in elastic medium occupying infinite domain extended to electromagnetic wave propagation in plasma

05 p0890 A70-17097

Boundary value problems in nonlocal elasticity, considering two one dimensional media coupling with microstructure by Green function analog

07 p1399 A70-18665

Flexural vibrations of rotor resting on nonlinear elastic bearings under action of exciting forces harmonics using variational method based on Hamilton principle

07 p1403 A70-19112

Fundamental integral for small deformations superposed on finite triaxial extension of neo-Hookean elastic material

07 p1409 A70-19563

Torsion of elastic half space containing circular crack with symmetry axis coinciding with annular stamp rigidly coupled to half space

07 p1414 A70-20183

Integration of Saint Venant equations of deformation continuity for region occupied by elastic medium

08 p1587 A70-21166

Elastic equilibrium of semiinfinite two dimensional medium with Griffith crack under axisymmetric load and free and rigidly clamped edges

08 p1594 A70-21771

Reissner-Sagoci transient mixed boundary value problem concerning displacement of infinite half space of isotropic elastic material, deriving surface displacement and reactive torque

09 p1784 A70-23571

Cylindrically isotropic elastic medium statics, deriving general solutions to Lamé equations

09 p1784 A70-23593

Mixed thermoelastic problem in elastic layer with arbitrarily prescribed temperature in upper free surface

10 p1954 A70-23878

Wave propagation in bounded homogeneous elastic anisotropic media solved as sum of eigenvalue and static problems without transform calculus

10 p1915 A70-24058

Longitudinal shock wave oblique reflection in nonlinear harmonic elastic material in terms of wave propagation

10 p1956 A70-24097

Interfacial tractions between matrix and fiber in elastic composite materials reinforced with elastic fibers

12 p2322 A70-27230

Stress concentration coefficients in multiply connected plates and bulky elements made of nonlinearly elastic materials

12 p2323 A70-27336

Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading

12 p2328 A70-28200

Uniqueness theorem in Mindlin theory of elastic materials with microstructure

13 p2508 A70-28488

Supersonic rigid cone motion in elastic medium, obtaining partial solutions to motion equation yielding boundary problem solution

13 p2341 A70-29508

Time harmonic waves propagation in elastic half-space with submerged cylindrical cavity, assuming linear plane strain conditions

13 p2518 A70-30010

Unloading shock waves propagation in elastoplastic medium, investigating strain hardening effect on shock strength decay, residual strains and radial stresses

15 p2815 A70-32002

Circular cylindrical cavity in elastic space, calculating stresses due to incident plane harmonic compression wave

15 p2819 A70-32204

Induced strain plane state in elastic micropolar medium by temperature effect, discussing thermoelastic problem stress functions

15 p2821 A70-32341

Riemann-Hilbert problem for discontinuous coefficient solving mixed boundary value problems in infinite elastic strip, discussing shear stress along whole boundary

15 p2822 A70-32355

Stress wave propagation in solid infinite elastic medium and laminated materials

15 p2823 A70-32784

Stress wave generation in elastic temperature-dependent absorbing solids by impulsive EM radiation

17 p3185 A70-34967

Parallel edge dislocations in elastically isotropic crystals, discussing climb and glide forces

17 p3126 A70-35454

Stationarity of complementary energy in nonlinear elasticity theory, using Piola stress tensor representation for isotropic elastic media

17 p3192 A70-35692

Plane strain and stress produced in elastic micropolar medium by action of temperature

18 p3338 A70-36429

Symmetric functions of second rank tensors with syngonies in elastic anisotropic media

18 p3340 A70-36576

Elastic materials consisting of particles with rotary inertia, long range force and dipole interactions, deriving constitutive relations

19 p3538 A70-37794

Wave propagation in linear elastic surfaces, calculating wave speeds, shapes and strength decay

19 p3473 A70-38943

Sound velocity in isotropic nonlinear elastic Cosserat continuum with constrained particle rotation, analyzing uniaxial and hydrostatic compression

20 p3734 A70-40434

Brittle elastic material with wedge shaped void, calculating shear stresses during crack propagation generated by horizontally polarized shear wave

21 p3932 A70-40547

External field perturbations by local inhomogeneities in elastic medium, deriving expressions for interaction energy and forces between defects

21 p3933 A70-40604

Sommerfeld type radiation conditions for linear homogeneous isotropic elastic materials with microstructure, discussing field equations, displacement and rotation vector and scalar conditions

21 p3936 A70-41417

Circular cylindrical hole in uniaxial tension field of elastic media, solving plane strain problem for stress concentration factors

21 p3941 A70-42107

Rigid circular cylindrical inclusion elastic bedding dynamic loading, calculating stresses in interface

22 p4112 A70-42345

Finite difference method for stress wave propagation and multiple reflection in elastic bar with discontinuities

22 p4115 A70-42744

Arbitrary form acceleration waves growth equation in deformed hyperelastic material, discussing growth and decay criteria

22 p4115 A70-42940

Spherically cut space elastic properties, determining normal and tangential stresses for uniform axisymmetric edge loading

22 p4117 A70-43324

Spatial problem of elastic spherical transversal isotropic medium solved by reducing Lamé equations

22 p4118 A70-43481

Three dimensional elasticity for figures close to ellipsoid of revolution with displacements on boundary

23 p4266 A70-43988

Finite amplitude longitudinal shock waves in nonlinear hyperelastic materials, deriving solutions for various shock types in accordance with second law of thermodynamics and Lax stability criterion

24 p4420 A70-45265

Polar elastic materials constitutive relations for thermoelastic couple stresses by general theory of in-

compatible strains, obtaining linearization for isotropic materials

24 p4428 A70-45578

Two incompressible isotropic nonlinear elastic solids mixture, investigating entropy production inequality effects

24 p4425 A70-45991

Elastic-viscoplastic bar quasi-static torsion problem, using approximate method for time dependent torsion function

24 p4425 A70-45993

Semiinfinite elastic medium under variable dynamic pressure on boundary, investigating couple stresses effect on stress distribution

24 p4426 A70-46006

ELASTIC MODULUS U MODULUS OF ELASTICITY

ELASTIC PLATES

Out-of-plane displacement restraint at thin photoelastic plates bonded to rigid boundaries of inclusions inducing transverse stress components causing plane stress solution deviation

01 p0202 A70-11059

Flexural and longitudinal waves propagation in infinite elastic plate, using solutions to approximate nonlinear equations of plate motion

01 p0213 A70-11634

Finite element method for postbuckling analysis of thin elastic plates, using iterative method to obtain equilibrium configurations

03 p0583 A70-12917

Momentless design of composite plate and shell structures with variable elastic constants based on loading and shape requirements

03 p0586 A70-13112

Plane elasticity solution for differential expansion stresses on interface of laminated elastic rectangular strip

03 p0586 A70-13114

Thin elastic cylindrical panel motion induced by plane acoustic shock wave analyzed by integrating nonlinear motion equations using finite difference scheme

03 p0524 A70-13377

Elliptic system of twelfth order equations describing elastic equilibrium of plate with kinematic functions analyzed by integration procedure

03 p0600 A70-14306

Thin elastic plate oscillations plane two dimensional steady state problem assuming constant thickness, finite dimension and moving load

04 p0766 A70-14420

R function method for solving plate bending problem by satisfying differential equations coordinates

04 p0767 A70-14489

Transient processes of strain wave propagation in elastic shells and plates under time varying loads

04 p0773 A70-15010

Steady temperature field and stressed state of elastic plane containing heat resistant arc shaped cracks produced by uniform thermal flux

05 p0935 A70-16231

Displacement determination by orthogonality relationship for dynamic vibrations and stresses in composite elastic plates

05 p0937 A70-16406

Unsteady interaction of compressible fluid and flat circular deforming elastic membrane analyzed by coupled computer program method

[AIAA PAPER 70-75]

06 p1039 A70-18082

Contact stresses between elastic half planes and elastic cover plates determined by integrodifferential equation with Hilbert kernel

07 p1400 A70-18667

Boundary value problems solution for infinite elastic isotropic plane weakened by arbitrarily distributed circular holes based on using series in Taylor functions

07 p1408 A70-19549

Plane anisotropic elastic bodies stress determination using Somigliana type integral formula to relate elastic displacement field to boundary traction and displacement vectors

07 p1412 A70-19953

Shear wave and plate velocity expressions derived for orthotropic elastic plate with shear coupling, considering propagation direction

07 p1412 A70-19961

Stress-strain state of flexible circular plates as function of thickness distribution using finite difference theory

08 p1583 A70-20529

Stress concentration in elastic plate reinforced at edge by straight rib analyzed in finite form by Cauchy integrals and Fourier transforms

08 p1594 A70-21635

Limiting equilibrium of unbounded cracked elastic plate with circular hole, studying crack propagation under compression

09 p1769 A70-22121

Transition of stress distribution on collision surface of semiinfinite elastic plane with rigid beam, using Fredholm integral equation

10 p1954 A70-23950

Stress intensity and strain energy of pressurized line crack in cross form in thin elastic plate solved by Wiener-Hopf technique

10 p1956 A70-24192

Energy dissipation in free oscillations of multilayer shells consisting of alternating rigid elastic layers and soft fillers, deriving equations of motion

10 p1956 A70-24249

Thin elastic plates and shells parametric resonance amplitudes by solving nonlinear differential equations, considering dynamic stability

11 p2129 A70-25523

Plane tension in elastic infinite strip covered by elastic plate, considering applicability to strain measurement errors calculation

11 p2129 A70-25565

Elastic bending of clamped and supported elliptic and parabolic plates under external pressure investigated by lines of equal deflection

11 p2133 A70-25839

Vibration of thin elastic plates under random driving forces simulated digitally, using power residue method for pseudorandom number generation

11 p2139 A70-26277

Stress tensor and displacement vector in thin elastic shells/plates derived from three dimensional nonlinear equations using asymptotic integration

11 p2142 A70-26634

Extensional waves asymptotic nature and stress distributions in infinite elastic plate of finite thickness under axisymmetric and in-plate disturbances using perturbation

11 p2145 A70-26696

Kane-Mindlin equations and frequency spectra determined for free extensional vibrations in isotropic elastic plate strips

11 p2146 A70-26703

Anisotropy effect on stress distribution at crack apex in elastic plate

12 p2329 A70-28322

Stress analysis of infinite elastic plate containing elastic rectangular inclusion subjected to uniform stress field

13 p2508 A70-28486

Elastic isotropic circular perforated plate stress-strain state, proving quasi-regularity of infinite linear algebraic equations

13 p2515 A70-29317

Plane stress state equations for micropolar elastic plates using complex potentials

13 p2517 A70-29629

Elastic waves propagation in finite thickness elastic plate under transient load, assuming material behavior in conformity with nonlinear Hooke's law

15 p2814 A70-31544

Elastic body bounded by parallel planes, solving three dimensional equilibrium problem by eigenfunction expansion of nonself adjoint differential operator

15 p2814 A70-31593

Magnetic field effect on critical flutter speed and frequency of elastic plate in ionized gas flow, deriving dispersion equation

15 p2818 A70-32173

Infinite elastic plate with beam reinforced circular insert, using classical plate theory and Euler-Bernoulli hypothesis for beams

16 p2990 A70-33679

Wave propagation in infinite elastic plate in contact with inviscid incompressible liquid layer, deriving dispersion relation

16 p2993 A70-34094

Transversely isotropic elastic plates vibrations without initial specification of field variables spatial dependence on thickness coordinate by two dimensional asymptotic theory

16 p2994 A70-34232

Elastic plate vibration with damping under random load, calculating linear response by harmonic analysis

18 p3334 A70-35958

Elastic layer with circular cylindrical cavity under axial tension /Kirsch problem/, determining stress concentration from boundary value problem

18 p3335 A70-36130

Plane nonconducting elastic plate with one side impinged upon by supersonic conducting gas flow, determining magnetic field effect on flutter vibrations

18 p3336 A70-36135

Nonlinearly elastic plate with hole of general shape, determining stress concentration

18 p3336 A70-36139

Optimal design of elastic sandwich, solid beam and plate structures under dynamic harmonically varying loads

18 p3336 A70-36220

Curvilinear crack propagation in elastic plane under balanced loads, using singular integral equations

18 p3341 A70-36584

Infinite elastic plates traveling wave flutter in compressible flow, investigating viscous damping effects on critical flow velocity

18 p3343 A70-36701

Deflection behavior of uniformly loaded elliptical elastic plates on elastic foundation, using small parameter perturbation technique

18 p3343 A70-36713

Thickness determination of external elastic plates in freely supported three layer structures of uniform strength under perpendicular loads

18 p3343 A70-36717

Stress concentrations in edge-bonded elastic quarter planes with normal and shear loading at boundary

19 p3535 A70-37384

Nodal patterns on thin elastic circular plate vibrating in flexure, considering natural and compounded modes

19 p3543 A70-38245

Elastic panel nonlinear free vibrations, analyzing small amplitude phenomena

20 p3672 A70-39493

Infinite elastic plate with pair of insulated unequal circular holes, calculating thermal stresses

20 p3720 A70-39672

Anticlastic bending analysis of long narrow plates oscillations and stability based on elastic plates nonlinear theory

20 p3721 A70-39779

Compressive force on elastic plate of arbitrary shape related to number of equilibrium forms, using Karman equations

20 p3724 A70-39861

Thin plane bars elasticity theory, constructing integrals of equations by asymptotic series expansion

20 p3726 A70-39881

Elastic and viscoelastic plates, calculating stress concentration and separation of embedded smooth circular inclusion under uniaxial tension

21 p3932 A70-40548

Elastic plate response to boundary layer pressure fluctuations, estimating vibration modes dependence on fluctuation convection velocity and response magnification as function of flow direction

22 p4007 A70-42283

Elastic plate uniform extension with rectangular crack by three dimensional bending theory, using variational principle

22 p4115 A70-42941

Elastic plane equilibrium with thin walled flexible rectangular finite inclusion under symmetrical concentrated load, including computer calculated tangential stresses

22 p4118 A70-43569

Soviet bibliography on flexible plates covering elastic bending, elastoplastic state under transverse load and bending beyond elastic limit

22 p4119 A70-43710

Flexural vibrations of clamped circular plate with nonlinear elasticity for small strains and displacements, using variational principle

22 p4120 A70-43719

Rigid and elastic rectangular plates vibration under uniformly distributed dynamic load, investigating bending behavior by Galerkin method

23 p4268 A70-44170

Elastic body bounded by parallel planes, solving three dimensional equilibrium problem by eigenfunction expansion of nonself adjoint differential operator

23 p4268 A70-44286

Elastic orthotropic plates vibration analysis by finite strip method via eigenvalue matrix, obtaining natural frequencies and modal vectors by small computer

24 p4423 A70-45579

Fourier transform applied to Riemann boundary value solution to biharmonic equation governing elastic theory for half plane with circular protrusion or indentation

01 p0199 A70-10155

Polycrystalline rocks elastic constant and nonelastic behavior, discussing Voigt, Reuss and Hill averaging methods

01 p0071 A70-10446

Elastic properties of thin curved cylindrical panels with constant mechanical properties subjected to thermal expansion and single face pressure

01 p0201 A70-10943

Boundary value problems of elasticity theory in space perforated by cylindrical cavities with parallel axes solved by infinite algebraic equations

01 p0202 A70-11033

Axially compressed cylindrical shells with edge constraints, determining critical load from inelastic behavior considerations

01 p0205 A70-11141

Potential representation of vector fields effecting decoupling of vector wave equation of elasticity for radially heterogeneous isotropic media

01 p0208 A70-11189

Left ventricular muscle time varying elastic properties, using dynamic model and Fourier series representations

01 p0040 A70-11371

Aortic distensibility and instantaneous left ventricular volume estimation in living man based on elastic reservoir theory and circulatory system model

01 p0040 A70-11372

Bauschinger effects in repeated tensile and compressive strains in inelastic media under variable temperatures as function of load vector, using plastic yield

01 p0211 A70-11422

Thin anisotropic elliptical plate elastic equilibrium weakened by hole and under concentrated loads

01 p0211 A70-11445

Stressed state of isotropic nonlinear multiply connected media with large deformations, using nonlinear elasticity theory

01 p0212 A70-11446

Two asymptotic dimensional moment theory of elasticity, analyzing stress concentration at curvilinear holes and fluctuating boundary loads

01 p0212 A70-11563

Error estimates of stress concentration at free hole determined by two dimensional elasticity theory of thick plates

01 p0212 A70-11564

Time independent kernel integral equations in dynamic contact problems of elasticity and mathematical physics

01 p0146 A70-11571

Variational principle for admissible functions particular solution in elasticity theory involving solid bodies with cracks

01 p0212 A70-11608

Elastic couplings applied as sliding contact-free continuous junction between permanently rotating and fixed parts in rotating coil magnetometer

02 p0298 A70-12214

Elasticity theory equilibrium equations derivation using distribution theory

02 p0388 A70-12270

Oxides and silicates universal equations of state based on experimental data including elastic properties, density, mean atomic weight relations and geophysics interpretations

02 p0294 A70-12778

Axisymmetric elasticity theory problem of stressed state of space weakened by concentric circular cracks solved using p-analytic functions to generate boundary value problems

03 p0586 A70-13077

Cauchy integrals extension to axisymmetric elasticity problems, obtaining numerical results for stressed circularly symmetrical state of hollow cylinder under uniform load

03 p0586 A70-13080

Axial and traction loaded boron epoxy laminates tensile and compressive elastic properties and strengths compared from test data including strain gauge measurements

03 p0586 A70-13115

Constitutive equations for orthotropic bilinear elastic materials in plane stress case, discussing unidirectional composites

03 p0587 A70-13127

Rigid and flexible pavements response to jumbo jets load using elastic theory

03 p0462 A70-13175

Elasticity theory contact type problems, proving solutions existence and uniqueness

03 p0589 A70-13346

Spherical shell elasticity having circular hole at apex using asymptotic method, calculating stress concentration at hole

03 p0590 A70-13381

Static contact mixed boundary value problems in elasticity theory, noting limitations

03 p0590 A70-13383

Approximate method of boundary perturbation to solve elasticity and viscoelasticity problems for non-canonical bodies of revolution applied to stress concentration at ellipsoidal cavity

03 p0591 A70-13439

Stress-strain state of body of revolution having transversely isotropic elastic properties, using perturbation technique

03 p0591 A70-13441

Elastic sensor for measuring linear displacements using fine crossed filaments and torsion principle

03 p0485 A70-13482

Variational principles in linear elasticity theory with couple stresses, solving boundary value problems in Mindlin theory with microstructure and first strain gradient theory

03 p0596 A70-13974

Three dimensional elasticity theory of generalized continua developed from atomic lattice theory model, discussing frequency spectra, specific heat and applications to crystal defects

03 p0525 A70-14232

Singular integral equation applied to elasticity theory of composite beam with or without cavity under torsion

04 p0765 A70-14416

Elastic equilibrium of quasi-completely regular rectangular parallelepiped with rigidly clamped lateral faces, obtaining Lamé equations in double Fourier series

04 p0765 A70-14418

HF expansions of harmonic solutions concentrated at waves propagating in inhomogeneous medium to dynamic equations in elasticity theory

04 p0767 A70-14499

Astatic equilibrium loadings in Saint Venant principle for linear elasticity, analyzing physical distinction from self equilibrated loadings to explain smaller long range stresses

[ASME PAPER 69-APM-L]

04 p0769 A70-14860

Spherical shells axisymmetric equilibrium properties under uniformly distributed external compression

04 p0773 A70-15008

Plane static boundary value problems solutions in zero moment elasticity theory, proving solutions existence and uniqueness

04 p0775 A70-15214

Soviet book on three dimensional boundary value problems in mathematical theory of elasticity and thermoelasticity

04 p0777 A70-15474

Shear testing and data reduction based on torsion analysis to obtain elastic shear constants of thin orthotropic Be sheets

04 p0664 A70-15552

Gravity influence on constitutive equations of elasticity for crystals treated as continuous body and particle system, taking into account lattice structure

05 p0925 A70-15869

Stress concentration effects around spherical cavity under uniaxial tension calculated by constitutive equations of micropolar elasticity

05 p0927 A70-15994

Axisymmetric elasticity problem for straight fiber imbedded into infinite matrix, noting homogeneous temperature changes causing residual stresses, tractions at infinity and fiber pulling

05 p0931 A70-16088

Mixed boundary value problems of plane elasticity, solving stress field of central Griffith crack in wedge using singular integral equations

05 p0932 A70-16173

Eigenvalues upper and lower bounds of vibrating anisotropic material with multiple elastic constants, predicting free vibration frequencies by bounding isotropic moduli

05 p0937 A70-16408

Finite element method for large displacement elastic-plastic analysis of plates and shells, using geometric stiffness matrices and stress-strain relationships

05 p0943 A70-16809

X ray elastic constants measured in cementite phase in high carbon tool steel following plastic deformation at tension, noting residual stresses increase and balance

06 p1084 A70-17126

Compatibility conditions of theory of micromorphic elastic solids using Riemann theorem

06 p1164 A70-17530

Turbine machine elements approximation by difference equations of axisymmetrical elasticity theory problem

06 p1167 A70-17663

Thin circular cylindrical shells elastic equilibrium under loads producing deflection, elongation or contraction described by integrating equilibrium equations with constant coefficient

06 p1172 A70-18566

Plane elasticity problem for Cosserat medium rectangular region with parallel boundaries free of force and moment stresses solved by Airy and Mindlin stress functions

07 p1400 A70-18668

Elastic behavior of joint formed by normally intersecting circular cylindrical shells under external bending moment, noting applicability to pipelines and pressure vessels

[ASME PAPER 68-WA/PVP-1]

07 p1400 A70-18710

Soviet monograph on theory and calculations of impact systems covering solid body collisions, elasticity, wave mechanics and nonflat rod applications

07 p1400 A70-18732

Aircraft engine vibrational overload reducible by elastic bearings having controllable elastic characteristics

07 p1364 A70-19113

Critical slope load calculation for circular elastic embedded and supported arcs under radial and variable force

07 p1404 A70-19136

Shell elastic constants for multilayered sandwich cylinders using Donnell approximation

07 p1406 A70-19326

Inelastic behavior of solids strained at high temperature emphasizing hot creep phenomena in aviation materials

07 p1406 A70-19346

Flexural elastic behavior of rectangular plates with boundary restraint acting on same side using finite differences method

07 p1406 A70-19348

Finite element method applied to two dimensional variational first order problems in plane elasticity of triangular or rectangular elements

07 p1409 A70-19562

Toupin and Knowles elasticity theory applied to spatial decay estimate for parabolic heat equation used in diffusive temperature field

07 p1409 A70-19565

Singular part of half plane stress field solution using Cosserat elasticity theory

07 p1409 A70-19570

Rectangular bidirectional composites and sandwich plates three dimensional elasticity solutions

07 p1412 A70-19952

Elastic and optical properties anisotropy in fiberglass reinforced epoxy plates using photoelastic method

07 p1416 A70-20295

Natural oscillations of three dimensional bundle of parallel strapped rods with variable elastic mass parameters determined by Hamilton-Ostrogradskii variational principle

08 p1583 A70-20485

Book on dynamics of mechanisms with elastic connections and impact systems covering differential and finite difference equations, equations of motion, friction effects, etc

08 p1502 A70-20753

Integral equations arising in contact problems of elasticity reduced to infinite linear algebraic equations

08 p1585 A70-20957

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation

08 p1585 A70-20958

Paired integral equations of elasticity with kernels containing Legendre spherical harmonics, admitting exact solution in quadratures

08 p1544 A70-20960

Half space elasticity problems solved by operator method

08 p1586 A70-21013

Elastic paraboloid of revolution under axisymmetrical and nonaxisymmetrical loads, using Bessel functions of real and imaginary arguments with trigonometric functions

08 p1587 A70-21165

Elastic coatings effect on turbulent friction using turbulence flow theory based on mixing length concept

08 p1483 A70-21227

Polarization-optical studies of large deformations in nonlinear theory of elasticity and plasticity, considering procedures based on photoelastic coatings and transparent models

09 p1768 A70-22120

Flexo-torsional elasticity ellipse determining displacements, hyperstatic reactions and influence lines in beams with straight axis and variable cross section

09 p1771 A70-22398

Elastic solution and finite element method applied to heat conduction and thermal stress in temperature field determination

09 p1774 A70-22587

Elasticity theory two dimensional problem solution for circular segment in polar coordinates, applying Lure symbolic notation and Prokopyov minimum potential energy principle

09 p1782 A70-23291

Vibration decrement of nonlinear elastic system from resonance peak width of displacement amplitude curve of perturbing force

09 p1782 A70-23295

External plane dynamic problems reduction to infinite algebraic equations in elasticity theory for simply connected domains based on Helmholtz equation solution in curvilinear coordinates

09 p1783 A70-23391

Crack widening in infinite plane field with wedge in absence of slip, based on elasticity theory, plotting contact forces and stresses on crack boundary

09 p1785 A70-23624

Elasticity stratification stabilization effect on two layer flows down inclined plane found dependent on time response difference between layers

10 p1863 A70-24009

Shear and cross sectional deformation of prismatic rectilinear rods with unicellular or multicellular thin walls, determining elastic behavior under arbitrary loads

10 p1955 A70-24055

Material elasticity effects on librational motion of arbitrary shaped satellite

10 p1950 A70-24177

Three dimensional elasticity by Ritz method, using coordinate system orthonormalized in energy metric of operator to avoid precision loss

10 p1957 A70-24511

Linearization of elastic forces in vibration system with percussion

10 p1958 A70-24516

Adiabatic elastic stiffness of single crystals of Ni-Co alloys, determining bulk modulus dependence on chemical composition

10 p1904 A70-24699

Complex redundant structures matrix analysis by substructure approach, obtaining elastic properties of system by subdivision and synthesis [SAE PAPER 700217]

11 p2134 A70-25889

Heat resistance and elastic properties of binary Ti-Mo alloys as function of phase structure and chemical composition

11 p2066 A70-25915

Classical and elastically restrained boundary conditions requirements for anisotropic plates Ritz solution

11 p2135 A70-26076

Elastic properties determined for reinforced composite material with hollow spherical inclusions embedded in matrix

11 p2136 A70-26083

Ultrasonic pulse technique for measuring fiber reinforced composites elastic constants

11 p2052 A70-26341

Work and energy theorems in linear elasticity, discussing potential energy, real work, complementary energy and energy coefficients

11 p2142 A70-26625

Equilibrium displacement equations for linear infinitesimal isotropic Cosserat elasticity solved in terms of stress functions

11 p2142 A70-26630

Discrete models for boundary value problems analysis in first strain-gradient elasticity theory, using extended finite element method

11 p2142 A70-26637

Elastic stiffness of unidirectional glass reinforced epoxy fiber composite determined from ultrasonic velocity measurements

11 p2071 A70-26692

Coerciveness / Korn/ inequalities role in boundary value problems for elliptic systems of partial differential equations, noting applications to three dimensional linear elasticity theory

12 p2260 A70-26974

Dispersion strengthened Ni-Cr alloys elastic and plastic properties at room temperature, studying preferred crystallographic orientation effect

12 p2255 A70-27609

Book on three dimensional problems of linear elasticity of homogeneous and isotropic solids, discussing prismatic bodies, bodies of revolution, notch effect, etc

12 p2326 A70-27669

Elastic, piezoelectric and dielectric properties of barium titanate single crystals of laminar domain structure

12 p2288 A70-28329

Monograph on critical speeds of nonzero mass shaft supported at both ends by bearings with nonlinear elastic displacements

13 p2416 A70-28373

Complex potentials used in semicomplex variable method for plane-strain problems in two dimensional linearized elasticity with couple stresses

13 p2508 A70-28494

Ni and Ni alloys elastic properties relationship with ferromagnetic and magnetostriction effects, determining modulus of elasticity for wide temperatures and heat treatment

13 p2432 A70-28760

Hydroelastic oscillations natural frequencies in incompressible and nonviscous liquid in circular cylinder with free surface, demonstrating wall elasticity effects

13 p2512 A70-28832

Linear theory of homogeneous and anisotropic elastic media with microstructure, establishing reciprocity and variational theorems

13 p2512 A70-28951

Dual controlled elastically twisting rotor blade performance during flight with azimuthal and collective variations compared to direct control rotor [AIAA PAPER 70-547]

13 p2345 A70-29012

Elastoplastic continuum under specified rates of body forces, surface tractions and displacements, formulating minimum principle for solving boundary value problem

13 p2513 A70-29154

Elastic constants pressure dependence of cubic crystals in NaCl and spinel structures using homogeneous static deformation method

13 p2396 A70-29172

Unidirectional composite with transversely isotropic fibers, calculating elastic stiffness constants by modified point-matching technique

13 p2515 A70-29466

Laminated composite materials dynamic elastic properties, outlining resonant frequency effect on apparent Young modulus

13 p2515 A70-29467

Variational principles of linear asymmetric elasticity for dynamic problems with initial and boundary conditions, using Laplace transforms

13 p2517 A70-29724

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body

13 p2517 A70-29763

Torsion of variable diameter rods based on moment theory of elasticity, solving integral equations system

13 p2517 A70-29774

Stress distribution and pressure distending air spaces in lungs, using mechanical pulmonary elasticity model

13 p2356 A70-29945

Filled elastomers elastic and anelastic behavior, investigating strain dependence

13 p2440 A70-29964

Chromium lattice vibrational properties based on fourth-nearest-neighbor tensor force model, obtaining agreement with inelastic neutron diffraction data and elastic constants

14 p2626 A70-30480

Tantalum single crystals elastic constants temperature dependence, considering compressibility and shear properties

14 p2596 A70-30841

Double ended dislocation pileups and elastic cracks at bimaterial interface under screw, edge and shear modes

15 p2756 A70-31561

Elasticity theory in general relativity formulated from classical nonlinear three dimensional theory, discussing thermodynamics and weak field limit

15 p2774 A70-31734

Reinforced shallow shells and plates stability beyond elastic limit, obtaining optimal parameters under compressive loads

15 p2816 A70-32159

Addition theorems for cylindrical functions, discussing applications to shell stress analysis and three dimensional elasticity theory

15 p2819 A70-32187

Tapered cantilever Al plate load characteristics, determining elastic and plastic strain due to regular, reverse and second regular deflection sequence

15 p2821 A70-32307

Elastic and optical properties of polyurethane rubber under large deformation using natural stress concept derived from stress-strain linear relationship [SESA PAPER 1608]

15 p2821 A70-32319

Stability loss of dynamic two dimensional mechanical elastic system with single degree of freedom under trajectory bifurcation

15 p2775 A70-32474

Monograph on temperature dependent material properties effect on elastic stress distribution in thin rotating disks of arbitrary profile

15 p2823 A70-32700

Book on structural mechanics with introduction to elasticity and plasticity

16 p2987 A70-32915

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering

16 p2931 A70-33256

Elastic constants for plates of unidirectional fiber reinforced anisotropic composite material determined by ultrasonic wave propagation

16 p2991 A70-33847

Disk forced vibration mounted on rotating shaft with ball bearings, assuming nonlinear elastic characteristic of system

16 p2996 A70-34293

Thermomagnetoelasticity wave equations of heat conduction for thermal and coupled perturbations propagating in isotropic medium at finite velocities

16 p2953 A70-34326

Elastic properties of dislocations in Ti basal, prismatic and pyramidal slip systems, discussing dilatational fields of edge and screw dislocations

17 p3115 A70-34385

Elastic interactions between anisotropic crystal dislocations and twin and grain boundaries in Ti

17 p3115 A70-34386

Strain gage measurements of elastic properties of Ti sheet alloys, computing polycrystalline properties from single crystal values

17 p3121 A70-34433

Three dimensional linear small deformation theory of elasticity solution for free vibration of simply supported homogeneous isotropic thick laminated rectangular plates

17 p3181 A70-34522

Inelastic analysis of unidirectional composite subjected to transverse normal loading, discussing linear response up to elastic limit and subsequent crack propagation and failure

17 p3182 A70-34557

Anisotropic and laminated cylindrical shells geometric design for reduction of elastic stress gradients to predetermined limit

17 p3182 A70-34559

Book on elasticity theory covering end effects, Saint Venant principle, edge and screw dislocations, moire method, thermoelasticity, cavity and inclusion effects, Muskhelishvili methods, etc

17 p3183 A70-34603

Stress concentration around small elastic spherical inhomogeneous inclusion on circular cylinder in torsion

17 p3183 A70-34631

Elastic and equilibrium matrices for semimonocoque membrane /plane stress/ elements using skin and reinforcing member transformations

17 p3185 A70-34921

Second order incompressible elastic torsion problems reduction to two dimensional classical linear elasticity problem without body force

17 p3189 A70-35434

Nonaxisymmetric thermal stress distribution in infinite elastic solid containing external stress-free crack with prescribed heat flux

17 p3196 A70-35437

Isotropic body screw dislocations, using finite elasticity approach

17 p3190 A70-35453

Elastic properties of complex screw dislocation arrays from equations for stress fields of dislocation segments

17 p3190 A70-35455

Elastic crack structure, discussing formalism for force law between faces of brittle and semibrittle fractures

17 p3191 A70-35461

Low temperature effects on Ti alloys welded joints elasticity

17 p3126 A70-35637

Elasticity theory two dimensional contact problems, examining cohesion or friction in contact area

17 p3192 A70-35693

Equilibrium theory of finite deformation of elastic solids, discussing applications and approximate solution methods

18 p3335 A70-35975

Micropolar elasticity theory, discussing difficulties from erroneous thermodynamic inequality

18 p3335 A70-36061

Anisotropic disk compressed by isotropic ring of smaller radius, considering elastic equilibrium

18 p3336 A70-36134

Finite difference theory applied to first boundary value problem of elasticity theory for Lamé equation

18 p3280 A70-36158

Singular integral equations of elasticity theory, formulating boundary value problem for discontinuous plane stresses

18 p3337 A70-36370

Thermodynamics of solids deformation, tracing macroscopic inelastic behavior to deformation induced internal structural changes governed by atomic and molecular processes

18 p3340 A70-36556

Silicon elastic constant measurement by Debye-Sears effect, using He-Ne laser source

18 p3298 A70-36952

Book on crack problems in classical theory of elasticity, emphasizing mathematical aspects

19 p3534 A70-37234

Viscoelastic fluids stratified flow down inclined plane, examining liquids elasticity role in stability

19 p3403 A70-37531

Plane electromagnetic wave diffraction by thin metal gratings, using mathematical method of elasticity theory

19 p3376 A70-37712

Elastic constants of ZnTe and ZnSe single crystals over 77-300 K range, using ultrasonic pulse echo method

19 p3486 A70-37761

Hydrostatic pressure dependences of second order elastic constants of ZnTe and ZnSe at 295 K, using ultrasonic pulse echo method

19 p3486 A70-37762

Single crystalline mercury elastic constants calculated from propagation velocity measurements of polarized sound waves

19 p3486 A70-37770

High current elastic conductors nonlinear mixture theory with inviscid electron gas in elastic continuum under mutual electromagnetic and diffusive forces

19 p3387 A70-37787

Stress wave propagation based on elasticity theory for reentry heat shield composites reinforced with unidirectional high strength high modulus fibers

19 p3537 A70-37788

Linear micropolar elasticity theory of shells and plates, considering transverse shear and normal strains and rotary inertia

19 p3538 A70-37793

Linear micromorphic material constants determination from constituent properties based on microelasticity theory

19 p3538 A70-37795

Infinite linearly elastic solid response with random variations in material elastic properties, obtaining average energy in displacement field by method of moments

19 p3538 A70-37796

Elastic particulate composite solid with microinclusions, deriving dispersion relations governing plane

longitudinal wave propagation modes by analogy with continuum theory

19 p3540 A70-37942

Two dimensional piezoelectric problems of electroelasticity, formulating general solutions in terms of stress and electric potentials using complex variables

19 p3487 A70-37946

Dynamics of composite materials using extensions of continuum theories based on combination of elastic and geometric properties

19 p3455 A70-37950

Composite bodies under plane deformations, determining stress dependence on elastic constants

19 p3455 A70-37952

Mixed boundary value problems approximate solution in linear elasticity by variational method, noting applications to micromechanics

19 p3540 A70-37957

Elastic boundary layers analysis based on strain gradient theory of linear elasticity

19 p3544 A70-38331

Composite body with free surface under plane deformation, analyzing residual, thermal and dislocation stresses dependence on elastic constants

19 p3544 A70-38332

Lumped parameter model for multidimensional solid mechanics problems with inelasticity, discussing stress wave interaction in cylindrical cavity

19 p3458 A70-38357

Stress differential equations of micropolar elasticity, considering mass forces and moments of inertia

19 p3459 A70-38672

Hexagonal crystal dislocations treatment based on anisotropic elasticity theory, obtaining formulas for displacement and stress fields

19 p3454 A70-38954

Cu and Ag low alloying effect on Al single crystals elastic limits and first deformation stages

20 p3644 A70-38960

Integral equations arising in contact problems of elasticity reduced to infinite linear algebraic equations

20 p3719 A70-39380

Elastic contact between bodies in presence of friction or adhesion by reducing singular integral equations to Fredholm equation

20 p3719 A70-39381

Paired integral equations of elasticity with kernels containing Legendre spherical harmonics, admitting exact solution in quadratures

20 p3672 A70-39382

Boundary value problems in dynamic two dimensional elasticity theory for domains bounded by circles and straight lines

20 p3721 A70-39770

Invariant autopilot control system during flight in turbulent atmosphere, allowing for aircraft elastic properties and invariance of coordinates

20 p3561 A70-39845

Elasticity theory boundary value problems reduction to one dimensional integral equations

20 p3724 A70-39853

Elasticity theory equations polynomial solutions for use in boundary value problems

20 p3726 A70-39874

Thin shell theory elastic coupling conditions, discussing stress-strain and edge effect states

20 p3726 A70-39875

Cosserat spectrum elastic theory, considering static problems

20 p3726 A70-39876

Human body elastic properties effects on arterial pressure measurement by sphygmomanometer

20 p3581 A70-39879

Singular points in elasticity theory solved by correct boundary value problem and homogeneous solutions theorem

20 p3728 A70-39894

Composite materials theory to predict macroscopic physical properties prediction, discussing conductivity, dielectric constant, magnetic permittivity, etc

20 p3729 A70-40032

Heterogeneous materials statistical theory, evaluating bounds for effective elastic constants by cell model using variational principles and perturbation solution

20 p3729 A70-40033

Self similar dynamic problems in two dimensional elasticity theory for slot with point source in boundless body

20 p3732 A70-40101

Boundary value problems in dynamic elasticity by perturbation method with displacement components

20 p3732 A70-40111

Elastomechanical system reciprocity relation principles using differential equations for bar with forces in two places

20 p3735 A70-40537

Band structure contributions to elastic shear constants of hexagonal close packed metals, using optimized model potential

21 p3839 A70-40600

Equations of motion of mass points connected by inertialless elastic couplings

21 p3933 A70-40615

Micro-breccia, igneous rocks and lunar fines elastic properties at ambient conditions and as function of pressure, discussing near surface mare region models

21 p3913 A70-41640

Support elasticity role in axisymmetric plates bending, discussing Rayleigh-Ritz solution

21 p3937 A70-41739

Spacecraft parachute stress analysis, using finite elements with nonlinear elastic properties to obtain shape and load distribution

21 p3753 A70-41821

Decelerator fabric elastic constants for structural analyses using generalized Hooke's law

21 p3843 A70-41834

Directional dependence of elastic shear stiffness on cubic axes for Si, Cu and Mo, making polar plots of shear stiffness coefficients

21 p3850 A70-41909

Elastic bounce of body resulting from falling to ground with calf muscles in sustained contraction and without knee bending

21 p3765 A70-42151

Cosserat elasticity constitutive equations, coupling rotation vectors to eliminate stress indeterminacies

21 p3941 A70-42251

Linear elasticity problem approximation by elastic energy expression modification, deriving upper bounds for errors

22 p4113 A70-42537

Natural oscillations of cylindrical shell with elastic filler, using simple load distribution model

22 p4119 A70-43572

Thin metal matrix composite rods elastic properties, examining Al-W system by Young and shear modulus measurements

22 p4061 A70-43687

Boundary value problems of elasticity for layer and strip with arbitrary inhomogeneity along thickness

22 p4120 A70-43712

Isotropic nonlinear elasticity problems of stress concentration near spherical cavity in field of triaxial tension, using small parameter method

22 p4120 A70-43714

Two dimensional shell equations derivation from three dimensional elasticity theory, considering rotationally symmetric bending of shells of revolution

23 p4265 A70-43942

Elasticity theory for circular cylinder weakened by cavities, discussing boundary conditions on butt ends and Galerkin solutions

23 p4265 A70-43983

Dynamic elasticity theory for multiply connected region

23 p4266 A70-43990

Fundamental error in Galerkin method application to bending problem of elastic rods

23 p4268 A70-44172

Heating rate effect on Ti-V martensite decomposition, discussing elastic properties effects of partial tempering

23 p4206 A70-44285

Parachute opening load amplification due to suspension line elasticity, using two-body spring-mass model

23 p4142 A70-44531

Elastic continua structural optimization analysis decisions for maximizing calculation accuracy, insuring efficient complex numerical analyses

23 p4271 A70-44706

Corrugated plates, closed cylinders and developable shells nonlinear elastic analysis, deriving boundary conditions

23 p4275 A70-44913

Hydrogenated Ni elastic limit discontinuity, discussing Portevin-Le Chatelier effect

23 p4208 A70-44921

Rumanian book on spatial problems in elasticity theory covering deformation geometry, temperature effects, elastic parallelepipeds, etc

23 p4275 A70-44999

Numerical solutions of three dimensional static elasticity, using physical analogies

24 p4419 A70-45195

Linear elasticity with constraint couples, establishing existence theorems by variational methods

24 p4420 A70-45267

Eigenvalue problem in elasticity theory, treating nonlinear equations solutions multiplicity by topological methods

24 p4420 A70-45273

Asymptotic properties of integral equations solutions for boundary value problems in theory of elasticity and mathematical physics

24 p4422 A70-45490

Anisotropic bodies elastic properties, obtaining solutions for nonorthotropic beams under randomly distributed normal loads and for various plates and strips

24 p4424 A70-45589

Variational solution of eigenvalues and eigenfunctions of second boundary value problem of elasticity minimizing functional

24 p4424 A70-45629

Chemical composition effects on heat resistance, elastic properties and density of Ti-Ta alloys

24 p4360 A70-45830

Infinite plate perforated with rounded corner square hole under uniform partial loading, examining elasticity with conformal mapping

24 p4427 A70-46367

ELASTIC SCATTERING

Differential elastic and rotational excitation cross sections for electron-hydrogen scattering in close coupling approximation with electron exchange neglected

02 p0342 A70-11880

Differential elastic scattering cross section of Ar nozzle beam in nitrogen considered with rainbow effect in determining intermolecular potential well depth

02 p0344 A70-12722

Rotational compound state resonances in subthreshold atom-diatom scattering determined for lowest state molecular hydrogen and deuterium model systems scattered by Xe

03 p0526 A70-13006

Slow electrons elastic scattering by diatomic hydrogen molecule, analyzing cross sections in two center prolate spheroidal coordinates emphasizing polarization effect

03 p0528 A70-14179

Elastic and inelastic scattering of proton beams from magnesium and silicon isotopes, using optical model

04 p0723 A70-15637

Maxwellian distribution perturbation in chemically reacting gas mixtures with lower inelastic collision frequency than elastic

06 p1110 A70-17761

Gas stream-elastic solid surface scattering characteristics, calculating trajectories, particle flux angular distributions, velocities, transfer coefficients, etc

06 p1111 A70-18265

Electron elastic scattering from surface plane of Au and W fcc lattices using quantum mechanics

07 p1343 A70-20120

Energy dependence of elastic total collision cross section of identical He molecules, using velocity selected primary beams at low target temperature

07 p1345 A70-20137

Atmospheric gases atomic and molecular binary short range repulsive forces, determining interaction potentials from elastic scattering cross sections

07 p1345 A70-20141

Proton-deuteron elastic large angle scattering cross sections, noting backward peak consistent with baryon exchange mechanism with resonance transfer

07 p1345 A70-20198

Multiple scattering of plane time harmonic compressional elastic wave impinged on parallel circular cylindrical inclusions in finite domain, analyzing stress field

08 p1592 A70-21469

Compound state resonance energies and widths in elastic scattering of diatomic molecule at energies below rotational excitation threshold

08 p1548 A70-21523

High energy electrons elastic scattering from 2s-1d shell nuclei based on Dirac equation solution in Glauber approximation

09 p1730 A70-22043

Quantum mechanical inverse problem of elastic scattering theory, discussing Hylleraas solution for determining potential energy function from phase shift

12 p2274 A70-26899

Elastic scattering effect on photoelectron transport and escape in upper sunlit atmosphere

12 p2222 A70-27187

Slow electrons interaction with periodic and non-periodic solid surfaces, investigating elastic scattering

12 p2275 A70-27252

Resonance energies of elastic scattering from one dimensional model potential containing barrier, using stabilization method

13 p2455 A70-29222

Elastic scattering formation and decay of unstable particle gases, discussing density and corrections to chemical and nuclear statistical equilibrium equations

13 p2455 A70-29223

High energy proton-He 3 elastic scattering cross section measurement, comparing result with Glauber model calculation

13 p2456 A70-29459

Quantum mechanical model of electron scattering by homonuclear diatomic molecule at ground state, calculating differential and integral cross sections for elastic scattering

14 p2618 A70-30113

Elastic scattering of electrons by hydrogen as function of vibrational excitation, discussing intensities and cross sections

14 p2618 A70-30114

Measuring instrument for total cross section of proton elastic scattering during sigma R reactions

16 p2908 A70-33210

Li ion elastic scattering by He, calculating ground state interaction potential

16 p2956 A70-34310

Elastic energy transfer cross sections calculation of H-H scattering to estimate neutralized solar wind particles thermalization

18 p3309 A70-36951

Energy and momentum exchange between gases in elastic collisions at different temperatures and velocities

19 p3551 A70-37538

Asymptotic high energy behavior of Feynman integrals in scalar field theory models for elastic scattering

19 p3457 A70-37549

Boltzmann equation for relativistic gas without dissipation, solving for relaxation time and elastic collisions

19 p3403 A70-37586

Elastic bodies collision, determining temperature field variations and contact pressure

20 p3725 A70-39869

Configuration space three body elastic scattering theory for initially free independently moving particles collisions under short range forces

21 p3852 A70-40595

Differential elastic cross sections of 42 MeV alpha particles scattering from He 3, using optical model with spin-orbit potential

22 p4076 A70-42722

Optical solar polarization broadband measurement interpretation with depolarization factor due to elastic collisions or additional source

24 p4414 A70-46172

ELASTIC SHEETS

Plane tension in elastic infinite strip covered by elastic plate, considering applicability to strain measurement errors calculation

11 p2129 A70-25565

Plane waves propagation in elastic layer using Cauchy theory of initial stress

14 p2658 A70-30998

Energy balance criterion for continuum mechanics analysis of fracture threshold for blistered adhesive elastic layer between elastic material and rigid substrate

19 p3536 A70-37774

Elastic membrane axisymmetric deformations, reducing nonlinear equations system to quadratures

20 p3718 A70-39230

Carbon dioxide laser adapted for high speed drilling of fine holes in thin rubber sheeting

23 p4201 A70-44474

ELASTIC SHELLS

Thin elastic shells parallel surface nonlinear tangential strains derived in terms of midsurface tangential and bending strain components

01 p0205 A70-11143

Thick walled incompressible hyperelastic dielectric sphere periodic oscillations, noting dielectric properties influence on amplitude and period

01 p0209 A70-11386

Nonlinear equations solvability for elastic cylindrical shells found existing for arbitrary load and clamping conditions

01 p0212 A70-11572

Asymptotic dynamic theory for elastic cylindrical shells incorporating thickness effects, considering longitudinal wave propagation in infinite length shell

02 p0385 A70-11877

Momentless design of composite plate and shell structures with variable elastic constants based on loading and shape requirements

03 p0586 A70-13112

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform

03 p0589 A70-13331

Shallow flexible shells similarity conditions derived in dimensionless form, assessing error

03 p0592 A70-13450

Nonlinear theory for thin elastic shells with small strains and rotations, analyzing nonzero Gaussian curvature

03 p0594 A70-13622

Thin elastic laminar shells nonlinear physical theory assuming Love-Kirchhoff hypothesis validity, rigidly connected layers and nonlinear mechanical behavior

04 p0765 A70-14419

Elastic orthotropic fiberglass reinforced plastic shells stability under axial compression, analyzing shear modulus influence

04 p0712 A70-14490

Thin elastic revolving shells free axisymmetric oscillations by determining differential equations eigenvalues and eigenfunctions

04 p0768 A70-14604

Torospherical heads attached to cylinders and under internal pressure as elastic and/or elastic-plastic shells, using finite element

[ASME PAPER 69-WA/PVP-7]

04 p0769 A70-14792

Free vibrations of reinforced elastic shell structures subject to constraints imposed by reinforcing elements, utilizing equivalent models without reinforcing elements

[ASME PAPER 69-WA/APM-25]

04 p0770 A70-14907

Elastic spherical shell excited by point force, analyzing HF response in terms of near field and flexural wave field

[ASME PAPER 69-WA/APM-18]

04 p0771 A70-14912

Initial deflection effect on elastic cylindrical shell stability under compression, finding critical load by determining limiting point in successive loading

04 p0773 A70-15009

Transient processes of strain wave propagation in elastic shells and plates under time varying loads

04 p0773 A70-15010

Thin elastic shallow shell static problem solved using numerical integration of differential equation

04 p0778 A70-15558

Buckling equations for neutral equilibrium of arbitrary elastic shells specialized to uniformly loaded circular cylindrical shell with accuracy

05 p0929 A70-16064

Axisymmetrical stress-strain analysis of viscoelastic cylinder enclosed in elastic shell under internal pressure using singular kernels

05 p0933 A70-16207

Static and continuity equations of equilibrium of axisymmetric and periodic stressed states of rectilinear helicoidal shell derived for elasticity relations

05 p0934 A70-16228

Stability and critical load algorithm for flexible shallow spherical and conical shells of revolution derived from variational equation

05 p0935 A70-16236

Isotropic elastic cylindrical shell stability under combined compressive and axisymmetric local loads, using equilibrium equations for shallow shells

05 p0936 A70-16240

Unsteady vibrations of cylindrical thin walled elastic closed shell under random loads, using correlation method

05 p0937 A70-16371

Finite element analysis of elastic thin shells, approximating shell surface by network of triangular plate elements

05 p0944 A70-16813

Digital computer program for analyzing axisymmetrically loaded ring-stiffened segmented composite elastic shells of revolution, giving vibration frequencies

05 p0944 A70-16814

Stability analysis of deflected shallow thin walled elastic noncircular conical and cylindrical orthotropic shells using straight lines method

06 p1167 A70-17865

Segmented elastic shells of revolution supported by rings, studying buckling and vibration by matrix method

07 p1405 A70-19257

Axisymmetric elastoplastic deformation theory for elastic cylindrical shell using Saint Venant yield condition, obtaining expressions for strain components, longitudinal deformation, etc

07 p1415 A70-20185

Dynamic calculation of oscillating liquid filled elastic cavity on elastic kinematic system under random load, using random signals transmission theory

07 p1416 A70-20194

Soviet book on free, forced and parametric vibrations of thin walled shells containing liquid, gas and continuous elastic medium

08 p1584 A70-20762

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory

08 p1585 A70-20955

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solutions convergence

08 p1585 A70-20963

Radial vibrations of hollow elastic sphere in acoustic medium, considering Laplace transform of field equations with respect to time

08 p1587 A70-21076

Linear and nonlinear equilibrium equations for bending deformation of thin elastic cylindrical using Kirchhoff-Love hypotheses

08 p1588 A70-21242

Elastic cylindrical shells stability under uniform pressure, calculating critical transverse load by finite-difference computer program

09 p1781 A70-23287

Elastic shell theory, deriving dynamic bidimensional equations from tridimensional elasticity equations asymptotic integration

10 p1959 A70-24793

Thin elastic plates and shells parametric resonance amplitudes by solving nonlinear differential equations, considering dynamic stability

11 p2129 A70-25523

Cylindrical shell segments supersonic flutter boundaries engineering estimates related to Saturn 5 booster, obtaining thickness requirement as function of panel geometry

[AIAA PAPER 68-284]

11 p2134 A70-25959

Stress tensor and displacement vector in thin elastic shells/plates derived from three dimensional nonlinear equations using asymptotic integration

11 p2142 A70-26634

Elastic conical shells of revolution linear theory, calculating stress resultants and couples

11 p2145 A70-26689

Initial thermal stresses effect on natural oscillation frequencies of thin cylindrical elastic shells, obtaining linearized equations of motion and boundary conditions 13 p2514 A70-29286

Geometrical theory of nonlinearly elastic inhomogeneous flexible shells, deriving variational equation in terms of displacement component and stress function 13 p2514 A70-29288

Rigid cylinder acceleration within elastic shell-core structure under pressure pulse distribution over shell semicircumference 13 p2518 A70-29984

Circular elastic shell response to moving and simultaneous loads, using impulse simulation method 13 p2518 A70-29986

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform 14 p2657 A70-30710

Sinusoidal stress and strain in elastic shells of revolution, reducing linear theory to simultaneous second order differential equations 15 p2816 A70-32158

Elastic shells of revolution stability and critical loads, discussing moment stress state and edge effect 15 p2816 A70-32158

Thin elastic shell deformation, considering random imperfections in regions adjacent to contour 15 p2817 A70-32162

Stability characteristics of elastic shallow shells of revolution in temperature field and under compression, reducing variational equation of bending by Ritz method 15 p2817 A70-32169

Plane acoustic wave interaction with elastic spherical shell, discussing effects of membrane, bending, rotatory inertia and shear deformation 16 p2993 A70-34087

Canonical variational principle for boundary condition contractions in elastic shell theory 17 p3182 A70-34545

Thin elastic shells linear theory, examining three dimensional stress distribution and displacement field 17 p3191 A70-35608

Axisymmetric torsion by terminal loads of elastic shells of revolution, investigating energy inequalities for assessing quality of approximate solution of thin shell problem 18 p3335 A70-36058

Stress-strain equilibrium of thin isotropic elastic shells of revolution loaded along meridian 18 p3340 A70-36577

Dynamic axisymmetrical loading of thin elastic shallow spherical rigidly clamped dome, using variational method 18 p3341 A70-36582

Oscillations of rigidly clamped elastic liquid filled hemispherical shell with gas bubble 18 p3242 A70-36583

Complete elastic spherical shell asymmetric buckling mode under pressure 19 p3539 A70-37801

Forced torsional vibrations of thin elastic spherical and hemispherical shells with free or restrained edge, using Gegenbauer transform 19 p3541 A70-38037

Boundary value problems for elastic sphere, extending Kelvin general solution of Cauchy equations 19 p3545 A70-38333

Thin elastic conical shell axisymmetric solution for free vibration in terms of power series 19 p3545 A70-38335

Anisotropic axisymmetric elastic shell theory including transverse stress effects, with application to orthotropic cylinder 19 p3545 A70-38337

Interaction between boundary layer and internal stressed state of thin elastic shell by formulating two dimensional linear theory 20 p3719 A70-39378

Stress concentration on isotropic elastic circular cylindrical shallow shell using plane waves and spherical means method, obtaining periodic solution convergence 20 p3719 A70-39385

Long hollow nonlinearly viscoelastic cylinder in elastic shell, calculating stress and strain under internal pressure 20 p3720 A70-39731

Axisymmetric contact problem of hollow semi-infinite elastic cylinder subjected to stresses on lower end face, solving by Fourier integral transform 20 p3720 A70-39734

Thin elastic shell natural vibrations, examining orthogonality of form shapes 20 p3724 A70-39862

Elastic shell stability criterion during short duration dynamic loading 20 p3725 A70-39864

Stability loss in linear approximation by thin elastic shell of revolution with negative Gaussian curvature 20 p3726 A70-39872

Thin elastic shells displacement vector and strain boundary conditions determination from stress-strain relations 20 p3728 A70-39896

Perturbed motion linear equations of body rigidly coupled to thin walled elastic shell partially filled with heavy compressible fluid 21 p3806 A70-40602

Circular cylindrical shell with annular orthotropic elastic core, analyzing stress wave propagation under pressure pulse 21 p3938 A70-41740

Fluid filled elastic spherical shell, calculating free vibration axisymmetric response and fundamental mode 21 p3940 A70-42053

Novozhilov complex transformation method extended to Timoshenko theory of elastic shells constructed with allowance for transverse shear deformation 21 p3941 A70-42237

Elastic cylindrical shell transient response to plane acoustic shock wave traveling through light fluid medium 22 p4114 A70-42647

Curved finite element for thin elastic shells satisfying rigid body motions and energy convergence 22 p4116 A70-43202

Thickness of equally stressed cylindrical shells, using thin elastic shell theory and Kirchhoff-Love hypotheses 22 p4120 A70-43715

Second approximation for limit loads due to imperfection sensitivity of axisymmetric elastic shell structures with unique harmonic buckling modes 23 p4273 A70-44720

Characteristic equations developed for two-spatial dimensional elastic wave propagating in linear elastic, isotropic and homogeneous medium 01 p0208 A70-11185

Pressure waves in accelerated sphere filled with compressible liquid, using convolution integral for pressure distribution on inner surface 01 p0067 A70-11186

Microbarographic oscillations associated with geomagnetic activity during observation of infrasonic waves on geomagnetically disturbed days 01 p0081 A70-11298

Pressure waves propagation velocity dependence on flow regime in gas-liquid mixtures 01 p0067 A70-11302

Flexural and longitudinal waves propagation in infinite elastic plate, using solutions to approximate nonlinear equations of plate motion 01 p0213 A70-11634

Arc phenomena for producing interaction effects, discussing reflected shocks rarefaction waves and gas dynamics 02 p0345 A70-11863

Forward air cushion performance of tracked hovercraft entering tunnel, determining arrival of reflected expansion wave at vehicle front 02 p0226 A70-12313

Periodic shock fronted longitudinal pressure wave effect on instantaneous heat flux rates at tube end wall 02 p0400 A70-12860

Axial stress pulse induced elastic waves propagation in thin anisotropic circular cylindrical shell of helical wrap construction allowing for shear coupling 03 p0587 A70-13118

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform 03 p0589 A70-13331

Plane longitudinal elastic monochromatic wave diffraction on stress free circular holes in infinite plate, calculating stresses between holes 03 p0589 A70-13375

Mechanical behavior of anesthetized dog abdominal vena cava from pressure wave transmission characteristics, discussing chemical and electrical stimuli 04 p0630 A70-14630

Dispersion curves for wave propagation in infinite elastic bars of elliptic cross section obtained by method of collocation 04 p0773 A70-15080

Gas dynamics of intense explosion with expanding inner contact surface in Newtonian limit, discussing shock layer reattachment 04 p0619 A70-15322

Effective wave propagation velocities, bulk and shear moduli of elastic heterogeneous solids approximated by self consistent method 04 p0777 A70-15496

Sonic waves induced by shock of laser produced brass and graphite vapor in air at atmospheric pressure using high speed shadowgraphs 05 p0857 A70-15802

Pressure wave formation induced by absorption of radiation in oxygen, noting wave driving after radiation pulse decay by frozen dissociation energy 05 p0833 A70-16306

Dynamical models of relative motions during earthquakes, solving numerically integral equations with nonintegral kernels in crack propagation and elastic wave diffraction 05 p0941 A70-16527

Plane and cylindrical elastic waves dynamic characteristics propagating in half space with holes, reducing boundary value problem and deriving formulas for interacting waves 05 p0946 A70-16858

Guided elastic waves propagation on layered media, considering elastic wave circuitry design for true microminiaturization 06 p1018 A70-17476

Wave equation for elastic waves in isotropic solid solved in Cartesian and circular cylindrical coordinates 06 p1018 A70-17476

dinates for studying microsonic wave guiding structures

06 p1105 A70-17479

Semiinfinite simply supported cylindrical shell transient response due to axisymmetrically engulfing step pressure wave, investigating moving load critical velocity

[AIAA PAPER 70-18] 06 p1170 A70-18063

Plane elastic-relaxing plastic shock wave yielding of Fe numerically integrated by two step stable difference scheme without pseudoviscosity

06 p1172 A70-18618

Kirchhoff theory of elastic wave diffraction in cylindrical case derived on modified Huygens principle, showing edge contribution

08 p1543 A70-20582

Vibration insulation of rib estimated with respect to diffuse flexural wave field in reinforced plate

08 p1586 A70-21010

Plane double front detonation wave attenuation by pursuing rarefaction waves, analyzing oscillations, onset mechanism and stability during transition to Chapman-Jouguet mode

08 p1485 A70-21633

Atmospheric pressure waves generated by high energy disturbance in South Pacific, using ionospheric Doppler signals correlated with ground-level pressure signals

08 p1490 A70-21646

Relaxational oscillations produced by interaction between rarefaction wave in external two dimensional supersonic flow and turbulent near wake

09 p1603 A70-22426

Monatomic gas rarefaction wave structure in unsteady one dimensional flow from high to low pressure zones, describing numerical solution technique

09 p1604 A70-22449

Elastic harmonic waves propagation in cylinder with longitudinal cavities and in space with cylindrical cavities solved using series method

09 p1783 A70-23387

Pressure waves of varying amplitude effect on flow through turbomachine blade passages, discussing interaction with curved diffusers geometry

09 p1608 A70-23743

Quasi-transverse constant profile wave in finite elasticity with isothermal shock at discontinuity compared to Whitham breakdown

10 p1956 A70-24191

Elastic wave propagation, deriving characteristic equations in generalized curvilinear coordinates using linear elastic, isotropic and homogeneous constitutive equations

11 p2132 A70-25680

High purity beryllium dynamic tests determining Hugoniot equation of state, shock profile and spall threshold/onset of microcracking/for elastic pulses

[AIAA PAPER 69-360] 11 p2066 A70-25964

Extensional waves asymptotic nature and stress distributions in infinite elastic plate of finite thickness under axisymmetric and in-plate disturbances using perturbation

11 p2145 A70-26696

Plane periodic diffraction of elastic waves propagating in medium with infinite sequence of circular holes

12 p2325 A70-27557

Interaction of laminar hypersonic boundary layer and supersonic corner expansion wave, discussing upstream influence, transverse pressure gradients and external flow

[AIAA PAPER 69-137] 12 p2211 A70-27826

Lunar elastic waves anomalous propagation, considering Apollo seismographic records and earth rocks specific dissipation function measurements

13 p2486 A70-28617

Time and spatial evolution of shock and expansion wave evolution from density discontinuity for gas with repulsive delta function interaction between particles

13 p2388 A70-29224

Elastic plane wave diffraction and scattering at convex obstacle in semibounded regions, using method of images

13 p2452 A70-29289

Variable temperature plasma with two ion species, noting rarefaction wave propagation during one dimensional expansion into vacuum

13 p2464 A70-29415

High temperature elastic moduli of slender polycrystalline aluminum rods with elastic waves generated by Q switched laser energy

14 p2595 A70-30638

Wave front discontinuities during pressure wave propagation in membranes and elastic shells by asymptotic procedure using Laplace transform

14 p2657 A70-30710

Elastic waves propagation in finite thickness elastic plate under transient load, assuming material behavior in conformity with nonlinear Hooke's law

15 p2814 A70-31544

Rarefaction wave analytical construction by successive approximation, solving hyperbolic equations for longitudinal vibrations of rods

15 p2815 A70-31644

High temperature elastic moduli in polycrystalline Al rods from propagation velocity of elastic waves generated by Q switched laser

[SESA PAPER 1641] 15 p2759 A70-32304

Propellant flame temperature and emission spectra during depressurization by rarefaction waves, using rapid scanning spectrometer

[AIAA PAPER 70-663] 16 p2962 A70-33570

Quasi-linear hyperbolic systems interactions for rarefaction waves, applying Glimm difference method

16 p2943 A70-33782

Laminar hypersonic boundary layer interaction with corner expansion wave, presenting numerical solutions to viscous-inviscid equations for small turning angles

[AIAA PAPER 70-807] 17 p3065 A70-34457

Elastic waves on isotropic and anisotropic surfaces, discussing excitation methods, surface probing, propagation characteristics, etc

17 p3136 A70-34650

Analog simulation of elastic wave propagation in thick walled hollow circular cylinders to determine safe impact speed

17 p3185 A70-34964

Elastic wave with discontinuities propagation, calculating decay velocities and stresses at leading wave front by theory of characteristics

17 p3189 A70-35436

Elastic field near moving antipane crack tip to determine energy release rate

17 p3191 A70-35462

Convergent spherical rarefaction wave asymptotic behavior

17 p3075 A70-35892

Heat transfer across boundary between two stationary fluids, applying elastic wave theory in isotropic media

18 p3345 A70-36118

Elastic Cosserat half plane, analyzing wave propagation of small amplitude thermoelastic disturbances and uniform motion of concentrated line load along surface

18 p3338 A70-36434

Acceleration wave propagation in materially uniform inhomogeneous isotropic elastic bodies, using tensor analysis

19 p3536 A70-37563

Transient polymers stress-strain state induced by elastic waves, using model with space and time dependence of laser beam

20 p3654 A70-39248

Elastic quasi-stationary waves, discussing waveforms and resonance phenomena

20 p3727 A70-39890

Elastic wave propagation mathematics in visual form for ultrasonic testing

21 p3831 A70-40746

Elastic wave propagation in isotropic homogeneous bodies, considering free vibrations and propagation velocity

21 p3940 A70-42099

Surface elastic waves, considering propagation, electromagnetic transduction, amplification, guiding, focusing, reflection and applications

21 p3830 A70-42115

Elastic wave diffraction by rigid inclusion, calculating far field displacement and cross section by integral equation method

22 p4073 A70-42636

Analytic shock front velocity as function of initial parameters in continuous inhomogeneous medium, verifying propagation through rarefaction wave

22 p4010 A70-42687

Striations due to mechanical oscillations in fast wire explosions, using dispersion for elastic waves in solid cylinders

22 p4074 A70-43002

Transient elastic vibrations of air and liquid filled cylindrical shells under radial impact, using shadow-optical cinematography

[SMPTE PREPRINT 107] 22 p4031 A70-43030

Elastic wave front control volume analysis in laminated and fiber reinforced composite materials

22 p4119 A70-43677

CO vibrational relaxation measurements in shock tube expansion wave generated in argon heat bath

23 p4180 A70-44009

Heat transfer from turbulent boundary layer interacting with shock and expansion waves in supersonic flow

23 p4134 A70-44573

Electromagnetic-surface elastic waves conversion in superconductors, considering thin plate forced vibrations and standing waves excitation

24 p4389 A70-45205

One-dimensional propagation of elastic spherical waves in inhomogeneous unbounded medium under normal stress on cavity surface

24 p4424 A70-45631

Anisotropic shells and plates dynamic field equations derived, taking into account mechanical forces and nonuniform temperature field

01 p0200 A70-10553

Mathematical elastodynamic model for parametric dynamic study of forced response solution of motion equations during head trauma

02 p0238 A70-12548

Variational principles in dynamic viscoplasticity theory, based on operator approach combined with time independent variations in elasticity theory

02 p0391 A70-12818

Elastokinetic three dimensional boundary value vibration problem, involving rectangular area on surface of elastic half space under periodic normal stress

03 p0601 A70-14319

Governing equations of plane elasticity to define suitable approximate theories for structural analysis

[ASME PAPER 69-WA/APM-22] 04 p0771 A70-14909

Static and dynamic solutions for isothermal deformation of elastic cylindrical and spherical Cosserat surfaces with holohedral isotropy

05 p0932 A70-16140

Integral equation for time development of harmonic oscillations in finite one dimensional chain of elastically coupled discrete elements, using Bessel functions for solution

08 p1547 A70-20535

External and internal three dimensional dynamic problems in elasticity theory for multiply connected region with circular cylinder boundaries

08 p1584 A70-20537

Inhomogeneous elastic half space surface response to moving line loads

08 p1584 A70-20645

Gas dynamics regarding velocity field excited by vibrations propagating over elastic wing surface at finite velocity

10 p1803 A70-24779

Vibration behavior theory for elastomechanical systems applied to aircraft and space constructions

10 p1961 A70-25054

Elastodynamics mixed initial and boundary value problems numerical solution method applied to deformation of elastic solid

11 p2140 A70-26485

Dynamic asymmetric elasticity problems, considering longitudinal and torsional wave propagation in bounded and unbounded micropolar media

15 p2818 A70-32178

Boundary value problem in linear elastodynamics, investigating Ignaczak type theorems for microstructure effects in transient heat conduction problems

15 p2822 A70-32343

Perturbation method for finite elastodynamic deformation of nonlinear systems

17 p3191 A70-35590

Dynamic elasticity theory for multiply connected region

23 p4266 A70-43990

Elastic coupling and dynamic equations for flight elastomechanical vibration systems, including tiptanks on aircraft wings

23 p4274 A70-44767

Elastic orthotropic plates vibration analysis by finite strip method via eigenvalue matrix, obtaining natural frequencies and modal vectors by small computer

24 p4423 A70-45579

ELASTOHYDRODYNAMICS

Roller bearing endurance dependence on shaft speed, surface finish and elastohydrodynamic lubricants temperature, viscosity and film thickness

[ASME PAPER 69-LUB-18] 01 p0101 A70-10387

Hydrodynamic and elasticity equations for squeeze films between elastic cylinders in normal approach reduced to integral equation

[ASME PAPER 69-LUB-13] 01 p0102 A70-10392

Tractive behavior in elastohydrodynamic lubrication contact noting role of surface degradation layer

05 p0854 A70-15888

Rheology applied to motor oil viscosity, elastohydrodynamic (EHD) and extremely thin film lubrication, examining viscosity relationship to film thickness

07 p1293 A70-18954

Frictional traction-sliding speed relation in elastohydrodynamic lubrication in Barlow-Lamb model of viscoelastic liquid, discussing oscillatory and continuous shear

09 p1691 A70-22600

Elastohydrodynamic lubrication of rollers relationship to pressure

09 p1693 A70-22978

Elastohydrodynamic monochromatic wave coupling in liquid filled container as model for Alfvén and magnetoacoustic waves transmission in plasma

14 p2625 A70-31356

Rolling element bearings fatigue life prediction and extension, using elastohydrodynamic lubrication theory

[ASME PAPER 70-DE-19] 16 p2917 A70-33423

ELASTOMERS

NT CHLOROPRENE RESINS

Incompressible elastomer viscoelastic response to exponential extension ratio history in simple tension based on constitutive equations 01 p0201 A70-10893

Synthetic polymers properties and processing, discussing thermoplastics, elastomers, thermosets, etc 02 p0322 A70-12715

Poisson ratio of elastomers determination for defining compliant surface fluid film thrust bearings behavior, considering method and error analysis [ASME PAPER 69-WA/LUB-7] 04 p0712 A70-14751

Strain energy function for swollen crosslinked elastomers, extending application range by including third invariant 05 p0927 A70-15980

Elastomeric silicone ablator reinforced by carbon cloth or fibers for Venus entry heat protection [AIAA PAPER 70-201] 06 p1157 A70-18086

Elastomeric seals and sealants selection for SST, describing tests in air, fuel vapors and hydraulic fluids at elevated temperatures 13 p2418 A70-28668

Ethylene-propylene elastomers compatibility with hydrazine determined under ambient conditions from gas evolution rate by catalytic decomposition 13 p2472 A70-28669

Inhibitive elastomeric sealing compounds and coating systems preventing aluminum alloy corrosion in aircraft 13 p2433 A70-28778

Radio Influence Voltage /RIV/ nondestructive test method for detecting voids in neoprene-steel structures or other elastomers bonded to metal 13 p2420 A70-29245

Elastomeric liner material for missile launch system design, developing bowed-knotted strut for compression-deflection characteristics 13 p2513 A70-29256

Missile tube liner design with cast polyurethane elastomers, discussing effect of polymer composition and processing on physical properties 13 p2439 A70-29257

Filled elastomers elastic and anelastic behavior, investigating strain dependence 13 p2440 A70-29964

Stress distributions in elastomers under different loads, proposing appropriate measuring technique 14 p2655 A70-30178

Gas transfer through silicone elastomer capillaries wall in variable pressure chamber 14 p2541 A70-30386

Cycloaliphatic epoxy resins tensile and impact strength improvement by modification with elastomeric materials, considering heat distortion temperature 16 p2936 A70-33359

Poisson ratio of elastomers determination for defining compliant surface fluid film thrust bearings behavior, considering method and error analysis [ASME PAPER 69-WA/LUB-7] 19 p3434 A70-37602

Cycloaliphatic epoxy resins toughness improvement by modification with elastomers, maintaining high heat distortion temperature 21 p3842 A70-40733

Saturated hydrocarbon prepolymers for solid propellant elastomeric binders 21 p3865 A70-42144

ELASTOPLASTICITY

Computer calculation in elastoplastic range of statically indeterminate structure of bars, considering collapse load, stress and hinge rotation 01 p0200 A70-10524

Taylor model of elastoplastic wave interaction during cylindrical projectile impact 01 p0206 A70-11150

Residual stress determination in elastoplastic body with known plastic strains, using Hilbert space for symmetric tensor fields 01 p0209 A70-11399

Propagation equations for spherical waves in elastoplastic work hardening materials 03 p0585 A70-12972

Soviet book on experimental investigation of thin walled structures elastoplastic work with complex reinforcement, outlining test procedures 03 p0585 A70-12985

Elastoplastic bodies stability under compression, using theory of small elastoplastic deformations and linearized equations of nonlinear elasticity theory 03 p0591 A70-13440

Flexible cylindrical shell elastoplastic state determined by theory of small elastoplastic deformations, utilizing material incompressibility in plastic state 03 p0593 A70-13500

Elastoplastic analysis of strain hardening materials under multiaxial states of stress based on von Mises yield condition and stress-strain relationship 03 p0596 A70-14012

Elastoplastic zone and instability of precracked thin sheets under uniaxial loading applied to rectangular center-notched steel foils 03 p0598 A70-14239

Elastoplastic strains in machine element surface layers under static friction force using polarization-optical techniques 04 p0696 A70-14410

Elastoplastic bar stability compressed by tangential force, showing ductility effect on critical parameters, perturbed motion and stability loss process 04 p0767 A70-14484

Long thin cylindrical tube with circumferential restraint analyzed for thermal expansions, obtaining maximum strains, bending moments, shear forces and plastic zone extent [ASME PAPER 69-WA/NE-7] 04 p0768 A70-14756

Torispherical heads attached to cylinders and under internal pressure as elastic and/or elastic-plastic shells, using finite element [ASME PAPER 69-WA/PVP-7] 04 p0769 A70-14792

Elastoplastic media revised mathematical model with allowance for cumulative damages effect on elastoplastic property under variable loads 04 p0775 A70-15199

One dimensional stress waves propagation in elastoplastic medium, determining stress and velocity fields due to heat sources motion by characteristics method 04 p0776 A70-15447

Unloading wave in elastic-plastic half space with rigid unloading for two parameter loads, discussing deformation body model 05 p0925 A70-15825

Finite element discretization and linear programming methods for shakedown theory in perfect elastoplasticity with associated and nonassociated flow laws 05 p0925 A70-15873

Continuum model for plastic-elastic behavior of fiber reinforced composite material, formulating yield condition and constitutive equations 05 p0931 A70-16131

Elastoplastic thick layer with disk-shaped crack analyzed for stress and strain, determining width of plastic zone 05 p0939 A70-16482

Torispherical heads design pressures compared from results of elastic-plastic and elastic-stress analyses to examine use of limiting stress criteria 05 p0944 A70-16816

Small amplitude spherical elastic-plastic waves initial behavior studied for critical and supercritical loading 05 p0945 A70-16819

Small elastoplastic deformation effects on stress-strain state of rib-reinforced cylindrical shells 05 p0946 A70-16955

Elastoplastic bending of rectangular plates by finite difference and variational methods assuming homogeneity in elastic region 05 p0946 A70-16962

Impact against elastoplastic blank allowing for base and striker compressibility, giving solution in region of plane wave first reflection from base 05 p0947 A70-17016

Fatigue breakdown criteria for elastoplastic materials under cyclic loads, deriving equations as functions of stress-strain states kinetic behavior 06 p1162 A70-17390

Elastoplastic rod systems under repeated variable loads, calculating carrying capacity from plastic failure considerations 06 p1163 A70-17395

Structures elastic-plastic behavior under changing cyclic heating, calculating long time strength from linear damage accumulation assumptions 06 p1164 A70-17405

Elastic-plastic torsion of convex cylindrical bars 06 p1165 A70-17534

Stability criterion applicable to elastoplastics problems with/without nontrivial equilibrium states, noting effect on buckling loads 06 p1167 A70-17900

Stress rate boundary value problem formulation for elastoplastic body by singular integral equations 07 p1405 A70-19258

Elastoplastic torsion of combined prismatic bars with transverse distribution of constant properties solved by computer 07 p1415 A70-20189

Elastoplastic bending of inhomogeneous rectangular plates with modulus of elasticity and yield stress varying over plate thickness 08 p1583 A70-20530

Elastic/perfectly plastic hollow cylinder unloading under monotonic twist during torsion, considering sandhill-membrane analog validity 08 p1589 A70-21249

Energy equilibrium for crack growth in elastoplastic media, analyzing crack behavior during plastic deformation concentrated at edge of propagating crack 08 p1590 A70-21414

Elastic-plastic plane strain solutions in infinitesimal plastic flow theory with separable stress fields [ASME PAPER 69-APMW-13] 08 p1592 A70-21470

Elastic-plastic work hardening sandwich arch under given loading rate analyzed for stress rates using integral equation [ASME PAPER 69-APM-21] 08 p1593 A70-21616

Stress-strain characteristics of reinforced elastoplastic layer using mathematical model 09 p1769 A70-22183

Elastoplastic problems incremental solution by iterative method, demonstrating convergence 09 p1771 A70-22394

Plane and cylindrical stress wave propagation in elastoplastic medium, studying stress interrelations 09 p1775 A70-22610

Solution uniqueness in limit load theory for unbounded regions, obtaining infinity as unique value for critical load from elastoplastic analysis 10 p1954 A70-24013

Elastoplastic compressible sheet metals reinforced by isotropic work hardening under action of bending moments, analyzing stresses and strains 10 p1955 A70-24056

Optimal trusses design, considering minimal volume /weight/ and elastoplastic stability in compressed and stretched bars 10 p1958 A70-24514

Photoplastic method for modeling of plane elastoplastic problems, comparing results with photoelastic coating method to estimate transition errors from model to prototype 10 p1965 A70-25320

Macrodon elastic-plastic strain model, studying stress-strain relationship and optico-mechanical properties 11 p2128 A70-25385

Elastic-plastic shear cracks propagation in two phase composite materials using dislocation model, determining critical fracture strength 11 p2136 A70-26081

Energy principle providing upper bounds on plastic deformation in elastoplastic structures subjected to blast loading 11 p2144 A70-26670

Deformation theory for small elastic-plastic strains in orthotropic material and discretization and iterative solution techniques 11 p2144 A70-26684

Plates elastic-plastic behavior under combined stretching and bending by finite element method 12 p2320 A70-27146

Large deflection analysis of elastic-plastic shells of revolution by computer program based on nonlinear theory and multisegment method of numerical integration 12 p2320 A70-27148

Two dimensional structures large strain elastoplastic analysis by finite element method, using variational principles to derive equilibrium equations 12 p2320 A70-27148

Sandwich beams elastoplastic stability, determining critical load 12 p2323 A70-27342

Elastic-plastic plane stress analysis of two dimensional structures based on Tresca yield criterion, using finite element technique 12 p2326 A70-27795

Thin cut plate quasi-brittle breakdown under tensile stress, considering elastoplastic equilibrium under Tresca-St. Venant yield conditions 12 p2329 A70-28325

Elastoplastic thermal stress analysis using finite element matrix method exemplified by cylindrical bar induction quenching 13 p2513 A70-28992

Minimum principles for rate solution in elastoplastic work hardening materials with regular yield surface 13 p2513 A70-29152

Piecewise linear elastoplastic matrix structural theory with interacting yield planes, discussing kinematic and isotropic hardening 14 p2656 A70-30475

Finite element displacement method for elastoplastic bilinear strain hardening orthotropic plates and shells, comparing initial and tangent stiffness 14 p2660 A70-31136

Elastoplastic material mechanical theory, considering constitutive equations with plastic deformations and decompositions of total velocity-strain /stretching/ 14 p2661 A70-31281

Elastoplastic torsion problems solution by strain theory of plasticity, describing torsion function in hypergeometric series form 14 p2661 A70-31329

Two dimensional stress-strain fields under elastic and elastic-plastic strains and steady state creep, calculating stress distribution around hole in cylindrical shell 15 p2813 A70-31533

Equation of state of solids measured by shock wave techniques, considering elastic-plastic flow in plane wave geometry 15 p2824 A70-32789

Elastoplastic bending of thin plate under increasing and uniformly distributed loads, defining statically admissible stresses 16 p2988 A70-33107

Elastoviscoplastic medium filled half space motion under pressure front moving along surface with time varying velocity, analyzing penetrating wave fronts form 16 p2990 A70-33780

Heat transfer in tungsten-tungsten and Armco Iron-Armco Iron specimens, confirming Bowden-Tabor model of elastoplastic events during cyclic engagement of surfaces 16 p3000 A70-33920
[AIAA PAPER 70-853]

Finite element formulation for large strain and displacement problems with emphasis on elastic-plastic behavior in metals 17 p3184 A70-34905

One dimensional elastoplastic wave propagation in rate-sensitive viscoplastic rod with thermal gradient 17 p3185 A70-34966

Shakedown theory of elastic-plastic structures under time dependent loadings 17 p3188 A70-35191

Discrete element stress and displacement analysis of elastoplastic plates 18 p3342 A70-36686

Three dimensional dynamic analysis of small harmonic stress wave propagation in elastic-plastic and viscoplastic materials, using finite differences 18 p3344 A70-36724

Elastic-plastic behavior of fine grained fcc polycrystals based on single crystal slip data, satisfying displacement compatibility, equilibrium condition, etc 19 p3538 A70-37792

Nonlinear stress-strain model of unloading in symmetric longitudinal impact of two elastic-plastic bars, using numerical method 19 p3541 A70-38046

Elastoplastic oscillator dynamic behavior with one degree of freedom compared with bilinear hysteretic model results, investigating mechanical scheme with continuous skeleton intrinsic curve 19 p3432 A70-38665

Elastoplastic continua incremental solution for large displacements and small strains, determining sufficient condition of uniqueness 19 p3549 A70-38666

Elastoplastic work hardening continua incremental boundary value problem with allowance for distributed dislocations, using quadratic programming concepts 19 p3549 A70-38667

Elastic-plastic equilibrium bifurcation in geometrically simple frame model with symmetrically loaded beam, comparing characteristics with Shanley uniformly stressed column model 19 p3549 A70-38671

Plasticity and strain hardening in sintered metals, considering pressure at pores and elastoplastic limit under small plastic deformation 20 p3644 A70-38962

Q switched lasers time dependent loss elimination from elastoplastic relaxation effect in lithium niobate and KDP Pockel cells 20 p3640 A70-39093

Elastoplastic deformation in strip with symmetrical semicircular notches simulating stress-strain-state on celluloid models by polarization-optical method 20 p3720 A70-39735

Elastoplastic equilibrium of thin infinite plate with periodic slit system along straight line under tension, investigating localized plastic deformation domains 20 p3721 A70-39769

Uniformly loaded thin elastoplastic spherical shells, calculating strain hardening and strain rate effects on transient response 21 p3935 A70-41255

Thin circular plate clamped along edge, calculating large displacements and elastoplastic strains for comparison with measurement 21 p3935 A70-41406

Elastic-plastic deformation analysis at finite strain by two component thermodynamic model 21 p3937 A70-41431

Elastic-plastic axisymmetric shells of revolution, analyzing large deflection and yielding for internal and external pressures by finite element method 21 p3937 A70-41738

Cylindrical cavity uniform expansion in compressible elastic plastic solid, calculating pressure by similarity solution 22 p4114 A70-42634

Spherical cavity nonuniform expansion in compressible elastic plastic solid, calculating velocity field and pressure by approximate similarity solution 22 p4114 A70-42635

Elastoplastic flexure and critical loading of isotropic rectangular plates of constant and variable thickness, using Lagrange principle with numerical integration 22 p4115 A70-42810

Antifriction number characterizing friction coupling, distinguishing between elastic and plastic modes 22 p4047 A70-43348

Strain gage stress measurement under elastoplastic strain conditions at high temperature 22 p4117 A70-43454

Elastoplastic bending of rotating circular shaft with constant end cross section force couple, assuming small deformations of linearly hardening materials 22 p4118 A70-43570

Soviet bibliography on flexible plates covering elastic bending, elastoplastic state under transverse load and bending beyond elastic limit 22 p4119 A70-43710

Elastoplastic properties of welded joints containing slag inclusions defects, determining sizes radiographically 24 p4347 A70-45734

ELASTOSTATICS

Three dimensional elastostatics problems solution method using singular integral equations solvable numerically for surface tractions and displacements of fully mixed boundary value problem 05 p0926 A70-15912

Static and dynamic solutions for isothermal deformation of elastic cylindrical and spherical Cosserat surfaces with holohedral isotropy 05 p0932 A70-16140

Stress functions in three dimensional nonaxisymmetric elastostatics problems in circular cylindrical coordinates, proving representation completeness for cylindrical bodies 05 p0932 A70-16172

Wedge with symmetric crack at vertex in plane elastostatics, solving biharmonic equation by Wiener-Hopf technique 06 p1164 A70-17441

Cylindrically isotropic elastic medium statics, deriving general solutions to Lamé equations 09 p1784 A70-23593

Inhomogeneous anisotropic elastic plates large deflection, using asymptotic integration of nonlinear elasticity equations to obtain successive field equations systems 24 p4423 A70-45580

Anisotropic bodies elastic properties, obtaining solutions for nonorthotropic beams under randomly distributed normal loads and for various plates and strips 24 p4424 A70-45589

ELDO LAUNCH VEHICLE

ELDO booster rocket third stage design and construction, including pictures of parts and devices 03 p0580 A70-13795

ELDO-PAS apogee motor prequalification test to determine specifications for constructing units for qualification testing 03 p0581 A70-13854

Digital computer interface for ELDO launcher inertial guidance system linking with platform, autopilots, telemetry equipment and rocket subsequenceurs 05 p0818 A70-16572

ELDO launch vehicle achievements, potential and use, showing relationship to possible satellite payloads 05 p0924 A70-16896

Radio and inertial guidance of Europa 1 and 2 ELDO launch vehicles 08 p1542 A70-21870

ELDO rocket tracking error, considering guidance antenna angular precision and UHF circuit performance in signal comparison 09 p1720 A70-22649

Digital guidance computer compatibility with analog attitude control loop in Digital Inertial Guidance System used in ELDO launch vehicle 11 p2080 A70-26280

Modular launch vehicle system for European commercial satellites using Eldo-A/I Astris and French rocket stages 16 p2987 A70-34342

ELDO launch vehicle FE /flat earth/ guidance, discussing perturbations, trajectory optimization, inertial navigation system, onboard computer, etc 18 p3288 A70-36299

ELDO launch vehicle design, describing high energy upper stages 18 p3333 A70-36300

ELDO project planning and progress monitoring system for management provided by Central Planning and Progress Monitoring Service 21 p3956 A70-41497

Programming and checkout of computer for ELDO inertial guidance system, including flight simulation and autopilot tests 21 p3795 A70-41862

[AIAA PAPER 69-961]

ELDO Europa 1 and 2 launchers configurations tendencies, discussing use of liquid propellant boosters, chemical, electrostatic or thermonuclear propulsion system, etc 23 p4263 A70-45002

Gyroscopically stabilized solid propellant apogee motor for experimental satellite of CECLES/ELDO Europa 2 program 23 p4235 A70-45018

Satellite launch vehicle guidance equations for programmed optimization applied to Eldo inertial guidance system 24 p4375 A70-46359

ELECTRETS

First order pressure gradient microphone design based on electrostatic principle, using foil electrets to discriminate against airborne and solid-borne noises 05 p0821 A70-16402

Electret microphones application for pressure fluctuations measurements on thin aerodynamic profiles noting operation, vibration insensitivity, robustness and cost 06 p1071 A70-18473

Thermo-electret surface charge and dielectric constant time variation measurements, considering hole-electron pairs production hypothesis 21 p3797 A70-40890

ELECTRIC ANALOGIES

U ANALOGIES

ELECTRIC APPLIANCES

U ELECTRIC EQUIPMENT

ELECTRIC ARCS

NT MERCURY ARCS

Pulsed arcs in argon and helium at superhigh pressures, noting plasma ionization and temperature and charged particle density 01 p0149 A70-10168

Ground based space simulation of arc-type electrothermal propulsion systems, discussing test facilities 01 p0161 A70-10225

Gas-stabilized electric arc heater electrical and gas dynamic parameters, studying velocity and enthalpy radial distributions and IV characteristics 03 p0531 A70-13386

Pulsed high current arc burning in hydrogen at pressures to 400 atm, discussing stability and discharge plasma parameters 04 p0729 A70-15224

Transpiration-cooled electric arcs for high temperature high density plasma generation, considering uncertainties in plasma transport properties and temperature distributions 04 p0729 A70-15591

DC electric arc with superimposed axial subsonic gas flow breakdown voltage and anode heat transfer using high speed photography 06 p1177 A70-17697

Thermal conductivity of argon, nitrogen and air plasmas at atmospheric pressure and 6500-16500 K range, discussing electric arc source 11 p2148 A70-25760

Electric arc shape moving at hypersonic speed investigated by Newtonian pressure distribution for thin shock layer 11 p2090 A70-25992

Electric arc column properties in channel gas flow, including electric fields distribution of potential and heat conduction function 11 p2092 A70-26729

Electric arc in cylindrical channel gas flow described by boundary layer equations, assuming equilibrium and quasi-neutral media 11 p2151 A70-26730

Electric arc stability with descending static I-V characteristics in plasmatrons using direct Liapunov method 11 p2093 A70-26734

Plasmatron geometrical parameters effect on electric arc I-V characteristics, using various gas vortex flows for arc stabilization 11 p2093 A70-26735

Water cooled metallic diaphragm thermal stability effect on plasmatron electric arc characteristics stabilized by vortex air flow 11 p2093 A70-26736

Ignitron converters for feeding power plasmatrons and arc reactors, describing circuit and operation 11 p1984 A70-26742

Mode transition characteristics of free burning argon electric arc with transpiration cooled anode, noting current blowing parameter [AIAA PAPER 69-696] 12 p2281 A70-27806

High argon plasma temperatures via pulsing constricted electric arc 14 p2621 A70-30504

Heat exchange measurements between solid body and high enthalpy gas flow at stagnation point using electric arc heater 15 p2826 A70-32102

Teflon and polymethyl methacrylate sublimation breakdown in plasma jets, using electric arc heated argon, nitrogen, air and oxygen 15 p2765 A70-32103

Electric arc in unbounded axisymmetric steady gas flow, solving energy equation 15 p2780 A70-32129

Laminar Cu-W electrode erosion resistivity in single chamber electric arc hydrogen plasmatrons with gas vortex stabilization 15 p2780 A70-32130

Microwave probe for measuring electron density profile in supersonic arc jet plasma 15 p2741 A70-32433

Experimental and theoretical investigation of mass injection effect on high current MPD arc [AIAA PAPER 69-266] 16 p2959 A70-33869

German monograph on temperature distribution and motion of free burning arcs in transversal magnetic fields and gas flows, covering aerodynamic model concept 16 p2959 A70-34077

Fluid transpiration arc radiation source based on forced convection effect on electric arc
17 p3023 A70-35153

Spectral radiation and polar distribution from high power Ar, Kr and Xe arcs
17 p3023 A70-35156

Homopolar device electric arc dynamics dependence on gas type, noting flow geometry-Hall effect competition
20 p3681 A70-40009

Low voltage arc nonequilibrium ionization rate, taking into account atom-electron collisions
20 p3684 A70-40389

Transpiration cooling of porous constrictor walls of high intensity electric arc in plasma
[ASME PAPER 70-HT-35]
22 p4122 A70-42432

Dissociated and ionized hypersonic flows of hydrogen heated by electric arc techniques, investigating flows in wind tunnel nozzles
22 p4011 A70-42759

Supersonic convective electric arcs with magnetic stabilization in sulfur hexafluoride, examining aerodynamic drag and plasma column slanting
23 p4227 A70-44554

High speed radiographic observation of electric arc movement and metal transfer during submerged arc welding
24 p4322 A70-45724

ELECTRIC BATTERIES

NT ALKALINE BATTERIES

NT DRY CELLS

NT MAGNESIUM CELLS

NT METAL AIR BATTERIES

NT NICKEL CADMIUM BATTERIES

NT NICKEL ZINC BATTERIES

NT SILVER ZINC BATTERIES

NT STORAGE BATTERIES

Lithium-cadmium fluoride battery for aircrew survival beacon radio receivers, considering voltage loss elimination by doping
08 p1439 A70-20708

Sealed cells failure analysis procedures analogous to medical examination in external and internal inspection and diagnosis
08 p1440 A70-20713

Organic semiconductor electrodes for electrochemical generators, discussing redox association with ion and electron conductivity in polyanilines
10 p1830 A70-24463

Low temperature fuel cell materials impurity effects on catalyst poisoning, stressing sulfur elimination from rubber molding
10 p1832 A70-25043

Weights, sizes and costs of nuclear and nonnuclear spacecraft power systems with reference to mission duration
11 p2082 A70-26260

Liquid hydrocarbon-air battery with fuel transport operation, considering electrode structure, boiling range, carbon dioxide rejection, etc
12 p2166 A70-27764

Natural gas-air fuel cell battery with sulfuric acid electrolyte for low temperature operation
12 p2166 A70-27766

High energy density nonaqueous battery with lithium metal anodes, cupric chloride cathodes and organic aprotic solvent electrolyte
[AIAA PAPER 70-530]
13 p2349 A70-29038

Azur satellite p- and n-type Si solar cell system providing both power supply and storage battery charging
13 p2506 A70-29553

Solar cell/battery systems for spacecraft, discussing power system evaluator, NiCd thermal control, lightweight rigid panels design, etc
21 p3757 A70-41011

Book on batteries and energy systems covering theoretical concepts, construction, operation principles, characteristics and applications of various types of primary and secondary cells
22 p3964 A70-42454

Solid state batteries based on highly conducting solid electrolyte rubidium silver iodide, testing discharge performance
22 p3966 A70-43543

Batteries and fuel cells as portable and transportable electrochemical power sources
24 p4295 A70-46399

ELECTRIC BRIDGES

NT WHEATSTONE BRIDGES

Bridging joints resistance effect on thermoelement efficiency, describing W and Co coatings deposition on GeTe based thermoelectric alloys
01 p0159 A70-10757

Molten bridging alloy deposition on p and n type thermoelectric materials, utilizing diffusion process brief duration during contact
01 p0009 A70-10758

Electronic transistorized harmonic signal integrator operating in connection with static-dynamic bridge
03 p0493 A70-13975

Vacuum deposited thin film bridges in electroexplosive devices, discussing composition, surface condi-

tions, substrate temperature, bell jar atmosphere and deposition rate
03 p0546 A70-14107

Design, performance and manufacturing information on various microcircuit bridges in conjunction with production of squibs, detonators and pressure cartridges
03 p0547 A70-14112

Frequency characteristics optimization of symmetrical octupole bridge networks based on relationships between electrical parameters functions and impedance matrices eigenvalues
08 p1468 A70-20572

Operation mode for full-bridge programmed waveform static inverter permitting saturation of power transistors in DC power conversion
08 p1439 A70-20707

Electric bridge for measuring complex impedances and admittances in 60 kHz-30 MHz frequency range
09 p1650 A70-23402

Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics
11 p2015 A70-25350

Multichannel tensometric AC bridge network for static and dynamic measurements of mechanical quantities in structural elements
11 p2054 A70-26436

Asymmetrical transient attenuation effects of bridge circuit phase discriminator on accuracy of phase difference measurements
15 p2707 A70-31508

Failure mode and mechanism in dielectrically isolated IC attributed to metal bridging under planar oxide
15 p2713 A70-32648

Planar Ge and Si diodes application in pulsed bridge elements, investigating current-voltage and resistance-voltage characteristics
20 p3600 A70-40462

Polar microwave interferometer using single null path bridge and klystron repeller voltage modulation
22 p4048 A70-42323

Varied-frequency signals separation using bridge circuits for splitting process resulting in unchanged phase ratio and changed amplitude ratio
23 p4159 A70-43759

Superheterodyne EPR spectrometer microwave bridge using single X band klystron
23 p4170 A70-43798

ELECTRIC CELLS

Q switched lasers time dependent loss elimination from elastoplastic relaxation effect in lithium niobate and KDP Pockel cells
20 p3640 A70-39093

ELECTRIC CHARGE

NT ELECTRIC DIPOLES

NT ELECTROSTATIC CHARGE

NT ION CHARGE

NT SPACE CHARGE

NT TRAVELING CHARGE

Thunderstorm lightning discharge formation mechanism, investigating electric charge concentration and motion of free electrons
01 p0134 A70-10169

Disintegration of charged distilled water jets, discussing drops size, velocity distribution and instabilities
03 p0467 A70-13781

Flux, energy spectrum and charge composition of primary cosmic ray electrons measured, determining energy spectrum of primary positrons above 220 Mev
04 p0739 A70-14595

Electrically charged earth satellite motion under action of Lorentz force produced by geomagnetic field interaction, relating field trajectories to acceleration
06 p1142 A70-17879

Dynamics of multicomponent plasma involving charged or neutral gases with transport phenomena for case of no magnetic field
09 p1738 A70-23580

Cerenkov radiation field in infinite parallel dielectric layer by sinusoidally bunched beam of electric charges moving with constant velocity along surface
10 p1916 A70-24408

DC capacitance measurement based on capacitor discharge using auto-oscillatory macrocharge system variant as transducer of measured capacitance, time constant and insulation resistance
11 p1982 A70-25576

Einstein-Maxwell equations for monopolar point electrical charge, calculating proper energy for electromagnetic and gravitational fields
13 p2451 A70-28956

Shot noise effect in antennas to measure electric charge density fluctuations in plasma, noting thermal equilibrium with Maxwellian distribution function
13 p2371 A70-29920

Quantum-electrodynamic renormalization for electron charge in metal environment, using solid state many-body techniques
14 p2619 A70-30476

External magnetic field effect on cavitation zone behind circular cylinder, proving existence of electric charges
18 p3242 A70-36645

Two axially positioned cylindrical waveguides with slots cut periodically along generatrices /double squirrel cage/, analyzing behavior under excitation by rotating charged filament
19 p3386 A70-37733

Ni-Zn high energy secondary battery cycle life and discharge capability
22 p3966 A70-43540

ELECTRIC CHOPPERS

Electrodynamic and electrohydraulic vibrators for frequency sweep, wideband random and sweep random vibration test methods
23 p4195 A70-44333

ELECTRIC CIRCUITS

U CIRCUITS

ELECTRIC COILS

NT MAGNETIC COILS

ELECTRIC CONDUCTORS

Inertia effect of electrically conducting lubricant on load capacity of hydromagnetic inclined slider bearing under magnetic field
01 p0104 A70-11389

Mesothermal flow of collisionless plasma around conducting cylinder, calculating densities, velocities, temperatures and electrical potential
02 p0346 A70-12102

Spherical conducting body effect on induction coil impedance and EMF in nondestructive testing using eddy current probes
02 p0300 A70-12478

Geometrical optics method for obtaining radar cross section of perfectly conducting sphere with inhomogeneous dielectric coating
02 p0262 A70-12599

Electromagnetic scattering from perfect conductors by numerical analysis, presenting far field pattern calculation for plane wave scattering from square cylinder
04 p0652 A70-15363

Static electricity suppression for textile materials by blending conducting metal fibers into yarn
05 p0870 A70-16299

Shielded multiconductor transmission line capacitance calculated by integral equations with Green function kernel
05 p0820 A70-16383

Reflection coefficients of circular posts in rectangular waveguides computed by Green function and method of moments
05 p0820 A70-16384

Composite conductors involving conventional conductors and superconductors to obtain satisfactory electrical performance for application to electromagnets
05 p0870 A70-16582

Three dimensional electromagnetic scattering from thin walled conducting circular tube of finite length normally incident with E or H polarized plane wave
05 p0816 A70-16987

Conducting cylindrical shell in constant magnetic field analyzed for magnetoelastic disturbances using Laplace transform
06 p1056 A70-17607

Numerical analysis of rarefied plasma flow interaction with charged conducting bodies of various forms and dimensions
06 p1123 A70-18298

Rectangular coaxial waveguide with internal conductor contained between inhomogeneous magneto-electric bars, deriving computer algorithm for natural mode fields
09 p1638 A70-23645

Electrodeless electrolysis of solid ionic conductors and fused salts without contact leads, using electron beams and glow discharge
13 p2361 A70-28929

Book on materials for conductive and resistive functions covering superconductive and contacting functions and applications
14 p2557 A70-30951

Electrical conductors specific heat measurement at high temperatures, using optical techniques and digital systems
15 p2826 A70-31942

Boundary conditions for electrodynamics of wave reflection from conducting bodies, using perturbation technique
17 p3128 A70-34633

Diffraction of EM waves emitted by vertical electric dipole on conducting thin circular disk, using algorithm for integral equation
19 p3375 A70-37432

High current elastic conductors nonlinear mixture theory with inviscid electron gas in elastic continuum under mutual electromagnetic and diffusive forces
19 p3387 A70-37787

Plane electromagnetic scattering from perfectly conducting bodies, comparing exact numerical solution with experiment
20 p3585 A70-39394

Conduction liquid metal MHD machine channels design with baffles installed to decrease shunting effect of end zones, calculating segments by circuit theory methods

21 p3760 A70-42233

Flutter of elastic current-carrying shell containing incompressible inviscid nonconducting fluid flow

22 p4117 A70-43383

Arbitrarily shaped cylindrical conducting structures with transient incident electromagnetic wave, calculating scattering from integral equation by digital computer

23 p4165 A70-44957

Electromagnetic scattering by two dimensional periodic arrays of conducting thin plates, calculating induced current and near field radiation distribution

23 p4165 A70-44961

Two monopole antennas on perfectly conducting sphere, calculating radiation pattern by numerical technique

23 p4165 A70-44968

ELECTRIC CONNECTORS

Electrical lead sealing in hydrostatic high pressure systems with gaseous pressure transmitting medium, considering pipestone cone seals, frozen oil seals, epoxy seals, etc

01 p0104 A70-10744

Printed circuit board connector selection techniques based on miniaturization reliability, cost and compatibility with intended application

02 p0268 A70-12473

Lead resistance effects on resistance strain gauge measurements as function of utilized measurement system and procedure

11 p2054 A70-26432

Multiple wiring algorithm for automatic pattern design for AI interconnections and printed wiring in integrated circuits

15 p2715 A70-31842

Connectors for supersonic jetliners, discussing butyl rubber grommet, power distribution collector, modular terminal blocks and passenger service connector

16 p2878 A70-33956

Wire wrapped, soldered, welded and crimped joints and plug/socket connections in electronic packaging for spacecraft

16 p2879 A70-33958

Silicon solar cell array interconnector design based on analysis of stresses caused by thermal expansion and vibrational motion

21 p3756 A70-41009

Boeing 747 airliner passenger entertainment and service electronics multiplexing system, discussing cable and connectors selection and design

23 p4174 A70-44544

Superjet airliners wiring connectors for power distribution, signal circuitry and self ejecting push buttons for passenger seats

23 p4174 A70-44545

Failure analysis methods for connectors and interconnections, discussing visual inspection, X ray vidicon analysis, electrical evaluation, etc

24 p4320 A70-46249

ELECTRIC CONTACTS

Low speed Ga lubricated sliding electrical contacts of Be in vacuum, discussing film role in friction and contact resistance

01 p0099 A70-10325

Vacuum cleavage device for producing small area evaporated metal semiconductor contacts free from oxygen or other contamination

02 p0304 A70-12748

Moving contact pressure transducer for remote signaling

03 p0494 A70-14048

GaAs lasers fabrication, discussing p-n junctions formation, laser die mounting, low resistance electrical contacts, optical cavities, etc

07 p1298 A70-19398

Ohmic contacts to n- and p-type semiconductors obtained by ruby laser, noting linear current-voltage characteristics

07 p1299 A70-19797

Al-Si and Cu-Ti eutectic alloys showing good ohmic contacts to SiC

10 p1927 A70-23990

Electrical, physical and technological requirements and methods of preparation of ohmic contacts on GaAs, noting use of Au-Ge-Ni alloy

10 p1927 A70-24225

Nonsliding rotary electrical connector for conducting current and signals from satellite solar panel [AIAA PAPER 70-458]

11 p2016 A70-25453

Germanium, silicon and gallium arsenide point contact and Schottky barrier diodes as submillimetric wavelength detectors and mixers

11 p2017 A70-25736

Brush current collectors for strain measurements in rotating machine parts, discussing acceptance testing

11 p1983 A70-26438

Brush collector for strain measurement in jet engine compressor and turbine elements at high RPM

11 p1983 A70-26439

Low resistance small area contacts on semiconductor metal oxides

12 p2288 A70-28057

Ohmic contacts for gallium arsenide single crystals, describing fabrication technique and IV characteristics

12 p2202 A70-28187

Metallic contacts deposition on p- or n-GaAs using vacuum evaporation by electron bombardment

12 p2202 A70-28188

Age hardenable monolithic spring material composed of Ag-Pd-Cu alloys for make-break electrical contact

13 p2376 A70-28839

Junction and contact regions in electronic devices using X ray microanalysis and electron probe

14 p2590 A70-30355

Book on materials for conductive and resistive functions covering superconductive and contacting functions and applications

14 p2557 A70-30951

Sliding electrical contacts in vacuum and space - Conference, Virginia Polytechnic Institute, September-October 1969

16 p2919 A70-33805

Reliability life tests preventing sliding electrical contacts failure in space vehicles, discussing data dissemination

16 p2920 A70-33806

Literature review of sliding electrical contacts in space vehicles, covering heavy aromatic hydrocarbons, molybdenum disulfide and other lubrication materials

16 p2920 A70-33807

Fluid lubricants applications to electrical contacts, discussing hydrodynamic and boundary lubrication, film formation on solid surfaces, etc

16 p2920 A70-33808

Sliding electrical contacts for unmanned scientific satellites, discussing Nimbus AVCS camera iris motors

16 p2920 A70-33809

Solid lubricated contacts performance in Nimbus and OAO spacecraft, discussing slip ring assembly and noise problems in Ag-graphite brushes

16 p2920 A70-33810

Slip ring assemblies for spacecraft devices, evaluating sliding electrical contact industry technological capabilities

16 p2920 A70-33811

Materials test fixture design and fabrication for vacuum testing and evaluation of slip rings and brushes, discussing dry film lubrication

16 p2920 A70-33812

Contact-relay circuits failure free operation probability, taking into account coil winding breakage

19 p3390 A70-38579

Epitaxially grown Si contact for area reduction of MOS transistor circuits

20 p3596 A70-39099

In-Au contacts for GaAs, discussing fabrication and performance tests on transverse Gunn mode oscillator

20 p3686 A70-39118

Conjunctors and traditors circuit realizations, discussing resistive and dynamic nonlinear networks

22 p3996 A70-42919

ELECTRIC CONTROL

Triple mode control strategy to provide near optimal stable transient response in variably loaded electrohydraulic servomechanisms

02 p0272 A70-12728

Electrical and hydraulic units controlling second antenna at Pleumeur-Bodou space communication center

05 p0819 A70-15984

Book on hydraulic and electrohydraulic mechanisms covering power transmission by fluids under pressure, data for designing and utilizing equipment, etc

09 p1612 A70-22636

Electrohydraulic fast response servosystem design and operation, describing nonlinear model based on component limitations

10 p1807 A70-24578

Electrohydraulic control system dynamics, examining executive component loading at low speeds and nonlinear resistances

13 p2349 A70-29720

Bang-bang control of electrohydraulic servomechanisms, approximating optimal control by quasi-optimal controls

16 p2887 A70-33685

SST electrohydraulic primary and standby brake control systems, discussing design and advantages [AIAA PAPER 70-913]

17 p3024 A70-35825

Electric field control of oscillatory acetylene flame combustion for chemical rocket engines

21 p3942 A70-40885

ELECTRIC CORONA

Space charge injection-impulse voltage separation technique for nonuniform field breakdown phenomena

01 p0110 A70-10560

Atmospheric humidity effects on ionization and positive corona-current pulses development, discussing radio interference

02 p0258 A70-12425

Counterrotating vertical vortices produced by corona discharge on heated flat plate under free convection conditions

08 p1599 A70-21828

Thin wire glow during corona discharge in metal cylinders analyzed by photomultiplier

11 p2083 A70-25924

Corona-induced thermal boundary layer breakup effects on convective heat transfer from wire electrode to surrounding gas

12 p2333 A70-28110

Corona and voltage breakdown for spacecraft electrical components in low pressure helium-oxygen atmospheres, measuring between parallel plates

21 p3851 A70-42124

Corona discharges from fine W points in liquid He initiated by field ionization or emission, noting anomalous characteristics

23 p4221 A70-44889

ELECTRIC CURRENT

NT ALTERNATING CURRENT

NT RING DISCHARGE

NT TELLURIC CURRENTS

NT THRESHOLD CURRENTS

NT TOROIDAL DISCHARGE

Electron-hole pair quasi-linear fluctuations at recombination boundary in semiconductor crystal under crossed electric and magnetic fields

01 p0156 A70-10191

H ion increased activity effect on sodium transport across short circuited turtle bladder

02 p0234 A70-11730

Electrical exploding wire experiments at constant current with inductive energy storage system, discussing experiments with various cross sectioned copper wires

02 p0338 A70-11870

Polarohydrodynamics method applied to electrochemical kinetics of electrode cathodic or anodic current by coupling surface reaction with mass transfer

03 p0534 A70-14268

GaAs tunnel diodes excess current nature and voltage dependence, considering thermal current measurements, depletion layer processes, electron barrier height, etc

04 p0656 A70-14713

Competition mechanism for free carriers in junction isolated transistor collector suggested by current dependence of photocurrent

04 p0657 A70-14732

Silicon bipolar transistors primary photocurrent calculation using manufacturers data

04 p0657 A70-14736

Aligned electric current effect on drag of sphere with arbitrary conductivity moving in current carrying fluid

04 p0671 A70-14993

Plasma acceleration by induced Hall currents, discussing Hall-to-current ratio maximum at critical magnetic field [AIAA PAPER 69-280]

04 p0729 A70-15596

Cylindrical antennas immersed in arbitrary homogeneous isotropic media, solving integral equation for current

06 p1074 A70-18607

Hall current effects on anisotropic plasma magnetogravitational instability under uniform magnetic field, considering electron inertia role and plasma perturbations

07 p1348 A70-19228

Magnetic field variation rates characteristics during magnetic storms investigated for longitudinal dependence and influence of equatorial electric current

07 p1276 A70-20437

Magnetic spikes in polar cap region due to poleward shift of narrow westward electric current filament

08 p1491 A70-21716

Chapman-Vestine and Birkeland-Alfven electric current systems equivalence in ground geomagnetic effect explained for polar magnetic storms

08 p1491 A70-21719

Transistor current gain measurement at HF by two channel method 09 p1632 A70-22234

Pinched plasma reversed current induction due to relativistic electron beam injection 09 p1736 A70-23183

Segmented anode current and heat distribution in MPD engine measured with current shunts and calorimetric methods 09 p1613 A70-23238

Thermal lens effect produced by photocurrent in CdS, using focused laser beam to generate photocurrent causing local heating changes of refractivity 10 p1898 A70-23980

Si avalanche diodes oscillations external current waveform measurement using coaxial current monitoring assembly with negligible phase error 10 p1849 A70-24234

Electric current flow effect on thermoelectric figure of merit from thermal conductivity measurements on thermoelement 10 p1808 A70-25034

Surface waves excited by oscillating current in cold plasma surrounded by metallic sheath of infinite conductivity, deriving frequencies and growth rates 11 p2089 A70-25717

Temperature effects on base and surface currents of plane bipolar transistors, testing validity of surface recombination process model 11 p2021 A70-26832

Current flow across metal-semiconductor contacts via electron tunneling 12 p2285 A70-27254

Corona point discharge current magnitude in transonic wind tunnel, giving current characteristics at different wind speeds 12 p2264 A70-28001

Electron density determination, establishing gas pressure relation to discharge current 13 p2460 A70-28710

Operational amplifier with Darlington circuit for high output current 13 p2377 A70-29114

Electric current direction effect on wake of copper sphere moving in electrolyte 13 p2391 A70-29968

Flueric sensor for RF induced currents providing alternative to bridge wires as initiators of explosive charges 14 p2534 A70-30681

Sunspot electric current evaluation from analyzing transverse component of magnetic field, discussing difficulties and errors in data reduction 15 p2804 A70-32615

Near cathode magnetic field effect on instability in linear Hall current accelerators, using geometry of field extending from anode to cathode region [AIAA PAPER 69-381] 16 p2959 A70-33870

Current oscillations of GaAs Gunn diodes over wide voltage range, discussing diode behavior dependence on polarity and applied voltage 18 p3230 A70-36197

CW multifilament GaAs laser diodes measurement, showing cross correlation between light and current noises 18 p3270 A70-36742

Thin metal film electrical conduction current noise characteristics 19 p3487 A70-38196

Helicon electromagnetic wave attenuation control by steady current of uniform density in propagation direction, considering Hall effect role 20 p3585 A70-39396

Nonequilibrium plasma stability, conductivity and Hall parameter influenced by current flow parallel to magnetic field, discussing Ar-Cs and He-Cs plasma data 20 p3682 A70-40019

High voltage solar arrays for ion engines, discussing spacecraft propulsion, electric generation, insulation integrity, cell degradation and current leakage [AIAA PAPER 70-1138] 20 p3567 A70-40211

Low density plasma in region of orbital-motion-limited /OML/ currents in presence of cylindrical Langmuir probes 22 p4078 A70-42360

Photocurrent multiplication in single crystal n-type epitaxial GaAs due to impact ionization of shallow donors 22 p4087 A70-43218

Ti and Zr based superconducting alloys with Nb content, measuring longitudinal critical currents in wire and ribbon samples 22 p4087 A70-43462

Conducting bodies of revolution, calculating surface currents due to axially incident plane electromagnetic wave by computer program 23 p4162 A70-44005

Laminar geoelectromagnetic field excited by coaxial circular current, determining impedance and magnetic field ratios of spherical harmonics 23 p4189 A70-44064

Force-reduced superconducting toroidal magnet coils built with Cu plated Nb-Zr wire, investigating current enhancement characteristics 23 p4230 A70-44356

Electron recombination effect on current transmission through insulator-semiconductor junction with large diffusion length of minority carriers 24 p4390 A70-45634

ELECTRIC DIPOLES

Radiation from dipole in dispersive anisotropic magnetized plasmas using Fourier analysis 06 p1116 A70-17363

Vertical electric dipole transient response over circular ground screen, studying low angle radiation patterns 06 p1021 A70-17573

Electromagnetic field of horizontal LF electric dipole formed by thin ionosphere layer between anisotropic planes 07 p1277 A70-20447

Polarization of interacting atoms resonance fluorescence and coherence transfer due to excitation exchange, considering electrostatic dipole-dipole and electromagnetic radiative interactions 08 p1548 A70-21341

Electromagnetic waves diffraction on ideally conducting bodies of revolution, deriving design formulas for electric dipole 09 p1632 A70-22401

Non-Cerenkov radiation region produced by passage of oscillating electric dipole at uniform velocity 09 p1728 A70-22958

Electric dipole emission near ideally conducting screen with variable surface impedance parallel strips, analyzing radiation pattern 09 p1636 A70-23140

Radiation field of electric and magnetic dipole in double layer medium, solving Sommerfeld integrals 09 p1650 A70-23550

Point electric dipole EM radiation in presence of moving dispersive dielectric half space 09 p1639 A70-23669

Integral equation for radiation patterns from vertical antenna over variable impedance surface [AFCL-69-0315] 09 p1639 A70-23670

Radiation from electric dipole in moving isotropic plasma analyzed for plasma velocity effect on pattern and far fields 11 p2091 A70-26178

Rectangular tolerancing of dipole impedance values scatter for random passive network samples 12 p194 A70-26968

Electric dipole radiation field in homogeneous anisotropic compressible plasma, obtaining asymptotic expressions by saddle point integration method 12 p2282 A70-27970

Diffraction and scattering of electromagnetic waves emitted by electric dipole arbitrarily oriented in space on inhomogeneous sphere 12 p2190 A70-28172

Cylindrical electric dipole antenna in magnetoactive ionospheric plasma, noting ion sheath effect on input impedance and active length 13 p2399 A70-29402

Elevation and ground conductivity effects on horizontal dipole excitation of earth-ionosphere waveguide, considering east-west propagation 16 p2858 A70-32932

VLF radiation resistance of short filamentary electric dipole at arbitrary angle to magnetic field in cold uniform plasma, using full wave theory 16 p2859 A70-32935

Electric and magnetic dipole VLF radiation patterns in lossy two component magnetoplasma 16 p2860 A70-32944

Electromagnetic field determination from oscillating vertical and horizontal electric dipoles above flat earth, demonstrating Sommerfeld formulation and dyadic Green function technique equivalence 16 p2861 A70-32974

Infinitesimal electric and magnetic dipoles embedded in lossy media, investigating earth effect on electromagnetic field 17 p3045 A70-35075

Diffraction of EM waves emitted by vertical electric dipole on conducting thin circular disk, using algorithm for integral equation 19 p3375 A70-37432

Electrocardiography electrical bridge type leads system based on potential quenching phenomenon, determining electric dipole displacement of heart in transverse plane of body 19 p3369 A70-38208

Electric dipole displacement of heart estimation by supplementing orthogonal with precordial lead, discussing stationary and moving point dipole hypotheses 19 p3369 A70-38209

Electric and magnetic field components of step function excited electric dipole immersed in dissipative homogeneous medium with specified conductivity and dielectric constant 20 p3589 A70-40464

Elevated horizontal and vertical electric dipole VLF fields, discussing ionospheric TE and TM mode coupling, nighttime variations and amplitude fluctuation 24 p4314 A70-46131

Soviet book on plasma physics covering noninteracting and colliding particle motion, elementary processes, electric discharges, kinetic equations, macrocharacteristics, plasmoids, etc 01 p0151 A70-10500

Organic synthesis by electrical discharge in simulated Jovian atmosphere, noting appearance of orange-red cyanogen-ammonia polymer nonvolatile fraction 01 p0179 A70-10529

Equilibrium state of high current discharge in low conductivity plasmas, obtaining light sources at low temperatures 01 p0152 A70-10993

Electrical discharge machining showing close tolerance sizing capability on honeycomb panels 02 p0310 A70-12665

Respiratory muscles neuromotor units activity as function of volley from electric discharge features study on dogs and cats 03 p0417 A70-13068

Transverse magnetic field effects on electrode heat fluxes in heavy-current discharge, discussing anodic space thermal ionization 03 p0531 A70-13205

Electrical discharge machining using electrical spark eroding action for machining tough metals in burr-free intricate configurations, including narrow slots and blind holes 03 p0497 A70-13564

Electroexplosive devices protection from electrostatic discharge by creation of preferential discharge path, considering use of high intensity neon lamp 03 p0549 A70-14134

Axial neutral gas pressure gradient calculated in cylindrical positive column of DC discharge due to driving volume force 04 p0671 A70-15003

Exploding wire discharges in high vacuum, discussing particle emission MHD instabilities, plasma temperature and electron density 05 p0890 A70-16820

Ball lightning mechanism proposal based on mathematical model for electric discharge current in parabolic plasma shell forming vortex-type storm front 05 p0879 A70-17021

Oscillatory discharge properties of capacitance power storage circuit used for pumping pulse lasers 06 p1081 A70-17768

Organic compounds synthesis by electric discharges in simulated primitive atmosphere, considering mechanism for biologically significant molecules formation 07 p1225 A70-19104

Solid electrolyte cells discharge characteristics and open-circuit voltage, evaluating diffusion coefficient of Ag from time dependent behavior of I-V relationship 07 p1196 A70-19386

He-Ne laser plasma vibrations and radiation power during active medium discharge excitation by DC current, noting characteristic energy hysteresis 08 p1511 A70-20519

Discharge current effect on shape and position of resonance curves for electron concentrations during microwave oscillation conversion in magnetoactive plasma 08 p1551 A70-20866

He-Ne laser investigated for He and Ne population inversion as function of discharge parameters 09 p1694 A70-22006

Fast neutral particles produced in electron-ion oscillation discharge as function of gas pressure and magnetic field 09 p1736 A70-23190

Electric discharge reactions in mixtures of phosphine with methane, ammonia and water, obtaining biologically significant inorganic and organic phosphorus compounds 09 p1630 A70-23396

Radiative capacity measurement for plasmas produced from nonconducting materials by pulsed discharges in magnetic field 10 p1923 A70-24252

Plasma instability in RF discharge in Ar in magnetic field 10 p1840 A70-24540

DC capacitance measurement based on capacitor discharge using auto-oscillatory macrocharge system variant as transducer of measured capacitance, time constant and insulation resistance 11 p1982 A70-25576

- Electric discharge machining technology, discussing quality control factors 12 p2239 A70-26990
- Carbon dioxide laser electrical discharge stabilization against transverse gas flow by cross magnetic field 12 p2250 A70-28099
- Gas phase chemicals synthesis via AC diffuse discharge superimposed on propane-air flame seeded with potassium carbonate in electrically augmented flame burner 14 p2546 A70-31097
- Discharged cleaned surface effect on accuracy and reliability of electron density and temperature measurements by Langmuir probes 15 p2778 A70-31765
- CW Cd vapor laser oscillation achieved with slotted hollow cathode discharge containing He carrier gas at pressures of several Torr 15 p2751 A70-31988
- Beam current instability and plasma heating by electron beam generated in linear discharge, discussing electron beam-cold plasma interactions 16 p2957 A70-33191
- Carbon dioxide laser action at 10.6 micrometers at pressures up to atmospheric by transverse electrical discharges 16 p2928 A70-33643
- Carbon dioxide electric discharge dissociation producing oxygen molecules 17 p3138 A70-35588
- Laser oscillation in atomic fluorine from electrically pulsed discharge of fluoride compounds-helium mixtures, identifying as 3p-2P and 3s-2P transitions in fluorine I 17 p3108 A70-35910
- Electric current pulses peak values measurement during aperiodic capacitor discharges, describing circuit with Rogowski coil, diode, capacitor and VTVM 19 p3426 A70-37938
- Energy distribution of ions transversal to magnetic field in argon plasma source with oscillating electrons, showing dependence on induction and discharge current 19 p3482 A70-38956
- Microwave apparatus for resonant frequency change and loaded resonator Q measurement during DC discharge afterglow electron removal studies 20 p3679 A70-39715
- Gas dynamics turbulence of controlled properties effect on electrical discharge across plasma stream, preventing filamentary nature 20 p3681 A70-40008
- Intense high ionization degree discharge plasma initiation at low gas pressures, using auxiliary discharge 22 p4078 A70-42356
- ### ELECTRIC ENERGY STORAGE
- Oscillatory discharge properties of capacitance power storage circuit used for pumping pulse lasers 06 p1081 A70-17768
- ### ELECTRIC EQUIPMENT
- Acoustic noise control on Boeing aircraft electromagnetic components, noting iron-core magnetostriiction demanding transformer redesign 09 p1647 A70-22764
- Design criteria for minimizing EMC problems confronting engineers of aircraft electrical and electronic equipment [SAE PAPER 700215] 11 p1980 A70-25887
- Similarity theory in design of isofunctional electric converters, relating input-output criteria 14 p2533 A70-30374
- Feedback in electrical networks, discussing transient processes within cybernetics framework 15 p2716 A70-32362
- Logarithmic amplitude characteristic of automatic rate stabilization systems for controlled electric actuator systems 18 p3215 A70-36296
- ### ELECTRIC EQUIPMENT TESTS
- Test setup to determine safe limits of atmospheric potential gradients in electroexplosive device initiation 03 p0549 A70-14136
- Fluidic curved-wall electro pneumatic converter optimization, presenting steady state, step and pulse mode responses for various positions and lengths of resistive heaters 09 p1614 A70-23691
- Improved standard electrical equipment components development by test by use method, reducing cost and time 15 p2828 A70-31572
- Soviet book on aircraft electrical and radio systems manufacturing, assembling and testing methods, considering effectiveness and standardization 19 p3357 A70-37405
- ### ELECTRIC FIELD STRENGTH
- Electron distribution function for steady homogeneous plasma of arbitrary ionization degree under strong electric fields, discussing kinetic equations for elastic and nonelastic encounters 02 p0346 A70-12231
- Cs atomic and molecular ions mobilities and drift velocities in Cs vapor at different pressures in low electric fields 04 p0722 A70-14715
- Ground wave electric field intensity prediction model in EMC applications, discussing soil conditions and polarization effects 07 p1336 A70-20217
- Quasi-near zone electric field intensity and current distribution of monopole antenna on finite conductive earth 09 p1645 A70-22691
- Polar gas phase dielectric under conditions of power saturation interacting with microwave radiation field in waveguide 09 p1728 A70-22908
- Millimeter band direct-transit klystrons oscillation and amplification at improved output power obtained by electron bunching in nonuniform drift fields 09 p1651 A70-23637
- Electrostatic energy converter load current analysis, deriving expression for space charge electric field with axially varying or constant charge distribution 10 p1808 A70-25036
- Plasma turbulence theory, discussing particles stochastic acceleration in strong electric field 11 p2094 A70-26753
- Electric field heating effect on edge photoluminescence of n-type GaAs, noting increase in electron energy 12 p2286 A70-27368
- Stark cell with high electric fields for studying inactive IR spectrum of homonuclear diatomic gas molecules 13 p2450 A70-28499
- Electric field sense and magnitude determination from lunar particle shadows in solar electron fluxes 13 p2492 A70-29196
- Predissociation of excited molecules in molecular hydrogen and deuterium by electric field as linear function of field strength 13 p2362 A70-29479
- Ionized impurity scattering in polar semiconductors by strong electric fields, using energy and momentum conservation equations in electron temperature approximation 13 p2472 A70-30017
- Electric field intensity and extension of space charge sheath for ion extraction from nitrogen plasma 14 p2622 A70-30661
- Earth-ionosphere waveguide electric field strength calculation based on nighttime ionospheric models, comparing results to measurements 14 p2574 A70-30748
- Nickel-doped p- and n-type Ge hot electrons recombination characteristics in strong electric fields, examining electron capture cross section 15 p2782 A70-31628
- Kinetic equation in strong electric fields, describing current carrier behavior in semiconductors 19 p3483 A70-37293
- Multivalley semiconductors electrical conductivity anisotropy, discussing redistribution and electron transfer under strong electric field 19 p3483 A70-37294
- Electric field strength in earth ionosphere and magnetosphere during irregular motion of fast ions and electrons 19 p3407 A70-37303
- Ion density and electron temperature variations as function of maximum electric field density in independently excited plasma column striations 19 p3475 A70-37552
- Breakdown electric field strength in S band microwave cavity for dry air, water vapor and mixture 19 p3423 A70-37757
- High field noise emission from indium antimonide, suggesting electron-hole plasma as source 19 p3486 A70-37767
- Current fluctuations in polar semiconductors in strong electric field, taking into account semiconductor band structure 20 p3686 A70-39589
- Electric strengths of liquid dielectrics during subjection to Q switched laser pulses, determining threshold currents for breakdown 22 p4051 A70-43338
- Homogeneous plasma in unidirectional oscillatory electric field, solving Boltzmann equation by electron distribution function expansion 23 p4225 A70-44240
- Ultrasonic absorption in SbSI semiconductors as function of temperature, illumination and constant electric field strength, noting absorption coefficient rise near Curie point 24 p4389 A70-45207
- Temperature, densities and electric field strength of cascaded arcs burning in He under normal pressure 24 p4384 A70-45425
- ### ELECTRIC FIELDS
- Laser mode locking due to saturable absorbers taking into account dispersive property of active material, expanding electric field within cavity 01 p0109 A70-10428
- Electric field effects on flame structure and propagation rate in methane-air mixture 01 p0217 A70-11013
- Electric field effects on dielectric properties and molecular arrangements of cholesteric liquid crystals with temperature dependent helical pitch 01 p0160 A70-11352
- Local thermodynamic equilibrium conditions in superhigh pressure He plasma produced by laser action, obtaining threshold electric field relationship with gas pressure and temperature 02 p0312 A70-12078
- Polar ionic exosphere electric field polarization, considering positive and negative charges escape fluxes, electric potential, mean ion velocity, etc 02 p0289 A70-12108
- Propulsion efficiency in air and in space measured according to relativity concepts, including electric field inertia explanation 02 p0355 A70-12364
- Antenna biasing with DC field to improve power handling capacity tested on U-slot and helical antennas 02 p0269 A70-12595
- Dynamic electric field in solar coronal exosphere on basis of kinetic and hydrodynamic theories, giving estimate of solar wind 02 p0359 A70-12609
- Electric fields in rotating magnetic relativistic neutron stars, analyzing static fields in corotating frame and pulsar emission 02 p0379 A70-12726
- Current density and electron concentration fluctuations in semiconductors under electric field, obtaining theory of light scattering at hot electrons 03 p0539 A70-13405
- Plasma stability in uniform magnetic and HF electric fields, observing magnetoacoustic wave generation at electron cyclotron frequency greater than HF field frequency 03 p0532 A70-13523
- Analytic solutions for focal plane electric field components in parabolic reflector antennas 03 p0457 A70-13697
- Electromagnetic wave propagation in semiconductors, considering effects of electric field, energy dissipation law and band structure 03 p0540 A70-13719
- GaAs nonlinear I-V characteristics and negative differential conductivity associated with electron heating by electric field 03 p0540 A70-13720
- Onset conditions for galvanothermal current instability of Ge semiconductors as function of electric field oscillations, carrier concentration and carrier-lattice temperature 03 p0541 A70-13724
- Optical rotatory power measurement for compensated cholesteric liquid crystal helical structure to observe thermally induced inversion and electric field perturbations 03 p0542 A70-14003
- Earth magnetosphere electric fields associated with magnetic disturbances, using satellite observations 04 p0676 A70-14459
- Resonance frequency shift in motional field-averaging system due to nonuniformities in static magnetic or electric field may cause unexpected systematic errors 04 p0721 A70-14665
- Inhomogeneous plasma oscillations in counterstreaming plasmas analyzed for electric fields and resonant frequencies from Vlasov equation 04 p0726 A70-14671
- Aperture electric field bounds presented for TE, TM and TE/TM excitation over azimuthally symmetric slotted cylinder subject to constraint of specified radiated power 04 p0649 A70-14969
- Conducting fluid steady convection due to combined effects of thermal gradient and DC electric field predicted by analytical model 04 p0785 A70-14989
- Electrostatic field effects of electromagnetic wave propagation in anisotropic plasma 04 p0728 A70-15002
- Rarefied ionospheric plasma flow around rockets and satellites, studying electric field effect on ion motion by kinetic equation and similarity law 04 p0680 A70-15188
- Directional pattern of waveguide radiators using Kirchhoff boundary values of electric, magnetic or electric and magnetic fields, discussing aperture reflection coefficient 04 p0653 A70-15397
- Coaxial electrodes with electric and magnetic fields to study instability in MPD arcs [AIAA PAPER 69-230] 04 p0737 A70-15542
- Electrically driven jets of slightly conducting viscous fluids drawn from conducting tubes, discussing cylindrical soap film instability under radial electric field 05 p0831 A70-15917
- Equivalent pressure concept for breakdown processes and sparking voltage of gas moving at angle to electric field across uniformly stressed gap 05 p0881 A70-16000

Nonequilibrium Cs plasma electron density, temperature and sustaining field using theoretical analysis and probe measurements

05 p0887 A70-16108

Plane magnetopause models assuming ionospheric electrons ability to short circuit electric fields, constructing distribution functions by Vlasov theory

05 p0840 A70-16568

Cloud chamber investigation of artificial cloud of water droplets in electrostatic field, discussing cloud precipitation, collection efficiency and fog dissipation

05 p0879 A70-16689

Low energy charged particle motion parallel with magnetic force lines analyzed in magnetosphere model with constant electric field

05 p0903 A70-16726

Electric field determination from charged particle concentration in wake of body moving in rarefied plasma, noting hydrodynamics similarity

05 p0915 A70-16754

Horizontal electric fields relations to charged particle fluxes in polar auroral ionosphere

05 p0842 A70-16756

Electromagnetic energy spectra of lightning expressed as function of electric field spectral density of atmospheric

05 p0843 A70-16762

Synchronous and asynchronous electrostatic motors based on action of electric fields charges, discussing design and construction

06 p0988 A70-17150

Numerical solution of nonlinear Vlasov equation for collisionless plasma problems, discussing initial value problems, external electric fields, magnetic fields, etc

06 p1108 A70-17419

Lagrangian invariance transformation application to steady state solution for Einstein-Maxwell equations interpreted as external field of charged isolated rotating source

06 p1106 A70-17747

Band extremum loops depth in CDS in electric and magnetic fields determined from calculating linear and nonlinear conductivity

06 p1126 A70-17819

Electric field in earth magnetotail via Explorer 33 and 35 satellite observation of solar electrons above 50 keV energy

06 p1058 A70-18528

Electric and magnetic fields of waterspouts measured by instrumented U.S. Navy aircraft

06 p1101 A70-18582

Unipolar induction to calculate moon interior electric field profiles, noting magnetic back pressure as limb shock wave and interaction with solar wind

07 p1377 A70-18970

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

07 p1385 A70-19447

Digital computer design of electric and radio equipment using secondary source method for field boundary calculation in inhomogeneous environment

07 p1241 A70-19480

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

07 p1349 A70-19553

Electric field diffraction by infinitely long dielectric cylinder due to normally incident cylindrical wave, computing asymptotic value by geometric theory

07 p1235 A70-19684

Induced current density of fully ionized stationary plasma in externally applied HF electric field, discussing frequency range of fluctuations

07 p1352 A70-19988

Molecular dipole moments-electric field interaction induction of cholesteric liquid crystal transition to nematic phase

07 p1225 A70-20053

Particle flux densities in electric field near spherical body moving in rarefied plasma

07 p1355 A70-20368

Lower ionosphere electric fields and currents vertical profiles above geomagnetic equator under quiet geomagnetic conditions from rocket data

07 p1277 A70-20453

Rarefied plasma flow past bodies, considering determination of aerodynamic coefficients, charged states, electric and magnetic fields and plasma parameters

08 p1432 A70-21087

Electric field effects on electrification of colliding ice spheres, discussing relaxation time of sphere charges and charge exchange

08 p1538 A70-21114

Polarized light electroreflection from GaAs single crystal, noting useful signal linear dependence on electric field

08 p1556 A70-21124

TEM waves penetration into magnetoactive semibounded plasma using Vlasov and Maxwell equations, obtaining electric field for specular reflection of electrons

08 p1551 A70-21255

Correlation functions of spatially inhomogeneous fluctuations in electron gas in strong electric field

08 p1552 A70-21423

Acoustic wave propagation in partially ionized gas in external electric field, solving differential equations by Laplace transformation

08 p1552 A70-21503

Trapped particle vibrations stability during quasi-neutral plasma disturbance due to centrifugal drift in stellarator electric field

08 p1555 A70-21982

Bounds on near electric field outside rectangular slot in conducting ground plane applied to microwave breakdown limitation

09 p1646 A70-22696

Room temperature cholesteric liquid crystals retention of information on past electric field excitation by changes in optical transmission properties

09 p1740 A70-22924

Charged particle self oscillatory motion in plane condenser field, applying results to electrical measuring instruments theory

09 p1680 A70-23144

Electrical narrowband noise model for laser speckle pattern, obtaining image intensity statistical properties

09 p1638 A70-23370

MGD model of plasma with dissipation due to finite electrical conductivity described by differential equations

10 p1922 A70-24144

Solar wind model with electrons, protons and alpha particles coupled by electric field and expanding due to pressure gradient and solar gravitation

10 p1931 A70-24433

Mapping electric field components perpendicular to magnetic field line in ionosphere at equatorial plane, discussing discrepancy with convection patterns

10 p1875 A70-24437

Electrodynamic generator channel electric field model, evaluating electric body forces on ionized working fluid flow

10 p1807 A70-24571

Power spectrum of light scattered by two level atom driven by monochromatic electric field obtained from atomic dipole moment correlation function

10 p1920 A70-24632

Microfluctuations frequency and wavelength of electromagnetic, electric and magnetic field distributions in plasma shock wave front found consistent with ion-acoustic origin hypothesis

10 p1925 A70-25031

Electrons radial motion and beam focusing in linear accelerator allowing for perturbing forces, calculating particle trajectory

10 p1926 A70-25110

Electric field structure at shock wave front propagating in weakly ionized gas under Ramsauer effect

10 p1871 A70-25121

Radiation fields of sources in plane stratified plasma medium calculated for amplitude transformation coefficient

10 p1843 A70-25155

Extraterrestrial electrical and magnetic fields effect on meteorological observations, noting relationship between atmospheric pressure distribution and ionospheric developments

10 p1913 A70-25269

EPR line width angle and temperature dependences assuming line widening due to electric field of lattice defects, dipole-dipole interactions and spin-lattice relaxation

11 p2097 A70-25382

Ion component drift displacing components from E and F layers ascribed to vertical electric field presence in hydrogen arc

11 p2104 A70-25541

Nonlinear effects in beam-plasma type interactions, studying particle redistribution under inhomogeneous oscillating electric field

11 p2095 A70-26759

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

11 p2020 A70-26813

Trumpet-type plane waves instability thresholds in plasma driven by electric field, including calculation of thermodynamic equilibrium

12 p2184 A70-27236

Impurity centers thermal and autoionization and effective capture cross section dependent on free carrier concentration in GaAs under electric field, allowing for plasma shielding

12 p2285 A70-27361

Electromagnetic wave penetration in plasma under uniform DC magnetic field, considering wave propagational direction and electric field

12 p2279 A70-27781

Transverse electric field distribution in multilayered dielectric loaded rectangular guides determined by ray optics and residue calculus

12 p2199 A70-28051

Electric field propagation model in proximal region above plane earth permitting solutions of EMI propagation problems

12 p2190 A70-28138

Electric field distribution in rectangular waveguide loaded with magnetized n-InSb at room temperature obtained by solving boundary value problem by variational method

12 p2202 A70-28163

Alternating electric field effect on weakly ionized gases, analyzing electronic temperature and harmonics generation

13 p2458 A70-28560

Cs atomic spectral line broadening under simultaneous electric and magnetic fields, observing Zeeman and Stark splitting

13 p2460 A70-28711

Electric field in rectangular MHD channel with ideally conducting electrodes in uniform magnetic field, considering conditions for maximum channel effectiveness

13 p2461 A70-28966

Polarized Lyman alpha radiation emitted in electron collisions with atomic and molecular hydrogen and by electric field quenching of metastable atom

13 p2455 A70-29221

Parametric excitation of potential oscillations in plasma near cyclotron frequency subjected to UHF electric and constant magnetic fields

13 p2463 A70-29281

Witness particle electric field as function of non-linear conductivity of weakly turbulent anisotropic plasma by perturbation method

13 p2465 A70-29638

Satellite plasma diagnostics for electric and magnetic fields and fine structure of collisionless shocks in solar wind plasma flows and interplanetary shocks

13 p2481 A70-30069

Energetic particles measurements in geomagnetic tail by Explorer 33/35 for determining gross magnetic topology of distant tail and electric fields

13 p2481 A70-30070

Ba ion cloud motions agreeing with electric field data from balloon measurement in ionosphere and magnetosphere

13 p2402 A70-30079

Auroral and polar cap ionospheric electric fields and tensor conductivity elements using ion clouds data of Ba release experiment

13 p2402 A70-30080

Ionospheric DC electric fields long period oscillations at high latitudes observed by polar orbiting Injun 5 satellite

13 p2403 A70-30081

Ionospheric electric fields variations in ELF-VLF, confirming OV-1 satellite measurements with OGO 6 data

13 p2403 A70-30082

Plasma wave particle interactions in outer magnetosphere, magnetosheath and solar wind, noting role of AC electric fields

13 p2483 A70-30085

Parametric oscillation instabilities in plasma under magnetic field perpendicular to circularly polarized or hybrid electric field

14 p2624 A70-31042

Hall, polarization and Pedersen charged particle drift velocities in static magnetic and time dependent electric field

14 p2624 A70-31046

Stress, strain, temperature, electric and magnetic field distributions resulting from magneto-thermoelastic interactions in infinite elastic solid subjected to transient heat source

14 p2661 A70-31229

Kinetic processes in plasma subjected to randomly fluctuating electric field, obtaining chain of single particle distribution functions

15 p2777 A70-31460

Spherical ionized cloud movement in ionosphere uniform anisotropic plasma as function of electric field applied to rocket released ion clouds

15 p2726 A70-31867

Uniform electric and magnetic fields effects on flow of conducting compressible fluid in channel, using multiple scales method

15 p2779 A70-31914

Longitudinal electric field effect on trapped particle motion in asymmetrical magnetosphere, considering electron precipitation

15 p2728 A70-31990

Diurnal variations in attenuation of ELF atmospherics over different propagation paths from recordings at distant ground stations

15 p2728 A70-31994

Electric field measurements in ionosphere using satellite and rocket experiments

15 p2729 A70-32082

Film condensation in tubes, considering liquid-vapor interface, zero gravity and electrostatic field conditions

15 p2828 A70-32541

Pressure broadened line widths in electric field induced fundamental hydrogen spectral band, noting linear variation with density

16 p2954 A70-33276

Electrostatic near wake model for ionospheric satellites, using low speed fluid dynamic blunt body similarities

[AIAA PAPER 69-674] Longitudinal and transverse electric field effects in magnetospheric electron precipitation, discussing trapped particle drift

16 p2837 A70-33867

Spatial electric field variations and electron distribution for beam plasma amplification, using nonlinear approximation

16 p2959 A70-34336

Rod antenna radiation representation by instantaneous pictures of electric field lines, considering wave detachment mechanism

17 p3050 A70-34575

Plasma waves parametric excitation by external electric field, using perturbation method of multiple scales

17 p3140 A70-34933

Two component fully ionized plasma in HF electric field, demonstrating suppression of runaway electrons in Lorentz plasma

17 p3140 A70-34934

Electric field component of waves in auroral ionosphere measured by double Langmuir probe field detectors, discussing wave-particle interactions and turbulence

17 p3096 A70-35767

Magnetospheric electric field configuration from trapped particle flux asymmetries, using Explorer 14 electron data

18 p3306 A70-36024

Electric fields in lower ionosphere during solar activity minimum above magnetic equator, using vertical profiles of ionospheric current magnetic fields and electron concentration

18 p3246 A70-36098

Air surface layer stationary electric field, considering ionization balance equation, turbulent diffusion coefficient, ion concentration vertical distribution, etc

18 p3247 A70-36520

Electric and magnetic field perturbation at great distances behind body moving in collisionless magnetized plasma estimated from Fourier transform

18 p3316 A70-36921

Polarization electric field in drifting ionospheric inhomogeneities, examining role of longitudinal currents

18 p3252 A70-36987

Ionospheric electric field formation from polarization of electron density inhomogeneities under anisotropic conditions

18 p3252 A70-36988

Electric field equations of plane EM wave diffraction at lattice of conducting cylinders, using Hankel function

19 p3375 A70-37289

High latitudes magnetospheric electric field structure, using electrostatic probes and artificial clouds

19 p3410 A70-37489

Fine structure of solar radiation-induced electrostatic fields on dielectric surface of comets and meteoroids

19 p3514 A70-37656

Electric field component equations of electromagnetic wave traveling through stratified plasma, considering incident and reflected ordinary and extraordinary waves

19 p3379 A70-37863

Auroral enhancement of IR oxygen band, considering electric field excitation mechanisms

19 p3414 A70-38383

Striation formation in artificial ion clouds aligned with local geomagnetic fields, considering visual indication of ionospheric electric field transfer along magnetic field

19 p3415 A70-38387

Point source electric field over different sections of impedance piecewise inhomogeneous surface, calculating attenuation function near boundaries

19 p3381 A70-38570

Skin effect for unsteady radio waves emitted into homogeneous nonmagnetic isotropic half space, calculating electric field

19 p3381 A70-38571

Thunderclouds electric fields and conductivities measurement by differential rotating mill, noting insensitivity to space charge and frictional charging

20 p3661 A70-39146

Whistler mode wave propagation amplitude, polarization and dispersion in lower ionosphere, discussing electric field experiment with Nike-Tomahawk sounding rocket

20 p3622 A70-39456

Electric fields influence on emission lines shape of multiply charged ions in coronal plasma, discussing kinetic temperature

20 p3704 A70-39462

Steady electric field effect on dense plasma cyclotron instability

20 p3678 A70-39595

Wave particle resonances broadening by particles random motion in turbulent electric field, determining cyclotron instabilities saturation level from vanishing nonlinear growth rate

20 p3679 A70-39661

Continuous electrode MHD generator ionization instabilities, measuring current distribution and transverse electric field

20 p3567 A70-40018

Electric and magnetic field components of step function excited electric dipole immersed in dissipative homogeneous medium with specified conductivity and dielectric constant

20 p3589 A70-40464

Ducted laminar and turbulent diffusion flames, examining electric fields effect on heat transfer, geometry and velocity field

20 p3739 A70-40471

Electric field structure at shock wave front propagating in weakly ionized gas under Ramsauer effect

20 p3685 A70-40514

Constant emf in bulk Ge and Si N-type semiconductors under multifrequency microwave electric field

21 p3861 A70-40636

Steady state magnetic and electric fields in magnetosheath by linear superposition of field vectors, using axisymmetric velocity function from gas dynamics

21 p3815 A70-41063

Rarefied ionospheric plasma flow around rockets and satellites, studying electric field effect on ion motion by kinetic equation and similarity law

21 p3819 A70-41169

Ion component drift displacing components from E and F layers ascribed to vertical electric field presence in hydrogen arc

21 p3882 A70-41291

Electron beam interaction with external harmonic microwave field in planar diode gap, calculating electric field current and voltage distribution functions

22 p3995 A70-42396

Large scale electric fields in ionosphere, magnetosphere and interplanetary space, considering further needs for theoretical and observational investigations

22 p4099 A70-42782

Ionospheric electric field origin theory in terms of charge separation due to neutral wind drag

22 p4016 A70-42785

LF electrostatic instability of Van Allen belt in outer trapping zone causing electric field in plasmopause

22 p4099 A70-42786

Collisionless magnetospheric plasma turbulent conductivities for weak and strong electric fields parallel to magnetic field

22 p4016 A70-42787

Upper atmosphere electric field nature, considering solar radiation as major source of ionization

22 p4017 A70-42788

Space electric field considered for solar wind plasma drift origin and possible energy source for spacecraft propulsion, estimating intensity on lunar surface

22 p4100 A70-42789

Upper atmosphere and magnetosphere DC electric field measurement using artificial clouds

22 p4017 A70-42791

Space DC electric field measurement by quadrupole probe, discussing geomagnetic field and contact potential effects

22 p4029 A70-42792

Rocket-borne double probe electric field detector design and operation, discussing error sources

22 p4030 A70-42793

Auroral zone electric field measurements from rocket-borne instruments

22 p4017 A70-42794

Ionospheric current theoretical model and balloon measurement of ionospheric electric field

22 p4017 A70-42795

Lower atmosphere electric field vertical distribution measurement by combined balloon and rocket soundings

22 p4017 A70-42797

Stratospheric electric field and conductivity measurements using balloon-borne electrometer tube circuit

22 p4018 A70-42799

Current densities and fields in quasi-neutral electron beam plasma, solving boundary value problem numerically

22 p4081 A70-42825

Impulse length effect on space echo electric field in collisionless plasma

22 p4082 A70-43237

Electronic damped plasma oscillations eigenfrequency in presence of external electric field

22 p4082 A70-43253

Oxidized Si surface recombination rate measurement by electric field effect, noting electron bombardment effects on electrical properties

22 p3998 A70-43443

Electric field finite amplitude oscillations of electron hole plasma during pinch effect, considering impurities stabilizing effect

22 p4084 A70-43468

Auroral electrojet, arcs, electric and magnetic fields relationship investigated by rocket-borne magnetometers and photometers

23 p4184 A70-43835

Dynamo region electrostatic fields effects on magnetospheric drift, taking electrical conductivities and solar and lunar tidal modes into account

23 p4185 A70-43836

Solar wind electric field relation to ground magnetic disturbances during magnetic storm from Explorer 28 and ground data

23 p4188 A70-44062

Electron distribution function in homogeneous ionized plasma under oscillating electric fields and steady magnetic fields, solving Boltzmann transport equation

23 p4226 A70-44248

External DC electric field effect on microwave absorption in plasma

23 p4226 A70-44372

Stark effect in hydrogen atoms for nonuniform electric fields, considering correction of energy eigenvalues of Schrodinger equation by WKB method

23 p4221 A70-44401

FSRO satellites missions and payloads, emphasizing studies of earth magnetic and electric field environment and of polar region particle measurements

23 p4191 A70-44663

Electric field radial distribution measured for stationary hydrogen arc with axial magnetic field

23 p4227 A70-44933

Electron runaway suppression in fully ionized Lorentz plasma by crossed magnetic and electric fields

24 p4382 A70-45105

Uniform HF electric field effect on ion-acoustic oscillation instability in nonisothermal magnetized current-carrying plasma

24 p4383 A70-45118

Impact ionization effects in electric field domain on stability of current-voltage characteristics of Gunn diodes

24 p4317 A70-45185

Franz-Keldysh and hot electron effects in interband absorption of semiconductors in external electric field

24 p4392 A70-46361

Spurious flexural vibrations in cylindrical mechanical resonators, transducers and wires used as component parts in electromechanical filters, indicating dependence on material dimensions and properties

02 p0268 A70-12450

Autocorrelation function distortion in pseudorandom signal with limited spectrum at RC filter output

03 p0446 A70-13202

Distributed RC notch filter normalized constants for dominant and nondominant transmission zero

09 p1654 A70-23025

Reactance filters for matching circuits design with optimum transforming performance

09 p1650 A70-23404

Vibrational motion sensors amplitude-frequency characteristics correction by passive electrical filters, deriving spectral transmittances

11 p2055 A70-26444

Ripple filters for DC power supplies using reliable small capacitance capacitors suitable for spacecraft applications

15 p2714 A70-32806

HF ballistocardiograms resonance distortions correction, using electrical selective filters

19 p3369 A70-38210

Stripline bandstop filter design method, discussing response shape and resonator number determination, reactance calculation, etc

22 p3999 A70-43488

NT TURBOGENERATORS
Output voltage stabilizers for thermal compensation in semiconductor power generating circuits, using stabiltron reference source
01 p0049 A70-10139
Optimal coercive force selection of residual inductance and energy of magnets for generators with star shaped rotors
01 p0008 A70-10192
Brayton cycle electric power generator simulation to study turbomachinery startup
03 p0415 A70-14050
High power giant pulse YAG laser using nonlinear material to achieve complete second harmonic conversion in intracavity experiment
05 p0859 A70-16470
Stand-by power supply for emergency lighting of Hamburg airport, discussing circuit connections for generators
08 p1482 A70-21371
Generator regulator for Ni-Cd batteries capable of sensing temperature, reducing charge rate and limiting output to increase batteries life
[SAE PAPER 700212]
11 p1983 A70-25884
Harrier fighter aircraft electrical supply system, considering generator design and installation
12 p2166 A70-27891
EGD energy converter system geometries for maximum power efficiencies, comparing slender conversion channels, abrupt expansion, free jet and divergent for operating characteristics
14 p2534 A70-30536
Variable speed constant frequency (VSCF) generators for avionics systems, discussing power, weight, volume, cost and reliability
16 p2910 A70-33486
Aircraft electric power generators performance, discussing transients, modulation and regulation of voltage and frequency
16 p2844 A70-33487
Invariance conditions in two parameter frequency control unit for electric power generator driven by variable speed motor
20 p3565 A70-39850
Axial pressure, electric current and potential distribution in two-phase particulate electrodynamic flow, discussing space charge electric field effect
20 p3683 A70-40257
Modular Dc to Dc switching mode converter for space power system
21 p3758 A70-41217
Mass spectrometer and high voltage converter powering electrostatic plasma and solar wind analyzer for cosmic space studies on Sputnik 3 and Heos A satellites
22 p4025 A70-42312
Planetary unipolar electric generator system theoretical model based on polarization charges deposition by solar wind
22 p4100 A70-42790
ELECTRIC IGNITION
Exploding bridgewire detonator electrical input requirements, discussing waveform, peak current and time to peak
03 p0550 A70-14143
ELECTRIC IMPULSES
U ELECTRIC PULSES
ELECTRIC LEADS
U ELECTRIC WIRE
ELECTRIC MOMENTS
Normal shock waves produced in argon and helium flow by holder with variable downstream porosity, measuring DC moments, component velocities and density
06 p1051 A70-18342
ELECTRIC MOTORS
NT MICROMOTORS
NT SYNCHRONOUS MOTORS
NT TORQUE MOTORS
Hall generator DC brushless motor operation and applications, obtaining motor action by rotor and stator magnetic fields interaction
02 p0228 A70-12053
Brushless DC motors speed regulation with electronic commutators, discussing photoelectric, magnetic sensing and magnetic-coil commutation
02 p0229 A70-12616
Temperature field in thermally stressed electric machine rotor obtained by solving Poisson and Laplace equations with digital computer, using network method
03 p0414 A70-13517
Synchronous and asynchronous electrostatic motors based on action of electric fields charges, discussing design and construction
06 p0988 A70-17150
Temperature distribution in active elements of explosion proof asynchronous electric motors with multichannel bilateral axial flow ventilation systems
07 p1196 A70-19841

Optimal traction drive system design for lunar roving vehicle, considering weight, energy consumption, operational flexibility, power supply, motor and power train
[SAE PAPER 700023]
11 p2030 A70-25375
Transistorized pistol grip probe design, circuit and operation for testing wobble and asymmetry in rotating ring commutators of electric motors
12 p2165 A70-27495
Brushless DC motor with rotor position sensor and transistor commutator for armature current switching, describing design and operation
12 p2165 A70-27525
Brushless DC motor consisting of permanent magnet rotor, wound stator and optical rotor position sensing
16 p2843 A70-33000
Gearhead DC/AC electric motors with wet/dry lubricants, discussing selection criteria for spacecraft boom deployment
16 p2846 A70-34139
Canister for protecting DC motors in Isis 1 antenna unit, noting pressure monitoring device and shaft seal
17 p3100 A70-34753
Electric machines magnetic circuit and motor shape, evaluating current, flux, resistance and reluctance
19 p3357 A70-37362
Brushless DC motor types and sources, describing electronic commutation, AC inverter and limited rotation torque
20 p3564 A70-39725
Closed loop automatic speed control system for working shaft of two stage alternating current electric servomotor, using invariance principle
20 p3564 A70-39849
ELECTRIC NETWORKS
Unconditional stability criterion of active two port in scattering and admittance matrix notation equivalent to conjugate matching for maximum power gain with part impedances
02 p0271 A70-12820
Electric network models of nonhomogeneous differential equations applied to elastic beam and thin plate bending and displacement equations
06 p1094 A70-17927
Electrical network models simulating initial and boundary value problems of applied mechanics, exemplifying with string free vibrations and thin plate bending
06 p1094 A70-17928
Linear networks fault detection and isolation using computerized test procedure and symbolic transfer function generation technique
11 p2029 A70-26337
Rectangular tolerancing of dipole impedance values scatter for random passive network samples
12 p2194 A70-26968
Distributed-lumped-active network to produce transfer function with pair of high Q zero real part sensitivity poles
12 p2196 A70-27652
Communication network approach to submillimeter wave applications in nondestructive testing, deriving transport equations for EM wave propagation
22 p4028 A70-42591
General Optimization Software Package for Electrical network and system design, noting application to engineering problems and education
23 p4177 A70-44750
ELECTRIC POTENTIAL
NT BIOELECTRIC POTENTIAL
NT CONTACT POTENTIALS
NT COULOMB POTENTIAL
NT PHOTOVOLTAGES
NT SPIKE POTENTIALS
EMI/electromagnetic interference/ antennas relative received voltage vs height above ground as functions of effective length, impedance, etc
01 p0042 A70-10087
Double injection in semiconductors at high current densities, discussing procedure yielding space charge and field distribution and voltage drop
01 p0154 A70-10123
Potential created by DC point source in ionosphere at high and medium geomagnetic latitudes, taking into account electrical conductivity anisotropy and altitude variation
01 p0080 A70-11225
Evoked potentials arising in entorhinal cortex of rabbits in response to stimulation of somatic nerves, light and sound
03 p0417 A70-13070
Electric potential fluctuations beyond long collisionless plasma cylinder in uniform magnetic field, noting thermal noise intensity
03 p0530 A70-13086
Voltage-step method to measure diffusivity of structured region in polar liquid electrolyte solutions, considering iodine near Pt microelectrodes in aliphatic alcohols
03 p0441 A70-14044
MOS devices radiation testing for estimating anticipated threshold voltage shift at various dose levels, including gate bias intermittent application during irradiation
04 p0658 A70-14745

Hall voltage measurements on Ta thin films using square wave generator current, discussing parasitic effects and suppression possibilities
05 p0863 A70-16366
Modulated high voltage pulse generator, using rectification of voltage obtained from HF oscillator
06 p1022 A70-17776
Circuit and operation of transistorized linear voltage-to-frequency converter performing current integration proportional to input signal
06 p1022 A70-17779
Multiple electrode probe characteristics in rarefied plasma flow created by ion source, noting electrode potential role
06 p1064 A70-17886
Instability of semiconductor circuit with nonlinear current-voltage characteristics, showing potential negative differential conductivity effect
07 p1240 A70-19274
Lumped element microwave Y circulator, describing device performance and ALGOL program for potentials calculation
07 p1241 A70-19751
Potential distribution outside ideally reflecting charged sphere immersed in resting plasma described by nonlinear integral equation, allowing for polarization
08 p1432 A70-21090
Potential gradient radiosonde field distortion formula, deriving form factors
09 p1671 A70-23602
Vacuum arc discharge phases before total breakdown, studying high combustion voltage relation to interplasma double layer potential difference
10 p1969 A70-25115
Digital-to-analog converter for voltage representation of signals in 2-4-2-1 binary decimal code
12 p2235 A70-27681
Gunn oscillator voltage supply influence on domain capacity, considering frequency stability
13 p2377 A70-29302
Shock waves in partially ionized gas discharge argon plasma, recording potential jump at wavefront
13 p2388 A70-29419
Transistorized voltage to pulse width converter based on constant current capacitor discharge
13 p2378 A70-29457
Frequency conversion during multiple phase modulation of supply voltage by pulse width technique
14 p2548 A70-30372
Reactive filter synthesis for step-voltage output inverter smoothing, using network theory
14 p2559 A70-30373
Cell electrode potential interphasial components, defining problems due to relevant interfacial electrochemistry concepts
14 p2533 A70-30526
Coupled temperature and electric potential distribution in finite rotational symmetric hydrogen arc column in axial magnetic field
14 p2621 A70-30656
Piezoelectric annular disk transducer mechanical response to step voltage input with prescribed temperature field
14 p2588 A70-31228
Growing ice crystals surface electric potentials during various stages of water vapor condensation
15 p2769 A70-31444
Regenerative semiconductor parametric amplifier saturation in forward current mode, assuming harmonic voltages /signal, pumping and difference frequencies/ action at p-n junction
15 p2708 A70-31522
B, In or Ga doped Si photosensitivity dependence on sample temperature, supply voltage and illumination intensity, determining optimal operating conditions
15 p2782 A70-31631
Power reduction consumed in vacuum by direct-current voltage converter by introducing delay into breaker transistor control at output stage
15 p2677 A70-31945
Ladder networks total transmittance and voltage transfer ratio and impedance or admittance, investigating signal flow graph open paths and Fibonacci sequence
15 p2715 A70-32344
Zener diodes as voltage transient suppressors for ground vehicle and aircraft power supplies
16 p2879 A70-34060
Space charge sign distribution sounding in atmosphere by electrode potential difference measurement
18 p3246 A70-36180
Current oscillations of GaAs Gunn diodes over wide voltage range, discussing device behavior dependence on polarity and applied voltage
18 p3230 A70-36197
Gunn effect pulse regenerators, describing random domain triggering rate voltage dependence comparison with Johnson noise predictions
19 p3387 A70-37820
Induction flometers operation, emphasizing various factors effects on induced voltage
19 p3426 A70-37936

- Two dimensional piezoelectric problems of electroelasticity, formulating general solutions in terms of stress and electric potentials using complex variables 19 p3487 A70-37946
- MOS structures deep depletion capacitance/voltage characteristics by ramp response method 19 p3389 A70-37972
- Gunn effect devices with concentric cylindrical electrodes, examining oscillation natural frequency-applied voltage relation 19 p3392 A70-38900
- Frequency discriminators output voltages under action of fluctuating signal and noise with arbitrary energy spectrum 20 p3584 A70-39254
- MHD flow in channel of arbitrary cross section, deriving velocity and electric potential distribution by variational principle 20 p3677 A70-39360
- Voltage programmed RF oscillator /VPO/ for spaceborne quadrupole mass spectrometer, describing transistorized circuitry 20 p3630 A70-39487
- Emitting plasma probes floating potential, discussing emission rate dependence on probe temperature and surface coverage by seed 20 p3632 A70-39607
- Voltage-to-frequency transducers with negative feedback, analyzing errors and conversion transconductance 20 p3601 A70-39789
- SERT 2 measurements for spacecraft and ion beam potential as function of thruster and orbital parameters, using hot wire emissive probes [AIAA PAPER 70-1127] 20 p3691 A70-40218
- Maintenance voltage of RF argon thermal induction plasma at atmospheric pressure as function of ring probe 21 p3859 A70-41904
- Corona and voltage breakdown for spacecraft electrical components in low pressure helium-oxygen atmospheres, measuring between parallel plates 21 p3851 A70-42124
- Rayleigh wave scalar electric potential analysis on piezoelectric medium, using iterative techniques for Poisson equation 22 p4074 A70-42967
- Stochastic heating of plasma in toroidal trap/stellarator, showing discharge ignition potential dependence on microwave oscillator frequency 22 p4084 A70-43394
- DC-to-DC converter design to supply different isolated voltages from single input 23 p4142 A70-43875
- Electrostatic potential distribution and ion trajectories in extraction gage design by computer 23 p4198 A70-44873
- Microwave transmission systems, determining electric potential functions in inhomogeneous dielectrics by Earnshaw theorem and finite difference computation 24 p4318 A70-45217
- Intermaterial adhesion relation to association contact resistance-tension characteristics based on electric potential barrier model for Maxwell-Wagner effect 24 p4379 A70-45617
- ELECTRIC POWER**
- Antenna biasing with DC field to improve power handling capacity tested on U-slot and helical antennas 02 p0269 A70-12595
- Electrodynamic compressor with direct conversion of electric energy into mechanical energy, improving conversion efficiency by using plasma as working medium 07 p1196 A70-19658
- Integrated electron density determination for plasma sheath on reentry vehicle based on power coupling change measurement 08 p1552 A70-21596
- Integrated microwave systems development taking into account cost effectiveness and anticipating kilowatt and megawatt systems 10 p1851 A70-24880
- Hybrid ring microwave power divider /rat race/ for equal or unequal power splitting 13 p2377 A70-29061
- Electrodynamic compressor with direct conversion of electric energy into mechanical energy, improving conversion efficiency with plasma as working medium 15 p2678 A70-32695
- High voltage DC electric power systems design for aircraft, considering filtering, transmission and loads interaction 16 p2844 A70-33475
- Solid state switching effect on aerospace electric power conditioning equipment [SAE PAPER 700306] 18 p3302 A70-36802
- One wavelength MHD induction generator, discussing field pressure gradients, fluid velocities, excitation and electrical output power 20 p3566 A70-40015

ELECTRIC POWER CONVERSION

U ELECTRIC GENERATORS

ELECTRIC POWER PLANTS

NT NUCLEAR POWER PLANTS

Mission model construction for power limited systems, discussing flight concepts, propulsion mixes and electric propulsion 01 p0183 A70-10848

High-strain fatigue life temperature dependence of austenitic and ferritic power plant materials compared to creep-rupture life 09 p1773 A70-22577

Solid state power controllers for aircraft electrical power systems [SAE PAPER 700304] 12 p2195 A70-27450

Power plant using carbon dioxide planetary atmosphere as working fluid, noting weight reduction 15 p2828 A70-32262

ELECTRIC POWER TRANSMISSION

Solid state multiplexed electrical power distribution system for future generation military and commercial airplanes [SAE PAPER 700301] 18 p3216 A70-36803

Aircraft electrical system multiplexing, discussing design features and advantages over conventional hard wired systems [SAE PAPER 700303] 18 p3216 A70-36811

ELECTRIC PROPULSION

NT ELECTROMAGNETIC PROPULSION

NT ELECTROSTATIC PROPULSION

NT ION PROPULSION

NT PLASMA PROPULSION

Solar electric spacecraft field interaction with space plasma affecting collection and interpretation of scientific data, emphasizing required system configurations and constraints [AIAA PAPER 69-1106] 01 p0162 A70-10601

Solar and nuclear electric propelled spacecraft applications to planetary and interplanetary missions, considering asteroid survey, out-of-ecliptic, Mercury orbiter, comet rendezvous, etc [AIAA PAPER 69-1108] 01 p0181 A70-10619

Propellant condensation on surfaces near electric rocket exhaust, calculating particle arrival rates, backflow and desorption energies [AIAA PAPER 69-270] 01 p0166 A70-10836

Advanced reconnaissance electric planetary spacecraft /AREPS/ concept for repeated coverage of Mars or Venus surface, using solar-photovoltaic system [AIAA PAPER 69-253] 01 p0196 A70-10837

Electric propulsion technology status for auxiliary and solar electric prime propulsion applications [AIAA PAPER 69-1107] 02 p0356 A70-12530
